The official journal of Guatemala, of January 7th, contained an announcement to the effect that, on the 18th of the same month, an act of treason had been committed by Colonel V. Mendez Cruz, the political chief of the department of Amatitlan. Taking advantage of his position, he pronounced against the Government, taking with him the fifty men of the garrison and some one hundred criminals from the prison, all well armed. The Government was informed of the movement, and that the people of Amatitlan had remained quiet. Colonel Julio García Granados was dispatched with a force of one hundred and sixty men, in pursuit of the rebels, who, after a short skirmish on the heights of Pinula, fled, leaving a number of killed, and some prisoners. At Tabasco they made another stand, but were forced again to fly, and were entirely dispersed. The report was that Mendez Cruz was in flight with only nine soldiers, of whom five were cavalry. A good number of Remington rifles were recaptured. Mendez Cruz was shot four days afterward by another band of rebels, to whom he was unknown.

In Jutiapa, the small garrison of twenty-five men had been attacked by a party of rebels, but these were driven off with three or four killed, and their leader, Donis, mortally wounded.

The revolutionary movement not having subsided up to February 1st, the Government issued a decree declaring the departments of the Centre and the East in a state of siege. General Barrios gave the rebels fifteen days to lay down their arms and return peacefully to their homes.

Guatemala, San Salvador, and Honduras, entered into a mutual agreement to permit each other's troops, whenever they were in pursuit of rebels, to pass unmolested through their respective territories.

The town of Escuintla was taken on the 11th of February by two hundred rebels, who

opened the jail and liberated the prisoners, carried off the cannon, burned the municipal archives, and sacked a large number of private dwellings.

The President, in March, visited the disturbed departments, and the people unanimously signified their adhesion to the Government.

During the absence of General García Granados, General Barrios, acting President of the republic, considering that the clergy ought, like other citizens, in temporal matters, to be subject to the common, civil, and penal laws of the republic, and enjoy only such privileges and exemptions as are established thereby, issued a decree abolishing all *fueros*, both in civil and criminal cases, and enforcing the Articles XV. and XVI. of the concordat issued by the Pope, October 7, 1852. This decree was prompted by the belief that several priests, forgetful of their mission, had begun to preach sedition.

It is thought that this decree, and another for the establishment of religious freedom, would remove two of the principal obstacles in the way of immigration into the republic. The immediate effect of the first was to suggest the organization of an army to wage war against the Government, and which was styled by its leaders "The Reactionary Army of the Holy Fathers." This band, some 400 strong, kept up a harassing guerrilla warfare for more than a month in the mountainous districts; and the Government was put to no little trouble and expense to overcome it, and reestablish peace.

Some time afterward, a decree was issued to the effect that such persons as desired to become exempt from military duty should pay \$10 each, if belonging to the laboring classes; and \$15, if of any superior class.

In the month of May, General García Granados issued a decree inviting the people to elect a new constitutional President, so that they might profit, by the dawning era of peace, to complete the organization of the Government.

The two candidates accepted by the country were Señor Granados himself, and his substitute, Señor Barrios. The franchise of this election seems to have been perfectly unrestrained, and numerous printed sheets, containing the expression of public opinion respecting the two candidates, were put freely in circulation. All the foreigners, a majority of the Liberal party, and a fair portion of the old Conservatives, were upholding General Barrios as the man of the occasion, and as a high-toned Liberal, who had given many proofs of his independent spirit. Barrios, above measure, had given general satisfaction, except to a small circle of ultramontanes. He was elected to the presidency by a large majority.

According to the official periodical of Guatemala, under date July 4th, all the city municipalities, in the name of the people, sent

in their adhesion to the Government in view of the threatened invasion of the republic by Enrique Palacios; and it was officially stated that the Government of Guatemala had dictated the necessary measures to be taken to aid Honduras in repelling the invasion; and further, that Salvador, as an ally of Guatemala, would, if necessary, do the same.

The feuds between the Government and the Church existed as late as the middle of July. The Government accused certain bishops of being reactionary in their principles and practice, which elicited an animated protestation from the prelates. Matters went so far that President Barrios decreed the banishment of Don Francisco Espinosa, Archbishop of Guatemala, from the country. The archbishop denied the accusations brought against him by the Government. The latter considered that Enrique Palacios, then heading the Sherman Expedition against Honduras, being a relative of Señor Espinosa, was not likely to be impartial. Besides, he had been believed by the public to be one of the chief reactionary supports in favor of the rebel factions in the country. The President said that, although he regretted it, he considered the banishment of the prelate necessary to the peace of the republic.

With this determined measure ended all the broils with the Church party, and General Barrios had no longer any serious obstacles to overcome in order to establish a permanent peace and insure the welfare of the inhabitants.

The republic, as has already been remarked, was for more than thirty years controlled by the Church party. Large portions of the best property in the country belonged to the Church, the revenue of which had reached fabulous proportions. Shortly after the establishment of the Liberal party, under the chieftainship of Granados, all the Jesuits and such of the priests as had made themselves prominently obnoxious in politics, were expelled from the country; but, as the church property still remained under their control, they were thus enabled to sustain their own party. In view, then, of these evils, and of their final suppression, a decree was issued, under date 27th of September, for the confiscation by the Government of all church property. The proceeds of the sale of this last will be deposited in a special treasury, destined to form an agricultural bank, the want of which has long been felt in the country, and the object of which is to increase and facilitate agriculture, and for that purpose the Government has limited the amount to be advanced on any one estate to \$5,000, at the low interest of six per cent. per annum.

The policy of the administration of General Barrios, like that of his predecessor, General García Granados, has been so far one of extreme friendliness to foreigners, every question that has arisen having been amicably and justly arranged, and every favor asked by

foreign representatives and consuls kindly and promptly granted. This line of conduct on the part of the liberal Government has gained for it the sympathy of the foreign population of Guatemala.

GUTHRIE, THOMAS, D. D., an eloquent and eminently useful Scottish clergyman of the Free Church of Scotland; author, editor, lecturer, and philanthropist; born in Brechin, Forfarshire, July 12, 1803; died at St. Leonard's-on-Sea, Sussex, England, February 24, 1873. His father was a banker, magistrate, and shopkeeper of Brechin, and of the Guthries of Guthrie, in which family a large number of the members had been clergymen, several had distinguished themselves as writers, and one, the stern old Covenanter, James Guthrie, had suffered martyrdom for his faith. Thomas Guthrie's early education was obtained in the academy of his native town, but, at the age of twelve, a stout, healthy lad, he was sent to the University of Edinburgh, and there passed through the under-graduate course of four years, the theological course of four years more, and a subsequent post-graduate course of two years; having entered college when quite young, he could not obtain his license to preach till he was twenty-two years of age. After receiving his license, he was still without a settlement, though there was a prospect of one before long, through the influence of his friend Mr. Maule, afterward Lord Panmure. He therefore went to Paris to study physical science, and, to some extent, medicine. Returning home after a somewhat extended tour on the Continent, he was still without a parish, and, for two years, devoted himself assiduously to acquiring a knowledge of banking in his father's banking-house. In 1830 he was presented to the parish of Arbrirlot, in Forfarshire—a small village with a population of about 1,000 souls. Here he preached, with constantly-growing reputation, until 1837, when he was called to Old Greyfriar's Church, near the Cowgate, in Edinburgh—a field where, while his congregation was largely composed of the educated and refined, his parish included the poorest and most wretched and degraded inhabitants of the Scottish metropolis. With almost superhuman energy he plunged into this mass of down-trodden, poverty-stricken, and vicious humanity, and had succeeded in bringing some order out of confusion, some gleams of comfort out of the gloomy and filth-sodden wretchedness there; and, while preaching such sermons and making such appeals as brought the learned, the aristocratic, and the wealthy in crowds to hear him, had built a new church in the Cowgate, especially for the poor and degraded, and was establishing ragged schools for them, when, in 1843, the struggle between the patronage and anti-patronage parties took place in the General Assembly of the Kirk of Scotland—a struggle in which he had engaged, with his whole soul, in opposition to the pre-

sentation of clergymen to their parishes by patrons, without the consent and approval of the people of the parishes; and, one fine morning in May, Thomas Chalmers and Thomas Guthrie led the way out of the General Assembly, and 462 ministers of the Scottish Kirk followed them. This disruption meant, of course, the giving up of their parishes, their churches, their manse, and their means of support. It was a grand movement, such as could only have been made in a country like Scotland; and, though there were many sufferers for it, yet in the end the country was greatly benefited, and the cause of religion promoted by it. Here was a new field for the exertion of Dr. Guthrie's great executive ability. His congregation for the most part followed him; but a new church was to be built, and a new organization created for Christian work; and Dr. Guthrie was too broad and large-hearted a man to rest satisfied with caring for his own congregation alone. On the contrary, he embraced in his active sympathies all those who had come out from the Kirk. There were new churches to be built all over Scotland, new parishes to be organized; the aristocratic landholders, vexed at the disruption, often refused to sell sites for the new churches; and the people, amid the inclement winters of North Britain, were obliged to meet for worship in the open air; the ministers were turned out of their manse, and had but little and very miserable shelter for their families; and some perished from the exposure. Dr. Guthrie was equal to the occasion: he preached in the open air to some of these congregations in the severest storms of winter, and then, appealing to Parliament for relief, so shamed and confounded the Scottish lairds, that they made haste to sell, and, in many instances, to give, sites for the free churches. Traversing the entire island of Great Britain from north to south and from east to west, he raised, by subscription, in a single year, the magnificent sum of \$580,000 in gold, to erect manse for the suffering ministers. He returned to Edinburgh with this work accomplished, but to begin other labors, more local, but not less beneficent; but his vigorous constitution had been overtaken, and, from that time, he was troubled with heart-disease. His zeal, however, knew no

intermission. The death of Dr. Chalmers, in 1847, added greatly to his labors, as on him came much of the public work which that great man had done so well. For the twenty-five years that followed, though often laid aside by illness, Dr. Guthrie's labors were herculean. Though not in the strictest sense the originator of ragged schools, he was the first to establish them on a large scale, and to develop their reformatory power. He was also the first to adopt the plan of feeding and partially clothing the children while they were under instruction. He took hold of the temperance reform, of which there was great need in Edinburgh, with the same resistless energy with which he had pushed other reformatory measures, and had the satisfaction of knowing that he had been the means of rescuing thousands from a drunkard's grave. Both in Scotland and England the great enterprises he was carrying forward required him very frequently to address public assemblies of all descriptions; and he had no superior in Great Britain as a platform-speaker. His eloquence, his ready wit, his abundant and always apposite illustrations, and his ample fund of facts and statistics, made him always a popular orator. Nor was he less ready with his pen than with his extemporaneous addresses. Whether he was putting forth his earnest "Plea for Ragged Schools;" his pathetic delineations of "The City; its Sins and its Sorrows;" his touching and tearful "Plea for Drunkards;" drawing word-pictures of matchless beauty in his "Gospel in Ezekiel," or preaching from the printed page in his "Discourses from Colossians," "Speaking to the Heart," "The Way of Life," "Man and the Gospel," or "The Parables;" or writing those brilliant leaders, Bible studies, and wayside sketches, for the *Sunday Magazine*, of which he was for nine years editor—he was never dull, dry, or uninteresting. The man had evidently something to say, and he had a faculty of saying it in such a way as to charm and interest all who heard or read his writings. He had traveled extensively, and made good use of his travels in illustrating his discourses. Nearly all his works have been republished here, his autobiography and memoirs, as well as a collected edition of his works, having been issued in New York since his death by Messrs. Carter & Brothers.

H

HALE, JOHN PARKER, LL. D., an American Senator and diplomatist, born in Rochester, Stafford County, N. H., March 31, 1806; died in Dover, N. H., November 18, 1878. He received his early academical training at Phillips Academy, Exeter, N. H., whence he passed to Bowdoin College, graduating in 1827, with high honors. He studied law at Dover, and was admitted to the bar in 1830. While

in the enjoyment of a large practice, he was elected to the New Hampshire Legislature by the Democrats, and at the expiration of his term was appointed by President Jackson United States Attorney for the District of New Hampshire. He held this position until 1841, when he was removed by President Tyler. In March, 1848, the Democrats elected him to the United States House of Representa-

tives, when Mr. Hale, in opposition to the sentiment of his party, then in the height of its power, took the side of the antislavery element. Notwithstanding this act, however, a Democratic convention again nominated him for Congress, but, having immediately afterward strongly opposed the annexation of Texas on antislavery grounds, he was declared a traitor to his party; another convention was called, and a regular Democratic candidate placed in nomination. In the election that followed, Mr. Hale having run as an independent candidate, there were three candidates in the field; but, as there was no majority, there was no choice, and the district was not represented in that Congress. In 1846, he was chosen a member of the Legislature, was made Speaker, and in 1847, by a combination of votes from different parties, he was elected to the United States Senate. He opposed, in the Senate, Mr. Clay's compromise measures, and showed the same resolute, defiant spirit that he had evinced in the early period of his public career. Mr. Hale was engaged as counsel, in 1851, in the important trials which arose out of the forcible rescue of the fugitive slave Shadrach from the custody of the United States Marshal, at Boston. In August, 1852, the Free-Soil Democracy, who professed open and thorough hostility to slavery extension, and all pro-slavery compromises, held their nominating convention at Pittsburg, and presented his name for President, with that of George W. Julian, of Indiana, for Vice-President. At the succeeding election, where-in Scott, the Whig nominee, carried only four States, and Pierce carried the remainder, the Hale and Julian electors received, in all, 157,685 votes, of which 440 were from the slave States. At the close of his term, in 1853, the Democrats were in power, and he was not re-elected. He devoted the ensuing two years to professional duties in Dover, and in 1855 was elected again to the United States Senate, for the short term, which ended in 1859, when he was re-elected and served until 1865. Mr. Hale was, in all, sixteen years a member of the Senate, including the war-period, except the last five weeks of active hostilities. He zealously supported President Lincoln's Administration, sustained the leading measures, spoke frequently on public questions, and was, in all respects, an able and valuable member. A few days after retiring from the Senate, in 1865, he was appointed minister to Spain by President Lincoln, and held that post until July, 1869, a period of four years, during which time he acted judiciously in dealing with the complications arising from the overthrow of the monarchy and the revolt in Cuba. The latter part of his diplomatic career was clouded by protracted ill-health, a legacy, as he supposed, from the mysterious attacks of poisoning, at the National Hotel, in Washington, in the winter of 1864-'65. A quarrel, which proved singularly malignant, between

Mr. Hale and his secretary of legation, also embittered his life at this time; and, when both were recalled by President Grant at the commencement of his first term, Mr. Hale retired to his home with broken health, and his spirits deeply depressed. He had since taken no part in public affairs. His always active brain showed signs of overwork, and to great bodily suffering there was added an impairment of his mental faculties, which rendered the closing years of his life somewhat gloomy, though surrounded by a devoted family, and hosts of loving friends. Within little more than a year before his death he twice met with severe accidents, one of them in July, 1873, being the proximate cause of his death. There is a high place reserved for him among those thinking and talking men who founded the Antislavery party, and educated the public mind in America to the point of resistance to the claims of the slave power. This is his honorable public record. The memory of his private virtues will long remain green among his native hills.

HARDEE, WILLIAM J., Lieutenant-General in the Confederate Army, an American soldier and author, born in Savannah, Ga., in 1817; died in Wytheville, Va., November 6, 1873. He entered the Military Academy at West Point in 1834, from Georgia, and graduated in 1838, ranking twenty-sixth in a class of forty-five. He was commissioned second-lieutenant of dragoons and served in the Florida War until 1840, having been made first-lieutenant of dragoons in December, 1839. Mr. Poinsett, who was Secretary of War at that time, had taken an interest in young Hardee, and sent him to the celebrated French Cavalry School of Saumur, about eighty leagues from Paris, that he might be more thoroughly trained as a cavalry officer than he could be at home. He remained there two years, and became very accomplished in the theory and practice of cavalry tactics. He was next put on garrison and frontier duty in Louisiana, promoted to a captaincy in the Second Dragoons, September 13, 1844, and took part in the military occupation of Texas under General Taylor, was captured and held a prisoner by the Mexicans from April 25th to May 10, 1846, and subsequently took part in most of the battles of the Mexican War, being brevetted major and lieutenant-colonel for gallant and meritorious conduct in several engagements. For the next five years he was most of the time (except when on leave of absence) on frontier duty in Texas. From 1853 to 1855 he was engaged with Lieutenant Benet, of the Ordnance Corps, by order of Jefferson Davis, then Secretary of War, in translating and compiling "Rifle and Light Infantry Tactics," from a French tactical work, "*L'Exercice et Manœuvres des Bataillons de Chasseurs à Pied*," a work which, after further revision by a board of army officers, was adopted in March, 1855, for the use of the army and militia of the United States. In March, 1855, Captain Hardee was promoted to be major

of the Second Cavalry. During 1855 and the first half of 1856 he was employed in garrison and frontier duty, and in July, 1856, appointed commandant of cadets and instructor of tactics at the Military Academy, with local rank of lieutenant-colonel. He remained here till September 8, 1860, being promoted in June, 1860, to be lieutenant-colonel of the First Cavalry. He was on leave of absence from September 8, 1860, to January 31, 1861, when he resigned and joined the Confederate army. Here he was presently promoted to be brigadier-general; in December, 1861, made major-general; and in October, 1862, lieutenant-general. General Hardee acquitted himself respectably in the war, holding prominent commands in Arkansas, Kentucky, at the battles of Perryville, Stone River, Chickamauga, and Missionary Ridge; subsequently for a short time, after Bragg's defeat, he was in command of the Southwestern Army, but soon resigned this position to General J. E. Johnston. After Hood succeeded Johnston, General Hardee requested to be relieved, and was appointed to the command of the Department of South Carolina. When Sherman marched upon Savannah, General Hardee went there to attempt its defense, but was promptly driven out and retreated to Charleston; but, finding himself flanked by the advance of the Federal troops and the fall of Columbia, he caused the cotton-warehouses and the arsenals to be fired, and hastily retreated. He finally joined the forces of General J. E. Johnston, and surrendered with them in North Carolina. He never exhibited any special tact or ability in his military movements, but won, as he deserved, the reputation of being a courageous and prudent officer. After the war, General Hardee lived in comparative retirement. He frankly accepted the results of the conflict, and labored to the best of his ability to restore good feeling between the once hostile sections.

HARDWICKE, Rt. Hon. CHARLES PHILIP YORKE, Earl of, Admiral R. N., P. O., D. C. L., F. R. S., born in London, April 2, 1799; died in that city, September 17, 1873. He was educated at Harrow, and at the Royal Naval College. He entered the navy early, and saw much active service in the naval actions which occurred from 1815 to 1830. He served as a midshipman at the attack on Algiers, under Lord Exmouth. He was a member of Parliament for Reigate in 1831-'32, and for Cambridgeshire, from 1832 to 1834, when he succeeded his uncle as fourth Earl of Hardwicke. In 1848 he was captain of the *Vengeance*, and on the revolt of Genoa against Victor Emmanuel he quelled the disturbance and handed the town over to the legitimate government. The earl had attained the rank of admiral in 1864 or 1865, was Lord-Lieutenant of Cambridgeshire, had been a lord-in-waiting to the Queen during Sir R. Peel's administration, Postmaster-General under Earl Derby's first administration in 1862, and Privy Councillor from the

same date, and Lord Privy Seal during Earl Derby's second administration in 1858-'59.

HAYTI. See **SAN DOMINGO**.

HEWIT, HENRY STUART, an eminent physician of New York City, was born December 26, 1825, at Fairfield, Conn., and died August 19, 1873, in New York. He was educated at Yale College, studied medicine with Drs. Mott and Van Buren, and graduated from the New York University, March, 1847; he first entered the army as acting assistant-surgeon in the fall of 1847, and was stationed at Vera Cruz during the latter part of the Mexican War (the yellow fever was very prevalent there, and he came near losing his life from this scourge); he received his commission as assistant-surgeon, March 6, 1849, and was stationed at Fort Yuma, Cal. He also accompanied Captain Warner on his famous and fatal (to Warner) surveying expedition. He resigned his commission in the spring of 1852, and commenced the practice of medicine in San Francisco, where he remained about three years; then he established himself in New York City in the practice of medicine. Having received his commission as brigade-surgeon of volunteers, August, 1861, he re-entered the army, and was stationed, first, at Paducah, under General O. F. Smith; afterward he served as medical director on General Grant's staff at Donelson, Vicksburg, Shiloh, etc., and also as medical director on General Scofield's staff. While on General Grant's staff he usually accompanied the general on the field, and at one time narrowly escaped being hit by a cannon-ball, which fell between his horse and that of Grant. He was brevetted colonel March, 1865, for faithful and meritorious conduct during the war. He was admitted as a member of the New York Academy of Medicine February, 1868, and was also member of various other medical societies. He was converted to Catholicity in 1855. After the war he had the entire charge of the House of the Good Shepherd, St. Stephen's Orphan Asylum, and at the time of his death was also President of the Medical Board of Charity Hospital and school trustee of the Twenty-first Ward. His father, the Rev. Nathaniel Hewit, was a distinguished Presbyterian clergyman, of New England, and was particularly known as a leader in the great early temperance movement both in this country and in England. His mother was the daughter of Hon. James Hillhouse, of New Haven, Conn. "One of the most remarkable men and eminent civilians the country has produced," and who won renown for himself both in his own State and in the U. S. Senate, Dr. Hewit was devotedly attached to his profession, a man of eminent social qualities, an ardent patriot, and exceedingly charitable.

HITCHCOCK, Rev. HENRY LAWRENCE, D. D., late President of Western Reserve College, Hudson, Ohio, born in Benton, Ohio, October 31, 1818; died at Hudson, July 6, 1873. He was a son of Hon. Peter Hitchcock, formerly

member of Congress, and Chief-Justice of the Supreme Court of Ohio. He was prepared for college at Hudson, entered Yale College in 1829, and graduated thence in 1832. He taught in Benton Academy for two years, entering Lane Theological Seminary in 1835, and was ordained in November, 1837, as pastor of the Presbyterian Church in Morgan, Ohio. In June, 1840, he was called to the pastorate of the Second Presbyterian Church in Columbus, Ohio, where he remained fifteen years. In July, 1855, he was elected President of Western Reserve College, at Hudson, and became, at the same time, pastor of the College Church. He continued in this position till 1871, and was very successful in building up the interests of the college. He resigned in 1871, and spent some time abroad, but returned, with his health, which had been impaired, apparently restored. He continued to reside in Hudson till his death. Dr. Hitchcock was a man of fine culture and thorough scholarship, and had worked perseveringly in the face of great obstacles and discouragements as President of the Western Reserve College. He received the degree of D. D., from Williams College in 1855.

HODGE, HUGH LENOX, M. D., LL. D., an eminent physician and medical writer of Philadelphia, born in that city, June 27, 1796; died there, February 26, 1873. He was the eldest son of Dr. Hugh Hodge, a distinguished physician of Philadelphia almost a century ago, and brother of Prof. Charles Hodge, D. D., LL. D., of Princeton, N. J. He graduated from Princeton College in 1814, with high honors; studied medicine in the University of Pennsylvania, and took his medical degree in 1817. Having made the study and practice of obstetrics a specialty, he achieved great distinction therein, and in 1835 succeeded the eminent Dr. Dewees as professor in the university. This chair he retained until 1863, when he felt compelled, by advancing years, to resign it. On this occasion, the trustees conferred upon him the degree and title of Emeritus Professor. For a long while Dr. Hodge was one of the editors of the *North American Medical and Surgical Journal*. He was also the author of "Hodge's System of Obstetrics," and of a work on "The Diseases peculiar to Women," both standard text-books with the profession. Such was his reputation, that patients flocked to Philadelphia from all parts of the country, to put themselves under his skillful care and advice, through a long series of years. He had published, in addition to the works above named, numerous lectures, addresses, pamphlets, and reports of cases, and continued to write for the press till within a week of his death. Professionally, socially, and religiously, Dr. Hodge was a man universally esteemed, and his death was greatly lamented.

HOLLAND, Sir HENRY, Bart., M. D., D.C.L., F. R. S., an English traveler, author, and physician, born at Knutsford, Cheshire, England,

October 27, 1788; died in London, October 27, 1873. He was at first destined for a mercantile career, but, having spent two sessions in the University of Glasgow, he became enamored with the medical profession, a choice which, at the close of his long life, he had never regretted. He was educated for the medical profession in the University of Edinburgh, which he entered in 1806, and from which he graduated M. D. in 1811. Even before entering the Edinburgh University he had made some successful attempts at authorship, having published two metaphysical essays—one on "Liberty and Necessity," the other on "The Passions in their Relation to the Intellectual Nature of Man"—before he had attained his seventeenth year, and a county report to the Board of Agriculture on the "Agricultural Condition of Cheshire," for which he received \$1,000, before he was eighteen. In 1810, while a student at Edinburgh, he spent four months in a visit to and a tour in Iceland; and, after receiving his medical degree, he devoted a year and a half to a tour through Southern Europe, visiting Portugal, Spain, Sicily, the Ionian Isles, Greece, and several of the Turkish provinces. In 1814 he published a narrative of a part of these travels, especially those in Albania and Thessaly; and the same year commenced a journey through Germany, Switzerland, and Italy, as medical attendant on the Princess of Wales. In January, 1816, he settled in his profession in London, and almost at once entered upon a large practice, increased by his spending two months, professionally, at a spa (Aix-la-Chapelle) at the close of the London season, where he formed the acquaintance and friendship of the eminent Englishmen and foreigners who frequented that then celebrated watering-place. In four years his practice had become so large and profitable as to warrant his taking the large and commodious residence in Brook Street, where he continued to reside till the close of his long life. But, though enjoying such a large and growing practice, he would not be turned aside from a resolution which he had formed before settling in London, to devote at least two months of the autumn to foreign travel. He maintained this resolution to the close of life, in two instances only taking his vacation in Scotland or Ireland; but, in the course of his fifty-six or seven annual journeys, he had visited the United States and Canada eight times, traveling 26,000 miles on this continent; had visited the West India Islands once; the East, including Constantinople and the Holy Land, four times; Northern Africa, the same number of times; Russia, three times; Sweden and Norway, several times; Iceland, twice; Spain, Portugal, and Italy, often; and the Canary Islands, Madeira, Dalmatia, etc., etc. His practice, meanwhile, which in 1820 was worth \$6,000 a year, and rapidly increasing among the wealthy and aristocratic classes, had, a few years later,

reached \$25,000 per annum, and he determined not to go beyond that limit, and did not. In 1837 he was appointed one of the physicians extraordinary to the Queen, and, on her marriage, he held the same relation to the prince-consort, to whom he afterward became physician-in-ordinary. In 1852 he was appointed physician-in-ordinary to the Queen, and in April, 1853, created a baronet. His wife, who died November 2, 1866, was a daughter of Rev. Sydney Smith. Besides the "Agricultural Survey of Cheshire," "Travels in Albania," and metaphysical essays already noticed, Sir Henry had published a volume of his collected essays in the *Edinburgh and Quarterly Reviews*; "Medical Notes and Reflections," 1839-1855; "Chapters on Mental Physiology," and numerous uncollected essays, papers, and addresses. His last work, published at the beginning of 1872, was his "Recollections of Past Life." This, as well as some of his previous works, was reprinted here. Most of his earlier works had been translated into German and some of the other languages of Continental Europe. Without possessing the highest order of talent, Sir Henry was a fine scholar, a proficient in both classical and scientific literature, a skillful physician, a keen but general observer, and always a gentleman of the old school in his manners and address. In his vast circle of acquaintances he was universally liked and esteemed.

HONDURAS (*REPÚBLICA DE HONDURAS*), an independent state of Central America, lying between latitude 13° and 16° north, and longitude 85° 39' and 89° 6' west; and bounded north by Guatemala and the Gulf of Honduras; southeast by the Caribbean Sea; south by Nicaragua, Fonseca Bay, and the Republic of San Salvador; and west by the latter republic and that of Guatemala; area, 58,168 square miles; population, about 360,000, of whom 170,000 are Indians, 180,000 mestizoes, 5,000 whites, and the remainder negroes. The President (provisional) is C. Arias; the Minister of Foreign Affairs, War, and Finance, A. Alvarez; the Minister of the Navy, and of Public Instruction, C. Celio Arias; and the Bishop of Comayagua, J. F. Zepeda, appointed in 1861.

The army is composed of 600 men in time of peace, and there are 6,000 militia.

According to a communication of the ex-President of the republic, T. M. Medina, the value of the exports may be computed at \$1,805,000, distributed as follows: Gold and silver, \$600,000; indigo, \$200,000; cattle, \$150,000; timber, \$180,000; and hides, etc., \$100,000.

The foreign trade is carried on through the ports of Trujillo and Omoa, on the Atlantic; and Amapala, on the Pacific. The port of Medina is no longer open to foreign commerce. The commercial intercourse is for the most part with Great Britain; but there are no official returns of either the exports or the imports, owing perhaps to the fact that the customs at

the above-named ports are farmed out to individuals whose interest is to conceal the precise amount of their revenue. The resources of the country are now almost wholly undeveloped. The finances, too, are in disorder, partly owing to prolonged strife, aggravated in 1872 by a war with San Salvador, and again, in 1873, by the renewal of hostilities with the same republic. Semi-official reports give the total public revenue for 1870 at \$388,000; about one-third of which is derived from custom-house receipts, and another third from the sale of rum, etc., monopolized by the Government. The expenditure has for a number of years exceeded the income, the deficit being made up by loans. At the end of 1872 the foreign debt of the republic amounted to \$29,950,540, consisting of three loans: the first contracted in London, in 1867, for the nominal amount of \$5,000,000; the second in Paris, in 1868, for the nominal amount of \$12,450,540; and the third in London for the nominal amount of \$12,500,000. The British loans, at 10 per cent. each, were issued at the price of 80; the French loan was at 6 per cent., and issued at 75; and all were raised for the professed purpose of building an interoceanic railway from Puerto Caballos on the Atlantic to Fonseca Bay on the Pacific. In the prospectus of the last loan it was announced that the entire railway would be completed and in working order by the end of 1872; but, at the period mentioned, only 62 miles on the Atlantic side had been constructed out of a total of 225 miles; and the work was suspended for want of funds, and owing to the outbreak of the war with San Salvador.

In May, 1872, the Government issued at the London Stock Exchange the prospectus of a ship-railway loan of \$75,000,000, for the purpose of adapting the Interoceanic Railway to a ship-railway across the republic, that is to say, a railway capable of conveying ships of large tonnage to and from the ports of Puerto Caballo, on the Atlantic, and Fonseca Bay, on the Pacific, without disturbing the cargo. The loan was to be in 150,000 bonds, of \$500 each, issued at the price of 80, and to be repaid in fifteen years; but no subscribers offered in Great Britain.

On January 16, 1873, Messrs. Waring Bros. & McCandish threw up their contract for the Honduras Railway, and ceased from that time to have any connection with the enterprise. The trustees of the original Honduras loan took charge of the railway, works, etc., it being understood that the latter would be continued to completion if the loan for that purpose should be successfully floated.

The insolvent situation of the republic was a subject of much thought and no little apprehension on the part of the British bondholders, who held a meeting in London in the month of January, Captain Bedford Pim, of the Royal Navy, being in the chair. That gentleman expressed his regret to announce that neither cou-

pon nor drawing was then forthcoming, but added that such an idea as repudiating the national debt had never for a moment been entertained by the Honduras rulers, and that, on the contrary, he could assert, without fear of contradiction, that every exertion had been made to fulfill the financial obligations of the state, and complete the Inter-oceanic Railway, upon which rested the hopes of both natives and bondholders. He believed that the indebtedness would be faithfully discharged, if only time were allowed; that all the loans had been raised for the sole purpose of constructing the railway; and that the Government had only applied a very small proportion of the funds to any other purpose than the railway during the five years then elapsed since 1867. The chairman having next replied to certain inquiries made by letter, and adverted to the series of untoward circumstances which had retarded the progress of the railway, enumerated the events which had occurred since the previous meeting, touched upon the opposition he had met with in Paris while endeavoring to negotiate a new loan there, and read a statement from the Honduras commissioner, Dr. Bernhard, which was regarded as encouraging, and in view of which "it might fairly be hoped that the bondholders' interest would not suffer." Dr. Bernhard said that the object of his visit to England was to see the bondholders, and inquire into the possibility of raising the necessary funds in that country; that sixty miles of the railway had been opened to public traffic on November 20, 1872; and that, for the second and third sections, thirty to thirty-four miles of rails were ready, as were also the locomotives. He added that there was no lack of passengers and goods traffic to support the line, and that of copper there was an inexhaustible supply, but no means of carrying it to the coast. A committee of examination was then appointed, composed of Messrs. Fitzgerald, Armstrong, Sickles (U. S.), Higgins, and Seymour, Major-General Course, of the U. S. Artillery, and others.

By way of contrast to the foregoing reports, it may not be inopportune to state here that the general tone of the Panama and Central American press does not tend to confirm the statement of Captain Pim, but rather to show that the people of Honduras have made up their minds that the railway and the railway loan is a grand enterprise, cunningly set on foot by the Government for its own special benefit.

The *Panama Star and Herald*, of June 17th, has the following extract from a Comayagua journal:

"The credit of Honduras was guaranteed in Europe for \$5,000,000, intended to be devoted entirely to the building of the railroad. But, to the question, where are the accounts of the trustees appointed in London by the Government of Medina, and Mr. Gutierrez his minister, who were to manage them? Echo answers—where! If General Medina, in the name of the republic, was the contractor, and the committee in London the administrators of the funds, and these funds have neither been employed for the

benefit of the country, nor kept subject to the order of the Government as they ought to be, then these funds can only exist in the power of those agents; or if not, why, in the interest of their good names, have they refused to present the accounts for which they have been so repeatedly asked, at least ever since 1869!

In a leader on the invasion of Honduras (the incidents of which we shall relate below), published by the same Panama sheet, under date July 3d, are the following paragraphs:

This unfortunate section of Central America (Honduras) seems destined never to get free from being the tool and plaything of ambitious demagogues and interested financial speculators.

Ex-President Medina and his financial agent, Don Carlos Gutierrez, under whose auspices the notorious scheme of the Inter-oceanic Railway was set afloat, now see their sins brought to the light of day by discoveries made by the provisional Government. In a pamphlet printed in San Miguel, and written in Comayagua, in defense of Don Justo Buseo, reasons are given for showing that Señor Gutierrez has been the gainer by the discredit of his country in the ample sum of £140,000.

At a meeting of Honduras bondholders held in London, on November 24th, to receive the final report of the committee, the chairman, Mr. Digby Seymour, Q. C., stated that, a firm of railway contractors in Kentucky having entered into a contract to finish the Inter-oceanic Railway at a cost of £2,500,000, the bondholders would be called upon to subscribe £500,000 of that sum (including £50,000 already subscribed by the committee), and the contractors would furnish the balance of £2,000,000 on the company's debentures at ten per cent. This scheme being approved, resolutions were passed to the effect that

1. This meeting approves and confirms the recommendations of the committee of bondholders, and the bondholders present pledge themselves to use their best efforts to promote the success of the proposed Inter-oceanic Railway Company (limited).

2. That the committee be requested to hold their present office during the construction of the railway, and to act as provisional directors of the proposed company during that period.

3. That the committee be empowered to apply to the contractors for the original loans, or some of them, to defray the reasonable expenses of the committee, the issuing of the debentures, and registration of the Inter-oceanic Railway Company (limited), and relating thereto.

About the beginning of January, disturbances were produced by a band of assassins and incendiaries in the department of Choluteca. From subsequent report and private letters received in Salvador, it was seen that these were isolated acts of robbers, without being connected with any political or party movement. The Government kept up an active pursuit of the outlaws, and those caught were severely punished.

In February, the columns of the official organ were taken up with decisions relative to the French claim of \$20,000 against Honduras for the piratical capture of a French vessel in the port of Omoa, by General Antonio Medina, when he was in command of the San Salvador troops that effected the overthrow of President José María Medina.

The same journal chronicled the defeat, in the first week of February, of a party of rebels in the Cerron. They fled in all directions, leaving behind them a number of Chassepot and Remington rifles.

The death of General Rafael Osorio, which

took place about the same time, was generally regretted throughout the country. He had distinguished himself by his tact and bravery at the battle of Santa Barbara against ex-President Medina.

For many years past Honduras has rarely enjoyed peace longer than one or two months at a time; it has either been at war with some of the neighboring states, or convulsed with internecine strife. In 1873 turbulence had for a while subsided within, no troubles from without seemed to threaten the national quiet, and the people under the soothing influence of the momentary calm began to turn their attention to the arts of peace. But this happy state of things was of short duration, for the first six months of the year had not fully rolled over when the storm again burst forth upon the republic with redoubled violence, and the existence of the Arias administration trembled for a season in the balance. In the last days of May, the arrival at Panama of Señor Palacios, accompanied by Colonel Medinita of Honduras notoriety, gave rise to suspicions and rumors, soon after confirmed, that the mission of those men boded no good for the peace of Central America. The news immediately spread about that Palacios had purchased the steamer General Sherman, loaded her with arms, embarked with a number of men, and set out upon a filibustering expedition to some part of Honduras. Palacios reached Bahia Islands, and there disembarked without any resistance on the 6th of June. He at once set about reorganizing the so-called constitutional Government, and to that end was issued the following decree, signed by two of the old ministers of ex-President Medina:

MANUEL COLINDRES and RAFAEL PADILLA, Ministers of the Constitutional Government of the Republic of Honduras, considering:

That they are called, by Article 80 of the political constitution of the country, to exercise the supreme executive power thereof, in the absence of the persons whose primary duty it is to do so:

Finding the country without a (governing) head, in consequence of the events which took place in the port of Omoa, in the month of July last:

In fulfillment of the sacred duty imposed upon them by the will of the people of Honduras, as expressed in the above-mentioned code:

Constituted in council,

DECREE:

That the ministers aforementioned do, from this day forward, take upon themselves the constitutional exercise of the supreme executive power of the republic, and in view thereof do proceed to reorganize the public administration in all its branches.

Given under our hand and seal in Utiia, this 6th day of June, 1878.

(Signed)

MANUEL COLINDRES,

Minister of the Interior and of Foreign Affairs.

(Signed)

RAFAEL PADILLA,

Minister of Finance and War.

A few days after issuing this decree, Palacios set sail for the port of Trujillo, and favored, it is said, by the treasonous conduct of the commandant Don José D. Torre, succeeded in taking the ancient Spanish fort at that place.

Part of the garrison, under Colonel Turcio, which did not take part in this treason, endeavored to retake the fort, but were repulsed with loss. They then withdrew, and joined, in the capital of the department, the forces which the Government had prepared to go out and attack the filibusters. General Strober was in command of the forces destined to cover Port Cortéz and the north coast, while General Alvarez defended Omoa.

The Arias Government issued a proclamation and decree, and put the troops in movement in accordance with the Governments of San Salvador and Guatemala, which also took active measures to frustrate the invaders. The people in general were on the side of the Government, and a strict watch was kept on the Indian tribes, who, however, remained quiet. In the decree above mentioned the invaders were declared to be pirates and outlaws.

The Honduras Government directed a note to the British minister in Guatemala, informing him of the invasion of the territory by an expedition which had arrived in a vessel carrying the flag of the United States of America, and requesting him to communicate the fact to the English Government, and, by virtue of existing treaties, to notify the authorities of all English ports at which the expedition might be likely to touch. Dispatches were sent to Belize and Jamaica.

The following extract, from a St. Thomas paper of June 28th, gives an account of some of the movements of the General Sherman about that time:

"On the 1st inst., the American steamer General Sherman arrived at Belize, having called for some Remington rifles and ammunition which had been consigned to a mercantile firm of Belize some time ago, and which, being foreign-manufactured arms, had been, by some mistake, permitted to be imported in transit; but the local government, suspecting a trap, laid an embargo on them, some months ago, and so the General Sherman got none. She started next day, having taken on board Colonel Tracy, Dr. Gahne, late President of Ruatan, Señor Padilla, and others, shipped from some of the neighboring keys—men who had been landed there—and proceeded to Ruatan, where Dr. Gahne was to be proclaimed Governor. The same party (Medina's friends) took Trujillo. The schooner Zenobia arrived from Ruatan on the 14th inst., with ex-Governor Popleton on board, Ruatan having been captured by the reactionary party (Medina's). Gahne was installed as Governor of Ruatan. At Trujillo, General Castro Alvarado has been made the new commandant. The steamship General Sherman is the one which cleared from Aspinwall under the United States flag, and is another of the class of the notorious Virginias."

The invasion, however, proved a failure; the Palacios party was attacked near Puerto Cortéz by the united troops of Guatemala, San Salvador, and Honduras, and after an obstinate fight, which lasted eleven hours, gave ground and fled in the greatest disorder, leaving many dead on the field, among them being Don Castro Alvarado, one of the filibuster chiefs. This engagement took place in August.

In that same month the General Sherman, whose name had in the mean time been changed

to that of General Arias, was cruising along the coast, waiting, it was surmised, to take off Palacios in case he was too closely pursued.

In October the rebels were defeated at Gracias á Dios; Baraono, the "great assassin," chief of the reactionary party and partisan of Palacios, was likewise routed by the San Salvador troops in the city of La Paz. General Espinosa was in Comayagua with a division of San Salvador troops; and Trujillo and Omac were garrisoned with Honduras forces.

By the month of December, the invaders had been completely overthrown, and their hopes of reinstating Medina in the presidency of course frustrated. But troubles were not yet at an end. Information was received from the frontiers of a disagreement between the Honduras troops and the San Salvador auxiliary forces under General Espinosa, owing to the avowed determination of the Salvadorians to substitute Ponciano Leiva in the place of Señor Arias as provisional President. In consequence, the forces that had been operating on the south coast were concentrated in the capital, thus leaving the departments of Choluteca and Victoria exposed to robbery and vandalism. A conflict was feared between the forces and employés of Amapala and La Union. The Government of Nicaragua dispatched Señor Ayon as envoy extraordinary and minister plenipotentiary and mediator to the republics of San Salvador and Guatemala, and did not despair (*unless its minister arrived too late*) of being successful in appealing to the patriotism of the governments interested in the question to bring about a favorable arrangement.

In a private communication, under date December 16th, it was stated that "Señor Ponciano Leiva had been proclaimed President of Honduras, and would be supported in his position by the united forces of San Salvador and Guatemala." Some engagements had taken place, in which many lives were lost.

The President having offered to resign his post, the resignation was refused by the Constituent Assembly installed at Comayagua on December 13th. Arias read the usual message before the Assembly, describing the situation of the republic.

The Governments of Guatemala and San Salvador were notified that their troops were no longer necessary, and requested to withdraw them, or, in case of refusal, armed force would be resorted to.

By a decree of the 15th of the same month, Leiva was declared a usurper, and all persons upholding him subject to condign punishment. Medina, who had been made prisoner, was detained in confinement until he could find bail to answer the pecuniary charges against him.

A new election was ordered for February 1, 1874, for President of the republic.

HOOSAC TUNNEL. Stretching across the western part of Massachusetts, and forming a natural barrier between that State and New

York, is the Hoosac Mountain, a part of the Green Mountain range, which itself belongs to the great Appalachian chain extending nearly parallel to the coast from New Hampshire to Virginia. By causing the tide of Western trade to seek an outlet by the valley of the Hudson, this mountain-wall has been of great commercial advantage to New York City. To secure this advantage for Massachusetts by establishing a direct line of communication through the mountain between Boston and the West has been a problem for nearly a half-century. The only practicable point for a tunnel in this ridge is in the northwestern part of the State, near the town of North Adams. Here has been constructed the Hoosac Tunnel, through which the light passed for the first time in November, 1873. It is one of the grandest achievements of modern engineering, and in magnitude is only exceeded by the Mont-Cenis Tunnel through the Swiss Alps.

At the point selected for tunneling, the top of the ridge is some 2,500 feet above tide-water, and is approached on the east by the deep and well-marked valley of the Deerfield River, a mountain-torrent, tributary to the Connecticut, and on the west by the Hoosac River, tributary to the Hudson. These valleys are both about the same level—680 feet above tide-water. They approach each other within five miles, thus allowing a railway to reach the tunnel by gradients not exceeding one in 133 feet.

The Hoosac Mountain has two summits, with a wide valley between them. The eastern summit is 6,100 feet from the east portal of the tunnel, and 1,415 feet above the grade of the road; and the western summit 6,700 feet from the western portal, and 1,704 feet above the grade. The summits are $2\frac{1}{10}$ miles distant from each other, and the valley between, at its greatest depression, is 801 feet above grade. A part of the line over the tunnel is covered with forests, and in some places the depth of earth over the rocks is quite considerable. In a portion of the valley between the summits, the land is swampy, and is drained by two small streams which unite where they cross the line of the tunnel. The rock of the Hoosac Mountain is mica-slate, with occasional veins of quartz, except at the west and where a secondary formation overlaps the primary. The rock in some places is hardly distinguishable from granite, and often exceeds it in hardness. Except where the quartz-seams occur, the rock of the mountain is easy to drill, but quite difficult to displace by blasting.

As early as 1825 commissioners, appointed by the Massachusetts Legislature, reported in favor of tunneling the Hoosac Mountain for a canal from Boston to the Hudson River by way of the Deerfield and Hoosac Rivers. Subsequently the Boston & Albany Railroad, which was finished in 1841, was constructed over the mountain, and the tunnel project was abandoned. In 1845 the Fitchburg Railroad, from

Boston through the northern part of the State, was completed to Fitchburg, and soon after the Vermont & Massachusetts, a continuation of the Fitchburg line, was completed to Greenfield. In 1848 the Troy & Greenfield Railroad Company was incorporated, with a capital of \$3,500,000, "to build a railroad from the terminus of the Vermont & Massachusetts Railway, at or near Greenfield, through the valleys of the Deerfield and Hoosac to the State line, there to unite with a railroad leading to the city of Troy," thus forming with the two lines above mentioned another through-line from Boston to the West. The length of the road thus projected was about 45 miles, and, with its connections, effected a saving of about nine miles as compared with the Boston & Albany line. The act of incorporation required the road to be built in seven years. The tunnel was not mentioned in the charter, though it was embraced in the plan. In 1851, and again in 1853, up to which time it appears that no progress had been made in constructing the road, the company applied for State aid, but without success. In 1854 the State passed an act "authorizing a loan of the State credit to enable the Troy & Greenfield Railroad Company to construct the Hoosac Tunnel." This act provided for a loan of credit to the amount of \$2,000,000, upon condition that when \$600,000 had been subscribed to the stock, and 20 per cent. actually paid in, seven miles of road built, and 1,000 lineal feet of the tunnel "completed," then \$100,000 of scrip should be delivered. When ten miles of the road were finished and ready for use, and 2,000 feet of the tunnel had been completed, the second installment of \$100,000 would become due; so on to the seventh installment, after which 1,500 lineal feet of the tunnel were to be finished as a condition of each advance. So that the whole of the \$600,000 must be paid in before this scrip was all delivered, and subject to this promise, "that the last \$200,000 of said scrip shall be reserved until said company, and their successors or representatives, have opened said railroad for use through the Hoosac, and laid a continuous railroad from Greenfield to the line of the State in Williamstown." The project, however, did not seem to attract capital, notwithstanding the fact that the Legislature in 1855 authorized the several towns through which the railroad passed to subscribe to the amount of three per cent. of their valuation to the capital stock of the company.

In the same year, a contract was made with E. W. Serrel & Co., of Philadelphia, to build the road and excavate the tunnel for \$3,500,000, the contractors to take \$440,000 of stock. This failing, a second contract was made with the same parties, in January, 1856, and in the same year the State refused to subscribe \$150,000 to the stock. The company failed to raise the necessary amount of money, and the Serrel contract was abandoned.

In July, 1856, the railroad company made a contract with Herman Haupt & Co., by which the latter agreed to build the road and tunnel for \$3,880,000, as follows: \$2,000,000 to be paid by the State, \$900,000 in mortgage bonds of the company, \$598,000 in capital stock, and \$382,000 in cash. But, as the company were unable to meet the cash payment, this contract also failed. In 1857, the Legislature was petitioned to modify the terms of the loan act, and passed a bill for that purpose, which, however, was vetoed by Governor Gardner. About this time, May 1, 1857, the tunnel had been pierced 621 feet at the west end, of which 274 feet had been excavated to the full size. At the east end 185 feet had been cut, making the total distance pierced 806 feet. In February, 1858, a new contract was made with the same parties, to complete the tunnel for \$4,000,000; \$2,000,000 were State bonds, to be used exclusively for tunnel-work; \$400,000 in the mortgage bonds of the company, and \$1,100,000 in cash and capital stock.

The work was now begun with vigor, and, by September 1, 1858, the mountain had been penetrated 1,291 feet. Soon after, the company obtained a modification of the loan act. The work was prosecuted until July, 1861, up to which time the advances made by the State amounted to \$778,695. About this time the State engineer refused to approve the work of the contractors and to certify their bills. Operations were, therefore, suspended, and the project was abandoned by the Troy & Greenfield Railroad corporation.

In 1862 the State assumed the entire responsibility and control of the project, and three commissioners were appointed, to whom the affairs of the tunnel were intrusted. Up to this time much work had been done at both approaches to the mountain. The east end heading had been driven nearly 2,400 feet, 2,130 feet being of the size prescribed by statute; a shaft 3,000 feet from the west end had been sunk 325 feet to grade, while the west end had been excavated 610 feet, though this part had been afterward abandoned. Serious defects in the plan of the tunnel were now pointed out. The tunnel had been planned to be only 14 feet wide, with a total height of 18 feet, while the west shaft was found to be 10 feet north of a straight line between the two portals.

The commissioners recommended that the tunnel should be built 22 feet wide at the grade-line, 24 feet wide at the widest point, 21 feet high above the track, with a circular roof. The estimated cost of finishing the tunnel was, including interest and advances already made, \$5,719,830.

A bill was passed appropriating \$3,800,000.

The commissioners did not go to work until October, 1863, over two years from the time of the abandonment by Haupt. The State had now committed itself to the enterprise, and the reputation of Massachusetts was at

stake. Nine years had elapsed since the work was undertaken, and yet only about one-twelfth of the whole length had been excavated, and that in a very small section. An entirely new line was now established, following the axis between the centre of the west shaft and the centre of the work at the east end, bringing the line out 18 feet north of the old west portal. At the east end the old bore was made available by enlarging it, while the west end was begun anew. The position of the central shaft was determined, and work upon it was begun in December, 1863.

The next epoch in the history of this gigantic enterprise dates from 1868, when the State decided, after much public discussion, to have the work completed on contract. At this time the total length of the east heading and tunnel was 5,282 feet, while 4,056 feet, in various stages of advancement, had been pierced from the west end eastward; and the central shaft had been sunk 583 feet, leaving 15,693 feet of tunnel and 457 of the central shaft to be excavated.

In December, 1868, the contract was awarded to Walter and Francis Shanly, of Canada, for \$4,623,069, the work to be completed by March 1, 1874. The tunnel was to be 24 feet in width, and 24 feet high in the clear, while where arching was required it was to be 26 feet wide in the clear, and 21½ feet high above the rails. Under this contract the work was vigorously and successfully prosecuted day and night. On Thanksgiving day, November 27, 1873, the workmen advancing from both ends met, and light was admitted through the entire tunnel.

The whole length of the tunnel is 25,031 feet, or four and three-quarter miles. It is 26 feet wide, by a height varying from 23 to 26 feet, wherever a brick arch is used. Passing through solid rock excavation, the section is reduced to 24 wide by 20 high. As originally projected the tunnel was intended for a single track, but the enlargement made by the State gives it a capacity for a double track. The open cut of the new tunnel at the west end extends into a portion of the Haupt tunnel which strikes it diagonally. It is probable that the old tunnel will be used as a culvert to carry off the water from the west end.

The tunnel grade is 26 feet to the mile for nearly the whole distance, rising from each portal toward the central shaft, and leaving a short length of level immediately under the shaft. The height of the interior summit over the portal will be something over 60 feet. This dip in the grade each way from the centre was made to secure good drainage.

This grade in the tunnel has necessitated some very careful labor in carrying the elevations. The main difficulty was to establish the three tunnel points of the east and west ends, and at the foot of the central shaft, in proper relations to each other. To reach this, the engineers carefully went over the mountain

with their leveling instruments and determined the relative position of the portals, and the depth of shaft which should be sunk to reach the proper grade at its bottom in the tunnel.

The tunnel has two shafts: one near the west end, only 318 feet deep; and the other, or central shaft, nearly in the middle of the tunnel. The central shaft is an ellipse 27 feet long by 15 feet wide, and is sunk to a depth of 1,028 feet. The west shaft was sunk prior to 1861 by Haupt, after his encounter with the "demoralized" material at the west end. It was sunk so as to enter the mountain where it was solid, and supposed to be free from water.

The central shaft was sunk for two purposes: first, to secure two facings, one east and one west, and thus expedite the work; and, secondly, to afford ventilation for the tunnel. It is a matter of great doubt whether the tunnel, constructed as it is with a grade from each portal to the centre, would ventilate itself at all. Since this shaft was built, and connection made with the east end, a strong draught is obtained from it, and the tunnel is readily cleared from smoke and gases. Before communication from the east was opened with the shaft, the introduction of a locomotive into the tunnel to carry off the *débris* was a source of great discomfort, and even sickness, to the men. Now this difficulty is entirely removed. On the completion of the whole tunnel, the west shaft will be closed up, to secure a better draught for the central one.

In May, 1872, it was estimated by the State Auditor that the road and tunnel would cost the State \$12,792,233. It is believed that the actual cost of the tunnel alone will be about \$10,000,000. It is thought that the tunnel will be completed and ready for use as a part of the through railway-line by September, 1874. It may be here stated that the Mont-Cenis Tunnel, the only one in the world longer than the Hoosac, is seven and four-fifths miles long, and after fourteen years' progress was opened September 17, 1871, at a cost of about \$13,000,000.

Now that the tunnel is approaching completion, the most important question before the people of Massachusetts is, what to do with their 44 miles of railroad and tunnel. The original purpose with respect to the tunnel was to open, in conjunction with roads then in operation, a new and competing line between Boston and the Hudson River. The situation has somewhat changed since the work was begun. The objective point is still a point reached over the Boston and Albany, but consolidation and concentration of business have altered the conditions of competition. The Boston and Albany has now a double-track, fully-equipped road, and, by its connections and contracts, is measurably enabled to control freight to the lakes. That the population along its line requires and sustains frequent

and rapid passenger-trains, by which it can without much additional expense meet the demands of through travelers, must for many years to come give it a decided advantage as a passenger-route. In other words, its facilities for every kind of transportation are such that it can offer great inducements to the Western roads to turn their business to its line.

The question received a large share of the discussion in the Legislature of 1873, and will doubtless demand the urgent attention of that of 1874. The popular sentiment in Massachusetts is that the tunnel must never become part of a consolidated line, but must be retained by the State. In view of this public opinion, Governor Washburn thinks that the State should retain the ownership of the tunnel and the railroad, and should vest their management in a board of trustees, appointed for a term of years, and organized as a corporation capable of suing and being sued.

HOPKINS, JOHN, a princely philanthropist of Baltimore, born in Anne Arundel County, Md., May 19, 1795; died in Baltimore, Md., December 24, 1873. His family were of English origin, but had resided in Maryland for six or seven generations. They were mostly members of the Society of Friends. John Hopkins was brought up on his father's farm in Anne Arundel County till he reached his eighteenth year, though he had received a good education. In 1812 he went to Baltimore as a clerk to his uncle, Gerard F. Hopkins, then in the wholesale grocery business. He remained with his uncle seven years, devoting himself with most intense energy to the attainment of a thorough mastery of the business, and, in 1819, without any capital other than the business ability he had shown, and the indorsement of some of his notes by his uncle, he commenced business as a wholesale grocer with Benjamin P. Moore as partner. The partnership prospered, but at the end of three years John Hopkins felt strong enough to manage it alone, and calling to his aid two younger brothers, both under age, he gave them an interest in his business, which was thenceforward carried on under the firm name of Hopkins & Brothers. With his untiring energy and broad business views, the house was greatly prosperous, its business extending into all the adjacent States, and through all the financial vicissitudes of the next twenty-five years its credit was never questioned. Having acquired an ample fortune, in 1847 Mr. Hopkins withdrew from the firm, relinquishing the business to his brothers and two of his clerks. The same year he was elected President of the Merchants' Bank, and retained the position till his death. He was in this position a close observer of the conduct, character, and intelligence of the young men who were just commencing business there, and often without their knowledge indorsed their paper and thus aided them in procuring needed discounts. In 1847, also, Mr. Hopkins became a director in the

Baltimore & Ohio Railroad Company, of which he had previously been a large stockholder. In 1855 he was appointed chairman of the Finance Committee of the company, and by his energy, sound judgment, and liberality, carried it forward to a triumphant success. When at one time it was seriously embarrassed, he came forward voluntarily, and indorsing its notes to a large amount pledged his private fortune to its support, and thus insured the completion and success of the great undertaking. He indulged sanguine hopes of the business future of Baltimore, and by extensive purchases of lands in the heart of the city, and the erection on them of substantial warehouses and other needed and attractive buildings, he greatly enhanced the business facilities and the value of property in the city. Being a bachelor, and his relatives being all wealthy, Mr. Hopkins resolved some years since to establish and endow some institutions which would be of benefit to Baltimore and Maryland. For this purpose he purchased the Maryland Hospital and its grounds, and these, with adjacent lands which he already owned, he devoted to the site of a free hospital to be called by his name, with separate buildings for different sexes, and for the colored people of each sex, for whom with the true spirit of the Friends he felt a hearty sympathy. The hospital was to have about four hundred free beds, and for the buildings and endowment he set apart \$3,000,000, besides the land and buildings, which were worth more than \$1,000,000 more. This property was put in the hands of trustees in March, 1873. He further provided for a training-school for nurses, to be connected with this hospital, and on a separate site a home and school for colored orphans, with room for about 250. For these purposes about \$500,000 more were appropriated. A smaller convalescent hospital, with a park of less extent and a flower-garden of thirteen acres, was among his other gifts to the city. But perhaps his most munificent gift was that of the noble property at Clifton, about 400 acres, on the Harford road, about a mile from Baltimore, which, with an endowment of \$3,000,000, was devoted under care of trustees of his own selection and by a special charter from the State for a university and public park. The whole plan was drawn out by Mr. Hopkins, the money provided for the buildings, the endowments and the free scholarships, which were limited to poor and deserving students from the States of Virginia and Maryland. He had before his death completed all his plans for these great benefactions, the largest single gifts either to educational or hospital purposes ever made. The total amount of his endowments of these institutions exceeds \$8,000,000, aside from previous liberal donations, and consumed two-thirds of his great fortune. In all the relations of life Mr. Hopkins was an exemplary and estimable citizen. The citizens of Baltimore have voted to erect a memorial to this noble philanthropist.

HOWE, Hon. JOSEPH, a colonial statesman and publicist, born in Halifax, Nova Scotia, in 1804; died at Halifax, June 1, 1873. He was apprenticed to a printer at an early age, and in 1828 became sole editor and proprietor of the *Nova Scotian*, a journal which he made very successful. Mr. Howe advocated the right of the cities of the British colonies to municipal privileges, and, though tried for a libel on the local government (when he was acquitted) and compelled to fight a duel with the younger Haliburton, he became in 1840 a member of the Provincial Government, and, after a wearisome correspondence with the home authorities, succeeded in exposing the abuses of the old system, and in obtaining a municipal charter for Halifax. Mr. Howe had officiated several times as colonial agent in Great Britain, and only resigned his office of provincial secretary to superintend the construction of the railway from Halifax to Quebec. He was considered one of the originators of the idea of responsible government in the British colonies. Haliburton's "History of Nova Scotia" was published by him in 1828. He had identified himself with the question of responsible government in the British colonies, and in 1858 published on this subject "Speeches and Public Letters," in which were included several addresses to Lord John Russell. In 1870 he was appointed Secretary of State for the provinces, in the Government of the Dominion of Canada, and resided at Ottawa until near the close of 1872, when, in consequence of the accession of Earl Dufferin to the governor-generalship, a new Dominion cabinet was formed, and Mr. Howe succeeded Lieutenant-General Sir O. H. Doyle as Lieutenant-Governor and chief executive officer of Nova Scotia.

HUNGARY, a kingdom of Europe, and one of the two main divisions of the Austro-Hungarian monarchy. (All the affairs which are common to the entire monarchy have been treated of under the head of AUSTRIA.) As the Military Frontier, which had formerly its own administration, has been wholly incorporated partly with Hungary proper and partly with Croatia and Slavonia, the lands of the Hungarian crown now consist of three large historic divisions, namely:

DIVISIONS.	Area.	Population in 1900.
Hungary Proper.....	87,046	11,530,397
Transylvania.....	21,217	2,115,024
Croatia and Slavonia.....	16,789	1,864,094
Total	125,053	15,509,554

The Hungarian ministry was, in December, 1873, composed as follows: 1. President of the Ministry, Joseph von Szlavy; from July, 1870, to December, 1872, Minister of Agriculture, Industry, and Commerce; appointed President of the Council of Ministers December 5, 1872. 2. Minister near the King's person (*ad latus*), Baron Wenckheim (appointed March, 1871).

3. Minister of Finance, Chas. Kerkapolyi (1870). 4. Minister of the Interior, Count Szapary (March 5, 1873). 5. Minister of Education and Public Worship, Dr. Augustin Tréfot (September 5, 1872). 6. Minister of Justice, Dr. Th. Pauler, formerly Professor of Jurisprudence at the University of Pesh—Minister of Education and Public Worship from March, 1871, to September, 1872 (appointed Minister of Justice September 5, 1872). 7. Minister of Public Works, Louis Tisza (March, 1871). 8. Minister of Agriculture, Industry, and Commerce, Count Joseph Zichy (December 5, 1872). 9. Minister of Croatia and Slavonia, Count Pejacevitch (March, 1871).

The Hungarian Diet or Reichstag consists of two Houses. The Upper House, called the Table of Magnates, was in 1873 composed of the three Austrian archdukes who have landed property in Hungary; 31 archbishops, bishops, and other high church dignitaries of the Roman Catholic and Greek Oriental Churches; of 12 "imperial banner-bearers," 57 supreme counts (presidents of counties), 5 supreme royal judges, the count (comes) of the Transylvania Saxons, the Governor of Fiume, 8 princes, 218 counts, 80 barons, and 3 "regalists" from Transylvania. The Lower House, called the Table of Deputies, comprised in the same year 444 members, of whom 334 represented Hungary proper, 1 Fiume, 75 Transylvania, and 34 Croatia and Slavonia. The Diet meets annually, and new general elections take place every three years. The right of voting belongs to all who have received an academic education, carry on a regular business, or pay a small amount of direct taxes, as provided by the electoral law. The language of the Diet is the Hungarian, which every member is required to understand; only the representatives of Croatia and Slavonia have the right to use their own language.

The public revenue of Hungary for the year 1872 amounted to \$7,943,000, the expenditure to \$10,904,000; deficit, \$2,961,000. The budget estimates for 1873, which were presented to the Diet in March, showed a deficit of about \$7,000,000. To meet the interest of the common debt of the monarchy, contracted prior to 1858, Hungary pays an annual contribution of \$13,630,000. Besides, Hungary has a special debt, amounting in 1872 to \$219,000,000. The large moneyed institutions of Hungary have of late, as in cis-Leithania, increased very rapidly in number, but not so much proportionally in the amount of their capital. The following banks (all of them in Pesh) have a capital exceeding \$2,000,000: Anglo-Hungarian Bank, established in 1868, \$4,700,000; the Hungarian General Credit Bank (1867), \$14,100,000; the Franco-Hungarian Bank (1867), \$15,000,000; the Pesh Bank (1872), \$2,350,000; the General Hungarian Municipal Bank (1872), \$4,700,000.

The aggregate length of railways in the monarchy, open for traffic and under construc-

tion, was, on January 1, 1872, as follows: Open for traffic, 12,047 kilometres (1 kilometre = 0.62 mile); in construction, 4,546 miles. The work of the post-office in 1871 was as follows: Private letters, 87,868,189; official letters, 7,079,688; private packets, 4,874,811; private newspapers, 22,303,771. The length of telegraph-wires, in January, 1872, was 29,561 kilometres. The number of telegraph-stations was 491.

The administration of the new prime-minister Szlavy, who had been appointed in December, 1872, was not supported by a compact and large majority, and therefore was only able to maintain itself by making compromises with different parties. In February, a motion made by Czaky to enter into a discussion of the numerous petitions which had been presented for the expulsion of the Jesuits and the suppression of all convents, was adopted, contrary to the wish of the ministry, by 188 against 102 votes. The same was the case (February 27th) with a motion of Jranyi, instructing the ministry to bring in a bill for the establishment of religious liberty, and the introduction of civil marriage. On both bills Deak voted with the Liberals. On May 30th, the petitions concerning the Jesuits and the convents were referred to the ministry. This was contrary to the wish of the Liberal party, who believed the ministry to be anxiously desirous of avoiding a rupture with the church party. New difficulties arose when the bishops began to proclaim the doctrine of papal infallibility. The first to do this was the Bishop of Stuhlweissenburg, who, for not having previously applied for the royal "placet," was cited before the Council of Ministers and formally censured. The party of the Left regarded this attitude of the Government as insufficient to protect the rights of the state against the Church; while, on the other hand, the Archbishop of Gran and Primate of Hungary, Simor, denounced the bills presented by the Government for the administration of educational and church funds by the state as an encroachment on the government of the Church, and declared a conflict between church and state as inevitable. When, notwithstanding the censure of the Bishop of Stuhlweissenburg by the ministry, the Bishop of Rosenau also proclaimed the doctrine of infallibility, an animated discussion took place in the Diet, in which Deak (on June 28th) made one of his great speeches. He proposed to rearrange the relations between church and state according to the American system, and that accordingly every church should be regarded as an association with the affairs of which the state Government should not meddle, so long as the acts of the Church involved no danger for the state. The Diet resolved to appoint a committee for the preparation of a bill arranging the relations between church and state on the basis of the principles developed in the speech of Deak. All parties

appeared to be satisfied with this measure; but its execution made little progress, to the great satisfaction of the Catholic party, which, under the leadership of Sennyey, endeavored to obtain, in place of the vacillating administration of Szlavy, the control of the Government. The party of Deak, on the other hand, was considerably strengthened by the establishment of a better understanding between it and the party of the "Left Centre."

The most important measure obtained by the ministry during the year was the final regulation of the relations between Hungary and Croatia. The agreement (*Ausgleich*) which had been made in 1868 was modified after long negotiations—in some of its points in favor of Croatia. The main points of the new agreement are: The appointment of the Banus of Croatia must receive the signature of the Prime-Minister of Hungary; 45 per cent. of the revenue of Croatia shall be reserved for the administration of that province; the Diet of Croatia must be convoked at least once every three years; charters of new railroad companies can only be given by the Hungarian Diet. The Croatian Diet adopted the new agreement on September 6th, by a vote of 79 against 10.

On June 29th a treaty was concluded with Turkey which promised a speedy removal of the obstruction to the navigation of the Danube at the Iron Gate.

On December 20th the Ministers Kerkapolyi and Tiza resigned their offices, and their places were provisionally filled by the prime-minister and by Count Zichy.

During the last days of the year a great sensation was produced by the announcement that very shortly Deak would withdraw from political life.

HUNGERFORD, WILLIAM, LL. D., an eminent and profound jurist, the father of the Hartford bar, and the author of most of the great decisions in insurance, railway, and steamboat law, on which legal action in this country is based, born in Hadlyme parish, East Haddam, Conn., November 22, 1786; died in Hartford, January 15, 1873. At about nine years of age he suffered from a serious attack of measles, which permanently affected the muscles of his throat and face for the rest of his life, so as to almost constantly produce an involuntary movement of his head and face. He attended the common school, and when of sufficient age assisted his father in the cultivation of a farm, for which he always retained a taste, and frequently busied himself in training the fruit when visiting his home in after-years. He was fitted for Yale College in company with the Rev. Joseph Harvey, of the same place, by the Rev. Joseph Vail, pastor of the church in Hadlyme, and was graduated at Yale in 1809. From September succeeding his graduation, to the following March, he taught the High School in Westchester, Conn., and then pursued the study of law with Roger Griswold and Matthew

Griswold, at Black Hall, in the town of Lyme, for the two succeeding years, when he was admitted to the bar at New London, in 1812, and opened an office for practice at his father's in Hadlyme, where he remained for the following seven years. After he came to Hartford he speedily took high rank in his profession, and such men as Roger M. Sherman and Judge Daggett, though very considerably his seniors, honored him with their confidence and intimacy. During the first eight years of his professional life, while at East Haddam, his business and income from his practice were exceedingly small, scarcely sufficient to meet his expenses; yet, during this time he devoted himself most earnestly to the study of the law and elementary treatises within his reach, and patiently and most carefully prepared the cases committed to his care. While thus making himself familiar with the leading treatises, and the maxims of the law—during these eight years—Coke upon Littleton was read and reread many times; Ferne on contingent remainder was his companion and delight; and Blackstone was read through thirty times in course, and he was so familiar with the text that, for years after, he could give every division and subdivision in its order, without reference to the book. He also read carefully English history as a part of his professional study, and traced out with the greatest care the origin, rise, and establishment of the laws and ordinances which lie at the foundation of the system of jurisprudence, brought here by the Puritan ancestors; and he became more familiar with English history and its connection with English law, and the cause that gave rise to particular rules of practice, than, perhaps, any other American lawyer. During this time he always read and studied attentively the works of Shakespeare, as the great delineator of character, and as affording an insight into the passions of the heart, and the causes which influence and control the actions of men. Law, Shakespeare, and the Bible, were his constant study, while history filled up the time not given to the others. This period of the first eight years of his professional life, thus devoted to patient study, was the foundation of his great learning as a lawyer, his success as an advocate, and his familiarity and ready application and adaptation of the great principles which underlie the science of all law to new facts and cases as they arise in the progress of business, and in the development of new fields of industry, and the new and ever-changing sources of litigation. His industry was proverbial and wonderful. His endurance seemed to know no limit. When he commenced his profession there were few elementary books and scarcely any reports to be had, and, in this dearth of books and law treatises, at one time he wrote out an entire volume, which he could not otherwise procure, that he might use it as a reference in the trial of his cases. He also compiled a manuscript

volume of all the legal maxims which he could find in the course of his reading, or heard in the trial of cases to which he listened, and this he used as a text-book. When he came to Hartford, the first volumes of the "Connecticut Reports" had been published, and they contained not more than three or four cases upon the subject of insurance. The whole law upon insurance has been established and settled since that time, and he had the chief agency in discussing and settling those principles. The law relative to steamboat navigation, involving that of common causes, the law growing out of railroad charters and the condemning of lands for railroad uses, have all grown out of the progress of the age, and the great and leading cases connected with these branches of trade and business were investigated by him, and settled. The great case of the Hartford & New Haven Railroad Company *vs.* Kennedy is the leading case upon the subject of the personal liability of a subscriber or holder of stock, for the payment of installments, and has been followed and sanctioned in every State in the Union. The opinion as delivered by Judge Huntington, compiled from the brief and argument of Mr. Hungerford, contains nothing either in the arguments or illustrations, or the authorities, which is not contained in his brief, and has, by the most learned lawyers and judges all over the land, been pronounced one of the most able and exhaustive arguments ever printed upon this subject—it has been spoken of as "one of exceeding power, nay, of amazing scope and ability." He had the confidence and commanded the attention of the court by the force of his arguments, the clear, logical, systematical, and orderly presentation of the facts of the case from which he would demonstrate, as conclusively and clearly as ever a mathematical proposition was demonstrated, that the result should be in his favor; and, when he was through, there really seemed left no room to question the conclusions which necessarily followed from them. His own convictions were formed after full investigation of his case—after ascertaining as far as possible what claims would be made on the other side, and how far and what proof could in any probability be adduced in support of the adverse claim. Neither judge nor triers had any doubt of his sincerity. He would not argue a point which he did not himself believe. The judges knew and believed this, and so did the triers, and this gave him a power and influence which were astonishing, and while at the bar he was successful in more cases than any other lawyer in the State ever was. His mind was of the highest order, and the most comprehensive grasp, disciplined by habits of patient and arduous investigation, profound research, close reasoning, and great powers of concentration, combined with extensive reflection and sound judgment. He was always cool and self-possessed, and nothing could divert him from his argument or distract his

attention from the strong points of his case. A severe, demonstrative, and exhaustive reasoner, with a voice harsh and powerful, with little or no effort at elegance, and seldom using other than the simplest language, yet upon occasions the great lawyer moved his hearers with a power quite irresistible. Mr. Hungerford had no taste for political life, and was no seeker for office. While at East Haddam, he many times represented the town in the Legislature of the State, and, after his removal to Hartford, was several times a member from that town to the General Assembly. He always devoted himself laboriously to his duties; was always a useful and most influential member, advocating and sustaining what he conscientiously believed to be right, and condemning what he believed to be wrong.

In 1818 he was a member of the convention which framed the constitution of Connecticut, and is believed to have been the last survivor of

that distinguished body of men. In politics he was allied in principle with the old Federal, and afterward with the Whig, and later with the Republican party; but he was in no sense a partisan, for he believed that, for the interests of the country and the purity of the Government, it was necessary and desirable that party organizations should exist and be encouraged. Mr. Hungerford, although frequently urged by friends of all parties to accept the office of Judge of the Superior and Supreme Courts, would never consent to the use of his name for that or any other office. He had been known as a religious man for forty years, but he did not make a public profession until 1861, when he united with the Centre (Congregationalist) Church. He withdrew from general practice in 1860, but continued the management of his large property interests until a few months before his death. Yale College conferred on him the degree of LL. D., in 1856.

I

ILLINOIS. The most important topic of public discussion in Illinois during the past year was that afforded by the "farmers' movement," which not only produced an engrossing agitation in this and several other Northwestern States, notably Minnesota, Wisconsin, and Iowa, but also attracted a large share of public attention throughout the country at large. In order to have a clear understanding of the events of the year, and the measures that were adopted, it will be necessary to trace briefly this movement from its origin, and point to the causes that led to its inception.

In doing this, the origin of the movement that culminated in the events of 1873 is found to date back at least three or four years, and to have grown out of a condition of affairs between supply and demand—producers and consumers—that has caused no little perplexity and discussion among the ablest political economists. These Northwestern States, so far at least as the cereal productions are concerned, have been the garden-spot of the country. This fact will be best illustrated by the agricultural statistics reported by the census of 1870, which show that in that year Illinois, Iowa, Wisconsin, and Minnesota, were not only the greatest wheat-producing States, in the order named, in the Union, but that more than a third of all the wheat raised in the United States was the product of these four States; the production of the United States amounted to 287,745,626 bushels, and of the States named to 104,086,514 bushels. Besides ranking first in the production of wheat, Illinois produced more oats than any other State, more barley than any other except California and New York, and almost double the amount of Indian-corn yielded by

the next largest corn-producing state, Iowa. Of the total yield of Indian-corn in the United States, 760,944,549 bushels, the enormous quantity of 129,921,895 bushels came from Illinois alone. This great producing capacity of the soil, together with other industrial and commercial advantages, long ago made this an attractive region for immigrants; and hither the vast tide of immigration, entering the great gate of New York from all European countries, was directed. The country being thus rapidly settled, the area of cultivation was widely extended, and the crops increased so far beyond the capacity for home consumption that it became necessary to send large quantities of grain to the Eastern markets. The development of railroad facilities for transportation, however, did not keep pace with the increased production of the soil; consequently, the capacity of the combined railroads, although greatly increased, has been inadequate for several years to move the vast crops of the Northwest to the Eastern seaboard. This inadequacy has been specially felt by producers and shippers during the winter season; for, prior to the closing of navigation, about the first of December, the crops were largely moved eastward by water. But about this period quantities of grain were wont to accumulate to such an extent that the railroads were unable to supply the demand for transportation facilities. This naturally led to an increased freight-tariff which caused great dissatisfaction among the farmers, who contended that the railroad companies were extortionate in their freight-charges, and unjust in their discrimination respecting cars and rates; and that the effect of their action would be to render the raising of grain in the Northwestern States unprofitable. The railroad

companies, aside from claiming that they were chartered corporations, and were entitled to fix whatever rates of freight they pleased, maintained that the inherent difficulties of the transportation problem, growing out of the tendency of railroads to consolidate into grand trunk-lines, and other causes, producing a sharp competition, imposed unavoidable conditions upon certain companies in the regulation of their freight-tariffs. Thus, as to through-freights, the Western roads were governed by the Eastern branches in the adoption of tariffs. Furthermore, the railroads depended for their profits chiefly upon the through-freights, the charges for which, however, were not exorbitant. As to local discriminations, it was contended that the tariff between any two given points is fixed by the shortest competing

line, and that all other competing lines must necessarily adopt the same rates. In the matter of way-freights the same competition is not encountered, and the company is at liberty to fix its own tariff. It was also claimed that, even with the high rates, many companies were not paying expenses.

Such was the attitude of the parties in the "anti-railroad war." Whether this state of affairs was the cause of the agricultural classes forming organizations popularly known as "granges," or was the occasion of the development and extension of these associations, does not appear; but it is certain that for several years there has existed in the Northwestern States a great number of farmers' clubs and associations, and various organizations of the "Patrons of Husbandry," so popularly known

CITY OF CHICAGO BEFORE THE FIRE.

under the general name of "granges;" they seem to have originated and to have been conducted on a uniform plan. Mainly secret in their proceedings, they were known as to their membership and officers. The extent of the movement in Illinois is shown by the estimate that in 1878 there were in that State about 800 granges, with not less than 20,000 members. Although one aspect of this association of farmers has been social, there is no doubt that one of the primary objects of the order was to effect a saving in their necessary expenditure.

In Illinois the farmers were specially aggrieved on account of the system adopted by the manufacturers of agricultural implements, by which they were required to pay a large percentage—from 20 to 40 per cent.—to middle-men who were the agents of the manufacturers. In many cases it appeared that the manufacturers agreed with their agents not to

sell any agricultural implements directly from the manufactory at lower prices than those demanded by the local agents. This was regarded as a great imposition by the farmers, who in many instances passed resolutions against purchasing from manufacturers who had made such contracts. Many granges, each acting independently for itself, made a common fund of the money which the members intended to devote to the purchase of agricultural implements, and sent committees directly to the manufacturers to make wholesale purchases. They maintained that by this course forty per cent. was, in many cases, saved. In some instances this plan was extended to purchasing other articles, such as groceries and dry goods, to the great injury of the local trade.

Before proceeding to record the more important events of the contest between the farmers and the railroad corporations, it may be

well to notice another phase of the opposition which tended to make the feeling between the contending parties still more bitter. This was known as the "Three-cent War," which raged so violently for a while as to withdraw attention from the more important questions of the conflict. The Railroad Commissioners of Illinois having fixed for the various lines a schedule of passenger-rates beyond which the companies were forbidden to charge, the Illinois Central, on which the maximum rate had been fixed at three cents a mile for each passenger, disregarded this limit, and demanded fares in excess of the legal rates. In some cases nearly four cents a mile were charged, and conductors were instructed by their employers, who acted upon the presumption that the law was unconstitutional, and therefore inoperative, to eject from the train any passenger refusing to pay this amount. To meet this state of affairs, the farmers formed "Three-cent Clubs," resolved not to pay more than three cents a mile, and to travel in such numbers as to secure the enforcement of their legal rights. In such cases, the employes of the railroad, out of respect to the number of those refusing to pay more than three cents a mile, accepted that amount; but, in cases where the passengers refusing to pay the fare demanded were not in force, they were summarily ejected from the train. In some cases trains were stopped because certain passengers refused to pay the fare demanded. Passengers were put off the train by force, and the conductors were subsequently arrested and fined for assault and battery. The Alton road was sued for damages by ejected passengers, and in turn brought suit under the Ku-klux act, claiming heavy damages for the delay and disturbance of trains. So matters went on until the act authorizing the commissioners to fix passenger-rates was declared unconstitutional by the Supreme Court.

As a natural result of the circumstances above set forth, resort was had by the producing classes to legislation, to effect what had not been satisfactorily adjusted by the general principles of political economy, or the natural laws of trade. In the Constitutional Convention of 1870 the subject of railroad corporations received a large share of attention, and a provision was incorporated in the new constitution, to the effect that the "General Assembly shall, from time to time, pass laws establishing reasonable maximum rates of charges for the transportation of passengers and freight on the different railroads in this State." Pursuant to this provision, an act was passed by the Legislature in the following year, 1871, having for its object the establishment of a reasonable maximum rate of charges for transporting passengers; and another, "to prevent unjust discrimination and extortions in the rates to be charged by the different railroads in this State for the transportation of freights on the said roads." To secure the enforce-

ment of the provisions of these acts, a law was passed providing for the appointment, by the Governor, of a Board of Warehouse and Railroad Commissioners, consisting of three members, who must not be connected, directly or indirectly, with any railroad or warehouse interest. The railroad corporations protested strongly against this legislative interference, as they termed it, and denied the power of the Legislature to control railroad charges in any way, or even to fix their maximum limit; and, while admitting that the companies were bound to make their charges reasonable, it was not the province of the Legislature to determine whether these charges were or were not reasonable. They further held that the charter granted to each company by the State is a contract "by which the latter has irrevocably granted to the corporation the right to establish its rates of toll, subject only to an implied condition that they shall not be unreasonable or excessive;" also, that the charter, with all the privileges granted, was protected by that clause of the Constitution of the United States which prohibits the State from enacting any law impairing the obligation of contracts. In opposition to these views, it was maintained by the friends of the law that railroad companies, having obtained their right of way by the exercise of the right of eminent domain—a power which belongs only to the State in its sovereign capacity, and can be delegated only for public purposes—are really public corporations, and therefore subject to legislative control so far as the public good may require; and of this the Legislature is the sole judge. Furthermore, it was claimed that no Legislature had the power to alienate from the State this right and duty, which are essential to the sovereignty of the State.

The railroad companies refused obedience to the act, and a test-case was afforded by the action of the Chicago & Alton Railroad Company. The rate charged by this line for transporting lumber from Chicago to Lexington, a distance of 110 miles, was \$5.65 per 1,000 feet, while the rate to Bloomington, 16 miles beyond Lexington, was only \$5. For this violation of the law of 1871, which prohibited any railroad company from charging greater rates for carrying freight shorter distances, an action was brought by the railroad commissioners to enforce the penalty of the law, which was forfeiture of charter. In the Circuit Court of McLean County, Judge Tipton decided against the railroad, and held the act to be constitutional. This decision, however, when the matter came before the Supreme Court of the State on appeal, was reversed, and the act of 1871 was declared unconstitutional. This opinion of the Supreme Court, which was delivered by Chief-Justice Lawrence, was based upon the ground that the act forbade not merely unjust but all discriminations; that it provided for the punishment of the corporation on a mere allegation of offense,

without permitting it to prove its innocence; and that the penalty was excessive and vindictive. Said Chief-Justice Lawrence: "The opinion of the court is that, while the Legislature has an unquestionable power to prohibit unjust discrimination in railway-freights, no prosecution can be maintained under the existing act until amended, because it does not prohibit unjust discrimination merely, but discrimination of any character, and because it does not allow the companies to explain the reason of the discrimination, but forfeits their franchise upon an arbitrary and conclusive presumption of guilt to be drawn from the proof of an act that might be shown to be perfectly innocent. In these particulars the existing act violates the spirit of the State constitution." This decision, which was an apparent victory for the railroads, did not deny the fundamental principles claimed by their opponents; for the court plainly intimated that the railroad corporations had no "vested rights;" that they were the creatures of, and subject to, the control and regulation of the State, and that all that was necessary to enable the Legislature rightfully to regulate the freight and passenger charges made by the railroad companies was an amended law for that purpose, so framed as to conform to the provision in the constitution of 1870.

After much discussion, both in and out of the Legislature, the new "Railroad Bill" passed the General Assembly May 1, 1873, and was approved the following day, under the title "An act to prevent extortion and unjust discrimination in the rates charged for the transportation of passengers and freights on railroads in this State, and to punish the same and prescribe a mode of procedure, and rules of evidence in relation thereto, and to repeal" the railroad law of 1871. As this was the most important act of the Legislature during the year, and will doubtless be the subject of no little public discussion and litigation, the more important sections of the bill are given in full:

SECTION 1. *Be it enacted by the People of the State of Illinois, Represented in the General Assembly, If any railroad corporation, organized or doing business in this State under any act of incorporation, or general law of this State, now in force or which may hereafter be enacted, or any railroad corporation organized or which may hereafter be organized under the laws of any other State, and doing business in this State, shall charge, collect, demand, or receive more than a fair and reasonable rate of toll or compensation, for the transportation of passengers or freight, of any description, or for the use and transportation of any railroad-car upon its track, or any of the branches thereof, or upon any railroad within this State which it has the right, license, or permission to use, operate, or control, the same shall be deemed guilty of extortion, and upon conviction thereof shall be dealt with as hereinafter provided.*

Seco. 2. *If any such railroad corporation aforesaid shall make any unjust discrimination in its rates or charges of toll, or compensation, for the transportation of passengers or freight of any description, or for the use and transportation of any railroad-car upon its said road, or upon any of the branches thereof, or upon any railroads connected therewith, which it has the right, license, or permission to oper-*

ate, control, or use, within this State, the same shall be deemed guilty of having violated the provisions of this act, and upon conviction thereof shall be dealt with as hereinafter provided.

Seco. 3. *If any such railroad corporation shall charge, collect, or receive for the transportation of any passenger, or freight of any description, upon its railroad, for any distance, within this State, the same, or a greater amount of toll or compensation than is at the same time charged, collected, or received for the transportation, in the same direction, of any passenger, or like quantity of freight of the same class, over a greater distance of the same railroad; or if it shall charge, collect, or receive, at any point upon its railroad, a higher rate of toll or compensation for receiving, handling, or delivering freight of the same class and like quantity, than it shall, at the same time, charge, collect, or receive at any other point upon the same railroad; or if it shall charge, collect, or receive for the transportation of any passenger, or freight of any description, over its railroad, a greater amount as toll or compensation than shall, at the same time, be charged, collected, or received by it for the transportation of any passenger, or like quantity of freight of the same class, being transported in the same direction, over any portion of the same railroad, of equal distance; or if it shall charge, collect, or receive from any person or persons, a higher or greater amount of toll or compensation than it shall, at the same time, charge, collect, or receive from any other person or persons for receiving, handling, or delivering freight of the same class and like quantity, at the same point upon its railroad; or if it shall charge, collect, or receive from any person or persons, for the transportation of any freight upon its railroad, a higher or greater rate of toll or compensation than it shall, at the same time, charge, collect, or receive from any other person or persons, for the transportation of the like quantity of freight of the same class, being transported from the same point, in the same direction, over equal distances of the same railroad; or if it shall charge, collect, or receive from any person or persons, for the use and transportation of any railroad car or cars upon its railroad, for any distance, the same or a greater amount of toll or compensation than is at the same time charged, collected, or received from any other person or persons, for the use and transportation of any railroad car of the same class or number, for a like purpose, being transported in the same direction, over a greater distance of the same railroad; or if it shall charge, collect, or receive from any person or persons, for the use and transportation of any railroad car or cars upon its railroad, a higher or greater rate of toll or compensation than it shall, at the same time, charge, collect, or receive from any other person or persons, for the use and transportation of any railroad car or cars of the same class or number, for a like purpose, being transported from the same point, in the same direction, over an equal distance of the same railroad; all such discriminating rates, charges, collections or receipts, whether made directly, or by means of any rebate, drawback, or other shift or evasion, shall be deemed and taken, against such railroad corporation, as *prima-facie* evidence of the unjust discriminations prohibited by the provisions of this act, and it shall not be deemed a sufficient excuse or justification of such discriminations on the part of such railroad corporation, that the railway station or point at which it shall charge, collect, or receive the same or less rates of toll or compensation, for the transportation of such passenger or freight, or for the use and transportation of such railroad-car the greater distance, than for the shorter distance, is a railway station or point at which there exists competition with any other railroad or means of transportation. This section shall not be construed so as to exclude other evidence tending to show any unjust discrimination in freight and passenger rates. The provisions of this section shall extend and apply to any railroad, the branches*

thereof, and any road or roads which any railroad corporation has the right, license, or permission to use, operate, or control, wholly or in part, within this State: *Provided, however*, That nothing herein contained shall be so construed as to prevent railroad corporations from issuing commutation, excursion, or thousand-mile tickets, as the same are now issued by such corporations.

Sec. 4. Any such railroad corporation guilty of extortion, or of making any unjust discrimination as to passenger or freight rates, or the rates for the use and transportation of railroad-cars, or in receiving, handling, or delivering freights, shall upon conviction thereof be fined in any sum not less than one thousand dollars (\$1,000), nor more than five thousand dollars (\$5,000), for the first offense; and for the second offense not less than five thousand dollars (\$5,000), nor more than ten thousand dollars (\$10,000); and for the third offense not less than ten thousand dollars (\$10,000), nor more than twenty thousand dollars (\$20,000); and for every subsequent offense and conviction thereof, shall be liable to a fine of twenty-five thousand dollars (\$25,000): *Provided*, That in all cases under this act either party shall have the right of trial by jury.

Sections five and nine relate to the mode of procedure, section eleven repeals the law of 1871, and section ten defines the term "railroad corporation" contained in this act "to mean all corporations, companies, or individuals, now owning or operating, or which may hereafter own or operate, any railroad, in whole or in part, in this State; and the provisions of this act shall apply to all persons, firms, and companies, and to all associations of persons, whether incorporated or otherwise, that shall do business as common carriers upon any of the lines of railways in this State (street-railways excepted), the same as to railroad corporations hereinbefore mentioned."

The other sections were as follows:

Section 6. If any such railroad corporation shall, in violation of any of the provisions of this act, ask, demand, charge, or receive of any person or corporation, any extortionate charge or charges for the transportation of any passengers, goods, merchandise, or property, or for receiving, handling, or delivering freights, or shall make any unjust discrimination against any person or corporation in its charges therefor, the person or corporation so offended against may, for each offense, recover of such railroad corporation, in any form of action, three times the amount of the damages sustained by the party aggrieved, together with cost of suit and a reasonable attorney's fee, to be fixed by the court where the same is heard, on appeal or otherwise, and taxed as a part of the costs of the case.

Sec. 7. It shall be the duty of the railroad and warehouse commissioners to personally investigate and ascertain whether the provisions of this act are violated by any railroad corporation in this State, and to visit the various stations upon the line of each railroad for that purpose, as often as practicable; and whenever the facts in any manner ascertained by said commissioners, shall in their judgment warrant such prosecution, it shall be the duty of said commissioners to immediately cause suits to be commenced and prosecuted against any railroad corporations which may violate the provisions of this act. Such suits and prosecutions may be instituted in any county in this State, through or into which the line of the railroad corporation sued for violating this act may extend. And such railroad and warehouse commissioners are hereby authorized, when the facts of the case presented to them shall, in their judgment, warrant the commencement of such action, to em-

ploy counsel to assist the Attorney-General in conducting such suit on behalf of the State. No such suits commenced by said commissioners shall be dismissed, except said railroad and warehouse commissioners and the Attorney-General shall consent thereto.

Sec. 8. The railroad and warehouse commissioners are hereby directed to make, for each of the railroad corporations doing business in this State, as soon as practicable, a schedule of reasonable maximum rates of charges for the transportation of passengers and freight and cars on each of said railroads; and said schedule shall, in all suits brought against any such railroad corporations, wherein are in any way involved the charges of any such railroad corporation, for the transportation of any passenger, or freight or cars, or unjust discrimination in relation thereto, be deemed and taken, in all courts of this State, as *prima-facie* evidence that the rates therein fixed are reasonable maximum rates of charges for the transportation of passengers and freights and cars upon the railroads for which said schedules may have been respectively prepared. Said commissioners shall, from time to time, and as often as circumstances may require, change and revise said schedules. When any schedules shall have been made or revised, as aforesaid, it shall be the duty of said commissioners to cause publication thereof to be made for three successive weeks, in some public newspaper published in the city of Springfield, in this State: *Provided*, That the schedules thus prepared shall not be taken as *prima-facie* evidence as herein provided until schedules shall have been prepared and published as aforesaid for all the railroad companies now organized under the laws of this State, and until the 15th day of January, A. D. 1874, or until ten days after the meeting of the next session of this General Assembly, provided a session of the General Assembly shall be held previous to the 15th day of January aforesaid.

All such schedules, purporting to be printed and published as aforesaid, shall be received and held, in all such suits, as *prima facie* the schedules of said commissioners, without further proof than the production of the paper in which they were published, together with the certificate of the publisher of said paper that the schedule therein contained is a true copy of the schedule furnished for publication by said commissioners, and that it has been published the above specified time; and any such paper, purporting to have been published at said city, and to be a public newspaper, shall be presumed to have been so published at the date thereof, and to be a public newspaper.

Sec. 9. In all cases under the provisions of this act, the rules of evidence shall be the same as in other civil actions, except as hereinbefore otherwise provided. All fines recovered under the provisions of this act shall be paid into the county treasury of the county in which the suit is tried, by the person collecting the same, in the manner now provided by law, to be used for county purposes. The remedies hereby given shall be regarded as cumulative to the remedies now given by law against railroad corporations, and this act shall not be construed as repealing any statute giving such remedies. Suits commenced under the provisions of this act shall have precedence over all other business, except criminal business.

This law went into effect July 1st, and there seems to have been a general disposition on the part of the railroad companies to conform to it, at least until its constitutionality should be tested. New schedules were, therefore, prepared by the companies, and went into operation simultaneously with the law.

Toward the close of the year an action was begun at Freeport by the Attorney-General in behalf of the railroad and warehouse commis-

sioners against the Chicago & Northwestern Railroad Company for various alleged violations of the law, which will doubtless be made a test-case to try the constitutionality of the act. By the terms of the act, the schedules prepared and published by the commissioners become *prima-facie* evidence after the 15th of January, 1874.

This important subject is thus referred to by Governor Beveridge, in a message to the adjourned session of the Legislature in January, 1874:

The act approved May 2, 1873, was in force July 1, 1873. On that day, rates were largely advanced on some of the leading lines in the State, under the plea of conforming to law. While this action may have conformed to that part of the law forbidding unjust discrimination, it hardly conformed to that part of the law forbidding extortion. The plea for this advance cannot be maintained. The wisdom of the advance was soon doubted by railroad managers, and their schedule of rates, in many instances, modified.

What the railroad corporations will do after the 15th of January, when the schedules are in full force, I cannot say. Should they fail, or refuse to comply with the terms of the act, it will be the duty of the Executive and the officers of the law to execute with energy and enforce with rigor the will of the people, as expressed by the Legislature. The people demand that public corporations shall subserve public interests, and to this imperative demand every branch of government must and will conform. The sooner the problem is solved, the better, in my opinion, for all concerned. Once solved, I feel assured the people will be just and reasonable in their legislation toward corporate bodies, and give them all privileges consistent with the public good.

I recommend a full and fair trial of the law passed at the former session; and if, upon trial, it is found that the schedule of rates prepared and published by the commissioners is unjust or unfair to the people or railroads, the commissioners can change and revise the same, and such action will meet the approval of a candid and considerate people.

As early as the latter part of 1872 the complaints of the farmers attracted no little public attention and discussion in the public press, and early in 1873 the importance of the farmers' movement became manifest in numerous conventions, mass meetings, etc., representing the granges and other farmers' associations, which were held in various places throughout the year, not only in Illinois, but in other States. The most notable of these was the convention held in Springfield, Ill., on the 2d and 3d of April, 1873, which was addressed by Governor Beveridge and ex-Governor Palmer. The resolutions adopted were as follows:

Resolved, by the farmers of Illinois in mass meeting assembled:

1. That all chartered monopolies, not regulated and controlled by law, have proved in that respect detrimental to the public prosperity, corrupting in their management, and dangerous to republican institutions.

2. The railways of the world, except in those countries where they have been held under the strict regulation and supervision of the government, have proved themselves formidable of arbitrary extortion, and opposed to free institutions and free commerce between the States as the feudal barons of the middle ages.

3. That we hold, declare, and resolve, that this despotism, which defies our laws, plunders our shippers,

impoverishes our people, and corrupts our government, shall be subdued, and made to subserve the public interest, at whatever cost.

Resolved, That we believe the State did not and could not confer any of its sovereign power upon any corporation, and that now is the most favorable time to settle the question, so that it may never be hereafter misunderstood: that a State cannot create a corporation it cannot thereafter control.

Resolved, That, in view of present exertions, we look with alarm upon the future of an interest which can combine in the hands of a few men a capital of nearly two hundred and fifty million dollars in our own State, and four thousand million dollars in our Union; and we believe it essential to the prosperity of all classes, that this contest continue until these corporations acknowledge the supremacy of law.

Resolved, That we regard it as the undoubted power and the imperative duty of the Legislature to pass laws, fixing reasonable rates for freight and passengers, without classification of roads, and that we urge upon our General Assembly the passage of such laws.

Resolved, That the existing statute [that of 1871], providing for a classification of railroads, with a view to adjusting a tariff of charges according to gross amount of earnings, is a delusion and a snare, and is so framed that railroads are able to classify themselves, and that it ought to be carefully modified or repealed.

Resolved, That, inasmuch as the Supreme Court has clearly pointed out the way to reach unjust discriminations made by the railroads of this State, we can see no reason for delay on the part of the Legislature in enacting the necessary laws on this subject, and we urge immediate action thereon.

Resolved, That we urge the passage of a bill enforcing the principle that railroads are public highways, and requiring railroads to make actual connections with all roads whose tracks reach and cross their own, and to receive and transmit all cars and trains offered over their roads at reasonable maximum rates, whether offered at such crossings or at stations along their roads, and empowering the making of connections by municipal corporations for that purpose, and for the public use.

Resolved, That we heartily indorse the action of the General Assembly looking to the enforcement of the performance of their duties by monopolists as common carriers, and that, in addition thereto, we believe that railroads should be required to carry all the freights and passengers offered from the country through which they pass, and not be permitted to limit the amount of their business, and destroy its natural increase.

Resolved, That the constitution and laws of Illinois are as binding upon railroad corporations as upon the citizens, and that the State must require obedience to the laws from all alike, whether the same be deemed constitutional or not by the parties affected, until repealed or declared unconstitutional.

Resolved, That we indorse most fully the action of those who tender legal rates of fare upon the railroads, and refuse to pay more, and that it is the duty of the Legislature to provide by law for the defense by the State of all suits commenced, or that hereafter may be commenced, by the railroad companies against individuals who, in good faith, have insisted, or hereafter may insist, upon the right to ride on railroads at legal rates.

Resolved, That we demand of Congress a repeal of all laws preventing the competition of all vessels which may choose to engage in the carrying-trade on our inland lakes, between ports in the United States, without regard to nationality.

Resolved, That we are in favor of the immediate repeal of the protective duties on iron, steel, lumber, and all materials which enter into the construction of railroad-cars, steamships, sailing-vessels, agricultural implements, etc., and that we urge upon Congress immediate action for this purpose; that cheap railroads and cheap ships are necessary to cheap

freights; and that we invite the railroads to cooperate with us to that end.

As soon as the farmers' movement began to show signs of strength, and before the assembling of the Springfield Convention, its force as a political alliance, or weapon, did not fail to attract the attention of political leaders. By some of these, the evils complained of by the agricultural classes were attributed to the tariff legislation of Congress; they therefore demanded a reduction, or abolition, of the duties on iron, steel, lumber, salt, and such articles as enter into the construction of railroads and vessels. These attempts made by "outsiders" to control the action of the farmers in their first important convention in Springfield were thus stated by a writer who had carefully studied the movement: "At that convention an attempt was made by the politicians to 'capture the movement,' since it had become so powerful as to possess great voting strength. The railroads also made an effort to neutralize the effect of the whole movement, by asserting that the high rates of transportation were a legitimate and necessary outgrowth of the existing tariff system, in that the system increased the prices of all materials which enter into the construction of railroads. The long 'string of resolutions' which were adopted at this convention, and which received so much comment at the time in the public press, were the result of the combined efforts of the politicians to obtain possession of the movement, and of the railroads to neutralize its force."

Numerous county and district conventions were held during the summer by the farmers, a notable one being that in the Fifth Judicial District, which nominated A. M. Orwig for election to the Supreme Court, instead of Chief-Justice Lawrence, whose term was about to expire. On account of the above-mentioned decision apparently in favor of the railways, pronounced by Chief-Justice Lawrence, he had become unpopular with the farmers, who now sought the election of Mr. Craig, who was regarded as friendly to their cause. In the ensuing election, Mr. Craig was the successful candidate.

On the 22d of October, the Northwestern Farmers' Convention was held in Chicago, and was attended by about 150 delegates, mainly from Illinois, but representing Indiana, Iowa, Wisconsin, Michigan, and New York.

The following resolutions were adopted:

Resolved, by this Convention, that we respectfully but most earnestly request Congress without needless delay to pass a maximum freight and passenger law regulating traffic between the States; and that our Legislatures pass a law regulating it within the States, and we hereby protest against the further granting of any subsidies whatever to private corporations of any kind.

Resolved, That we demand the construction of railroads, and the improvement of water communications between the interior and the seaboard, the same to be owned and operated by the General Government, for the purpose of affording cheap trans-

portation, and to protect the people from the exactions of monopoly.

Resolved, That to lessen the burden of transportation is to do, as far as possible, without transportation, and therefore we ask and urge our people to do all in their power to create, and sustain by their patronage, home manufactures.

Resolved, That we hail with pleasure the prospect of the early completion of the double-track Continental Freight Railway from the city of New York to Omaha, which promises that grain shall be transported over said railway at a cost not exceeding eight mills per ton per mile.

Resolved, That debt should ever be held as one of our greatest enemies; that it deprives us of manliness, and in a measure makes us slaves; that to live within our means, however small, to pay as we go, will contribute to our success; recognizing the fact that the people are in earnest, we would urge them to free themselves from this curse, so that, if a final struggle must come between the people and monopoly, our houses may be in order and we the better able to withstand it.

Resolved, That no one industry can be protected by legislation except at the expense of our other industries, and that we are opposed to all special legislation.

Resolved, That we recommend the thorough organization of the farmers of the country in local, county, and State organizations, for the purpose of reforming the great abuses, and dealing out equal justice to all men.

A resolution was adopted authorizing the officers of the convention to appoint national and State committees to urge Congress and the Legislatures for efficient legislation for the control of railroad and other transportation companies. The operation of the new "Illinois Railroad Law" was thus reported by the committee on that subject:

The committee appointed to report to the convention the effect upon producers and shippers of the legislation on railways in Illinois, and whether they advise similar legislation in all the States, have had the subject under consideration, and would report that its effect has not as yet been such as its friends contemplated; that the cost of transportation has not been reduced to the extent that it was expected when the law was first passed; but when the railroads of the State are compelled to a strict observance of the same, it is believed that favorable results will follow. Your committee respectfully represent, on the advisory portion of the resolution, that they are not prepared to advise other States, but believe that the people of the other States of the Union would be benefited by the passage of a law similar to the law of Illinois, or a better one if they can frame it.

On the 4th of November, elections for county officers took place throughout the State, the general results of which indicate the comparative strength of the farmers' movement. In sixty-six counties the farmers had made their own nominations. Of the total vote, 170,268, cast in these, the farmers' candidates received 94,188. In the other counties the farmers united with the Democrats or the Republicans.

On the 17th of December, the first annual convention of the Illinois State Farmers' Association assembled in Decatur, and continued in session three days; 327 delegates were in attendance, representing 97 of the 102 counties in the State. The greatest enthusiasm

prevailed. The annual report of the secretary showed that in the eighty counties reporting there were 830 farmers' clubs with a membership of 46,473; in addition to which, 549 granges had reported. The position of this organization on the public questions of the day is indicated in the following platform, which was adopted:

Whereas, Through the departure from the primary principles of our Government as promulgated by its founders, and through the imprudent exercise of that highest prerogative of the freeman, the right of suffrage, we, the farmers of Illinois, in common with the wealth and food producers of these United States, have, by our past action, acquiesced in a system of class legislation which makes the great majority slavishly subservient to a small minority; and,—

Whereas, This condition is clearly traceable to the fostering protection which has been accorded by our legislative bodies, both State and national, to the financial, mercantile, manufacturing, and transportation interests, enabling them to accumulate an undue proportion of the national wealth, and encouraging them in the exercise of corrupting lobby influences on our legislative system; therefore,—

Resolved, That the preservation of our national life imperatively demands that every American voter should attend with care to all primary nominations and elections, so as to insure the election of competent and honest men to all offices in the gift of the people.

Resolved, That the recent record of the old political parties of this country is such as to forfeit the confidence and respect of the people, and that we are therefore absolved from all allegiance to them, and should act no longer with them.

Resolved, That we demand the unconditional repeal of the salary-grab law, the repeal to be retroactive in its action, and this without a restoration of the franking privilege.

Resolved, That we do not recognize any necessity that public officers should receive extravagant salaries, to the end that they may conform to the demand of expensive and fashionable tastes, which in their very nature are antagonistic to republican principles, and we demand the reduction of official salaries.

Resolved, That we demand the immediate reform of abuses in the civil service, through which the patronage of the Government is dispensed as a reward for partisan service, rather than with regard to the public necessities.

Resolved, That we are in favor of improving and perfecting the navigation of our lakes and rivers, and water connections, as soon as it can possibly be done.

Resolved, That the right to exchange the products of labor is coexistent with the right of ownership. We submit to all needful taxation for the support of government, but denounce all taxation levied for special classes. We hold that the existing duties on clothing, lumber, salt, iron, and steel, are not only unnecessary to the successful prosecution of these industries, but oppressive to labor, and tend to create monopolies, while at the same time they furnish a pretext for extortionate charges for railroad transportation.

Resolved, That we deprecate all further grants of public lands, or loans of the public credit, and all national, State, or local subscriptions, in aid of corporations.

Resolved, That we favor the repeal of our national banking law, and believe that the Government should supply a legal-tender currency directly from the Treasury, interchangeable for government bonds bearing the lowest possible rate of interest.

Resolved, That we hold that our patent laws are

too often made to subserve the interest of monopolists, and should be lawfully revised and restricted.

Resolved, That the existing railroad legislation of this State should be sustained and enforced until thoroughly tested before the courts; that we oppose any legislation by Congress, under the plea of regulating commerce between the States, which shall deprive the people of their present controlling influence through State legislation.

Resolved, That the right of the Legislature to regulate and control the railroads of the State must be vindicated, established, and maintained, as an essential attribute of State government, and that those holding the doctrine that railroad charters are contracts in the sense that they are not subject to legislative supervision and control, have not a just appreciation of the necessary powers and rights of a free government, and we will agree to no truce and will submit to no compromise short of the complete vindication and reestablishment of the supremacy of the State government in its rights, through its Legislature, to supervise and control the railroads of the State in such manner as the public interest shall demand.

Resolved, That we uncompromisingly condemn the practice of our public officials in receiving free passes from railway managers.

Resolved, That we demand a reduction of all public expenditures, to the end that taxation may be reduced to the lowest possible limit.

Resolved, That we condemn the action of our Legislature in adjourning the regular session, thereby practically defeating the provision of the constitution providing for biennial sessions.

Resolved, That since a large number of plough-manufacturers of the West have thrown down the gauntlet we take it up, and recommend to the farmers of this State to patronize none of said manufacturers, until they will sell to us direct at wholesale rates.

The adjournment of the Legislature took place early in May, the measures passed being mostly of local importance. The new jury law contains the following important provision: "That it shall not be a cause of challenge that a juror has read in the newspapers an account of the commission of the crime with which the prisoner is charged, if such juror shall state on oath that he believes he can render an impartial verdict according to the law and the evidence; and provided, further, that in the trial of any criminal cause the fact that a person called as a juror has formed an opinion or impression, based upon rumor or upon newspaper statements (about the truth of which he has expressed no opinion), shall not disqualify him to serve as a juror in such cause if he shall, upon oath, state that he believes he can fairly and impartially render a verdict therein in accordance with the law and the evidence, and the court shall be satisfied of the truth of such statement."

Governor Richard J. Oglesby, who was inaugurated on the 18th of January, was a few days later elected to the United States Senate for the full term of six years from March 4, 1878, succeeding Lyman Trumbull. Upon the resignation of Governor Oglesby, Lieutenant-Governor Beveridge succeeded to the Executive chair.

The final valuations of property, real and personal, as made by the State Board of Equalization, are as follows:

Railroad property assessed in county boards, equalized.....	\$9,568,043
Tangible property of railroads equalized by the State Board.....	59,588,937
Capital stock assessed.....	62,608,747
Total valuation.....	\$131,765,727
Property assessed in counties.....	\$1,186,908,761
Telegraph companies' stock.....	1,238,394
Capital stock of other corporations.....	19,658,064
Total valuation for 1873.....	\$1,399,570,950
Total valuation for 1872.....	510,866,683
Increase of valuation over that of 1872...	\$828,684,267

Illinois contains a greater mileage of railroads than any other State in the Union. In 1873, 6,861 miles were reported by the Railroad Commissioners; aggregate cost of roads and equipments, \$238,584,541; capital stock paid in, \$140,126,064.

The assessed value of railroad property in Illinois, in 1873, as returned by the State Board of Equalization, is shown in the following table. It will be observed that the Illinois Central (705 miles) does not appear:

NAME OF COMPANY.	RIGHT OF WAY AND IMPROVEMENTS.		SUPERSTRUCTURE.		Value of Rolling Stock.	Total Value of Property (discontinued Railroad Trunk and Rolling Stock).
	Acres.	Value.	Main Tract.	Side, Second, or Turn-out Tract.		
			Miles.	Miles.

The joint commission of the two branches of the Legislature, appointed to revise the statutes so as to make them conform to the new constitution, made their report early in January, 1874. It was believed that this would be one of the chief matters before the adjourned session of the Legislature which assembled in that month.

The various public institutions of the State are reported to be in a satisfactory condition. The Southern Normal University is nearly

completed and furnished. The work on the Northern Illinois Hospital and Asylum for the Insane has progressed satisfactorily. The central building will be finished about April 1, 1874, and the south wing by the 1st of September ensuing. The foundation of a plain, neat, and substantial edifice for the Illinois Charitable Eye and Ear Infirmary has been laid in Chicago. The new building for the education of the blind is inclosed, and under contract to be finished by the 1st of August,

1874. The dining-hall for the Deaf and Dumb Institution is completed, and the foundations for the chapel and school-building are laid. Pursuant to an act approved May 7th, and in force July 1st, the Board of Trustees of the Illinois Industrial University has been re-organized. The new building has been completed and occupied, and the institution is in a prosperous condition.

The present State government, which is entirely Republican, is as follows: Governor, John T. Beveridge; Secretary of State, George H. Harlow; Auditor, Charles E. Lippencott; Treasurer, Edward Rutz; Attorney-General, James K. Edsall. The political complexion of the Legislature is as follows:

MEMBERS	Senate.	House.	Joint Ballot.
Republicans.....	33	90	123
Democrats and Liberals.....	18	63	81
Republican majority.....	15	27	42

The following is the bonded State debt, January, 1874:

Interest bonds—inscribed stock, 1877.....	\$926,450 39
Refunded stock..... 1876.....	35,000 00
Refunded stock..... 1877.....	245,000 00
Normal university bonds..... 1879.....	23,000 00
Thornton loan bonds..... 1879.....	55,000 00
\$1,000 war bonds..... 1879.....	81,000 00
500 war bonds..... 1879.....	65,000 00
100 war bonds..... 1879.....	36,300 00
Revenue deficiency bonds..... 1879.....	250,000 00
	\$1,706,750 39

Besides the above, there are a few thousand dollars of bonds outstanding, which have been called in by the Governor's proclamation to be paid off, but not yet surrendered.

INDIA, BRITISH, a vast empire in Asia, equaling in extent the Continent of Europe, without Russia. The area and population of the administrative divisions, or distinct presidencies and provinces, under British rule, were, according to the latest official statements, as follows:

PRESIDENCIES AND PROVINCES UNDER THE ADMINISTRATION OF	Area in English square miles.	Population.	Date of census.	Average population per sq. mile.
Governor-General of India.....	Ajmere..... 2,673 Coorg..... 2,000 Berar..... 16,960 Mysore..... 27,077	426,268 168,312 2,231,565 5,055,412	1871 1872 1867 1872	159 84 132 187

Total under British administration.....	950,919	191,307,070		201

The native states of British India, though not constituting a part of the British dominion, are more or less under the control of the Anglo-Indian Government. Their area and population are as follows:

NATIVE STATES UNDER	Area.	Population.
Governor-General of India.....	385,296	97,716,352
Lieutenant-Governor of Bengal.....	79,156	2,139,565
Lieutenant-Governor of Northwest Provinces.....	5,390	1,284,601
Lieutenant-Governor of Punjab.....	43,877	5,086,503
Chief Commissioner of Central Provinces.....	26,399	1,095,275
Governor of Madras.....	81,953	2,371,333
Governor of Bombay.....	72,076	6,552,170
Total native states.....	646,147	46,245,888

Education continues to make rapid progress in India. The number of Government and aided colleges and schools was 43,192, and the number of pupils attending them 977,014. The gross expenditures from imperial and other sources amounted to more than £1,000,000 sterling.

The British-born population in India, exclusive of the army, amounted, according to a census taken June 15, 1871, to 64,061 persons. Of these, there were 38,946 of the male, and 25,115 of the female sex. The largest number, at the date of the census, was in the

province of Lower Bengal, namely, 16,402; the next largest in the province of Bombay (10,921), and the Northwest Provinces (6,910). In the three capital cities of India, the number of British subjects was, in 1871, as follows: Calcutta, 8,320; Bombay, 4,796; Madras, 1,308. The occupations of the British-born subjects were as follows: 1. Professional class, including civil service, 14,822. 2. Domestic class, 12,708. 3. Commercial class, 7,993. 4. Agricultural class, 614. 5. Industrial class, 2,595. 6. Indefinite and non-productive class, including women and children, 25,329.

The total revenue of India, during the financial year ending March 31, 1872, reached the sum of £50,110,215, and the expenditures amounted to £46,986,038. The three most important sources of the public revenue are land (in 1872, £20,520,337); salt (£5,996,595); and opium (£9,253,859). The heaviest items among the expenditures are the army (£15,000,000); interest on funded and unfunded debt (£5,400,000); allotment for provincial services (£4,800,000). The interest paid on the Indian debt during the year ending March 31, 1872, amounted to £4,853,000, and the total debt for loans contracted up to that date was £105,491,000 (£66,500,000 in India, £38,991,000 in England).

Enumerations to ascertain the religions of the inhabitants of India were taken in the various provinces during the years 1867-

1872. The following table shows the results of those in all the provinces except Bombay and Madras:

PROVINCES.	Christians.	Hindus.	Mohammedans.	Buddhists.	Other Creeds.
GOVERNMENT OF INDIA:					
Ajmere.....	607	847,748	54,058	22,765	96
Benar.....	908	55,219	151,961		2,023,392

Chota Nagpore.....	15,708	2,507,282	169,606		1,070,475
Assam.....	1,579	1,692,964	170,109	1,473	8,636
Total.....	93,013	42,674,361	20,664,775	86,496	2,351,904
Northwest Provinces.....	10,640	26,569,068	4,189,848		
Orissa.....	7,767	9,713,980	1,011,110	56	487,884
Punjab.....	22,228	6,112,087	9,337,611	26,190	2,088,636
Central Provinces.....	6,709	6,929,973	223,108	21,005	1,875,248
Burmah.....	20,061	26,427	82,002	2,136,829	268,014
Total.....	197,880	97,351,042	35,963,184	2,319,151	9,185,765

The most notable fact appearing from a comparison of these figures with former statements on the religious creeds of India is the unexpectedly large number of Mohammedans. According to former statements, they numbered in all India only about 25,000,000, while now they are reported as numbering 35,900,000, exclusive of Madras, which has about 1,500,000, and Bombay, where they are estimated at 2,500,000.

In the army estimates laid before Parliament in the session of 1872, the strength of the British forces in India for the year 1873-'74 was given as follows: officers, 2,875; non-commissioned officers, trumpeters, and drummers, 4,669; rank and file, 55,380; total strength, 62,977. The native forces in 1871 amounted to 102,801. The total strength of the Indian army, in 1857, the year before the mutiny, consisted of 45,522 Europeans, and 232,224 natives.

The total value of the imports and exports of the Indian Empire, including treasure, was as follows, in the year ending March 31, 1872:

	Imports.	Exports.
Bengal.....	£19,741,430	£37,849,328
Madras.....	3,702,232	7,297,394
Bombay.....	17,275,196	25,269,239
Sinde.....	493,145	808,912
Burmah.....	1,439,656	2,807,136
Total.....	£22,657,559	£64,661,989

Rice and cotton, which are produced in all the provinces, head the list of exports. Then come indigo, tea, and jute, from Calcutta; opium from Calcutta and Bombay; coffee from Madras.

The number of all vessels, including native craft, which entered the ports of India during the year ending March 31, 1872, was 21,209;

tonnage, 4,072,916: the number of vessels cleared, 20,676; tonnage, 4,260,722.

On April 1, 1873, the aggregate length of railroad-lines opened for public traffic was 5,478 miles; of lines in progress, 1,797 miles; of lines sanctioned, 316: total, 7,592. The Government of India, in 1869, decided on carrying out all the new railway extensions by means of direct agency, that is, without the intervention of guaranteed companies, and 1,330 miles of state railways were under construction in September, 1873.

The number of post-offices and receiving-houses on March 31, 1872, was 4,769; total revenue, £820,894; total expenditure, £657,200; total number of letters and newspapers sent through the post-office, 84,562,000.

The electric telegraph connects all the important places in India. The aggregate length of the telegraph-lines was 15,102 miles; total receipts, £151,261; total expenditures, £129,562; number of offices, 205.

The present Viceroy and Governor-General of India, Lord Thomas George Baring Northbrook, assumed his powers in May, 1872. He was born in 1826; is the eldest son of the Right Hon. Sir Francis, first Baron Northbrook (a brother of Hon. Thomas Baring); succeeded his father on September 6, 1866; was member of Parliament for Penryn, 1857-1866; a Lord of the Admiralty, 1857-1858; Under-Secretary for India, for War and Home Office, 1859-1866; Secretary to the Admiralty, 1860; Under-Secretary for War, 1869-1872.

The growth of scientific and literary societies among the native communities of India is regarded as a very remarkable sign of progress and intellectual activity. There have always been societies in India in which Europeans and educated natives meet on common ground, and

such institutions continue to increase and flourish. The Bengal Asiatic Society was founded by Sir William Jones in 1784, as a centre to which individual inquirers might forward materials, and from which they might derive assistance and advice; and the Madras Literary Society was formed in 1813. The Bombay branch of the Asiatic Society dates from 1804; its *Journal* was established in 1841, and the publication has been regularly kept up ever since at intervals of one or two years. The Bombay Geographical Society dates from 1830, and its *Journal* contains many valuable papers, chiefly from officers of the Indian Navy; and the Medical and Physical Society, after languishing for some years, has been revived, and published a large volume of "Transactions" in 1871. In Calcutta, besides the venerable Asiatic Society, there are the Bethune Society, for the promotion of intercourse between European and native gentlemen; the Dalhousie Institute, for the literary and social improvement of all classes of the community; the Bengal Social Science Association; and others. In other parts of India there are several societies, such as the Rangoon Literary Society, with lectures and classes, established in 1857. But, in addition to these societies of European origin, there are now throughout India, and especially in Bengal, many associations, some of them literary or scientific, but others political, which were founded by, and are composed entirely of, natives. In Bengal, among many others, there are the People's Association and the Radical League. The Lieutenant-Governor says: "If not very completely justifying the titles they assume, they are, nevertheless, an earnest of things to come, and are, on the whole, much to be encouraged; some are already interesting societies, with much reality and substance in them." In Oude there are three Native Reform Clubs. In the Central Provinces the associations appear to be chiefly formed by school-masters, to afford opportunities for self-improvement, but there are also native clubs. The information on this interesting subject from other parts of India is very incomplete, but it is clear that these native societies and institutions are advancing with rapid growth, and springing into existence in all directions. A scene, such as has not before been seen in any part of India, occurred in December, 1873, in Barahnagar. The members of the Working-Men's Club, a society which has been in existence there for the last four years, celebrated their anniversary with earnestness and enthusiasm. The party, headed by Babu Sasipada Banerjee, undertook an excursion to the Barrackpore Park by green boats, decorated with flowers and flags. But, while the number of societies which emancipate themselves from the old prejudices of the Hindoo religion is on the increase, facts are not wanting, on the other hand, which show that Hindooism continues to exercise an influence even on men of the highest social stand-

ing. Thus it is reported from Calcutta that Baboo Kali Mohun Dass—a much respected pleader of the Calcutta High Court—has thought it worth while to pay ten thousand rupees to be readmitted to his caste, the privileges of which he had forfeited for some reasons not stated. The ceremony itself is said to have cost him half the sum mentioned, the remainder being dispensed in pious works.

In December, 1873, the first representative popular election took place in India, fifteen municipal commissioners being chosen at Berhampore. The election was entirely successful. One-third of 5,569 rate-payers voted, including females.

Toward the close of the year the province of Bengal was threatened by one of those terrible famines from which India has so severely suffered on many previous occasions. As in the fatal autumn of 1865, the September rice-harvest had been safely reaped, but the December harvest (the great crop of the year) was burned down to the ground for want of rain. The December harvest alone sufficed to place Bengal beyond the reach of scarcity. The two subsidiary harvests—namely, the rice-crop, which is reaped in September, and the pulse, pease, and miscellaneous seed-crop—may take the extreme edge off a famine, but are powerless to avert the most terrible suffering among the poorer classes. This year the rain set in late and ceased early, and the September rice-harvest was, on the whole, a light one. The districts chiefly affected are the high tracts of Behar and Western Bengal. Behar is amply furnished with means of communication. A railway and the great river Ganges run through its midst, roads diverge on either side, and the isolation which rendered the calamity so appalling in Orissa seven years ago is not to be feared here. The western districts—such as Hazaribagh—are more segregated. But they have a means of supply *via* the Grand Trunk road which Orissa did not possess. In Behar, moreover, the spring crops play a much more important function in the food-supply of the people than they do in Orissa. It was generally acknowledged that the English authorities were acting with the most praiseworthy energy. Sir George Campbell, the Lieutenant-Governor of Bengal, gave formal notice to the Viceroy that his provinces lay under the approaching shadow of this calamity. Lord Northbrook immediately telegraphed full authority to the Lieutenant-Governor to commence public works with a view of preventing the able-bodied population from sinking into pauperism by the gradual decline of their physical strength. Two great enterprises—the Soane Canal, and the Northern Bengal Railway, connecting Calcutta with Darjeeling—were to be pushed on at once, with such lesser local works as the officers in charge of the threatened district might deem needful. Thus the Government avoided the error made in 1865-'66, when the public works

were delayed until the population was no longer able to give a fair return of labor, and the only alternative was to feed the people gratuitously or to let them die of hunger. Under the present constitution a Lieutenant-Governor can only communicate with other heads of provinces through the Government of India. The Viceroy, therefore, went to Calcutta, in order that, if the actual facts should warrant Sir George Campbell's making state importations from Burmah or the northwest, he might, with a day's delay, obtain the necessary sanction from the Governor-General in council.

INDIANA. The Legislature of Indiana was in session from January 15th to March 10th. Among the important acts of the session were, one abolishing the Courts of Common Pleas and dividing the State into 88 circuits for judicial purposes, one remodeling the divorce laws, one amending the school laws, and one regulating the sale of intoxicating liquors. The causes of divorce under the new law are the following, and no other:

1. Adultery, except as hereinbefore provided.
2. Impotency existing at the time of the marriage.
3. Abandonment for two years.
4. Cruel and inhuman treatment of either party by the other.
5. Habitual drunkenness of either party, or the failure of the husband to make reasonable provision for the family.
6. The failure of the husband to make reasonable provision for the family for a period of two years.
7. The conviction, subsequent to the marriage, in any country, of either party, of an infamous crime.

Divorces cannot be granted for adultery in any of the following cases:

1. When the offense has been committed with the connivance or consent of the party seeking the divorce.
2. When the party seeking the divorce has voluntarily cohabited with the other with the knowledge of the fact, or has failed to file his or her petition for two years after he or she had discovered the same.
3. When the party seeking the divorce has also been guilty of adultery under such circumstances as would have entitled the opposite party, if innocent, to a decree.

Divorces may be decreed by the Superior, Circuit, and Common Pleas Courts, on petition filed by any person who, at the time of the filing of such petition, is and shall have been a *bona-fide* resident of the State for the last two years previous to the filing of the same, and a *bona-fide* resident of the county at the time of and for at least six months immediately preceding the filing of such petition, which *bona-fide* residence shall be duly proved by such petitioner to the satisfaction of the court trying the same, by at least two witnesses who

are resident freeholders of the State. And the plaintiff shall, with his petition, file with the clerk of the court an affidavit, subscribed and sworn to by himself, in which he shall state the length of time he has been a resident of the State; and stating particularly the place, town, city or township in which he has resided for the last two years past; and stating his occupation, which shall be sworn to before the clerk of the court in which said complaint is filed.

The defendant must be summoned to appear and answer by a summons personally served upon him, if a resident of the State, and, if not a resident, shall be notified of the proceedings by publication for three consecutive weeks in a weekly newspaper in the county where the proceedings are instituted. No decree can be rendered on default without proof of a legal cause of divorce.

The new liquor law provides that it shall be unlawful, under penalty of from \$10 to \$50 fine, or from ten to thirty days' imprisonment, to sell, barter, or give away intoxicating liquors to be drunk on the premises, without a permit from the county commissioner. Any person wishing to procure such a permit must file in the office of the county auditor a petition praying for such permit, and designating the place where the liquor is to be sold, such petition to be signed by the applicant and the majority of the legal voters of the ward, town, or township, wherein the liquor is to be sold. Before the permit can be issued, the applicant must also file a bond in the sum of \$3,000, payable to the State, secured by at least two good freeholders, and conditioned for the payment of all fines and damages for which the applicant may be liable for violations of the law. It is made unlawful to sell, barter, or give intoxicating liquors to minors, or to persons intoxicated, or in the habit of becoming intoxicated; for every violation of this provision, the person so violating is to be fined not less than \$10 nor more than \$50, or be imprisoned in the county jail not less than ten nor more than thirty days. Becoming intoxicated is also made unlawful under a penalty of \$5 fine for each offense. Any person causing the intoxication, in whole or in part, of any other person, shall be liable to any third person who may take care of the intoxicated person for a reasonable compensation for each day the intoxicated person is so taken care of. Every husband, wife, child, parent, guardian, employer, or other person, who may be injured in person, property, or means of support, by any intoxicated person, or in consequence of intoxication, or, in the absence of these or their failure to claim their right, the township trustee, shall have a right of action against the person who, by selling, bartering, or giving away liquor, may have caused such intoxication, and the person owning the premises on which the liquor was sold is made jointly liable with the

seller of the liquor, but execution is to be levied on the property of the former only when that of the latter is insufficient to satisfy the judgment.

A case was very soon brought for violation of this law which was carried to the Supreme Court for the purpose of testing its validity. A decision was rendered in October, which sustained the validity of the act. The objections made to the law were that it gave legislative power to the people, that it vested administrative power in the people, and that it was local and not general in its application. These were all overruled by the court.

A Temperance Convention was held at Indianapolis on the 2d of April, at which the following resolutions were adopted:

Whereas, An organized association has been formed in the State for the avowed purpose of resisting or evading the law enacted at the last session of the Legislature, regulating the sale of intoxicating liquors; and—

Whereas, We, the men and women of Indiana, have for years past endured and peaceably submitted to the reign of drunkenness, even in communities where dram-shops were forced upon us, regardless of an overwhelming public sentiment opposed to them, we all the while hopefully waiting for and patiently laboring to the attainment of a better state of society: therefore—

Resolved, That we recognize the late enactment of our Legislature as the dawn of the better day, and we hail it as a grand advance in the right direction, and well adapted to the present emergency; and we hereby tender our thanks to the Senators and Representatives who, without regard to party affiliation, carried the measure triumphantly through the Legislature, and to his Excellency the Governor, who gave it his official sanction.

Resolved, That we do not recognize in that provision of the law which permits the keeping of a tippling-house where a majority demands it an acknowledgment of any natural right to maintain such a place of drunken resort, but rather a liberal concession to the spirit of our American institutions, which demand the popular support in order to the enforcement of the law.

Resolved, That we accept the challenge of the liquor dealers to make this dram-shop question an issue before the people at the next election; and we thank them for taking the initiative in this movement, and pledge them that, sinking all minor considerations, we will be glad to meet them at the polls on this issue alone.

Resolved, That, as the good effect of law depends on its faithful execution, we now, and here, pledge ourselves to aid the proper authorities by all lawful means in our power in the enforcement of this statute against all offenders, and we earnestly solicit the cooperation of all the temperance organizations in the State in a united effort to sustain the law.

Resolved, That we are greatly encouraged by the hearty support which this law has met throughout the State from all good men and women, without distinction of political parties or religious peculiarities.

Resolved, That we invoke the aid of all law-abiding citizens in our efforts to defeat the machination of a moneyed organization which seeks to sacrifice the public good to promote private interests.

Resolved, That we recommend a thorough organization of all the friends of law and order in each county in the State, and a general cooperation of these several organizations so as to secure unity and concert of action in the good work.

The receipts of the State Treasury, for the fiscal year ending October 31st, amounted to

\$4,800,653.02, including a surplus of \$755,024.87. The various items were as follows:

Balance on hand, November 1, 1873.	\$755,024 87
General revenue.....	438,191 14
Common-school revenue.....	1,372,993 30
College fund.....	16,128 06
Saline fund.....	2,085 85
Bank-tax fund.....	289 14
Surplus-revenue fund.....	726 50
Public institutions.....	190,608 59
Miscellaneous.....	1,524,545 22

Total receipts, including balance.. \$4,800,653 02

The disbursements of the year amounted to \$4,115,457.55, and there was a balance on hand, at the close, of \$185,175.47. The various items of the expenditures were the following:

Ordinary expenditures.....	\$289,934 77
Office expenses.....	13,619 02
Benevolent institutions.....	352,576 81
College fund.....	10,968 42
Saline fund.....	7,108 11
Bank-tax fund.....	1,737 43
Surplus-revenue fund (costs).....	6 00
Common-school fund.....	1,361,841 22
General revenue.....	120,153 69
Reformatory institutions.....	296,180 43
Educational institutions.....	57,410 38
Industrial interests.....	13,676 00
Public indebtedness.....	1,188,442 87
Military expenditures.....	1,626 60
Legislative expenditures.....	278,373 74
Miscellaneous.....	58,309 86

Total amount audited. \$4,115,457 55

Of the receipts, \$610,159.09 consisted of transfers from the sinking fund. There were three unusual sources of expenditure: first, the redemption of the unsundered bonds of 1836, in obedience to a decision of the courts; second, the reimbursement of over \$90,000 of illegal taxes; and third, the payment of a large portion of the expenses of the Legislature of 1871. There is a temporary loan of \$710,000.

There was a large number of railroad, manufacturing, mining, and other organizations formed during the year, the aggregate being as follows:

ORGANIZATIONS.	Number.	Capital.
Railroads.....	25	\$102,550,000
Manufacturing.....	57	5,889,000
Mining.....	14	2,704,500
Building.....	29	1,780,000
Banking.....	14	352,000
Benevolent.....	2	40,000
Miscellaneous.....	18	1,380,000
Grand total.....	153	\$114,677,500

The State Institution for the Deaf and Dumb at Indianapolis is in a flourishing condition. It can accommodate 280 pupils, and there were 278 in attendance on the 1st of November. The number received during the year was 381, of whom 192 were boys and 189 girls. The institution has been in operation thirteen years, and the total number admitted in that time is 943, of whom 538 have been males and 405 females. The number of families represented is 796; families with one deaf mute, 694; with two, 142; with three, 28; with four, 3; with five, 5; with six, 1. One pupil is the offspring of parents both of whom are deaf mutes, and five of parents one of whom in each case is deaf and dumb, while the other

can both hear and speak. Of the whole number of pupils, 421 were born deaf, 483 became deaf from disease or accident, and 49 are recorded as uncertain or unknown. The total receipts of the year were \$93,512.81, the payments \$67,960.83.

In the State Hospital for the Insane there were 474 inmates on the 1st of November, 820 having been admitted and 814 discharged during the year. The total amount of resources for the year was \$207,889.14, and the actual amount expended \$155,470.88.

In the State-prison there were, on the 15th of December, 368 convicts. The average number for the year was 354. The number discharged on account of the expiration of sentence was 108; pardoned by the Governor, 24; pardoned by the President, 1; transferred to the House of Refuge, 4; escaped, 2; died, 2; remanded for new trial, 6. The total receipts of the prison for the year were \$57,465.28, of which \$50,069.96 was for labor. The expenditures amounted to \$49,743.86, leaving a surplus of \$7,721.37. Of the whole number of convicts 265 could read and write, 62 could read only, and 81 could neither read nor write. The number of those who were of intemperate habits was 179. The total number born in the State was 75; born in the United States, 290; born in foreign countries, 78. The number of whites was 821; blacks, 47.

The House of Refuge contained 216 boys, the maximum age being sixteen; 41 were under twelve years. The institution, which has been in successful operation six years, has a farm, a chair-factory, and a shoe-shop. The receipts for the year amounted to \$56,598.96, of which \$34,900 was appropriated from the State Treasury. The expenditures reached the same amount.

The second annual meeting of the National Congress of Agriculture was held at Indianapolis on May 28th. About 200 delegates were present from twenty-five States. During the previous year a union had been formed between the Southern Agricultural Congress and the National Agricultural Association of Nashville, Tenn., which was consummated by a joint meeting in St. Louis and the formation of the National Agricultural Congress. The second Congress assembled as above stated. Its general objects were thus alluded to by Governor Hendricks in his address of welcome: "In your organization you represent all sections of the country, and all the varieties of agricultural productions. While you may not be able to consider the modes suggested to promote an increase of the productions of the several sections, yet your attention cannot overlook the policies suggested to promote agricultural values and profits, by the promotion of convenient and reliable markets, the exchange of commodities between the sections, and the establishment of reasonable and just rates of transportation, and the views you may express will be regarded as of the greatest in-

terest and importance." Committees were appointed on "Transportation," "Society Organization," "Meteorology and Crop Reports," "Horticulture and Entomology," "Agricultural Colleges," "Public Lands," "Railway System," etc.

The most important portion of the proceedings related to the subject of transportation, on which the committee made the following report:

1. The cheap transportation of persons and property is a national necessity. Our country is immense; and its climate, productions, and wants, are very varied and diverse in its different parts. The eminent thinker, Dr. Draper, in his "Civil Polity of America," has stated that he regards cheap transportation, even looking at it singly as a means of communicating, fraternizing, and unifying our population, as a natural necessity. Even more true, if possible, is the statement that the greatest good of the masses of the people is to be subserved by furnishing all articles, whose production is local, but whose consumption is general and necessary, at the lowest possible cost of transportation. Eight States in the Northwest produced 800,000,000 bushels of cereals in 1862—eighty bushels for every man, woman, or child of its population, and enough, properly distributed, to feed the whole forty millions of the nation; while the East had not grain enough to last her more than three months of the year; and the four Southeastern States of South Carolina, Georgia, Alabama, and Florida, required 50,000,000 bushels more grain than they grew. Pennsylvania has exhaustless mines of coal. Massachusetts, with her immense factories, has none. The Southern States have a soil eminently adapted to the production of cotton and sugar—articles sought and needed by all portions of the more Northern States. Missouri has immense mines of iron, which article is needed everywhere. The Pacific coast has her wines, her wheat, and her minerals, valuable to all. To fetch and carry these raw products, and the secondary products of their manufacture, from producer to consumer, at the lowest possible cost, is the worthy and most desirable object of the day. It will remove an oppressive burden that now rests like an incubus upon the producing interests of the country, and give cheap food, cheap fuel, and cheap clothing to the people everywhere.

2. In examining into this subject, we find that, in the first place, the present avenues for freight transportation are insufficient, or, at least, as now organized and operated, do not do their proper work. Our water-routes are obstructed by falls and rapids that are not overcome, by shoals and sand-bars that are not removed, and for months of the year are blockaded by ice or by low water. The railways, being used both for passenger and freight transportation, can carry only relatively small amounts of freight, and both water and railway routes are blockaded by an insufficiency of warehouses, elevators, and other means of transferring freight at our principal inland and seaboard cities.

3. We find, moreover, that rates charged by transportation companies are exorbitant as compared with the necessary cost, and are very prohibitory in their character at points remote from the great markets. While Mr. Josiah Quincy and Mr. E. R. Ferguson have demonstrated that it is possible to carry a bushel of grain from St. Louis or Chicago to the seaboard by rail for six cents, we believe ten cents per bushel is ample to do so. The statistics show that, during the last five years, the charge for such carriage has averaged over thirty-one cents from Chicago, and over thirty-seven cents from St. Louis, or from three to five times the necessary cost. The rates by water, while considerably lower, are still much above necessary cost, and in the northern part

of the country are inoperative during the winter season. The charges of elevators, and other warehouses, have at many points been also exorbitant and oppressive. Thus, in seasons of plenty, the producer finds the price of his products reduced below the cost of production, and in seasons of scarcity the consumer must pay unwarrantable and unbearable prices for the necessities of life. Not only this, but inasmuch as the seaboard prices, except in cases of local scarcity, fix the producer's prices at his own locality, the result is, that the high prices of freight are a cause of loss to the producer even upon what he sells at home. With an immense region of wheat and other grain-growing country opening up in the Northwest, these evils to our special farming interests threaten to be greatly aggravated and increased in the future.

4. We may add that the unjust discriminations of railway corporations have greatly aggravated and intensified this evil. Discriminations are unduly exciting and building up the prosperity of competing points, and depressing and destroying that of other points; real estate is depreciated; manufactures and agriculture languish, and the country even becomes depopulated by reason of unjust discriminations.

5. In view of these facts, your committee believe that due encouragement should be given to the opening of new routes, and the improvement of the old ones, so as to furnish transportation at cheap rates between all parts of the republic. Among these, we would call attention to the following, which, from a cursory examination, seem to have more or less merit: The Niagara Ship-Canal, the Caughnawaga and Champlain Canal route from the St. Lawrence to New York, the Fox River Canal of Wisconsin, the James River and Kanawha Through Water Line, the Illinois and Michigan Canal and Illinois River Improvement, the Atlantic and Great Western Canal, and the Mississippi and Appalachian Canal, along the Gulf coast.

6. The Southern Pacific and Northern Pacific Railroads are already aided by grants of lands to aid in their construction, and, when completed, we believe they will be important means of relieving the pressure of trans-continental transportation. The scheme of the Eastern and Western Transportation Company also promises a valuable new through-route from the Northwest to the Atlantic.

7. We call attention to and ask an investigation of the merits of the narrow-gauge railways, as much cheaper in their construction and operation than the existing railways; of freight-tracks or railways adapted especially to cheap transportation; and of tram-railways laid upon the common highways of the country, which we believe can be done at a cost not exceeding that of macadamized roads.

8. We recommend that efforts be made and persevered in, until all railway corporations shall be subject to the regulation of the General and State Governments, so as to insure the absolute and perpetual prohibition and prevention of extortionate charges and unjust discriminations.

9. We recommend that all men who believe the rights of the people should be protected from the extortions and discriminations of transportation monopolies, should unite in reforming the executive, judicial, and legislative departments of our National and State Governments, by excluding therefrom the proprietors and servants of such monopolies.

10. We deprecate, finally, the practice of executive, judicial, and legislative officers, in accepting favors from transportation corporations whose interests are more or less in conflict with those of the people, whom such officers are elected to serve.

During the discussion on this report, which was finally adopted, Dr. Kyland T. Brown, of Indianapolis, who represented in the congress, by appointment, the Agricultural Department of Washington, thus spoke on the subject:

This is a very grave question—a question that at the present moment, perhaps, is exciting more interest than any pecuniary question in this country, especially the Northwest. The enormous crop last year taught our farmers in the West an important lesson. That lesson is the difficulty of getting large crops of grain into market. We cannot eat it; we have no means of consuming it; much of it would not bear transportation. Now we suppose in this report in the main the subject is very fairly stated, but I am not so certain that the remedy will reach the disease. I have no doubt but that the diagnosis is well taken, but I am not so certain that the prescription that follows will save. We have not more than ten per cent. of the prairies in the West in cultivation. When the other ninety per cent. comes into cultivation I want to ask the question, where are we going to get the means of transporting? The railroad and your canals will not carry it. Looking at the great prairies between here and the middle of Nebraska, where every acre shall produce for the market fifty bushels of corn or twenty-five bushels of wheat, it becomes an important question, how will we get this immense mountain of food over the mountains to the sea-coast? We must have a class of laborers consuming these products at home, and ship the finer products. We must divide our Western labor. We must consume a great portion of this crude product at home, and capital should be invested in manufactures. Whenever we invest our money in manufacturing establishments we will be masters of the situation. So long as we take our grain a thousand miles to feed the operatives of the workshops of the East, and bring back the manufactured products, transportation will always be in demand, and the law of supply and demand will always make the transportation lines masters of the situation. We cannot expect to learn this lesson in a day, but we will ultimately do it. We have brought from twenty to thirty million dollars into Indiana in the form of manufactured capital within the last ten or fifteen years. When we have enough operatives to eat our products, then we will be at home. We will find the railroads begging of us something to carry. Manufacturing is more profitable than farming, but it will not be when all go into it, as they have done into farming.

Atlanta, Ga., was selected as the place for the next annual meeting. General W. H. Jackson, of Nashville, Tenn., was elected president for the ensuing year, and the second Wednesday of May, 1874, fixed for the next meeting.

The following was also adopted as a supplemental report from the Committee on Transportation:

We, the farmers in National Congress, respectfully represent to the Senate and House of the Forty-third Congress that the great want of the whole country, and especially the West and Northwest, is increased facilities for transportation between the valleys of the Ohio and Mississippi and the Atlantic seaboard; that in consequence of the rapidly-increasing products of the West and the corresponding increase of its demand for the manufactures, merchandise, and other products of the East, the necessity to meet this want is daily becoming more imperative;

That to respond to this want the best interests of the country demand continuous water-ways between the East and West as public highways, made free for the use of all on the same terms, and subject to only such tolls as may be necessary to keep the same in repair;

That the central water-line through Virginia by the James River & Kanawha Canal, in connection with the proper improvement of the Ohio and Kanawha Rivers, is eminently of that character, and from its directness and central position across the very centre of our country from north to south, with every con-

nection with the entire system of navigation of the great central basin, free from climatic objections of frost in winter and heat in summer, and from interruption in time of war, with great capacity for freight, will furnish the cheapest, shortest, and most direct outlet from the Mississippi to the ocean;

That the character and feasibility of this improvement has been thoroughly investigated and indorsed by eminent engineers in the service of the State of Virginia through a long series of years; that a survey more recently made under the direction of the General Government fully confirms the entire feasibility and eminent value of this work to the whole country; and a bill is now before Congress by which it is asked that this work may be completed by the General Government, the States of Virginia and West Virginia surrendering all ownership, jurisdiction, and control, over the same; that in the completion of this work, by cheapening cost of transportation of heavy products between the East and West, by investing with value the products of the region through which it passes, there will be a saving and profit annually to be shared in by the whole country greater than the entire cost of the work.

This National Congress of the farmers of this entire country respectfully request that the next Congress of the United States take into favorable consideration the bill now pending for the completion of this great central water-route.

IOWA. The adjourned session of the Iowa Legislature, which occupied most of the months of January and February this year, was mainly taken up by the consideration and adoption of the revised code of laws. The only other subject of importance that came before it was the case of Major Samuel E. Rankin, ex-Treasurer of the State and of the Agricultural College and Farm. Rumors of the defalcation of the ex-treasurer having got abroad, he sent a communication to the Senate acknowledging that he had used the funds of the college for his private purposes, but denying that he intended to wrong that institution of a dollar of its money, and stating that he had assigned all his available property to secure the amount of his deficiency. His own statement of the way in which he came to use the college funds was as follows: "A few years ago, when times were good and money easy to obtain on loan, I invested my means in lands and other property, and in business, and borrowed money for the same purpose, and in some cases bought partly on time. Some of these investments did not prove profitable, and especially the business in which I had invested the largest amount, but, as money was comparatively easy and I had no difficulty in procuring extension of time on my notes as they became due, I held on to my property, believing that in a short time I could dispose of it at a profit; but within the last six months times changed, business became dull, and money scarce; those to whom I was indebted needed their money and required payment, and relying in part upon promises made to me of money to borrow, and in part upon the belief that I could obtain the money by sale of mortgage of my property before it would be needed by the college, I used of their funds."

On the receipt of Major Rankin's communication, the following resolution was adopted:

Whereas, In a recent settlement authorized by the Trustees of the Iowa Agricultural College and Farm, with S. E. Rankin, its late Treasurer, it is shown that he is a defaulter to that institution; and—

Whereas, It appears that there was but a small amount of funds belonging to the Agricultural College in the hands of said Rankin at the time of his settlement as State Treasurer, with the Auditor of the State, on the 3d day of June, 1872; and—

It further appears that he has purchased but little if any real estate since that date; and—

It further appears that he had nearly all of his real estate free from incumbrances at that date; and—

It further appears that he counted to the Auditor of the State drafts on New York and Chicago for \$62,005.29 at that date in his settlement as State Treasurer, and it does not appear that said Rankin has invested in any property to any extent in any direction since that date; and—

It further appears that the said Rankin, in his capacity as College Treasurer, drew from the State Treasury on the 6th of July, 1872, the sum of \$38,300, and it further appears from settlement with said Rankin by the Trustees of the Agricultural College, that he is a defaulter for the sum of \$38,301.46, and from the foregoing it would seem that the said defalcation existed previously to July 6, 1872: Therefore, I ask at your hands, and on the part of said college, an investigation of all matters pertaining to his acts as Treasurer of the College and of the State. Therefore be it

Resolved by the House, the Senate concurring, That a committee be appointed of three on the part of the House, and two on the part of the Senate, to inquire into all matters of S. E. Rankin, its late treasurer, in connection with that institution, and also to inquire into his acts as State Treasurer; and said committee are hereby required to report to this General Assembly at as early a day as possible upon all matters set forth in said preamble, and such other matters as seem to them best, and make such recommendations as they may deem proper, and they are hereby empowered to appoint a clerk, and send for persons and papers.

After a thorough investigation, in which Governor Carpenter, ex-Governor Merrill, the officers of the Agricultural College, the defaulting treasurer himself, and several other persons, were examined as witnesses, the committee submitted a unanimous report. From this it appeared that Major Rankin had been successively elected Treasurer of the Agricultural College for five years; but that in 1869, 1871, and 1872, no bond had been given by him as required by law. Early in 1869 he began to use the funds of the college unlawfully for his own purposes, first in small amounts, which were replaced, and afterward in larger amounts, which were retained. On the 25th of January, 1871, the college treasury had become empty, and the aggregate amount abstracted had reached \$36,000. He then resorted to the State Treasury to meet drafts from the college, and used \$36,000 in this way prior to July 6, 1872. On that date a requisition was made upon the State Treasury by the officers of the college for the sum of \$38,500, which had been appropriated for the use of that institution by the Legislature. A warrant to meet this requisition was paid, and the amount placed to the credit of the college. There was then a balance of \$7,000 in the Treasury due to the college, and this enabled the Treasurer to meet all demands until De-

cember 1, 1872, when a draft for \$3,000 was received and paid out of the State funds, this deficiency being afterward made up by Major Rankin. After that time there was no evidence of mismanagement or misappropriation of funds. When the defalcation became known to the college trustees, they appointed a committee to take steps to secure the institution, if possible, against loss. This committee settled with Rankin, and took his obligation for the amount of the deficit, and an assignment of all his real and personal property, except household furniture. This was done under the advice of the Governor and Attorney-General. The following is a copy of the obligation taken by them at this settlement:

\$38,301.45.

December 14, 1872.

Due on settlement to the Trustees of the Iowa State Agricultural College and Farm the sum of \$38,301.45, with interest thereon at the rate of seven per cent. per annum from date until paid, the above amount being the balance in my possession as Treasurer of said institution at my settlement made with said trustees this day. Payable at Des Moines, Iowa.

SAMUEL E. RANKIN.

In commenting on this case, the legislative committee said: "From all the facts developed in this investigation, the committee feel compelled, however unpleasant the duty may be, to say that in their opinion, while Major Rankin has made himself, probably, criminally liable for an infraction of the law, yet the several Boards of Trustees who were intrusted by the people to execute the laws in regard to the college are in a great measure morally responsible for the losses sustained, and should be so regarded by the people. While each and every member of the Board of Trustees in office at the time, and every officer of the college, should be held to some extent liable at the bar of public opinion for the embarrassment caused and losses sustained by the defalcation of the late treasurer, yet we are constrained to say that some of them should be held to more rigid accountability than others. About midsummer, 1869, the then chief executive officer of the State, who was also *ex-officio* member of the Board of Trustees, had his suspicions aroused, and opened a correspondence with the president of the college, and secretary of the board, in regard to the official bonds of the officers. In this correspondence he received information which should have led him, as Governor of the State, and a member of the Board of Trustees, to act promptly and energetically; but he let the matter drop, and we hear no more of him in this connection until some time in December, 1872, when, at a meeting between a committee of the college Board and Major Rankin, he very innocently told them that the responsibility was theirs, and they must 'shoulder it.' The president of the college, although chief executive of the institution and its laws, seems to have paid but little or no attention to the warnings he had received from Governor Merrill."

The capital of the fourteen banks organized

under laws of the State, which made reports to the Auditor in July, amounted in the aggregate to \$774,150, the deposits to \$1,898,951.58. The report of the State Insurance Department, made on the 15th of May, covers the operations of 1872. During that year the amount of premiums received by home fire-insurance companies was \$362,026.15; the amount of losses paid, \$90,016.95. The aggregate amount of expenditures was, \$273,978.69; the aggregate income from all sources, \$425,943.74. Fifty companies, organized in other States, did more or less business in Iowa, receiving an aggregate of \$1,029,102.94 in premiums, and paying \$386,378.14 in losses. Only one life-insurance company has been organized in the State, and this issued 282 new policies in 1872, and received \$45,813.29 in premiums, covering insurances to the amount of \$425,021. Forty-one life-insurance companies of other States did business in Iowa, receiving \$1,037,622.84 in premiums, and paying \$231,531.09 in losses.

The latest reported school statistics are also for the year 1872. The principal items are as follows: members of ungraded schools, 8,163; graded schools, 400; youths between five and twenty-one years of age, 474,350; males, 243,522; females, 230,828; youths enrolled in the schools, 349,633; total average attendance, 218,181; average time schools are taught, six months and fourteen days; number of teachers, 15,193; males, 5,888; females, 9,305; average compensation of male teachers, \$36 per month; average compensation of female teachers, 29.32 per month; average cost of tuition per week for each pupil, \$0.42; number of school-houses, 8,235; total value of school-houses, \$7,460,881.19.

The political agitation of the year was based mainly on the question of cheaper transportation for the productions of the soil to the Eastern markets. Dissatisfaction had long prevailed among the farmers of the State on account of the great expense of shipping the results of their labors by railroads, and the consequent diminution of the prices obtained at home. This culminated in the organization of what were called "granges" of the "Order of the Patrons of Husbandry." These were first formed in Iowa, and subsequently spread throughout the Northwest, and to a smaller extent in some of the Eastern and Southern States. Their main purpose was to resist what they regarded as the extortion of railroads, and to oppose corrupt partial legislation and dishonesty in office. They disclaimed any intention of constituting a political party, but endeavored to secure the election of men to the Legislature who would promote their interests and place restrictions upon railroads which would secure cheap transportation. The indirect effect of this organization was to force the political parties to take up the question of transportation and endeavor to conciliate the farmers.

There was a State Convention of the Patrons

of Husbandry at Des Moines, in the latter part of January, continuing five days, at which the following constitution was adopted:

ARTICLE I. This Grange shall be known and distinguished as the Iowa State Grange of the Patrons of Husbandry.

ART. II. The members of the State Grange shall be composed of Masters of subordinate Granges and their wives who are Matrons. Past Masters and their wives who are Matrons are honorary members, and shall be eligible to hold office, but not entitled to vote.

ART. III. The legislative and all other powers of the State Grange shall be vested in certain of its members, to be selected as follows: All members of the State Grange resident in each county shall meet on the first Tuesday in December, at such place as they may from time to time designate, and elect one of their members for the county at large, and one additional member for each eight Granges or fraction equal to five, provided that nothing in this act shall be construed to prevent Masters, Past Masters, and their wives who are Matrons, from attending the meetings of the State Grange and receiving the fifth degree.

ART. IV. This Grange shall hold regular annual meetings on the second Tuesday in December at such places as the Grange may from time to time determine. Special meetings may be called by the Master and Secretary by giving written notice to each subordinate Grange thirty days preceding, or by a vote of the Grange at a regular meeting.

ART. V. Sixty members shall constitute a quorum for the transaction of business, but a less number may adjourn from day to day.

ART. VI. It shall be the duty of the Master to open and preside at all meetings of the Grange, and, in conjunction with the Secretary, call special meetings of the Grange.

ART. VII. The duties of the Lecturer shall be such as usually devolve upon that officer in a subordinate Grange.

ART. VIII. It shall be the duty of the Overseer to assist the Master in preserving order, and he shall preside over the Grange in the absence of the Master. In case of a vacancy of the office of Master, he shall fill the same until the next annual meeting.

ART. IX. It shall be the duty of the Steward to have charge of the inner gate.

ART. X. The Assistant Steward shall assist the Steward in the performance of his duties.

ART. XI. The Secretary shall keep an accurate record of all proceedings of the Grange; make out all necessary returns to the National Grange; keep the account of the subordinate Granges with the State Grange, and pay over quarterly to the Treasurer all moneys coming into his hands, and take a receipt for the same. He shall also keep a complete register of the number and names of all the subordinate Granges, and the names of Master and Secretary.

ART. XII. It shall be the duty of the Treasurer of the State Grange to receive all moneys, giving his receipt for the same; to keep an accurate account thereof and pay them out on the order of the Master of the State Grange, countersigned by the Secretary, with the consent of the Grange. He shall render a full account of his office at each annual meeting, and deliver to his successor in office all moneys, books, and papers, pertaining to his office, and he shall give bonds in a sufficient amount to secure the money that may be placed in his hands.

ART. XIII. It shall be the duty of the Gate-Keeper to see that the gates are properly guarded.

ART. XIV. All elections shall be by ballot, and a majority vote shall elect.

ART. XV. All committees, unless otherwise ordered, shall consist of three members, and shall be appointed as follows: two members by the Master, and one by the Overseer.

ART. XVI. At the regular annual meeting, a Com-

mittee on Finance shall be appointed, whose duty it shall be to audit all accounts previous to their being paid. To them shall be referred the reports of the Secretary and Treasurer for examination.

ART. XVII. The Executive Committee shall consist of the Master, who shall be chairman, and six members elected by ballot, who shall hold their office for two years, three being elected each year. They shall have authority to act on all matters of interest to the Order when the State Grange is not in session; shall provide for the welfare of the Order in business matters, and shall report their acts in detail to the State Grange on the first day of the annual meeting.

ART. XVIII. The regular year of this and subordinate Granges shall commence on the first day of January and end on the last day of December, in each year, and the fiscal year shall commence on the first day of September and close on the last day of August.

ART. XIX. The Secretary shall see that the quarterly dues of subordinate Granges are promptly paid, and, in case the dues remain in arrears two quarters, the delinquent Grange shall be reported to the Master of the State Grange. On receiving such notice it shall be the duty of the Master to warn the delinquent Grange, and, if the dues are not forwarded in thirty days, it shall be the duty of the Master of the State Grange to advise the Master of the National Grange of such delinquency, and recommend the revocation of the charter of the delinquent Grange. A Grange whose charter has been thus revoked may petition the State Grange for reinstatement.

ART. XX. Any brother or sister who is in good standing, and clear on the books of his or her Grange, shall be entitled to a withdrawal card upon the payment of the sum of twenty-five cents. Persons bearing such cards may be admitted, without additional fees, to membership in another subordinate Grange, but shall be subject to the same forms of petition, investigation, and ballot, as those first applying for membership, except that a majority vote shall elect them.

ART. XXI. Persons making application for membership in this Order, shall apply to the subordinate Grange nearest to them, unless good and sufficient reasons exist for doing otherwise. In such cases the Grange shall judge of reasons, and, if thought best, shall consult the Grange nearest the applicant.

ART. XXII. There shall be appointed, by the Master of the State Grange, at least one Deputy in each county, where a proper person can be found who is a Master, or a Past Master, whose duty it shall be to organize new Granges, on application having been made to him by those desiring such organization; they shall install officers of Granges when the same have been elected; shall be vigilant that no disorder shall obtain in the Granges under their jurisdiction, and shall promptly report any such disorder to the Master. Deputies shall receive, for organizing new Granges, their necessary traveling expenses. The Deputies shall be appointed for one year, but shall be subject to removal, for cause, by the Master. No other Granges shall hereafter be organized except those organized by Deputies appointed as herein specified, excepting only those organized by the Master of the State Grange.

ART. XXIII. It shall be lawful for subordinate Granges to form themselves into associations to be called Councils, for the purpose of facilitating the transaction of business, of buying, selling, and shipping, and for such other purposes as may seem for the good of the Order. They shall be governed and the membership shall be decided by such laws as the Council may from time to time make, not conflicting with the constitution of National and State Granges. They may elect a Business Agent to act in concert with the Executive Committee, and it shall be their duty to inform the Master of the State Grange of any irregularities practised by Deputies within their jurisdiction.

ART. XXIV. This constitution may be amended or revised at any regular meeting of the Grange, by a vote of two-thirds of the members present.

The Republican State Convention, which was held in Des Moines on the 25th of June, adopted the following resolutions:

The Republicans of Iowa, in mass convention assembled, make this declaration of principles: We hold the Republican party to be a political organization of those American citizens who are opposed to slavery in all its forms, who believe that all men are entitled to the same political and civil rights; who believe that all laws, State and national, should be made and administered so as to secure to all citizens, wherever born, or whatever their color, creed, condition, or occupation, the same rights before the law; who believe in free schools, free opinion, and universal education; who believe that American society and the American people should all be raised to the highest possible plane of liberty, honesty, purity, intelligence, and morality, and that all laws should be made and the government constantly administered with this aim in view, and that no party has a right to the support of the people which is not inspired with this purpose. Believing that the Republican party is still controlled by these principles, and that it is now, as it has been from its beginning, an organization of the best and purest political sentiment of the country, we as Republicans renew the expression of our devotion to it, and our belief that we can secure through it the political reform and the just and necessary measures of legislation, and of relief from monopolies and other abuses of power which the country so much needs: therefore—

Resolved, That, proud as we are of most of the past record of the Republican party, we yet insist that it shall not rely upon its past achievements; it must be a party of the present and of progress; and as it has preserved the Union, freed the slave, and protected him from the oppression of the slave-master, it will now be derelict to its spirit and its duty if it does not protect all our people from all forms of oppression, whether of monopolies, centralized capital, or whatsoever kind the oppression may be.

Resolved, That we insist upon the right and duty of the State to control every franchise of whatever kind it grants; and while we do not wish that any injustice shall be done to the individual or corporation who invests capital or industry in enterprises of this kind, we yet demand that no franchise shall be granted which is prejudicial to the public interests, or in which the rights and interests of the State and the people are not carefully and fully guarded.

Resolved, That the producing, commercial, and industrial interests of the country should have the best and cheapest modes of transportation possible; and while actual capital invested in such means of transit, whether by railroad or otherwise, should be permitted the right of reasonable remuneration, an abuse in their management, excessive rates, oppressive discrimination against localities, persons, or interests, should be corrected by law, and we demand congressional and legislative enactments that will control and regulate the railroads of the country, and give to the people fair rates of transportation, and protect them against existing abuses.

Resolved, That we heartily applaud the active measures of the late Congress, in ferreting out and exposing corruption. We have seen, with profound regret, in the developments made thereby, evidence of political and official corruption, and the abuse of responsible positions by men of all political parties, to further personal ends, and we demand pure official conduct, and the punishment of unfaithful public men, who, having betrayed the confidence freely extended to them, shall not be shielded from the disgrace of their acts by any partisanship of ours, and we denounce all *Crédit-Mobilier* transactions, and all official misconduct of whatever form.

Resolved, That we believe that whenever a person holding any position of trust, given him by the people, is guilty of fraud or embezzlement, he should be convicted and punished under the criminal laws of our land, in addition to the recovery, from him or his bondsmen, of the amount so embezzled.

Resolved, That the act of the majority of the members of the last Congress, in passing what is known as the back-pay steal, by which they voted into their pockets thousands of dollars which did not belong to them, as well as the act of those who voted against the same, and yet received the money, is most flagrantly improper and infamous, and should secure the political condemnation of all who were party to it; and we demand that the provisions of the said act, by which the salaries were increased, shall be promptly and unconditionally repealed.

Resolved, That we sympathize with every movement to secure for agriculture and labor their due influence, interests, and rights, and the Republican party will be their ally in every just effort to attain that end.

Resolved, That we are desirous of political reform, and for honesty, economy, and purity, in all official administration; that to secure this is the duty of every citizen; that to this end every good man should feel bound to participate in politics, and, to make an end to bad men forcing their election by securing a party nomination, we declare it the duty of every Republican to oppose the election of a bad and incompetent candidate, whether he be a candidate upon our own or upon any other ticket.

The candidates to be named were for Governor, Lieutenant-Governor, Judge of the Supreme Court, and Superintendent of Public Instruction. Governor Cyrus C. Carpenter, Judge Joseph M. Beek, and Superintendent Alonzo Abernethy, were renominated, and Joseph Dy-sart was named for Lieutenant-Governor.

There was no action taken by the old Democratic party, but on the 18th of August the opponents of the Republicans met at Des Moines in what they called an "Anti-Monopoly" Convention. John G. Vale was nominated for Governor, Fred. O'Donnell for Lieutenant-Governor, Benton J. Hall for Judge of the Supreme Court, and D. W. Prindle for Superintendent of Public Instruction. The following preamble and resolutions were unanimously adopted:

Whereas, Political parties are formed to meet public emergencies, and, when they have discharged the duties which called them into being, they may become the means of abuses as gross as those they were organized to reform.

Whereas, Both the political parties have discharged the obligations assumed at their organization, and are no longer potential instruments for the reform of the abuses which have grown up in them, we deem it inconsistent to attempt to accomplish a political reform by acting with and in such organizations: therefore—

Resolved, That we, in free convention, do declare, as a basis of our future action—

1. That all corporations are subject to legislative control; that those created by Congress should be restricted and controlled by Congress, and that those under State laws should be subject to the control respectively of the States creating them; that such legislative control be in express abrogation of the theory of the inalienable nature of chartered rights; and that it should be at all times so used to prevent moneyed corporations from becoming engines of oppression.

Resolved, That the property of all corporations should be assessed by the same officers, and be taxed at the same rate, as the property of individuals.

Resolved, That the Legislature of Iowa should fix a maximum rate of freight to be charged by the railroads of the State, leaving them free to compete below those rates.

Resolved, That we favor such modification of our banking system as will extend its benefits to the whole people, and thus destroy all monopoly now enjoyed by a favored few.

Resolved, That we demand such a revision of the present tariff laws as shall give free salt, iron, lumber, and cotton and woolen fabrics, and reduce the whole system to revenue basis only.

Resolved, That we will not knowingly nominate any bad man to office, or give place to persistent seekers thereof, but will freely seek for ourselves competent officers, as heretofore political leaders have sought office for themselves, and we will nominate only those known to be faithful, and in sympathy with these declarations, and will at the polls repudiate any candidate known to be unfit or incompetent.

Resolved, That we demand the repeal of the back-salary act and a return to the United States Treasury of all the money drawn by members of the last Congress, and members of the present Congress. We demand a repeal of the law increasing salaries, and the passing of a law fixing a lower and more reasonable compensation for public officers, believing, till the public debt is paid, and the public burden lightened, the salaries of our public servants should be more proportionate to the rewards of labor in private life.

Resolved, That we are opposed to all future grants of land to railroad or other corporations, and believe the public domain should be held sacred to actual settlers, and we are in favor of a law by which each honorably discharged soldier may use his discharge in any Government land-office in payment of a one-fourth section of public land.

Resolved, That all public officers who betray their pledges of trust are unworthy of renewed confidence, and those who criminally trifle with public funds should be punished as criminals, regardless of their previous influence, or the political importance of their bondsmen.

Resolved, That we are in favor of a strict construction of our constitution by our Supreme and other courts, and are opposed to the exercise of all doubtful powers by judicial or other officers.

Resolved, That in the corrupt Tammany steal, Crédit-Mobilier fund, Congress salary swindle, and official embezzlements, and hundreds of other combinations—steals, frauds, and swindles, by which Democratic and republican legislators, Congressmen, and office-holders, have enriched themselves, defrauded the country, and impoverished the people—we find the necessity of independent action and the importance of united effort, and cordially invite all men, of whatever calling, trade, or vocation, regardless of political views, to join in removing the evils that so seriously affect us all.

A mass convention of the friends of woman-suffrage was held at Des Moines on the 4th of March, at which the following resolutions were adopted among others:

Resolved, That we deeply regret that the Fourteenth General Assembly refused to submit the question of woman-suffrage to a vote of the electors of the State; but that, undismayed by this unexpected refusal, we will still labor in the earnest and confident hope that our legislators will, at an early day, grant to all, without distinction of sex, an equal voice in the formation of laws and the election of rulers.

Resolved, That the action of the adjourned session of the Fourteenth General Assembly in striking from our code of laws all legal disabilities expressed therein to the rights of women, save that of suffrage, is a move in the right direction, and we feel it our

duty to express our high appreciation of their action in this respect.

Resolved, That, the impression having gone abroad that the Iowa Woman-Suffrage Society indorses that phase of immoral doctrine called free love, we distinctly disavow the holding of any sentiments of free love, and utterly repudiate any sympathy with such doctrines.

Resolved, That we believe that the ballot in woman's hands will be used in favor of virtue as against vice, in favor of purity and against corruption, in favor of peace against dissension, and, so believing, call upon friends in all parties to come forward.

Resolved, That we observe with special gratification the rapid improvement in public sentiment concerning this movement, and the attitude of the prominent and most influential newspapers of the State toward it, some of which are fearless advocates of the cause, and nearly all of which give it "respectful consideration."

The election occurred on the 14th of October, and resulted in the choice of the Republican candidates. The whole number of votes cast for Governor was 187,721, of which Carpenter received 105,143, and Vale 82,578, making the majority of the former 22,565. The majority of Beck over Hall, for Judge of the Supreme Court, was 24,721; the majority of Abernethy over Prindle, for Superintendent of Public Instruction, was 28,718. The result of the election for members of the Legislature was, that, of the 100 members of the House, 51 were Republicans, and the remaining 49 were made up of Democrats, Liberals, independents, anti-monopolists, etc. The Senate has 33 Republicans, 4 independents, and 13 Democrats and anti-monopolists. This gives the Republicans a majority of 8 on joint ballot.

The last fiscal period of two years closed on the 15th of November. In November, 1871, there was a balance on hand of \$81,740.84; during the two years the receipts of the Treasury amounted to \$2,129,577.51, and the disbursements to \$2,180,100.69, leaving at the close a surplus of \$81,217.66. The estimated receipts for the next two years are placed at \$1,973,800, and the expenditures provided for by law amount to \$1,474,000, leaving \$499,800 to be applied for special purposes. The statement of taxation in the State for all purposes in 1871 was \$11,267,562.18, or about 3.23 per cent. of the valuation. In 1872 it was \$10,711,925.49, or 2.94 per cent. of the valuation. The amount of the permanent school fund is \$3,294,742.83, an increase of \$133,249.89 since 1871. There have been patented during the past two years 48,817.08 acres of school lands, 2,320 acres of university lands, and 11,643.43 acres of swamp-lands. The selections of swamp-lands made in the several counties under the act of Congress of 1872 amount to 865,770.46 acres. The additional tracts certified to the Burlington & Missouri River Railroad make the aggregate of all grants for internal improvement 4,898,668.88 acres.

The twelfth State census of Iowa was taken in the spring, and shows a population of 1,251,383, an increase, since the State census of 1869,

of 210,514. It appears that immigration into the State, except to the newer counties, is nearly balanced by emigration out of it to Missouri. The total number of persons of school age in the State is 491,344, an increase of 29,862 in two years. The number of school districts has increased 932. The State University still holds 7,840 acres of its land-grant, valued at \$27,800. The income of the institution for the two years ending June 3d was \$122,041.29. The assets of the university are \$232,221.50, of which \$202,821.53 represent the working capital. The expenses from June 21, 1871, to October 1, 1873, were, \$103,415.93. The Dental Association of the State is making a movement for the establishment of a chair of Dentistry in the university.

The Agricultural College is in successful operation, and has already graduated two classes. It now holds 22,765 acres of unleased lands. The sum of \$38,500 appropriated for the purpose of various improvements in the college was used up by the defalcation of the treasurer. The College for the Blind is in a flourishing condition, and has 112 pupils. The Institution for the Deaf and Dumb has 119 students enrolled. A lawsuit against this institution is pending in the United States Circuit Court, brought by the contractor who put up the building, for alleged extra work. The Soldiers' Orphan Homes contain 508 children, of whom 256 are at Cedar Falls, 154 at Davenport, and 98 at Glenwood. The support of the homes for the year cost \$146,050. The State Reform School has been located at Eldora, where 440 acres were given to the State for the purpose by the citizens of the place. Several buildings have been erected, and there are already 145 boys in the school. The amount expended on the buildings is \$45,000, and the same sum is asked for the purpose of completing the institution. The girls' department remains on the farm originally leased near Salem in Lee County, and has eleven inmates. The number of convicts at the penitentiary is 276. An additional penitentiary has been established at Anamara, where there are 25 prisoners. The Hospital for the Insane at Mount Pleasant contained, on the 1st of November, 495 patients. Its cost for two years was \$229,441.25. A new Insane Asylum has been established at Independence, which was opened on the 1st of May. At the close of the year, 178 patients had been admitted, of whom 26 were discharged, leaving 152. The buildings of this institution are not wholly completed.

Work on the new State Capitol at Des Moines is progressing moderately. Up to the end of this year \$374,825.88 had been expended on it. At the end of the year there were 3,800 miles of railroad completed in the State, being an addition of 469 miles in two years.

Great hardship and destitution have been endured by the settlers in the northwestern counties of the State, and the Governor in his message to the Legislature of 1874 recommended

the adoption of measures of relief. The raising of brook-trout and fresh-water salmon has been successfully tried in Winneshiek, Clayton, and Jackson Counties. On the 17th of November a company of militia was sent to Council Bluffs, by order of the Governor, to prevent a prize-fight. It arrived on the scene of action after the fight was over. There is no law in the State prohibiting prize-fighting, and the civil authorities had no power to take action in this case.

ITALY, a kingdom of Southern Europe. King, Victor Emmanuel II., born March 14, 1820; succeeded to the throne of Sardinia, on the abdication of his father, March 23, 1849; proclaimed King of Italy, by vote of an Italian Parliament, March 17, 1861; married, April 12, 1842, to the Archduchess Adelaide of Austria; widower January 20, 1855. Children of the King: 1. Heir-apparent, Humbert, Prince of Piedmont, born March 14, 1844; married, April 23, 1868, to Princess Margareta of Genoa; offspring of the union is a son, Victor Emmanuel, Prince of Naples, born November 11, 1869. 2. Amadeo, Duke of Aosta, born May 30, 1845; King of Spain from December 4, 1870, to February 11, 1873; married, May 30, 1867, to Princess Maria della Cisterna, born August 9, 1847; offspring of the union, three sons: Emmanuel, Duke of Apulia, born 1869; Victor, Duke of Turin, born 1870; Louis, born 1873. 3. Clotilde, born 1843, wife of Prince Napoleon Bonaparte. 4. Maria Pia, born 1847, wife of King Louis of Portugal.

The new ministry, appointed in 1873, was composed of the following members: 1. Marco Minghetti, President of the Council of Ministers, and Minister of Finance; born at Bologna, September 8, 1818; captain in the army of Sardinia, 1848-'54; deputy of Bologna to the Italian Parliament of 1860; Minister of the Interior, 1861-'62; Minister of Finance, 1862-'64; appointed Minister of Finance, and President of the Council of Ministers, July 10, 1873. 2. Antonio Scialoja, Minister of Public Instruction, born at Goduccio, Naples, October 1, 1817; Professor of Political Economy at Turin, 1845-'48; Minister of Finance, 1866-'68; appointed Minister of Public Instruction, July 10, 1873. 3. Commendatore Visconti-Venosta, Minister of Foreign Affairs, born 1828; Minister of Foreign Affairs, 1866-'67; appointed again, December 14, 1869. 4. Giuseppe Spaventa, appointed, July 10, 1873. 5. Lieutenant-General Ricotti-Magnani, Minister of War, appointed September 8, 1870. 6. Rear-Admiral Pacoret di San-Bon, Minister of Marine, appointed September 26, 1873. 7. Giuseppe Finali, Minister of Commerce and Agriculture, appointed September 28, 1873. 8. Count Gerolamo Cantelli, Minister of the Interior, appointed July 10, 1873. 9. Pietro Vigliani, Minister of Justice and Ecclesiastical Affairs, appointed July 10, 1873.

The Italian Parliament consists of two Chambers, the Senate and the Chamber of

Deputies. The Senate is composed of the princes of the royal family who are of age, and an unlimited number of members who are appointed by the King for life. In the session of 1872 the number of senators was 270. The members of the Chamber of Deputies are elected by a majority of all citizens who are twenty-five years of age, and pay taxes to the amount of 40 lire (1 lire=19.3 cents). For this purpose, the kingdom is divided into 508 electoral colleges; the average number of inhabitants for every electoral college being 52,955. The aggregate number of electors enrolled on the poll-list in 1870 was 528,982, being 1.97 per cent. of the total population. The number of electors who took part in the election was 288,448, or 45.8 per cent. The successful candidates received an aggregate vote of 176,693 votes, being 348 votes for each successful candidate. No deputy can be returned to Parliament unless at least one-third of the inscribed electors appear at the poll. President of the Italian Senate in 1873 was the Marchese Fardella di Torrearsa; Vice-Presidents, P. H. Vigliani, T. Count Mamiani, A. Scialoja, G. Count Cambray-Digny; President of the Chamber of Deputies, J. Biancheri; Vice-Presidents, A. Mordini, J. Pisanelli, N. Ferracciu, F. Restelli. The presiding officers of the Senate are appointed by the King; those of the Chamber of Deputies are elected by that Chamber.

The Council of States decides on conflicts between administrative authorities and courts, and on conflicts between the state and its creditors. President of the Council of State, L. des Ambrois de Revache, Minister of State, and senator; President of the Section of the Interior, T. Marchese Spinola; of the section of Justice and Worship, C. Mameli; of Finances, G. Baron Sappo.

According to the fundamental statute, the Roman Catholic religion is the religion of the state; the other creeds are tolerated. There is a general freedom in the public exercise of any form of religion; and the civil and political rights of the citizen do not require the profession of any religion. The dominions of the Pope having been incorporated with the kingdom of Italy, his prerogatives and the relation between church and state were regulated by the law of May 13, 1871. The person of the Pope is sacred and inviolable. The Italian Government renders to him the honors of a sovereign, and guarantees to him a yearly donation of 3,225,000 lire. Italy has 47 archbishoprics, 217 bishoprics, and 8 abbeys with episcopal jurisdiction. The number of Catholic clergymen exceeds 100,000. All the convents were suppressed by a royal decree of July 7, 1866; to the province of Rome this law was extended in 1873, an exception being only made with regard to the houses in which the generals of religious orders resided.

Elementary education is now made compulsory, but the attendance at the primary schools

is still far from being satisfactory. There were, in 1872, 34,213 public and 9,167 private elementary schools; total, 43,380; the number of pupils was 1,745,467. Secondary instruction was given, in 1870, in 852 gymnasia (104 royal), and 272 technical schools; and for more advanced pupils, in 142 lyceums, 89 industrial schools and technical special schools. The number of universities was 22, of which 17 were royal, 4 (Ferrara, Perugia, Camerino, and Urbino) provincial, and 1 (the Sapienza at Rome) papal. The number of professors and students at the 17 royal universities was, in 1873, as follows:

UNIVERSITIES.	Professors.	Students and Hearers.
Bologna.....	58	577
Naples.....	73	
Padua.....	65	1,121
Palermo.....	56	306
Pavia.....	45	718
Pisa.....	66	503
Rome.....	51	584
Turin.....	60	1,408
Cagliari.....	30	38
Catania.....	38	283
Genoa.....	46	460
Macerata.....	20	115
Messina.....	36	112
Modena.....	48	815
Parma.....	47	270

Siena.....	32	118
Total.....	788	6,957

The theological faculty has been abolished at all these universities. Bologna, Catania, Genoa, Messina, Naples, Palermo, Pavia, Pisa, Rome, Turin, and Padua, have four faculties each (law, medicine and surgery, mathematics and natural science, philosophy and literature); Cagliari, Modena, and Parma, three; and the others two.

The results of the census as regards the religious professions of the inhabitants had not been published at the close of the year 1873. The number of Protestants was estimated at about 40,000, that of Israelites at 35,000, that of other creeds at 6,000.

The financial accounts for the years 1871 and 1872, and the budget estimates for the year 1873, were as follows (value in lire—1 lire = 19.3 cts.).

	1871.	1872.	1873.
Revenue.....	1,277,760,785	1,366,984,649	1,542,620,571
Receipts.....	1,393,548,035	1,290,798,880	1,509,601,372
Deficit.....	84,222,751	70,286,769	222,019,199

The actual disbursements have of late regularly exceeded the estimated deficits. In order to meet the alarming deficits, the Government in 1864 sold the state railways for a sum of 200,000,000 lire; in 1867 it levied the sum of 600,000,000 lire on ecclesiastical property; and in 1868 made over the state monopoly on tobacco to a French company, in consideration of 180,000,000 lire; the remainder was made up by loans.

The total debt of the kingdom amounted in

January, 1873, to a nominal capital of 10,060,000,000 lire, divided as follows:

1. Rentes, 5 per cent.....	6,685,876,520
2. Rentes, 3 per cent.....	213,602,800
3. Perpetual Rentes of the Papal See.....	71,000,000
4. Special debts, 5 per cent.....	1,060,000,000
" " 4 per cent.....	26,578,000
" " 3 per cent.....	207,000,000
5. Miscellaneous debts.....	600,000,000
Unpaid interest.....	6,137,000
6. Floating debt.....	
Bank notes in circulation, December 31, 1872.....	267,519,800
Conto correntes.....	23,000,000
Notes of National Bank which are legal tenders.....	790,000,000
Total.....	10,060,000,000

According to the new law, on the reorganization of the army, which was presented to the Chambers on December 20, 1872, the liability to military service is made universal, the exception formerly allowed being reduced to an insignificant number. The annual contingent will be 100,000 men, of whom from 75,000 to 80,000 will be taken for the first class, whose term of service is three years (for the cavalry five years). The remainder enter the second class, into which the former enter at the expiration of their active service. The time of service in the second class is nineteen years; in the second and first class together

twenty-two years. The actual strength of the army on March 31, 1873, was as follows:

ARMY.	Men under Arms (Peace-footing).	Men on Unlimited Furlough.	Total (War- footing).
Standing army.....	183,305	358,370	541,575
Provincial militia.....		202,081	202,081
Total.....	183,305	560,451	743,656

The navy consisted on January 1, 1872, of the following classes of vessels:

NAVY.	Number.	Guns.	Tons.	Horse- power.
Men-of-War:				
Iron-clads.....	22	201	75,884	11,980

The aggregate length of railroads in operation, 1872, was 6,690 kilometres; the aggregate length of telegraph-lines is 19,889 kilometres; the average length of wires, 55,191.

On April 30th the ministry offered its resignation in consequence of a difference of opinion with the majority of the Chamber of Deputies on the erection of an arsenal for the seaport of Tarent. The Government demanded an appropriation of 6,500,000 lire, while the committee of the Chamber demanded that 23,000,000 should be expended for it. As Ratazzi, the leader of the opposition, refused to form a new ministry, the prime-minister, Lanza, was prevailed upon to remain.

One of the most interesting discussions in the Italian Parliament took place on the motion to extend the law passed in 1866, for the suppression of convents in Italy, to the province and city of Rome, where thus far they had been allowed to exist. The bill proposed by the ministry desired to save from the general suppression those houses which served as the residences of the generals and heads of monastic orders. The Left, public opinion in Rome, and also part of the Right, opposed this exception, while Minghetti, who is charged by his opponents with a wish to found a new Catholic Conservative party, rigorously supported the ministerial plan, which he insisted was in accordance with Cavour's principle of a free church in a free state. The Minister of Foreign Affairs referred to the fact that Italy, which had in its midst the grand institution of the Pontificate, had guaranteed to the Pope the exercise of his spiritual power, and that the offices of the generals of monastic orders were an important part of the hierarchical system. Prince Emmanuel Ruspoli, a deputy of Rome, demanded that all the vestiges of theocratic rule should be extinguished in Rome; he was proud of claiming the name of a popular tribune in opposition to the pretorians of the Government. The violent debates in the Chamber of Deputies were followed on May 11th by riots in Rome, where large crowds of people cheered Prince Ruspoli, insulted Minghetti, and brought on bloody conflicts with the police. The Chamber finally adopted an

amendment moved by Ricasoli, according to which 400,000 lire are annually to be paid to the Pope for the support of the generals of the orders. As long as the Papal See does not draw this sum, the Government shall place it at the disposal of the generals of the orders. On May 27th the Chamber of Deputies adopted the convent bill by 196 against 46 votes; and on June 17th the Senate adopted it almost without debate, by 60 against 20 votes. Although the superiors of the convents protested against the law as unconstitutional, its execution encountered no serious difficulties. The property was delivered into the hands of the Government, and the monks and nuns, in return, accepted their pensions. At the convent of the Roman College, the rector read to the delegates of the committee a protest, drawn up by the Society of Jesus, declaring that the college was a papal institution, possessing an international character. The rectors of the foreign colleges presented a collective protest. The delegates received these protests, and subsequently handed to each of the Jesuits a certificate for the income to be paid them. At the head convent of the Gesu, the rector also tendered a formal protest, asserting the rights of the society over the property. The delegates here also handed to the Jesuits certificates of income. At the head house of the Franciscan Fathers, the delegates were very courteously received. The General of the Franciscans simply protested in brief terms according to ecclesiastical laws. The American and Portuguese consuls presented to the delegates a protest against the seizure of certain portions of this convent which belong to their respective nations. The delegates received the protest, and delivered the certificates. In the other three convents protests were tendered by the rectors, and certificates of income were given by the delegates. The proceedings were carried out with scrupulous regularity.

A new ministerial crisis arose when the Minister of Finance, Sella, on June 14th, demanded that the Chamber should vote two bills on the increase of special taxes before disposing of the general budget. The Cham-

ber for a time hesitated, and on June 23d rejected a motion made by Depretis, the new leader of the Left, to adjourn the discussion of the ministerial bills. But, two days after, the minority was joined by the extreme Right under Minghetti, and the request of the minister rejected. The ministers again offered their resignation, which was accepted by the King. The leader of the Right, Minghetti, accepted the task of forming a new ministry. An effort to form, conjointly with Depretis of the Left, a coalition ministry, failed, whereupon several members of the late ministry were prevailed upon to retain their seats in the new one. On July 10th the new ministry was sworn in.

In the latter part of September, King Victor Emmanuel paid a visit to the courts of Vienna and Berlin, arriving in the former city on September 17th, and in the latter on September 21st. In both places he met with an enthusiastic reception. The visit to Berlin was looked upon as a political demonstration against France, which, by its open sympathy with the tendencies of the Catholic party in Italy and Germany, appeared to assume a threatening attitude. On his return, the King was received at all the railway-stations through which he passed with great enthusiasm. A great demonstration was made at Rome, in the Piazza Colonna. The German, Austrian, and Italian national hymns were played, and were received with loud cheers, and frequently redemanded.

The new session of the Italian Parliament was opened at Rome, on November 15th, by the King in person. The Princes Humbert and Amadeo and all the diplomatic body were present. In the speech from the throne, the King adverted to the fact that, when opening the Parliament at Rome last session, he especially urged the necessity of devoting attention to the internal organization of the state, and he now expressed a hope that this work would be continued in the present session. The King continued:

Italy has shown that Rome should become the capital of the kingdom without involving any diminution of the independence of the Sovereign Pontiff in the exercise of his spiritual functions, and in his relations to the Catholic world. But, while decided to respect both religious feelings and religious liberty, we shall not permit any violation of the laws and national institutions.

Referring to foreign affairs, the King said:

I rejoice to assure you that our relations with all the powers are upon an amicable footing. These good relations have been confirmed by the visit which I have paid to the Emperor of Austria and to the German Emperor. The proofs both of affection and sympathy which I received from these sovereigns and their people were addressed to Italy, which has known how to conquer her rightful place among the nations. Austria and Italy have been led to the battle-field, but, the cause of the long struggle being now dispelled, henceforth there remains but confidence in a common interest in the advantages resulting from an assured friendship. This friendship is more dear to me, since it harmonizes with family affections which a more elevated and imperious duty

had overpowered, but could not extinguish in my heart. Italy and Germany have both constituted themselves in the name of the principle of nationality; they have both been able to establish liberal constitutions based upon a monarchy associated for centuries with the national sorrows as well as the national glories. The relations between the two Governments are in conformity with the sympathies existing between the two peoples, and are a guarantee for the maintenance of peace. It is our desire to live in harmony with all nations. Nevertheless, I shall firmly guard the rights and dignity of the nation.

The King then recommended to the consideration of Parliament certain bills which would be laid before it. He dwelt specially upon the pressing necessity of providing for the finances of the country, and gave notice of a bill for regulating the paper currency. In conclusion he said:

In the peace, which I hope will be a lasting one, and in the order and union existing between the executive powers of the state, it will be possible to develop free institutions, together with civil progress and the welfare of the people. Thus only shall we be able to affirm that we have achieved our task, and with the aid of God insure to our children the fatherland in which, amid past trials, we have ever held unshaken faith. Now as then I have confidence in the nation; now as then the nation has confidence in its King.

In consequence of the absence of a large number of deputies, the Chamber for several days had no quorum. The indignation at this neglect of parliamentary duty caused a motion to be made to declare vacant the seat of any deputy who, without excuse, was absent for five consecutive days. The Chamber reelected Biancheri as President by 189 of 228 votes; as Vice-Presidents, Pisanelli, Restelli, and Pieroli, were elected. The foreign budget coming up for discussion, Signor Mancini,* in proposing that the House should proceed to the order of the day, said that he was favorable to the principle of international arbitration, and expatiated on the great patriotism evinced by England and America in inaugurating an era of peaceful solutions of national differences. He urged the Italian Government, when occasion might arise, to propose arbitration, and introduce in the stipulations of its treaties a clause referring to arbitrators any question which might occur in the interpretation or execution of the treaty. Signor Bosselli, the reporter of the committee, warmly supported the motion, which was also accepted by Signor Visconti-Venosta. The latter declared that Italy had always been ardently in favor of a peace policy. Signor Mancini's motion was unanimously adopted. Replying to a question, Signor Visconti-Venosta said the Italian Government entertained friendly sentiments toward Spain, and in the matter of recognition of the republic it would observe an attitude similar to that adopted by the other powers. On November 27th the prime-minister, Minghetti, explained the financial condition of the country. The actual deficit of the year 1878 was an-

* President of the newly-established Institute of International Law. (See BELGIUM.)

nounced to amount to 110,000,000 lire. On December 5th the prime-minister proposed a financial reform which produced a great sensation in financial circles. Hitherto only the bank-notes of the National Bank have been legal tenders in the whole kingdom, while those of several other principal banks, as the Neapolitan, the Sicilian, the Roman, were legal tenders in their own district; hereafter the six principal banks of the kingdom, the National, Neapolitan, Sicilian, Roman, Tuscan, National, and Tuscan Credit Bank, are to form an association and will issue paper money to the amount of one milliard lire (900,000,000 at once), which will have a forced circulation throughout Italy. Among the bills introduced by the Government is one for the enforcement of civil marriage. In 1866 the Italian Parliament made registration by the state officer essential to the validity of marriage; but those who were content with a marriage by the priest, were under no further obligation to have the process of registration observed and the marriage legalized. The clergy, in Italy, so generally hostile to the Government, were left at liberty to continue to act as sole persons authorized to celebrate marriage, and this course they adopted to such an extent, exhorting the people to be content with the religious marriage, and not to register their marriages before the civil officer, that already 120,400 unregistered, and therefore invalid, marriages are reported by the Government officers in various districts of Italy. The new bill proposes to remedy this state of things by requiring the civil marriage to take place first. A priest who celebrates the religious marriage before the civil marriage is liable to a fine varying from 200 lire to 500 lire for the first offense, and for the second to imprisonment for four or six months. The parties, too, who get married by the priest before going to the registrar incur a fine of 100 lire to 500 lire; and to complete the legislation it is enacted that marriages hitherto unregistered under the old law may be made legitimate by registration within four months of the present bill. There is no fee charged for the civil marriage.

In October a question of great importance was decided by the Municipal Council of Rome, namely, the plan of the city proposed by the

Syndic and the Giunta, which is to be carried into execution within twenty-five years. The plan was unanimously approved in its substance by the council. The sum required for the execution of such plan is 163,000,000 lire. It consists of a great many public works, streets to be opened, large lots of land to be built upon, and houses to be pulled down. The Syndic declared that he would resign should the plan, after the discussion, be rejected. Rome is to be restored to its ancient splendor within twenty-five years at a cost of \$25,000,000.

Brigandage is still far from being rooted out, but continues to infest many districts of Southern Italy. In October a band of thieves was broken up close under Vesuvius. They had long been the torment of the neighborhood of Viola, Ottajano, and Kassa, carrying off cattle and rendering property insecure.

IVERSON, ALFRED, a Georgian jurist and statesman, born in Burke County, Ga., December 8, 1798; died at Macon, Ga., March 4, 1873. Obtaining his early education in Georgia, he entered Princeton College at the age of eighteen, and graduated there in 1820; studied law, was admitted to the bar and practised his profession at Columbus, Ga. He soon took an interest in political matters, was three times a member of the House of Representatives of the State, and once a State Senator. He was twice elected Judge of the Superior Court of the Columbus Circuit, for terms of three and four years; was one of the electors at large in the presidential election of 1844; was elected to the Thirtieth Congress and served from 1847 to 1849; served his second term as Judge from 1851 to 1855; in 1855 was chosen U. S. Senator, and just before the close of his term in 1861, after advocating disunion on the floor of the Senate, withdrew and joined the Southern Confederacy. He raised a regiment for the Confederate army, of which he became colonel, and in November, 1862, was commissioned brigadier-general. He enjoyed a high reputation in Georgia, as a man of ability and learning, and was one of the Southern candidates for the presidency in 1852. While in the Senate he was chairman of the Committee on Claims, and a member of the Committee on Military Affairs and the Pacific Railroad.

J

JAPAN, an empire in Eastern Asia. The appellation by which the Emperor is generally known in foreign countries is the ancient title of Mikado, or the Venerable. Present Mikado, Mutsu *Hito*, born at Yeddo, September 22, 1852; succeeded his father, Komei Tenno, 1867; married, December 28, 1868, to Princess Haruko, born April 17, 1850, daughter of Prince Itchidgo. The first child of the Emperor was born in 1873, but died soon after. There is

no regular law of succession, and the throne generally devolves not on the son of the Mikado, but on the eldest or the most distinguished member of the house. It is only necessary that the new Mikado belong to one of the four royal families: Katura, Arisugawa, Fushimi, or Kannin. Of the house Katura, only one scion, Princess Sûmiko, born 1828, is still alive. To the house Arisugawa belong the Princes Takânito (born 1812), and

Tarubito (born 1835); to the house Fushimi, Prince Sadanaru (born 1858); and to the house Kannin, Prince Yasu (born 1865). The ministry consists of eight departments, namely: the Ministry of the Imperial House, of Foreign Affairs, War, Navy, Finances and the Interior, Justice, Public Instruction, and Ecclesiastical Affairs. At the side of the ministry stand the "Sain" or Senate, composed of about thirty Daimios, and the Shoin, or Council of State, of an unlimited number of members, and consulted by the Mikado at his pleasure.—A Parliament was formed in 1869, with deputies selected by the provincial governments, but it was soon dissolved, its deliberations taking no effect. The empire is divided into seventy-two Ken, or land districts, and three Fu, or residential districts, namely: Yeddo (now officially called Tokyo, "the Capital of the East"), Osaka, and Kioto. At the head of each of these seventy-five districts is a Prefect, whose powers and attributes are far more extensive than those of any similar functionary in Europe. There is, however, a limit to their judicial action, for they cannot carry into execution sentences involving banishment or death, until they have been confirmed by the Minister of Justice.

The empire consists of the Japanese islands, the island of Yesso, part of the island Saghalien, part of Kuriles, and the Lien Khien islands. The area and population of the several divisions are as follows:

DIVISIONS.	Area.	Population.
Japanese islands.....	114,552	32,794,497
Yesso.....	34,005	78,780
Saghalien.....	3,700	234,369
Kuriles.....		
Lien Khien.....	2,670	2,448
Total.....	155,527	33,110,503

Japan proper (or the Japanese Islands) is geographically divided into the three islands of Nippon, the central and most important territory; Kiusiu, "the nine provinces," the South-western island; and Shikoku, "the four states," the Southern island. The capital, Yeddo, or Tokyo, had in 1872 a population of 780,321.

Japan has concluded treaties with the United States (1854); Great Britain (1854); Russia and the Netherlands (1855); France (1859); Portugal (1860); Prussia and the Zollverein (1861); Switzerland (1864); Italy (1866); and Denmark (1867). Besides these states, Belgium, Austria, Peru, Sweden, and Spain, are also represented in Japan by diplomatic agents. By the treaties with the foreign powers, the ports of Yokohama, Nagasaki, Niigata, Hiogo, Osaka, Hakodadi, and the city of Yeddo, were thrown open to foreign commerce. The number of foreigners in the treaty ports was, in 1871, 1,586, namely, 782 Englishmen, 229 Americans, 164 Germans, 158 Frenchmen, 87 Dutch, 166 of other nationalities.

The budget estimates for the year 1873 are contained in a report of the Commissary-General for the Administration of Finances to the President of the Council of State, dated June 9, 1873. The revenue for 1873 is estimated at 48,700,000 ryos (1 ryo = \$1.08), the expenditures at 46,500,000 ryos; surplus, 2,200,000 ryos. The principal sources of revenue are the land-tax (40,000,000 ryos), and the tax on brandy, oil, sugar, and similar articles (2,100,000). The principal items of public expenditures are the pensions and indemnification of the deposed Daimios (12,600,000), and the budget of the Minister of War (8,000,000). The public debt of Japan, in June, 1873, consisted of 140,700,000 ryos, embracing 26,700,000 home debt; old foreign debt, 5,500,000; new foreign loan, contracted in 1873, 10,700,000; paper money in circulation, 98,100,000.

The assets embrace a sum of 17,900,000 ryos in the public exchequer, and a loan made by the Government to the farmers, amounting to 21,000,000 ryos and 100,000 kokus of rice (1 koku = 300 lbs.).

According to a work prepared by the Japanese Government for the Exhibition of Vienna ("Notes sur l'Empire du Japon et sur sa Participation à l'Exposition universelle de Vienne, 1873," Yokohama, 1873), the imports and exports in 1871 were as follows (value expressed in Mexican dollars):

PORTS.	FOREIGN TRADE.				COASTING-TRADE.			
	GOODS.		PRECIOUS METALS.		GOODS.		PRECIOUS METALS.	
	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.
Kanagawa.....	14,445,000	14,431,000	1,753,000	3,904,000	449,000	766,000	1,105,000	2,699,000
Hiogo-Osaka.....	1,739,000	2,082,000	1,06,000	1,271,000	1,770,000	848,000	1,667,000	968,000
Nagasaki.....	1,545,000	2,380,000	226,000	696,000	90,000	144,000	448,000	315,000
Hakodadi.....	16,000	292,000			167,000	204,000	131,000	6,000
Niigata.....								
Total.....	17,745,000	19,185,000	2,125,000	5,871,000	2,476,000	1,962,000	3,351,000	3,984,000

The value of principal articles of imports (exclusive of the port of Niigata) were in 1870 and 1871 as follows (value expressed in dollars):

ARTICLES.	1870.	1871.
Cotton.....	7,200,000	8,000,000
Wool.....	2,000,000	2,000,000
Rice and sugar.....	18,000,000	4,400,000
Metals.....	820,000	580,000

The principal articles of exports were as follows:

ARTICLES.	1870.	1871.
New silk.....	5,100,000	8,400,000
Cocoons.....	100,000	40,000
Silk-worm eggs.....	3,400,000	2,100,000
Ten.....	3,800,000	4,600,000
Copper.....		400,000

An imperial edict of December 28, 1872, establishes general liability to military service. The time of service is three years. The standing army in time of peace is 35,564 men. The execution of the edict has already begun, but has met in several districts with considerable opposition.—The navy was composed of nineteen vessels (two iron-clads), of an aggregate of seventy guns, and 2,300 horse-power; it was manned by 1,200 men.

The first railroad of Japan, from Yeddo to Yokohama, was opened in November, 1872; it has a length of eighteen miles. It was at once used so much that early in 1873 a double track had to be laid. A second railroad, from Hiogo to Osaka, of about equal length, was to be opened in the course of the year 1874.

The electric telegraph connects (since the beginning of 1873) the towns of Nagasaki, Osaka, Hiogo, Kioto, Yokohama, and Yeddo, with each other, and with the continents of Asia and Europe. The natives have, however, as yet not sufficient skill in telegraphing, and European and American merchants prefer to send their dispatches by vessel to Nagasaki, whence they are forwarded by the Danish Company (Great Northern Telegraph).

A general post-office was established in February, 1873.

The division of the year into fifty-two weeks has also been adopted; the days are named days of light, moon, fire, water, wood, metal, and earth.

The Japanese Government has continued throughout the year to introduce reformatory measures in all the department of public administration. The numerous mountebanks of the country were notified in December, 1872, that they would be allowed only during three years more to exercise their trade; after that year they must engage in some useful occupation.—Native merchants were authorized to construct several new railroads and telegraphs.—On January 1, 1873, the New Year was for the first time begun on the same day as in the Christian era, with the only difference that the Japanese count their years from the accession to the throne of the first Mikado, the year 1873 being in the Japanese era 2523. Other reforms beginning in January, 1873, were the establishment of an official Government gazette, which has the name *Nishin Shiyishi*, and the publication of a Japanese Code; the officers were directed to dress in the European fashion. The Shoin, or Council of State, is to be enlarged into a hereditary Chamber of the former Daimios, corresponding to the English House of Lords. Great efforts were made, both by the Government and by the communes, to promote the cause of instruction. The former began the establishment of eight high-schools in different places. In Kioto a large hospital was opened under the direction of a German physician. On New-Year's day the Emperor, in a solemn audience,

received the addresses of the diplomatic corps, and on January 10th the Emperor and the Empress, surrounded by the ladies of the court, received the American and Russian ambassadors, who presented their wives.

Important improvements were begun in the port of Hiogo. The work will continue several years, and will require about \$10,000,000.

An order, comprising civil and military classes, was established to reward the Japanese who in any way may distinguish themselves. The medals bear the inscription "for merit," or "for bravery."

On March 12th an embassy was sent to China, to obtain the ratification of the treaty concluded with that country. It took place on April 30th at Tsientsin. The ambassador then went to Peking, where in common with the ambassadors of other foreign powers he was received in the first audience given by the young Emperor to the foreign ministers. (*See CHINA.*)

The relations of Japan to foreign countries were on the whole of an amicable character. On the island of Saghalien, the northern half of which is occupied by the Russians while the southern part is claimed by the Japanese, frequent conflicts occurred between Japanese settlers and Russian soldiers. The Russians opened diplomatic negotiations for obtaining possession of the entire island.

Difficulties with Corea, which refused to pay the usual sum, led in October to a ministerial crisis. Public opinion was clamorous for a declaration of war; but the ministers were decidedly opposed to it, and offered their resignation. After some hesitation, the Emperor concluded to retain the ministry, and give up the expedition.

Owing to the remonstrances of the foreign Governments, Japan, during the year 1873, put an end to the persecution of the native Christians. The edict against the Christians was officially suppressed throughout the empire. In January 84 native Christians of Nagasaki, who had been exiled to the province of Kanga, were pardoned and sent back to their homes. In April 1,938 other Christians returned from their exile in the remotest provinces of the empire to their homes in the neighborhood of Nagasaki. In several places the edict of toleration caused profound dissatisfaction, especially in the rural districts, in some of which the Government had to suppress insurrectionary attempts.

An edict, issued on January 22d, allowed the Buddhist priestesses and nuns to marry, and abolished the prohibition to eat meat. The same directions had been given in favor of the Buddhist priests several months ago. Both the Buddhist priests and those of the Shinto religion were deprived by imperial edicts of the salaries which they had formerly received from the state; they are henceforth to be supported by voluntary contributions. The Japanese newspapers were often ridiculing both creeds and religion in general.

The consular reports to the English Government call attention to the difficulties which beset the progress of commerce in Japan. Sir H. Parkes points out the potent and injurious influence exercised on foreign commerce by the Japanese guilds. These commercial corporations are allied with the Japanese Government, and extend over the whole country. Their proceedings are shrouded in secrecy, but the effects of their action are evident. The influence of these corporations is said to be increasing from day to day, constituting a power which the foreign houses must necessarily take into consideration. Strange to say, some of the foreign houses afford aid to these guilds in the shape of capital. The guilds also issue paper money without limit, being authorized to do so by the Government, and this paper money is accepted in payment for imports. It is true that the paper is soon cashed; but the guilds, nevertheless, have the benefit of a certain amount of floating capital through the existence of this currency. The capital possessed by the guilds is furnished to some extent by the Government, as also partly by the Japanese, supplemented—as already observed—by a few foreign merchants. These guilds, or corporations, have grown rapidly since commercial relations with foreigners became of importance, and, in consequence of this system, the trade of Yokohama has become a gigantic monopoly in the hands of the Japanese Government. This is altogether contrary to the letter and spirit of the treaties negotiated by foreign powers some time back. Each of the powers then negotiating with Japan provided in the treaty a special article, establishing the right of its own subjects, as also of the Japanese merchants, to enter into trading relations without any official interference. But by means of these guilds the Japanese have altogether evaded the effect of this article in the treaties. The vice of the old official system continues, and the completeness of the organization, together with its recognized power, enables it to control—or rather to coerce—the trade of the country. The central body at Yokohama operates through the corporation of the provinces, so as to “arrest, weaken, or strengthen” the demand for exports and imports. The institution at Yokohama “fixes the price at which its affiliated societies may sell their products, or buy those of the foreigners.” These societies know that all decrees of the directors are sanctioned by the Government, and that it is a matter of serious peril to resist them. Hence, under the present rule of the Mikado, as formerly under the *régime* of the Daimios, the sales of the products of the empire are in the hands of the sovereign or his delegates.

Toward the close of the year the Japanese Government was believed to prepare for obtaining redress for the inhumanity exhibited by the Formosans toward the crews of certain Japanese crafts which have at various

times been compelled to put into one of the ports on the Formosan coast. The Chinese Government having repudiated all responsibility upon this score, the Imperial Government has opened communication with the Formosan authorities, whose tone, however, hardly favors the idea of an amicable settlement.

In July a serious revolt occurred in the province of Fukuoka (in South Japan), owing to a misunderstanding between the Kensho or Government officers and the farmers. The farmers rose in a body to the number of from 15,000 to 20,000, according to other accounts 50,000, armed with long bamboos, which they pointed with iron, and used as spears. Some also had guns. They commenced destroying all the Government property they could lay their hands upon. They appear to have begun at Kokura, or north part of the province, cutting down all the telegraph-poles, and destroying the wires and insulators for the entire length of the province. On their road they pulled down or fired every Government officer's house, killing the officer if he did not make his escape. At Fukuoka they set fire to the town in two places, totally destroying the Yaski where the telegraph-office is situated, breaking every thing in the place, including windows and doors, the roof and flooring not escaping their vengeance. The rebels burned all the official papers and destroyed all the spare stores. After the officers had time to muster, they brought a 30-lb. gun into play on the rebels, and, after killing about 180 with a few rounds of grape, the remainder retreated for the time. They next paid their visit to every shop in the town of Fukuoka and the suburbs where European goods or stores were sold, breaking and destroying every thing in the place. This riot continued for about six days, when two regiments of foot (Satsuma men) arrived and gave the rebels a warm reception, killing about 200; the remainder then retreated into the surrounding mountains.

JUDD, G. P., M. D., an eminent statesman and councillor of the kingdom of Hawaii, born in Paris, Oneida County, N. Y., April 23, 1803; died in Honolulu, Sandwich Islands, July 12, 1878. We have been unable to ascertain whether Dr. Judd was a graduate of any college, or where he obtained his medical education, but late in 1827 he received the appointment of missionary physician from the American Board of Commissioners for Foreign Missions, and arrived in Honolulu in company with Messrs. Clark, Andrews, Green, and Gulick, and their wives, in March, 1828. In 1840 he accompanied Commodore Wilkes in his exploring tour through the islands. In 1842 he resigned his connection with the mission, and, at the invitation of Kamehameha III., accepted the position of recorder and interpreter to the Government, an office somewhat similar to that of secretary to the King. When Lord George Paulet took possession of the islands in 1843, Dr. Judd was appointed one of the joint commission to rep-

resent the King, but soon resigned his office when he found the commission bent on abrogating the salutary laws restraining licentiousness and crime, which had lately been established. When Admiral Thomas restored the sovereignty to Kamehameha III., July 31, 1843, Dr. Judd was invited by the King to organize a ministry, which he did by selecting R. O. Wyllie to be Minister of Foreign Affairs, himself Minister of the Interior, and John Ricord Attorney-General. This was the first cabinet the Hawaiian Government ever had. In the following year, 1844 or 1845, the cabinet was increased to four ministers, and he took the portfolio of the Finance Department, which he held till 1853. In 1849 he accompanied the then Princes Liholiho and Lot Kamehameha to Europe to make new treaties, and to endeavor to settle the difficulty which occurred with France in that year. The ten years during which he held office were probably the stormiest decade in the modern political history of Hawaii, and it required a man of the firmness of Dr. Judd to steer the frail ship of state, which

had been launched on a stormy sea. To his tact and wisdom, aided by his associates, Wyllie, Richards, Lee, Ricord, and Andrews, were the Hawaiian people indebted for the admirable system of constitutional government then established, and which has secured peace and quiet to them for over thirty years. When he entered the service of the King and organized for him a government, he found him encumbered with a load of debt, paying exorbitant interest. By a system of prudent economy and rigid circumspection he paid off these debts, and established for the Hawaiian Government an enviable financial reputation, which it has preserved to this day. To him, more than to any other man, living or dead, belongs whatever honor is due for its present national credit, as well as for many of the substantial improvements in the city of Honolulu. But it was as a citizen and a warm friend of the Hawaiians that his influence for good was most deeply felt. Among the older natives, who knew him best, he was looked up to as a faithful counselor, and loved as a father.

K

KALBFLEISCH, MARTIN, a manufacturer and political leader in Brooklyn, N. Y., three times mayor of the city; member of Congress from Second District, New York, 1863 to 1865; born in Flushing, Holland, February 8, 1804; died in Brooklyn, February 12, 1878. When very young he was sent to one of the excellent schools of his native city, and prosecuted his studies till he had received a very thorough education. At the age of eighteen, finding few opportunities for business in Flushing, he determined to seek his fortune elsewhere, and, with that end in view, took passage in the American vessel *Ellen Douglass*, for Padang, on the coast of Sumatra. He arrived safely at his destination, but found cholera raging fearfully, and, as the captain of his vessel thought it unsafe to remain, Kalbfleisch decided not to run any risk himself. He went, accordingly, with the American captain to Antwerp, and then, at the request of the latter, proceeded to France, where they engaged in commercial operations for four years. At Havre the young man married, and soon after determined to emigrate to America. In 1826 he sailed for the United States, and settled in Harlem. For several years he was obliged to work under great disadvantages, having only a few acquaintances, but he finally accumulated enough to enable him to engage in the selling of paints in a small way. He started an extensive color establishment at Harlem in 1835, but high prices made it for his interest to remove his factory to Norwalk, Conn. Unfortunately, on the eve of ultimate success, his establishment was burned to the ground. Disgusted by the turn affairs had taken, Mr. Kalbfleisch returned

to New York, and settled at Greenpoint, L. I., in 1842. His family was large, and, there being no school in the vicinity where his children could be educated, he immediately applied himself to the task of supplying the want. He procured the use of a dilapidated school-house near Bushwick Church, and the services of a teacher; and, afterward, through his efforts, a new house was built by the authorities, and a school district permanently established. Meanwhile, the chemical manufactory which he had established needed enlargement on account of increased business, and he removed it to a more desirable site in Brooklyn. Although Mr. Kalbfleisch had always been interested in politics, it was not until 1851 that he became a candidate for office, being elected supervisor of the old town of Bushwick, and holding the position until the consolidation of the cities of Williamsburgh and Brooklyn. He was appointed one of the commissioners to draw up a charter for the consolidation of the two cities in 1853, acting as president of the board. In the following year he was a candidate for Mayor of Brooklyn, and was defeated by George Hall. In 1855 he was elected alderman of the Eighteenth Ward of that city, and served in that capacity until May, 1861, when he was again placed at the head of the city ticket, and this time elected. While mayor, he was chosen, in 1862, as representative in Congress from his district. He was reelected to the office of chief magistrate of Brooklyn in 1867, and, by virtue of his office, was a member of various commissions and trustee of several institutions, besides being a director in two banks, and president of the

Prospect Park Fair Ground Association. In 1869 he was again elected mayor of the city, and, two years afterward, when deserted by his party, he headed an independent ticket, but the late mayor, S. S. Powell, defeated both him and the Republican candidate. Mr. Kalbfleisch retired from business in 1868, leaving three of his sons to carry on the establishment under the name of Martin Kalbfleisch's Sons. After the expiration of his term of office, he had lived in ease and retirement at his private residence, one of the finest in Brooklyn. Mr. Kalbfleisch was a man of culture and scholarly taste, and an excellent linguist, speaking four languages fluently.

KANSAS. While the people of Kansas were still aroused in consequence of the recent exposure of the corruption that had been practiced in the senatorial elections of 1867 and 1871 (see *ANNUAL CYCLOPEDIA* for 1872), and while a committee of Congress was investigating these charges in Washington, a more outrageous case of bribery in the senatorial election of 1873 was alleged to have been committed and exposed, producing not only great excitement in Kansas, but a sensation throughout the United States.

On the 29th of January the Legislature was in joint convention to elect a United States Senator to succeed S. O. Pomeroy, whose term of office was about to expire. The most prominent rival candidates were Mr. Pomeroy and John J. Ingalls. As the time for the election approached, the public interest manifested in the matter became all-absorbing, owing, in a large measure, to the exposures in relation to the previous elections. Consequently, when the two branches of the Legislature were assembled in joint convention, the hall was crowded to its utmost capacity. After the candidates had been nominated and the balloting was about to begin, Colonel A. M. York, the Senator from Montgomery County, arose and made a most startling disclosure, to the effect that he had had several interviews with Mr. Pomeroy, in which that gentleman had bargained to purchase his vote for \$8,000, and had actually paid \$7,000 of that amount. The remarkable sensation caused by this announcement was made still more impressive when Colonel York passed to the presiding officer the \$7,000 in greenbacks which he had received from Mr. Pomeroy. The facts relating to this transaction are given in the speech there made by Senator York:

Before I place in nomination the name of any man, I have a short explanation to make, and as it concerns all here present, and is of great importance to the State of Kansas, present and future, I desire the close attention of the members of the convention to what I have to say. Two weeks ago yesterday, I came to Topeka, an avowed and earnest anti-Pomeroy man. I thought that in his defeat lay the regeneration of the State and party, and cheerfully and enthusiastically I allied myself with the anti-Pomeroy element in the Legislature. Grave charges had been made against Senator Pomeroy in connection with a certain well-known letter to W. W. Ross. These charges had assumed a serious form in a meet-

ing of the anti-Pomeroy caucus a few evenings ago, when a man by the name of Clark exhibited \$3,000, in twenty one-hundred-dollar bills, declaring that he had received the same from Mr. Pomeroy for signing a confession to the effect that he had forged the letter and the signature thereto. I had no evidence as to the truth of these charges, but Mr. Pomeroy's name having been associated with so many rumors of a similar nature, that made me give those reports credence, though I had no desire to condemn Mr. Pomeroy without a hearing. When I came here I had been waited upon at various times by friends of Mr. Pomeroy, who plied me with arguments in favor of his preëminent fitness for the position, and attestations of his innocence of the charges brought against him. I was asked several times to have an interview with Mr. Pomeroy, and finally consented, if this interview could take place in the presence of a third party. Mr. Pomeroy assented to the presence of one or any number of my friends. Accordingly, on Friday last, I waited on Mr. Pomeroy, and there, in the presence of Captain Peck and two others, we had a brief conversation. After a general talk about his prospects and other matters relating to the campaign, I put to him the question direct: "Did you or did you not write the letter signed with your name and directed to W. W. Ross, and having reference to certain profits in Indian goods?" In reply he handed to me the affidavit of J. B. Stewart, and one signed by several citizens of Lawrence, and asked me to read them and say whether I thought he was the author of the letter. I replied: "Mr. Pomeroy, you have not said whether or not you did write that Ross letter," and he answered, "I did not write the letter." I then said to him: "Mr. Pomeroy, you are the most infamous scoundrel that ever walked the earth, or the worst-defamed man that ever stepped on Kansas soil." The interview ended, and, as I supposed, all relations between Mr. Pomeroy and myself. But a day or two afterward I was importuned to accord to Mr. Pomeroy a private interview. At this time it became apparent to several of the anti-Pomeroy members that illicit and criminal means were being employed to secure Mr. Pomeroy's reelection, and it became us, as far as it lay in our power, to circumvent the employment of them. I consulted with the tried and true friends of this movement, Messrs. Simpson, Wilson, Jackson, and others, as to the course I should pursue, and upon their advice I acted. I visited Mr. Pomeroy's rooms, in the dark and secret recesses of the Teft House, upon Monday night, and at that interview my vote was bargained for a consideration of \$8,000, \$3,000 of which was to be paid to me upon that evening, \$5,000 the next afternoon, and a promise of the additional \$1,000 when my vote had been cast in his favor. I now in the presence of this honorable body hand over the amount of \$7,000 just as I received it, and ask that it be counted by the secretary. [The speaker advanced and placed upon the chief clerk's desk two parcels of money—one open, and amounting to \$2,000, and a brown paper parcel, tied with twine, which, upon examination, was found to contain \$5,000 in greenbacks of large denominations.]

I know that there are many here who may feel disposed to impugn my motives in this matter, who may deery the manner of my unearthing the deep and damning rascality which has eaten like a plague-spot into the fair fame of this glorious young State. I am conscious that, standing here as I do, a self-convicted bribe-taker, I take upon myself vicariously the odium that has made the name of Kansas and of Kansas politics a hiss and a by-word throughout the land. I do not undertake the defense of my act any further than it may convey with it its own justification. From every part of the State comes a demand, thunder-toned and unanimous, from the honest masses, whose will has been so long disregarded and overslaughed by the corrupt use of money, by individuals and corporations, that we make a final and irrevocable end of corruptionists. In this mat-

ter, I have had the unpleasant and unenviable sensation of handling the pitch that defileth, but my feelings were secondary to the common weal. In fact, they were not taken into the account. In a solemn exigency and forlorn hope of this character, I consider it any man's highest honor, in however questionable a guise his service comes, to man the breach, and, if such a cause needed its atoning victim, I would gladly offer myself as a sacrifice.

I promised, in consideration of \$8,000 in hand paid, to vote for Samuel C. Pomeroy, and I here and now redeem that pledge, by voting for him for a term in the penitentiary, not exceeding twenty years.

In concluding his remarks, Senator York said:

I demand, Mr. President and gentlemen, that the actions of Samuel C. Pomeroy in this contest be thoroughly examined, and that the corruption money that lies upon the table be the instrument of retribution in prosecuting that investigation. I further demand that this body give to-day such an expression of their sentiment in this matter that the regency of our glorious young commonwealth may be proclaimed throughout the land, and that Kansas may stand erect and free among the States of the Union, pure among the purest, and honored throughout the world. The statements I have made, gentlemen, are but partial and incomplete. The hour or two that I passed in the den of infamy in the Telft House let in upon my mind such a flood of enlightenment as to the detestable practices of the Kansas politician that I have no words in which to express the knowledge that I gained of the depth of degradation that a pure republican government has reached. The disclosures there made implicate some of the most prominent and respectable men in Kansas. I learned from Mr. Pomeroy's lips that his spies and emissaries were working in our caucuses to sell us out. These disclosures I will not now make. They are sufficient to satisfy me that the most conscienceless and infamous betrayer of a solemn trust reposed in him by the will of the people is Samuel C. Pomeroy. I have been actuated by no motive personal or vindictive in my action here to-day. I have not made the fight on Mr. Pomeroy in Mr. Ingalls's interest, or in Mr. Lowe's or Mr. Harvey's interest, but in behalf of the outraged and long-suffering people of this commonwealth, and in the furtherance of the solemn oath I took when I entered these halls as a representative of the people. As to the truth of what I have stated, I stand in the presence of this august and honorable body of representatives of the sovereignty of the people, and before the Almighty Ruler of the universe, and solemnly declare and affirm that every word I have spoken is God's truth, and nothing but the truth.

The delivery of this speech was followed by a scene rarely witnessed in a legislative hall. A ballot was at once taken, which resulted in the election of Mr. Ingalls, not a single vote being cast for Mr. Pomeroy. During the same day Senator Pomeroy was arrested on a charge of bribery, and gave \$5,000 bonds for his future appearance for examination. He was subsequently placed under \$20,000 bonds. The action against him was pending at the close of the year. Colonel York was also arrested, at the instance of one of Mr. Pomeroy's friends, for receiving a bribe, but the charge was soon abandoned. On the same evening an immense meeting was held in Topeka, at which the following resolution was adopted:

Resolved, By this meeting that the hearty thanks of the people of Kansas are due to Colonel A. M.

York, the distinguished Senator from Montgomery County, for his courageous and self-sacrificing course in exposing to the Legislature the nefarious system of corruption which has so long disgraced our State. We regard his action as patriotic in the highest degree, as requiring the rarest order of moral courage, and as not only justified but imperiously demanded by the exigencies of the case. His cause is ours, and we will stand by him and protect him to the end.

On the second day after this remarkable occurrence, Mr. Pomeroy addressed the following letter to the editor of the *Atchison Champion*:

TOPEKA, January 31, 1873.

DEAR SIR: When you left Topeka, I told you I would employ my first leisure in detailing to you, for the public, the precise nature of the malicious conspiracy organized for my defeat, but since the parties to this conspiracy have summoned me before the court, to answer to their charges, this is to say that, before the judicial tribunal, I, too, am desirous and anxious to appear and have a full investigation and a verdict rendered. I only ask a suspension of public judgment until a fair hearing can be had in the courts. That verdict will decide who has committed crime, and the measure of the guilt.

Very truly yours, S. C. POMEROY.

The extraordinary letter referred to in the speech above given was as follows:

[Strictly confidential.]

WASHINGTON, D. C., July 22d.

W. W. ROSS—MR. DEAR SIR: Have you yet recommended any one to sell goods to the Pottawatomies? If not, I have a plan. Mr. J. R. Tappan, of New York, will take hold and furnish a splendid lot of goods, provided he gets the license to sell exclusively on the reserve at St. Mary's Mission.

You can give the Indians an order for goods on this store, and these orders are accepted when the annuities are paid. This proceeding is recognized here at the Department and is all right.

I send inclosed the form of a letter for you to send back to me to give Mr. Dole, but I don't deliver it until Mr. Tappan and Edward Clark, of Lawrence—now figuring here in Indian matters, and who have an agreement with each other about goods—I say, I don't deliver your recommendation until I have executed to me a contract to have one-fourth of all the profits paid to *W. E. Gaylord*, as my share, and one-fourth of all profits paid to Mr. — (name him to me), for your share. You and I, through our two friends, are to have one-half the profits, and Tappan and Clark the other half, and Tappan to do all the business, and we to have nothing to do, only to take our share of profits at each payment.

Now, if you will fix it up at that end of the line, I will see the writings are all executed right to this end, and we will be all right. Name the man to represent you, with Mr. Gaylord, who represents me.

You will see from this letter what kind of a recommendation to give Mr. Tappan. But don't fail to send it to me, as they must come to terms before they get the license. Tappan is a grand fellow. It's all right. Let me hear from you at once.

Truly, S. C. POMEROY.

P. S.—I find upon reflection that you must send these papers through Colonel Branch, at St. Joe. So I will make the contract for myself and you at once, and you return the application and recommendation to Dole through Colonel Branch.

Truly, S. C. P.

On the 4th of February, resolutions were passed by the Legislature providing for an investigation of charges of bribery in the late senatorial election, memorializing the U. S. Senate to investigate the case of Senator Pom-

eroy, and requesting that gentleman to resign his office. Investigating committees were appointed both in Topeka and Washington, and at once entered upon their duties. Before the committee appointed by the Legislature, evidence was adduced to show that attempts at bribery had been made in other instances than that of Senator York.

The Legislature adjourned on the 6th of March, the House having previously passed the following resolution:

Resolved, That it is the sense of this House that Senator S. C. Pomeroy used corrupt means in the endeavor to secure his reelection, and that he is unworthy the confidence and respect of the people of Kansas.

On the 19th of February, Senator Pomeroy appeared in his seat in the Senate, and in offering a resolution providing for the appointment of a special committee of five, to investigate the charges made against him, said:

Senators as individuals, as well as the country, have had their attention called, through the press, to the late senatorial election in Kansas, and have had some information of the conspiracy there planned, plotted, and executed, for the purpose of accomplishing my defeat. Upon the subject-matter of that act of villainy, unparalleled in wickedness, my lips have heretofore been silent for want of a proper place and opportunity to speak; I now propose to break this silence in your presence. Sir, in presence of my fellow-Senators, and before the country, I publicly deny the truth of each and every charge of bribery and corruption made by the chief instigator of this conspiracy, or by whomsoever made. I deny each and every statement imputing to me any act inconsistent with moral rectitude or correct conduct, and declare all such statements to be totally false. And I further specifically deny that I ever entered into any contract or agreement, directly or indirectly, with any man, member of the Kansas Legislature or not, for a vote in my favor, or that I ever, directly or indirectly, paid any individual one dollar, or any other sum, for his vote for me in the State senatorial election.

The committee, having been promptly appointed, proceeded at once to examine the principal witnesses in the matter. Mr. Pomeroy submitted a statement, denying that he ever made any attempt, or commissioned any one to do so in his behalf, to influence improperly the vote of any member of the Legislature. He explained the remarkable interview with York as follows:

And now, as to the charge of this Mr. York and his associate conspirators, I will say, the true facts have already been stated by witnesses and the transaction already stated to be purely a business one, having no relation to his vote, which, on several occasions, I had learned of his pledging to me. About the last of the week before the Tuesday set for the first ballot, T. B. Eldridge, M. W. Reynolds, Mr. De Long, and others, all from his county, assured me, with more or less positiveness, of York's support; but some days before I learned that I had, after much deliberation, agreed to aid Mr. B. Page and his associates to start a national bank at Independence. Mr. Page had a private bank, and, having satisfied myself of his ability, capacity, and fitness for the management of such an institution, I agreed to furnish him with money sufficient, when met with his own \$25,000, to make a sum sufficient to purchase thirty United States bonds of the de-

nomination of \$1,000 each. Page urged, and was anxious to procure the money before he left Topeka, but I told him it was inconvenient for me to furnish over \$2,000 then, but I would give it soon, and he might depend upon it, and make his arrangements accordingly. At this time I met at the Teft House W. H. Borland, of the Second National Bank of Leavenworth, who inquired of me if I should not want some currency before leaving Topeka, as he thought from appearances that my hotel-bills would be large. At first I told him no. Next day I met him, and said I should like to get \$5,000 at forty or sixty days, as I had agreed to help a friend to organize a national bank, and he would refund it as soon as he got his currency from the Government. He then brought me a package said to contain \$5,000, which I never opened or counted, and gave a note or receipt for it at the time, and I put the same in my valise. On Monday night, the 27th, Mr. York came to my room to see me, having sent word several times that he would do so, and at once began to report what had been going on at the anti-Pomeroy caucus, and I heard him through. Before leaving, he spoke of the favor I had granted his friend, and said Page had requested him to get the money and forward it to him at Independence, and that he (York) would leave it soon after election for him. I told him I was not prepared at that time to furnish it, although I had promised it to Page before I left the city. I assured him of my confidence, and told him I could furnish \$2,000 at that time, and thought I should be able to furnish \$5,000 more the next day. The amount necessary, I had calculated, would be from five to eight thousand dollars to pay for the bonds and their premium, in addition to the \$25,000 Page and his associates could furnish. I then paid him the first installment of \$2,000, and the next day I paid him a package of \$5,000, just as I had received the sum from Borland, and neither gave my note to Borland nor took a note from him; but, during that day, I had seen Mr. King, at one time in company with him, and asked him to see Page before he left the city, and inform him of the transaction; but both these gentlemen returned, saying they were unable to find Page, and I rested in the belief that the transaction was all right, until I heard the misstatements of the facts by York on the floor of the joint convention. I then denounced it as a conspiracy and plot, and told my counsel here, Judge Horton, the whole story, and within a few days left Kansas for Washington.

On the 8d of March, the last day of Pomeroy's senatorial term, a majority of the committee reported that neither the charges in relation to bribing Senator Simpson, of the Kansas Legislature, nor those preferred by Colonel York, were sustained by evidence. Senator Thurman, however, was of opinion that in both instances the charges were conclusively proved.

While this investigation into the charges preferred against Mr. Pomeroy was proceeding, another committee of the Senate was investigating similar charges of bribery against the other Kansas Senator, Alexander Caldwell (*see* ANNUAL CYCLOPEDIA for 1872); but, during the pendency of these proceedings, that gentleman resigned his seat in the Senate. The committee of the Senate subsequently reported that Mr. Caldwell was not entitled to a seat in that body.

On the 26th of March a State Convention of farmers was held in Topeka, and was attended by about two hundred delegates, representing all sections of the State. The convention con-

tinned in session two days, and adopted the following resolutions:

Whereas, Agriculture in its various departments is the basis of all material prosperity; and whereas, the burdens and impositions under which it lies have become intolerable, therefore the farmers of Kansas, in convention assembled, do put forth this declaration of their desires and purposes, and state—

1. Farmers desire to unite in the form of clubs, unions, or stock associations, for the purpose of showing that they can come together and cooperate like other folks, for a common good, and for the moral effect it will have upon themselves and the rest of mankind.

2. They desire association for the purpose of controlling the prices of their products through their own boards of trade, or their own appointed agents, so that nothing need be thrown upon the market for less than the cost of production and a reasonable profit.

3. They desire to unite for the purpose of getting their supplies at cost, with a reasonable per cent. added, to pay for collecting and distributing, and the use of capital.

4. They desire to cooperate for the purpose of securing a reduction in freights, and breaking the blockade between different parts of the country, by arguments, by legislative enactments, and by means of the courts.

5. They desire tax reform, the abolition of sinecure offices, the reduction of salaries, rigid economy in public expenditures, and the repeal of our present iniquitous tax penalties.

6. They desire home manufactures; so that money paid for implements may be kept in the State, and our populations increased by industrious operatives, engaged in creating wealth, rather than in speculation.

7. They desire that the balance of our public domain should be kept forever sacred to actual settlement, and in no contingency be allowed to fall into the hands of railroad monopolies and land-sharks.

Resolved, That organization is the great want of the producing classes at the present time, and we recommend every farmer in the State to become a member of some farmers' club, grange of the Patrons of Husbandry, or other local organization.

Resolved, That the taxes assessed and charged upon the people, both by national, State, and local governments, are oppressive, unjust, and large sums of money are collected, far beyond the needs of an economical administration of government.

Resolved, That we respectfully request our Senators and members of Congress to vote for and secure an amendment to the tariff laws of the United States, so that salt and lumber shall be placed on the free list, and that there should be made a material reduction in the duty on iron, and that such articles as do not pay the cost of collection be also placed on the free list.

Resolved, That we earnestly request the Legislature of our State at its next session to enact a law regulating freights and fares on our railroads, upon a basis of justice, and that we further request our members of Congress to urge the favorable action of that body, where the full power exists beyond all doubt, to the same end, and, if need be, to construct national highways at the expense of the Government.

Resolved, That the act passed by the last Legislature, exempting bonds, notes, mortgages, and judgments from taxation, is unjust, oppressive, and a palpable violation of our State constitution, and we call upon all assessors and the county boards to see that said securities are taxed at their fair value.

Resolved, That the practice of voting municipal bonds is pernicious in its effect, and will inevitably bring bankruptcy and ruin upon the people, and we therefore are opposed to all laws allowing the issuance of such bonds.

Resolved, That giving banks a monopoly of the nation's currency, thereby compelling the people to pay them such interest therefor as they may choose to impose, seven-tenths of which interest we believe is collected from the farmers, is but little less than legalized robbery of the agricultural classes.

Resolved, That, for the thorough and speedy accomplishment of all this, we pledge each other to ignore all political preferences and prejudices that have swayed us hitherto, to our hurt, and support only such men for office as are known to be true to our interests, and in whose integrity and honesty we have the most implicit confidence.

The permanent State organization was established by the convention, to be known as the "Farmers' Coöperative Association of the State of Kansas," and having a president, vice-president, secretary, treasurer, and board of directors.

The object of the Association was declared to be the collection of statistics relative to the products of the State, their amount, cost, and value; to assist the farmers in securing just compensation for their labor; to cooperate with similar organizations in other States in procuring cheap transportation, and remunerative prices for surplus products, and to act generally in the interest of the producing class.

The State Grange assembled in Lawrence, July 31st. Among the resolutions adopted was one demanding either that farming property be taxed as railroad property is, upon the basis of its income, or that railroad property be taxed upon the basis of value, independent of income.

The following amendment to the constitution of Kansas, having been submitted to a popular vote in accordance with the action of the Legislature at its last session, was ratified by a majority of 3,051 votes, 32,240 votes being cast for, and 29,189 against the amendment:

That section two, article two, of the constitution of the State of Kansas be amended as follows: The number of representatives and senators shall be regulated by law, but shall never exceed one hundred and twenty-five representatives and forty senators. From and after the adoption of the amendment the House of Representatives shall admit one member from each county in which at least two hundred and fifty legal votes were cast at the next preceding general election; and each organized county in which less than two hundred legal votes were cast at the next preceding general election shall be attached to and constitute a part of the representative district of the county lying next adjacent to it on the east.

The new Normal School building at Emporia was formally opened in the latter part of March.

On the 26th of November, Robert Crozier was appointed by Governor Osborn to fill the vacancy in the United States Senate made by the resignation, on the 24th of March, of Senator Caldwell. Mr. Crozier established the *Leavenworth Times* in 1857, and was a member of the Free State Territorial Council in that year. Upon the resignation of Chief-Justice Ewing in 1862 he was appointed by Governor Robinson to fill the vacancy. Since then he has mingled but little in politics.

According to the Auditor's Report, the total

debt of Kansas is \$18,879,778, viz.: State, \$701,745; municipal, \$10,749,445; school, \$1,928,585. The receipts into the Treasury during the fiscal year 1873 for the general revenue fund were \$744,857, and the expenses of the government \$446,376. There has also been paid out in the redemption of warrants outstanding at the beginning of the fiscal year upward of \$200,000, leaving a balance in the Treasury belonging to this fund of \$86,001. "For the first time since the organization of the State," says Governor Osborn, "the year has closed with no warrants outstanding, and a balance in the Treasury."

A very small proportion of the tax which the people are annually called upon to pay is for State purposes. The levy to supply the general revenue bond in 1873 was four mills on the dollar.

The following statement given in the Auditor's Report shows the length of each railroad in the State and the value per mile as fixed by the Railroad Assessors:

NAME OF ROAD.	Number of Miles operated.	Assessed Value per Mile.	Total Assessed Valuation.
Kansas Pacific.....	476,630	\$7,900	\$3,764,745
Leavenworth, Lawrence & Galveston.....	187,100	5,300	991,630
Missouri River, Fort Scott & Gulf.....	156,886	7,228	1,147,474
Atchison, Topeka & Santa Fe.....	496,160	5,000	2,480,800
Missouri, Kansas & Texas.....	252,980	4,700	1,199,006
Kansas Central.....	55,370	3,000	166,110
Junction City & Fort Kearney.....	33,000	3,000	99,000
Central Branch.....	100,000	4,000	400,000
Leavenworth, Atchison & Northwestern.....	21,153	7,200	152,373
St. Joseph & Denver.....	187,690	4,700	881,143
Missouri River.....	22,344	8,000	178,752
St. Louis, Lawrence & Denver, Cardonale Branch.....	80,600	3,500	282,100
St. Louis, Lawrence & Denver.....	32,950	4,000	131,800
Doniphan & Wathena.....	18,500	3,000	55,500
Atchison & Nebraska.....	33,313	4,775	159,019
Total.....	3,062,598		\$11,704,184

The Auditor says that the total assessed value above given is too large, some of the roads running through unorganized counties where no tax is levied or collected. He states the correct assessment at \$9,676,819.

During 1873 five new counties were organized, viz.: Ford, Barbour, Harper, Ness, and Comanche.

The various public institutions of the State are reported to be in a satisfactory condition under the law passed by the last Legislature providing for the reorganization of the various public institutions, with the exception of the penitentiary, new Boards of Regents and Trustees were appointed in April.

The Superintendent of Public Instruction reports 4,004 school districts, an increase during the year of 585; 121,690 persons enrolled in the public schools, an increase of 13,027; 3,133 school-houses, an increase of 696; value

of school-houses, \$3,408,956, an increase of \$563,693. The interest-bearing securities belonging to the permanent school fund now amount to \$1,003,688; \$244,586 of this amount has been added to this fund during the past year.

The total assessment of real and personal property in 1873 was returned at \$125,684,162. "This sum," says the Auditor, "is not very much in excess of the value of the railroads in Kansas, as fixed by railroad authority. It probably gives about one-third of the actual value of the property of the State. Our laws require the assessment of real and personal property 'at its true value in money,' but these laws are evaded. Some counties that are growing in wealth and population return each year a smaller assessment-roll. This injustice to other counties and to the State at large has become so glaring that vital changes in our assessment and taxation laws are imperatively demanded."

In his message to the Legislature in January, 1874, Governor Osborn recommends the calling of a Constitutional Convention, and the providing for a geological and topographical survey of the State; he also favors biennial sessions of the Legislature, and the election of United States Senators by the people.

KEELER, RALPH, an American author and man of letters, born in Western Ohio, in August, 1840; lost, and probably murdered, by being thrown overboard, from a steamer plying between Santiago de Cuba and Batabano, Cuba, on the night of December 16, 1878. His life, though brief, had been singularly eventful. His father was an Ohio farmer, and both his parents died before he was eight years old. He was sent to Buffalo, to the care of an uncle, to be educated, but was treated so badly that after two or three years he ran away and became cabin-boy on board a lake steamer, and, after five or six trips on different boats, became a train-boy on the Michigan Southern Railroad, and, when tired of this, joined one strolling band of minstrels after another, finally becoming connected with what was called the "Floating Palace," a large steamboat fitted up for show and theatrical purposes, on which he traversed most of the Southern and Western rivers. In this sort of life he continued from the age of twelve to fourteen or fifteen. Passing Cape Girardeau one day, in the "Floating Palace," he saw the boys of St. Vincent's College, at that old French town, out on the lawn at play, and at once determined to become a student there. He was obliged to go to Galveston first to fulfill an engagement, but as soon as possible returned, with but \$85 in his pocket, to Cape Girardeau, where he was kindly received, and remained for sixteen months, acquiring a perfect mastery of French, and considerable classical education. Leaving there he went to Toledo, Ohio, where he was for a time a clerk in the post-office. He then entered an advanced class in Kenyon College, Gambier,

Ohio, and remained there nearly two years, supporting himself most frugally. He then obtained some employment by which he saved \$181, and determined to go to Europe. He went to New York as a cattle-drover, took a steerage passage to London, viewed the World's Fair of 1862, then in progress, went to Paris and saw Parisian life, until he had but about \$80 left, when he took the railway train for Heidelberg, became a student in the Karl Rupert University, made pedestrian tours as a German student through Italy, Tyrol, Switzerland, Belgium, and France, eking out his scanty resources by correspondence with New York, London, and Edinburgh periodicals. He remained at Heidelberg till he had received his diploma, then started down the Rhine, passing through Belgium and Holland, and finally, taking an obscure garret in the Quartier Latin, in Paris, where meeting George Alfred Townsend, he was advised to write for some English magazine, and, his article being accepted and paid for, he went to Florence and lived on the proceeds all winter. He had sent another article to the London magazine, which was rejected, but he had forwarded it to an Edinburgh magazine, from which he had heard nothing for some months. His resources being exhausted he went to Leghorn and persuaded an American captain to take him to Boston on credit, his passage-money being \$50. On his arrival he found a letter forwarded to him containing a draft on London for the article sent to Edinburgh, which enabled him to pay for his passage and go on to Toledo, from which place he had been absent about twenty-eight months, and at an expense of a little more than \$300. He next went to California, where he spent two or three years teaching foreigners English, and writing for the California journals; then returned to New York as correspondent for the *Alta California*. While in this position he began to write for the *Atlantic Monthly*, to which he contributed his "Three Years a Negro Minstrel," and a "Tour of Europe for \$181." He was also engaged in lecturing to some extent for this and subsequent years. In 1869 he wrote reviews, and revised proof-sheets on that magazine, and in January, 1870, he became with Mr. Waud artist-editor of *Every Saturday*. This work continued until that paper ceased to be an illustrated journal, and the descriptive articles were admirable in their character. His engagement having closed, he went again to Europe, reported the proceedings of the High Court of Arbitration, and devoted some months to travel. On his return, Mr. Keeler, besides preparing a work for the press, engaged in general literary work, writing for the *Atlantic*, and being a special correspondent for several papers. The *Tribune* had engaged him as correspondent at Kelley's Island in the summer of 1873, and special correspondent in Cuba, in November, 1873, and it was while engaged in this duty that he came to his untimely end.

Aside from his magazine articles, Mr. Keeler had published three volumes, "Gloverson and his Silent Partner," published in 1868, and written in California; "Vagabond Adventures," a sort of autobiography, 1872; and a translation of George Sand's "Marquis de Villemer," 1873. He was at work before his death on a biography of John Brown—Ossawatimie Brown.

KEENE, LAURA, a well-known actress and theatrical manager, born in England in 1830; died in Montclair, N. J., November 6, 1873. She was of humble parentage, and compelled through her childhood to earn her own living. Her eighteenth year found her a bar-maid in a public-house contiguous to a theatre, where she subsequently obtained employment as a *ballet-girl*, and from step to step made her way upward in her profession. Through the advice of a friend, she began a course of study and improved so rapidly that she was employed by Madame Vestris, afterward Mrs. Charles Matthews, who was then managing a London theatre. She was there in 1852 when Mr. Wallack engaged her to come to this country as leading actress in his new theatre near the corner of Broome Street and Broadway, where she acted *Albina Mandeville*, in the play of "The Will." Her success was immediate and decided. She subsequently went on a starring tour through the States, also visiting California and Australia. Returning to New York in 1855, Miss Keene opened the Metropolitan Theatre, afterward called the *Winter Garden*, styling it "*The Varieties*." The following season it was purchased by William E. Burton, when she secured the Olympic, and opened it in 1856 as Laura Keene's Theatre, with the play "As you Like it." This house she continued to direct for four or five years with variable success, and it was during this period that "Our American Cousin" was produced, and Mr. Sothern's fortunate hit of "Lord Dundreary" was made. Another great success was "The Seven Sisters," which ran 169 nights. This play was the first of the great runs in this city, and the precursor of the "Black Crook." She continued to manage the theatre until the season of 1863-'64, when, the theatre property being in litigation, it by some means came into the possession of Mr. John Duff, who assumed, with Mrs. John Wood, the management of it. It then became known as the Olympic Theatre. Miss Keene then, after a brief visit to Europe, began a starring tour. She organized a company and appeared principally in the Southern States. In April, 1865, she appeared at Washington, and it was while witnessing her performance of *Florence Trenchard*, in the comedy of "Our American Cousin," that President Lincoln was assassinated. While managing her last New York theatre she married Mr. John Lutz, her business manager, and from that time her popularity began to wane. After his death she announced her retirement from the stage.

Establishing herself in New York, she began the publication of a *Fine-Art Journal*, which, however, did not meet with distinguished success. She conducted it, nevertheless, for some time. Though she had announced her retirement from the stage, the fascinations of the foot-lights were too strong for her, and she returned to her art, but it was for a brief period. Consumption, which had seized upon her a long time before, had made such inroads upon her constitution, that her strength was not equal to the work. As an actress Miss Keene excelled in comedy; she was sympathetic in her expression, and in the parts she assumed rarely failed to enlist the sympathies of her audience.

KENNEDY, JOHN A., a prominent official of New York City, collector of assessments, and, for ten years, Superintendent of Police, born in Baltimore, Md., August 9, 1803; died in New York City, June 20, 1873. His father was from the north of Ireland, and had been for many years a teacher in Baltimore. He received a good education, and came to New York while still a young man. In that city he established with his brother a store for the sale of painters' supplies, and, though not very successful in mercantile pursuits, he entered with great zeal into politics, and was an active member of the Tammany Society. In 1849 he was appointed a Commissioner of Emigration, and, immediately upon assuming his official duties, he made war upon the hordes of swindlers who had long preyed upon the immigrants, who, in those days, made the transatlantic voyage almost exclusively in sailing-vessels. In 1854 he was elected a member of the Common Council on the Free-Soil ticket, having become identified with that party after the division between the "Barnburners" and the "Hunkers." Subsequently, he was appointed superintendent of Castle Garden, when the city acquired that historic place for the reception of immigrants. He served in this capacity during several years, and meanwhile continued energetically his efforts for the protection of immigrants against swindlers. In 1858 he was one of twelve supervisors elected on a general ticket under the charter of 1857. Serving in this position during 1858 and 1859, he resigned in 1860 to become Superintendent of the Metropolitan Police, in place of Amos Pillsbury, and he was the third and last superintendent of that body, which was superseded by the present Municipal Police. Assuming the duties of his new and important position, on June 1, 1860, he became very conspicuous by reason of his combativeness and strong self-will. During the draft riots he was severely beaten by a mob, while he was protecting the office of the provost-marshal, at Third Avenue and Forty-sixth Street, on the morning of July 14, 1863. He had marched to the office of the provost-marshal at the head of a body of officers, and, while stationing his men, he became separated

from them, and found himself suddenly surrounded by infuriated rioters, who dragged him into a vacant lot and beat and kicked him most brutally. Before he could be rescued by his officers, he had been so badly injured that he was utterly incapacitated for active duty for several months, during which Thomas O. Acton, then president of the Board of Police Commissioners, assumed the duties of acting superintendent. During his maltreatment by the mob, Superintendent Kennedy received a severe lacerated wound of the leg, which crippled him permanently, and, never healing, was a constant source of pain and discomfort. Upon returning to duty he was appointed Provost-Marshal of New York City, as well as superintendent of police, and he continued to serve in this double capacity during the civil war. Among the liquor-dealers he acquired many bitter enemies through his zealous efforts to enforce the Metropolitan Excise Law in its most restrictive provisions. While thus engaged, he was served with a remarkably large number of injunctions restraining him from interference with liquor-dealers who had failed to comply with the law as construed by himself and the commissioners of excise. In 1867, however, the Court of Appeals having declared the excise law constitutional, he continued its enforcement with renewed rigor, and, it is said, could seldom be prevailed upon to listen to complaints of any kind made by liquor-dealers against officers of the Metropolitan Police. He was, however, a strict disciplinarian, though he was always ready to sustain his officers with all his power against injustices. His strong self-will and persistency in interpreting criminal laws according to his own ideas involved him in many disputes with judges and police justices, but, with the powerful influence wielded by him, he almost invariably succeeded in overcoming all obstacles to his plans. Upon the repeal of the Metropolitan Police Law, he resigned his position on April 11, 1870, after having served for ten years, and was succeeded, on the 16th of the same month, by John Jourdan, deceased, who was the first superintendent of the present Municipal Police. Upon his retirement from the Police Department, ex-Superintendent Kennedy was chosen president of the Avenue C Railroad Company, and remained in that position for about two years, when he was appointed collector of assessments, in which capacity he served till his death. His death—from heart-disease—was believed to have been indirectly the result of the terrible injuries he received from the mob ten years before.

KENTUCKY. The session of the Legislature of Kentucky which began in December, 1872, continued, after a recess for the Christmas holidays, until the 22d of April. It was greatly prolonged by the consideration of the code of revised statutes which had been submitted by the commissioners appointed for that purpose. It was ultimately adopted.

The question of removing the State capital to Louisville was agitated, and majority and minority reports were made on the subject by members of a special committee to which it was referred, but no action was taken.

On the 22d of January, Willis B. Macher was elected to the United States Senate, to fill the vacancy occasioned by the death of Hon. Garrett Davis, by a vote of 104 to 18 for R. T. Baker, on a joint ballot of the two Houses.

The election of Representatives to Congress in 1875, and thereafter, was fixed to be held on the first Monday in August.

A movement looking to the calling of a convention for the revision of the constitution was inaugurated, but met with little encouragement, and was abandoned. A resolution was also offered, but never acted upon, directing an inquiry into the expediency of the State assuming the business of fire, marine, and life insurance for her citizens.

The question of providing greater accommodations for the insane occupied considerable attention and resulted in the passage of an act providing for a third and fourth lunatic asylum. The third asylum is to be a new institution, the location of which is to be determined by commissioners. Buildings already in existence at the capital were designated for the use of the fourth, and orders were given in September by the Governor for the transfer to these of such insane paupers as were confined in the jails of the State.

An act was passed during the session providing for a geological and mineralogical survey of the State. It required the Governor to appoint a State geologist with two assistants "to commence and carry on, with as much expedition and dispatch as may be consistent with minuteness and accuracy, a thorough geological, mineralogical, and chemical survey of this State, with a view to determine the order and comparative magnitude of the several strata or geological formations of this State, and to discover and examine all beds or deposits of ore, coal, flora, and such other mineral substances as may be useful or valuable, and to analyze the same, and to perform such other duties as may be necessary to make a full and complete geological, mineralogical, and chemical survey of this State." The geologist and his assistants are required to make thorough exploration in each county of the State beginning with the mineral regions, and on the 1st of December of each year to make a report of the progress of said survey, accompanied with such maps, drawings, and specimens, as may be necessary and proper to exemplify and elucidate the same, to the Governor, who shall lay such report before the General Assembly."

The following resolutions received the approval of the Senate by a vote of 21 to 9:

Whereas, The recent Congress of the United States passed an act increasing the salary of the President of the United States to the sum of fifty thousand

dollars per annum, and that of the members of Congress to seven thousand five hundred dollars; and said act, being retrospective in its operations, provides for the payment of said increased salary to members of Congress for the whole term then about to expire, thereby taking out of the Treasury of the United States, and appropriating to their own use, in violation of good faith, and contrary to the principles of justice and equity, five thousand dollars each: therefore,—

Resolved by the General Assembly of the Commonwealth of Kentucky, That the action of the Congress of the United States, in enacting said law, is a flagrant violation of the will of the people, as repeatedly expressed by them in conventions and through the public press, the people being unalterably in favor of retrenchment and reform, and against such reckless and needless expenditure of the public money.

Resolved, That the conduct of the members of Congress who voted for and sanctioned the passage of said act is reprehensible in the highest degree, and meets with the unqualified disapproval and condemnation of this General Assembly, and should be rebuked by every patriot in the land, irrespective of party.

Resolved, That we commend the course of the members of the Senate and House of Representatives who refused to vote for or sanction such iniquitous legislation.

Resolved, That we condemn, in unmeasured terms extravagance and reckless legislation, whether it occurs in the State or national Government, and recommend that those who participate therein should be held to strict accountability.

The following "act to amend the revenue laws," which was passed, sets forth pretty clearly the financial condition of the State, and its virtual freedom from indebtedness:

Whereas, The Auditor's report shows that the total redeemable bonded indebtedness of the State, on the 10th day of October, 1873, was only \$966,394, of which sum \$689,394 is either due, or is falling due, during the year 1873, including the \$200,000 of 8 per cent. bonds, which are redeemable on the 13th day of February, 1873, at the pleasure of the State; and whereas, the same report shows that, at the same date, there was in the Treasury to the credit of the Sinking Fund, and loaned to banks on short time the sum of \$1,691,991.80, with which to pay said bonded indebtedness of \$966,000,394; and whereas, it appears from the report of the Auditor that the present resources of the revenue proper are not adequate to pay the necessary current expenses of the State; now, for the purpose of increasing said resources, and at the same time providing amply and securely for the payment of the entire redeemable bonded indebtedness of the State set forth above—

SECTION 1. Be it enacted by the General Assembly of the Commonwealth of Kentucky, That the Commissioners of the Sinking Fund are authorized and directed to invest so much of the means at their command, and under their control, in five-twenty gold-bearing interest bonds of the United States, as may be amply and fully sufficient to redeem the whole amount of the redeemable bonded indebtedness of the State, with the interest thereon, not exceeding \$1,000,000 in amount, and not less than \$350,000; which said bonds, when purchased, shall be held by said commissioners solely and exclusively for the purpose for which they are directed to be purchased; and they shall not be sold or otherwise used or disposed of than herein provided. The said commissioners may, however, in their discretion, for purposes of safety and convenience, deposit said bonds in any one of the chartered banks of this State, or in the Bank of America in the city of New York.

Sec. 2. That it shall be the duty of the Commissioners of the Sinking Fund, when they have fully complied with and executed the first section of this act, to notify the Auditor of Public Accounts of that fact, and direct him to transfer to the Revenue Department all the remaining resources of the Sinking Fund, except so much thereof as may be necessary to pay the interest on the school-debt for that year, if there be any such interest due or becoming due; and it shall be the duty of the Auditor, upon receiving said notice, to make the required transfer, and he shall, during each succeeding year thereafter, continue to pay all of the present resources of the Sinking Fund which may be collected, from time to time, into the Revenue Department, except the five cents on each \$100 of the taxable property of the State now collected by law for Sinking-Fund purposes. This last amount shall continue to be paid into the Treasury to the credit of the Sinking Fund as now required by law, and shall be kept as a sacred fund to pay the accruing interest on the school-debt.

An act was passed providing that "if any person or persons shall, by means of violence to person, family, or property, prevent, hinder, control, or intimidate, or shall by such means attempt to prevent, hinder, control, or intimidate any person from exercising or in exercising the right of suffrage to whom such right is secured by law, or shall on account of any vote that a voter may give at any election in this Commonwealth, use any violence to such voter's person, family, or property, he or they shall be guilty of a misdemeanor, and on conviction thereof be fined not less than \$100, or imprisoned not less than one month, nor more than one year, or both so fined and imprisoned, at the discretion of the jury."

Perhaps the most important act of the session was one for the suppression of lawlessness. The Governor had urged upon the Legislature the necessity of taking some action in this matter, and public meetings had been held in Franklin County and elsewhere, demanding that something be done. At one of these meetings the following resolutions were adopted, showing the condition of things in and about Franklin County, and the spirit displayed by the better portion of the citizens:

Whereas, A spirit of outlawry has been rife in this and several adjoining counties for many months, manifesting itself in numerous and bloody deeds of violence, which have created a sense of general insecurity among peaceable and law-abiding citizens, brought the administration of law into contempt, entailed heavy losses upon almost every material interest of the county, and cast great reproach upon the community and State; therefore, we, a large portion of the law-respecting and determined to be law-supporting citizens, of Franklin County, in public meeting assembled, do hereby express our utter detestation of all such brutal acts, and their cowardly perpetrations; and—

1. *Resolved*, That these and all similar outrages upon law, individuals, and society, must and shall at once cease in this county, at least, and to that end we hereby pledge ourselves, individually and collectively, both in our means, and, if necessary, in our persons, for their suppression.

2. We call upon all officers of the law, city, county, and State, for the exercise of increased vigilance for the discovery and arrest of such offenders, and greater determination in the execution of the laws against outlawry and crime of every character,

promising them the active cooperation of all good citizens in their efforts to maintain law and order in every part of the county.

3. That the Legislature now in session is respectfully, but earnestly, requested to promptly enact into law the bill for the suppression of organized crime in the Commonwealth, lately reported to the House of Representatives by the Judiciary Committee of that body, and again referred to the Committee on Revised Statutes, with an additional section, investing the Governor with increased discretionary powers for enforcing the provisions of said act, as also all other penal and criminal laws of the State, whenever in his judgment the exercise of such powers becomes necessary.

The act passed provides for the punishment by severe penalties of any person who shall "send, circulate, exhibit, or put up any threatening notice or letter, signed with such person's own or another's name, or anonymously;" also any two or more persons who shall "confederate, or band themselves together, for the purpose of intimidating, alarming, or disturbing any person or persons, or to do any unlawful act;" or any two or more persons who shall "unlawfully confederate, or band together, and go forth armed and disguised." Special punishment is provided where any injury shall result to person or property by reason of any of these unlawful acts. The Governor is empowered to offer rewards from \$100 to \$500 for the apprehension and conviction of offenders.

Governor Leslie, in his message to the Legislature in December, declared that lawlessness still prevailed in certain quarters, and recommended that "the law shall provide that if in any county or district where this character of disorders shall prevail it shall be found that the people, either from complicity or sympathy with the wrong-doers, or from culpable indifference and disregard of their duty as citizens, shall make no earnest effort to detect and bring the perpetrators of crime in their midst to just punishment, then shall the Executive be empowered, without waiting for an application from the local authorities, to appoint a commissioner of inquiry, who, after being duly commissioned, and having taken an oath for the faithful performance of his duties, shall proceed to the county, district or neighborhood, where the disorder prevails, and hold an examining court, for the purposes of inquiring into the alleged offenses and securing the arrest of the guilty parties. And, that he may be fully protected while engaged in the discharge of his duties, as well as to secure the execution of his orders, he should be furnished with a sufficient guard of select men, vested with constabulary power, to be appointed and placed under his control by the Governor, with authority to increase the number should he deem it necessary. He should be invested, to the extent of his commission, with the same power and jurisdiction possessed by any other court of inquiry in the State, and also with the inquisitorial powers of a grand-jury. He should be empowered to direct and cause to

be arrested and brought before him all persons suspected of offenses to which his jurisdiction extends, hear the evidence in the case, and if, in his judgment, the proof establishes the guilt of any of the parties charged, or is sufficiently strong that a trial should be had in the Circuit Court, he shall commit to jail or hold to bail such guilty parties for trial in the Circuit Court of the county."

There was a convention of the Democratic party at Frankfort, on the 1st of May, the main purpose of which seems to have been to effect a reorganization of the party machinery, and to set forth the principles on which it acts. The resolutions were as follows:

Resolved, That the Federal Union was formed by and is composed of equal sovereign States, and its Government possesses none but delegated powers, all other powers not prohibited to the States being reserved by the several States respectively, and all attempts to exercise any power in violation of these fundamental principles are subversive of the Constitution, in direct conflict with the rights of the State, and destructive of the interests of the people.

Resolved, That while we earnestly maintain that the Federal Government should be sedulously sustained in the proper exercise of every power delegated to it in the Constitution, carefully and strictly construed, as the established means of securing justice and harmony among the several States, the chosen medium of communication between them and other nations, and to perfect means of defense against foreign aggression, we hold it to be essential to the preservation of the liberties of the citizen that the several States shall be maintained in all their rights, dignity, and equality, as the most competent and reliable administrators of their own domestic concerns, and the surest bulwarks against anti-republican tendencies.

Resolved, That every attempt on the part of the Federal Government to exercise a power not delegated to it in the Constitution, or to exercise a delegated power in a manner not therein prescribed, is an act of usurpation demanding the instant and unqualified condemnation of a people jealous of their liberties, and especially that every unconstitutional interference by the General Government with the local affairs of any State to any extent or under any pretense whatever should be at once repudiated and condemned by all classes in every section of the Union, as all such acts tend directly to the destruction of our Federal system and the consolidation of all power in a centralized despotism; and as a most alarming instance in point, we denounce, as we feel that all good men should everywhere, the atrocious conduct of the present Administration toward the sovereign State of Louisiana.

Resolved, That the only power delegated to Congress to impose laws upon the people consists in the right to collect revenue, for the purpose of paying the current expenses of the Government, and for the payment of the Federal debt; and all other duties imposed for the purpose of protecting one class of labor at the expense of another, are in violation of the Federal compact, and subversive of the rights of the people.

Resolved, That justice to the people as well as the dictates of common honesty demands the most rigid economy in the administration of both the State and the Federal Government, the speedy and the impartial arrangement of all abuses of public trust of whatever character or description, both before the established tribunal of justice and the great bar of popular judgment; that a zealous care of the elective franchise recognized by the founders of our Government as the exclusive property of the several States, and the palladium of their independence, is

essential to the perpetuity of our republican institutions in the preservation of civil liberty itself requires at all times and under all circumstances the absolute subordination of the military to the civil authority.

Resolved, Referring to the spirit of generosity and sympathy which the Democracy has uniformly exhibited to our citizens of foreign birth as a guarantee of our sincerity, we will in the future, as we have always done in the past, extend a cordial and hospitable welcome to the honest, industrious, intelligent immigrant, not only to the rich fields of enterprise present in our State, but to a just participation in our rights as freemen.

Resolved, That the Democracy of Kentucky, forgetting all past political differences, and looking to the best interests of the whole country, cordially invite all who are opposed to corruption and consolidation to cooperate with them.

There were no important elections in the State this year. The Legislature reassembled on the 2d of December, but no measures of importance had received its sanction before the close of the year.

KHIVA, one of the khanates of Independent Toorkistan, attracted in 1873 the attention of the civilized world by the war between its ruler and Russia. It was bounded, before the war with Russia, north by the Sea of Aral and Russia, east by Russia and Bokhara, south by the territory of the Toorkomans, many tribes of which are nominally tributary to the Khan. Its frontier in the south and the west is entirely undefined, and the estimates of the area therefore widely differ, according to the greater or smaller extent of the Toorkoman territory which is included in the dominions of the Khan. While formerly as many as 150,000 square miles were set down for Khiva, recent geographers give it no more than 54,000. The population was estimated by Balbi at 800,000, by Fraser at 1,500,000, by Abbott at 2,600,000, while Vambéry gives no estimate. According to Russian accounts, the lists of population found in the archives of the khanate, showed the settled population to live in 60,000 homes, and to amount to about 300,000 persons. The nomad population lived in about 12,000 *kibitkas* (tents of Khirgeez), and 20,000 tents of Karapalkacs; in all, about 120,000 persons, giving an aggregate population of the khanate of about 460,000. Deducting the population of the territory ceded to Russia, the aggregate population of the khanate after the war is believed not to exceed 280,000 persons. The chief portion of the country is an oasis, on both sides of the Amu Darya, having a length of about 280 miles, and an area of only about 2,100 square miles. It is made fertile and inhabitable by a number of canals proceeding from the Amn. As far as the country is irrigated by canals, it produces corn, rice, silk, cotton, fruit, wine, and melons. The nomads in the steppe breed cattle, excellent horses, and many camels. The bulk of the native population consists of Tadjiks, here called Sarts, who constitute the laboring class, while the Usbeks are the dominant race. In the towns many Jews are found; in the steppes, Toorkomans, Khirgeez, and Karakalpac. With the excep-

tion of the Jews, they are all Soonnite Mohammedans, and therefore enemies of the Shiite Persians, of whom as many as 40,000 were held as slaves, the city of Khiva being the great slave-mart of Independent Tartary. Shawls and other fabrics for export are woven by the women. Caravans annually convey agricultural produce, silk, cotton, etc., to Orenburg, Astrakhan, and Cabool, to be exchanged for Russian and Western goods. The Khan is despotic; his title is Taksir-Khan; he receives two tomans of tax annually from each family, thereby a revenue of over \$1,250,000 per annum, in addition to the profits of traffic in slaves, and imports on caravans. His standing army numbers from 15,000 to 30,000 horsemen. The capital, Khiva, is situated on a canal connected with the Amu, on a cultivated plain, and has some mosques and several Mohammedan schools, one founded in 1843 by Mehemmed Emir Khan, with accommodations for 260 students. It is surrounded by walls, and has a citadel, in which the Khan resides. Its population is from 13,000 to 20,000. The most important of the other places are, New Urgentsh, 23 miles northeast of Khiva, with about 20,000 inhabitants, the chief seat of the industry; and Hasarasp, 46 miles east of Khiva, celebrated for its cloths. Old Urgentah, the former capital of the khanate, is now a village, with but few remains of its former splendor. The present Khan of Khiva, Seid Mehemmed Rakhim, is only twenty-six years old, and is the tenth of his dynasty.

As the negotiations between the Khan and the Russian Government* led to no definite result, the preparations for a decisive campaign were, in the first months of the year 1873, completed as rapidly as possible. The expedition consisted of about 15,000 men, and was placed under the supreme command of General Kaufmann, the Governor-General of Russian Toorkistan. It advanced against Khiva in three different directions: an Orenburg corps from the north, a Caucasian corps from the Caspian Sea in the west, and a Toorkistan corps from the east, each corps numbering about 5,000 men.

The Orenburg corps, which was commanded by General Werewkin, left Orenburg, Orsk, and Uralsk, in the middle of February, and in the beginning of April concentrated at Embinsk, the military post at the upper Emba, a river falling into the northern part of the Caspian Sea. Marching southward from Fort Embinsk, it arrived on April 18th (new style 30th) at Isen Tehagyl, a place situated at the southern extremity of the Great Barszuki Desert, on the Tchernicher Bay (northwestern bank of the Sea of Aral. Here it halted for several days. It was supplied with provisions for eighty days.

The Caucasian corps consisted of a division starting from Krasnowodsk, under Colonel

Markosov, who in 1872 had explored the country between the Caspian Sea and Khiva; and a second one, under Colonel Lamakin, which started from the peninsula of Mangyshlak. Colonel Markosov had several encounters with the Teke-Toorkomanni, whose territory he had to cross, and advanced through the ancient, dried-up channel of the Amu Darya (Oxus) over Baurudgi as far as Igdy, from where he was to march over Dudur to Ismyshyr, which is only sixty versts (one verst=0.66 mile) distant from Khiva. In Igdy he found that the terrible heat and the waterless, sandy deserts would place insurmountable obstacles in his way, and he therefore returned to the Caspian Sea. The division of Colonel Lamakin was more successful. It left Kinderli Bay on April 14th (26th), reached on April 10th (May 1st) Bish-akty, where a redoubt was erected and a garrison of two companies of infantry stationed, and on May 1st (13th) arrived at Ilto-idalshe. From there it was to have marched to Aibugir, at the southern extremity of the bay of the same name (a southern, dried-up elongation of the Sea of Aral), but orders were received by General Werewkin to form a junction with him at Urgu, at the northern extremity of the Bay of Aibugir. Before they reached Urgu, they learned that General Werewkin had advanced from that place along the canal of Djana-Djap upon Khungrad in Khiva, where a part of the Khivan army was stationed. Colonel Lamakin therefore followed in forced marches the route taken by General Werewkin. The latter occupied Khungrad on May 20th, routed the Khivans, and advanced upon Khodjeili and New Urgentah. At a small distance from the Amu Darya a dense forest extends from Khungrad to Khodjeili. Here the Khivans on the 24th, and again on the 26th, made several attacks upon detached portions of the Orenburg division; but every time they were speedily routed. On May 26th the connection between the troops of Colonel Lamakin and General Werewkin was completely established. On May 27th Khodjeili was occupied without any further resistance on the part of the Khivan troops, who fell back to Khiva. After resting two days, the Russians advanced against the towns of Mangyt and Kintjak. The advance upon Mangyt was desperately disputed by the Khivan cavalry, but without result. The town was occupied, and, as the inhabitants showed a hostile disposition, partly destroyed. The winter quarters of the Toorkoman Gomuts near Mangyt were burned down by order of General Werewkin. During the march to Kitai, which was made on the next day, the troops had again to repulse several attacks of the Khivan cavalry, which numbered about 10,000 men, but the inhabitants of Kitai, langi-laba, Gurlen, and Khatan, sent deputations to declare their submission. The failure of the Khivans to gain the least advantage over the Russians made a profound impression upon the Toorkomanian

* *See AMERICAN ANNUAL CYCLOPEDIA for 1873, article RUSSIA.*

Jomuts, part of whom began to disperse. During the following days the Russians marched through Kjatan and Kosh-Kupyra upon the capital, Khiva. The Khivans, and the Toorkomanni who had remained with them, attempted on June 8th another bold surprise; but it failed like the preceding ones. On June 9th the Russians arrived at the capital, where the greatest lawlessness and disorder prevailed, as the Khan had fled. General Werewkin ordered the city to be bombarded, when soon after he learned that the commander-in-chief, General Kaufmann, had likewise reached Khiva. He was directed by the latter to stop the bombardment as soon as the guns on the walls of the city would cease firing.

The Toorkistan corps, consisting of about 5,000 men, and commanded by Major-General Golovatshov, had started in the beginning of March in two columns. The one had been concentrated at Kasalinsk, on the Sir Darja; it marched under the command of Colonel Golor, and accompanied by the Grand-duke Nicholas Constantinovitch, up the Sir Darja to Perovski, and from there in a southwesterly direction, along the banks of the Djang Darja to Irkibai. Here they erected a fort and then advanced in a southeasterly direction to effect a junction with the other Toorkistan division. The latter marched from Tashkend, Khodjend, and Ura-Tube to Djisak on the river Kly, where the whole of the division was assembled on March 25th. From there it marched through the desert of Kisiikum, to the well Arystan-bel-Kuduk, when the commander-in-chief, General Kaufmann commanded to halt for a few days, in order to await the arrival of the column of Kasalinsk. In the latter place an ambassador of the Khan of Khiva had, in the mean while, arrived with the Russian captives. He was requested by General Kaufmann to come to his headquarters. When the Tashkend column arrived at Temir Kobuk, at the entrance of the desert of Kisiil Kum, 127 versts of Djisak, ambassadors of the Khan of Bokhara appeared, in order to assure the Russians that their ruler would assist them as much as was in his power. Special envoys of the Khans of Bokhara and Khokand joined the headquarters of General Kaufmann and accompanied him during the whole expedition. In consequence of the information received in Arystan-bel-Kuduk, the route of the march was changed, and the army advanced to Khala-ata. The new route was found to be not only more convenient, but also much shorter. On April 24th (May 6th) the union of the two armies took place at Khala-ata. On May 6th they started for Us-atshag, on the right bank of the Amu Darya, where they arrived on May 23d, after having routed on the day before a Khivan army on the Lake Sardaba-Kul. They then marched down the Amu as far as Theik-aryk, where the Khivan troops, who had been dispersed at the Lake Sardaba-Kul, had occupied a fortified position and fired upon

the Russians. Their fire was soon silenced, and on May 30th the Amu was crossed by the Russians. On June 4th they occupied Hasar-asp. Here an envoy of the Khan of Khiva appeared, to offer peace, and ask the Russians to arrest their advance. This was declined by General Kaufmann, who, without delay, advanced upon Khiva, which he reached on the 9th, simultaneously with the united Orenburg and Caucasian corps under General Werewkin.

On June 10th the Khivans began to reopen their fire upon the Orenburg and Caucasian troops. General Werewkin who on the day before had been wounded, therefore, gave orders to commence hostilities, and soon after captured the walls and the gates. At the same time the Toorkistan troops advanced against the eastern part of the town, when the highest dignitaries of the town appeared before General Kaufmann and offered unconditional submission. At two o'clock in the afternoon, parts of the Toorkistan, Orenburg, and Caucasian troops, with flying banners, entered the city, and, on the open place before the palace of the Khan, General Kaufmann congratulated the troops upon their heroic conduct, and the grand success of the expedition. In a few days, quiet and order were completely restored, and the people returned to their customary avocations. To the Khan Seid Mehemed Rakhim, who, with the heads of the war-party, had fled to the Jomuts, General Kaufmann addressed a letter, asking him to return. On the following evening, the young prince appeared in the headquarters of the Governor of Toorkistan, who received him with all the honors due to his rank.

The Toorkoman tribes who had aided the Khan, and had in all about 30,000 men in arms, were ordered to pay a part of the war indemnification, and, when they refused to comply, an expedition was undertaken against them in July, which was entirely successful. The native population of Khiva, which had often suffered from the rapacity of the Toorkomans, appeared to be well satisfied with the result of the expedition. The Orenburg and Caucasian troops were then ordered to return.

On July 25th the Khan of Khiva published a manifesto, setting at liberty all slaves in the khanate, and abolishing slavery forever.

In August a treaty of peace was concluded between the Khan and General von Kaufmann. The treaty sets out the frontier between the Russian and Khivese territories as follows: From Kukertli to the point where the most westerly branch of the Amu Darya leaves the main stream, that river is to form the frontier. Farther down the frontier runs along the most westerly branch of the river to the shore of Sea of Aral, then proceeds along the shore to the Promontory of Urgu, and from the latter point follows the slope of the Ust-Urt plateau along the so-called ancient bed of the Amu. All the land on the right bank of the Amu, with all inhabitants, both sedentary and no-

made, are ceded by the Khan to Russia. In the event of the Emperor of Russia surrendering a portion of this territory on the right bank of the Amu to the Khan of Bokhara, the Khan of Khiva will acknowledge the latter sovereign as the legitimate proprietor of the districts thus ceded. Russian vessels are to have the exclusive right of free navigation on the Amu. The Russians are, besides, to have the right to construct any harbors, piers, factories, and storehouses, on the left bank of the Amu, where they may also establish farms and carry on agriculture. The manifesto published on July 25th by Seid Mehmed Rakhim Bahadur Khan, setting at liberty all slaves in the khanate, and abolishing forever slavery and the traffic in human beings, remains in full force, the Khan's government expressly engaging with all its might to compel the strict and conscientious fulfillment of the provisions here detailed. A fine of 2,200,000 rubles is imposed upon the Khivan government to cover the expenses of the Russian exchequer in the last war. Considering, however, the scarcity of ready money in the khanate, and more especially in the coffers of the government—considering also the difficulty the government would have in paying the fine within a brief period—the government is allowed the option to pay the sum exact in installments, with 5 per cent. interest upon the remainder. In the first two years the Khivan government is to pay 100,000 rubles annually; in the second two years, 125,000 rubles annually; in the third two years, 175,000 rubles annually; in the year 1881—that is nine years hence—200,000 rubles; and every succeeding year, till the final liquidation of the debt, 200,000 rubles at the very least. To facilitate the payment of the first installment, the Khan will be allowed to levy this year's taxes on the inhabitants of the right bank of the Amu. After the payment of 200,000 rubles on November 18, 1882, there will still be a remainder of 70,054 rubles to be settled by the payment of 78,557 rubles on November 13, 1883. Should the Khan's government wish to shorten the term of payment, it will enjoy the right of making the annual installments greater than fixed.

The Russian Government subsequently gave the ceded territory to the Khan of Bokhara.

The Toorkoman tribes, in the latter months of the year, continued to harass both the Khan of Khiva and the Russians. On September 24th 800 Cossacks were dispatched from Fort Petro Alexandrovitch against the Tekinsens, and on the 26th, after a forced march of 200 versts, they overtook the Tekinsens and completely annihilated them, only eight of the tribe succeeding in recrossing the Amu Darya.

KNIGHT, CHARLES, a celebrated English author and publisher, born at Windsor, Eng., 1791; died at Addlestone, Surrey, March 9, 1873. His father was a bookseller, and the son early went into partnership with him,

establishing in 1811 the *Windsor and Eton Express*, which he continued to edit until 1827, at the same time publishing *Knight's Quarterly Magazine*, which had a corps of brilliant contributors, then in the beginning of their literary career. Among these were Macaulay, Mackintosh, Sydney Smith, and Sir Henry Holland. In connection with Mr. Locker, Commissioner of Greenwich Hospital, he edited the *Plain Englishman*, in 1820, and in 1822 removed to Pall Mall, East London, where he published several important works, among which were Milton's "Christian Doctrine," in Latin and English, edited by Dr. Sumner, Bishop of Winchester, and Horace Walpole's "Letters to Lord Hertford." In 1827 he became the editor and publisher of several of the works of the Useful Knowledge Society, the "British Almanac," "Companion to the Almanac," and the "Library of Entertaining Knowledge." In 1832 he commenced the editorship and publication of the *Penny Magazine*, which he continued for eleven years; and in 1835 that of the "Penny Cyclopædia," a work in the course of which £40,000 were expended by him for original contributions. Having to struggle against the heavy drawback of the paper duty, this work, though largely circulated, involved severe pecuniary loss. This led to his publication of two pamphlets, "The Struggles of a Book against Excessive Taxation," and "The Case of the Authors as regards the Paper Duty." From 1838 to 1841 he issued a "Pictorial History of England," "Pictorial Bible," and a "Pictorial Shakespeare." The public are greatly indebted to Mr. Knight for his assistance in obtaining the removal of the oppressive duty on paper. Another of his books, "Once upon a Time," published in 1853, consists of a collection of papers, many of which were contributions to various periodicals; and "Knowledge is Power," published in 1855, is a reissue, with large additions, of two small volumes—"Results of Machinery," and "Rights of Industry," which had a large circulation at a time when a spirit hostile to scientific progress and to the proper union of capital and labor, was too common among the producing classes. This indefatigable author also edited the "English Cyclopædia," and was for seven years engaged on his "Popular History of England," completed in 1862. Repeated editions of both have since been issued. His "Passages of a Working Life during Half a Century," 3 vols., published respectively in 1863, 1864, and 1865, is a charming autobiography, referring mostly to literary and political characters who had been associated with him, more or less, through life. Mr. Knight also compiled "Half Hours with the Best Authors," 1847-'48, "Half Hours of English History," 1858, and, in 1866, "Half Hours with the Best Letter-Writers." His services to popular literature were recognized in his declining years by an annual pension of \$1,000 from the civil list.

L

LA BORDE, MAXIMILIAN, M. D., LL. D., an eminent physician and scholar of South Carolina, born at Edgefield, S. C., in 1804; died in Columbia, S. C., November 6, 1873. He was of French extraction, his father having been a native of Bordeaux. He received his early training at Edgefield, and graduated from South Carolina College, Columbia, in 1820. He gave his attention at first to the study of law, but, after being admitted to the bar, commenced the study of medicine, and graduated M. D. from the South Carolina Medical College in 1826. He practised his profession in his native parish for thirteen years, being several times during that period a representative of Edgefield District in the State Legislature, and in 1836-'38 editor of the *Edgefield Advertiser*. In 1838 he was elected Secretary of State. In 1842 he was chosen Professor of Logic and Belles-Lettres in South Carolina College, and in 1845 transferred to the chair of Metaphysics. His lectures and teachings on this subject were so able as to attract great attention. In 1855 Prof. La Borde published a work on physiology, which is used as a text-book in Southern colleges and literary institutions, and is much esteemed. In 1859 he published a "History of the College of South Carolina, with Sketches of its Presidents and Professors," a work on which he had been long engaged. He was also a frequent contributor to the *Southern Quarterly Review*, and other literary and scientific periodicals. He retained his professorship till his death.

LANDSEER, Sir EDWIN, R. A., an eminent English painter, born in London, in 1802; died in that city, October 1, 1873. He was the youngest son of the late John Landseer, A. R. A., one of the most eminent engravers of his time. When Edwin was a child, his father was in the habit of taking him out to Hampstead Heath, to accustom him to sketch animals from life. He became a student of the Academy in 1816, and, the same year, exhibited some drawings and sketches, which attracted attention, and gave great promise of future excellence. In 1819, his "Dogs Fighting" was exhibited, and brought him very favorably before the public. His "Dogs of St. Gothard," painted the same year, was very popular. For more than forty years, every London exhibition witnessed his success. His greatest triumphs were won in the painting of dogs, deer, and lions, though his horses and cattle were in some respects equal to those of any animal-painter of modern times. He was never successful in painting the human face, though his great power in his pictures of animals lay in the humanity that he infused into their every look and act. Critics have indeed complained that he made his brutes too human—that they

were really only men and women in animal guise—caricatures of beasts, which had the human nature but slightly veiled in the animal shape and form. Be this as it may, his animals, which in form and posture, in excellent drawing, good color, and admirably-rendered texture of hide, or wool, or plumage, equal to those of any other animal-painter of modern times, differ from all others in the higher character of their expression. As one critic puts it, "his animals think, reason, and talk; those of others only act instinctively." In his later years, Sir Edwin attempted large drawings in chalk, which were very popular; he also essayed his hand in sculpture, the "Stag at Bay," and the four lions in bronze, for the Nelson column in Trafalgar Square, being modeled by him. It is generally admitted, however, that these attempts in the sculptor's art were failures. In the latter years of his life, he had done little to maintain his great reputation; the hand before so skillful seemed to have lost its cunning, and he will be remembered rather by the wonderful pictures of his prime than by those of his old age. We have not room to mention all even of his most celebrated pictures; but the Sheepshanks collection in the South Kensington Crystal Palace has "A Highland Breakfast;" "The Drover's Departure;" "The Dog and the Shadow;" "A Fireside Party;" "There's no Place like Home;" "The Two Dogs;" "The Old Shepherd's Chief Mourner" (a picture to which Ruskin has paid a most eloquent tribute of admiration); "A Jack in Office;" "Tethered Rams;" "Sancho Panza and Dapple;" "The Angler's Guard;" "Suspense;" "Comical Dogs;" "Young Roebuck and Rough Hounds;" "The Eagle's Nest;" "War;" and "Peace." Among those not in this collection, "Bolton Abbey in the Olden Time;" "Titania;" "Laying down the Law;" "The Return from Deer-Stalking;" "The Illicit Whiskey-Still;" "Highland Music;" "The Stag at Bay;" "The Random Shot;" "Night;" "Morning;" "The Children of the Mist;" "Saved;" "Highland Nurses;" "Deer-Stalking;" and "Flood in the Highlands," are the most famous. The last two were chalk-drawings, and were very popular, as were also "Doubtful Crumbs;" "A Kind Steer;" "Windsor Park;" "Squirrels cracking Nuts;" and "Man proposes, but God disposes." Sir Edwin was elected Royal Academician in 1827, and knighted in 1850. He was elected president of the Royal Academy in 1866, but refused to accept the honor. Nearly all his pictures have been engraved, some of them by his father, and others by his brother Thomas. He himself produced many etchings which rank among the best of their kind.

LEAVITT, Rev. JOSHUA, D. D., an American journalist and author, born in Heath, Franklin County, Mass., September, 1784; died in New York City, January 16, 1873. He received his early education in Franklin County, and graduated from Yale College in 1814. He then taught awhile, after which he studied law in Northampton, Mass., and opened an office in Putney, Vt. Soon afterward he went to New Haven and entered the Theological Seminary. Finishing his course, he settled in Stratford, Conn., where he remained in a very successful ministry for four years. In 1819, while a student of law in Heath, Mr. Leavitt organized one of the first Sabbath-schools in Western Massachusetts, embracing not only the children, but the entire congregation, all of whom were arranged in classes for religious study. An earnest revival resulted, and the school grew into one of the strongest churches in the region. He early became interested in the improvement of the public schools. Before he entered the Theological Seminary, he prepared a new reading-book, called "Easy Lessons in Reading," which met with an extensive sale. To this, he subsequently added other books, to furnish a complete course of readers; but these, though possessing much merit, encountered more competition than the "Easy Lessons," and were not as popular. Mr. Leavitt, through his writings in the press and in other ways, aided materially to elevate the character of the schools of the town and State. He was among the first to perceive the evils of intemperance, and exerted all his influence against it, and when the American Temperance Society was formed he became its first secretary, and was one of its traveling agents, spent several months in lecturing in New Haven, Northampton, in many places delivering the first temperance lecture the people there had ever heard. In 1828 he came to New York City as secretary of the American Seamen's Friend Society and editor of the *Sailor's Magazine*, and had ever since been engaged in editorial work. The society, under his management, became popular and useful. He established chapels in Canton, the Sandwich Islands, Havre, New Orleans, and other domestic and foreign ports. At this time, too, he aided in starting the first city temperance society, and became its first secretary. Perceiving early the advantage of having a combined hymn and tune book for use in revival and social meetings, nothing of the kind then existing, he, in company with an excellent young musician, prepared one, which was published under the name of "The Christian Lyre." This has always been considered one of the best of its kind. He became, in 1831, editor and proprietor of the *Evangelist*, which had been started a year before, during which time he had frequently assisted in its editorial work. Under his energetic management his paper soon became one of the most powerful in the land; it was the organ of the more lib-

eral religious movements, and was outspoken on the subjects of temperance and slavery. It early became noted for doctrinal discussions, in which Mr. Leavitt was completely at home, possessing a keen argumentative mind, and a perfect mastery of the contested points in theology. Mr. Leavitt bore a conspicuous part in the early antislavery conflict, his services going back to his Stratford pastorate, when he wrote ably on the subject in the *Christian Spectator*, and other periodicals. His denunciation of slavery during the time of the excitement attending the formation of the first abolition societies and the robbery of the mails at Charleston cost his paper its circulation in the South and a large portion in the North, and wellnigh compelled its suspension. To bring up its circulation again he undertook the difficult feat of reporting in full Finney's revival lectures, which, though not a short-hand reporter, he accomplished so successfully that his subscribers came back by hundreds, till his list reached 12,000. These reports were afterward published in book-form, and sold largely here, and to the extent of 100,000 copies in Great Britain. The financial crash of 1837 compelled him, while erecting a new building, to sell out the *Evangelist*. In 1833 he aided in organizing the New York Antislavery Society, and in 1837 he devoted his whole time to the cause, as editor of the *New York Emancipator*, which John O. Calhoun said was more dangerous to Southern interests than any thing else in the country. At this time troubles arose in the society, and, the old committee and officers having been turned out, the *Emancipator* was transferred to the Young Men's Antislavery Society, by which it was conducted for a year, then transferred again to Mr. Leavitt, who moved it to Boston. Mr. Leavitt early argued that the antislavery movement must become a political power, though in this he was strongly opposed by many leading abolitionists. In the convention which met at Albany in 1840, and organized the Liberal party, Mr. Leavitt took a prominent part, and afterward earnestly supported its measures in the *Emancipator*. He was also chairman of the National Committee from 1844 to 1847. In the latter year, perceiving the necessity of nominating a strong man for the presidency, he secured the adhesion of John P. Hale to the party, and aided in placing him at the head of the ticket. In 1848 Mr. Leavitt became office-editor of the *Independent*, which had just been started by three Congregational merchants, and was connected editorially with it until his death. On reaching the age of seventy, however, he relinquished the active duties of managing editor, and took a post of less labor, and during the last few years his waning health had prevented his performing much work. Dr. Leavitt had also been engaged for some time in preparing a history of the antislavery conflict, for which he was peculiarly fitted. This work his death leaves in a very

unfinished state, and it is doubtful if any one else can complete it. Mr. Leavitt was also a most earnest and powerful speaker, and to his speeches in the antislavery cause, of which he made many, are attributed largely the growth of the movement. In 1855 Wabash College conferred on him the honorary degree of D. D. Dr. Leavitt's correspondence with Cobden, and his "Memoir on Wheat," setting forth the unlimited capacity of our Western territory for the growth and exportation of wheat, were very instrumental in procuring the repeal of the English corn laws. During his visit to Europe he also became much interested in Sir Rowland Hill's system of cheap postage, which he advocated for adoption in this country, both through the newspapers and before the Congress committee. In 1847 he founded the Cheap Postage Society of Boston, and in 1848-'49 he labored in Washington in its behalf, for the establishment of a two-cent system. During several years past, Dr. Leavitt had devoted much time to the study of the subject of free trade, of which he was an earnest advocate. In 1869 he received a gold medal from the Cobden Society of England for an essay on our commercial relations with Great Britain, in which he took an advanced position in favor of free trade. Tall and commanding in figure, and striking in countenance, Dr. Leavitt's appearance was most imposing. In manner he was kind and gentle, and in thought and expression most pure and chaste.

LEROY DE SAINT-ARNAUD, LOUIS ADOLPHE, a French senator, jurist, and cabinet officer, brother of the late Marshal de Saint-Arnaud, born at Paris, in 1802; died in that city, June 21, 1878. He was educated in one of the lycées of Paris, studied law and was admitted to the bar of the Court Royal in 1825. He had attained, in twenty-six years of active practice, a high reputation as an advocate, when the connection of his brother, afterward Marshal de Saint-Arnaud, with the *coup d'état* in 1851, brought him into unexpected prominence. He was appointed, the same year, Mayor of the Twelfth Arrondissement of Paris, and in January, 1852, called by a decree of the Prince-President into the Council of State, in the Section of Finance. On the 26th of December, 1857, he was created a Senator of France, and subsequently elected a member of the Council-General of the Gironde. He had been an officer of the Legion of Honor since 1852, and commander in that order since 1859. In 1855 he collected and published, in two volumes 8vo, the private correspondence of his brother, under the title of "Letters of Marshal de Saint-Arnaud."

LIEBIG, BARON JUSTUS VON, Ph. D., an eminent chemist and scientist, born in Darmstadt, Germany, May 12, 1803; died in Munich, April 18, 1873. His early education was obtained in the gymnasium of his native town. After spending ten months in an apothecary's establishment at Heppenheim, he entered, in 1819, the

University of Bonn, and subsequently received a medical diploma at Erlangen. When in his nineteenth year he was enabled, by the assistance of the Grand-duke of Hesse-Darmstadt, to visit Paris, where he devoted two years to the study of chemistry. In 1824 he read before the French Institute a paper on the chemical composition of fulminates (or, to be more exact, on fulminic acid), which attracted the attention of Humboldt, and by his influence Liebig was appointed Adjunct Professor of Chemistry at Giessen. In 1826 he was made professor in the university, and soon established a laboratory for teaching practical chemistry, the first of the kind in Germany. Drs. Hofman, Will, and Fresenius, were his assistants in this laboratory, which became a resort for students from all parts of the world. In 1832 Liebig with his colleague Wöhler established the *Annalen der Pharmacie*, to which he continued for many years to contribute valuable papers. In 1838 he visited England, where he read a paper at a meeting of the British Association, and was requested by that body to draw up two reports—one on isomeric bodies, the other on organic chemistry. The response was made in 1840, in a work entitled "Chemistry in its Application to Agriculture and Physiology," wherein he developed the fundamental principles of chemistry and the laws of organic chemistry in particular in their application to agriculture and physiology; to the causes of fermentation, decay, and putrefaction; to the vinous and acetic fermentations, and to nitrification. He treated also of the conversion of woody fibre into coal; the nature of poisons, contagions and miasms, and the causes of their action on the living organism. To this work soon succeeded a volume of "Familiar Letters on Chemistry in its relation to Commerce, Physiology, and Agriculture," wherein the same investigations were continued. The effects of these letters in Germany, as stated by Liebig in his preface to the English edition of 1848, was "to lead to the establishment of new professorships in the Universities of Göttingen and Würzburg, for the express purpose of facilitating the application of chemical truths to the practical arts of life, and of following up the new line of investigation and research—the bearing of chemistry upon physiology, medicine, and agriculture—which may be said to be only just begun." In June, 1842, Liebig presented to the British Association a second report in response to their request in 1838. This was entitled "Animal Chemistry, or Chemistry in its Application to Physiology and Pathology," a work which, among other good results, led to a better appreciation of the nature and proper application of medicines and food. This particular subject continued to occupy his attention, and the results of his further investigations were embodied in two works, "The Motions of the Juices in the Animal Body," and "Researches on the Chemistry of Food." These works, which

proved of great practical utility, were followed by other important contributions to chemical knowledge, including a "Dictionary of Chemistry," 5 vols., which he compiled with the assistance of Wöhler, 1837-'51, and a supplement to the same, 1850-'52; "Manual of Pharmacy," 1839; "Manual for the Analysis of Organic Substances," 1838; "A Critical Examination of the processes and results of the Analysis of Organized Bodies," 1838; "Treatise on Organic Chemistry," 3 vols., 1841-'44; Introduction to the Study of Chemistry, 1843; "Letters on Modern Agriculture," published in 1859; "New Letters on Chemistry," 1852; and *The Natural Laws of Agriculture*, 1864. Of late years his name had been widely used, though possibly without his full sanction, in connection with different forms of "Beef Extract or Essence of Meat." He had given great attention to the question of utilizing sewage, and had written considerably on the subject. Many honors were conferred upon Liebig by learned societies, public institutions, and individuals. He was an officer of the Legion of Honor, a Foreign Associate of the French Academy of Science, a Corresponding Fellow of the Royal Society and of the Chemical Society, etc. He was created a baron in 1845, and professorships were offered him in several great cities; and he was appointed successor to Gmelin at Heidelberg in 1850, but he declined, and remained at Giessen until 1852, when he accepted the professorship of Chemistry at Munich and the presidency of the chemical laboratory. In 1860 he was appointed President of the Academy of Sciences of Munich as successor of Thiersch. He will justly rank as one of the great benefactors of the age, both for the practical knowledge he diffused as well as for the impulse he gave to scientific research.

LITERATURE AND LITERARY PROGRESS, 1873. Commercially considered, the year was not a prosperous season for literature. A diminished demand might be expected to limit the supply. Newspapers are almost a necessary of life, and magazines are among the inexpensive luxuries; but books—Bibles, books of devotion, and school-books, excepted—are among the things most easily dispensed with, when expenses must be cut down. During the earlier months the trade was comparatively dull, with intervals of hopeful activity; and the year ended under the cloud of financial revulsion, under which the circulation of subscription-books was almost suspended, the trade languished, and some intended publications were postponed to a more convenient season; and yet, according to the report of the Librarian of Congress, the number of publications, entered for copyright was 15,352, an increase of about ten per cent. on the entries of the preceding year. This includes not only books and pamphlets, but maps, prints, articles in periodicals, etc., and the aggregate gives no clew to the proportions of each—still less are we able from these reports to

distinguish between "books that are books" and "things in books' clothing." Nor shall we attempt in this review a rigid classification. While rendering due honor to the more noticeable works in higher departments of literature, it is of some interest to exhibit with considerable, though not exhaustive detail, the product of the craft of book-making—attempts as well as successes—books that exist for their uses, as well as works that are their own excuse for being.

SCIENCE AND PHILOSOPHY.—The public interest in science, both in its principles and in its applications, is seen in the fact that every reputable periodical, designed for general circulation, devotes more or less space to this class of subjects; and as the contents of magazines are to an increasing extent republished in book-form, every year sees the issue of a number of such works as "The Year-Book of Nature and Science," by Dr. J. O. Draper; "Annual Record of Science and Industry," by Spencer F. Baird; "The Science Record," by A. E. Beech; and others that may have escaped our notice. Some of these are very complete and well-digested summaries of the scientific progress of the preceding year. The like indication is made by such popular serial publications as "The International Scientific Series," and "Half-Hours with Modern Scientists," more particularly referred to in another place, as well as by the issue of a magazine, "The Popular Science Monthly," in which science is popularized, but not by means of a superficial treatment. A book like "Elements of Physical Manipulation," by E. C. Pickering, designed to help the amateur investigator in the use of apparatus and the making of experiments, supposes the existence in considerable numbers of the class of persons for whom it was written. Of contributions to science special mention is deserved by Prof. Josiah P. Cooke's "Chemical Physics," and "Prehistoric Races of the United States," by J. W. Foster. The philologist and the classical scholar unite in lamenting the loss of such a man as the late Prof. James Hadley, LL. D., of Yale, whose "Essays, Philological and Critical," are valuable both for their intrinsic worth and for what they reveal of the character of the author. "The Story of the Earth and Man," by J. W. Dawson, LL. D., is a popular exposition of the geological history of the earth, and argues against applying to the origin of man the doctrine of evolution. An elaborate and earnest, almost passionate, argument against that doctrine is contained in the second volume of the Rev. Dr. E. F. Burr's "Pater Mundi." A more dispassionate discussion, and more satisfactory to the lover of science and religion, is found in the volume entitled "Religion and Science: a Series of Sunday Lectures on * * * the Truths revealed in Nature and Scripture," by Joseph Le Conte, Professor of Geology in the University of California.

In Philosophy, Metaphysical and Moral, some important works have been published. Prof. Charles P. Krauth's edition of Berkeley's "Principles of Human Knowledge" is a remarkably good piece of editorial work, furnishing the student of the ideal theory a helpful introduction to it and a guide to an intelligent investigation. The second volume of Prof. Morris's Translation of Ueberweg's "History of Philosophy," with the supplement on "English and American Philosophy," by President Porter, of Yale College, and on "Italian Philosophy," by Prof. Vincenzo Botta, completes a work of great value, which was much needed. A book of very modest pretensions, but of marked originality and suggestiveness, is "An Outline Study of Man," by Mark Hopkins, D. D., LL. D. The "Outlines" are never obscure. The style, though condensed, is lucid and precise. The method of exposition is novel; the lectures, of which the book is a revised report, were successfully illustrated by the use of the black-board, an expedient for elucidating abstract topics which is made to some extent available in their printed form. The system of philosophy presented is original in its structure, comprising a view of man in his relations to the physical universe and to the animal creation, and in his own complex being. "Moral Philosophy," by A. P. Peabody, D. D., LL. D., is intended for an elementary text-book, but is so superior to most books of the kind that the more extended treatise which the author partly promises will be expected with pleasure. "Christian Ethics," by Dr. Adolf Wuttke, translated from the German by John P. Lacroix, with an Introduction by W. F. Warren, D. D., professor in Boston University, is at a far remove from light reading, and cannot be pronounced a model translation; but is worthy of examination. The titles which follow represent different departments of research and speculation, nearly or more remotely connected with the general subject under notice:

Key to the Birds of North America. By Elliot Cowes, M. D., U. S. A.

Foundations of Mathematical Science. By Charles Davies, LL. D.

The Nature and Utility of Mathematics. By the same.

A Contribution to the History of the Fresh-Water Algae of North America. By Horatio C. Wood, Jr., M. D.

New Theory of the Origin of Species. By B. G. Ferris.

Reptiles and Birds: a Popular Account of their Various Orders, with a Description of the Habits and Economy of the most interesting. From the French. Revised by Parker Gillmore, and illustrated.

The Birds of Florida: containing Original Descriptions of upward of Two Hundred and Fifty Species, with Notes upon their Habits, etc. By C. J. Maynard. With Five Plates drawn and colored from Nature. By Helen S. Farley.

Elements of Philosophy, comprising Ontology or General Metaphysics. By Rev. W. H. Hill, S. J. Modern Magic. By Prof. Schele de Vere.

Human Science. By Prof. O. S. Fowler.

The Unity of Natural Phenomena. A Popular

Introduction to the Study of the Forces of Nature. From the French of M. Emile Sargoy. With an Introduction and Notes by Thomas Freeman Moses, A. M., M. D.

Comets and Meteors. Their Phenomena in all Ages, their Mutual Relations, and the Theory of their Origin. By Daniel Kirkwood, LL. D.

The Spiritual Delusion; its Methods, Teachings, and Effects. The Philosophy and Phenomena critically examined. By Dyer D. Lum.

Inductive Inquiries in Philosophy, Ethics, and Ethnology. By A. H. Dana.

Prehistoric Man—Darwinism and Deity—The Mound-Builders. Three Essays read before the Cincinnati Literary Club. By Hon. Manning F. Force.

Present Status of Social Science. A Review, Historical and Critical, of the Progress of Thought in Social Philosophy. By Robert S. Hamilton.

An Introduction to the Study of Practical Histology. For Beginners in Microscopy. By James Tyson, M. D.

Phædo; or, The Immortality of the Soul, by Plato. Translated by C. S. Stanford.

Our Common Insects. A Popular Account of the more Common Insects of our Country, embracing chapters on Bees and their Parasites, Moths, Flies, Mosquitoes, Beetles, etc. Profusely illustrated. By A. S. Packard, Jr.

Notes of a Metallurgical Journey in Europe. With Twenty-two Illustrations. By John A. Church, Engineer of Mines.

The Birds of North America. Drawn and described by Theodore Jasper, M. D. In 86 monthly Parts. Parts I.-V.

Recent Exemplifications of False Philosophy. By Fitz Edward Hall, M. A.

POETRY.—The author who is probably recognized as our most representative poet, Mr. Longfellow, by the publication of his "Aftermath" reminds us that he feels himself to be nearing the end of a career that has been an honor to his country, and a blessing to the world. The consciousness imparts a character to some of these poems which makes them appeal to the reader's profound sympathies. Mr. William D. Howells, whose reputation as a writer of graceful prose has risen rapidly, has given us a volume of poems in which the grace of expression is in keeping with the subtle suggestiveness of his thought. In Will Carleton's "Farm Ballads," homely sense and pathos have quaint expression. Joachim Miller's "Songs from Sun-Lands" have the merits and defects of the "Songs from the Sierras," with which he first claimed the attention of the public—his exuberant fancy, his delight in all forms of natural beauty, and a rich, wild melody, having the power to charm us into momentary oblivion of his alternate negligences and perversities. There is not the proof of growth that was hoped for by his admirers. "Songs from the Southern Seas, and other Poems," by John Boyle O'Reilly, a new candidate for poetic honors, shows a strong vein of original power in certain directions, but with obvious limitations. Realistic, weird, strongly assailing the sensibility, there is a deficiency of the artistic in style and of the humorous in feeling. "The Last Poems of Alice and Phæbe Cary," edited by Mary Olemmer Ames, is a too close gleaning of a not very

abundant harvest. The best poems of the sisters Cary are well worthy of preservation, but they are not of sufficient excellence to bear being loaded down with many specimens of their inferior workmanship. "Lars, a Pastoral of Norway," by Bayard Taylor, is a poem marked by felicity of invention, fidelity of local coloring, and a tone of genuine and deep feeling. Of republications and collected works, "The Poems of Edmund O. Stedman" is a title which startles us with the unthought-of maturity of poetic standing which is implied in the issue of his "works." It is to be hoped that this publication is not a hint of a completing of his tasks as a poet. "Poems, by Charles Fenno Hoffman," have pleasant associations for those who remember his early popularity, but they will have little charm, it is to be feared, for a later generation. A considerable number of new aspirants for poetic honors have appeared:

Poems of Henry Timrod. With Memoirs. Edited by Paul H. Hayne.

The Electra of Sophocles. Translated by J. G. Brinklé.

The Stabat Mater, and other Hymns. Translated by John D. Van Buren.

Clarence. A Drama. By Denton J. Snyder.

The Temple Rebuilt. A Poem of Christian Faith. By Frederic R. Abbe.

The Year. A Collection of Poems. By D. C. Colesworthy.

Poems. By Clara Augusta.

Queen Loo, and Other Poems. By Gay Naramore.

Leisure Moments. Poems. By H. Helen Nunes.

The Mouth of Gold: Dramatic Scenes from the Life of Chrysostom. By Edwin Johnson.

Poems. By William J. Allinson.

Carmina Princetonia. Martin Dennis, F. B. Colton, J. H. Dulles, Students' Committee.

Carmina Yulensia. By J. O. Heald and S. T. Dutton.

The Knightly Heart, and Other Poems. By James Freeman Coleman.

Out of Sweet Solitude. Poems. By Eleanor C. Donnelly.

Faire-Mount. A Poem. By Henry Peterson.

Honey and Gall. Poems. By Francis S. Saltus.

Violet Lee, and Other Poems. By Mrs. S. L. Oberholtner.

Sounds from Secret Chambers. By Laura C. Redden (Howard Glyndon).

A Roman Lawyer in Jerusalem. By W. W. Story.

The Morning Star; or, Wayside Musings, and Other Poems. By Rev. William Newton.

Bianca Capello. A Tragedy in Five Acts. By Elizabeth C. Kinney.

Religious Poems. By the author of "Stepping Heavenward."

The Irish on the Prairies, and Other Poems. By Thomas Ambrose Butler.

Old-Time Pictures and Sheaves of Rhyme. By Benj. F. Taylor.

Asleep in the Sanctum, and Other Poems. By Alphonse A. Hopkins.

Home Scenes. Divine Songs, and Other Poems. By the Rev. C. E. Furman, A. M.

New Songs for Little People. By Mrs. Mary E. Anderson.

The Harvest-Moon, and Other Poems. By G. Nelson Brigham.

Rosemary Leaves. Poems. By Mrs. D. M. Jordan.

The Christmas-Tree, and other Poems. By F. M. Ray.

The Infant Harper, and Other Poems. By Mary J. Wines.

The Young Magdalen, and Other Poems. By Francis S. Smith.

ESSAYS AND CRITICISM.—Mr. Bryant's "Orations and Addresses" have the charm of an engaging style, a fortunate selection of subjects, and the interest which the author's personality communicates to all his utterances, whether in prose or in verse. We are at any time glad to hear what he has to say, and when he speaks of men who were his contemporaries in the culture of letters and of art, of Cooper, Halleck, Cole the painter, Gulian C. Verplanck, and of matters that concern the higher interests of society, the author and the subjects are appropriate to each other. Colonel T. W. Higginson, who so happily illustrates the "culture" for which he pleads, in his volume of essays entitled "Oldport Days," has proved himself a master in different styles of composition—the essay, the tale, and (by his translations from Petrarch) "the accomplishment of verse"—verse steeped in poetic sensibility, if not instinct with poetic genius. "The Rising Faith," by the Rev. O. A. Bartol, D. D., exhibits an Emersonian brilliancy of style, an unexpectedness of thought, the courage to say startling things without qualifying or excusing them, that keep the reader alert. His opinions are what are called "advanced," and his uncompromising utterance would not seem, at first view, the best method of commending them to favor. But boldness is sometimes the best policy. "Among the Isles of Shoals," by Celia Thaxter, is a volume that makes the reader not only see, but almost to feel the scenes described. It is a production that only a long familiarity with the islands could have inspired. The lady who writes under the pseudonym of "Gail Hamilton," wields a trenchant pen. "Twelve Miles from a Lemon," Sydney Smith's humorous description of the remoteness of his Yorkshire parsonage, is adopted by her as the title to a collection of essays on "country living," woman's rights and duties, and various other matters and things, on all of which she discourses with a degree of wit, shrewdness, sound common-sense, knowledge of and sympathy with human nature, not often so richly combined. She is sometimes amusingly and unwarrantably dogmatic, too often irreverent, but never dull. "South-Sea Idyls," by Charles Warren Stoddard, are too volatile, aimless, purposeless, to serve "for profit or delight." The author has attractive qualities, but his book disappoints. "Woman in American Society," by Abby Gould Woolson, treats a hackneyed subject with much freshness of thought and excellent sense. Under the title "The Liberal Education of Women; the Demand and the Method," Prof. James Orton, of Vassar College, has collected a series of papers by English and American writers, discussing the subject from different and opposite points of view. Some of these discussions are of marked abil-

ity, and all are valuable as contributions to the investigation of a subject on which the public attention is turned with increasing solicitude. The same subject, viewed from the stand-point of physiology, is ably treated in Dr. Edward H. Clarke's "Sex in Education." Mr. H. H. Furness's new Variorum Shakespeare, a work which puts him at the head of contemporary students of the great dramatist, is continued by the publication of "Macbeth." The Rev. Henry N. Hudson has published a third series of the plays for schools and families, with such selections and revisions as adapt them to free use. The process of selection and expurgation is conducted by him with great delicacy and tact, under the influence of a profound reverence for the poet. "I go a Fishing," by William O. Prime, like Walton's "Complete Angler," has an interest quite apart from its piscatory attributes. From a richly-cultured and widely-discursive mind, and a varied experience of life, the author converses with the reader—or, what is to the same purpose, with interlocutors who appear for the reader's help—on literary and religious, classic and romantic, home and foreign themes, always fresh and always interesting. Some of the following deserve notice, but must be passed with a bare mention:

- Essays and Sketches. By George B. Wood.
 Outlines of Men, Women, and Things. By Mary Clemmer Ames.
 About Men and Things; or, Papers from my Study Table-Drawer. By C. S. Henry, D. D.
 Hap-Hazard. By Kate Field.
 Play and Profit in my Garden. By Rev. E. P. Roe.
 The Ways of Women in their Physical, Moral, and Intellectual Relations. By a Medical Man.
 Womanhood: its Sanctities and Fidelities. By Isabella Beecher Hooker.
 Reviews and Essays on Art, Literature, and Science. By Almira Lincoln Phelps.
 Thoughts on Life and Character. By S. P. Herron.

HISTORY.—In this department of literature less has been produced of special note than usual. The historical works of William H. Prescott, which have, since his decease, apparently retired from the conspicuous place they had held unchallenged in the public attention, are coming forward for a renewed recognition of their great merits. Under the competent editorial supervision of Mr. John Foster Kirk, a new edition, with the author's last corrections, is in course of publication. The "History of the Reign of Ferdinand and Isabella," and "The History of the Conquest of Mexico," have appeared. "The Reformation," by George P. Fisher, D. D., Professor of Ecclesiastical History in Yale College, is a work which clothes, in an eminently readable style, the results of extensive research pursued under the guidance of a singularly impartial judgment. "The Treaty of Washington; its Negotiation, Execution, and the Discussions relating thereto," by Caleb Cushing, preserves important materials for history, with aids to a correct appreciation of them; but Mr.

Cushing was an advocate at Geneva, not an arbitrator, and his book has more of the forensic than of the judicial quality. The "Memorial Address on the Life and Character and Public Services of William H. Seward," by the Hon. Charles Francis Adams, is also a valuable contribution to the materials of history; and it has been the means, through the controversies occasioned by some passages in it, of calling out still other important disclosures of facts connected with the administration of the Government during the period of Mr. Seward's most important services to the nation. A new edition has been issued of "The Napoleon Dynasty, by the Berkeley Men," with an avowal of the authorship by C. Edwards Lester, and evidence that the work had the cordially expressed approbation of the late Emperor Napoleon III. How much of its former popularity arose from the mystery of the authorship, how much from the sympathy with the Napoleonic superstition that has been more or less widely diffused in this country, and how much from the real merits of the book, it might not be easy to determine. The subject is of less interest to the public at this time. Mr. John S. C. Abbott has added to his other works on the Bonaparte family, a "History of Napoleon III." A "History of Amherst College during the First Half-Century," by W. S. Tyler, has value not only to the graduates and patrons of the college, but to all who are not indifferent to the interests of higher education.

Antislavery Opinions before the Year 1800. Read before the Cincinnati Literary Club, by William Frederick Poole. To which is appended a Facsimile Reprint of Dr. George Buchanan's Oration on the Moral and Political Evil of Slavery, delivered at a Public Meeting of the Maryland Society for the Abolition of Slavery, Baltimore, July 4, 1791.

The Bonaparte-Patterson Marriage in 1803, and the Secret Correspondence on the Subject, never before made public. By W. T. R. Saffell.

Antiquities of the Southern Indians. By Charles C. Jones, Jr.

Memorials of the Massachusetts Society of the Cincinnati. Being a History of the Society from its Institution in 1783, by the Officers of the Army of the Revolution. Containing Proceedings and Biographies of its Members. Collected and edited by Francis S. Drake.

A History of Georgia, from its First Discovery by Europeans, to the Adoption of the Present Constitution in MDCCCXVIII. By Rev. William Bacon Stevens, M. D.

The Great Riots of New York—1712-1873. By J. T. Headley.

Old New-England Traits. By George Lunt.

A Brief History of Texas. By D. W. C. Baker.

History of Virginia. By Mary Tucker Magill.

An Historical Account of the Expedition against Sandusky, under Colonel William Crawford, in 1782; with Biographical Sketches, Personal Reminiscences, and Descriptions of Interesting Localities, etc. By C. W. Butterfield.

Narrative of the Mission to Russia, in 1866, of the Hon. Gustavus Vasa Fox, Assistant Secretary of the Navy. From the Journals and Notes of J. F. Loubat. Edited by John D. Champlin. With Illustrations.

The Isle of Shoals. An Historical Sketch. By John Scribner Jenness.

Memoirs of a Maryland Volunteer. War with Mexico, in the Years 1846-48. By John R. Kealey. Jerusalem, Ancient and Modern. By Rev. Israel P. Warren.

Our Naval School and Naval Officers: A Glance at the Condition of the French Navy prior to the late Franco-German War. Translated from the French of M. de Cricenoy, by Commander R. W. Meade, U. S. N.

Norwich Memorial. The Annals of Norwich, New London County, Connecticut, in the Great Rebellion of 1861-'66. By Malcom M. G. Dana.

Plymouth Church, Brooklyn. A History of this Church, from 1847-1873. With Portraits, Illustrations, and Plans.

The Early and Later History of Petroleum, with Authentic Facts in regard to its Development in Western Pennsylvania, the Oil-Fields of Europe and America, etc. By J. F. Henry.

BIOGRAPHY.—Of works under this head few can be named of a high order of merit. The "Life of Samuel J. May" is the record of a life memorable for goodness, so executed as truly to commemorate it. "Thoreau, the Poet-Naturalist," by William Ellery Channing, is nearly as eccentric in style as its subject was in his style of character and life. Each may have a small circle of admirers. "Threading my Way," is the appropriate title given by Robert Dale Owen to the first installment of an autobiography which will prove, if completed after this manner, exceedingly pleasant and instructive, not only in respect of the many points of interest of his own life, but of the many persons worth hearing about, of whom he has a store of entertaining anecdote. "Biographical Sketches of Graduates of the Academical Department of Harvard University in Cambridge, Mass.," by John Langdon Sibley, A. M., Librarian, of which one volume is issued, is a needed work, executed with care and good judgment. The "Life and Correspondence of Samuel Johnson, D. D., Missionary of the Church of England in Connecticut, and First President of King's College, New York," by E. Edwards Beardsley, D. D., throws light on colonial history from another point of view than that from which most histories of New England have been written. "The Life of John Warren, M. D., Surgeon-General during the War of the Revolution, first Professor of Anatomy and Surgery in Harvard College," etc., by Edward Warren, M. D., is a biography having an historical as well as personal interest. The following have also appeared:

Life of Horace Greeley. By L. D. Ingersoll.

Memoir of Rev. Nathaniel Colver, D. D. With Lectures, Plans of Sermons, etc. By Rev. J. A. Smith, D. D.

Thorvaldsen. His Life and Works. By Eugene Plén. Translated by Mrs. Luyster.

The Life of Emma Willard. By John Lord, LL. D.

Fanny Fern. A Memorial Volume. By James Parton.

Life and Works of Lessing. From the German of Adolf Stahr. By E. P. Evans.

Mementoes of Edward Payson, D. D. Embracing a Sketch of his Life and Character, and Selections from his Works. By Rev. Edwin L. James. With an Introduction, by W. B. Sprague, D. D., LL. D.

The Life of the Most Rev. M. J. Spalding, D. D., Archbishop of Baltimore. By J. L. Spalding, S. T. L.

A Voice from the Deep; or, Twenty Years' Life on the Ocean. By Captain P. Strickland.

The Life of Sergeant Ambler. In the Coal-Mines of England, in the British Army, and in the Late Great Rebellion.

Life of St. Augustine, Bishop, Confessor, and Doctor of the Church. By P. E. Moriarty, D. D.

An Orphan of the Old Dominion; Her Trials and Travels, embracing a History of her Life, taken principally from her Journal and Letters. By Lumina Silverdale.

Life of Demetrius Augustine Gallitzen, Prince and Priest. By Sarah M. Brownson. With an Introduction by O. A. Brownson.

The Life of Franz Schubert. By George Lowell Austin.

The Leaders of France; or, The Men of the Third Republic. A Series of Twenty-six Biographical, Historical, and Character Sketches of Leading Frenchmen of the Present Day.

Anecdotes of Public Men. By J. W. Forney.

Life of Alfred Cookman, including a Memoir of his Father, Rev. George G. Cookman. By H. B. Ridgeway, D. D.

Lives and Portraits of the Presidents of the United States. By Evert A. Duyckink.

Journal and Letters of Colonel John May, of Boston, relative to Two Journeys to the Ohio Country in 1788 and '89. With Biographical Sketch by Rev. Richard S. Edes, of Bolton, Mass., and Illustrative Notes by William M. Darlington, of Pittsburg, Pa. (Publication of the Historical and Philosophical Society of Ohio.)

Memoir of Joseph White, showing his Connection with the Introduction and Use of Anthracite Coal, and Iron, and the Construction of some of the Canals and Railroads of Pennsylvania. By Richard Richardson.

GEOGRAPHY, TRAVEL, AND ADVENTURE.—Mr. Nicholas Pike, United States consul at Port Louis, Mauritius, has given us one admirable book on that island, and promises another. The present work is entitled "Sub-Tropical Rambles in the Land of the Aphanapteryx," and as the fruit of those rambles presents us with descriptions and drawings of a large number of specimens in natural history. Mr. Pike is a genuine lover of Nature, which he views with an instructed eye. He knows what questions to ask, and thus interrogates Nature to good purpose. Our consular service has not many men, it is to be feared, who are able to reflect like honor upon the nation. Bayard Taylor has traveled afar, but in "The Lake Region of Central Africa;" his work is that of a compiler, and that work he has very well done. "The Atlantic to the Pacific: what to see and how to see it," by John Erastus Lester, with nearly the brevity of a guide-book, has the agreeableness of a well-written book of travels. "Palmetto Leaves: Sketches of Southern Scenery, Life, and Character," by Mrs. Harriet Beecher Stowe, written from her winter home in Florida, are rather slight in texture, but have the unmistakable impress of her genius. "Paradise in the Pacific: a Book of Travel, Adventure, and Facts, in the Sandwich Islands," by William R. Bliss, is pleasantly written, and tells much on the inhabitants of the Hawaiian Kingdom,

their character and modes of living, their civil institutions, their resources and prospects. But while the author makes an agreeable impression of himself, he cannot be said to take a rose-colored view of the Sandwich Islands. Mention should be made of "The Egyptian Sketch-Book," from the practised pen of Charles Godfrey Leland; and of "Under the Mizzen-mast," an enlarged edition of his very readable "Voyage round the World, by Dr. Nehemiah Adams"—and these following:

New Life in New Lands. Notes of Travel. By Grace Greenwood.

Life in San Domingo. By an Actual Settler. With an Introduction, by E. B. Kimball.

Benedict's Wanderings in Ireland, Scotland, Italy, and Sicily. By Edward W. Dawson.

Siam. By Rev. George B. Bacon. With Map and numerous Illustrations.

Florida and South Carolina as Health Resorts. By W. W. Morland, M. D.

Coal Regions of North America. By James Macfarlane.

Appletons' European Guide-Book. Illustrated. All over Oregon and Washington. By Mrs. Frances Fuller Victor.

Zell's Descriptive Hand-Atlas of the World. By Bartholemew and Von Steinwehr.

Catskill Mountains. By Charles Rockwell.

American Sea-side Resorts. By C. L. Morton.

New England: a Hand-book for Travellers, with the Western and Northern Borders, from New York to Quebec.

The Arctic Regions, by Sea and Land. By Epes Sargent.

Lake George. A Book of To-Day. By S. R. Stoddard. Ticonderoga, Past and Present. "Mixed." By the same.

The undeveloped West; or, Five Years in the Territories. By J. H. Beadle.

Antiquities of the Orient unveiled; containing a Concise Description of the Ruins of King Solomon's Cities, together with those of Forty of the most Ancient and Renowned Cities of the East, including Babylon, Nineveh, Damascus, and Shushan. Illustrated. By M. Wolcott Redding.

The Alhambra and the Kremlin. The North and the South of Europe. By Samuel Irenæus Prime, D. D. 60 Illustrations.

Pen Pictures of Europe. Where and how we went, and what we saw during a Seventeen Months' Tour. By Elizabeth Peake.

Europe, viewed through American Spectacles. By C. C. Fulton, Editor of the *Baltimore American*.

THEOLOGY AND RELIGION.—The aggregate number of works in this department of writing was not proportionally less than in preceding years. It exceeds any other, partly because more persons suppose themselves able to treat religious topics and questions successfully than venture on any other, and partly because there are more persons set apart, and to some extent trained, to be teachers of religion, than there are of any other professional calling; and from teaching in the pulpit to teaching through the press, the transition, in this land and age, is natural and easy. But the past year saw fewer works of marked value than usual come from the press, in the department of theological science or of practical religion. Some works, heretofore noted as in progress, have been continued. The fifth volume of McClintock & Strong's "Biblical, Theological and Ecclesiasti-

cal Cyclopædia" has appeared. Lange's "Biblical Commentary," translated and annotated under the editorial supervision of Dr. Schaff, is approaching completion, and when completed will be evidence of the success with which biblical scholarship is cultivated in the United States. A second series of Mr. Beecher's "Lectures on Preaching" met with more general favor than the first. It is not likely that he will be able to communicate the secret of his power, but what he does express is very stimulating and suggestive. The commentaries of Dr. Henry Cowles on several books of the Old Testament have met with very general approbation, for giving the solid results without the parade of learning, and for the modesty, good sense, and candor, shown in his treatment of controverted points. He has now published a work on the Pentateuch, not in the form of a detailed exposition, but of a series of essays on the most important topics suggested by the books under consideration. "Absolute Religion," by the late Rev. Thomas C. Upham, D. D., LL. D., appeared under the disadvantages of posthumous publication. It is an attempt to show that Christianity is the absolute religion—that its most important truths coincide with the necessary truths testified to by our religious nature. "Thoughts on the Decalogue," by Dr. Howard Crosby, Chancellor of the University of New York, is a small book packed with thought. "The Argument of the Book of Job unfolded," by the Rev. William Henry Green, D. D., professor in the Princeton Theological Seminary, gives in moderate compass the results of much fruitful study. "The Women of the Arabs," by H. H. Jessup, seventeen years a missionary in Syria, is an effective account of the degradation of women in the East, and of the means successfully employed for their elevation. It is a singularly interesting book. "The Way, the Truth, and the Life: Lectures to Educated Hindoos, delivered on his Late Visit to India," by the Rev. Julius H. Seelye, Professor in Amherst College, is a remarkable production of a remarkable occasion. The following is a pretty full, but not an exhaustive statement of the religious publications of the year:

Sisterhoods and Deaconesses at Home and Abroad. By the Rev. H. C. Potter.

Alone with Jesus. By J. C. Lanphier.

A Complete Harmony of Daniel and the Apocalypse. By Rev. J. Litch.

Things to Think of. By Rev. H. A. Sawtelle.

The Land of Shadowing Wings; or, The Empire of the Sea.

The New Life Dawning, and Other Discourses. By Bernard H. Nadai, D. D. Edited by Rev. H. A. Bully, M. A.

Steps to a Living Faith. Being Letters to an Indifferent Believer. A Tract for Parish Use. By the Rt. Rev. F. D. Huntington, D. D.

Lectures on Theological Encyclopædia and Methodology. By John McClintock, D. D., LL. D. Edited by John T. Short, B. D.

The Parting Words of Adolphe Monod to his Friends and the Church. Translated from the fifth Paris edition.

- Sacramental Sabbath.** By the author of "The High Mountain Apart."
One Thousand Gems. Striking Passages, Incidents, and Illustrations, from T. De Witt Talmage, D. D. Edited by W. H. Larrabee.
Sermons. By Henry Ward Beecher. Seventh and Eighth Series.
The Historic Origin of the Bible. By Edwin Cone Bissell, A. M. With an Introduction by Roswell D. Hitchcock, D. D.
The Communion Table. The Approach, the Service, the Retrospect. By Rev. James R. Boyd, D. D.
The Cup and the Cross; or, The Baptism of Calvary "One Baptism." The Ground and the Key to all other Bible Baptisms. By James W. Dale, D. D.
Tides and Tendencies of Religious Thought. By J. L. Dudley.
Methodism Forty Years Ago and Now. By Rev. Newell Culver.
The Ministry We Need. By Seth Sweetser, D. D.
Questions of the Day. By John Hall, D. D.
Who shall Publish the Glad Tidings? By Mrs. W. E. Boardman.
Through the Eye to the Heart; or Eye-Teaching in the Sunday-School. By Rev. W. F. Crafts.
The Ter-centenary Book, commemorative of the Completion of the Life and Works of John Knox, of the Huguenot Martyrs of France, and the Establishment of Presbytery in England, etc.
The Voice of God. Being a Complete History of the Holy Bible, including the Occurrences of Four Hundred Years, from the Last of the Prophets to the Birth of Christ, with a Life of our Saviour and His Apostles. Compiled from various Sources. By Alfred Nevins.
A Suggestive Commentary on St. Paul's Epistle to the Romans. With Critical and Homiletic Notes. By Thomas Robinson, D. D.
The Prophet of the Highest; or, The Mission of John the Baptist. By Nahum Gale, D. D.
Responsive Worship. By W. I. Budington, D. D.
Winning Souls. Sketches and Incidents during Forty Years of Pastoral Work. By Rev. S. B. Halliday.
The Sabbath made for Man. By Dr. William N. Cornell.
Gone Before: Being a Manual for the Bereaved. By Henry Southgate.
The Gospel Plan of Salvation. By Dr. T. W. Brents.
A Household Liturgy; or Order of Daily Prayer. By Rev. C. S. Henry, D. D.
The Life of Trust: being a Narrative of the Lord's Dealings with George Muller, written by Himself. Abridged by Rev. H. L. Wayland. With an Introduction by Francis Wayland. New edition, with the History continued to the Present Time.
Sacred Eloquence; or, The Theory and Practice of Preaching. By Rev. Thomas J. Colter.
Word for the Day. Being Coincidences culled from the Calendar. By J. A. Upjohn.
The Memorial Pulpit. Sermons. By C. S. Robinson, D. D.
Nature's Testimony to Nature's God. Four Sermons preached in the Church of the Nativity, Philadelphia, by the Rev. William Newton.
The Bow in the Cloud; or, Covenant Mercy for the Afflicted. Edited by Rev. W. B. Stevens.
Catholicity, Protestantism, and Infidelity. By Rev. F. X. Weninger.
Manual of Instruction in the Catholic Religion. By the same.
Apostolical and Infallible Authority of the Pope. By the same.
Struggles and Triumphs of Virginia Baptists. A Memorial Discourse. By J. L. M. Curry, LL. D.
The Broad Church. By Jacob Edson.
Supposed Emendations of the Authorized Version of the Old Testament. By Elias Riggs, Missionary of the A. B. C. F. M. at Constantinople.
Ecclesia. The Church: its Polity and Fellowship. Short Sermons on Consecration and Kindred Subjects. By A. C. George, D. D.
Outlines of Christian Theology. By L. T. Townsend, D. D.
The Risen Life in Christ Jesus; sometimes called "The Higher Christian Life." By Edmund K. Alden.
The Young Communicant's Manual of Devotion. By Rev. E. Greenwald, D. D.
Mind and Heart in Religion; or Judaism and Christianity. A Heart's Experience and a Popular Research into the True Religion of the Bible. By Abraham Jaeger.
Review Exercises for Sunday-School. Their Value and Methods. By Rev. H. Clay Trumbull.
The Reformed Mennonite Church. By Daniel Musser.
Apollos; or, The Way of God. By the Rt. Rev. A. Cleveland Coxe, D. D., Bishop of Western New York.
Leaves from the Tree of Life. By Richard Newton, D. D.
Bible Marvel-Workers. By Allen Putnam, A. M.
Christian Rhetoric. For the Use of Preachers and other Speakers. By George Winifred Harvey, M. A.
Sparks among the Ashes; Reminiscences of Nineteen Years of Labor in the Philadelphia Almshouse. By Rev. F. C. Pierson. With an Introduction by Mrs. Dr. Bell.
Common-Sense in Religion. By James Freeman Clarke.
Household Worship. By a Layman.
The Sunday at Home. By the Right Rev. William Bacon Stevens, D. D.
Aggressive Work in the Church of Christ. By Rev. P. B. Morgan.
The Golden City. By Rev. B. F. Barrett.
Notes, Exegetical, Practical, and Devotional, on the Book of Exodus, for the Pulpit, Family, and Sabbath-School. By Alfred Nevins, D. D., LL. D.
Hints and Helps in Pastoral Theology. By W. S. Plumer, D. D.
The Luminous Unity; or Letters addressed to the Rev. A. Guinzburg, a Rabbi of Boston, Mass., by the Rev. M. R. Miller, on the Question, "Is Unitarianism, as opposed to Trinitarianism, a Principle of Heathenism, rather than of Specific Judaism?"
Commentary on the Old Testament. Vol. III.: Joshua to II. Samuel. By D. Steele, D. D., and M. S. Perry, A. M.
The Valiant Woman. A Series of Discourses intended for Women living in the World. By Mgr. Landriot, Archbishop of Rheims. Translated from the French, by Helena M. Lyons.
Recognition of the Creator in Daily Life.
The Influence of Christianity on Civilization. By B. F. Underwood.
The Spiritual Kingdom. An Exposition of the First Eleven Chapters of the Book of Revelation. By the Rev. James B. Ramsay, D. D. With an Introduction, by the Rev. Charles Hodge, D. D., LL. D.
A Commentary upon the Epistle to the Hebrews. By George Junkin, D. D.
A Commentary on Proverbs. With a New Translation, and with some of the Original Expositions re-examined in a Classified List. By John Miller, of Princeton.
Public Worship, Partly Responsive. Designed for any Christian Congregation. With an Introduction by Rev. Daniel March, D. D.
Bible Chart of Genealogy and Chronology, from the Creation to A. D. 100. By C. S. Halsey.
Everybody's Providence. By Rebecca Perley Reed.
Lectures on the Truth of the Christian Religion, delivered before the Students of the University of

Michigan. By Rev. B. F. Cocker, D. D., Professor of Mental and Moral Philosophy.

The Old Faith and the New. A Confession. By David Friedrich Strauss. Authorized Translation from the sixth edition, by Mathilde Blind. The translation revised and partly rewritten, and preceded by an American version of the author's "Prefatory Postscript."

The Question of Hell. An Essay in New Orthodoxy. By a Puritan.

The Arena and the Throne. By L. T. Townsend. Afternoon. Miscellaneous Papers. By T. Stork, D. D.

Thoughts for the Old Year and the New. By John Hall, D. D.

The Work of the Spirit; or Doctrinal and Practical Meditations on the Nature and Work of the Holy Ghost. By Rev. Samuel Cutler.

FICTION.—Next to religious books, works of fiction are the most numerous class. The deepest reality and the mimic life of "airy nothings" are the closest competitors for popular favor. The importation and reprint of English novels furnishes a large part of the supply needed to meet the popular demand; but, as will be seen, the writers of fiction, of very unequal degrees of merit, to be sure, are not few among American writers. But no work of the highest class can be named among the publications of the year. Some first works, of young writers, such as give promise of good things in the future, deserve mention. "Bressant," by Julian Hawthorne, had on the whole a flattering reception. It was accepted as evidence that the author inherits with the blood a measure of the genius of his father—the keen and yet visionary eye, seeing all that is, and with it much more that is not visible, except to a shaping imagination, the tendency to weird conceptions, and to indulgence in hovering on the border line of the extranatural, a predilection to the abnormal in character. It is open to and has encountered severe criticism. The future fortune of Mr. Hawthorne as a writer will be looked for with more than ordinary interest. General Lew Wallace has surprised the world by a romance founded on the conquest of Mexico, entitled "The Fair God." It has received very high and almost unanimous praise in England. In this country, while it has no lack of readers and admirers, we presume, the leading organs of periodical criticism have been far less unanimous than contemporary English reviewers, and the disparaging estimates of it are very decided in tone. It is either lauded in the highest terms, or treated as of no value. "Brave Hearts," by a writer who assumes the name of "Robertson Gray," if not a first attempt, has unmistakable signs of immaturity in this style of art. But it has also such signs of power as will cause the next production of the author to be looked for with raised expectations. "A Chance Acquaintance," by W. D. Howells, shows his peculiar genius at its best. His penetrating but not unkindly insight into human nature, especially of the American variety and the species Bostonian, and his power of producing striking effects by

the most common materials, with his independence of the conventional types of fiction and their artificial requirements, give a delightful freshness to his creations. The Rev. Edward Everett Hale has given the world a novel, "Ups and Downs," and a shorter tale for Christmas, entitled, "In His Name." Both are stories with morals not disguised, yet not obtrusive. In neither is the author at his best, but the last comes the nearest to it than any of the intermediate terms of the series. It is a finely-conceived and well-told story, and the impression it leaves is altogether good. "Love in the Nineteenth Century," by Harriet W. Preston, does not demonstrate that love in this century differs essentially from love in any preceding century, or even, which is perhaps what was more distinctly in view, that the lover of this century is a new "development." The lovers in her story are very well drawn, and the book is or should be a success. "Work," by Mrs. L. M. Alcott, made a favorable impression, but its merits, though indisputable, are not such as to raise the author's already high and deserved reputation. "Arthur Bonnicastle," by Dr. J. G. Holland, if it depended for its appreciation on its purely literary merits, would not receive very high praise. But the moral tone and evident purpose of the author count much in his favor with a large portion of the public, among whom he may be said to have already secured an immense number not merely of admirers but of warm friends. "The Wetherel Affair," by J. W. DeForest, indicates larger and more matured power than his previous works. Some volumes of collected short stories deserve higher praise than can be given to many of the more ambitious attempts. Such are "Marjorie Daw, and Other People," by T. B. Aldrich, a unique and brilliant collection; "Mrs. Skaggs's Husbands, and Other Sketches," by Bret Harte, in which the author comes back to the scenes and themes of his earliest literary triumphs; and "Saxe Holm's Stories," productions of marked originality and power. "Oxley," by a writer under the name of "Lyndon," performs with striking success the difficult feat of bringing up her heroine from a childhood with abundant faults requiring correction, to become a representative of noble womanhood, besides playing off against her numerous characters that are also delicately discriminated from her and from each other. "The Mystery of Metropolisville," by Edward Eggleston, like other works by this popular author, though not very artistic in structure, is very entertaining. "Her Majesty the Queen," by J. Esten Cooke; "The Rose of Disentis," a translation from Zschokke, and the first of a series of his works proposed to be published; and "A Vagabond Heroine," by Mrs. Annie Edwards, are novels of more than average merit. The following titles represent gradations of merit and demerit, which we will not attempt to measure:

- Pemberton; or, One Hundred Years Ago. By Henry Peterson.
- Beechwood. A Novel. By Rebecca Ruter Springer.
- Man is Love. An American Story. By One Who Knows.
- Expiation. A Novel. By Mrs. Julia C. R. Dorr.
- The Blount Family. By Rev. Theron Brown.
- Mystery of the Lodge. By Mary Dwinell Chellia.
- Margaret Worthington. By Katherine Provost.
- Treason at Home. A New Society Novel. By Mrs. Greenough.
- Six Nights with the Washingtonians, and other Temperance Tales. By T. S. Arthur.
- Six in All. By Virginia F. Townsend.
- Clifford Troup. By Mrs. Maria J. Westmoreland.
- Kenneth my King. By Miss Sallio A. Brock, of Virginia.
- On the Eve. By Ivan Turgenev.
- Chronicles of Sunset Mountain. By Mrs. A. E. Porter.
- The Marble Preacher. By Mrs. H. Steele Clark.
- Uncle Anthony. By M. J. Cummings.
- A Twofold Life. A Romance from the German of Wilhelmine von Hillern.
- Bart Ridgely. A Tale of Northern Ohio.
- The Mysterious Guest. By Miss Eliza A. Dupuy.
- Old Grips and Little Tid; or, Juvenile Benevolence. By Joseph Banvard, D. D.
- Clifford Troup. A Georgia Story. By Maria Jourdan Westmoreland.
- Lakeville; or, Substance and Shadow. By Mary Healy.
- Adventures of Kwei, the Chinese Girl. By Myra.
- Glen Elm; or, Life in the West. By Mrs. M. S. Robinson.
- The Mystery of Orcival. By Emile Gaberian. From the French.
- The Widow Lerouge. By the same.
- Against the World. By Jeanette B. Hadermann.
- Thirteen Good Stories. From "Old and New."
- Artiste. By Maria M. Grant.
- Lord Hope's Choice. By Mrs. Ann S. Stephens.
- All for Love. By Miss Eliza A. Dupuy.
- Why She Refused Him. By Lorraine.
- Olive; or, One Year at the Nest. By Mrs. C. A. Munson.
- The Adopted Son of the Princess. By Rev. E. W. Jones.
- Cachet. By Mrs. M. J. B. Hamilton, of Georgia.
- Must it Be! A Romance. From the German of Carl Detlef. By M. S.
- They Met by Chance. A Society Novel. By Olive Lagan.
- A Brown-Stone Front. A Story of New York and Saratoga. By Chandos Fulton.
- Article 47. A Romance. From the French of Adolphe Belot. By James Furbish.
- Under the Surface. By Emma M. Connelly.
- Romain Kalbris, his Adventures on Sea and Shore. Translated from the French of Hector Malot. By Mrs. Julia McNair Wright.
- Driven from the Path. A Novel.
- The Cross of Berny. A Novel, written jointly by Mmes. Emile de Girardin, MM. Théophile Gautier, Jules Paulsen, and Méry. Translated from the French by Florence Fendall.
- Lynde Weiss. An Autobiography. By George H. Throop.
- Search after a Lost Heart. A Novel. By Leslie Van Rensselaer.
- Bellehood and Bondage. By Mrs. Ann S. Stephens.
- Miriam Monfort. A Novel. By the author of "The Household of Bouverie."
- A Wonderful Woman. A Novel. By Mary Agnes Fleming.
- What can She Do! By the author of "Barriers Burned Away."
- A Good Match. By Amelia Perrier.
- A Great Lady. A Romance. From the German of Von Dewale.
- His Marriage-Vow. A Novel. By Mrs. Caroline Fairfield Corbin.
- A Man of Honor. By George Cary Eggleston.
- The Outlaw's Daughter; or, Adventures in the South. By Emerson Bennett.
- Jessamine. By Marion Harland.
- Put to the Test. A Novel. By Charles Chamberlain, Jr.
- The Portrait. A Romance of the Cuyahoga Valley. By A. G. Riddle.
- A Beautiful Fiend; or, Through the Fire. By Mrs. E. D. E. N. Southworth.
- Old Fort Duquesne; or, Captain Jack, the Scout. An Historical Novel. With Copious Notes. By Charles McKnight.
- USEFUL ARTS.**—The line which divides works of science from treatises on the arts is not always easy to be drawn, the science of our time being made in so many ways to minister to the common wants of man. We note the following works of a technological character:
- Silver and Gold. An Account of the Mining and Metallurgical Industries of the United States, with Reference chiefly to the Precious Metals. By R. W. Raymond, Ph. D.
- Cottage Residences. By A. J. Downing. Containing a Revised List of Trees, Shrubs, and Plants, and the most Recent and the best-selected Fruit, with some account of the Newer Style of Gardens. By Henry Winthrop Sargent and Charles Downing. With many New Designs in Rural Architecture. By George E. Harney, Architect.
- Landscape Architecture, as applied to the Wants of the West. With an Essay on Forest Planting on the Great Plains. By H. W. T. Cleveland.
- A Treatise on the Strength of Bridges and Roofs. By Samuel H. Shreve, C. E.
- Treatise on the Theory of the Construction of Bridges and Roofs. By De Volson Wood.
- Steam and the Steam-Engine; Land, Marine, and Locomotive. By Henry Evers, LL. D.
- A Practical Treatise on the Manufacture of Paper in all its Branches. By Carl Hoffmann.
- The House-keeper and Health-keeper. By Catharine E. Beecher.
- Formulas and Tables for Architects and Engineers in calculating the Strains and Capacity of Structures of Iron and Wood. By F. Schumann, C. E. Illustrated with more than Three Hundred Diagrams designed and engraved by J. C. Lyons.
- An Outline of Ship-building, Theoretical and Practical. With Numerous Plates. By Theodore D. Wilson.
- Main Directions for acquiring the Art of Shooting on the Wing. By an old Game-keeper.
- Chimneys for Fireplaces, Furnaces, and Steam-Boilers. By R. Armstrong, C. E.
- Steam-Boiler Explosions. By Zerah Colburn.
- The Perfect Horse. By William H. H. Murray. With an Introduction by H. W. Beecher, and a Treatise on Agriculture and the Horse, by George B. Loring.
- Illustrated Book of Domestic Poultry. By Martin Doyle.
- Workshop Appliances: including Descriptions of the Gauging and Measuring Instruments, the Hand-cutting Tools, Lathes, Drilling, Planing, and other Machine Tools used by Engineers. By C. B. P. Shelley, C. E.
- LAW.**—Of works in general or international jurisprudence, special mention should be made of the publication of the Second Book of Mr. David Dudley Field's proposed "Code of International Law," which treats of war. While the adoption of this code by the civilized world is not to be hoped for, it will undoubtedly take a high place among American contributions to

the improvement of the law of nations. Another book, preserving the record of a memorable international discussion, is "The Argument at Geneva: a Complete Collection of the Forensic Discussions on the Part of the United States and Great Britain, before the Tribunal of Arbitration, under the Treaty of Washington, as published by Authority of the Government." A work for general students, but of value also to the law-student, is an "Introduction to Roman Law, in twelve Academical Lectures," by James Hadley, LL. D., with an Introduction by Theodore D. Woolsey, D. D., LL. D. The extent and precision of Prof. Hadley's learning, and the felicity of his expositions, are favorably exhibited in this volume. Less thorough in treatment, but very effective in style, is "Church and State in the United States," written by the Rev. Joseph P. Thompson, D. D., LL. D., for the information of German statesmen and scholars. Of law-books, strictly so called, excluding the volumes of reported decisions, the following are noted:

The Law of Statutory Crimes. By Joel Prentiss Bishop.

The Law of Attachments. By Charles D. Drake, LL. D.

Telegraph Cases decided in the Courts of America, Great Britain, and Ireland. Edited by Charles Allen.

A Treatise on the Law of Injunctions. By J. L. High.

A Practical Treatise on the Law of Municipal Bonds. By W. N. Coler.

A Treatise on the Law of Judgments. By A. C. Freeman.

The Chancery Jurisdiction and Practice, according to Statutes and Decisions in the State of Illinois, from the Earliest Period to 1873. By Edward Judson Hill.

A Treatise on the Law of Personal Property. By James Schouler.

Leading and Select Cases on the Law of Trusts, with Extended Abstracts of other Important English and American Cases, illustrating the Various Principles pertaining to this Important Branch of the Law. With Numerous Notes and References, and a Full Report of the Great Case of the Covington & Lexington Railroad Company *vs.* R. B. Bowler's Heirs and Others. By Peter Zinn.

Dictionary of Overruled Cases. By Melville M. Bigelow.

MEDICINE.—A few works in this department, not including reprints and new editions, claim notice:

Mental Pathology. By Isaac Ray, M. D.

Dental Caries and its Causes. An Investigation into the Influence of Fungi on the Destruction of the Teeth. By Drs. Leber and Rottenstein. With Illustrations. Translated by Thomas H. Chandler, D. M. D., Professor in Harvard University.

Manual of Chemical Analysis, as applied to the Examination of Medicinal Chemicals. A Guide for the Determination of their Identity and Quality, and for the Detection of Impurities and Adulterations. By Frederick Hoffman, Ph. D.

Handbook of Medical Electricity. By Herbert Tibbitts, M. D.

The Passions in their Relations to Health and Disease. By Dr. X. Bourgeois. Translated from the French by Howard F. Damon, A. M.

Consumption, and its Treatment in all its Forms. By Dr. Carl Both.

Mineral Springs of North America. How to Reach and How to Use Them. By J. J. Moorman, M. D.

A Treatise on Diseases of the Tongue. With a

Number of Lithographic and other Illustrations. By W. Fricolic Clarke, M. D.

Pharmaceutical Lexicon. A Dictionary of Pharmaceutical Science. By Dr. H. V. Swerengan.

Contributions to Practical Surgery. By George W. Morris, M. D.

Digestion and Dyspepsia. A Complete Explanation of the Physiology of the Digestive Processes, with the Symptoms and Treatment of Dyspepsia and other Disorders of the Digestive Organs. By R. T. Trall, M. D.

The Cholera; its History, Cause, Symptoms, and Treatment. By Seth Pancoast, M. D.

Chemical Electro-Therapeutics, Medical and Surgical. By Allan McLane Hamilton, M. D.

The Cerebral Convolutions of Man, represented according to Original Observations, especially upon their Development in the Fetus. Intended for the Use of Physicians. By Alexander Ecker, Professor of Anatomy, etc., in the University at Freiburg, Baden. Translated by Robert T. Edes, M. D.

Victims of Ignorance; or, The Perils of Early Life. A Treatise on the Diseases and Deformities of Children. By George S. Stebbins, M. D.

Epidemic or Malignant Cholera. By Alfred Still, M. D.

A Report on the Cerebral Affections of Infancy, etc. By Edward Copeman, M. D.

The Proper Treatment of Children, Medical or Medicinal. Being the Annual Discourse before the Massachusetts Medical Society. By C. E. Buckingham, M. D.

Diseases of the Ear, including the Necessary Anatomy of the Organs. By A. D. Williams, M. D., of St. Louis.

TEXT-BOOKS.—The complaint has been made, with too much foundation in fact, that the production and introduction of school-books was a business in which success had very little relation to the merits of the books themselves. But, whether through the effect of criticism, or as a consequence of a gradual raising of the standard of teachers' qualifications, creating a demand for a better style of text-books, or from whatever cause, it is certain that a decided improvement in them is to be noticed. Among those recently published, mention should be made of Prof. Arnold Guyot's "Physical Geography," and of such elementary geographical works as "Our World," by Mary L. Hall; and "First Steps in Geography," by Theodore S. Fay; "English of the Fourteenth Century, illustrated by Notes Grammatical and Etymological, on Chaucer's Prologue and Knight's Tale," by Prof. S. H. Carpenter; the Rev. Dr. A. C. Kendrick's "Complete Edition of Xenophon's Anabasis, embracing a Full Vocabulary and Kiepert's Revised Map of the Route of the Ten Thousand;" the classical text-books of Messrs. J. H. & W. F. Allen and J. B. Greenough—"Select Orations of Cicero," Cicero "De Senectute," and "Shorter Course of Latin Prose, consisting of Selections from Caesar, Curtius, Nepos, and Sallust (Jugurtha), with Notes;" Cicero's "Tusculan Questions, with Notes," by Prof. Thomas Chase; "A Lexicon to Xenophon's Anabasis," by Alpheus Crosby; "A School Manual of English Etymology," by Epes Sargent; and "A Second Book of Botany," by Eliza A. Youmans. These and some others that might be specified, represent the ad-

vance that has been made, especially in books for the use of the higher schools. The following more indiscriminate list will still be found to include a considerable number of meritorious works:

A Short Course in Literature, English and American. By John S. Hart, LL. D.

Logical Book-keeping. By E. G. Folsom.

Blanks for Book-keeping. By E. G. Folsom.

Examinations of the Demonstrations of Davies's Legendre. By Charles Davies, LL. D.

Fourteen Weeks in Physiology. By J. D. Steele.

A Manual of Gesture; embracing a Complete System of Notation, together with the Principles of Interpretation, and Selections for Practice. With nearly One Hundred Figures. By A. M. Bacon.

The New System of Sword Exercise for the Army and Militia of the United States. Prepared by Order of the War Department. By Captain Matthew J. O'Rourke. With Fifty-six Illustrations, mostly taken from Photographs.

Text-Book of Physiology, General, Special, and Practical. By John Hughes Bennett, M. D.

M. T. Cicero De Officiis. By Prof. E. P. Crowell. Word Primer; A Beginner's Book in Oral and Written Spelling. By Wm. Swinton.

Dialogues and Dramas for Public and Private Exhibitions. By Prof. Lewis B. Munro.

Progressive Lessons in Drawing, with Familiar Instructions, designed for Schools. Fourteen Numbers. By Benjamin H. Coe.

Inventive Drawing. Synthetic Series. Manual for Teachers. By Prof. Hermann Krüsi. Also Drawing-Books.

Tables of Latin Suffixes and a List of Prefixes. With Illustrative Examples. By Amos M. Currier.

Manual of American Ideas. Designed as a Text-Book for Schools and Colleges. By C. T. Hopkins.

An Elementary Course in Free-Hand Geometrical Drawing. For Schools and for the Training of the Eye and Hand, destined to Mechanical Pursuits and Arts of Geometrical Designs; with Chapters on Lettering and Geometrical Symbolism. By S. Edward Warren.

Latin Pronunciation. By Walter Blair, A. M.

A Course of Philosophy. Embracing Logic, Metaphysics, and Ethics. Designed as a Text-Book for the Use of Schools.

A Grammar of the Latin Language. By George E. Bartholomew.

Aids to the Study of the Classics.—Caesar's Commentaries on the Gallic War; accompanied with a Latin Ordo, and illustrated with English Notes Explanatory and Critical. By C. A.

French Pronunciation. By E. S. Joynes.

Synopsis of English Grammar. By Andrew J. Graham.

Elements of Logic. Translated from the Spanish of Rev. S. Balmes. By J. M. Spileasy, M. A.

Analytical Geometry. By William G. Peck, LL. D.

New Calculus. By Charles Davies, LL. D.

New Bourdon's Algebra. By Chas. Davies, LL. D. Vocabulary to Morris's Latin Grammar. By the Rev. Hall Harrison, M. A., and the Rev. R. A. Benton, M. A.

Latin Reader, adapted to Morris's Latin Grammar. By C. D. Morris.

A History of Greek and Roman Classical Literature. By the Rev. A. Lounge, C. S. C., Professor in Notre Dame University, Ind.

Elementary Algebra. By D. B. Hagar.

University Algebra. By Prof. Edward Olney.

The Electra of Sophocles. Edited by R. C. Jebb, A. M. Revised, with Additions, by R. H. Mather, Professor in Amherst College.

Elementary Chemistry. By Levy C. Croley, Ph. D. Oxford's Junior Speaker. A Collection of Exercises in Declamation, Recitation, and Representation. By William Oxford.

Oxford's Senior Speaker. By the same.

The School Stage: A New Collection of Juvenile Acting Plays for School and Home. By W. H. Venable.

New Normal Mental Arithmetic. By Prof. E. Brooks.

Select Orations of Cicero. With Explanatory Notes, for the Use of Schools. By Albert Harkness, LL. D.

Cicero's Select Orations. With a Latin Ordo and Notes. By C. A.

Teacher's Manual of Free-Hand Drawing and Designing. By Walter Smith.

A Manual of Practical Military Engineering, prepared for the Use of the Cadets of the U. S. Military Academy, and for Engineer Troops. Illustrated with 193 Woodcuts and Five Lithographed Plates. By Captain O. H. Ernst.

An Elementary Course of Civil Engineering. By D. H. Mahan. A new, revised edition, with large Additions and many new Plates. Edited by Prof. De Volson Wood.

Surveying and Navigation. With a Preliminary Treatise on Trigonometry and Mensuration. By A. Schuyler.

First Lessons in Grammar. Introduction to English Grammar. By Harriet S. Long.

Selections from Latin Classic Authors: Quintus Curtius, Ovid, Cicero De Senectute and De Amicitia. With Notes and a Vocabulary. By Francis Gardner, Head Master, A. M. Gay and A. H. Buch, Masters, in the Boston Latin School.

The Grammar-School Speller. By Prof. B. F. Tweed.

The Galvanometer and its Uses. A Manual for Electricians and Students, with Illustrations. By C. H. Haskins.

The Shortest Road to German. By F. L. O. Roehrig, Professor in Cornell University.

A Practical Course with the French Language, on Woodbury's Plan with the German. By Louis A. Langueheller, LL. D., and H. M. Monsanto, A. M.

A Latin Gradual, to accompany the Author's Latin Grammar. By G. R. Bartholomew.

Saunders's New System of Latin Paradigms, with a Synopsis of Declensions.

Latin Grammar: A Compendious Manual for Schools and Colleges. By Henry M. Bruns, LL. D., Professor in the College of Charleston, S. C.

Youth's Book on the Mind. Embracing the Outlines of the Intellect, the Sensibilities, and the Will. Introductory to the Study of Mental Philosophy. By Cyril Pearl. With Questions, by J. N. Murdock, D. D.

Elementary German Reader. By Prof. James H. Worman.

Manual of Elocution. Embracing the Philosophy of Elocution. By C. P. Bronson, M. D. Edited by Mrs. Laura M. Bronson.

An Elementary French Grammar. By J. G. Keetels.

Elements of Logarithms. By James Mill Pierce, Professor of Mathematics in Harvard University.

Language Lessons. An Introductory Grammar and Composition for Intermediate and Grammar Grades. By William Swinton.

Familiar Lessons in Botany. By Mrs. M. J. Young.

Questions on the History and Geography of Greece. Suitable for Schools and Academies, and adapted for Students preparing for Harvard College. By J. F. Tufts, A. B.

A Course in Descriptive Geometry. For the Use of Colleges and Scientific Schools. With an Appendix, containing Stereoscopic Views of the Solutions in Space of the Principal Problems. By William Watson, Ph. D., A. A. S.

JUVENILE BOOKS.—When we turn from school-books to books of moral instruction, and of entertainment for the young, it may be said also of these, that an improvement in

their character is perceptible. There are not wanting, in the multitude that issue from the press, those, and too many of them, that have no higher use than to amuse for the time, leaving behind them nothing valuable in the memory or in the effect produced. But the increasing number of books having a higher aim, and that show conscientious work, raises the average of the whole class. The old favorites continue to write, and with undiminished acceptableness. J. T. Trowbridge follows up his "Jack Hazard" series with "Doing His Best," with the promise of more of the same kind. Mrs. A. M. Diaz continues her inimitable "William Henry" series with "Lucy Maria." Those who had been captivated with "What Katy Did," were prepared to welcome warmly "What Katy Did at School." Miss Alcott continues to demonstrate the immense capacity of "Aunt Jo's Scrap-Bag," a third sample of its contents being produced, with the title "Cupid and Chow-chow," and other stories. Mrs. Whitney's "Other Girls" will make as many friends as their predecessors. Mr. J. S. C. Abbott's "Pioneers and Patriots" series has been growing. We have "De Soto, the Discoverer of the Mississippi," "Peter Stuyvesant, and the Early Settlement of New York," and "Christopher Carson, commonly called Kit Carson." "Northern Lights; Tales from the Swedish and Finnish," translated by Selma Borg and Marie A. Brown, deserves a place next to the volumes of Hans Christian Andersen. "Oliver Optic" has shown his usual fertility, and C. A. Stephens, in his "Camping Out" series, makes friends with a multitude of boys. A second part of Gail Hamilton's "Child Life" fully sustains the impression of the first. Two books, both of great merit, have nearly coincident titles: "Bec's Bedtime, and other Stories," by Mrs. S. C. Halliwell, and "Bedtime Stories," by Louise Chandler Moulton. "Matt's Follies," by Mary N. Prescott, almost deserve a harsher name and severer dealing than the volume so entitled metes out; and "Trotty's Wedding Tour, and Story-book," make amusement of matters that are no jest; the "Other Stories" of each volume are excellent. "Santa Claus Land," by Amanda M. Douglas, realizes skillfully the ideal of the children's saint. "Black Diamonds, or, The Curiosities of Coal," by the Rev. Sidney Dyer, imparts information in an engaging way. And Mr. Henry M. Stanley, whose discovery of Livingstone furnished material for an extensive work of travel, has utilized his observations in a tale of exciting adventure for boys, entitled "My Kalulu, Prince, King, and Slave," in which African wars and the slave-trade are forcibly depicted. Without further discrimination, we add the following titles:

Marcus Blair, a Story of the Earlier Times. By Caleb E. Wright.

John Godsoe's Legacy. By Elijah Kellogg.

The Turning of the Tide; or, Redcliffe Rich and his Patient. By the same.

A Stout Heart; or, The Student from over the Sea. By the same.

Broken Fetters. By the author of "Evening Rest."

Kitty Kent's Troubles. By Julia A. Eastman.

Inlets and Outlets. By Rev. C. A. Smith, D. D.

Jessie's Work; or, Faithfulness in Little Things. A Story for Girls. By Mary E. Shipley.

Story of the Nile. Travels and Adventures in Arabia and Abyssinia.

Eyes and Ears Abroad; or, What a Pastor Saw and Heard for His Sunday-School Children. By Rev. Wilbur F. Paddock, D. D.

Youth's Illuminated Bible History; or, Half Hours in Bible Lands. With nearly 100 Engravings on Wood, and 48 Illuminated Pictures. By Rev. P. C. Headley, 2 vols.

Jessie's Work; or, Faithfulness in Little Things. By Mary E. Shipley.

Aunt Elsie's Posts. By Jane D. Chaplin.

Try and Trust; or, The Story of a Bound Boy. By Horatio Alger, Jr.

Little Grandfather. By Sophie May.

Sunny Days Abroad. By C. C. J. Dyer.

Winnifred; or, After Many Days. By Lucy Ellen Guernsey.

Uncle Joe's Story. By Madame R. Bolle. Translated from the French.

Drawing for Little Folks; or, First Lessons for the Nursery. With Instructions.

The Fisherman's Daughter. By Hendrick Conscience. (Translated.)

The Amulet. By the same.

Only a Pin! An Instructive Moral Story. By J. T. de Saint-Germaine. Translated from the French by P. S.

Little Karin. By Madame Marie Sophie Schwartz. Translated from the Original Manuscript by Selma Borg and Marie A. Brown.

Lionel's Courage. By Rev. Daniel Wise.

Golden Lines.

Rhoda's Education; or, Too Much of a Good Thing. By Lucy Ellen Guernsey.

Agnes Fairfield; or, The Triumph of Faith. By C. F. Higginson.

Work, Play, and Profit; or, Gardening for Young Folks, explained in a Story for Boys and Girls. By Anna M. Hyde.

Eighty Years Ashore and Afloat; or, Adventures of Uncle Jethro. By E. C. Cornell.

The Record of a Happy Life. Being Memorials of Franklin Whittall Smith, a Student of Princeton College. By his Mother.

Petite; or, The Story of a Child's Life. By Mrs. R. M. Bray.

Grandma Crosby's Household. By Ella Farman.

Wonders near Home.

African Adventure and Adventurers. Edited by Rev. G. T. Day, D. D.

Lame Felix. A Book for Boys. By Charles Bruce.

Helen Egerton; or, For Conscience' Sake. By Maria Cozinski.

Home Picture-Book. 80 Illustrations.

Old Merry's Travels on the Continent.

Peter's Strange Story.

My Mates and I.

American Girl's Book; or, Occupation for Play Hours.

The Son of the Organ-Grinder. By Mme. Marie Sophie Schwartz. Translated from the Swedish, by the same.

Shoshie, the Hindoo Zenana Teacher. By Mrs. Harriette G. Brittan.

Little Wavie, the Foundling of Glenderg.

Claribel; or, Rest at Last. By Lucy Ellen Guernsey.

Lady Green-Satin and her Maid Rosette; or, The True History of Jean Paul and his Little White Mice. Translated from the French of Martineau des Chesnez.

- How Marjorie Watched. By Miss Washington.
 Young Life. By Mrs. Sarah A. Mather.
 Millie Lee. By Mrs. A. E. Porter.
 Little Mother. By the author of "Little Rosy's Travels."
 Our Western Home. A Story from Life. By the author of "Daniel Tracy's Store."
 Little Camp; or, Eagle Hill. By the author of "The Wide, Wide World."
 Good Work. By Mary Dwinell Chellis.
 St. Augustine's Ladder. By Annette L. Noble.
 The Yoke and the Burden. By Clara Kennett.
 The Three Judges. By J. P. Warren, D. D.
 Nix's Offering. By the author of "Grace Courtney."
 Birdie and his Fairy Friends. A Book for Little Children. By Margaret T. Canby.
 The Mask Lifted. By Rev. J. L. Pratt.
 Stories about Nellie. By Mrs. S. E. Davies, 6 vols., 108 Illustrations.
 Gypsy in New York. By Josephine Pollard.
 Nat and his Chum; or, The Friendly Rivals. By the Rev. D. Wise, D. D.
 Giles's Minority. By Eleanor Grace O'Reilly.
 Right at Last. By Mrs. Harriet M. Davidson.
 An Office of Devotion for Use in Schools. Compiled and edited by Bishop Cox.
 Alice Porter. By the author of "High Mountain apart."
 Home Nook; or, The Crown of Duty. By Amanda M. Douglas.
 Seven Historic Ages. Talks about Kings, Queens, and Barbarians. By Arthur Gilman, M. A.
 Miss Whistledom. By Sophie May.
 Little Marjory. By Mrs. M. E. Miller.
 Thwarted; or, Ducks' Eggs in a Hen's Nest. A Christmas Story. By Florence Montgomery.
 Under the Evergreens; or, a Night with St. Nicholas. By Rev. George C. Lorimer.
 Bound to Rise; or, how Harry Walton Rose in the World. By Horatio Alger, Jr.
 Stories of a Grandfather about American History. By N. S. Dodge.

MISCELLANEOUS. Of books on the fine arts, and illustrated gift-books, there was less than the usual supply. Not a few of the works enumerated under the head of science, travels, etc., are illustrated, some of them very finely. An exquisite book in every particular of book-making is Shakespeare's "Midsummer-Night's Dream," with illustrations by Alfred Fredericks. The artist was most successful in the work that might have seemed most difficult—depicting the fairy scenes—so as to give visible expression to sentiments so ethereal as no words but Shakespeare's have the magic to suggest. The following list includes a few works on art, on artists, and books artistically illustrated:

- Painters, Sculptors, Architects, Engravers, and their Works. A Handbook. By Clara Erskine Clements. With Illustrations.
 The Breughel Brothers. An Art Romance, translated from the German by G. H. Lodge, A. M., M. D. With Illustrations by Hannibal Billings.
 The Early Coins of America, and the Laws governing their Issue. Comprising also Descriptions of the Washington Pieces, the Anglo-American Tokens, many Pieces of Unknown Origin, of the Seventeenth and Eighteenth Centuries, and the First Patterns of the United States Mint. By Sylvester S. Crosby. Part I. Illustrated by the Heliotype Process.
 A Biographical History of the Fine Arts, being Memoirs of the Lives and Works of Eminent Painters, Engravers, Sculptors, and Architects, from the

- Earliest Ages to the Present Time. By S. Spooner, M. D. Fifth edition, with Supplement.
 Queens of American Society. By Mrs. E. F. Ellet. With Portraits.
 The Hay-Fever, illustrated in Twenty-four Drawings. By Augustus Hoppin.
 Church Architecture: Plans, Elevations, and Views of Twenty-one Churches and Two School-houses. Photo-lithographed from Original Drawings. With numerous Illustrations, showing Details, etc. By Frederick Clarke Withers.
 Child Life in Prose. Edited by J. G. Whittier. Profusely illustrated.
 Ballads for Little Folk. By Alice and Phoebe Cary. Illustrated.
 Little People of God, and what the Poets have said of them. With an Original Poem, by J. G. Whittier. Edited by Mrs. G. L. Austin. With Illustrations by Fredericks.
 Historic Fields and Mansions of Middlesex (Mass.). By Samuel A. Drake. With Twenty-one Full-page Heliotype Illustrations, and Thirty-eight Woodcuts.
 The Proud Miss Macbride. By John G. Saxe. Illustrated by Augustus Hoppin.
 The Courtin'. By J. R. Lowell. Silhouette Illustrations by Winslow Homer.
 Diamonds and Precious Stones. By Paul Dieulaufait.
 Grammar of Painting and Engraving. By Charles Blanc. Translated by Kate Newell Doggett.
- In this connection should be named books intended for presentation, in which the ornamentation consists in perfection of typography and binding. Such are "Heaven in Song; comprising the Best Poems of All Ages on the Better Land," edited by Henry C. Fish, D. D., and "Songs of the Soul, gathered from Many Lands and Ages," by S. Irenaeus Prime, D. D.—both choice in their contents and elegant in their externals. The sport of angling may be said to be on the border between the fine and the useful arts. "The Fishing Tourist, Angler's Guide, and Reference Book," by Charles Hallock, is at least written with the enthusiasm of the artist, combined with the painstaking exactness of an economist.
- One of those books, which one counts among literary labor-saving devices, is furnished in "A New Dictionary of Poetic Quotations, covering the Entire Field of British and American Poetry, from the Time of Chaucer to the Present Day, with a Variety of Useful Indexes," by S. Austin Allibone, L.L.D. A work with information enough to make an excellent manual, were it only well-digested and arranged, is "Protection against Fire," by Joseph Bird. The titles following represent an immense unclassified variety:
- The Home: Where it Should Be, and What to Put in It. By F. R. Stockton.
 One Law in Nature. By Captain H. M. Lazello, U. S. A.
 The Case of Ireland stated in Reply to Mr. Froude. By the Very Rev. T. H. Burke, O. P.
 Modern Diabolism, commonly called Modern Spiritualism, with New Theories of Light, Heat, Electricity, and Sound.
 Law Students and Lawyers. The Philosophy of Political Parties, and Other Subjects. Eight Lectures delivered before the Law Department of Howard University. By A. G. Riddle.
 A Genealogical and Chronological Chart of the

Rulers of England, Scotland, France, Germany, and Spain. By C. S. Halsey.

Wanderings of a Vagabond. An Autobiography, containing a History of Racing and Trotting, and also a History of Gambling; with an Exposition of Sharps and their Various Frauds practised under the Cloak of Gambling. By John Morris.

What Woman Should Know. A Woman's Book about Women. By Mrs. E. B. Duffy.

Motherly Talks with Young House-keepers. By Mrs. Henry Ward Beecher.

Miss Leslie's New Cook-Book. A Manual of Domestic Cookery in all its Branches.

A New Banking System. By Lysander Spooner.

The Regulation of All Railroads through the State-Ownership of One. By Charles Francis Adams, Jr.

Memorial of Horace Greeley, with Portrait and Illustrations.

Education in Japan. A Series of Letters addressed by Prominent Americans to Arinori Mori, Japanese Minister.

A Handbook of Hardy Trees, Shrubs, and Herbaceous Plants. . . . With Cultural Details, etc., based on the French work of Decaisne and Naudin. By W. B. Helmsley. With an Introduction by Edward S. Rand, Jr.

An Essay toward an Indian Bibliography. By Thomas W. Field.

A Series of Letters to a Young Married Couple. By Julia C. R. Dorr.

The Hereafter. A Scientific, Phenomenal, and Biblical Demonstration of a Future Life. By Daniel W. Hull.

Which: Spiritualism or Christianity? A Friendly Correspondence between Moses Hull, Spiritualist, and W. F. Parker, Christian.

Quiddities of an Alaskan Trip. By W. H. Bell, Captain C. S., U. S. A.

The Sportsman's Club in the Saddle. By Harry Castlemon. The first of "The Sportsman's Club Series."

One Thousand and One Mistakes corrected. By W. H. Larrabee.

Good Morals and Gentle Manners. By Alex. M. Gow.

High Art: Pictures from the Poets. From the Brush of Louis A. Roberts; and Sport, in Brief Chapters from the Quill of Ikabod Izak.

Behind the Scenes in Washington; being an Account of the Crédit Mobilier Investigation, Rings, Political Intrigues, etc. By Edward Winslow Martin.

The Irish Race. By Rev. Aug. J. Thébaud, S. J.

True Success in Life. By Ray Palmer, D. D.

Men and Memories of San Francisco in the Spring of '50. By T. A. Barry and B. A. Patton.

Political Portraits. By an Eminent Journalist.

Fifty Years in a Maryland Kitchen. By Mrs. B. C. Howard.

The Virginia Housewife, or Methodical Cook. By Mrs. Mary Randolph.

On Hare's Plan of Proportional Representation. By a Yale Graduate.

Marriage—As It Is and as It Should Be. By J. O. Barrett.

Thinkers and Thinking. By J. E. Garretson, M. D.

Hand-Book of English Synonyms, and Proverbs and Phrases, from the Latin, French, Spanish, and Italian Languages, with Tables of Weights and Measures, etc.

The Spider and the Fly; or, Tricks, Traps, and Pitfalls of City Life.

The Amateur Journalist's Companion. By Frank Cropper.

Pigeon Cove and Vicinity. By Henry C. Leonard. Sketches of Irish Soldiers in Every Land. By Colonel James E. McGee.

The Young Housewife's Counselor and Friend. By Mrs. Mary Mason.

Sparkles from Saratoga. By Sophie Sparkle. Presbyterian Cook-Book, compiled by the Ladies of the First Presbyterian Church, Dayton, O.

My Satchel and I; or, Literature on Foot. By Ikabod Izak.

Six Months under the Red Cross, with the French Army. By George Halstead Bryland, M. D.

Ocean's Story; or, Triumphs of Thirty Centuries. By F. B. Goodrich and E. Howland.

The Bazar-Book of Health.

American Railroad Manual, for the United States and the Dominion. Containing Full Particulars of the Mileage, Capital Stock, Bonded Debt, Equipments, Earnings, Expenses, and other Statistics of Railroads as now built, and in Process of Construction. Compiled and edited by Edward Vernon.

The Dew of Youth. Lectures to Young Men and Young Women. By the Right Rev. Thomas M. Clark, D. D., Bishop of Rhode Island.

At Our Best. By Sumner Ellis.

The Sundry Grab. A Complete History of the Great Congressional Theft of \$1,250,000. With the Yeas and Nays in both Houses, a Sketch of the Debates, and a Review of the Apologies. By W. S. Robinson.

Politics and Mysteries of Life Insurance. By Elizer Wright, Late Insurance Commissioner of Massachusetts.

Course of English Reading. By J. A. Spencer.

The Best Reading. New edition, with Additions. Put to the Test. By Charles Chamberlain, Jr.

Liberty and Law under Federative Government.

By Britton A. Hill.

Mission of the North American People, Geological, Social, and Political. By William Gilpin, late Governor of Colorado.

Monopolies and the People. By D. C. Cloud, Muscatine, Iowa.

Irish Emigration to the United States: What it has been, and what it is. Facts and Reflections, especially addressed to Irish People intending to emigrate from their Native Land; and to those living in the Large Cities of Great Britain and of the United States. By the Rev. Stephen Byrne, O. S. D.

The Alchemy of Happiness. By Mohammed Al Ghazzali, the Mohammedan Philosopher. Translated from the Turkish by Henry A. Holmes, Librarian of the [New York] State Library.

Education Abroad, and other Papers. By Birdsey Grant Northrop, LL. D.

Technical Education; What it is, and what American Schools should Teach. An Essay based on an Examination of Methods and Results of Technical Education in Europe, as shown by Official Reports. By Charles B. Stetson.

Singular Surnames. Collected by the Late Edward D. Ingraham. Edited by William Duane.

The Prostrate State; or, South Carolina under Negro Government. By James S. Pike.

Ten-Minute Talks on All Sorts of Topics. By Elihu Burritt. With an Autobiography of the Author.

Our Currency. What it is, and what it should be. By John G. Drew.

What to Wear. By Elizabeth Stuart Phelps.

Memories of Many Men and of Some Women, being Personal Recollections of Emperors, Kings, Queens, Princes, Presidents, Statesmen, Authors, and Artists, at Home and Abroad, during the Last Thirty Years. By Munnell B. Field.

What Shall We Do To-Night? or, Social Amusements for Evening Parties. By Leger D. Mayne.

REPRINTS.—Many republications of English books are not reprints. From various causes the manufacture of cheap books in England is carried on not only for England but for the United States and the colonies. In mentioning some of the more important English works republished here, we make no attempt to distinguish the mode of reproduction, more espe-

cially as the causes of the present state of things may be presumed to be only temporary.

In fiction, scarcely any thing worthy of note appears on the other side which is not at once laid before American readers. The posthumously published novel of Lord Lytton, "Kenelm Chillingly," Fargeon's "London's Heart," and "Golden Grain," F. W. Robertson's tales, especially "Little Kate Kirby," Miss Thackeray's masterpiece, "Old Kensington," "Johannes Olaf" (a translation from the German), "Hero Carthew," by Louisa Parr (a very fresh creation), are among the more important. The visit of Wilkie Collins to this country naturally gave an impetus to the sale of his novels. Two or more editions were started nearly at the same time; one of them under his own sanction, and dedicated to the American people. Rhoda Broughton has her admirers in this country. Her last is entitled "Nancy." Mention should be made of Mrs. Oliphant's "May;" of "Galana, or, The Beggars," by De Liefde (translated); of "The Fair Saxon," by Justin McCarthy; of "Madeleine," by Julia Kavanagh, and of translations from Turgenev, Oberulier, Freytag, and other German authors. The standard British novelists, Scott, Dickens, etc., continue to be published in all shapes. The "Pickwick Papers" have been illustrated by our American caricaturist, Thomas Nast.

Perhaps the department most largely represented among us by English authors is that of Science and Philosophy. Such works as Herbert Spencer's "Psychology" and "Study of Social Science;" Tyndall's "Lectures on Light;" Bagehot's "English Constitution," "Lombard Street," and "Physics and Politics;" Deschanel's "Natural Philosophy;" Helmholtz's "Popular Science Lectures;" the "Critiques and Addresses" of Huxley; Bain's "The Body and Mind;" Figuier's "The Ocean World," and "Reptiles and Birds;" Wm. Thompson's "The Depth of the Sea;" Hooker's "General System of Descriptive Botany;" Lyell's "Antiquity of Man," 4th edition; and R. A. Proctor's "Half-Hours with the Telescope," and "The Moon."

In Poetry, the most noticeable works were Browning's "Red Cotton Nightcap Country," and the anonymous but remarkable "White Rose and Red." In Biography, several works of unusual importance came to us; the autobiographies of John Stuart Mill and of Mrs. Somerville; a second volume of Forster's Life of Dickens; "The Story of Goethe's Life," by G. H. Lewes; "The Oxford Methodists," by Tyerman; Hare's "Records of a Quiet Life;" Lord Houghton's "Monographs, Personal and Social;" Morley's "Rousseau," and Thomas Hughes's charming "Memoir of a Brother." Of Essays, a notable volume is "Liberty, Equality, and Fraternity," by James Fitzjames Stephen. The "Enigmas of Life," and "Literary and Social Judgments," by W. R. Greg, have won the attention of thoughtful readers.

"The Intellectual Life," by Philip Gilbert Hamerton, has been well received.

In Theology, the greatest sensation was made by Dr. Matthew's "Literature and Dogma." A volume of Essays on the Revision of the Authorized Version of the New Testament, by Prof. Lightfoot, Archbishop Trench and Bishop Ellicott, has been issued, with an Introduction by Dr. Schaff. Other works of interest are, Dean Stanley's "Sermons and Travels in the East;" Prof. G. Rawlinson's "Historical Illustrations of the Old Testament;" Dean Howson, on "The Character of St. Paul;" the successive volumes of "The Speaker's Commentary;" the Rev. J. R. F. Eaton's Bampton Lectures, on "The Permanence of Christianity;" the Boyle Lectures on "Moral Difficulties of the Bible," by the Rev. J. A. Hessey, D. O. L.; the volume of the Christian Evidence Society's Lectures, entitled "Faith and Free Thought," with an Introduction by the late Bishop Wilberforce, and "Sermons on Ecclesiastical Subjects," by Henry Edward Manning, Archbishop of Westminster.

Under the head of Travels, appeared "The Land of Moab," by Canon Tristram; an admirable view of China, entitled "The Foreigner in Far Cathay," by W. H. Medhurst; "Old Rome and New Italy," by Castelar; Taine's "Tour through the Pyrenees;" H. Blackburn's pleasant volumes, "Normandy Picturesque," and "Artists and Arabs;" and a sumptuous volume, "Japan and the Japanese," by Aimé Humbert, Envoy Extraordinary of the Swiss Confederation, translated from the French by Miss Cashel Hoey, with numerous illustrations. A work of more than ordinary interest is "French Home Life," a volume of essays reprinted from *Blackwood's Magazine*.

The series of "Ancient Classics for English Readers" is continued, and it would be possible, if it were worth while, to make a long list of miscellaneous and juvenile works which, in the absence of any law of copyright for the benefit of foreign authors, are reproduced here in endless succession. But it is believed that an increasing proportion of the reading of Americans is in the productions of American authors, who, in turn, are finding every year more readers in the mother-country. This growing reciprocity of interest in each other's literature is a bond of peace between the best minds of the two nations, and so, it may be hoped, between the nations themselves.

LITERATURE, CONTINENTAL, IN 1873. The movements in Continental literature in 1873 will be seen by the following extracts from the correspondence of the London *Athenæum*:

BELGIUM.—This country, which escaped almost by a miracle the calamities of the Franco-German War, now understands better than ever the value of her national independence. An important publication, which appeared early in 1873, proves her confidence in the present, and her faith in the future. The

"*Patria Belgica*," published under the direction of Prof. Van Bommel, is a great national encyclopædia; the articles have been written by distinguished professors of the different subjects. The history of Belgium is there retraced from the beginning, and her actual situation is shown, physically and materially, politically and socially, morally and intellectually. The first portion, entitled "*Belgique Physique*" (the last numbers of which have just appeared), treats of the questions which relate to the climate, to the animals, plants, and the rural economy of the country. The "*Patria Belgica*" is not only a work well calculated to strengthen national feeling in Belgium, but foreigners also will find in it a standard work of reference.

In the domain of literature properly so called, we must draw attention to several well-written works, such as "*Morsures Féminies*," by Émile Leclercq, an author of realistic novels, who is full of originality; "*Contes Flamands et Wallons*," by Cam. Lemonnier; "*Romans et Nouvelles*," by Caroline Gravière; and some graceful sketches of life and manners in Brussels, that proceed from the pen of M. H. Pergameni. The works of Auguste Hock, who is a charming story-teller, contain a curious study of popular beliefs and superstitions, a picture of old Liège, and the history of a family through several generations.

Dramatic literature has produced the comedies in verse and prose of Romberg and of Delmotte; "*L'Échéance*," by Stoumon, and "*Les Terreurs de M. Duplessis*," by Hennequin, the witty author of the Vaudeville "*Les Trois Chapeaux*," which had such success in Paris and in Brussels. "*La Mère de Rubens*" must also be mentioned; it is a prize drama by Charles Potvin, the best living poet of our French literature. This same author has written an original book, entitled "*La Corruption Littéraire en France*," in which he analyzes the decline of French manners as shown by its contemporary literature, and he passes judgment upon French writers, great and small, with remarkable clearness and firmness. Alfred Michiels continues the publication of the new edition, of his "*Histoire de la Peinture Flamande*," a most attractive work, which unites imagination with erudition.

In history the year 1873 has furnished a handsome contingent of works. Théodore Juste has published a book on "*Guillaume le Taciturne*," remarkable for careful study of authorities, and for well-weighed and sagacious conclusions. The same historian has also written an interesting biography of "*Lord Palmerston*," who Juste rightly places among the founders and sincere friends of Belgium. "*Le Règne de Marie Thérèse dans les Pays-Bas Autrichiens*," by Ch. Piot, is a conscientious work. F. Hénaut has given a third edition of his excellent "*Histoire du Pays de Liège*," that curious episcopal principality, which existed up to the close of the last cen-

tury, and was so noted for its frequent popular tumults and its popular liberties. In a small work, entitled "*Etude sur les Origines Féodales*," P. A. F. Gérard sustains, with much talent and learning, his favorite paradox, according to which the origin of feudalism must be sought for in Roman institutions rather than in the organization of the German conquerors. E. Reusens, professor in the Catholic University at Louvain, has published his *Éléments d'Archéologie Chrétienne*. In this work he traces the history of religious architecture, of ecclesiastical furniture and sacred iconography (images and pictures), from the catacombs of Rome, to the period of the Renaissance. Among works on history, we may include two political pamphlets, one of them "*Le Prince de Bismarck et l'Entrevue des trois Empereurs*," by A. Deschamps, Minister of State, and one of the heads of the old Conservative party. The other pamphlet, "*Le Parti Clérical en Belgique*," is by Émile de Laveleye, who has also published an elaborate treatise, entitled "*Des Causes Actuelles de la Guerre en Europe et de l'Arbitrage International*."

In the domain of philosophical science, we must give the first place to "*Enseignement et Philosophie*," by G. Tiberghien, professor at the University of Brussels. A small, unpretending, but very curious work is the "*Notice sur les Installations des Charbonages du Hazard*," by Léon d'Andrimont, who is one of the most devoted of Belgians to all the institutions which have for their aim the elevation of working-men. It contains most interesting details about the vast Hôtel-Louise, where two hundred men lodge, belonging to the Colliery of Le Hazard at Micheroux (Liège).

Three volumes of travels deserve to be mentioned: they are "*Sahara et Laponie*," by Goblet d'Alviella, who possesses descriptive power, and has made the most of the effective contrast offered by the two countries which he has explored; "*Voyages aux Montagnes rocheuses*," by the Flemish Jesuit, De Smet, who gives an account of his residence in the midst of the Indian tribes of Oregon (U. S.); and "*Voyage de Bruxelles en Mongolie*," published in the name of the Catholic Missionary Congregation of Scheutveld, Brussels.

In juristic literature, we must notice the "*Commentaire législatif et doctrinal sur les titres du Code relatifs à la lettre de change, et au billet à ordre*," by Ernest Waelbroeck. But especially we must call attention to the second volume of the "*Ancien Droit Belgique; ou, Précis analytique des Lois et Coutumes observées avant le Code civil*," by the late Eugène Defacqz. It is in truth a masterpiece of historical erudition and judicial perspicuity. The learned Prof. Laurant continues to publish his volumes of civil law, which will probably be the most profound and precise philosophical treatise on French law that has ever appeared.

Hendrik Conscience, the fertile novelist, continues to charm the Flemish public. In this branch of literature, we must not omit the latest works of Mistress Courtmans, and of Alb. Van den Abello, Van der Cruyssen, Dodd, Jan Boucherij, and V. de Veen. It must be owned, however, that no romance of transcendent merit has appeared in 1873.

The firm of Brockhaus, of Leipsic, have begun to publish a "Nederlandsche Bibliotheek," as a continuation of the principal literary collections of Europe, which have been already issued by this house. This enterprise is placed under the intelligent direction of the philologist Heromans, professor at the University of Ghent, and of the poet Emanuel Hiel. The two oldest and most important annuals, the "Jaarboekje" ("Annual of Poetry and Prose"), edited for the last forty years by the venerable poet Rens, and the "Studenten-Almanak" ("Almanac for Flemish and Dutch Students"), which is edited by the students of the University of Ghent, have this year both thoroughly kept up their old reputation.

In the domain of literary history, there is an important Essay by Max Rooses, upon the Niebelungen and the song of the Edda. The book called "De Zuid-nederlandsche schrijvers van het tijdstip der fransche overheersching," by J. O. Devigne, is a very curious picture of Flemish literature during the period of the union of Belgium with France (1794-1814).

The "Willems-Fonds," of Ghent, has this year issued an excellent Annual ("Jaarboek"), and has begun to publish the select works of Jan Frans Willems, the founder of the society, who is justly considered as the father of the Flemish movement. He was the first who inaugurated a courageous protest against the violent fancy of the Flemings for the French language after 1830; he was then a learned man and had distinguished himself in literature; his writings throw a new light upon the intellectual movement in Flanders at the period of the erection of Belgium into a kingdom.

Several Flemish works of great importance in an historical point of view have appeared in 1873. Ferd. van der Haeghen, the learned librarian of the University of Ghent, has printed the second volume of the unpublished chronicle of Marons van Vaernewijk, "Van die beroerlike tijden in die Nederlanden, 1566-1568." The author of it was contemporary with the religious troubles of the sixteenth century in Flanders, and he belonged to the Catholic party. In this chronicle he relates the effect produced by the excesses of the Iconoclasts, and traces a startling picture of the severities of the Catholic reaction. His impartiality, his frank simplicity, and his geniality, render his chronicle an invaluable document. Another publication, scarcely less important, is the first volume of the financial accounts of the city of Ghent during the administration of Jacques van Artevelde, "Rekeningen der stad Gent.—Tijdvak van Jacob

van Artevelde, 1336-1349." This edition is published under the auspices of the old Literary Society of Ghent devoted to Netherland History and Literature, which is named "De taal is gansch het volk" ("The Speech is the People"). This publication is directed by four eminently learned men, P. A. Lentz, Nap. de Pauw, Max Rooses, and Julius Vuylsteke. The last-named author has written a little work on this occasion, which is much thought of by those specially interested in the subject: it is called "Eenige bijzonderheden over de Artevelde in de 14^e eeuw" ("Some Unpublished Details about the Artevelde in the Fourteenth Century"). The author displays learning and independence of thought.

DENMARK.—The books to be mentioned are not numerous. Public attention has been occupied by the warfare carried on with astonishing hatred in pamphlets and papers between the two parties, the peasants and the "national-liberals." The socialists, too, have caused a good deal of writing, and so has the Grundtvig Church party, especial excitement being occasioned by a forgery, a falsified text of Luther's catechism. I need not dwell on all this. Foreigners wanting information should consult a recent important German publication, by A. Strodtmann, "Intellectual Life in Denmark: Art, Literature, Politics, Journalism; '73," which is, in spite of some mistakes, and hyperbolic praise of works of literature and art, the most instructive and interesting work by any foreigner on Danish affairs. In the predominating "northern," "Scandinavian," "national" tendencies, a partial change seems taking place. A reaction appears to be already setting in against the present Norwegian school of poetry, which was first brought in vogue (though really little adapted to Danish taste) by Copenhagen critics (Cl. Petersen, etc.), and which had previously been unpopular even in Norway. The spell has been broken by Björnson himself, who has exasperated the Copenhagen public by telling it unpalatable political truths; and Ibsen's last work, "Emperor and Galilean," although eagerly bought, and of a piece with others of his, certainly is read with general feelings of disappointment.

Poetry can this year boast of only one notable production—a lyrical drama, by a very young poet, of German extraction, E. v. der Recke, "Bertran de Born," excelling in polished elegance and theatrical effect, and not devoid of genuine poetic force, although the number of noble and chivalrous traits is perhaps a little unmeasured. In novels, orthodoxy is gaining ground, but cannot avoid snobbishness. H. F. Ewald (best known through the respectable but heavy "historical" novel, "The Scottish Lady of Thjele"), has issued a story, "Agatha," which is a solemn warning to all the young ladies of Denmark against marrying any freethinker, enforced by the sad story of Agatha.

The chief literary achievement of the year is G. Brandes's "Great Currents of Literature in the Nineteenth Century," Second part, "On the Romantic School in Germany." The school is not treated in a flattering way, yet this volume, like the first, has in Germany found the most friendly reception. The posthumous concluding volume of Overskou's "History of the Danish Royal Stage" has begun to appear.

The second and last volume of posthumous memoirs by Orla Lehmann is, like the first, light and readable, vain and flippant—not of so much value to the historian as the disclosures of H. J. A. Raasløff ("My Policy"), which ought to be consulted by students of the sad story of the blundering policy pursued by Denmark in modern times. The historical works of Hansen, Vaupell, Rørdam, Schmidt, etc. (*Athen.*, Nos. 2253, 2305, 2351), are being continued. O. Røder, in his "German and Northern Nations," tries to establish our "national" theory of a peculiar personal intensity and of a peculiar personal relation to God, in the character of the northern nations; but I wish the learned author had first proved that there exists a common "northern" national character—that the Danes do not differ in character from the Swedes and even from the Norwegians as much as from almost any other European nation.

FRANCE.—There has been no sign of falling off in the different departments of French literature. The history of the ancient world has been abundantly illustrated during the past year by French *savants*, not only through the medium of monographs and special histories, but also with the help of topographical researches and explorations. Let us mention, among other works of that kind, MM. Le Bas and Waddington's "Voyage Archéologique en Grèce et en Asie Mineure," and M. Perrot's "Archæological Exploration of Galatia and Bithynia, Cappadocia and Pontus." In these costly and magnificent volumes graphic art has been profusely employed to elucidate the text, and the latest results of the excavations, conducted by accomplished antiquarians, are satisfactorily described. The philological productions which have appeared during the present year do not amount to much, nor do they include any thing of transcendent merit. The fourth volume of M. Bréal's translation of Bopp's "Comparative Grammar," together with the index, which adds so materially to its usefulness, should not be forgotten; it treats, however, of only the Indo-European languages, and therefore it leaves unnoticed a considerable portion of the philological ground.

The list of historical productions I have to enumerate is rather a poor one, nor can I mention any work equaling in value M. Georges Picot's "Histoire des États Généraux;" Historical science has lost one of its most distinguished representatives in M. Jal, whose patient researches contributed so much to our ac-

quaintance with the annals of the French navy, and who, in his "Dictionnaire d'Histoire et de Géographie," has rectified so many popular errors. The last work published by this gentleman, "The Biography of Du Quesne," forms part of a series which the author was not spared to finish, and, while professing to be nothing else but a monograph, it describes, as a matter of fact, an important part of Colbert's administration. If you would see what can be done to rehabilitate in public opinion persons whose fair name has been for centuries stained by calumny, read M. de Barthélemy's "Life of Charlotte de la Trémoille, Princess of Condé;" if you want to admire the spirit of impartiality which should be the distinguishing mark of all historians, turn to M. Guizot's "Vies de Quatre Grands Chrétiens Français." Among historical works of a general character, let me mention also the amusing and instructive compilation to which M. Challamel has given the title of "Mémoires du Peuple Français;" here we have less the results than the materials from which these results are derived; it is a vast quarry full of stones, to be afterward hewn and shaped by some competent artist. The sixth and last volume of the "Correspondence of Louis XVI., Marie Antoinette, and Madame Elizabeth," published by M. Feuillet de Conches, is composed chiefly of documents which had already appeared in print. The memoirs of General Grouchy, and those of Count de Ségur, both treat specially of the empire, and are of unequal interest. The former of these works is particularly designed to justify the general's conduct at Waterloo. M. de Ségur's voluminous work includes a new and revised edition of that "prose epic," as M. Vinet called it, the "Histoire de Napoléon et de la Grand Armée pendant l'Année 1812." M. de Vielcastel's conscientiously written but dull "History of the Restoration" has reached its fifteenth volume, and brings us to the Greek insurrection of 1826; then comes M. Taxile Delord's "Histoire du Second Empire," followed by a host of volumes, pamphlets, state papers, atlases, etc., on the events of the years 1870-'71. The International Society had already begun its operations at the period when M. Delord closes his fourth volume, and the Mexican Expedition was shedding an ominous gloom over France. But the catastrophe could not long be put off, and disasters ensued such as the country had never witnessed before. Every political personage who had a share in all these events is now anxious to explain what that share really was; M. Glais-Bizoin apologizes for the dictatorship of M. Gambetta; Generals Vinoy and De Wimpffen propound their views on the reorganization of the army; M. Duvergier de Hauranne sounds the pæan of a Conservative republic; while M. Naquet eulogizes Radicalism, and M. Eugène Pelletan endeavors to show that writers and politicians on the royalist side are persons

about whom we should say, as Boileau did of yore in the case of Corneille's *Agésilas*, "*hélas!*" M. Dauban, the indefatigable *suretour* of historical documents, gives us, from well-authenticated pieces, the history of the Paris Commune, and brings to light the lower strata of French society, the famous *couches sociales* immortalized by M. Gambetta. M. Villemain's "History of Pope Gregory VII." would have created some sensation forty years ago, when its publication was first announced; it reads now merely as a piece of fine writing. I shall only mention here the cheap duodecimo edition of Saint-Simon's "Memoirs." It is intended, I suppose, as a popular work for general readers, and as a forestate of the more scholarly one which Messrs. Hachette announce in their collection of "les Grands Écrivains de la France." M. Victor Palmé proceeds slowly with his magnificent reprint of the Benedictine "Recueil des Historiens," and he has issued, moreover, the first two volumes of a new edition of the "Gallia Christiana." Works like these are always sure to obtain much success, especially when they have the benefit of a thorough revision by such *savants* as M. Léopold Delisle. I have also seen with unfeigned pleasure the Villehardouin and the Joinville, edited by M. Natalia de Wailly. These two splendid octavos, copiously annotated, illustrated with maps, woodcuts, glossaries, and indices, form part of a series of French mediæval *chef-d'œuvre* published by Messrs. Didot, under the editorship of M. Léon Gautier, the enthusiastic annotator of the "Chanson de Roland." I shall conclude my notice of historical works by mentioning briefly the remarkable book which M. Perrens has published on the progress of democratic ideas in France during the middle ages.

In the sphere of moral and metaphysical science the outcome of the present year has been singularly feeble, and the list of books worth noticing includes a very small number of really valuable productions. If the excellent but too concise little text-book of M. Harten ("Principes de Psychologie") deserves to be taken into serious account, it is because it places itself at the stand-point of revealed religion. Father Lescœur occupies the same vantage-ground, and challenges the *philosophes* to show that their exertions have ever given the right solution of the problem of happiness. The great battle-field on which the champions of Positivism place themselves is, naturally enough, physical science, the origin of species, and the doctrine of evolution. The most deplorable feature in the whole controversy is the fact that, if questions connected with these sciences are discussed by a priest, it is always assumed on the other side that the discussion must necessarily be the result of *parti pris*, and be completely prejudiced. Against so extraordinary an assertion, M. de Valroger protests very strongly in his new work on the "Genesis of Species," and, the

better to remove every ground of complaint, he allows in all instances the *savants* whom he criticises to speak for themselves. The different essays here collected appeared originally, if I am not much mistaken, in the "Revue des Questions Historiques," a periodical of decidedly Ultramontanist sympathies, but which has nevertheless done a great deal for the progress of historical studies. The new editions of M. Joly's excellent book on "Instinct," and of M. Francisque Bouillier's "Le Principe Vital et l'Âme Pensante" must not be forgotten here, because they have both received considerable augmentations, and are really important contributions to metaphysical literature. M. Bouillier, as your readers may, perhaps, remember, is an *animist*; I mean that he looks upon the soul as the seat of the activity which pervades our whole frame. M. Littré's series of review and newspaper articles, published together in a thick volume, give him an opportunity of explaining his theory on the concatenation of sciences and their interdependence. Never was Positivism so completely stated, never was the programme of the new school made so clear and so harmonious. M. Littré then selects from the cyclopædia of human knowledge a special branch—history—and tells us what the teaching of that science should be; examining, by way of illustration, the "Histoire des Langues Sémitiques" of M. Renan, and M. François Lenormant's "Manuel d'Histoire Ancienne."

I know of few works so interesting as a biography, when it is well done, and when the subject of it really deserves to be remembered as a public character. M. de Godefroy Mesnil Glaise, in describing the works, the virtues, and the industry of a whole family during three centuries, has earned fresh title to the gratitude of all those readers who love and appreciate true merit. The Godefroys, whose labors he analyzes, were his ancestors; as magistrates, historians, lawyers, and archaeologists, they enjoyed European reputation, and they transmitted down from father to son, for the space of three hundred years, those traditions of integrity and high principles which were formerly the heirloom of the old French *bourgeois*. The interest belonging to the biography of the notorious Fouché is of a totally different kind, but it is not the less real, and Count de Martel has contrived to bring together, in this new work, a number of curious particulars, not only on the commissioner of the Revolutionary Government, but also on the Reign of Terror. It is well known that the theories of our modern communists are far from possessing the merit even of originality; they were held by Gracchus Babeuf, and Fouché indorsed them when he said that "les richesses ne sont entre les mains des individus qu'un dépôt dont la nation a le droit de disposer." Count de Martel promises us a second volume on him who afterward paraded about the title of Duc d'Otrante at

the Palace of the Tuileries, and shared with Talleyrand both the favor and ultimately the suspicions of Bonaparte.

Melin de Saint-Gelays, one of the most distinguished members of the *Pleiad*, deserved the honors of a new edition, although his poetry seems to me rather spoilt by the *concetti* which at a later period disfigured the composition of Voiture and Sarrasin. MM. R. Dezeimeris, Th. Beaulien, and Blanchemain, have joined together their learning, their taste, and their acquaintance with the sixteenth century, for the purpose of producing this edition, and they have given it in the "Bibliothèque Elzévirienne." The notes left by La Monnoye are made good use of at their proper places, and three modern commentators leave no passage unexplained which can enable us to understand better the political and literary history of the sixteenth century. Melin de Saint-Gelays belonged to the earlier part of the Reformation era, and represented chiefly its political side. With Agrippa d'Aubigné we have to consider principally the political and religious aspect of that busy era. Recent editors may be named to whose zeal we are indebted for reprints of some of D'Aubigné's principal works; thus, M. Ludovic Lalarme has given us the memoirs and the "Tragiques," while "Les Aventures du Baron de Fœnesté" was published by M. Prosper Mérimée, but no one had yet thought of giving an edition of the Huguenot leader's complete works, and yet they are well worth the trouble which a competent annotator might be inclined to bestow upon them. A writer whom M. Th. Lavallée describes as *une des gloires littéraires de la France*, and of whose productions M. Michelet says that they are *une œuvre capitale de la langue*, should appear before the public in a proper guise, and not merely in the costume of two centuries ago. So have thought MM. Réaume and De Causade; these gentlemen's first volume comprises D'Aubigné's correspondence chiefly of an *inédit* character, and arranged in eight different series.

There can scarcely be a French novel conceivable, of course, which does not derive its interest from a love-intrigue between a married woman and some gay Lothario. MM. Zola and Belot go farther still, and manage to be so revolting that, compared with "Le Ventre de Paris" and "La Femme de Feu," even M. Théophile Gautier's tales are decency itself. We have, it is true, M. Jules Sandeau's "Jean de Thommeray," MM. Erckmann-Chatrian's "Deux Frères," and half a dozen others, but these are mere exceptions. The "Enchantements de Prudence," written by a certain Madame de Saman, and enlorged in a Preface by Madame George Sand, are a curious instance of that mixture of high-flown philosophy and passion which rendered "Indiana," "Valentine," and "Jacques," so popular forty years ago.

GERMANY.—In 1871 there were published

in Germany not less than 10,669 works altogether. In 1872, the number rose to 11,127, and probably 1873 will show a further increase. Whether the quality of German publications continues to improve as the quantity to increase, is a point there would be some difficulty in deciding.

To Belles-Lettres there belonged about 950 works in 1871, in the following year 998; and in these numbers are included, especially as regards plays and novels, an exceedingly large number of translations from the French and the English. Lyrical poetry is the portion of imaginative literature that is most free from foreign influences, but it is also the portion in which noteworthy productions have this year been fewest. The most original, one such as is possible only in Germany, the land of home and family life, proceeds from a dead man, and is dedicated to dead people. It is the collection, now first published, of "Kindertodtenlieder," four hundred and twenty-eight in number, by the late Friedrich Rückert. At home in the literature of the whole world, and in his own home the ideal of a German father, he composed this volume in memory of two of his darlings snatched away at an early age—his little daughter Louise (died December 31, 1838), and the "beautiful boy" Ernst (died January 16, 1834). Upon the whole, the collection is a fresh proof that the atmosphere of the whole of wedded life in Germany is pervaded by a poetical spirit, such as in other countries is pretty well confined to the honeymoon. The Buddhistic view of life has found a gloomy and imposing expression in the poems, recently collected, of Dranmor (Ferdinand Schmidt, of Paris). A Byronic tone is visible in him as of others; but he has this advantage, that he is no mere æsthetic mask. The Austrian nobility that already counts among its members several poets, such men as Anastasius Grün (Count Anersperg) and Fr. Halm (Baron Münch), and ladies like the Countess Wickenburg and Madame M. v. Eschenbach (the Baroness Ebner), has, this year, furnished in the persons of the husband of Countess Wickenburg, Count Albert Wickenburg, and the Baroness Sèphine Knorr, a reinforcement to the army of German lyrists, which both in point of matter and in point of form can claim a respectable place. Count Albert's translations, especially from the verses of the English Radicals, which are little known in Germany, are like the imitation of Drayton's "Nymphidia," which he and his wife published together last year, remarkable for fidelity and skill.

Neither among plays for the boards nor plays for the closet can this year boast of any striking production. It would almost seem as if our dramatic literature were falling off in quality as the rewards offered for its encouragement are getting more numerous. There are at present in Germany two great prizes for plays, that instituted in honor of Schiller at Berlin, and

that founded in memory of Grillparzer at Vienna. The former may be won by a work designed only for the closet: in accordance with the sound theory of Grillparzer, that a play is intended to be seen not read, the latter can at present be gained only by a piece which has met with permanent success on the German stage. Still, our theatre produces nothing but Offenbach's burlesques, and scores of highly immoral, if highly effective, Parisian comedies. Already on several occasions the Schiller prize has not been awarded. In accordance with the stipulations made at its foundation, the Grillparzer prize must always be awarded; but the judges, among whom are Dingelstedt and Laube of Vienna and Dr. Hettner of Dresden, will have difficulty in coming to a decision that shall not be open to objection.

The terrible gaps which death has during the last few years caused in the ranks of German dramatists remain. The places of Grillparzer, Hebbell, Halm, and Otto Ludwig, are not yet occupied. The "Shakespeare Studies" of the last-mentioned, published posthumously more than twelve months ago, shows, in spite of the unfair harshness they display toward Schiller, the high standard that the writer put before himself. Of seven plays which he finished, but two, "The Hereditary Forester" and "The Maccabees," have seen the footlights. The former tragedy, with its powerful dialogue, and its rugged hero, who seems as if carved out of oak, has secured a permanent place on the German stage. Of thirteen other pieces, there exist in some cases sketches of the plots, in others entire passages worked out. Among them are a "Tiberius Gracchus" and a "Wallenstein," which the author wished to set against Schiller's.

Four-fifths of the comedies presented on the German stage are of French origin, and yet the comedies of a single German writer, Rodrik Benedix, who died in the present year, now that they are published in a collected form, fill twenty volumes. His Rhenish fellow-countryman, Wolfgang Müller, of Königs-winter, whose death has occurred in 1873, composed comedies, one of which, a sketch in one act, "She has found her Heart," is remarkable for freshness of tone and a naïve plot; another, the political comedy, "Above the Parties," obtained the second prize at the Vienna competition. A new accession to the list of those who write for the stage is Paul Lindau, the witty author of "Letters of a German Kleinstädter" and "Literary Indiscretions." A one-act comedy of his, "On a Diplomatic Mission," obtained the second of the prizes offered this year by the management of the Vienna Stadt Theatre. The most successful piece, however, has been an entertaining and well-constructed piece by Wilbrandt, whom I have already mentioned, called "The Painters." It is in the style of "The Journalist," by Freytag, which is not unreasonably regarded as the best of recent German comedies.

The most original romance of the year, Gustav Freytag's "Ingo and Ingraban," is, as Friederich Spielhagen pointed out in the lecture he delivered in Berlin on the function of the novel, hardly to be called a novel. The first part, at all events, is rather an epic in rhythmical prose. "The Germania" of Tacitus, Homer, and the "Lay of the Nibelungen," are in equal measure responsible for it. The work which is dedicated to the Crown-princess of Germany, the Princess Royal of England, is intended to be a glorification of the ancient German race of princes, whose present representatives possess the throne of the German Empire. While the author undertakes to depict the romantic destinies of the family at various periods, he endeavors also to write a history of the growing strength and culture of the German nation down to the present day. The whole work, so different from Freytag's former productions, may, in its way, be called classical, and attests the fine cultivation which has enabled the natural powers of this writer, who is ever swayed by "tendencies," to reach such a pitch of perfection. The second part, "Ingraban," contains the history of a descendant of the hero of the first part. Ingraban is described as living in Thuringia in the days of the apostle of Germany, the Anglo-Saxon Winfried (Boniface), and as being killed, together with the saint, by the heathen Frisians. This second story is in isolated points equal to the first, but it is far from possessing the same artistic finish.

The scene of Freytag's novel is laid among the oaks of Tacitus. The actors in Spielhagen's last tale, "Ultimo," tread the slippery pavement of the Exchange. The whole action is confined to the events of little more than twenty-four hours, the situations and characters are full of power, and the ending, although quite justifiable and unforced, is a surprise.

Another ex-member of the Munich Round Table of King Max, Fr. Bodenstedt, the author of "Mirza-Schaffy," has also made his *début* as a novelist this year. His "Château in the Ashwood" is directed against the Ultramontane movement in Germany; but, in the midst of political and philosophical disquisitions, which are spun out far too great lengths, the portraits of many notabilities of the artistic and learned worlds at Munich peep out. The last novel of the former member of the Frankfort Parliament, Moritz Hartmann, which he left incomplete at his death, has been finished by his friend and fellow-countryman, Leopold Kompert, known by his "Tales of the Ghetto." It is called "The Mother's Memorial," and forms the first, properly the ninth, volume of the collected works of the deceased. Hartmann, a Bohemian German, once called "der schönste Mann der Paulskirche," belonged to that young Austria whose inflammatory verses announced the revolution that was brewing in the very midst of Metternich's "Polizei-staat." The publication of his collected works

will recall to the memory of the world of readers many gems of imaginative writing.

I should fill several columns were I merely to give the titles of the almost unlimited number of novels of all sorts. However, a small psychological study called "Marianne," by Ferdinand von Saar, an author who writes too little, deserves notice for masterly analysis of character and classical simplicity of style. It is a solitary pearl in the flood of fiction.

My notice of the biographical literature of the year, which has been unusually large, may properly be placed here. As written by a band of Berlin *savants*, there is, to be sure, little that is romantic about the career of Alexander von Humboldt, even in a little youthful love-affair, to which only a cautious allusion is made. There is all the more in the life of the late—he is at last really dead—Prince Pückler-Muskau, which the well-known Ludmilla Assing has written without the slightest discretion. The two travelers form a curious contrast.

The relations between Humboldt and the Prussian court, and especially the late Friedrich Wilhelm IV., have, as everybody knows, been inconsiderately revealed by Varnhagen's Diaries. The compilers of his biography throw but scanty light on them. On the contrary, there could hardly be a more beautiful monument to the memory of the gifted but misunderstood monarch than the "Selections from the Correspondence of Friedrich Wilhelm IV. and the Chevalier Bunsen," edited by the veteran Leopold Ranke. The friendship between the then absolute ruler of a great kingdom and the *bourgeois savant* who was his servant and subject, might rightly be called unprecedented. After the publication of these intimate and confidential letters, it would be unjust to doubt that the King had a high idea of his duty as a Protestant ruler of Church and State. Bunsen, whose independence is brought out into great prominence by the hasty outbursts of the King, strove vainly to combat his master's dislike to a constitution, and, at last, he himself fell under the suspicion of "Liberalism."

Among the other letters that have been given to the world this year, the most noticeable are the "Selections from Goethe's Letters on Scientific Subjects," published by Prof. Bratranek, under the directions of Goethe's heirs, and the "Life and Letters of the Painter Wilhelm Tischbein," who also had to do with the Weimar circle, and are edited by Fr. von Alten. It is well known that Goethe was a precursor of Mr. Darwin; but the reader will learn with surprise from his letters to Goethe and the Duchess Amalie of Wiemar that Tischbein made use of his stay at Naples to study the descent of marine animals, and that his results came curiously near the modern theory of Natural Selection. The literary remains of Fr. Förster, edited by H. Klette, is especially interesting from the youthful recollections contained in it of the mother of the poet

Theodor Koerner, Minna Koerner (*née* Stock), of Goethe's visits when a student at Leipsic to her father's house, and Schiller's stay in her own house at Dresden.

Of the biographies which form a contribution to political history, Helfert's "Life of the Empress Maria Luise," the widow of Napoleon, is most remarkable from the novelty of its authorities, and, for an Austrian statesman, impartial handling. The change of affairs in Austria has had this beneficial effect: that the documents relating to modern history, which in Metternich's time were jealously guarded, are now thrown open without hinderance to inspection. The publication of the letters of the imperial house preserved in the archives, begun by Arneth, the distinguished historian of Maria Theresa, has been followed up by the edition of the correspondence of the two Emperors, Joseph II. and Leopold, with the Chanceller Kaunitz, superintended by A. Beer.

Of histories, properly so called, those of the last war are naturally most sought after by the public. We must be satisfied if the triumphs of historical learning and historical art, like the collected issue of Ranke's works that is slowly advancing toward completion, and the "History of the City of Rome," by Ferdinand Gregorovius, which has at last been finished, attract the attention of a small but not the worst part of the world of readers. The latter book is no more remarkable for the copiousness of its matter than the charm of its manner. Among books relating to the war, the still unfinished work of the Prussian General Staff deserves the first place for correctness and objectivity, but certainly not for style. The defense of Metz is related in a book by Firks, small, but full of information. The behavior of the Prussian Guards from Metz to Paris is the subject of a somewhat highly-colored narrative by Rudolf Lindau, who writes as an eye-witness, and was present at the headquarters.

To the history of civilization belongs the attempt at a "History of the Origin of Mankind" by Otto Caspari, which the author, unlike Mr. Tylor, seeks to base on the science of Racial Psychology, founded in Germany by Steinthal and Lazarus. Sketches of modern civilization are contained in the "Pictures from the Intellectual Life of Our Day," by Julian Schmidt. Akin to these, half sketches of civilization, half books of travel, are the pleasant pages of Julius Rodenberg, "From England," which have already found an English translator, and the same writer's "Vacation Journeys through German and Bohemian Towns."

The number of philosophical works which of late years has grown small, rose from 163 in 1871, to 180 in 1872. It is to Hartmann's "Philosophy of the Unknown" that we owe this essential service. Of works of considerable extent and independent scientific importance, I may mention the "Investigations in

the Field of Philosophy," by Baumann; the "Theory of Perception," by Drosbach; and Spir's book on the theory of knowing, "Thought and Reality." The last is based upon an eclectic view. The Nestor of living German "Professors of Philosophy," the aged J. H. Fichte, the son of the celebrated originator of Subjective Idealism, and himself the founder of a theistic school, to which Ulrich, Carrière, Wirth, and others belong, combats in his most recent publication, "A Theistic View of the Universe," at once the atheism of Schopenhauer's school and the pantheism of Hegel. He has also brought out the second volume of his psychology, and maintains in both books his realistic theosophic theory; while in the "Theory of the Notion of Space," O. Stumpf, a pupil of Lotze, adopts an empirical basis, and has paid some attention to English psychologists. The masterly work of E. Zeller treats, in a classical style, of the "History of Modern German Philosophy since the Time of Leibnitz." In æsthetic, I may mention the "Critical History of Æsthetic," by Schasler, now finished; the sixth part of the "Critical Studies," by Vischer *père*, and the interesting monograph "On the Sense of Sight," by Vischer *fils*. All three are Hegelian in tone, and directed against the Herbartian school.

It is a sign of the times that of all branches of literature, theology alone last year showed a decrease (from 1,362 works to 1,234)! Should it show an increase in 1878, it will be due to its foes rather than its friends. The "New Faith" of Strauss has called the adherents of the "Old Faith," rationalists, and believers in the supernatural to arms, just as his "Life of Jesus" did nearly forty years ago. Of the writers against Strauss, whose name is legion, I can only mention here Huber, Froeschammer, J. B. Meyer, Zeising, and Nietzsche. All Strauss's friends have turned his foes, but his foes have not become his friends. His former comrades of the Hegelian school cannot pardon him for having gone over to the Materialists.

GREECE.—In spite of the Laurium dispute, the year has been fertile in literary productions. In modern Greek poetry especially, "The Galatea," of M. Basilides, deserves particular attention, because the author shows, in a spirit wholly Greek, the triumph of fraternal affection over the lover's passion; and because in this point his "Galatea" differs from the "Bride" of Schiller, the "Adelaide de Guesclin" of Voltaire, and the "Francesca da Rimini" of Silvio Pellico. The Poem of Prof. Antoniadæ, descriptive of the Armatoles, who in every respect resembled the Caterans of the Highlands of Scotland, paints admirably the life and manners of those intrepid warriors, and their bloody struggles against Ali Pasha of Janina.

In prose I have this year to mention the admirable translation of "Thucydides," and of the "Iliad" and "Odyssey," by M. Sealides,

the excellent treatise by Prof. Venizelos on the private life of the Greeks, ancient and modern, the studies on Neo-Hellenic mythology, of M. Politis. In the philosophical sciences I shall confine myself to mentioning, with the warmest praise, the "Researches and Conjectures regarding Blossius and Diophanes," of M. Renieris, Governor of the National Bank. The learned author, after throwing much light upon the influence exercised by Greek ideas on Roman society, devotes himself more particularly to proving the influence which the doctrines of Blossius and Diophanes had upon the Greeks and their project of reform.

M. Paul Lambros has brought out an important treatise on the coinage of the kingdom of Cyprus under the Franks. In the last century only two coins of this kingdom were known. Now, M. Lambros describes 312, of which he has published 141, presenting a great variety of types, shields, escutcheons, horsemen, portraits, etc. In the same publication M. Lambros gives the names of the various pieces used in Cyprus, their weights and current values, and he corrects the mistakes both of De Mas Latrie and of all preceding writers on the numismatics of the kingdom of Cyprus.

In theology only two works deserve mention: the publication by the Rev. Agathangelos of a manuscript containing the "Dogmatic Theology" of Bishop E. Boulgaris, and an ecclesiastical history by the learned professor at the university, M. Kyriakós. The first of these books is certainly not abreast of the day; yet it merits attention from its vast erudition, and clearly proves that the Greeks, during their long servitude, were by no means unacquainted with the labors of the learned men of the West. The second work, which is based with great care on the best German works, especially those of Gieseler, Hase, and Kurtz, is extremely interesting to us, as the author has dwelt especially upon the history of the Eastern Church from the fall of Constantinople to 1870. The author's final conclusion is that Christianity is the only religion with which progress is possible.

HOLLAND.—All branches of literature have been well represented in Holland in 1878; and the increased activity in Belles-Lettres forms, in particular, a contrast to the state of matters prevailing in former years. As usual, Theology takes a high place. E. F. Kruyff has written a history on Anglo-Catholicism; while Dr. E. J. Lorgion has begun an ecclesiastical history of the Netherlands; and the first volume of an historical sketch of the "System of Religious Instruction in Holland in the Sixteenth and Seventeenth Centuries" has been brought out by Chr. Sepp. J. G. de Hoop Scheffer's "History of the Reformation in the Netherlands down to the Year 1531" is a most remarkable book. Besides these, the address delivered by Dr. C. P. Tiele on assuming the professorship at the Seminary of the Remonstrants at Ley-

den is worth reading. The subject is "The Position of the Religious Ideas of Primitive Peoples in the Universal History of Religion."

The "Camera Obscura" of N. Beets remains the great hit among modern Dutch novels. Of those of this year I may mention "Forty Thousand Pounds," by A. R. Donker; "Dutch Ladies and Gentlemen," by Dr. J. T. Ten Brink, a collection of five tales; "Gederailleerd," by Ger. Keller, a story announced long ago, and at length published; and an anonymous novel, if novel it can be called, dealing with the Dutch Old Catholics in the time of Peter Codde, and called "Rome against Utrecht." The favorite novelist J. J. Cremer, has brought out another novel, "Hanna de Freule." Among poems I may mention, besides new editions of De Genestet, and N. Beets, a production of Schaepman, called "Napoleon;" and "Londinia," a highly-successful mock heroic in hexameters, by C. Vosmaer.

Not less industriously investigated is the history of Art. Besides monographs by A. Verhuell on Cornelius Troost, and by C. G. Schneevoght upon engravings after Rubens, I may name the beautiful work of C. Vosmaer on Frans Hals, which is adorned with etchings by Prof. Will. Unger, of Vienna. An historical sketch of Painting in the Netherlands from the fourteenth to the eighteenth century, by Dr. J. van Vloten, although trustworthy, is intended mainly for popular reading.

The history of their native country has ever been an object of interest to the Dutch, and this year no less than three new general histories of Holland, by J. A. Wynne, P. H. Witkamp, and J. de Bosch Kemper, respectively, have appeared. As yet only the history of the period since 1880 is treated of in the work of the last-named author. To that time belong the interesting letters of the late minister, J. B. Thorbecke, to the head of the orthodox party in Holland, M. Groen van Prinssterer. Exceedingly valuable for Dutch history is the edition of the mediæval "Keuren" of Leyden, by H. G. Hamaker. Christian Sepp's "Historical Inquiries," the second volume of which has made its appearance, is mainly devoted to the Reformation in Germany and Holland, but treats of it chiefly from a literary and bibliographical point of view. De Witte van Citters has made an important contribution to the history of the eighteenth century, especially as regards the government of the towns at that time. Dr. P. L. Müller writes in German; still there is a great deal that is most valuable in its bearing on the history of the Low Countries during the seventeenth century, in his book on "William the Third of Orange, and George Frederick of Waldeck," which contains a number of letters of those remarkable men, and other documents which are now printed for the first time.

The East Indian Archipelago attracts every day more attention in the mother-country. Besides a handsome volume with numerous

illustrations, and with letter-press by William Ritter, I may mention a geographical, ethnographical, and historical description, which is appearing in parts, of the island of Java and its inhabitants, by Prof. P. J. Veth, President of the Geographical Society that was established lately; and especially a splendid work by Dr. C. Leemans, on the Remains and Antiquities of Bôro-Boedoer. The Government pays the cost of this book, which contains 393 lithographs, and is highly important for the history of Javanese Art, as well as its archæology.

HUNGARY.—In the list of original scientific productions, there are only a few works which fully deserve our attention. Among these is Dr. W. Frankel's "A hazai és külföldi iskolázás a XVI. Században" ("The Hungarian and Foreign Schools in the Sixteenth Century"), a really careful compilation from data found in the archives of Hungary and of the neighboring countries. Dr. Frankel, in his present book, has given us a laudable proof of his religious tolerance, for, as he is a Catholic priest, one would have scarcely expected to find him bestowing such great care upon the Protestant schools of Hungary, where out of 156 Latin schools, 128 in the latter part of the sixteenth century belonged to the Protestants, nine to the Unitarians, and the rest to the Catholics. The second book I have to speak of is Mr. Paul Hunfalvi's study of the Konda Vogul language, consisting this time of the edition of "The Vogl Translation of the Gospel of St. Mark," accompanied by a grammatical sketch and a vocabulary. Researches in this southern branch of the Vogul language, which is fast disappearing, are highly interesting to the students of comparative philology, for besides augmenting the links of affinity between the Magyar and other Ugrian languages, they will greatly contribute to lift the veil of ethnographical uncertainty which hovers over the question of the mutual relation between the Ugrian and Turco-Tartar languages. Further, there is Dr. Goldziher's "A Nemzetiségi Kérdés az Araboknál" ("The Question of Nationality with the Arabs"), in which our young but gifted Orientalist treats of the famous anti-Arab national movement of the Mohammedans, known under the name of Shu'ubiyya. The specialty of Dr. Goldziher, who is now absent from Hungary upon a scientific tour in Syria, is the study of the Arab grammarians; and the edition of "Ibn Sidik," which he is now preparing, will form a precious contribution to our knowledge of the Arab language. As last, but not least, I may mention M. Stephen Toldy's "A Jezsuiták Magyarországon es egyebutt" ("The Jesuits in Hungary and Abroad"), which has come out while I am writing these lines, and which, to judge from a single perusal, is full of valuable information relating to the doings of this order in Hungary. If I add to the above sundry learned dissertations upon historical

and linguistic topics, such as Mr. Alexander Székely's "Loránti Zsuzsana;" a monograph of Magyarhazai's, and some minor contributions of the philological paper, the *Nyelvtör*, we may fairly consider the list of the original and scientific publications of the year complete.

Original works of fiction are extremely few, and the best among them are: "Déli Bábok hőse" ("The Hero of the Fata Morgana"), a versified romance, to which the Kiszfaludy Társaság awarded a prize, and which is in many respects well worth the curiosity with which it was looked forward to, and the favor with which it was received by the public. If the tendency visible in the novels of M. Jókai were worthy of his wonderful descriptive powers, he certainly would deserve to be ranked with Dickens, or the best French novelists. M. J. Vajda's versified novel, "A szerelem hőse" ("The Hero of Love"), likewise deserves honorable mention as a good specimen of lyric poetry.

In conclusion, allow me to say a few words upon our Dramatic Literature. Our living representatives in this field are, Meszsa. Kol Tóth, A. Bérezik, Eugen Rákossy, whose newest composition, "A krakói barátok" ("The Cracovian Friars"), was well received, and by whom the Hungarian literature was enriched last year with two volumes of dramatic works, and the greatest of them all, M. Szigligeti, of whose compositions "Struensee" has been brought in the last year upon the stage of the National Theatre as his hundredth piece.

ITALY.—In one single year we have lost Manzoni and Guerrazzi, Giannone and Dall' Ongaro, Lambruschini and Bianchetti, Rattazzi and Ossati, Donati and Mariani, Maggi and Promis, Zuccagni-Orlandini, François Rossi, Dom. Mauro, David Obiosone, Charles A. Valle. What an obituary! A great deal of our contemporary literature has this year been devoted to rendering honor to the names of the illustrious departed. Those who were removed from us in the years that are passed have also been much in our thoughts; the Count de Cavour and Maxime d'Azeglio are the chief of these. Among the numerous translations which have appeared this year of French, English, Spanish, German, and Russian novels, I must mention as peculiarly successful a translation in blank verse of Chateaubriand's "Martyrs," by Ferd. Santini; also, the poems of Hesiod, by Lorenzo Pozzolo, of Lombardy; the "Georgics" of Virgil, by Fr. Combi, of Trieste; the "Dialogues" of Plato, by M. Ferrai, professor at the University of Padua. The Rev. Matté has attempted to translate the "Inferno," of Dante, into Latin, and has performed the difficult task well. M. Charles Valenziani, of Rome, has just published a Japanese text, with a corresponding translation in Italian, which is much thought of by *Sinologues*; the name of the text in the original is, "Kan Kau-Wau Rai" ("The Path of Filial Piety"): it is a moral treatise of ab-

sorbing interest. M. Amari, our celebrated historian and Arabic scholar, has recently published a new series of Arabic texts concerning the history of the middle ages of the Republic of Genoa, under the title of "Nuovi Ricordi Arabici."

For English readers who have not much time to devote to the subject, and who yet may desire to know something of the life and literary labors of Manzoni, I would especially recommend four excellent Studies upon Manzoni, which have appeared this last year. The first is by that celebrated poet and novelist, Giulio Carcano, of Milan; the second is by M. Victor Bersezio, the distinguished critic and novelist of Turin; the third is by Signor Filice Jenosta, of Milan; and the fourth is by that elegant poet, Ferd. Galanti, of Venice. M. J. Storza will publish next January, at Pisa, a volume of Manzoni's letters, most of which have not been yet in print. M. Giorgini, the son-in-law of Manzoni, promises to give his personal recollections of his own relations with the author of "I Promessi Sposi." Of all the old literary *habitués* of Manzoni's house, only two (so far as I am aware) reside at Milan, two illustrious authors, M. O. Canth, the historian and author of "Margherita Pusterla," and Giulio Carcano the author of the "Angiola Maria." If two, men like these were intrusted with the task of collecting the writings and correspondence of Manzoni, the world might feel satisfied that no wrong would accrue to the fame and reputation of Manzoni.

Guerrazzi has left behind him a voluminous romance, entitled "Il Secolo che Muore;" and also a book of autobiographical memoirs. The romance is at this moment in the course of publication at Milan; but as to the memoirs, I think it will be some time before we see any thing of them. The nephew and adopted son and heir of Guerrazzi has nominated a committee at Leghorn, to superintend the publication of the whole of Guerrazzi's unpublished writings. The death of the Abate Lambruschini, and that of Giannone, have scarcely been noticed. Lambruschini lived very retired on his estate of Sancerbone, not far from Foggia; he was buried in his own country-house; the Professors Giuliani, Gelli, and Rigutini, delivered orations over his grave; since then no one has said any thing about him. Nevertheless, Lambruschini had done in his time great service to the cause of education. The publisher, Carrara, of Milan, under the title "Delle Virtù e dei Vizio," has printed a moral and posthumous treatise written by the Abate Lambruschini; but I regret to say that it does not add to the reputation of the eminent advocate of education.

Giannone died in the most complete loneliness. I had the melancholy satisfaction of being with him in his last moments. He has left nothing behind unpublished which is worth printing. The life of no patriot has ever been more pure than that of Giannone. The

author of "L'Esule" died a believer in God and in a republic.

The death of Dall' Ongaro has caused a great sensation in Italy. He was killed by persecution. He was Professor of Dramatic Literature in Florence; every thing that could be done to thwart him was done. He was appointed professor at Naples; he was quite satisfied; the students loved him and followed him; an abrupt ministerial decree ordered him back to Florence. This was a blow he could not bear, and he died before he could start on the journey. A comic journal and official jealousies brought about this catastrophe. A volume of "Scritti d'Arte," by Dall' Ongaro, was collected by his friend the critic, Joseph Mongeri; and was published at Milan, by Höpli; it was prefaced by a carefully-written biographical sketch; it contained only one inexact statement, concerning the last moments of the poet. M. Mongeri seems to think that Dall' Ongaro was alone when he died, when the fact is he expired in the arms of his sister, a poor and heroic woman, on whom the Italian Government, as a mark of gratitude for all the services rendered by Dall' Ongaro to literature, to art, and to the cause of independence and liberty, has ventured to bestow the sum of 800 francs, not as an annuity, but once for all. Dall' Ongaro was a freethinker.

The critic and elegant Venetian *littérateur*, Joseph Blanchetti, has also died in solitude, but it was by his own choice. In proportion as he was a man of the world in his glorious youth, he became a misanthrope in his later years. He had been a member of the Senate since the year 1866, but he had ceased to take any share in politics. He died indifferent about every thing, and his death has been received with indifference. Blanchetti's chief work is a book upon the "Scrittore Italiano."

I must mention three volumes of biographies, which, under the title of "Illustri Italiani," has been published by the historian Cantù, at Milan (Brigola, publisher). In this work we find real literary monographs.

Prof. G. S. Perosino, of Turin, has made a contribution to Italian literature, in a volume of unpublished letters of Ugo Foscolo. These letters are mostly addressed to members of his own family; that is to say, especially to the mother and to the sister of the poet. They are real gems, which deserve to be translated into every language, for it would be well that people of all tongues should read words so gentle, so tender, so simple and affectionate, as are in these letters from a son to his mother, from a brother to a brother, and from a brother to his sister.

I must mention, as one of the most interesting publications of the year, a volume, printed at Florence by Le Monnier, under the modest title of "Studi di Letteratura e d'Arte di Tullio Massarani." Massarani has one of those large, sympathetic Lombard natures which both possesses and can communicate political life. A

Neapolitan, M. N. Marselli, a staff-officer of the Italian army, has, under the title of "Le Fasi del Pensiero Storico," given us a sort of philosophy of history; the author has not yet quite attained to calm thought, but he approaches to it. Another Neapolitan, M. Villari, gives us a study upon education in relation with the social question. A Genoese, Count L. Campo Fregaso, has published an important work in support of the "Primato Italiano sul Mediterraneo." M. Pertile, Professor at the University of Padua, is about to bring out a learned and interesting work, "Storia del Diritto Privato Italiano." The eminent political economist of Venice, G. Morpurgo, under the title of "La Statistica e le Scienze Morali" (published by Le Monnier, at Florence), has written a work filled with facts and important observations. M. Tullio Martello gives us a "Storia del Internazionale," written with much knowledge; together with this work the reader may consult the three volumes of "Stragi di Parigi," which is in reality a history of the Paris Commune, published by B. E. Maineri at Milan; the title of it is somewhat startling. The Marquis Carlo Alfieri, in a large volume entitled "L'Italia Liberale," discusses, with much earnestness, the aspect of the religious question in Italy. I regret that I cannot equally recommend the indiscreet work by General La Marmora, which is called "Un po' più di Luce sugli Eventi Politici e Militari dell' Anno 1866."

In the matter of historical publications, I must mention with honor the "Chronistoria della Indipendenza Italiana," by C. Cantù (Turin, Unione Tip. edit., 3 vols). Also the "Statuti del Comune di Padova," edited at Padua by a committee; the "Cronache e Statuti della Città di Viterbo," published with much care by Prof. Ciampi, of Rome; a "Storia delle Arti Belle," for the young, by Paolo Tedeschi (Milan, Carrara); the "Storia della Filosofia rispetto alla Conoscenza di Dio da Talete fino, ai Giorni Nostri," by the Prof. Rom. Bobba (Lecce); "La Filosofia della Storia nei Pensatori Italiani (Vico, Romagnosi, Balbo, Campanella), by B. Fontana (Imola Galeati); "I Gesuiti e la Repubblica di Venezia," by Prof. Joseph Capelletti (Venice).

Among publications which are purely literary, I must give the first place to the magnificent new edition of the "Vita Nuova" of Dante, under the superintendence of the learned Prof. Alex. d'Ancona (published by Nistri). This edition, which contains all the various readings of the different MSS., is the finest specimen of typography which has appeared in Italy this year. The publisher, Vigo, of Leghorn, seems, however, inclined to set up a rivalry with his neighbors of Pisa. A volume which has all the interest which attaches to the works which come from his press, is called "Dante e i Novellatori secondo la Tradizione," by J. Papanti. M. Sforza, of Lucca, has just published an extremely well-

written memoir upon "Dante e i Pisani" (Pisa Valenti). The publisher Paravia, at Turin, has printed, for the use of schools, a "Dizionario, Storico, Geografico, e Universale, della Divina Commedia," by Dom. Bacci. Barbera, the publisher in Florence, has issued a second edition of Omsar Loria's work, "L'Italia nella Divina Commedia." While speaking of Dante, our official interpreter of the "Divina Commedia," the Prof. J. B. Giuliani, equally well known by his researches upon the language spoken in Tuscany as by his studies upon Dante, has published the third edition, considerably enlarged, of his delightful work, "Moralità e Poesia del Vivente Linguaggio della Toscana." In this work there is to be found all the poetry of the popular tongue.

The literary event of the year, as regards romances, is the appearance of a charming novel written by M. Salvatore Farina, published at Milan under the title of "Il Tesoro di Donnina." I can recommend it to all English readers who understand Italian.

M. Gheradi del Testa, the well-known Tuscan dramatic author, has this year won a triumph with a new play called "Vita Nuova." A great theatrical success has also been obtained by the new play of M. Paul Ferrari, "Il Ridicolo."

M. Pitre has furnished a valuable contribution to the history of popular literature in Italy by his "Fiabe Siciliane." Also M. Dom. Bernoni, of Venice, by his "Leggende, Canti, Fiabe Venetiane;" M. Ferraro by his "Giocchi Monferrini," and his "Nuovi Canti Popolari del Monferrato;" M. Grion by the publication of the popular romance of the Middle Ages, "I Nobili Fatti di Alessandro Magno."

That Italy lives and is making progress was evident at the Exhibition of Vienna to whoever would take the trouble to glance over the mass of publications which the Italian Government, with happy forethought, had prepared to illustrate all our principal institutions (academies, archives, museums, libraries, etc.). Some of these illustrations are, in fact, entire works; such is that which M. Gotti, the Director of the Florentine Galleries, has compiled upon the precious and unique collections confided to his charge; such also are the works which Messrs. Toderini and Cecchetti have prepared upon the Venetian Archives, M. Trinchera on the Neapolitan Archives, M. Odorici on the Library of Parma, etc. Besides official publications, I must specially mention a handsome volume which M. Albert Errera, the distinguished Venetian political economist, has written (published by Loescher) for the Exhibition at Vienna, under the title of "L'Italia Industriale con Particolare Riguardo all' Adriatico Superiore." M. Errera is the true historian of our contemporary industrial undertakings; and he has not only the rare merit of studying them and describing them with much ability, but he also makes valuable suggestions for their further activity and extension.

NORWAY.—Among works in national history and philology which have appeared during 1873, I may mention two collections of "Norske Bygdesagn" ("Tales and Traditions of Norway"), by L. Daas, Librarian to the University of Christiania. Prof. O. R. Unger has completed his edition of "Konunga Sögur," and given to the world a standard edition of "Postola Sögur," being lives of the Apostles in Old Norse, published from Icelandic manuscripts. The publication of the edition of "Norröne Skrifter af sagnhistorisk Indhold" (Hervarar Saga ok Heiðreks") has been continued by Prof. Sophus Bugge. An employé of the Royal Archives and a graduate of the university, J. E. Sars, eldest son of our well-known zoological investigator, the late Dr. M. Sars, has edited the first volume of "Udsigt over den Norske Historie" ("View of the History of Norway"). The volume now published goes down to the introduction of Christianity by St. Olaf, and will be followed by two more volumes. Of another important work upon the history of Norway commenced in 1866, "Norges offentlige Ret," by T. H. Aschehoug, a professor of the University and a member of the Storting, the second volume has appeared. It contains a series of commentaries on the constitutional laws of Norway. The Lapp traveler mentioned in my article of last year, J. A. Friis, whose work upon Finmark and Lapland has now been translated into Swedish, and partly into German, this summer accompanied our King during his tour along the northern coasts of Norway to the Russian frontier, and is now engaged in describing the voyage in a work enriched with numerous photographs and ethnographical illustrations. Two more books, containing valuable information about these interesting, but still little known, parts of our country, have recently been issued by Th. Bang, an officer of the Royal Geographical Survey, and by A. W. Bran, a functionary who has for many years lived among the Lapp population of those remote districts. Eilert Sundt has published an interesting book upon "Häslivet i Norge" ("Home-Life in Norway"), in addition to former publications upon the same subject.

Among works upon philology which have appeared during the last year, I have to notice "Den antike Stat og Solons Forfatning," by P. O. Schjøtt, a Professor of Greek Philology at the university, together with an edition of Plautus's "Mostellaria," by the learned scholar, Prof. Sophus Bugge, accompanied by a metrical translation into Norwegian by Fr. Gjertsen, the translator of "Faust."

Writers on natural science have, as usual, made many important contributions to our periodicals and transactions of learned societies. Separately published works of considerable value and importance in this branch of literature are: Dr. F. Schübeler's work, "Die Pflanzenwelt Norwegens," and Axel Blytt's "Flora Norvegica," the latter being a volumi-

nous description of the whole vegetable world of Norway. Useful hand-books of botany, chemistry, and ornithology, have been published by H. L. Sørensen, G. Schult, and Leonard Steineger. A large biographical and literary dictionary of our men of science has been collected and edited by Dr. F. Kier, under the title of "Norges Læger i det 19^{de} Aarhundrede."

Henrik Ibsen has edited a voluminous dramatic poem, entitled "Keiser og Galilæer, et verdenshistorisk Drama." The appearance of this important poem has been long expected by the public, whose anticipations may be judged from the fact that four thousand copies were sold in less than eight days. No new work by Bjørnstjerne Bjørnson, who some months ago started for a second visit to Southern Italy and Rome, has appeared during this year, except a splendid edition of his "Brudeslaaten" ("The Wedding Ring"), with woodcuts from original designs by Ad. Tidemand, the famous painter. The people's edition of Bjørnson's "Tales of Norwegian Peasant Life," consisting of ten thousand copies, published at Christmas-time, last year, has been exhausted already, and a second impression will be completed within the year. Jonas Lie, who is still resident in Rome, has published a rather voluminous tale of national life, "Tremasteren Fremtiden eller Liv nordpaa," which has strengthened his reputation as a highly-gifted novelist. From Mr. A. Munch's pen we have got a selected collection of his lyrics, written and published during the last thirty years; and of the collection of "Norske Folke-Eventyr," by Asbjørnsen and Moe, known to English readers from Mr. Dasent's translation, a new fifth impression has just left the press.

PORTUGAL.—It is never difficult to choose from among the books published during the year in Portugal those that are worth mentioning.

S. Julio da Vilhena has just published the "Raças Historicadas da Peninsula Iberica," a little work which shows a laudable ambition.

"Portugal and Socialism, a Constitutional Examination of Portuguese Society," is the latest and the most important of the political publications of S. Oliveira Martins, author of the "Theory of Socialism." A thoughtful writer, S. Martins devotes himself to the study of the social questions which agitate Europe, and applies the results of his labors to his native country. He believes that socialism would prove a blessing to Portugal, and his high character forbids us to doubt his sincerity. The style of his book is excellent.

S. T. Braga has just brought out an historical and critical study on Camoens, and another on "Amadis de Gaule, and the Origin and History of the Romances of Chivalry." In spite of the defects of this laborious writer, his two volumes are well worth reading.

Our greatest writer, S. Herculano, the illustrious historian of Portugal, is printing his

miscellaneous works—Opusculos. They are publications of by-gone days, some of them political and economical, some of them upon questions of morals or general literature. Highly successful at the time they first appeared, they ought not to be judged from the stand-point of 1873, as our critics are doing. Long out of print and sought after, these brochures are of importance, both for the literary biography of their author and for the history of the ideas of the time in which they were brought out (1836-'57), and on this ground alone, independently of their literary merits, they will always be read with interest. Your readers are aware that S. Herculano has not finished his "History of Portugal." The fourth volume stopped at the death of King Alfonso III. (A. D. 1297). The author now announces the publication of some historical fragments, materials for the fifth volume of the work.

RUSSIA.—Some of the Russian journals are doing a very useful thing in the way of literary statistics, by publishing not only the number of their subscriptions, but the residences of the subscribers, and thus enabling us to learn something of the comparative enlightenment and the tendencies of inhabitants of various districts. I have passed through whole provinces of Russia where the chief newspaper taken was the *St. Petersburg Gazette*, through others where rarely any thing could be found except the *Son of the Fatherland*. The *Messenger of Europe*, by far the best monthly journal, for the present year issued 6,958 copies of each number, of which 181 were sent abroad. The *Russian Past*, an historical monthly, has constantly increased in circulation since it started. In 1870 its circulation was 2,600 copies; in 1871, 3,500; in 1872, 4,252; and in the present year 4,920 copies. The comparatively great subscription-list of this journal, as well as of the *Russian Archives* and the numerous publications of the various historical societies, are proofs of the increase of a taste for history. On the 6th of December, at the unveiling of the statue of Catherine II., a decree of the Emperor was issued to the Cesarevitch, as President of the Russian Historical Society, thanking him for his services, and authorizing the society to add to its name the title "Imperial." On the same day the society published the eleventh and twelfth volumes of its "Proceedings," the former containing letters of Peter the Great, and the latter containing the first part of the dispatches from the British ambassadors during the reign of Catherine II., from 1762 to 1769. The dispatches are printed in both English and Russian, and as pictures of court-life and court-intrigue, they are of the highest interest. It is easy, however, to see that the ambassadors knew nothing of Russia outside of the court circle. Kostomarov writes history that can be read with pleasure, and we welcome his new book "Rus-

sian History in the Lives of its Chief Actors," as a great boon. Prof. Kostomarov's pen is never idle, and during the year, besides other things, he has also published an excellent monograph on the "Traditions of the Earliest Russian Chronicle." The "History of the Reunion of the West-Russian Uniates in Old Times," by the well-known archaeologist Kovalovitch, chiefly from unpublished manuscripts; the monograph of D. Y. Samokvasof on "Ancient Russian Cities," an attempt to investigate the origin of the Russian "town," in which the author's zeal for his subject seems to outrun his discretion; the studies on the "Posen Poles in 1848," and on Galicia, published in the *European Messenger*, and the valuable "Russian Genealogies," destined to fill in part the omissions in the imperfect work of Prince Dolgoruky.

Turning from history to law, we find what is, perhaps, the capital book of the year, and which should speedily find a French or German translator, "Consuls and Consular Jurisdiction in the East," by F. Martens, Professor of International Law in the University of St. Petersburg. It is an historical treatise on the origin and history of the consular institution, and the powers which by custom and treaty have been given to consuls in the East. Mr. Martens criticises the judicial reforms in Turkey and Egypt, and endeavors to answer the question as to what should be the necessary powers of a consul in the East at present. Mr. Znamensky, in a thick book published at Kazan, on "The Parish Clergy in Russia since the Reform of Peter," shows the gradual decline of the system of leaving the election of the clergy to the parish, and treats of the radical reforms of the last years, which go back nearly to the first principles of Russian church government.

In general literature the year just past has been poorer than any for a long time. None of the great writers have published any thing—at least, worthy of himself—and we have had only the productions of authors of the second or third class, and of some new men whose rank in literature is yet to be determined. The preference is, perhaps, to be given to Soltykof, who writes under the pseudonym of Stehedrin.

In the drama, we have this year two plays by Ostrofsky, "Late Love" and "Snowhand;" the latter a dull piece of bad verse, more like a ballet programme than a serious play. Palm has published a play of some merit, called "The Old Gentleman;" Averkief, a new historical drama in verse, "Tennil and Shemakha," which lacks the freshness of his other pieces; and Pissensky, a play, called "Baal."

Of popular poetry, we have a large installment in the "Onega Ballads," collected by the late Prof. Hilferding, who unfortunately died in the midst of his labors. The book of Pypin, "Characteristics of Literary Opinions of the

Present Century in Russia," has now appeared entire, after having had the misfortune to procure for the *European Messenger* a second warning, and to cause the election of its author to the Academy to be canceled. It is a most interesting and remarkable book.

Political literature is increasing in Russia. The "National Question in History and Literature," by A. Gradofsky, may be taken as an exposition of the views of the Slavonophiles. But the most noteworthy book on political subjects is the "War and Revolution," by the Academician Bezobrazof, which is not only a study of the French Revolution, but a true treatise on contemporary politics.

Two or three volumes of the new Russian Encyclopædia have been issued; but the articles on Russian subjects are not so good as they should be. We cannot help looking with more anxiety for the "Dictionary of Russian Contemporaries," by Suvorin, which is already announced as in the press.

In the literature of travel we have the first volume of the travels in Toorkistan and Central Asia of the naturalist Severtzof—a book of travel in Spain, Egypt, Arabia, and India, by Skalkovsky; and the entertaining story of "A Russian Workman on an American Plantation." Colonel Veninkof, the Secretary of the Geographical Society, has published, in one volume, his lectures before the Staff Academy and his articles in the *Military Review* "On the Russian Boundaries in Asia." It is furnished with maps, and is important not only for geography, but more so for the history of Russian advance in Asia.

Russian literature has this year suffered a loss in Fedor Ivanovitch Tutchef, a graceful and pleasing poet, and a warm friend of literature. He wrote little, but that little is good. He died in July, at the age of seventy. His early life was passed abroad in the diplomatic service, and since 1857 he was at the head of the foreign censorship.

SERBIA AND CROATIA.—In the literature of the South-Slavonians I remark the following original productions: The fourth volume of "Starine," an archæological publication, and vols. xxi.—xxiv. of the scientific organ of the South-Slavonian Academy, the chief contributors to which are Dr. Rački, Dr. Danic'ic, Stojan Novakovic, and others.

In poetry I note, among others, "Pjesme i Besjede" ("Songs and Tales") by Paulinovic: the old Croatian poems, particularly those of the sixteenth century, edited and explained by Dr. Danic'ic; "Wreath of Serbro-Croatian Songs," by Lazar Kostic, the same writer who has translated several dramatic works of Shakespeare. Finally, as authors of dramatic poetry, we may mention "The Renegade," by Kukulyevic, and "The Fall of Novogorod," by Matiya Ban. The best novels of the year are "Golden Whip," "Salt and Bread," and "Pobratim," all by Dr. Vladan Gyorgyevic.

In law, Dr. Bogisic', now professor at Odesa, has brought out an interesting and learned work, entitled "The Civil Laws of the Slavonians," and Dr. A. Simunio' "Pravda" ("Justice"). It would be indeed difficult to enumerate all minor publications in the various branches of science with which the Servian and Croatian literature has been enriched during the past year. In philology, Dr. Danic'io', known as the best South-Slavonian philologist next to the famous Dr. Miklosic', has produced a whole series of valuable papers on certain grammatical forms of the South Slavonian languages.

SPAIN.—Works of a scientific character very scarce in past years, though mostly translated from other languages, are becoming yearly more numerous; and those written by Spaniards abound in original observations, giving a good idea of the gradual improvement in such matters. The greater part are destined for text-books in schools and universities. More than one hundred have appeared in the current year, and many are excellent. The first volume of an "Ensayo sobre la Historia de la Propriedad Territorial en España," by Don Francisco Cardenas, has been published. "Principios del Arte de la Colonizacion," by Marcenaz, is another book very interesting for Spaniards especially. "Estudios Penitenciarios," by Armengol, is a useful and well-written book, on a subject shamefully neglected in Spain. I must mention also, as important works on legal subjects, Giner y Calderon's "Prolegomenos;" and "Lecciones de Economia Politica," whose author, Somalo, follows the most approved theories on this science and attacks socialism.

Historical works have been rather numerous this year, and some are of undoubted merit. "Mexico desde 1808 á 1867," four vols., by Arrangoiz, is important; for the author was present at some of the most stirring of the scenes which he describes. Señor La Fuente's "Historia Ecclesiastica de España," six vols., is worthy of notice. This second edition he has greatly enlarged and enriched with most valuable information. "La Edad Media comparada con los Tiempos Modernos," by Fernandez, Bishop of Havana, is also interesting, though greatly inferior to works on the same subject published in other countries. "Patrologia," by Yus, an historical criticism of the works of the Holy Fathers, is worthy of mention. As a contrast to the Bishop of Havana's book, I may notice Pi Margall's "Estudios sobre la Edad Media"—a small volume, written, no doubt, by this politician before the middle ages were as generally known as they are at the present day.

Not unlike Arrangoiz's book on the contemporary history of Mexico are the "Memorias Politicas," which the late Marques de Miraflores wrote to illustrate the reign of Isabella II. and have just been published by his heirs. The Conde de Toreno also has

printed the first volume of his father's political speeches, including those he made at the Cortes of Oadiz in 1812. Toreno was considered one of the first orators of the present century, and one of the most remarkable men of his day.

Among the historical works referring to Spanish topography, the following are worthy of notice: Bravo's "Recuerdos de la Villa de Laredo;" "Paseos por Cordova," by Ramiro; "Fastos Ilerdenses," by Roca; "Historia de Malaga," by Guillen; "Historia de Ronda," by Rivera; a volume of biographies of "Canarios Celebres," by Milliares; and "Conquenses Ilustres," by Fermin Caballero, in which last the lives are given of several distinguished persons born in that locality (Cuenca). Romero's "Apuntes Historicos sobre el Archivo de Simancas," with a prologue by Escudero de la Peña, is a useful book for those who wish to have an idea of the immense stores of original papers preserved in the archives of Simancas, one of the most important in Europe.

The public is already acquainted with the "Museo Español de Antigüedades," edited by Rada y Delgado. The letter-press in this work is written by the most competent Spanish authors, and illustrated with fine colored engravings of the best art-objects existing at the Madrid Archæological Museum, hitherto unknown.

The various literary societies and private clubs engaged in the publication of rare and curious books have not been inactive. I may mention the "Coleccion de Documentos Ineditos para la Historia de España," "Biblioteca de Rivadeneyra;" "Bibliofilos Españoles;" "Bibliofilos Andaluces;" "Coleccion de Libros Raros y Curiosos;" and "Libros de Antaño."

Two works have appeared within a very short interval, almost on the same subject, both of interest, and written by politicians, friends and professors at the same university, though of completely opposed political opinions. Both were composed in exile. One of these volumes is entitled "Roma," by Don Severo Catalina, and the other, "Recuerdos de Italia," by Emilio Castelar. Castelar has also published his "Discursos Politicos," from 1871 to 1873; a "Vida de Lord Byron;" and new editions of his other works. Still more opposed to Castelar in political views was his friend and relation Aparisi y Guijarro, who died last year. His relatives have published two volumes of his works, containing "Biografia, Pensamientos, Poesias y Discursos."

Several volumes of poems have appeared this year. A friend of Espronceda's has published some of that poet's inedited or less known poems, under the title of "Paginas Olvidadas;" the same has been done with the works of another poet, Enrique Gil. Campoamor has brought out a new edition of his "Drama Universal," and added a second part to his "Pequeños Poemas." Another poet writing

under the pseudonym of Larming, has issued a volume, "Mugeras del Evangelio," of religious poetry, full of inspiration, simplicity, and elevation; in which the author does his best to oppose the revolutionary ideas of the present day.

Dramatic literature, so popular in Spain, counts as usual a great many additions. Indeed, they are extremely numerous, although few can be said to have met with success in the present year.

Spanish novels continue to be infinitely less numerous than those of other countries. Yet the historical novels of Galdós are interesting and worthy of notice: his "Trafalgar" and "La Corte de Carlos IV." give an excellent idea of the period which they describe. Señora Coronado's "Jarilla," Señora Sinue's "Una Hija del Siglo" and several more by Blasco, Guerrero, Moya, and others, are not without interest.

Books of travels are not common in Spain. Mentaberry, however, has written "Viage a Oriente de Madrid a Constantina," an interesting volume. "De Madrid al Vesubio," by Lasa, and "Viage al Rededor de una Cartera," are both entertaining productions.

Like books of travels, books of an entertaining kind expensively got up are extremely scarce in Spain; the only one which can be mentioned this year is "Las Mugueros Españolas," a description of the characteristic female types of the different provinces. The text is written by the best authors, and the book is handsomely illustrated.

SWEDEN.—The new system of "people schools," dating from 1842, the self-government of communities dating from 1862, and the new form of political representation dating from 1865, have contributed to elevate the intellectual level of the people, and the literary consequences appear in a continually-increasing demand for books and journals. In this respect it may, perhaps, be worth noticing that the thin population of Sweden (amounting to little more than four millions) already supports a periodical literature of not less than 240 weekly and daily papers, one of which, the *Swedish Weekly* (*Svenska Veckobladet*), publishes 50,000 copies of each number (one for every eighty inhabitants); that during the last ten years more than fifteen million copies of religious books, tracts, and papers have been spread among the people; and that in 1878 alone the stock of printing-presses has nearly doubled.

Among the literary productions of this year, the most important, from several points of view, is undoubtedly the last translation of the New Testament, issued by the "Royal Bible Commission," which, established by order of Gustavus III., has this year arrived at the respectable age of a full century. The many previous translations have never been accepted, nor has this last essay succeeded in gaining the necessary majority in

our "Kyrkomöte," but the principles laid down in it have met with a full approbation, at least, as regards the critical treatment of the text. They involve an entire rejection of the authorized version, "The Bible of Charles XII.," based upon codices of the fourteenth and fifteenth centuries, the acceptance of the Sinaitic, Vatican, and Alexandrine codices as standard authorities, and a strict attention to the researches of Tischendorf and others on the field of criticism.

Next to this publication, of paramount interest, I may call attention to a most important work by Prof. Nyblæus, on the "History of Swedish Philosophy." As, very probably, most English readers are not aware of the existence of a Swedish philosophy really deserving that name, it may be stated here that Sweden boasts of a native philosophical school, whose author, the late Prof. Bosström (1866), in the course of twenty years' lectures, delineated and developed the most purely idealistic system that has appeared. The volume, in which Mr. Nyblæus explains the system of his master, is worthy of perusal.

Though the religious movements in Sweden are both strong and deep, yet the theological literature is rather poor. A popular and highly-esteemed writer is Mr. Vikner, whose "Tankar och frågor inför Menniskones Son" is peculiarly attractive from the union of candor, faith, and dialectical power. A decided rationalist, Mr. Rydberg, has brought out a little study on the genealogy of the "Patriarchs in Genesis." Among the theological literature may also be reckoned the elaborate work of the late curate Beckman, "Forsök till Svensk Psalmhistoria."

The part of our history that stands in greatest need of a scientific treatment, the period after 1809, has now, in Mr. Hellstenius, found a diligent and impartial investigator, whose researches, principally founded upon the papers and memoirs of Colonel Schinkel, aide-de-camp to King Charles XIV., have in the last volume of "Minnen ur Sveriges Nyaste Historia," reached the year 1828.

Our political literature is chiefly devoted to questions of internal government, and its most prominent work is a study on "The Swedish Parliament" ("Den Svenska Riksdagen"), by Prof. Rydin.

The Nestor of Swedish botanists, E. Fries, has issued the seventh and eighth parts of his great illustrated work, "Icones Selectæ hymenomycetum nondum delineatorum." Of the valuable work, "The Geological Research of Sweden," edited by the Geological Office, the forty-eighth and forty-ninth leaves have appeared, accompanied by explanatory texts. The curious and learned work of Mr. Thorell, "Remarks on Synonyms of European Spiders," is throughout written in English. A publication that assuredly will be received with some interest is "Caroli Linnæi Flora Dalecarlica," edited by Mr. Ahrling, after the author's

manuscript. Prof. Sven Nilsson has once more, in a new edition of "The Age of Bronze" ("Bronsåldern" asserted his theory of Phœnician colonists having settled in Scandinavia. The following works also deserve attention: "Bronsåldern i Sverige," by Montelius; "The Prehistoric Peoples in Europe," first part, by Hildebrand; and a sumptuous, illustrated work, "Engravings from the "Historical Museum," by B. Hildebrand, antiquary to the State, and his son, H. Hildebrand.

In his "Notes of a Painter" ("En Målares Anteckningar"), Egon Lundgren has combined the keen eye of an artist for all that is picturesque in landscapes, men, and fashions, with the witty and pleasant language of a clever writer. In lyrical poetry and native dramatic works the harvest of the year is uncommonly poor. As for novels, it is not to be denied that the numerous volumes of Claud Gerard (a pseudonym) and Mrs. Schwartz enjoy a great popularity, and are constantly asked for in circulating libraries; but the critics justly class them as weak imitations of ill-chosen models.

LITERATURE, ENGLISH, IN 1878. In England, as in this country, while the past year was a period of considerable activity in publication, few works of marked importance appeared. These are so promptly reproduced here—often, indeed, simultaneously issued in both countries—that little need be added to the account given in the preceding article under the sub-title **REPRINTS**.

According to the statement of the *Publishers' Circular*, the books and pamphlets published during the year numbered 8,468, including American importations and excluding new editions. The pamphlets were extremely few, only 170, that kind of publication having been killed by the newspaper; and the works of fiction stand foremost, 881. Next comes theology, with 770 works; and next 588 books of art, or books so illustrated as to be books of art. After these follow histories, books of poetry, and 288 works of travel, geography, or geographical research.

In Theology and Philosophy, the book that excited the largest amount of criticism and discussion was undoubtedly Dr. Matthew Arnold's "Literature and Dogma." A work quite as radically opposed to the generally received opinions—published later in the year, and as yet not much discussed—is "Problems of Life and Mind, First Series: The Foundations of a Creed," by George H. Lewes. The remarkable volume (referred to in the preceding article), "Liberty, Equality, and Fraternity," by James Fitzjames Stephen, has been followed by a series of papers equally bold and unsparing, entitled "Essays on Freethinking, and Plain Speaking," by Leslie Stephen. "Essays by William Godwin" is a publication that was perhaps due to the memory of the author from those who are the heirs of his anti-Christian philosophy and zeal, but as to

most people, of whatever religious belief, it is an anachronism. Prof. Max Müller's "Lectures on the Science of Religion," issued here in an imperfect form, have been published, with other papers, by the author. The third volume of "Religious Thought in England, from the Reformation to the End of the Last Century," by John Hunt, completes a work of great interest and value. "The Cambridge Paragraph Bible," edited by Prof. F. H. Scrivener, is a learned and useful contribution to the literature of the Authorized Version. Dr. Samuel Davidson has published an essay "On a Fresh Revision of the English Old Testament;" the Rev. James Martineau, some "Studies in Christianity;" and the Rev. F. W. Farrer, a series of sermons, entitled "The Silence and the Voices of God." The Rev. T. R. Birks, in his "First Principles of Moral Science," it is generally felt, has left for himself abundant room for progress in the science. "Hegel's Logic," translated by W. Wallace, and Kant's "Theory of Ethics," translated by T. K. Abbott, need only to be mentioned as new versions of well-known works.

In the department of Science, particularly of popularized science, little is published abroad that is not speedily naturalized in America. But a few noticeable books that have not, so far as we have observed, been republished here, may be enumerated. "A History of the Mathematical Theories of Attraction, and the Figure of the Earth, from the Time of Newton to that of Laplace," by J. Todhunter, M. A.; "Essays in Political Economy, Theoretical and Applied," by J. E. Cairnes, and "Cobden and Modern Political Opinion," by Prof. Thorold Rogers; "Comparative Politics," by Edward A. Freeman; Sir John Lubbock's "Origin and Transformations of Insects;" St. George Mivart's "Man and Apes;" Frank Buckland's "Familiar History of British Fishes;" "English Gypsies, and their Language," by Charles G. Leland; and "Records of the Rocks," by W. S. Symonds—represent different fields of investigation, and different styles of exposition.

In History, we notice, "India, on the Eve of the British Conquest," by Sidney Owen, a work valuable for itself, and useful as an introduction to the history of British India; "A History of Crime in England, illustrating the Changes of the Laws, and the Progress of Civilization: Vol. I., to Henry VII.," by Luke Owen Petre; "The Huguenots in France," by Samuel Smiles; "History of the Church of France," by the Rev. W. H. Jervis; "History of Jamaica," by W. J. Gardner; and "My Diary in the Last Great War," by W. H. Russell. The third volume of Masson's "Life of Milton," that enormous wrappage of history-of-England around the life of the poet, is made up of alternate layers of history, biography, and criticism. The "Life and Correspondence of Sir John Burgoyne," of the "First Earl of Minto," of Lloyd, "First Lord Kenyon," of

"Admiral Sir Edward Codrington," and of "Thomas, First Lord Denman," are also biographies that have an historical interest and value. Among works more strictly biographical are the "Life of Bishop John Coleridge Pattison," by Charlotte M. Yonge, a large portrait of a man deserving to be long remembered; Dean Alford's "Life, Journal, and Letters;" Dean Mansel's "Letters, Lectures, and Reviews;" the "Personal Life of George Grote," by his widow; the "Autobiography of Dr. Thomas Guthrie;" "Erasmus, his Life and Character," by R. B. Drummond; the "Life and Letters of James David Forbes, F.R.S.," by J. O. Sharp, P. G. Tait, and A. Adams; "Angélique Arnauld," by Frances Martin; and "Plutarch: his Life, his Lives, and his Morals," by Archbishop Trench. A work of special value as a literary biography, is "Archibald Constable and his Literary Correspondents."

Books of travel are among the most likely to be reprinted here; to the list of such, that has been already given, are to be added some works of descriptive and picturesque tourists: "The Pilgrimage of the Tiber from its Mouth to its Source," by W. Davies; "The Hartz Mountains, a Tour in the Fog Country," by Henry Blackburn; "Word Sketches in the Sweet South," by Mary Catharine Jackson; "Station Amusements in New Zealand," by Lady Barker; and a work of some geographical importance, "The Threshold of the Unknown Region," by Clements B. Markham, C. B., a careful mapping out of accomplished results in arctic exploration, showing thus what remains to be attempted. A memorial of the African slave-trade, which it is hoped will ere long be only an evil memory, is "Dhow-Chasing," by Captain G. L. Sullivan, R. N.

In Fiction, the books of the year, almost the only ones that rose above the general level of the "unexceptionable" and the "pleasant" novel, were Lord Lytton's posthumous publications, "Kenelm Chillingly" and "The Parisians," and that fresh and unconventional creation, "A Princess of Thule," by William Black. In number, works of fiction exceeded any other class, and it would be unjust not to say that in this immense flow of story the unexceptionable and the pleasing constitute a very considerable proportion of the whole. Mr. Fargeson, like Dickens, throws a kindly light on the poverty of the metropolis, but he is at a far remove from Dickens. There is no acknowledged master-magician.

In literary and art criticism, and other miscellaneous writings, should be mentioned "Biographical and Critical Essays," by A. Hayward, Q. C.; "Studies in the History of the Renaissance," by W. H. Pater; "The French Humorists, from the Twelfth to the Nineteenth Century," by Walter Besant; "Prose Idylls, Old and New," by Charles Kingsley; "Leonardo da Vinci and his Works," by Mrs. P. Heaton, and Mr. O. Black; "The

Minor Works of George Grote;" "The Friendship of Books, and other Essays," by the late Rev. Frederick Denison Maurice, edited by Thomas Hughes; "Chapters on Animals," by P. G. Hamerton; and Dr. W. Lubke's "History of Sculpture," translated by F. E. Bunnèl.

The publication of cheap editions of standard authors has become an active branch of business in England. America was once noted for cheap books, while the mention of an English edition at once suggested costliness. But the case is now reversed. In England a copy of Shakespeare's works, complete, and not illegibly printed, can be had for a shilling, Milton for sixpence, and Cowper, Wordsworth, Byron, equally cheap; the Waverley Novels at three-pence apiece. The works of Gibbon, Hume, Hallam, and others, have been similarly reduced in price, and as fast as copyrights expire the best books of our own time will probably be added to the list and placed within reach of the million. One effect of the cheap manufacture of books in England is that importation is in many cases more profitable than reprinting.

LIVINGSTONE, REV. DAVID, M. D., D. D., a Scottish clergyman, physician, and missionary to Southern and Central Africa, the most fearless and indefatigable explorer of modern times, born at Blantyre, Lanarkshire, Scotland, in 1817 (some authorities say 1815), and reported to have died from fever and exposure in Lobisa, about midway between Lakes Bangweolo and Nyassa, in about latitude 10° 50' south, and longitude 30° east from Greenwich, May 4, 1873. His father, who had removed in boyhood from Ulva, one of the Hebrides, to Blantyre, and worked for a time in the cotton-mills there, subsequently established himself as a tea-trader in Hamilton, a suburb of Glasgow, but never succeeded in acquiring wealth. At the age of ten years, young Livingstone was employed as a piecer in a cotton-factory, and continued in this and other hard work in the factory till he was twenty-one years of age. An evening school furnished him with the opportunity of acquiring some knowledge of Latin and Greek; and finally, after attending a course of medicine at the Glasgow University, and the theological lectures of Dr. Wardlaw, Professor of Theology to the Scotch Independent College, he offered himself to the London Missionary Society, by whom he was ordained as a medical missionary in 1840. He intended that China should be the field of his labors, but, owing to the Opium War, it was deemed inexpedient for him to go there, and accordingly he was designated for the African mission—an event which determined the future course of his life. In the summer of 1840, after a voyage of three months, he landed at Port Natal, in South Africa, and promptly repaired to Kuruman, where the veteran African missionary, Dr. Moffatt, had founded a station. Here he met the lady—a daughter of Dr. Moffatt—

who four years later became his wife. After studying for two years the language and customs of the Bakwains he removed in 1843 to Mabosta, where he founded a missionary station, and during the next six years labored in his calling there and at Kolobeng, a station about fifty miles farther north. In June, 1849, in company with Oswell and Murray, two English gentlemen, Dr. Livingstone started on his first exploring expedition into the interior, and in August reached Lake Ngami by crossing the Bakalihari Desert, which had for a long time presented insuperable obstacles to persons approaching in that direction. The party returned to Kolobeng in October, and in the succeeding year Livingstone made another journey to the lake, but was prevented by the prevalence of fever, and of the *tsetse* (a species of fly very troublesome to cattle), from proceeding to the northward of it. In 1851, in company with Mr. Oswell, he again started for the north, and, proceeding in a more easterly direction, reached the great river Zambesi, flowing through the centre of Africa. In April, 1852, he accompanied his wife and children to Cape Town, and, having witnessed their departure for England, returned to Kuruman with the intention of selecting a locality for a new station, which should be free from the annoyance of the Boers—a degraded class of white settlers—who regarded with disfavor his efforts to civilize the natives, and his attempts to suppress slavery. While at this place he learned that the Boers had carried their hostility so far as to plunder his house, and devastate the missionary settlement he had formed. Being now free from pastoral cares, he departed on his most important northern tour, and in May, 1853, reached Linyanti, the principal town of the Makololo tribe, where he was kindly received by the Chief Sekeletu, and the entire population. Departing thence in November, he proceeded up the Leeambye River and its affluent, the Leebe, to Lake Dilolo, and thence with considerable difficulty and peril by way of the Congo River to Angola, at the capital of which country, Loanda, on the western coast of Africa, he arrived May 31, 1854, and was hospitably received by the Portuguese authorities stationed there. Leaving Loanda in the ensuing September, he reached Linyanti in September, 1855, and thence proceeded down the Leeambye and Zambesi Rivers, which he found to be identical, to Quillimane on the Indian Ocean, which he reached May 20, 1856. He then took ship for England, where he arrived December 12th of the same year. During his sixteen years' absence, Livingstone had twice crossed the African Continent from the shores of the Indian Ocean to those of the Atlantic, and explored a vast tract of country hitherto unvisited by Europeans. The magnitude of his labors and the great results attained during this period were thus alluded to by Sir R. Murchison at a meeting of the

Royal Geographical Society, held in 1856, and at which Livingstone was present. "We are met together," said that distinguished geographer, "for the purpose of welcoming Dr. Livingstone on his return home from South Africa after an absence of sixteen years, during which, while endeavoring to spread the blessings of Christianity through lands never before trodden by the foot of any European, he has made geographical discoveries of incalculable importance. In all his various journeys Dr. Livingstone has traveled over no less than eleven thousand miles of African territory; and he has come back to England as the pioneer of sound and useful knowledge; for by his astronomical observations he has determined the sites of numerous places, hills, rivers, and lakes, nearly all of which have been hitherto unknown, while he has seized upon every opportunity of describing the physical features, climatology, and geographical structure of the countries which he has explored, and has pointed out many new sources of commerce as yet unknown to the scope and enterprise of the British merchant."

The reception accorded to the great traveler at this time was very cordial. His frank, simple, and manly character made him a great favorite with the people, who were agreeably surprised to find a man in a commercial age rival in devotion and self-sacrifice the great explorers and navigators of the sixteenth century. In 1857 he published his "Missionary Travels and Researches in South Africa," a work of great interest and value, forming an enduring record of his remarkable journey, republished in the United States by Messrs. Harper & Brothers. In 1858 he returned again to Africa, having been appointed British consul at Quillimane, and soon after his arrival there departed on another expedition. Sailing up the Zambesi, he attained Lake Nyassa, where he made further explorations. His wife, who had accompanied him in many of his perilous journeys, died of fever at Shupanga April 27, 1862, and the expedition returned the year following. Dr. Livingstone arrived in England in July, 1864, and after giving interesting particulars respecting his discoveries, and publishing a book descriptive of his recent travels, he left his native land for the last time in 1865, with the view of continuing his explorations in the interior of Africa. He arrived in Bombay in 1866, and thence sailed for Zanzibar, whence he started for the interior by way of the river Rovuma, which flows into the Indian Ocean at Mikindani, about five degrees south of Zanzibar. In the month of April, 1867, Livingstone discovered Lake Liemba, south of Tanganyika, and going westward thence found Lake Moero on the 8th of September. In December, 1867, he was at Cazembe's town. After an ineffectual attempt to cross the lake to Ujiji, he returned to Cazembe's in February or March, 1868, and then went south of Lake Bange-

weolo. He afterward reached Ujiji, on Lake Tanganyika, and from that point, in May, 1869, he sent the last letter received from him until communications were brought home, by Mr. Stanley, of the *Herald* Expedition. The inception and success of that enterprise are still fresh in the public mind, and may be briefly stated. Observing that the civilized world was greatly concerned regarding the fate of Livingstone, Mr. James Gordon Bennett, editor of the *Herald*, determined to send out an expedition at his own expense, for the purpose of discovering the lost traveler. Selecting Mr. Stanley of the *Herald* staff as the leader in this enterprise, he instructed him to proceed to Africa, and, regardless of expense, find Livingstone, whom he felt was still alive. Mr. Stanley in due time reached Zanzibar, and, after a tedious journey through the African wilds, met Livingstone at Ujiji in November, 1871. The journalist remained with him about four months, ascending the Lake Tanganyika, to its northern extremity, and was subsequently accompanied by Dr. Livingstone, on his return-journey, as far as Unyanyembe. In August, 1873, Mr. Stanley reached London, and the world was soon gratified with abundant details of the explorer's labors during the years when most people supposed he was dead. During the last five or six years of his life, it appears, from these accounts, that Dr. Livingstone ascertained that Lake Tanganyika is *not* one of the sources of the Nile, and discovered five lakes west, southwest, and south of Tanganyika. These sheets of water, so far as he was able to trace, are connected by the branches of a river, which he names the Luabula, or in its farthest extension (to Lake Bangweolo), the Luapula. These branches he believed to be connected either through the Albert Nyanza or by some more direct communication with the sources of the Nile; yet there was a possibility from their distance west of Tanganyika, and what was known of the country still farther west, that they might be the sources of the Congo or Zaire. To settle this point, Dr. Livingstone deemed it necessary to pass to the westward of all these lakes, and ascertain whether the streams which formed their outlets flowed north, or west and southwest. It is supposed that he had accomplished this tedious and difficult journey, and was on his way back to Lake Nyassa and the coast, when he encountered the extensive marshes through which he was obliged to wade for days, and whose deadly malaria cost him his life.

LOUISIANA. The year opened gloomily in Louisiana. An act passed in the extra session by what is known as the "Pinchback Legislature," was promulgated on the 5th of January. Its aim was "to suppress riotous and unlawful assemblies, and to define the duties of officers of the State in regard thereto, and to punish officers and others for neglect or refusal to discharge and perform duties im-

posed upon them by law." This was speedily followed by another act authorizing the calling out of an armed militia for that purpose.

On the 3d of January a mass meeting assembled to "express opposition to the 'Pinchback' government and to support the 'McEnery' government and Legislature elected on the 4th of November, 1872."

A body selected by this mass meeting irrespective of party, from among the most conspicuous citizens, prominent men of business, and largest tax-payers, called the "Committee of Two Hundred," subsequently issued an address to the people containing the following statement of their views, and of the results of the mission which had been confided to them:

We have laid before the President of the United States an impartial and truthful history of the extraordinary events which have transpired within the State of Louisiana, resulting in the overthrow of the government elected by the people and the temporarily installing men who were not in any manner elected thereto. * * * We confidently anticipate that Congress will promptly appoint a committee to investigate fairly and impartially the facts of the case, and in view of the gross and palpable wrongs which have been committed, we cannot doubt that such a committee must admit and report to Congress the necessity of prompt and complete relief. We do not allow ourselves to despair of such relief at the hands of Congress because the Republican party has a large majority in that body. There do arise in the political history of free governments conspicuous emergencies in which duty to the common weal rises superior to party ties, and the imperative demand for justice overwhelms all personal or partisan considerations. We are impressed with the belief that the universal public sentiment of the United States will point to the present crisis in Louisiana as constituting such an emergency, and we are disposed to encourage in our people a spirit of trust and confidence in the virtue and justice of the national Government, which will be their best safeguard against rash and desperate conduct.

If that trust should prove to be misplaced, and the monstrous usurpation which has taken place should be permitted to pass unrebuked, we may well give way to despair. But in the meantime it behooves our people to pursue a line of conduct which shall rob apprehension of every pretext or apology.

We have everywhere and at all times proclaimed our conviction that the body styling itself a Legislature now in session at the Mechanics' Institute, does not and never did comprise a quorum of members elected by the people; that it has no other claim to authority over, or obedience from, the people, than such as it desires from the supposed recognition of the national Executive; and we feel justified by the language and action of the President himself in regarding that recognition as merely provisional and temporary, subject to the future action of the Congress of the United States, to which tribunal the President has submitted us for relief. We are equally convinced that the body which recently assembled at Lyceum Hall in that city did comprise a quorum of lawfully-elected members of the State Assembly, and that, but for the refusal of the national Executive to recognize it as such, that body would encounter no legal obstacle to the exercise of the constitutional functions of the State Legislature.

While fully accepting the situation as it stands, and advising a studious abstinence from all proceedings calculated to provoke a collision with "the powers that be," there are certain duties imposed by the Constitution in the most imperative terms, which no body claiming or intending to claim recognition as

the lawful General Assembly of the State, can omit without abdicating its claim to be so considered and recognized. In all lawful procedure looking only to the assertion of their legal existence with a view to their future recognition by the Congress of the United States, when the controversy now at issue shall be determined, they should receive, and it is reasonable to suppose they will receive, the moral support, not only of the citizens of the State, but of every right-minded citizen of the United States wherever he may reside. In view, therefore, of the approaching meeting of the General Assembly, now about to take place—

Be it resolved, That we recommend to the people of this city and State to extend to the Legislature of the State of Louisiana, now about to assemble, their moral support and earnest sympathy, and such material aid as may enable them to assert and maintain by legal means the rights of the people of this State to local self-government.

As an offset to this report, an Executive address signed by Acting-Governor P. B. S. Pinchback (colored, Republican), was issued on the 3d of January. After reviewing the political situation and the circumstances attending the counting of votes, it proceeds to say:

Not content with all these outrages against American citizenship, these foiled and defeated leaders of a minority, when thwarted by the majesty of the law as construed and enforced by an honest and independent judiciary, State and Federal, now propose, through a man pretending to be Governor-elect, and a Legislature pretending to be elected, to organize and operate a government in direct conflict with and in violation of the dignity and peace of the existing government of the State of Louisiana and of the United States. We recognize the right of free discussion and of free assemblage of the people. They may lawfully meet, not only to memorialize the authorities to redress wrongs, to perpetuate rights; not only to criticize and censure their servants, wherein they may deem them delinquent, but even to denounce them for wrongs, real or imaginary; but when any class of men, with an undetermined and unascertained official status propose to meet and organize a law-making department and inaugurate an executive and exercise governmental functions in the presence of and in conflict with the existing established authorities, such parties are revolutionists, and guilty of treason against the State, and are disturbers of the public peace, and must be dealt with as such.

I am prepared, as the acting Executive of Louisiana, to permit, without let or hindrance, a faction of her citizens to indulge themselves as fully as the largest personal liberty may require, and the financial embarrassment and social disquiet incident thereto must belong to them; but when their action becomes organized and suggests and prompts violations of the law, and obstructions and antagonisms to the authority of the State in the exercise of its legitimate functions, it cannot for a moment be either ignored or overlooked, but must be met and suppressed. It is my duty as Executive not only to quell mobs and insurrections, but to prevent, by the prompt and vigorous execution of the law, the inception of such riotous and disturbed conditions. I do not propose that such a state of things shall be inaugurated in the State of Louisiana as will make it necessary for the national authorities to declare martial law therein and take possession thereof, however much this deplorable issue may be sought and desired by the few ill-advised, short-sighted, and self-seeking men who are laboring to that end.

The Governor-elect, as returned by the Legislature in session at the State-House, will, on the day provided for in the constitution, be inaugurated, and the Legislature recognized by the President will meet

and perform its legitimate functions, but no pretended Governor shall be inaugurated and no pretended General Assembly shall convene and disturb the public peace. Parties participating in either case are public wrong-doers, and shall be promptly dealt with as such. The whole force of the State shall be used for this purpose, and all necessary national aid will be invoked to cooperate with and sustain the same. I have every confidence that the General Assembly now in session, sustained and aided by the suggestions and the moral influence of the community, will make wise and adequate laws; and I shall cheerfully cooperate with them in furthering the public weal, but no good end can be accomplished by disorder and revolution, while the commercial, financial, and industrial interests of the State will be seriously affected thereby. No good citizen will sanction them, and under the obligation of my oath of office I am determined they shall not prevail.

On January 7th, the day appointed for the assembling of the Legislature, the rival bodies were each inaugurated. There was a general closing up of places of business, and the entire population assisted at the inauguration of the McEnery Legislature. By command of General Emory, the United States troops were stationed in readiness to preserve order. The general determination expressed was that, if the meeting of the Legislature was interfered with as menaced in the proclamation of Acting-Governor Pinchback, the citizens would form and defend their representatives against any force except the military of the United States. No effort having been made to carry the proclamation into effect, after the adjournment of the Legislature, the crowd dispersed.

On the 10th of January a number of Senators transferred themselves from the Pinchback or Kellogg (as it was subsequently known) to the McEnery Legislature. At the same time they issued the following address to the people of Louisiana:

We deem it our duty in the present anomalous condition of affairs to place, before our constituents and the country, the reasons that actuate us in the course of conduct we have determined to pursue. We are Republicans, and believe in a republican form of government. We have acted with the national Republican party, but we cannot sanction the course that has been pursued in this State by the custom-house portion of our party, and by the Pinchback government; and we believe that no right-thinking person or class, no matter of what political shade or conviction, can sustain them in the gross violation of the rights of the people, and their reckless and intolerant course.

The organization of the Senate and House we consider as revolutionary. Senators notoriously elected have been displaced, and those whom they defeated put in their places. Members of the Legislature returned by both boards have been ignored, and their places filled by defeated candidates. * * * The question, "Who constitute the legislative board?" is subordinate to the question, "What are the returns?" Returning officers may count in or count out persons, with or without returns, but the returns will show for themselves. * * * The Senate having been illegally organized by the revolutionary and violent usurpations of P. B. S. Pinchback, who was not the President of the Senate or a member of it, and who called up and swore in as Senators persons who were notoriously defeated, against and in contempt of the protests of a large majority of the Senators holding over, and who alone had the right to

organize the Senate; and in the face of the rule established two years before in the organization of the Senate, on the motion of said Pinchback, himself then a Senator; and, considering the public good and the interest of our constituents, we have withdrawn from the body with which we have been acting, and will hereafter take our seats in the Senate which we believe truly represents the people of the State.

On the 14th of January, William P. Kellogg was inaugurated Governor at the Mechanics' Institute. The same day and hour the oath of office was administered to John McEnery at Lafayette Square. There was complete cessation of business. The people thronged the vicinity of Lafayette Square. The metropolitan police were under arms. The artillery was harnessed and ready for action at their place of rendezvous. United States troops were drawn up on some of the principal streets. Though grave and intense feeling was manifested by the assemblage, the day passed without any outbreak.

On the 14th of January, Congress took cognizance of the Louisiana case. In the House, it was moved that a joint select committee be appointed to investigate the election. After an animated discussion, it was resolved that the President's message on this subject be referred to the Judiciary Committee, with instructions to report if the case required congressional action.

In the Senate, Mr. Morton offered a resolution "that the Committee on Privileges and Elections be instructed to inquire and report to the Senate whether there is any existing State government in Louisiana, and how and by whom it is constituted." (*See CONGRESS, U. S.*)

Mr. Saulsbury offered an amendment directing the committee, if it found no legal government existing in Louisiana, to inquire when it ceased, and whether any Federal officer, executive or judicial, had any thing to do with the overthrow of the legal government.

The amendment was lost, and Mr. Morton's resolution was then adopted.

The two boards of election returned for Louisiana arrived in Washington on January 26th. Witnesses were summoned, and the committee proceeded to take voluminous testimony, covering more than a thousand pages of printed matter. On the 20th of February the result was laid before Congress. The following is a synopsis of the majority report of the committee:

It premises that Meers, McMillen and Ray each presented credentials as Senators-elect, signed respectively by McEnery, and Kellogg, countersigned by two different claimants as Secretary of State, and each purporting to be sealed with the great seal of the State of Louisiana. It then cites the election law in force in that State. Section 57 of this law requires "that should any of the returning officers named therein be a candidate for any office at any election, he shall be disqualified to act as returning officer for that election, and a ma-

jority of the remaining returning-officers shall summon some respectable citizen to act as returning-officer in place of the one so disqualified."

This act is in conflict with the constitution of the State in various particulars. The constitution provides that returns of elections of all members of the Legislature shall be made to the Secretary of State, and that the returns of every election for Governor and Lieutenant-Governor shall be sealed up and transmitted to the Speaker of the House of Representatives next to be held, and that the General Assembly shall meet in the House of Representatives and count the votes for Governor and Lieutenant-Governor. The act provides that returns shall be made to the governor, and that the Governor, Lieutenant-Governor, Secretary of State, John Lynch and T. C. Anderson, or a majority of them, shall be returning-officers for all elections. Under this law, an election was held on the 4th of November, 1872. On the 18th of November the returning board consisted of Warmoth, Pinchback, Herron, Lynch, and Anderson. Governor Warmoth resolved to reconstruct this board. The office of Secretary of State was in dispute. Bovee was elected in 1869. Upon pretense of malfeasance in office, by Executive order, in August, 1871, Warmoth suspended Bovee, and appointed Herron. Judge Emerson, of the Eighth District Court, decided that Warmoth had a right to suspend Bovee, and fill the vacancy until the close of the next session of the Legislature. Bovee's appeal to the Supreme Court was dismissed, which left the decree of the inferior court in force. At his own request, the impeachment of Bovee was carried over to the next session. In March, 1872, Bovee brought a second suit against Herron. Judge Dibble decided that the commission of Herron, though legal, had expired, and Bovee was entitled to the office. An appeal from this decision was made to the Supreme Court, which affirmed it on the 2d of December, 1872.

In the mean time Warmoth had appointed Wharton Secretary of State in the place of Herron, removing him on the grounds—1. That his commission had expired, and the Governor had a right to fill vacancies; and, 2. that Herron was a defaulter in a former office, and ineligible to any office while thus in default. Wharton performed the duties of the office until the decision of the Supreme Court in favor of Bovee about December 2, 1872.

Governor Warmoth, apprehensive that the Eighth District Court, under this decision, would install Bovee, removed Dibble, and commissioned Elmore as judge of said court. Judge Elmore refused to execute said mandate and writ in favor of Bovee, for which the Supreme Court fined and imprisoned him; which sentence Governor Warmoth remitted by pardon. Though prematurely commissioned by Warmoth, it is admitted by all parties that El-

more was in fact elected over Dibble by about 9,000 majority.

The returning board met on the 18th of November. Before the adjourned meeting on the next day, Warmoth had removed Herron. Wharton had qualified as Secretary of State, and as member of the board. Pinchback and Anderson, having been candidates, were disqualified to serve. There is a conflict of testimony with regard to the filling of these vacancies. Governor Warmoth, Wharton, Cooley, Bragdon, Sheridan, and others, swear that Hatch and Da Ponte were elected; Lynch and Herron testify to the election of Longstreet and Hawkins. This difference gave rise to two boards, known as the Warmoth Board, and Lynch Board. These boards appealed to the court for sanction. Judge Dibble, presiding, granted an injunction in both cases. It must be borne in mind that this judge was holding over in office until his successor should be commissioned. So long as these injunctions remained in force, so long must he retain office for lack of a legal commission for his opponent Elmore, who had been undoubtedly elected. On the 19th of November, Dibble decided in favor of the Lynch Board. On the 20th, Warmoth signed and promulgated an act passed by the previous Legislature altering the constitution of the returning board. Under this act he claimed the right of appointing the new board, during the vacation of the Legislature. At the same time, he issued a proclamation convening the Legislature on the 9th of December. It is admitted by all parties that only the Legislature elected on the 4th of November, 1872, was authorized to meet under this proclamation.

Governor Warmoth, by the assistance of Judge Elmore, having rid himself of the two previous boards, filled the appointments in the new board, commonly called the De Feriet Board, created by the act of November 20th.

"We come now to the saddest chapter," says the report, "in this melancholy business, the interference of Federal authority with the affairs of the State of Louisiana." After citing the fifteenth amendment, and the act of Congress of May 31, 1870 (16 statutes at large 140), the report goes on to say that, under this act, a contest between two citizens of the same State in regard to any State office cannot be waged in any Federal court, except the contestant has been defeated "by reason of the denial of the right to vote on account of race, color, or previous condition of servitude."

On the 16th of November, 1872, William P. Kellogg filed his bill on the equity side of this court against the Warmoth board, and McEnery and the publishers of the official journal of the State. It is at least questionable whether this bill presented a case within the jurisdiction of the Federal court. Though it alleges in the first part that persons had been denied registration and the right to vote on account of race and color, at the time this

bill was filed, this wrong was completed, and it was not in the power of the court to undo it. In the subsequent part of the bill the pleader ignores the fact of race or color as an element of jurisdiction.

Again, it can hardly be claimed at the time this bill was filed that Kellogg had been deprived of his office of Governor. It states his apprehension that the board would declare the election of McEnery, and thus embarrass him in the enforcement of his right to the office. On the other hand, it may reasonably be claimed that if Warmoth should destroy the returns, Kellogg could not establish the fact that he had been defeated because citizens had not been allowed to vote on account of race or color. It was never before pretended that such a question as the right of these contending boards could be settled by suit in equity, and this bill gave no warrant for the subsequent extraordinary proceedings. The utmost which the court had authority to do, was to restrain the destruction of the returns and documents. They were State records, and the Federal court had no right to take possession of them. The bill only asked that copies should be filed.

Warmoth, by the act approved November 20th, having abolished all other boards, the De Feriet Board, on December 4th, declared McEnery elected Governor; Penn, Lieutenant-Governor; Armistead, Secretary of State; Ogden, Attorney-General; Tusher, Superintendent of Education, and the members of the Legislature. Governor Warmoth issued his order proclaiming the result. Governor Warmoth was apparently master of the situation, but Judge Durell took a different view of the case.

Judge Durell "out of court, at his house, late at night, December 5th, without application by any party, made the following order, which is without parallel, and it is hoped will remain so, in judicial proceedings:

Circuit Court of the United States, Fifth Circuit, and District of Louisiana, in equity, No. 6880. William P. Kellogg *vs.* H. C. Warmoth *et al.* Whereas Henry C. Warmoth one of the respondents herein, has, in violation of the restraining order herein, issued the following proclamation and returns of certain persons claiming to be a board of returning officers all in violation and contempt of said restraining order, as follows: [Here the proclamation of December 4th is cited.]

Now, therefore, in order to prevent the further obstruction of the proceedings in this cause, and further, to prevent a violation of the orders of this court, to the imminent danger of disturbing the public peace, it is hereby ordered that the marshal of the United States for the District of Louisiana shall forthwith take possession of the building known as the Mechanics' Institute, and occupied as the State-House for the assembling of the Legislature therein, in the city of New Orleans, and hold the same subject to the further order of this court, and meanwhile to prevent all unlawful assemblage therein under the guise or pretext of authority claimed by virtue of pretended canvass and returns made by said pretended returning-officers, in contempt and violation of said restraining order; but the marshal is directed to allow the ingress and egress to and from

the public offices in said building of persons entitled to the same.

(Signed) E. H. DURELL.

It is impossible to conceive of a more irregular, illegal, and in every way inexcusable act on the part of a judge. Conceding the power of the court to make such an order, the judge out of court, had no more authority to make it than had the marshal. It has not even the form of judicial process. It was not sealed, nor was it signed by the clerk, and had no more legal effect than an order issued by any private citizen. * * * The De Feriet Board, therefore, had color of official existence. Their canvass was completed, and the result promulgated under color of State law, and it is clear that this gave the Federal Court no more right to seize the State-House than to seize the Capitol.

The marshal, on receiving this pretended order, called for a detachment of United States troops to act as a *pomo comitatus*, seized the State-House at 2 A. M., of December 6th, and held it for weeks.

Afterward on the same day, Judge Durell made an order granting the injunction as prayed for in the Kellogg bill, and delivered an opinion. This opinion materially misstates the allegations of the bill. He seems to admit the validity of the act of November 20th, but determines that it shall not take effect at an inconveniently early day. The judge also declares that about four thousand affidavits sustain the averments of the bill:

Your committee have examined many of the affidavits, and it is admitted that none of them contain the statement that right of registration or right of voting was denied on account of race, color, or previous condition of servitude. * * * Viewed in any light in which your committee can consider them, the orders and injunctions made and granted by Judge Durell in that cause are most reprehensible, erroneous in point of law and are wholly void for want of jurisdiction, and your committee must express their sorrow and humiliation that a judge of the United States should have proceeded in such flagrant disregard of his duty, and have so far overstepped the limits of Federal jurisdiction. * * * On the 6th of December, 1873, the Lynch Board—Boove, who was then acting as Secretary of State in place of Herron), Lynch, Longstreet, and Hawkins—pretended to have canvassed the returns of the election, and certified to the Secretary of State that Kellogg had been elected Governor; Antoine, Lieutenant-Governor; Clinton, Auditor; Field, Attorney-General; Brown, Superintendent of Education; and Deslonde, Secretary of State; and also certified a list of persons whom they had determined to be elected to the Legislature. There is nothing in all the comedy of blunders and frauds under consideration more indefensible than the pretended canvass of this board. * * * No person can examine the testimony ever so cursorily without seeing that this pretended canvass had no semblance of integrity.

The report then attacks the claim that a decision of the Supreme Court has determined the Lynch Board to be the legal one, on these grounds:

1. That fraud vitiates every thing, and that no court upon the testimony before the committee could hold that canvass valid. 2. The judgment of the Supreme Court is void because it is without jurisdiction. 3. But for the interference of Judge Durell in the matter of this State election, a matter wholly beyond his jurisdiction, the McEnery government would to-day have been the *de facto* government of the State. Judge Durell interposed the army of the United States between the people of Louisiana and the only government which has the semblance of

regularity, and the result of this has been to establish the Kellogg government, so far as that State has now any government. For the United States to interfere in a State election, and by the employment of troops set up a Governor and Legislature without a shadow of right, and then to refuse to redress the wrong, upon the ground that to grant relief would be interfering with the rights of the State, is a proposition difficult to utter with a grave countenance. Besides, it is impossible to determine to what extent the Supreme Court may have been influenced in rendering this decision by the fact that the Kellogg government, the creation of the Lynch Board, had already been established, and the expectation that it would be sustained by Federal authority. * * * It is the opinion of your committee that but for the unjustifiable interference of Judge Durell, whose orders were executed by the United States troops, the canvass made by the De Feriet Board and promulgated by the Governor, declaring McEnery to have been elected Governor, etc., and also declaring who had been elected to the Legislature, would have been acquiesced in by the people, and that government would have entered quietly upon the exercise of the sovereign power of the State. But the proceedings of Judge Durell, and the support given to him by United States troops, resulted in establishing the authority *de facto* of Kellogg and his associates in State offices, and the persons declared by the Lynch Board to be elected to the Legislature. We have already seen that the proceedings of that board cannot be sustained without disregarding all the principles of law applicable to the subject, and ignoring the distinction between good faith and fraud. Your committee are therefore led to the conclusion that, if the election held in November, 1873, be not absolutely void for frauds committed therein, McEnery and his associates in State offices and the persons certified as members of the Legislature by the De Feriet Board, ought to be recognized as the legal government of the State. Considering all the facts established before your committee, there seems no escape from the alternative that McEnery must be recognized by Congress, or Congress must provide for a reelection.

The report then says that it is impossible to affirm that Louisiana has any government at present. The McEnery government approaches more nearly a government *de jure*, the Kellogg government a government *de facto*. The question is not a judicial one, and cannot be decided by the courts. It is political, and must be decided by Congress. Public opinion in Louisiana is about equally divided between the two governments. If Federal support were withdrawn, Kellogg's government would be immediately supplanted. Business is interrupted, confidence is destroyed. Should Congress adjourn without making provision for this case, one of two things must result: there will be collision and bloodshed between the two parties, or the President must support the Kellogg government by United States troops. The committee therefore recommend the passage of a bill to insure an honest reelection under the authority of the United States.

This bill was lost, and the State of Louisiana was left in what the congressional committee describe as "a melancholy condition," substantially a state of anarchy. Although many of the facts stated in this report have already been mentioned in the previous volume, they are here repeated as presented by the high authority of a committee of Congress.

In view of the deleterious effects of the unsettled political condition, various unavailing efforts at compromise were initiated in Louisiana. On the 15th of February Governor McEnery issued a proclamation forbidding payment of taxes to collectors appointed by Kellogg. On the 27th he issued a proclamation enrolling the State militia.

On the 1st of March a mass meeting assembled in New Orleans, and passed resolutions supporting the McEnery government, asking the withdrawal of Federal protection from the Kellogg government, or else that the State be placed under martial law pending a new reconstruction by the General Government.

On the evening of March 6th an effort to take possession of the police-stations by an unorganized body of citizens, after considerable bloodshed, was frustrated by the metropolitan police, armed with rifles and artillery, and supported by several companies of United States infantry. This attempt was disclaimed by the McEnery government as premature and unauthorized.

On the 6th of March a body of armed police took possession of the Odd-Fellows' Hall, and having arrested the members of the McEnery Legislature in session there, placed them between files of sharp-shooters and marched them as prisoners to the guard-house.

During the day Governor McEnery wrote to Colonel Emory, commanding the Department of the Gulf, to inquire "whether or not the action of the metropolitan police force of this city in the seizure of the Odd-Fellows Hall this morning and the armed prevention by said force of the assembly of the Legislature of this State in said hall, meet with your countenance and approval, and whether or not the United States forces under your command will support the armed occupation of that building." In reply, Colonel Emory says:

I have to state that the seizure of said building by the metropolitan police was without my knowledge, and made without conference with me. In regard to any expression of opinion as to the act, having no authority in the premises I must respectfully decline to make any reply.

In answer to that part of your letter which asks whether my command "will support this armed occupation of that building," I have the honor to inclose to you the copy of a telegram received last night, from which you will see that it is made my duty to prevent any violent interference with the State government of Louisiana. Previous instructions have directed me to recognize the government of the State of Louisiana to be that represented by the Hon. W. P. Kellogg.

If the act referred to by you in your letter is the act of Governor Kellogg and of the government of the State of Louisiana represented by him, and any violence is used to interfere with this act, I shall most assuredly consider it my duty, under my instructions, to use the whole force of the United States at my disposal to prevent such violent interference.

An address to the people of Louisiana was then issued by Governor McEnery and the Legislature, wherein, after recapitulating the facts already cited and the conclusions announced by the congressional committee, they

state in respect to the *de facto* government, that—

We have further to record the mortifying fact as declared by the report of the committee of the United States Senate that such government is maintained and its authority enforced by the aid of the military power of the United States.

It has been even intimated, that the government *de jure* does not command the support and approval of the people of the State, because this government is unwilling to defy and unable to overcome the power of the United States. Because of this unwillingness and inability, the stupendous falsehood is proclaimed that the people of Louisiana voluntarily submit to and acquiesce in this usurpation. If we resist the Executive of the United States, which with arms defends this usurpation, we are rebels; if we do not resist it, we submit to and acknowledge its authority and power. * * * We appeal to our brethren in the other States for their sympathy and support of a position which they are all interested in maintaining, thus vindicating a cardinal principle of our political system. We have no other hope or means of defense against the wrongs done us. We can only assert our rights, refuse submission to usurpation, and abide the judgment of the American people in our case.

The Kellogg Legislature having passed an act for the enforcement of the collection of taxes under speedy and severe penalties, the "People's League" for resistance to tax-collection was largely recruited. Governor Kellogg issued a proclamation against non-tax-payers, stating that the unpaid State taxes amounted to \$2,381,321.60, and urging the citizens to prompt payment, to avoid extreme measures. He warned all citizens against taking part in any association or conspiracy having for its object resistance, passive or otherwise, to the collection of taxes. The "Committee of Two Hundred" issued an address to the people, reviewing the political position, the majority and minority reports on the testimony elicited by the congressional committee, and the deplorable condition of the State. They advert to the friendly manner in which their previous "Address to the People of the United States" was received by the press, and the interest manifested in the subject by the people of the United States, and recommended "the preservation of a temperate, moderate, and sedate deportment on the part of our people, so that we may show to the world that the inherent force and strength of our population is equal to the occasion of maintaining ourselves in the presence of an ignominious government, imposed by usurpation, violence, and fraud, according to the report of a committee over whom we had no influence or control, and in which we had no representation."

Among the acts passed by the Kellogg Legislature was one "to protect the civil rights of citizens," requiring all common carriers, innkeepers, and managers of places of public amusement, etc., to afford equal and impartial accommodation to citizens without regard to race or color; and providing severe fines, forfeitures, and imprisonment, for those guilty of the misdemeanor of making such distinctions.

Another act, which excited much comment, was that authorizing the muster of the metro-

politan police force as part of the militia of the State, to be called the Metropolitan Brigade, and allowing the commander-in-chief to send them to perform military duty in any part of the State.

In Grant Parish there had been much dissatisfaction among the negroes. The Lynch Board made no returns of parish officers elected in this outlying parish. Kellogg had either made, or they anticipated that he would make, appointments of persons elected under the Warmoth count. Judge Rutland, a Republican, was exceedingly unpopular among them, being suspected of having counseled such appointments. Predatory bands of colored men rode about the parish, threatening murder and outrage, and firing into houses. They sacked the residence of Judge Rutland, forcing his family to cross the river for safety, and throwing the coffin containing the dead body of his child into the highway. They killed two colored men who would not join them, robbed women of valuables, picketed the country and held possession of the town of Colfax from April 1st to April 18th.

Sheriff Nash, appointed, but not commissioned by Kellogg, arrived with a *posse* of one hundred and twenty-five white men. The negroes, about three hundred strong, though deserted in this emergency by their white and some of their colored leaders, were well armed and provisioned, and had fortified the court-house with breast-works. When summoned to surrender, they refused. The sheriff's party having taken the intrenchments, the rioters fled for refuge to the court-house and displayed a flag of truce. Two of the attacking party, sent forward to parley, were shot, one of them after being dragged inside of the building. The court-house was immediately fired by the assailants, and as they attempted to escape, many of these misguided negroes paid the penalty of their rashness with their lives.

On the 18th of April, General Emory applied to Washington for more explicit directions thus:

Requisitions by the United States marshal in the execution of judicial process have been received, in cases occurring in the disturbed district and other parishes, and I have ordered troops to Monroe and Alexandria, La., to act as a *posse comitatus* to the marshal. But the Governor of the State has made requisitions for troops, covering ground in various parts of the State, stating the inability of the local authorities to keep the peace. It will therefore be seen how important it is that I should have the right views of the instructions of the 5th.

The instructions of this date would seem to imply that I was expected to act only on the requisition of the United States Marshal in execution of judicial process. As the order of the 5th of March now stands it is very comprehensive, and it is on that, no doubt, Governor Kellogg bases his requisition.

(Signed) W. H. EMORY, Col. Comd'g.

General McDowell telegraphed on April 18th that Colonel Emory ordered troops to Grant Parish, but all steamboats refused to take them, averring that it would destroy their trade. He

adds, "The Governor states that the local authorities are utterly unable to keep the peace." The United States troops, however, arrived at Colfax on the 23d, but order had been restored.

In St. Mary's Parish the appointees of Governor Kellogg opened court, but the bar unanimously refused to acknowledge them, and the court adjourned. Outbreaks occurred throughout the State.

The inhabitants of the parish of St. Martin's held a public meeting and bound themselves to resist the collection of taxes by the Kellogg tax-collectors. To enforce the collection of these taxes the Metropolitan Police Brigade, armed with rifles and carrying field-pieces, was sent to St. Martin's. The citizens of that parish, under the command of Colonel De Blanc successfully resisted this body for several weeks. On the 1st of May a detachment of United States troops having been sent to support the marshal, received the surrender of Colonel De Blanc and the leaders. The citizens, fully organized, returned to their homes. They stated that, "while they bowed to the mandate of the United States Executive, supported by its military force, they were in arms to prove that throughout Louisiana no official of the Kellogg government could extort submission from the people save at the point of the bayonet, in the hands of United States soldiers."

Subsequently the President of the United States issued a proclamation requiring the people of Louisiana to disperse to their respective homes, and cease from opposing the Kellogg government.

Governor McEnery then published an address to the people, counseling them to abstain from futile resistance to the power of the Federal Government, and, without yielding their rights, or giving countenance to usurpation, to await the action of Congress to redress their wrongs.

In response to a call from the "State Committee of Seventy," an election was held for a convention of the people. It assembled in New Orleans, on the 24th of November. It claimed to represent the conservative element of the State, and that its object was "not to maintain the interests of any individual, but the right of the State to be governed by the officers duly elected under its constitution." Having considered the political situation, expressed the non-acquiescence of the people under the Kellogg government, asserted the fairness of the election, devised measures to ameliorate the deplorable condition of the State, laid their grievances before the people of the Union, and appointed a committee to present their appeal for relief to Congress, the convention adjourned.

An assemblage for a similar purpose was held by the Kellogg party. But, on the 13th of December, the Louisiana case was argued before the congressional Committee on Elections and Privileges. No decision was at-

tained, and the further consideration of it by Congress was postponed until after the recess in December.

On December 25th a board of Examiners appointed by Governor Kellogg to investigate the State debt, reported the following facts:

Bonds and school fund.....	\$24,419,214 14
Miscellaneous debt of the State.....	3,283,950 70
Prior limitation contingent liabilities.....	13,003,000 00
Post limitation contingent liabilities.....	8,067,500 00
Loans to Citizens' Bank and Consolidated Association.....	4,828,780 83
Grand total.....	\$53,621,545 67

The amendment of the constitution promulgated the 15th of December, 1870, limits the debt to \$25,000,000. The State obligations and contingent liabilities then amounted to \$42,000,000; consequently, in the opinion of the board, all liabilities created since then are null and void.

The following items they consider to be either unconstitutional, or to have lapsed, or that from other causes payment will never be exacted:

Post limitation contingent liabilities.....	\$8,067,500
Prior limitation contingent liabilities.....	13,003,000
Bonds loaned Citizens' Bank.....	4,297,383
Bonds loaned Consolidated Association.....	531,447
Bonds subscribed to New Orleans, Mobile & Texas Railroad Company.....	2,500,000
Due Free School Fund.....	1,611,500
Bonds Seminary Fund.....	196,000
United States deposit.....	479,914

Total..... \$30,646,649

Deducting this amount from the grand total of liabilities, leaves \$23,000,000 of indebtedness, bearing an annual interest of about \$1,500,000. Owing to gross irregularities a large portion of these claims are of doubtful legality, and should be tested in the courts. Even after the above eliminations, the State can neither pay the debt nor meet the annual interest. The board recommended partial repudiation, reducing the debt to \$12,000,000 as a measure which would give relief to the State, satisfy its creditors, and assure a return of prosperity, by removing overgrown taxation.

The assessment for the year 1874 makes the total taxable property, city of New Orleans assessment, \$135,894,850; and the total taxable property, State of Louisiana assessment, \$228,666,653.62.

The report of the Mayor of New Orleans to the city council, of March 26th, says: "Property in this city now pays a State tax of \$2.15, and a city tax of \$2.75, on each one hundred dollars of assessed valuation, besides bearing the weight of nearly a million dollars in licenses, amounting to nearly 6 per cent. on property assessed at \$130,000,000, but well known to be over-estimated."

The commercial and financial condition was much affected by the political troubles. The greatest commercial need in this State is the deepening of the bar at the mouth of the Mississippi. Among the various projects for the attainment of this object the plan most favored by the commercial public is that recommended by Major Howell, U. S. Engineers,

called the Fort St. Philip Canal, which promises to secure a depth of thirty feet, with an estimated outlay of \$6,000,000.

The cotton-crop was greater than that of any year since the war, except 1870-'71.

The cotton-bales received in New Orleans during the year ending September 1, 1873, amounted to.....	1,980,958
These were sold for.....	\$116,168,472
Increase on previous year.....	\$11,738,472
Sugar-crop of 1872-'73 (108,520 hds.).....	125,346,493
Decrease on previous year (19,441 hds.)....	2,459,393
Sugar-crop sold for.....	\$10,027,717
Decrease on previous year.....	\$2,459,393
Molasses (gallons).....	8,598,640
Rice-crop (52,206 bbls.).....	12,007,380

LUSHINGTON, Rt. Hon. STEPHEN, D. C. L., an eminent English jurist, born in London, January 14, 1782; died there, January 21, 1873. He was the second son of Sir Stephen Lushington, Bart., and was educated at Eton and Oxford, graduating M. A. from All Souls' College in 1806, B. C. L. in 1807, and D. C. L. in 1808. He was called to the bar at the Inner Temple in 1806, was admitted an advocate at Doctors' Commons in 1808, was appointed Judge of the Consistory Court in 1823, and Judge of the High Court of Admiralty in 1838. He represented Winchelsea, Yarmouth, the Tower Hamlets, etc., in Parliament from 1820 till his retirement from political life in 1841, in consequence of the passage of the act disqualifying the Judge of the Admiralty Court from holding a seat in the House of Commons. He retired from his judgeship on account of ill-health in July, 1867, but retained the clearness of his intellect and the full possession of his faculties to the close of his life. His rare ability and sound judgment as a counselor were often tested in the early part of his career. He was consulted by Lady Byron in 1816, in reference to her separation from her husband. After a thorough examination of the case, he emphatically advised the separation; but, in the fifty-seven years that followed, he could never be prevailed upon to state what were his reasons for the advice, and the secret, though often agitated, died with him. As a judge, Dr. Lushington's decisions were held in high esteem.

LUTHERANS. Owing to the continuing influx of immigration from Germany and the Scandinavian countries, the Lutheran Church in the United States increases with great rapidity. The following table shows the number of congregations and communicants at different periods:

YEAR.	Congregations.	Communicants.
1823.....	900	
1845.....	1,307	125,629
1860.....	2,279	232,790
1868.....	3,111	351,860
1873.....	4,115	485,085

The following are the statistics of the different organizations of the Evangelical Lutheran Church, as given in Kurtz's *Lutheran Almanac* for 1874:

SYNODS.		Minist'rs.	Churches.	Comm'cn'ts.
I. DISTRICT SYNODS IN THE GENERAL SYNOD OF THE UNITED STATES OF AMERICA.				
1. Synod of New York and New Jersey.....	34	45		
2. Hartwick Synod (New York).....	35	31		4,129

Kurtz's *Lutheran Almanac* gives lists of fifteen theological seminaries, sixteen colleges, eleven general benevolent institutions, seventeen academies, eight female seminaries, and twenty-seven eleemosynary institutions, connected with or under the care of the Lutherans. The list of periodicals comprise fourteen English, twenty-two German, four Norwegian, five Swedish, and one Danish publications. Of these, nine are weekly, eight semi-monthly, twenty-four monthly, and four yearly.

I. GENERAL SYNOD.—The General Synod met at Canton, Ohio, June 11th. The Rev. William Baum, D. D., of York, Pa., was chosen president. The *Board of Foreign Missions* reported on the condition of the mission-fields in India and Africa. The expense of the Indian mission for the two preceding years had been \$27,419.60; the estimate for the ensuing year called for \$17,800. The missionary force consisted of four ordained ministers, one female missionary, and fifty-one native assistants. The

expense of the African mission for two years had been \$2,668.08. It had employed a force of five ordained ministers, and two female missionaries. Two more missionaries had sailed to reinforce it. The mission-school contained thirty-nine children. The establishment of a mission in Japan was under consideration. The Synod directed that the number of missionaries abroad be increased as fast as suitable candidates offered, and were promised support.

Fifty missions were under the care of the *Board of Home Missions*. They were established at points scattered over the country from New York to Oregon. They included sixty-three congregations, 3,183 members, fifty-six Sunday-schools, with 4,486 scholars, and thirty-two houses of worship. The net increase in memberships during the year was 1,106. The missions had raised and paid for benevolent and local objects the amount of \$68,786.78. The board asked for an appropriation of \$35,000 for the ensuing two years. The Synod undertook to raise the sum of \$50,000 for this work, with the view of enabling the board to give a better support to the present missions in the large cities, and establish new missions in other cities.

The *Board of Church Extension* had received many applications for help, but their work had been limited and crippled by the diversion of funds, intended to be devoted to this, to other purposes. Under the operation of the plan of "systematic benevolence," adopted at a previous meeting of the General Synod, the churches had contributed \$28,084.58. This was regarded as showing that the financial condition of the various enterprises included in the plan would be greatly improved if faithfully carried out.

It was represented, with regard to the work among *German Lutherans* in the United States, that sixty ministers were preaching to congregations exclusively German, twenty to congregations partly English and partly German, and that there were nearly 10,000 German communicants connected with the General Synod. The Synod recognized the great importance of the work among these people, resolved that their periodical should be continued, and directed that a sum equal at least to the amount contributed by German congregations should be expended in the German work. A Board of German Missions was constituted. The Scandinavian paper had become self-sustaining. The Synod authorized a mission-school to be established at Keokuk, Iowa, for the academical and theological instruction of Scandinavian students, who are not able to prosecute their studies at any of the other seminaries. An increased attendance at the theological seminaries over that of any period in the past was noticed, and an increased patronage of the literature published by the Church. An increase in the ratio of benevolent contributions had also taken place within the preceding two years.

The Committee on Ecclesiastical Correspondence were instructed; upon their own request, to communicate with the other Evangelical Lutheran general bodies in the United States, and to invite an interchange of correspondence, and of fraternal greeting with the General Synod, by an interchange of delegates.

The following declaration was adopted, as expressing the opinion of the General Synod on the validity of Roman Catholic baptism:

1. The Lutheran Church has never denied the validity of the baptism of the Roman Catholic Church.

2. The Lutheran Church does not sanction a repetition of sacraments.

3. Much may depend on the circumstances under which baptism is administered, and so much is due to the conscientious convictions of parties concerned, that individual cases must be left to the discretion of the individual minister and the person applying.

The Synod resolved to make the Publication Society a Board of Publication, to be controlled by the General Synod, and to borrow \$20,000 for it.

II. GENERAL COUNCIL.—The seventh convention of the General Council of the Evangelical Lutheran Church in America met at Erie, Pa., October 10th. The Rev. Prof. C. P. Krauth, D. D., was chosen President. The report of the *Committee on Foreign Missions* represented the work under their charge as being in a healthy condition. The contributions from the different synods for missionary purposes had amounted in all to \$4,039.74. The expenditures for the year had been \$8,879.24. An approximate estimate of the wants for the ensuing year was presented. It called for \$8,560. The mission is in the Jelugu district of India. It had connected with it in 1871 two missionaries and three hundred and twenty converts. A new mission-field had been opened, among the Kois and Reddies inhabiting the hills on the upper waters of the Godavery, under circumstances which promised great success. The results had failed to fulfill the first expectations. The Immigrant Mission at Castle Garden in New York City, under the charge of the Rev. Robert Neumann, had been of great advantage to the immigrants. It had secured the coöperation of influential men in the city, and the missionary had received special privileges in the prosecution of his work from the New York State and the General Government. A house had been fitted up opposite Castle Garden, at the expense of about \$30,000, as a temporary home for immigrants, and a place for taking care of their sick. Religious services were held in it daily. Progress was reported in the work on the two editions of Luther's Small Catechism, the Church Book, and the Sunday-school Book. The smaller edition of the Small Catechism, and the Sunday-school Book, had been completed during the year. The Council engaged regularly during its services in doctrinal discussions. The special topic considered was "Luther's Theses on Justification."

A letter was presented from the Rev. Henry N. Pohlmann, chairman of the Committee of the General Lutheran Synod on Ecclesiastical Correspondence, stating that his committee had been instructed by the Synod "to communicate with other Evangelical Lutheran bodies in the United States, inviting interchange of correspondence, and fraternal greetings with the General Synod, by exchange of delegates," and offering a formal invitation to the General Council to participate in such interchange. The letter stated that some of the district synods, in connection with the General Council, had already such correspondence; "as the Maryland synod with the Pennsylvanian, and the New York and New Jersey Synod with the New York Ministerium."

A reply to this communication was adopted by the General Council, with directions that it be sent to the General Synod, and to "all other bodies in the United States laying claim to the Lutheran name." In this reply, the propriety of establishing closer relations between the various Lutheran bodies, and the best methods of bringing about that object, were discussed at length. After expressing a strong hope for the eventual union of the Lutheran bodies, this paper suggested that an interchange of delegates was not adapted to bring it about, because, it recites, "as it seems to be understood and acknowledged on both sides, the two bodies, as such, do not sustain the same relation to the confession of the Church whose name both bear, and the separation that has taken place is the result of this difference of opinion and conviction. An exchange of delegates would therefore be a mere matter of form and politeness, and would involve not only an evasion and ignoring of the important points on which we differ, but a formal and distinct recognition by each body, of the position of the other, while in reality each body at heart condemns the position of the other." The belief was, however, expressed that the time had come to take some steps toward bringing about a better understanding among all who bear the common name, which might lead to an ultimate union, but that this should be effected, "not by the polite and formal exchange of delegates, but by a candid and fraternal comparison of views, so that all may clearly ascertain the points of difference, and by God's grace be brought to greater unity of spirit." For this purpose, the General Council recommended that a colloquium be held at some time and place to be hereafter determined, "in which all Lutherans who accept the unaltered Augsburg Confession may compare views in regard to that Confession;" that this colloquium should be simply for the comparison of views, and that those who take part in it should not be looked upon as binding themselves, or the synods to which they might belong; and that it should be held from time to time, as often as might be agreed

upon. All Lutheran bodies which unreservedly accept the unaltered Augsburg Confession were invited to join in making arrangements for holding the colloquium. A committee of seven ministers and seven laymen was appointed to represent the General Council in making such arrangements.

III. SOUTHERN GENERAL SYNOD. — The (Southern) General Synod in North America met at Salem, Va., May 22d. The Synods of South Carolina, Virginia, Southwest Virginia, and Georgia, were represented by fifteen clerical and fourteen lay delegates. The Rev. J. F. Campbell was elected president. Reports were presented showing the number of churches within the bounds of this body to be 145; of ministers, 91; of communicants, 11,765. Three literary institutions are sustained by its people: Roanoke College, with 160 students; Newberry College, with 100 students; and the Stanton Female Seminary, with twenty-four students. There is also a theological seminary at Lexington, S. C. It was established in 1830. It had a small but valuable library, and had been attended during the year by six students. The Synod of South Carolina had proposed to support one professor, so soon as the other synods interested in the institution should provide for another. The Synod of Georgia was contemplating the establishment of a classical academy of a high grade. The retiring president, the Rev. Prof. S. A. Repass, presented a report in which he recommended increased effort in the work of home missions, with especial reference to the increasing extent of German and Scandinavian emigration to the South, called attention to the neglect of foreign missions by the General Synod, and urged the endowment and provision of the needed buildings for the theological seminary.

IV. SYNODICAL CONFERENCE. The Synodical Conference of North America met at Fort Wayne, Ind., in July. The Synods of Missouri, Ohio, Wisconsin, Illinois, and Minnesota, and the Norwegian Synod, were represented in it by delegates. Prof. W. F. Lehman, of Columbus, O., was chosen president. A resolution was adopted in favor of seeking the establishment of German papers, to be edited as religious papers, in all the large cities. The Emigrant Mission, previously sustained by the Missouri Synod, was made the common work of the whole Conference. The following theses were adopted in definition of church fellowship:

Thesis 1. The only internal bond of fellowship between the individual Lutheran congregations among various peoples and tongues is true, justifying, and saving faith in the Lord Jesus Christ, which embraces and holds fast with him and in him also his most holy and perfect merits.

Thesis 2. The only external bond of fellowship between the individual Lutheran congregations among the various peoples and tongues is the unaltered Augsburg Confession.

Thesis 3. Because the unaltered Augsburg Confession, which is as well historically particular in its origin as it is oecumenical in its doctrinal contents,

in all its articles of faith sets forth the pure and uncorrupted Word of God positively and negatively, the consciences of all Lutherans, whether as individuals, congregations, or ecclesiastical bodies, are bound by it.

Thesis 4. Accordingly, no congregation or ecclesiastical body is orthodox Lutheran that does not receive the words of this Confession, both as they teach the truth and as they reject errors.

An explanatory remark was appended to thesis 3, to the effect that "the adoption of the other symbols is not absolutely necessary for Lutheran fellowship, so far as it is not denied that they stand in harmony with the Augsburg Confession in the same pure faith."

An informal conference was held during the summer at Canton, O., between members of the General Synod and the General Conference, to discuss the points of difference between the two bodies, and to seek some way of a better understanding between them. It was not attended with any favorable results. The *Zeitschrift*, a journal in sympathy with the General Council in reviewing the movement for union, remarked that it had developed the following points:

1. That important doctrinal differences caused the division of the General Synod at Fort Wayne.

2. That, notwithstanding all personal agreement, the General Council, as a body, stands, nevertheless, upon an entirely different doctrinal basis from the General Synod.

3. That these real doctrinal differences, or the principles of both bodies, ought to be made thoroughly known among all the pastors and congregations of the country.

4. That the points which in reality divide the General Council from the General Synod can now be discussed in a more calm and appropriate manner than they could immediately after the separation, seven years ago.

5. That the present existing differences in doctrine and practice must be openly and honestly acknowledged by both sides before the division wedge can be removed.

On the 9th of October, a voluntary conference was held in the city of New York between a number of ministers connected with the German Synod in the United States, and the German delegates to the meeting of the Evangelical Alliance who were connected with the Lutheran Church. A leading object of discussion was as to the method in which the wants of the German congregations in the United States could best be met. It was agreed by all the German representatives that the need of pastors at home (in Germany) was so great that none could well be spared for work in America. Nevertheless, in view of the moral responsibility resting upon the German Church to care for its scattered members, and of the fact that the English-speaking Churches in the United States were not equal to the work of reaching the Germans, they were willing to undertake to do all that was possible to supply the peculiar deficiency which existed here. They agreed, therefore, that a number of young, unmarried ministers should be sent over, who should remain, laboring for fixed salaries, for from three to five years, and that teachers and

colporteurs should be furnished from the Wichern's Institute, to meet the remote wants in this country. The German delegates suggested that the American Lutherans secure a good German professor, and place him in one of their institutions; and that they endow one or two scholarships in a German university, the incumbents of which should be expected to elevate themselves to the German work in the United States.

LYTTON, Right Hon. Sir EDWARD GEORGE EARLE LYTTON BULWER, Baron, D. C. L., an English novelist, poet, dramatist, statesman, and historian, one of the most prolific of modern writers, born at Haydon Hall, Norfolk, in May, 1805; died at Knebworth, Herts, January 18, 1873. He was the youngest son of the late General Bulwer and Elizabeth Barbara Lytton, his wife. He was educated at home by his mother, and afterward in private schools, whence he passed first to Trinity College, and subsequently to Trinity Hall, Cambridge, where he took the Chancellor's Prize Medal for his English poem on "Sculpture." During the long vacation he made pedestrian excursions over England and Scotland, and the year after he left college he traveled on horseback through a great part of France. He graduated B. A. in 1826 and M. A. in 1835, and at a later period Oxford, and in 1864 Cambridge, conferred on him the honorary degree of D. C. L. His strong literary bias displayed itself in early life, and he first appeared in print in 1820, when only fifteen years of age, as the author of "Ismael," an Oriental tale. His next published work, in 1825, was the prize poem on "Sculpture," already mentioned. In the following year he printed, at Paris, exclusively for private circulation, fifty copies of "Weeds and Wild-Flowers," a small collection of poems and of maxims or aphorisms, which has never been published in the editions of his collected works. For the next forty years he produced, with remarkable rapidity, but with a due regard to consistency of plot and high literary excellence, twenty-two novels, of which the following are the titles and dates: "Falkland," 1827; "Pelham, or the Adventures of a Gentleman," 1828; "The Disowned," 1829; "Devereux," 1829; "Paul Clifford," 1830; "Eugene Aram," 1832; "Godolphin," 1833; "Pilgrims of the Rhine," 1834; "The Last Days of Pompeii," 1834; "Rienzi," 1835; "Ernest Maltravers," 1837; "Alice, or the Mysteries," 1837; "Leila, or the Siege of Granada," 1838; "Night and Morning," 1841; "Zanoni," 1842; "The Last of the Barons," 1843; "Lucretia," 1846; "Harold," 1848; "The Caxtons," 1850; "My Novel," 1853; "What will He do with It?" 1857; and "A Strange Story," 1862. During the same period he published, in addition to the two poems already mentioned, the following volumes of poems: "The Siamese Twins," 1831; "Eva and other Poems," 1842; "Poems and Ballads translated from Schiller,"

1844; "The New Timon," 1846; "King Arthur," 1848; rewritten and revised, 1870; "The Lost Tales of Miletus," 1866; "The Odes of Horace, translated, with an Essay on the Genius of Horace," 1869. Commencing with 1836, Lord Lytton also wrote the following dramas: "The Duchesse de la Vallière," 1836; "The Sea-Captain," 1837; "The Lady of Lyons," 1838; "Richelieu," 1838; "Cromwell," 1842; "Money," 1848; "Not so Bad as we Seem," 1852; "Walpole, or Every Man has his Price," 1869. "The Parisians," his latest novel, was published posthumously in 1878. Lord Lytton entered the House of Commons, as Edward Lytton Bulwer, in 1831, as a Liberal, and remained in it ten years, being made a baronet in 1838. He was out of Parliament from 1841 to 1852, though twice a candidate, but in 1852 was returned for Herts as a Conservative and follower of Lord Derby; was in the cabinet as Secretary of State for the Colonies in 1858-'59, and remained a member of the House till his elevation to the peerage in 1866. He was always regarded in the House as one of its ablest orators, and rarely addressed it without attracting and retaining its attention. While thus active in political matters, he wrote the following political and historical works, besides pamphlets and addresses: "England and the English," 1833; "The Crisis," 1835; "Athena, its Rise and Fall," 1837, a most elaborate and interesting work, of which, however, only two volumes were published; "Letters to John Bull, Esq.," 1851; "Caxtoniana," two volumes, 1863. Besides these forty-five works, most of them in several volumes, Lord Lytton was a frequent and valued contributor to the leading magazines and reviews. Having conceived the notion of a journal which should combine scientific information with politics and general literature, he, in conjunction with Sir David Brewster, and Dr. Lardner, commenced a periodical in the early part of 1841, founded upon this design, entitled the *Monthly Chronicle*; but it was too scientific to suit the public taste of the day, and, after a few months' existence, its projector retired from it, dissatisfied with the result. During his connection with this organ, he contributed to its political section a remarkable "Historical Review of the State of England and Europe at the Accession of Queen Victoria," on which M. Guizot bestowed the highest commendation. In addition to the works already mentioned, we may name as among the most noted of his letters, reviews, essays, and addresses, his "Confessions of a Water-Patient," addressed to W. Harrison Ainsworth, in 1845; his biographical sketch of Laman Blanchard, prefixed to his "Essays," in 1846; "Inaugural Address to the Associated Societies of the University of Edinburgh," delivered on the occasion of his being elected first honorary president, and printed in 1864; many valuable critical articles and essays in the *Quarterly*, *Edinburgh*, and *Westminster*

Reviews; and his remarkable treatise, in the *Foreign Quarterly Review*, on "The Reign of Terror and the French Revolution." Lord Lytton was twice elected Lord Rector of Glasgow University, an honor never bestowed on any other Englishman, and only upon one Scotchman, the poet, Thomas Campbell. The general critical opinions of Lord Lytton's literary work will be widely different; but next, perhaps, to Dickens, he has been the most generally read writer of modern times. The Messrs. Routledge paid him £20,000=§100,000 for the privilege of issuing a cheap edition of his works of fiction. It must be admitted that as a novelist he outgrew many of his greatest faults. There is no smell of Newgate in "The Caxtons;" and it is a great deal to say of any writer who has written so much, that his last works were, beyond all comparison, his best. Born of the British aristocracy, he was proud of his literary work, sought from preference the society of literary men, and had ever a helping hand for those who needed his assistance. This, indeed, is one of the most creditable features of his character. He was from the first greatly interested in the establishment of a Guild of Literature and Art; he gave a portion of his estate upon which a retreat for decayed authors might be erected; and he wrote a comedy which was acted for the benefit of the society. He hungered, if we may use the expression, for popular appreciation, and he says in the preface to the cheap edition of his works: "With the people, in the larger sense of the word, I have always associated my objects as an author; and in the hands of that people I now place these evidences of the sympathy which exists between all who recognize in labor the true dignity of life." "To struggle, and to struggle upward, is the law which connects the destinies of the multitude with the aspirations of the scholar. All who think are coöperative with all who toil." These are noble words, and many other passages of a like tenor might be cited from the works of "the author of Pelham."

The domestic life of Lord Lytton, it is well known, was an unhappy one. He married, in 1827, Miss Wheeler, an Irishwoman of good family, and after several years he was separated from her. The disunion attracted a good deal of attention, especially as the lady saw fit to make the public her confidant, and to write a number of novels, now quite forgotten, for the purpose of satirizing her husband and his family. She tormented him upon all possible occasions; published pamphlets about him; and, when he was to address his constituents at Hertford, she appeared at the hustings, and then undertook to address the voters upon the subject of her wrongs. Of this ill-assorted marriage two children were born—the first, a daughter, who died in youth; and Edward Robert, who succeeds to the title and estates, and who, as "Owen Meredith," has won a good reputation as a writer of poetry.

M

MACREADY, WILLIAM CHARLES, an English tragedian, born in London, March 8, 1798; died at his residence in Weston-Super-Mare, England, April 29, 1878. He was the son of an actor, who, desiring a different profession for his son, and wishing to give him a thorough education, sent him to Rugby. At the age of sixteen, when nearly ready for Oxford, his father's affairs became so deeply embarrassed, that the son was compelled to abandon his collegiate pursuits and turn his talents to the stage. His first appearance was made at Birmingham, June 10, 1810, in the character of *Romeo*, in which he was successful, and until 1814 he remained with his father's company as a leading actor and stage director, performing with applause at many of the chief provincial towns. During the two following years he visited Ireland and Scotland, increasing his reputation, which was thought sufficient to warrant him in making his appearance on the London stage, and accordingly he appeared at Covent Garden in September, 1816, as *Orestes*, in "The Distressed Mother," where he won great applause, not only from the public, but from Edmund Kean and other prominent actors. He had, nevertheless, a hard battle to fight for many years, owing to the jealousy of some of the profession. In 1819 he made a decided hit as *Richard III.* His *Virginus*, *Mirandola*, and *Rob Roy*, were pronounced masterly personations, and after his success in the first, he speedily took high rank among Shakespearean actors. On removing from Covent Garden to Drury Lane, he became the original representative of the heroes in Sheridan Knowles's "Caius Gracchus," and "William Tell." In 1826 Mr. Macready made his first visit to America, appearing, on the 2d of October of that year, at the Park Theatre, New York, as *Virginus*, and subsequently as *William Tell*. The next year he was again in London, and, at Drury Lane, he is said to have attained one of the greatest successes ever conquered in acting, by his impersonation of *Macbeth*. A little later he played in Paris, and there also he found a liberal public admiration. In October, 1830, acting at Drury Lane, he added Lord Byron's "Werner" to his repertory, and in this he has not only never been equaled, but has never been approached. In 1836 he acted at the Haymarket, as *Melantius*, in an adaptation of "The Maid's Tragedy," by Beaumont and Fletcher, made by himself, and entitled "The Bridal." In October, 1837, he took the management of Covent Garden, holding it two seasons, and increasing the attraction by the most gorgeous stage pageantry that had ever been seen. The opening piece was "A Winter's Tale;" this was followed by "The Lady of Lyons," "Wom-

an's Wit," by Sheridan Knowles, and Byron's "The Two Foscari." The following season "Richelieu," one of his best personations, was acted. His Shakespearean revivals are counted the best that ever graced the stage. On leaving Covent Garden, he appeared at the Haymarket again, and also at Drury Lane, in 1840, as *Macbeth*, as *Ruthven*, in a tragedy called "Mary Stuart," and as *Shylock* in the "Merchant of Venice." He revisited the United States in 1848-'44, and again in 1849, on which occasion a riot took place at the Astor Place Opera-House. Returning finally to England, he gave a series of farewell performances in all the prominent theatrical cities of the kingdom; and then, at the Haymarket theatre, after one comprehensive round of his great characters, took a last benefit, acted for the last time, and said farewell to the stage and the public. His final appearance was made in "Macbeth;" and one who saw the performance states that the tragedian could never have acted better than he did on this touching occasion. The latter portion of his life was occupied chiefly with schemes for the education of the poorer classes.

MAINE. The legislation of most general interest accomplished by the Legislature which was in session the early part of the year, consists of acts to promote immigration, and facilitate the settlement of the "public lands," "in aid of free high-schools," amending the statutes relating to normal schools, and "respecting insurance and insurance companies."

The first-named act provides for the establishment of a State Board of Immigration, consisting of the Governor, Secretary of State, and Land Agent. The board is required to appoint a Commissioner of Immigration, whose duties are defined in the third section as follows:

It shall be the duty of said commissioner to exercise a general care and oversight over all immigrants coming to Maine; to give them all needful information, to assist them in settling upon public lands of the State, or obtaining employment within its borders, and to have special charge of the colony at New Sweden, to the end that its development and prosperity may be promoted in every way consistent with law; and the compensation and entire expenses of said commission shall not exceed the sum of one thousand dollars. And it shall be the duty of said agent, resident in New Sweden, to have special charge of the State storehouse, stores, tools, and all other State property there, to receive and disburse all State supplies, and keep proper accounts and vouchers therefor; and the compensation of said agent shall not exceed the sum of \$800.

The board is authorized to expend for provisions, tools, seeds, and other necessary aid to be furnished the colonies, and for which payment may be taken in labor on the roads, and other public works, an amount not ex-

ceeding \$4,000, and for schools \$200. The duties of the board are described as follows by the fifth section:

The board aforesaid may cause all immigrants arriving under the provisions of this act to be settled on any of the public lands of the State not otherwise appropriated, and assign to each man over twenty-one years of age, by certificate from the land agent, a lot of one hundred acres of land; and the land agent shall, at the expiration of five years from the date of said assignment, grant each of the persons aforesaid, or his heirs at law, a deed of warranty or other valid title of the lot assigned him; provided, each of said persons has established his residence on the lot assigned him, has built a comfortable house thereon, and has cleared not less than fifteen acres of land within the time aforesaid, ten of which shall be laid down to grass; and all said persons shall be exempt from State taxation until January 1st, in the year of our Lord one thousand eight hundred and seventy-six.

The amended law relating to normal schools places these institutions "under the direction of a board of seven trustees, five of whom shall be appointed by the Governor, by and with the advice and consent of the Council, for a term of not more than three years, under one appointment." The Governor and Superintendent of Common Schools are made *ex officio* members of the board. It is provided that the Board of Trustees "shall have charge of the general interest of the State normal schools; shall see that the affairs of the same are conducted as required by law and by such by-laws as the board may adopt; employ teachers and lecturers for the same; and annually on the first day of December lay before the Governor and Council, for the information of the Legislature a financial statement, furnishing an accurate detailed account of the receipts and expenditures for the school-year preceding."

The object of the act in aid of free high-schools is explained in the first section:

When any town shall have established and maintained a free high-school as provided by this act, for at least ten weeks in any one year, such town on complying with the conditions herein set forth, shall be entitled to receive from the State one-half the amount actually expended for instruction in said school; not, however, exceeding five hundred dollars from the State to any one town: *Provided*, That no town shall be entitled to such State aid unless the appropriation and expenditure for such school on the part of said town, has been exclusive of the amounts required by law to be expended for common-school purposes. Such State aid shall be paid from the State Treasury, on and after the first day of December of each year, upon certification by the Governor and Council as provided by section eight.

Any town may establish and maintain not exceeding two free high-schools, and may divide the State aid between them; or two or more adjoining towns may unite in establishing and maintaining a free high-school, which shall receive the same State aid as if maintained by one town.

One of the sections of the act relating to insurance and insurance companies provides that—

No foreign insurance company shall be admitted to do business in this State, unless it has a *bona*

fide paid-up, unimpaired capital, if a stock company, of at least one hundred thousand dollars, well invested in or secured by real estate, bonds, stock, or securities other than names alone, or, if a mutual company, cash assets to the amount aforesaid. And no stipulations or conditions shall deprive the courts of this State of jurisdiction of actions against such companies, nor limit the time of commencing them to a period of less than two years from the time the cause of action accrues.

A State Temperance Convention was held in Augusta on the 16th of January, and was attended by representatives of every phase of the temperance sentiment. In discussing the prohibitory law, all considered it an excellent one, and no amendment of its essential features was suggested. It was also the general opinion that the sheriff enforcement act had proved effective, and afforded all the machinery for the enforcement of prohibition that could be desired. The elevation of public sentiment was required in each county to the degree necessary to secure the election of faithful sheriffs and county attorneys, and to support them in the impartial discharge of their duties. The convention continued in session during two days, and was presided over by Governor Perham. The address of the convention to the people of Maine was read by Neal Dow.

The resolutions adopted were as follows:

1. *Resolved*, That in reviewing the results of the past year in the cause of temperance in this State, we have abundant cause for courage and hope, and while we feel a degree of pride at the steady and permanent advancement which has placed our State in its eminent position as a leading example of the power and beneficence of both legal prohibition and persuasion, we do not forget the untiring activity and ceaseless vigilance required to sustain it in that position.

2. *Resolved*, That we hail with unbounded pleasure the new and vigorous allies of our cause—the Temperance Reform Clubs of Maine—which within the past year have sprung into existence ready armed for noble and efficient service, which has been nobly rendered, the savior of hundreds from a drunkard's doom, and the efficient prompter of a sound temperance sentiment among the people.

3. *Resolved*, That it is the duty of all temperance men to aid and encourage the Reform Clubs in the great moral work of reforming the inebriate, in which they have been so successfully engaged during the past year, and that it is their duty to contribute liberally of their means to keep reformed temperance lecturers in the field, to preach the gospel of temperance from every hill-top and every valley in the old Pine-tree State.

4. *Resolved*, That we enter upon a new year with renewed faith in the principles of legal prohibition of the sale of intoxicating liquors; that we believe it to be the pledge of our most permanent success, the safeguard of the public, and the protector of moral reform.

5. *Resolved*, That, believing that the sale and use of intoxicating liquors is by far the most prolific source of pauperism, wretchedness, and crime, in the land, that temperance furnishes a large percentage of the idiosyncrasy, insanity, and other frightful maladies among the people, that it fosters every species of vice, and tends continually to nullify and render abortive all efforts for the moral elevation of society; that the legal prohibition of the sale of intoxicating liquors in the several States is greatly hindered, and often prevented, by reason of the immense importations into, and manufacturing throughout the

country; that the practical effect of the sanction of our Government to such importation and manufacture, at the price of the revenue arising therefrom, is to encourage and sustain the traffic in the States; we therefore believe that it is the duty of Congress to enact measures to restrict such importation and manufacture to the quantity required only for medical, chemical, and scientific purposes.

6. *Resolved*, That we view with mingled satisfaction and delight the harmony existing between all temperance organizations in the State, and among all friends of the cause, which we will aim to foster as an element of immense power, and most hopeful to lead to success.

7. *Resolved*, That in making proposed modifications in the prohibitory law, so far as they relate to cider, we deem it important that the legislation shall be so framed as to abolish cider-tipping, as experience shows that cider-tipping shops are injurious in their influence, and almost always serve as a cover for the sale of stronger beverages; and we believe that legislation to this extent is desired and will receive the support of the people of Maine.

The working of the prohibitory law in Maine is thus stated by Governor Dingley in his message to the Legislature of 1874:

Where our prohibitory laws have been well enforced, few will deny that they have accomplished great good. In more than three-fourths of the State, especially in the rural portions, where forty years since intoxicating liquors were as freely and commonly sold as any article of merchandise, public sentiment has secured such an enforcement of these laws, that there are now in these districts few open bars; and even secret sales are so much reduced as to make drunkenness in the rural towns comparatively rare. The exceptions to this state of things are mainly in some of the cities and larger villages, where public sentiment on this question is usually not so well sustained as in towns more remote from the tide of immigration. But even in these places our prohibitory legislation has always been enforced to some extent, and not infrequently with much thoroughness; and has never been without that important influence for good which all laws in moral directions exert.

The question of extending suffrage to women attracted no little attention in the early part of the year. The matter was brought before the Legislature in the form of "legislative hearings." Early in February a State Convention for the formation of a woman's suffrage association assembled in Augusta, and passed resolutions claiming the right of suffrage for the women of Maine, "and the power to exercise that right upon the same terms by which it is exercised by men;" appealing to the Legislature for an amendment to the constitution securing the right of suffrage to citizens without distinction of sex; and declaring:

That this society pledges itself, here and now, member to member, to pursue the work we have to-day undertaken, with unabated and undeviating fidelity, until the women of the State of Maine shall have the ballot, in as sure possession as do the men of this State.

The Democratic State Convention assembled in Portland, August 12th, and was attended by 477 delegates. Joseph Titcomb, of Kennebunk, was chosen as the candidate for Governor. The following resolutions, which were unanimously adopted, are substantially the same as those adopted by the Ohio Democratic

Convention, which was held in Columbus, July 30, 1873:

Resolved, That the Democratic party seeks to revive no dead issues, but stands by its principles, which are suited to all times and circumstances; supports the Federal Government in all constitutional authority, and regards at this day, as Jefferson did in his day, the true province of a republican Government to be the protection of rights and not of interests; supports the Federal Government and constitutional authority, and defends the reserved rights of the State and people, and opposes the centralization that would impair or destroy them. In order to preserve and maintain these rights, it insists upon a strict construction of the Federal Constitution. It resists all attempts of one department of the Government to usurp or destroy the constitutional rights or independence of other departments, as the Executive and Legislative Departments, under the rule, has done in overslaughing the honest opinions of the Supreme Court of the United States, by increasing their numbers, and the appointment of new judges, who are subservient to the Executive and Legislative will.

It opposes all interference with private affairs, or the business of men, not required by the public safety, as is odiously illustrated in the enactment of the existing bankrupt law of the United States, and advocates the greatest individual liberty consistent with public order. It believes in the capacity of the people for self-government, and opposes all property qualifications as conditions to the rights of suffrage or eligibility to hold office; it favors a liberal law for the naturalization of foreigners; it insists upon equal and exact justice to all men; it opposes all monopolies, and denies that it is within the province of the Government to legislate for the benefit of particular classes at the expense and to the detriment of the rest of the community. It therefore opposes the system by which a large portion of the profit-producing wealth of the country is exempted from taxation, and demands that constitutional means be used to remedy this injustice. It insists that the tariff laws should be formed with a view to revenue, and not to tax the community for the benefit of particular industries, and holds that the nearer approximation that can be made to universal free trade the greater will be the advantage of the Federal Government to the people of Maine.

It recognizes the evils of an irredeemable currency, and insists on the substitution of a banking system that shall not cost the people a higher percentage to create a currency in a few hands, to loan at their own prices to the industrial masses, than any other people pay for money loans wherewith to unfold their enterprises and compensate the labors of the nation. It recognizes the evils of an irredeemable currency, but insists that in the return to specie payments care must be taken not to seriously disturb the business of the country or unjustly injure the debtor class. It appreciates the benefit conferred by railroads, but opposes all unjust combinations of railroad companies to prevent competition, and thus enhance the cost of transportation; and is opposed to all legislation that places them or any corporations beyond the jurisdiction of the people through their Legislatures. It opposes all laws that give capital any advantages over labor.

It requires honesty and economy in every department of the Government, Federal or State, and condemns corruption, whoever may be the guilty parties. It is in its very nature, and as a necessary result of its principles, a party of progress, and supports all measures of reform or improvement that are sanctioned by justice and commended by sound practical wisdom.

Resolved, That the wealth of the country is the product of its labor, and the best use of capital is that which gives employment and liberal wages to the producing classes. Hence every just measure

that tends to protect them from oppression, and to improve their condition, and dignify their calling, deserves and receives our support.

Resolved, That although always constituting a large majority of the American people, the agriculturists have never demanded of the Government, State or Federal, any special privilege; have never infested the halls of Congress or the Legislature with lobbies and rings, but on the contrary have suffered under discriminating and unjust laws until "forbearance has ceased to be a virtue." We hereby pledge our sincere and honest efforts to obtain for them a redress of their grievances, and equal and exact justice.

Resolved, That the public lands should be sacredly reserved for actual settlers, who will dwell upon and cultivate them; and for the payment of the public debt; and that we will continue to denounce and oppose all further donations of them.

Resolved, That the greatest danger to free institutions is the wide-spreading corruption that threatens the utter destruction of public virtue. When Credit Mobilier frauds pass unpunished, when those in them are elevated to high official position, when seats in the Federal Senate are purchased, when vast sums of money are corruptly employed in party elections, when an army of office-holders, with the sanction of the Government, use their official influence to control elections, when the bribery of custom-house officers is the established usage, when rings of plunderers are the receivers of money appropriated for public uses, when official defalcations are of such frequent occurrence as to excite attention, when presidential patrons are saved from punishment, when Credit Mobilier and salary-grabbing Congressmen receive appointments, and when congressional investigations are generally whitewashing affairs, it is not strange that men begin to lose confidence in free institutions, and that the fall of the great republic is looked for throughout the civilized world.

To remedy these evils we insist that the receipts and expenditures of the Government shall be diminished; that its patronage shall be curtailed, and all useless offices abolished; that it shall cease to usurp functions to which it has no title; that official misconduct, fraud, and corruption in elections, shall be rigorously punished, and that public virtue shall be upheld, and the want of it condemned, by the united voice of the people.

Resolved, That we condemn without reserve the late action of Congress in granting additional salary as unjust and unjustifiable, and demand its immediate and unconditional repeal; and we denounce every member of Congress, whether Republican or Democrat, who supported the law, or received and retained money procured thereby, and we especially denounce the conduct of President Grant in using the influence of his high position for its passage, and whose official signature made it a law; and also unqualifiedly condemn the action of the Republican party of our State in paying for political party-work, and enriching party-leaders, by raising the salary of public officers, and especially in raising that of the present Warden of our State-prison to \$4,000, more than three times the salary of any former warden, and more than the salary of any other warden of any prison in New England, and more than that of the Chief-Justice of the Supreme Judicial Court of our State.

Resolved, That the act of the President in setting up, by the bayonet, a government in Louisiana not chosen by her people, and having no title whatever to rule over them, was a flagrant violation of her rights, and of the Federal Constitution, and a union of the purse and sword in the hands of the same man, revolting to the spirit of our republic, and dangerous alike to public and individual liberty.

Resolved, That all attempts made to introduce into our American system of schools for the masses, the Prussian system of compulsory education, should command the serious investigation of our people, and the careful vigilance of our Legislature.

Resolved, That every part of the Government, being in the hands of the Republican party, they are justly responsible for the evils and wrongs in legislation and administration of which the country complain, including the seduction of Democratic members of Congress to the corrupt schemes of the Republican party to rob the people of their money.

Resolved, That under the time-honored Democratic banner, with this declaration of principles on its folds, we engage in the conflict, and we earnestly appeal to the patriotic men of every class, without regard to party names or past differences, to unite with us on terms of perfect equality, in the struggle to rescue the Government from the hands of dishonest men, and redeem it from the flood of corruption which threatens its ruin.

The Republican State Convention, comprising 1,246 delegates, met in Bangor on the 19th of June, and after nominating Nelson Dingley, Jr., for the office of Governor, adopted the following platform of principles:

Resolved, As the principles of the Republican party, heretofore expressed in its convention, in regard to State and national affairs, it is declared that events have proved that their practical enforcement is essential to the welfare of the State and nation, and the maintenance of the interests, rights, and liberties of the people.

Resolved, That in view of the fact that the Republican party has so met the vital issues of the past twelve years as to secure the support of a vast preponderance of the patriotism and intelligence of the nation, it has fairly won of itself the right to the title of being the true reform party of the country.

Resolved, That the Republicans of Maine demand at the hands of those they have chosen to conduct the affairs of the nation and State rigid economy, to the end that taxes may be reduced as rapidly as is consistent with good government.

Resolved, That this convention protests against the granting of another acre of the public domain to railroad or other corporations, and we further declare against any grant of the national credit for a national participation in the building of canals or railroads, believing that the direct tendency of that policy is toward prodigality and corruption.

Resolved, That we heartily applaud the active measure of the late Congress in ferreting out and exposing corruption, and we have seen with profound regret in the disclosures made thereby evidence of political and official corruption, and the abuse of responsible positions by men of all political parties, and we demand pure official conduct and the punishment of unfaithful men, who, having betrayed the confidence freely extended to them, shall not be shielded from the disgrace of their acts by any partisanship of ours, and we denounce all Credit Mobilier transactions, whatever be their power.

Resolved, That the Republicans of Maine denounce the recent action of Congress known as the salary grab, increasing the salaries of its members, and especially its retroactive feature, by which nearly \$5,000 were voted to each member for services already paid, as a gross violation of the pledges of the last national Convention, and demand the immediate and unconditional repeal of an act so disgraceful to Congress and odious to the people.

Resolved, That the practice of loading the appropriation bills essential to the support of the Government with objectionable legislation in the shape of amendments toward the close of the session, is a prolific source of abuse, and a fraud upon the people, and its reform is urgently demanded.

Resolved, That we recognize as a growing evil that should be uprooted the increase of private legislation, both in the Legislatures of the States and in the national Congress, consuming the time that should be given to purely public interests, building up thereby overgrown corporations and monopolies,

and giving rise to lobbies which tend to bring into reproach both national and State Legislatures.

Resolved, That the thanks of the people of Maine are due Hon. Sidney Perham for the fidelity and ability with which he has filled the Executive chair for the last three years; and further

Resolved, That this convention presents to the people the Hon. Nelson Dingley, Jr., as a gentleman of unspotted reputation, distinguished by his services in the public affairs of our State, and capable of filling the Executive chair with the wisdom and ability demanded by the first office in the State.

Mr. Dingley, who became the successful candidate, and is, therefore, the present Governor of Maine, was born in Durham, Androscoggin County, in 1832. He graduated at Dartmouth College in 1855, and was admitted to the bar the following year. He entered, however, the profession of journalism the same year at Lewiston, subsequently became the proprietor of the *Lewiston Journal*, and has since continued as its editor. Soon after entering upon his professional career, Mr. Dingley was elected to the State Legislature, and was subsequently returned six times. In 1863 and 1864 he was elected Speaker of the Lower House. He is an earnest friend of education, and has labored zealously to promote the industrial interests of the State.

At the election held in September, the total number of votes cast was 80,580, of which Mr. Dingley received 45,674, Mr. Titcomb, 32,816, and Mr. Williams, the Reform candidate, 2,090. The present State government is entirely Republican, and is composed as follows: Governor, Nelson Dingley, Jr.; Secretary of State, George G. Stacey; Treasurer, William Caldwell; Land Agent, Parker B. Burleigh; Attorney-General, H. M. Plaisted; Superintendent of Common Schools, Warren Johnson. The composition of the Legislature is as follows:

PARTIES.	Senss.	House.	Joint Ballot.
Republicans.....	30	108	138
Democrats.....	1	41	42
Reformers.....	--	4	4
Independent.....	--	3	3
Republican majority.....	29	85	85

The receipts of the State Treasury during the year ending December 31, 1873, including \$379,762.08 on hand December 31, 1872, were \$1,798,884.45, and the expenditures during the same period \$1,362,453.77, leaving a balance of \$436,430.68 in the Treasury at the close of the year, most of which will be needed to meet obligations of the State that will mature at an early date. Of the receipts, \$181,293 was the tax on savings-banks, \$3,666 interest on deposits, \$2,180 duty on commissions, \$1,111 balance paid into the State Treasury by the Insurance Commissioner, \$986 license fees from hawkers and peddlers, and nearly all the remainder, reaching about \$1,250,000, was from direct taxation. Of the expenditures, \$480,566 was on account of interest, and \$214,708 on account of sinking fund and principal of

public debt; and about \$40,000 for pensions of soldiers and aid to soldiers' orphans, making a direct expenditure of about \$685,274 arising from the late war. The sum of \$374,978 was also paid from the State Treasury to towns for common school purposes, and reduced municipal taxation to that extent. This left about \$800,000 as the expenditures for general State purposes.

That portion of the public debt which fell due in 1873 and was presented to the Treasury, amounting to \$49,000, has been paid; and the sinking fund, for the redemption of the debt as it shall become due, has been increased during the year to \$1,255,746. After deducting the sinking fund, the State debt on the 1st of January, 1874, was \$5,882,654, a reduction of \$284,499 during the past year, and of \$2,366,746, or more than one-fourth since the close of the war. At the present rate of accumulation of the sinking fund, according to Governor Dingley, the State debt will be met as it matures and entirely extinguished in 1889. The same official suggests that "as the sinking fund invested in the United States and State securities is already over \$1,225,000, and is constantly increasing, whether some additional provision for its oversight and security would not be advisable."

Up to the present time almost the only resource of the State to meet both ordinary and extraordinary expenditures has been direct taxation. In 1873 the State tax was five mills on the dollar, but it is the opinion of the State Treasurer that the tax for 1874 may be reduced to four and a half mills, provided the Legislature shall make no unusual appropriations. The Governor suggests the expediency of devising some method other than direct taxation to secure a part of the revenue required for State expenditures, so that there may be a still further reduction in the rate of taxation.

The character and efficiency of the public schools of the State have been materially improved by the increase in school-money arising from the State mill-tax and the tax on savings-banks; the improvement in methods of teaching growing largely out of the work of the normal schools, and the marked influence of the free high-school system above described. The success of this system has surpassed the utmost expectations of its warmest friends. From the 1st of March to the end of the year, 150 free high-schools in 133 different cities, towns, and plantations, representing every county in the State, have been maintained from one to three terms each. These schools have been supported by municipal appropriations to the amount of \$83,523, and State aid to the amount of \$29,184, and have been attended by 10,286 pupils.

The system has proved especially successful in sparsely-settled districts and small towns.

The aggregate expenditures for public schools during the past school-year amounted to

\$1,000,596 exclusive of the amount expended for school-buildings and free high-schools. Of this sum \$625,618 were directly contributed by towns, and \$374,978 by the State.

"If to this sum," says Governor Dingley, "should be added the annual expenditures for school-buildings, free high-schools, normal schools, and College of Agriculture and Mechanic Arts, and the public and private expenditures for those academies, seminaries, and higher institutions of learning which supplement our educational system and confer such lasting benefits on the State, there can be little doubt that the amount would reach a million and a half dollars."

The earnings of the convicts of the State-prison during the year ending November 30, 1873, defrayed the expenses of the institution during that period and yielded to the State a net profit of \$2,084. The trustees of the Reform School ask for an appropriation of \$20,000 to make such changes in the building as will enable them to separate the boys committed for offenses of different grades. During the year 593 persons, including 274 females, were under treatment in the Insane Hospital. Of the patients in the hospital at the close of the year, 51 were supported by the State, 299 were receiving State aid of \$1.50 per week, and 61 were supported by their friends at the rate of \$3.75 or \$7.00 per week, according to accommodations. Since the opening of the hospital in October, 1840, 4,215 patients have been admitted, of whom 3,804 have been discharged; 1,709 recovered; 734 improved; 614 unimproved, and 747 have died. Two of the three commissioners of a proposed new Insane Hospital, appointed by the last Legislature have reported in favor of erecting on the present hospital-grounds in Augusta a new hospital at an estimated cost of \$150,000, and with accommodations for 100 patients.

During the year the State has expended about \$14,000 in educating 55 deaf and dumb, and 11 blind beneficiaries. The cost of supporting insane State paupers has reached the sum of \$3,500, and of paupers in unincorporated places, \$8,000.

The enterprise of founding a Swedish colony in Aroostook, which was begun in 1870, is reported to have become successful. The spot selected was called New Sweden, where in 1870, 50 Swedes, aided by the State, settled, and where the colonists now number 600, and occupy an area of 20,000 acres of land. In September, 1873, all State aid to the Swedes ceased, since which time the colony has been self-sustaining. There are at present no American citizens, and consequently no municipal organization in New Sweden, and there can be none for two years, at the expiration of which time 133 Swedes, who have already taken the necessary preliminary steps, will become American citizens. A school is maintained, in which the chief study is the English language. The Commissioner of Immigration

is of opinion that the colony will prosper, and will attract a still larger immigration from Sweden. He recommends that the care of the public property in New Sweden be transferred to the Land Agent, and that the act establishing the Commissioner of Immigration be repealed.

The number of savings-banks in Maine is fifty-six, with deposits amounting to \$29,556,-523. The whole number of depositors was 91,398, who had on deposit an average of \$323. The assets of the bank, as compared with the preceding year, were as follows:

ASSETS.	1873.	1872.
Invested in U. S. bonds.....	\$1,308,701 05	\$974,104 41
" State of Maine bonds.....	334,700 00	371,923 25
" Other State, county, and municipal bonds.....	6,257,176 72	7,714,296 04
" Other bonds and stocks.....	4,940,627 53	4,595,199 80
" Bank stock.....	574,101 25	660,432 75
" Real estate.....	229,450 42	231,581 09
" Miscellaneous stocks, etc.....	120,933 65	826,845 85
Loans on real estate.....	246,323 77	7,310,771 56
Loans, collaterals, etc.....	5,518,314 83	6,122,002 47
Cash.....	663,643 81	768,140 62
Total.....	\$26,154,333 03	\$29,556,523 84

The total length of railroads in the State is given by the Railroad Commissioners at 900 miles. No new roads have been opened for passenger-travel during the year, excepting the Boston and Maine extension to Portland. The Somerset road from West Waterville has been opened for freight thirteen miles, to the north side of the river at Norridgewock. The Lewiston & Auburn branch is nearly graded. The Bucksport & Bangor Railroad is well under way, and will be completed during 1874. It is to connect with the European & North American road at Bangor.

The last few years have witnessed a wonderful expansion in the manufacturing, commercial, and mining industries of the State. In the manufacture of cotton goods there has been an increase since 1870 in the capital invested of \$2,542,315, or more than 20 per cent.; the increase of product has exceeded five per cent., and of operatives twelve per cent. The total number of cotton-factories in the States is 27, which produced during 1873 goods to the amount of \$12,427,670. Five new companies are about to go into operation. Boots and shoes are produced by 113 establishments, with a capital of \$1,863,964. Since 1870 there has been an increase of over 180 per cent. in the value of the annual production. The chief centres of this industry are Auburn, Portland, and Bangor. There are sixty-one establishments for tanning and currying leather, with a total capital of \$1,522,380, and an annual production valued at \$3,187,300. Returns from 329 saw-mills show a total capital of \$4,005,000 invested in the lumber interest, with an annual production of \$5,184,445. The total number of lumber-mills in the State is 1,109, of which the annual production is estimated at \$10,000,000. Twen-

ty-four ice establishments during the year cut and packed 301,000 tons of ice, valued at \$522,000. In the fishing industry 861 vessels are employed, the total value of the product exceeding \$800,000. The value of the manufactures of wool during the past year was \$7,000,000; leather, \$4,000,000; paper, \$3,000,000; flour and grist-mill products, \$2,225,000; iron, cast and forged, \$2,500,000; machinery, \$2,500,000; edge-tools, nearly \$750,000; oil-cloths, \$1,500,000; bricks, \$500,000; fertilizers, nearly \$80,000; menhaden and kerosene oils, \$500,000; canned products of the soil and sea, \$1,750,000; granite quarried, \$4,500,000; lime, \$1,800,000.

One of the most encouraging signs of prosperity was the great revival in ship-building, which developed itself in 1873. During the year there were built 276 vessels, with an aggregate tonnage of 89,817 tons, and valued at \$5,500,000. This was more than double the tonnage of 1872, and nearly as large as that of any one of the prosperous years before the war.

The total value of the agricultural productions for 1873 is nearly \$57,000,000; manufactured and industrial products, \$96,000,000, an increase of 22 per cent. within three years, making the total value of the agricultural and mechanical productions, \$152,750,798. The total wealth of the State, valued on a cash basis, is \$242,808,688, an increase since 1870 of \$17,985,828.

MALLORY, STEPHEN R., a Southern political leader, former U. S. Senator, born in Nassau, N. P., in 1810; died at Pensacola, Fla., November 16, 1873. He was the son of a sea-captain of Bridgeport, Conn., who died in 1821, while at Key West with his vessel; the widow and son, remaining, opened a hotel there. He was educated in New York and Connecticut, and returning to Key West, studied law, and was admitted to the bar of Florida in 1838. He became County Judge for Monroe County, and Judge of Probate, and also received from President Jackson the appointment of inspector of customs at Key West. In 1845 he was appointed by President Polk to the lucrative office of collector of that port. He was a delegate to the National Convention in 1850, and the following year was elected to the U. S. Senate by the Florida Legislature, and reelected in 1857, serving until the secession of his State in January, 1861, when he was formally expelled. He was an active agent in promoting secession, having been one of the Southern Senators who held a secret consultation at Washington for the purpose of organizing a confederacy. During the civil war he held the post of Secretary of the Confederate Navy, in which his duties were almost nominal. At the close of hostilities he was arrested and held as a prisoner of State until March, 1866, when he was released on parole. In 1867 he was pardoned by President Johnson, and since that time had lived mostly in retirement.

MANZONI, Count ALESSANDRO, an Italian poet and novelist, born at Milan, March 8, 1784; died in Rome, May 22, 1873. He has by some writers been confounded with the radical Republican leader, Count Manzoni of Florence, who was in 1849 associated in a triumvirate with Guerrazzi and Montanelli in that city; but the two were not even near kinsmen. Count Alexander Manzoni's father, though a count, was not educated, but his mother was a daughter of the famous publicist Beccaria, whose treatise on "Pains and Punishments" excited so much attention, and his grandson came largely under his influence. He was educated at Milan and Pavia, and while he had imbibed from his grandfather the Voltairean philosophy, the poetic side of his nature put him in sympathy with Alfieri, Monti, and Foscolo. In 1805 he went with his mother to Paris; the name of Beccaria introduced him to the society of the younger philosophers of the Voltairean school, such as Volney, Garat, Tracy, and Fauriel. His first poem, produced in 1806, under these influences, was in blank verse, and inspired by the sudden death of a friend. It was entitled "*In morte di Carlo Imbonati*." A beautiful passage in this seems to have been the motto and watchword of his subsequent life. It was that beginning, "Non far tregua coi villi; il santo vero," etc. It may be thus translated, "To make no compact with meanness; never to betray the sacred truth; and never to utter a word which shall encourage vice, or which shall ridicule virtue." He returned to Milan in 1807, and married the next year Louisa Henrietta Blondel, the daughter of a Genevese banker. In 1809 appeared his mythologic poem, "*Urania*." It was at this time that he met with that spiritual change which transformed him into a new being. Through the instructions of his grandfather, and the philosophical teachings of his Parisian friends, he had grown up from boyhood an infidel, perhaps an atheist; but his wife had become a devout convert to Catholicism, and he was drawn to the same faith by the feeling of the absolute need of his soul for a faith in which it could rest. He signalized his conversion by the publication, in 1810, of a collection of lyric pieces of the most lofty and fervent character on the Nativity, the Passion, the Resurrection, and Ascension of our Lord. For ten years Manzoni published nothing more; then appeared his brilliant romantic tragedy, "*il Conte di Carmagnola*," which drew from Goethe and Schiller the highest commendations, though severely criticised in some quarters. He replied to his critics in a dignified letter written in French, "Upon the Unity of Time and Place in Composition." In 1823, he published a second tragedy, "*Adelchi*," of great merit and beauty, into which he had introduced very freely (as indeed he had done to some extent in his previous tragedy) the ancient choruses. Between the two, he had published an ode on the death of Napoleon,

entitled "The Fifth of May," in which he enlogized somewhat extravagantly the French Emperor. But the work by which Manzoni will be best known was his romance "*I Promessi Sposi*" (The Betrothed), published in 1827. This novel, under the guise of a village love-story, gives a complete and beautiful picture of Italian life in the seventeenth century. In the perfection of its portraiture, the vividness of its creations, and the exquisite beauty and chasteness of its style, no fiction of Continental Europe compares with this charming story. It has been translated into every language of Europe, and is as popular to day as when first published. To an illustrated edition of it published in 1842, the author added "The History of the Infamous Colonna," in which, like his grandfather, he discussed some of the highest questions of social economy and criminal law. After the success of this great work was established, Manzoni never attempted any thing more in the way of fiction. A most tender husband and father, he refused for nearly thirty years to be drawn away from the delights of home, the society of those dear to him, and his favorite studies. Neither political station, peace nor war, fame nor glory, had any attractions for him. But during this period he was visited with severe afflictions; two wives and all his children (four in number) were successively taken from him by death—and in 1856, at the age of seventy-two, he was left alone. In 1860 he was appointed a Senator of the kingdom of Italy. He had not in his latter years written any thing except an "Essay on Some Points in the History of the Lombards," but in 1884 he had been roused by what he deemed an unjust imputation on the moral influence of the Catholic Church, in Sismondi's "Italian Republica," to defend it in a tract entitled "Observations on Catholic Morals." So pure was his diction, and so thorough his mastery of the best forms of Italian speech, that when eighty-four years of his age he was appointed, with the assistance of Signor Roger Bongui, to report on the best means of establishing a unity of language in the new kingdom of Italy, taking the Florentine dialect as a basis.

MARRIAGE-LICENSES. The laws in force in the several States and Territories of the United States, in relation to births and marriages, have been collected by the State Department at Washington, and present the following results:

Alabama.—There must be a license to marry from the Judge of Probate; certificate of the marriage returned to him and recorded in his office. No registry of births.

Arkansas.—No license; but the person solemnizing must return a certificate to the clerk of the court for the county, who shall record it. No registry of births.

California.—No license required; but persons solemnizing must keep a record and transmit it to the county recorder, who shall record it. No registry of births.

Connecticut.—License must be had from the town clerk; certificate returned to town registrar, and by him recorded. No registry of births.

Delaware.—A marriage-license must be had, or bans published in church. Persons solemnizing must keep a record, and once a year transmit copy to recorder of county, who records it. No registry of births.

Florida.—License for marriage to be issued by clerk of county; certificate of, returned to him, and he records it. No registry of births.

Georgia.—License for marriage issued by ordinary of the county; certificate returned to him, and he records it. No registry of births.

Illinois.—Bans must be published two weeks in church, or license obtained from county clerk; in either case certificate to be returned to him by party solemnizing, and by the clerk recorded. No registry of births.

Indiana.—No license required; but certificate of, must be returned to county clerk, and by him recorded. No registry of births.

Iowa.—License must be had from the county clerk, and party solemnizing must return certificate to clerk, who records it. No registry of births.

Kansas.—No license is required; but certificate to be returned to the county clerk by the person solemnizing, and to be recorded by the clerk. No registry of births.

Kentucky.—There must be a license, or publication notice, filed in clerk's office; certificate to be returned to the registrar of births, deaths, and marriages, who is to record it. While there is provided in this State a mode of registering births, as there is no provision requiring persons to report birth, the law is, to a great extent, a dead letter.

Louisiana.—The parish judge issues a license and the certificate is returned to that officer, and he records it. No registry of births.

Maine.—The town clerk issues license, or publication of bans in church; the party solemnizing the marriage keeps record, and makes return to the town clerk within a year; clerk records it. No registry of births.

Maryland.—The clerk of Orphans' Court issues license; the certificate is returned to him, and he records it. No registry of births.

Massachusetts.—Parties intending to marry must file notice with the clerk, after which he issues license; and certificate is returned to the town registrar, who records it. Inhabitants of this State going out of the State to marry, in order to evade law, marriage declared void. No registry of births.

Michigan.—License issued by county clerk, and certificate returned to him; clerk records it. No registry of births.

Minnesota.—No license; but the minister or magistrate who performs ceremony must examine one of the parties, on oath, as to whether the proposed marriage is such as the

law allows; certificate of oath and marriage returned to the county clerk for record. No registry of births.

Missouri.—License by clerk, and certificate returned to him for record. No registry of births.

Mississippi.—License issued by Registrar of Orphans' Court, and certificate returned to him for record. No registry of births.

New Hampshire.—The intention to marry must be published at three meetings, either religious or town meetings; certificate of town clerk of such publication is the license; it is returned to him and recorded. No registry of births.

New Jersey.—No license is required; but certificate of marriage to be returned to town clerk, and by him recorded. No registry of births.

New York.—No license is required; but certificate of marriage must be returned to the registrar of births, marriages, and deaths; provision is also made for the return of all births, but not generally enforced.

North Carolina.—License to be issued by county judge or clerk, and the certificate returned to clerk, who records it. No registry of births.

Nebraska.—Judge of Probate issues license, and certificate is returned to that officer, and he records it. No registry of births.

Nevada.—No license required; certificate returned to county clerk, who records it. No registry of births.

Ohio.—Bans may be published in church, or a license from clerk of county court, to whom, in either case, certificate is returned for record. No registry of births.

Oregon.—No license is required; but certificates returned for record to recorder of the county court. No registry of births.

Pennsylvania.—No license required; but the person solemnizing the marriage must keep record. No registry of births.

Rhode Island.—No license required; but return must be made by person solemnizing marriage to town clerk for record. No registry of births.

South Carolina.—License from the clerk of the county court, and return made to him for record. No registry of births.

Tennessee.—License from clerk of county court, and return of certificate to him for record. No registry of births.

Texas.—License from clerk of Probate Court, and return of certificate to him for record. No registry of births.

Vermont.—Publication in either church or town meeting; certificate returned to town clerk for record. No registry of births.

Virginia.—License from the county court, and return of certificate to the court for record. No registry of births.

West Virginia.—License from clerk of the county court; certificate returned to that officer for record. No registry of births.

Wisconsin.—Persons solemnizing to examine one of the parties on oath; to make certificate and return the same to the county clerk for record.

Colorado.—No marriage-license required; but certificate to be returned by the party solemnizing to the clerk of the county for record. No registry of births. In this Territory if a married man dies without a will or issue, all his property, real and personal, goes to his widow.

Dakota.—No marriage-license required, and no record kept. Judges, justices of the peace, and ministers of the gospel, may solemnize. No registry of births.

Idaho.—No license required; but party solemnizing must, within three months, return certificate of, to county recorder for record. No registry of births.

Utah.—No license required, and no registry of either marriages or births.

Washington.—No license required; but certificate to be returned by the party solemnizing to the county recorder for record. No registry of births.

New Mexico.—No license required, and no registry of marriages or births.

In the several States and Territories penalties are imposed by the statutes for a failure to comply with the requirements as to license or return of the certificate—in some cases against the parties to the contract, in other cases against the party solemnizing the marriage, and in some instances against all parties; but in none of the States or Territories is the marriage null and void because of a non-compliance with the requirements of the statute.

MARYLAND. The report of the Comptroller of the Treasury Department for the year ended September 30, 1878, shows that the total receipts from all sources during the year were \$2,482,677.48, which, added to the balance at the end of the fiscal year 1872, viz., \$339,171.10, make the total amount in the Treasury during the fiscal year 1873, \$2,771,848.58; \$301,125 was derived from the issue of the Maryland loan authorized by act of 1872, chapter 366; \$65,082.50 was realized from the sale of \$65,000 of Maryland Defense Loan, issued to reimburse the Treasury for bounties formerly paid in excess of receipts from the county funds. This latter sum was paid to the Southern Maryland Railroad Company, in pursuance of the act of 1868, chapter 454. The receipts from ordinary sources were but \$1,814,848.96, which is less than the revenue from ordinary sources during the year 1872 by the sum of \$62,020.48. The receipts have fallen below the estimates, because a number of the railroad companies, coal companies, and national banks, are still resisting the taxes imposed by law. A large item has been lost to the Treasury in the failure of the last Legislature to impose a license upon sample traders. The revenue from this source

in 1871 amounted to \$44,253, but the law imposing the license being defective, because inoperative, and the bill framed to cover the defect failing to be passed, that item of revenue has been lost to the State for the past two years.

The total disbursements amounted to \$2,287,088, being less than the total expenditures for 1872 by the sum of \$68,615.70. Among the disbursements were \$453,296 expended in the redemption of the debts of the State, and \$152,500 devoted to the payment of the State's subscription to the stock of railroad companies in Charles and St. Mary's Counties, under the act of 1868; leaving \$1,681,242 as the expenditures for ordinary purposes. The balance in the Treasury at the end of the fiscal year was \$484,810.

The aggregate debts of the State for which interest has to be provided, on September 30, 1873, were \$10,741,215. The State holds in productive assets \$4,522,048; leaving the State debt over and above its assets, estimated as productive, \$6,219,172.

To meet this surplus of debts, however, there are unproductive assets amounting to \$21,608,694.51.

It is expected that the indebtedness of the Chesapeake & Ohio Coal Company to the State, accounting the original investments and accrued interest, and amounting to \$20,136,253.97, will, before many years, be transferred from the schedule of unproductive assets to that of interest-paying securities, and thus there will be furnished a fund from which ample means will be obtained to retire the public debt, and leave a large balance over and above all the liabilities of the State. This anticipation is supported by the marked increase of the revenues of the company during the past year. The revenue that accrued from all sources from June 1, 1872, to November 30, 1873, was \$817,652. The net revenue during this period was \$450,397, while that for the period from June 1, 1870, to November 30, 1871, was \$410,437, showing an increase in favor of 1873 of \$39,960. The amount paid on account of the company from June 1, 1872, to November 30, 1873, was \$415,620.

Under the decision of the Court of Appeals, the surplus revenues are to be used, first, to pay the repair bonds, and then to pay the overdue coupons on the preferred construction bonds; after the overdue interest has been liquidated, the accrued interest on these bonds must be paid; then \$5,000 per year to the holders of the bonds issued to the creditors of the Potomac Company; then the sinking fund for the payment of the principal of the preferred bonds, as prescribed by the 5th section of the act of 1844.

And after the above payments shall have been made, the entire surplus revenue shall be applied to the discharge of the principal and interest of the liens and claims of the State of Maryland.

All of the repair bonds, including overdue and accruing interest, amounting in the aggregate to \$432,968.38, have been paid and the bonds destroyed.

Of the preferred construction bonds issued under the act of 1844, the principal is \$1,699,500; the whole amount appropriated on account of overdue coupons on the bonds since December, 1871, was \$584,850; of which amount, as heretofore stated, the present management has appropriated \$407,880; and there yet remains due and unpaid the interest from July 1, 1858, amounting to, including coupons due to January 1, 1874, \$1,580,535.

Should the revenues of the Canal Company continue to justify the retirement of the overdue coupons, in the same manner as at present, it will take, as the above figures will show, about eight years to pay off the overdue interest on these preferred construction bonds, and put the State in condition to receive some interest on its large investments in this valuable work.

In accordance with the law passed by the Legislature at its last session, there has been established in the office of the Controller a bureau known as the Insurance Department, and an Insurance Commissioner has been appointed. The last report of the commissioner gives full tabular statements of the condition and standing of the various insurance companies doing business in the State. It also shows that the increase of the revenue from licenses from foreign insurance companies for 1872 over that of 1871 was \$20,617.78, and for the year 1873 over 1872 \$17,970.89, showing an increase of \$38,588.67 for the two years.

The report of the State Board of Education shows an increase in the number of schools, teachers, and pupils, over that of the preceding year. The Governor refers to the importance of normal training, and recommends the appointment of a board composed of the Governor, the Attorney-General, and the principal of the State Normal School, to select a site on which to "erect a building suitable for the purposes of the school and worthy of the liberality of the State." At present the school is held in a rented building. The "Maryland Agricultural College," to which has been transferred the land-scrip granted by the act of Congress of July 2, 1862, for the establishment of colleges for the promotion of agriculture and the mechanic arts, is satisfactorily performing its part in the cause of education. It is proposed to lay at the college a foundation for a colony of English farm-hands, by engaging some pioneers in the work upon the farm, and thus establishing a nucleus for such immigrants to cluster around, and then to distribute them among the farmers of the State. "It is plain," says Governor Whyte, "that a new system of agriculture must be adopted in Maryland. It is hardly possible for our farmers to grow grain in competition with the agriculturists of the West, and it will be far more

judicious to turn our lands to other and more remunerative culture. This will require skilled labor, in the production of fruits and garden-stuff, for which our soil is specially adapted. A similar colony of Swedes has been successfully established in the State of Maine, and, considering the immense volume of English immigration promised the coming spring, it will be madness to lose the opportunity of turning some of it to our doors. I earnestly press this matter on your attention, and recommend that some aid be granted to the trustees of the college in furthering their laudable undertaking."

The appropriation by the Legislature at its last session of \$50,000 for the establishment of schools for colored children has resulted beneficially in some quarters, but there is reason to believe that in other sections it has not been judiciously applied. An investigation into this subject is deemed desirable by the Executive. An important adjunct to the general system of schools for colored children is afforded by the colored normal school which is progressing very satisfactorily.

In 1873 the Maryland penitentiary, for the first time in its history, became self-sustaining, the earnings for the year ending November 3d having exceeded the expenditures by \$5,638. The number of persons confined in the city and county jails, supported at the public expense and contributing nothing by way of labor in return, being in many instances idlers who commit petty offenses for the very purpose of securing lodgings and support in the jails, has recently increased to such an extent that the Governor suggests the propriety of establishing a house of correction for such prisoners, and also for the younger convicts who are now sentenced to the penitentiary.

During the last two years the death-penalty has been carried into effect in seven instances, and two prisoners at the end of the year were under sentence awaiting execution. The Governor urges that "some provision should be made for the execution of felons which would prevent the indecent and shocking scenes which are so often attendant on these occasions."

The receipts on account of the Oyster Fund for the past fiscal year amounted to \$65,490.55, and the expenditures to \$24,770.75, showing an excess of receipts of \$40,719.80. The total receipts during 1873 exceeded those of 1872 by \$14,708.28. The laws controlling this interest do not seem to produce satisfactory

results; hence the Governor commends the entire subject to the prompt consideration of the Legislature, "as the troubles arising between the clashing interests now engaged in the oyster-business may culminate at some time in serious difficulty." He says: "No ingenuity can devise a law which will be acceptable to the diverse interests engaged in the oyster-trade. Certain it is, however, that no satisfaction, nor any approach to it, can be attained until material changes are made in the present 'Oyster law,' as it is commonly termed. It would be better to repeal absolutely the act of 1870, chapter 364, and remit the whole subject to the counties, as prior to 1867, unless the boats of the police force are increased in number. If the present system of a general oyster police is continued, guard-boats should be placed in every locality where dredging is prohibited, and those places thus practically closed."

The importance of increasing the number of fish in the bay and rivers of the State is generally admitted. Experienced pisciculturists have designated Maryland as a "celestial land for fishermen," and it is their opinion that shad, herring, and rock, can be increased, by a little effort, to unlimited quantities.

The successful introduction of the black bass into the Potomac is an incentive to prompt and effective action toward the increase of this food in other rivers of the State.

The attention of the Legislature is earnestly directed to what is regarded as one of the most objectionable features of the present constitution, viz., the section of the article copied from the constitution of 1864, relating to a uniform registration of all the voters in the State. It is the opinion of the State officers that such a system tends to furnish the machinery for fraud more perfectly than any which could be devised, and that the purity of the ballot-box can be far better preserved by the entire repeal of this system, and by a division of the present election districts and wards into a larger number of voting-precincts, and by providing judges and inspectors of election who could subject the voter to full and close inquiry on the day of election.

The annual report of the President of the Baltimore & Ohio Railroad, dated October 1, 1873, shows the receipts, expenses, and net earnings of that company and its various branches for the preceding year to have been as follows:

BALTIMORE & OHIO RAILROADS.	Earnings.	Expenses.	Net Earnings.
Main stem, including the Winchester & Potomac, the Washington County, and the Winchester & Strasburg Branches, and the Metropolitan Branch Road.....	\$12,252,843 78	\$7,313,882 15	\$4,938,961 63
Washington Branch.....	439,141 66	156,761 62	282,380 04
Parkersburg Branch.....	948,411 27	881,257 64	117,153 63
Central Ohio Division.....	1,045,447 62	975,447 13	70,000 49
Lake Erie Division.....	777,006 12	686,555 46	90,450 66
Wheeling, Pittsburg & Baltimore Railroad.....	47,384 79	46,654 61	710 18
Newark, Somerset & Straltaville Railroad.....	185,326 30	126,494 06	58,832 27
Total.....	\$15,695,541 54	\$10,137,052 64	\$5,558,488 90

The revenues of the main stem and different branches were as follows:

Main stem.....	\$12,252,843 78
Washington Branch.....	439,141 66
Parkersburg Branch.....	948,411 27
Central Ohio Division.....	1,045,147 02
Lake Erie Division.....	777,006 12
Wheeling, Pittsburg & Baltimore Railroad.....	47,354 79
Newark, Somerset & Straitsville Railroad.....	185,326 20
Total for 1873.....	\$15,695,541 54
Total for 1872.....	13,626,877 81
Increase.....	\$2,068,664 23

The liabilities of the company were reduced during the year \$458,500 by the payment of the remainder of the second mortgage bonds of the Northwestern Virginia Railroad Company (now the Parkersburg Branch Railroad Company), which were guaranteed by the Baltimore & Ohio Railroad Company, and which matured January 1, 1873. The original sum was \$1,000,000. The liabilities also show the following increase, viz.:

Preferred stock, second series, 6 per cent. currency.....	\$15,100 00
Sterling loan, redeemable in 1903, £1,700,000 @ \$4.84 gold.....	8,228,000 00
Total.....	\$8,243,100 00

The surplus fund of the company, which represents capital derived from earnings invested in the various branch and connecting roads, and the great improvements which have been continuously constructed on the main line, and which is not represented by stock on bonds, now amounts to \$29,034,403. In the autumn of 1872, £700,000, and in August, 1873, £1,000,000, were negotiated in London on satisfactory terms. The Metropolitan Branch road, from Point of Rocks to Washington, forty-two miles, was opened for traffic on the 25th of May.

The decision of the Superior Court of Baltimore, holding that the company were bound to pay the dividends on the State's preferred stock in gold instead of currency, which the State contended it was entitled to receive up to January 1, 1870, has been reversed by the Court of Appeals. The amount of the judgment entered in favor of the State against the company was \$281,489.89 in gold, with interest from March 1, 1872. The Court of Appeals declared, in its opinion, that "the six per cent. guaranteed dividend was and is payable by the company in money generally, and not in gold specifically."

In the suit by the State against the same company, for the recovery of the one-fifth of the receipts from passenger-travel, the Court of Appeals having decided in favor of the State, judgment was duly entered in the Superior Court of Baltimore City on December 1, 1871, for \$351,290.18, with interest from that date. Since then this case has been taken, by writ of error, to the Supreme Court of the United States, where it was pending at the close of the year.

The year witnessed the completion of the Union Railroad, a work of great magnitude,

and destined to have an important bearing upon the commercial status of Baltimore. The road is about seven and a half miles long, and extends from Lower Canton around the eastern and northeastern sections of Baltimore, and connects with the railroads passing through the city. The cost of the entire work was \$2,500,000. The Great Union Tunnel cost \$1,500,000; it is five-eighths of a mile long, is excavated from fifty to seventy feet deep, and is double-arched. By means of the Union Railroad and its various branches, coal can now be brought direct to deep water for shipment, and cars loaded with grain from the West can be emptied into elevators. The Western Maryland Railroad was also completed during the year, thus affording new facilities for an immense coal-traffic.

The Democratic State Convention, for the nomination of a candidate for State Controller, and one for Clerk of the Court of Appeals, was held in Baltimore, August 12th. Levi N. Woolford, of Somerset, was nominated for the former position, and James S. Franklin, of Annapolis, was renominated for the latter. The following resolutions were adopted:

Resolved, That the Democratic Conservative party of Maryland, in convention assembled, reaffirm its adhesion to long-established principles of the Democracy; it recognizes and supports the legal constitutional authority of the Federal Government, but insists upon a strict construction of the Federal Constitution as necessary to the preservation of the reserved rights of the States and people; it opposes centralization as the most insidious and dangerous enemy of popular right, and will continue to denounce it in every guise in which it may appear; it believes in the capacity of the people for self-government; it insists upon equal and exact justice to all men; it is opposed to monopolies, and will prevent, by every means in its power, all special legislation for the benefit of particular interests which may be injurious or prejudicial to the many, and is pledged to promote, by beneficent and judicious legislation, the prosperity of the whole people.

Resolved, That the general departments of our Government, legislative, judicial, and executive, are independent in their several species under the Constitution, and any attempt by any one of them to usurp authority is destructive of constitutional right, is in defiance of the others, and should be resisted as dangerous to civil liberty.

Resolved, That our tariff laws, as adjusted and enforced by the Republican party, are discriminating and injurious to the masses, and justice demands their revision with a view to the revenue alone, and not to tax the community for the benefit of particular interests.

Resolved, That the wealth of a country is mainly derived from the product of its labor, and every just measure tending to improve its condition and promote the advancement of the laboring classes, should receive sympathy, and will command our cordial support.

Resolved, That we earnestly deprecate the unjust and discriminating laws under which the agricultural interests of the country have suffered, and we hereby pledge the best efforts of the party to obtain for them a redress of their grievances, and equal justice.

Resolved, That still adhering to the policy of preserving the public lands for actual settlers, who will improve and till them, we denounce all gifts of such lands by the Government to incorporated companies as an unscrupulous and dangerous waste of the pub-

lic property, fully deserving the condemnation of all just and patriotic citizens.

Resolved, That the late action of Congress, in enacting a law for the increase of their own, and the salaries of other officers of the Government, is, in view of the depressed condition of the laboring taxpayers of the country, upon whom the burden mostly falls, utterly unjustifiable, and its immediate and unconditional repeal should be demanded by the people.

Resolved, That as the power, prosperity, and perpetuity of the State would depend upon the virtue and intelligence of its people, we pledge our party to a liberal provision for the extension and improvement of the free-school system already auspiciously inaugurated by the Democratic Conservative party in this State.

Resolved, That we recommend, and shall expect, the most rigid economy in every department of the State government, and we pledge our party to a careful scrutiny of official conduct, and the prompt and vigorous punishment of all official delinquencies.

Resolved, That, in presenting our platform of principles, and placing thereon candidates whose past record is an earnest of devotion to the time-honored principles herein announced, we feel confident of the sympathy and support of all honest, patriotic citizens without regard to past differences, and we ask all who agree with us to unite in maintaining the honest integrity and dignity of our beloved State.

The Republican State Convention assembled on the 12th of September in Baltimore, and adopted resolutions of adherence to the Republican principles; indorsing the administration of President Grant, and expressing unshaken confidence in his sterling integrity; favoring State and municipal reform; demanding of the incoming Legislature the passage of laws for equal taxation upon corporations and others; and favoring the extension of free schools. The last resolution was as follows:

Resolved,—That we are anxious that the recent events and prejudices of the past should be buried, and will welcome as the greatest public blessing a return of that good feeling which will enable the people of this State to judge of the measures, policy and candidates of political parties according to their merits alone.

Hon. Henry H. Goldsborough was nominated for Controller, and John H. Price for Clerk of the Court of Appeals.

The general State election for the choice of a Controller and a Clerk of the Court of Appeals, also for members of the State Senate and House of Delegates, was held November 4th. The total number of votes cast for Controller was 139,319, of which Mr. Woolford received 79,651, and Mr. Goldsborough 59,668. The present State government is entirely Democratic, and comprises William Pinkney Whyte, Governor; R. C. Hollyday, Secretary of State; Levi Woolford, Controller; John W. Davis Treasurer; William R. Hayward, Land Commissioner. The Legislature is composed of the following members:

PARTIES.	Senate.	House.	Joint Ballot.
Democrats.....	23	57	80
Republicans.....	3	28	31
Democratic majority.....	20	29	49

Baltimore.—The municipal election in this city in 1873 resulted in the choice of Joshua Vansant, Democrat, as mayor, by a majority of 10,100 in a total vote of 35,402, over the Republican candidate, Mr. Carson. The City Council consists of nineteen Democrats and

CITY OF BALTIMORE, FROM FEDERAL HILL.

one Reformer in the first branch, and ten Democrats in the second branch.

According to the report of Mayor Vansant, the receipts into the City Treasury of Baltimore for the year ending October 31, 1873,

were \$7,889,948, and the total disbursements \$7,724,535. Both the receipts and disbursements include extraordinary items, and do not indicate either the revenue proper or the current expenses of the city government. The

funded debt of the city on the 31st of October, 1873, was \$27,108,925, being an increase of \$1,144,500 over that of the corresponding date of the previous year. The guaranteed debt of the city was \$2,648,500, October 31, 1872, and \$1,995,000 October 31, 1873, showing a decrease during the year of \$653,500. The aggregate funded and guaranteed debt, therefore, was on the 31st of October, 1873, \$29,103,925. In this total are included the loan to the Baltimore & Ohio Railroad Company, the Water and Park stock, the guaranteed debts of the York & Cumberland and the Union Railroad Companies, all of which regularly pay to the city the interest on the loans, stocks, and guarantees. These amount to \$11,172,566. The city, therefore, has to provide only for the payment of interest on \$17,931,359.

As against this aggregate funded and guaranteed debt, the city has securities, available assets, etc., amounting to \$27,252,514.

According to the report of the City Registrar, the floating debt of the city is \$875,415, which is an increase since October 31, 1872, of \$264,884. This has been caused by an increase of the expenses in several of the departments of the city government, by making appropriations of money not embraced in the tax levy, and by over-estimates in the matter of collections upon the tax levy.

While it is apparent, says the Mayor, that the expenses of the city have been increased, and that a necessity for funding its debts exists, it is agreeable to know that important ends have been accomplished by the expenditures, and that "there is something to show" therefor. The extension and improvement of Patterson Park; the beautifying and the improving of all the public squares; the erection of school-houses and of station-houses; the making within a period of two years a ship-channel which it was supposed would require five times that measure of time to complete the extension of the water-works over the beautiful and fast-improving northwestern section of the city; the introduction of a new supply of water from the Gunpowder River that will, with the present supply from Jones's Falls, be ample for a population of 500,000; and the aid extended for the construction of a railroad through the fertile Valley of Virginia, which, with its important connections, will bring to our doors the treasures of a rich soil, are measures that will prove beneficial to the city in every respect, are indications of its progress, and gratifying to the people of our goodly city. It is the waste of the means of the people that produces discontent, not the proper application of such means.

The construction of the new City Hall has been progressing satisfactorily, and it is believed that the building will be ready for occupancy by the 1st of November, 1874. Its estimated cost is \$2,500,000, and when completed it will be in the opinion of many one of the most magnificent structures of the kind in the United States.

The Corn and Flour Exchange reported the receipts of flour and grain during the year as follows: Flour, 1,312,612 bbls.; wheat, 2,810,917 bushels; corn, 8,330,449 bushels; rye, 100,519 bushels; oats, 1,255,072 bushels.

Baltimore is celebrated for its oyster and fruit packing trade. Within ten years the trade

has increased 300 per cent. There are about fifty firms engaged in this business, of which twenty confine themselves exclusively to the packing of raw oysters. During the past year about 20,000,000 cans of fruit and vegetables were packed, of which about one-third were peaches and the balance other varieties of fruit, berries, and vegetables. About 3,000,000 bushels of oysters were steamed and hermetically sealed. The season for hermetically sealing oysters commences about the 1st of October, and continues until about the 1st of April. The packing of raw oysters is the largest branch of the business. The twenty firms engaged in this department packed during the year about 5,000,000 bushels of oysters.

During 1873 Baltimore suffered extraordinary losses by fire. Among the public buildings destroyed were the Holliday-Street Theatre, the Museum building, the Church of the Ascension, the First English Lutheran and Central Presbyterian Churches, all of which, with one exception, were old and familiar landmarks. Several planing-mills and other manufactories were also destroyed. The year also witnessed the most serious conflagration that ever visited Baltimore; it occurred in July and involved the destruction of two churches, St. Alphonsus Hall, and about one hundred dwellings.

MASSACHUSETTS. The Legislature which had assembled early in January continued in session till June 12th, 170 days, the longest session ever held in the State, except those of 1869 and 1870. During this time there were passed 385 acts and 71 resolves. Two matters which attracted general attention in the early days of the session were the election of George S. Boutwell as United States Senator, to fill the vacancy occasioned by the election of Henry Wilson to the vice-presidency; and the refusal of the two Houses to rescind the resolution passed by the extra session of 1872, censuring Charles Sumner for his action in relation to flags of army regiments and the army register.

George Sewall Boutwell was born in Brookline, Mass., January 28, 1818, and at the age of eighteen began the study of law. He entered political life in 1840, as an advocate of the election of Van Buren to the presidency, and between 1842 and 1851 he was seven times elected as a Democratic member from Groton to the Massachusetts House of Representatives. In 1851, by a coalition of Democrats and Free-Soilers, he was elected Governor, and was re-elected to the same office in the following year. After the repeal of the Missouri Compromise in 1854 he left the Democratic party, and subsequently helped to organize the Republican party, with which he has since acted. In 1868 he became a member of Congress, and was twice re-elected to that office. He was appointed Secretary of the United States' Treasury in March 1869, and resigned that office after his election to the Senate.

The question of consolidating several lines of railroads in the Commonwealth and vesting the control of the Hoosac Tunnel in the State, in order to constitute an unbroken through-line from Boston beyond the limits of the State, received a great deal of attention, both in and out of the Legislature. The legislation, however, on this subject was confined to the passage of a bill giving the Governor and Council power to expend \$200,000 in completing the tunnel and its approaches, and also containing a clause prohibiting the consolidation of the Lowell and Fitchburg Railroads. The bill allowing the Eastern and the Boston & Maine Railroads to unite failed in the House, after having passed the Senate.

The general railroad legislation consisted of a law concerning accidents, authorizing the commissioners to investigate their causes, and requiring notice of accidents to be given to them within twenty-four hours after the occurrence of such accidents. The general railroad law was amended by providing that corporations formed under it may reduce their capital under certain restrictions, and change the gauge of their road to narrow gauge. Accounts of railroad and street railroad corporations are required to be closed on the 30th of September. State directors of railroads are to make an annual report to the Legislature, with suggestions as to management, etc., and no member of the Legislature, and no person owning stock, shall, during the term for which he is chosen, be eligible to the office of State director.

An act doing away with the power of cities and towns to legalize the sale of malt liquors was passed early in the session, and went into effect in May. "It brings the prohibitory law," says one of the leading journals of the State, "back to where it was in 1867, the only drawback, in the opinion of the friends of the statute, being the still-existing provision that apothecaries may sell. A bill to do away with this failed by a small majority in a thin House, and there was no attempt to reconsider, from which it is inferred that an impression prevailed that the matter had been pushed far enough for this year."

A new State-prison was ordered by the Legislature, and an Insane Asylum for the eastern portion of the State. An additional judge of the Supreme Court was provided for. The criminal code was so amended as to require that when a person indicted for murder or manslaughter is acquitted on the ground of insanity the court shall order such person to one of the State lunatic hospitals for life. He may, however, be discharged by the Governor and Council when the former is satisfied, upon a hearing of the matter, that it may be done without injury to others.

A law was passed providing that bank shares shall be taxed where located, the bank being held responsible for their collection.

The political campaign of 1878, in Massa-

chusetts, was one of unusual interest, having been not only attended with a high degree of excitement in the Commonwealth, but attracting general attention throughout the country at large. The chief feature of the contest was the determined efforts of General B. F. Butler and his friends to secure the Republican nomination for Governor for that gentleman at the Worcester Convention. General Butler personally conducted the canvass on his side, having early entered the field and made speeches in various parts of the State. His action encountered a most bitter opposition from many of the leading members of the Republican party, and a large majority of the most influential journals in the State. By these a general complaint was made, that the Administration patronage and influence in the State were used in favor of General Butler, and there was a decided remonstrance not only in the speeches and the editorials of the campaign, but also in the resolutions of the convention against Federal interference in State politics. The contest was rendered still more remarkable by the fact that this was the second attempt of General Butler to gain possession of the gubernatorial chair, he having been defeated in his first determined effort in 1871. In the present campaign the contest lay between Governor Washburn and General Butler, and resulted, as is shown farther on, in the success of the former. A significant feature of the campaign was the movement of the Labor Reformers who held a State Convention in Lowell, on the 5th of August, which was presided over by Judge Robert Cowley, of that city. In the language of that gentleman, the object of the movement "is not to seek to create any new party; it is not to nominate a State ticket in opposition to the two political parties which now exist; but it is to make our issues on the Senators and Representatives, and to goad both the existing parties to furthering our distinctive measures, to take counsel together on the best means to be used for furthering the enactment of the Ten-hours Law, and such other measures of State and national legislation as are necessary for the improvement of the condition of the people. We meet at a most favorable time; for within a few months the greatest manufacturing city in America has advanced half-way from the rule of eleven hours a day to the rule of ten. Lawrence has followed the lead of Fall River. The Pacific Mills have gone even further. The Atlantic Mills, under the management of that large-hearted and clear-headed superintendent, Hon. William Gray, have long been run on the ten-hours plan. Lowell, which has lately fallen so far behind Fall River that she has not now one-half the number of spindles and looms which Fall River has—Lowell, too, has advanced some steps toward the system which we desire."

No nominations were, therefore, made. A resolution, however, was unanimously adopt-

ed in favor of supporting General Butler, and after the appointment of a State Committee of Labor Reform, the principles of the party were set forth in the following resolutions, which were adopted:

Whereas, to the shame and disgrace of the Commonwealth of Massachusetts, and to the civilization of the nineteenth century, tens of thousands of women and children are compelled by their poverty to work among dangerous belting and machinery, in overheated and badly-ventilated rooms, eleven, twelve, and even fourteen hours per day, while in England for more than a quarter of a century the ten-hour system has been in operation, and where no child works more than five hours in any one day; and—

Whereas, the Republican and Democratic parties, through their conventions, their leading men, and newspapers, have constantly and systematically ignored, neglected, or sneered at, the claim of the factory operatives of Massachusetts for a ten-hour law; and—

Whereas, this measure is founded upon the wisest principles of a true political economy as well as upon the claims of justice and humanity—its operation not only tending to the improvement of the people through better sanitary conditions, but acting as such measures always have and will, upon the causes that govern wages—the purchasing power of wages will be increased, and a better home market thus opened for the varied products of our industry; and

Whereas, for the past twenty-five years hundreds of petitions have been presented to the General Court asking for effective legislation upon the subject without avail: therefore—

Resolved, That we, the factory operatives and their friends in convention assembled, postponing all other issues, do pledge ourselves—

1. To vote for no candidate for Governor, and no candidate for Senator or Representative, who does not stand pledged by his past acts, and free and explicit avowal of his purposes to vote for, and aid by his voice and influence, a good and efficient ten-hour law.

2. To do our utmost to defeat or cause to be defeated the nomination or election of those Senators and Representatives who voted against the desired legislation; and we especially mark the Hon. Martin Griffin, of Boston, chairman of the Labor Committee, the Hon. Charles P. Stickney, of Fall River, and Hon. N. W. Harmon, of Lawrence, who by their influence, treachery, and double-dealing, defeated the bill, as unworthy the support or vote of any working-man, and we hereby call upon the working-men of all parties to remember them and their colleagues, the Hon. James Brown, of Bristol, Isaac H. Coe, of New Bedford, Robert A. Fuller, of Cambridge, Newell Giles, of Essex, William H. Learned, of Boston, Timothy F. Packard, of Hampden, George A. Torrey, of Worcester, and Carroll D. Wright, of Reading, as enemies and traitors to our cause.

3. To return to the Senate and House of Representatives those men, and those only, whose voice, votes, and influence, have been given in behalf of favorable labor legislation.

4. To carry out these purposes, we call upon the working-men to organize ten-hour leagues and labor-clubs in every city and town in the Commonwealth, and to cause to be circulated copies of the ten-hour bill, and the position of the several candidates upon this question.

Resolved, That his Excellency the Governor, Wm. B. Washburn, in carefully ignoring the ten-hour question, and in yielding to the demands of the cotton lords, banking capitalists, tenement-house owners; the removal of the officers of the Bureau of Statistics of Labor; and the subsequent appointment of a Senator who voted against the ten-hour bill, deserves the unqualified censure of all those inter-

ested in the measure, and of impartial labor investigation.

Resolved, That the thanks of this convention are due to the Hon. William Gray, Hon. Charles Cowley, and Hon. H. K. Oliver, for their long-continued advocacy of our cause, and their gratuitous services before the labor committee.

Resolved, That we regard the recent changes made by Governor Washburn in the Bureau of Labor, after his proposition to lift this department to a "higher level," as a swindle upon labor investigations of the most atrocious and offensive character, and his re-nomination by the Republican party, and the indifference of the Democratic organization to this crime against labor, we shall regard as additional evidence that we have nothing whatever to hope from either of these two parties—that they have been captured by the capitalists as completely as the Whig and Democratic organizations were controlled by Southern chattel slavery.

1. That a bill for a ten-hour law be drawn up, such as the intelligent factory-operatives desire to have passed; that said bill be printed and circulated throughout the State, so that if possible every adult person in the State shall know what it is; that a vigilance committee of from one to five in each city and town in the State be appointed, whose duty it shall be, first, to get an able and friendly lawyer to draw up said bill, and to see that it is satisfactory to the operatives aforesaid.

2. To collect funds to pay the expenses of the ten-hour campaign of 1878, and to see that said ten-hour bill is thoroughly circulated.

3. To fill vacancies, and to make sure that there is one person at least in every city and town in the State who is friendly to the movement, and who will faithfully attend to this business.

4. That the chairman and executive of the Vigilance Committee shall, by letter or in person, place a copy of said ten-hour bill before every candidate for any State office, of whatever party, with the following question, "Will you, if elected, sign (or support as may be appropriate) this bill, should it be passed by the Massachusetts Legislature?" and publish the result throughout the State. If no candidate for Governor should answer in the affirmative this committee, or the executive committee, if one is appointed, should be instructed to call a State Convention to nominate an independent Labor ticket for State officers.

5. That the chairman of each city and town committee place said law before every candidate for State Senator and Representative, with the following question, "Will you, if elected, support and vote for this bill, without alteration or amendment?" and publish the result in all the local papers. If in any city or town any one or more of the candidates for those respective offices, or each and all of the tickets, fail to give an affirmative answer within a reasonable time, let the committee see to it that independent nominations are made, tickets printed and circulated at the polls.

If in any case nominations are likely to be delayed till too late for the action above suggested, let independent nominations be made, tickets printed, etc., taking care that persons be selected as candidates, if practicable, from any of the parties in the field, in preference to strictly Labor men, so as to induce the other parties to nominate and elect the same men.

The Democratic State Convention assembled in Worcester, September 3d, and was organized with John K. Tarbox, of Lawrence, as president. The State ticket was completed by the nomination of Mayor William Gaston, of Boston, for Governor; William L. Smith, of Springfield, for Lieutenant-Governor; Benjamin F. Mills, of Williamstown, for Secretary

of State; Nathan Clark, of Lynn, for Treasurer; Waldo Colburn, of Dedham, for Attorney-General; and C. Osgood Morse, of Newburyport, for Auditor.

The first part of the resolutions were the same as those adopted by the Maine and Ohio Democracy (*see* MAINE). The others were as follows:

Resolved, That the length of the legislative sessions, the number of State officers, the expenses of government, and the burdens of the people have increased, and are increasing, and ought to be at once diminished.

Resolved, That the disgraceful, partial, and corrupt execution of the liquor law brings all law into contempt, and calls for the indignant condemnation of every citizen who believes in the impartial administration of justice.

Resolved, That intervention by the Federal Administration in State politics for the benefit of its favorites and the advancement of its intrigues, notoriously felt in this Commonwealth, is hostile to freedom and purity of elections, an insult to the popular intelligence, and merits the indignant reprobation of the people jealous of their rights and liberties.

Resolved, That we invite the cooperation and welcome to full fellowship in political action of all patriotic citizens who agree with us in these principles and are willing to unite to establish their beneficent rule in the government of State and nation.

Resolved, That the limitation of the hours of labor for minors in manufacturing establishments to ten hours is commended by urgent physical, social, and moral reasons, and has our cordial sympathy.

Resolved, That we present, as our candidate for Governor, William Gaston, of Boston, and we call upon the people of Massachusetts to support him at the polls as a citizen whose unspotted private life and whose varied official career mark him as eminently fitted to discharge the important duties of the supreme Executive with credit to himself, and with the entire approbation of the Commonwealth.

The assembling of the Republican Convention took place in Worcester, on the 10th of September, and probably caused more excitement in the State and attracted more attention out of it than any other convention ever held in Massachusetts. One thousand one hundred and five delegates, representing every county in the Commonwealth, answered to the call of their names upon the assembling of the convention. Most conspicuous among these was General Butler himself, who had been elected a delegate from Gloucester, that he might in person direct the movements of his followers on the floor of the convention. The convention having been called to order by George B. Loring, of Salem, chairman of the Republican State Central Committee, a permanent organization was effected by the selection of ex-Governor A. H. Bullock as presiding officer.

Most of the day was spent in a stormy debate occasioned by a resolution offered by General Butler, debarring a delegate, named Green, from taking part in the proceedings of the convention, for having publicly declared that he would not be bound by the action of the convention in case General Butler was nominated. In this discussion, in which General Butler and his opponent, Congressman George F. Hoar, took a leading part, the most

impressive speech was made by the Rev. James Freeman Clarke, a delegate from West Roxbury, who boldly asserted the right of every delegate to vote as he chose at the election, regardless of the action of the convention. He claimed that the action of the convention was not binding on any delegate, and declared that "a bolt is always in order." The prolonged discussion on this resolution resulted in a very decided vote adverse to General Butler, which was regarded as a test of his strength in the convention; still the final issue was regarded as doubtful, each party claiming it as favorable to themselves. At this point the convention took a recess and reassembled in the evening, when the action of General Butler surprised his adherents and amazed his opponents. Immediately after the opening of the evening session that gentleman took the platform and made a short speech withdrawing from the contest. His reasons for this unexpected course, which caused great surprise throughout the country, were given in the following words:

MR. PRESIDENT: The test vote already taken in the convention showed me that there is already in the hall a majority of delegates in favor of the nomination of Governor Washburn. Having verified that with satisfaction to myself and friends, so far as I know, I do not desire to prolong any contest upon that question by parliamentary or other tactics. Having announced my purpose to bow to the will of the convention, as expressed, which I hold to be the first condition of party fealty, having first tested the will of the convention in this behalf, I do not propose, and I desire every friend of mine in the convention to agree to it, to make no further opposition to the nomination of Governor Washburn by his friends in any manner they please, by acclamation, by ballot, or otherwise, and I desire that no friend of mine will vote for me, because I don't want the semblance of a contest where I make no control whatever. We are in a Republican Convention, and although many bitternesses which I hoped would have been avoided have been evoked in the contest, I should trust that there is no occasion—certainly there is not on my part—to keep them up as between Republicans, and let it be on their heads, and not on mine, if they bring trouble into the Republican party. And further, I desire, in order that the delegates may in a large degree return to their homes at night, to save further votes upon the question of Governor, that his friends may nominate him in any way they please, without opposition from my friends, if they choose to take my advice and listen to my wishes. And for this reason I don't wish, and I will not be the means of splitting the Republican party if I know myself (tremendous applause); and another thing, having taken part in the proceedings of this convention, I am bound by its action, as every honest man ought to be. But hereafter, if in the course of human events anybody chooses to vote for me for Governor, or for any other office (laughter and applause), I propose to take one of two courses—either to go into the convention of the Republican party or the party I am in, submit my claim, and to take the vote of the convention, or stand out, if I see cause, and run independently of the action of any convention. (Applause.) From that I am precluded as having come into this convention, and I think every well-judging mind will agree with me that I should be so precluded. I trust our friends will remain to see to it not to take part in this contest, but to see to it that the ordinary organization be properly completed.

As soon as the delegates had recovered from the surprise caused by this action of General Butler, Governor Washburn was renominated by acclamation, and the remainder of the State ticket was made up as follows: Lieutenant-Governor, Thomas Talbot, of Billerica; Attorney-General, Charles R. Train, of Boston; Secretary of State, Oliver Warner, of Northampton; Auditor, Charles Endicott, of Canton; and Treasurer, Charles Adams, Jr., of North Brookfield. The following platform was then adopted:

Resolved, That the Republicans of Massachusetts emphatically disapprove of and condemn the action of those members of the last Congress, Republicans and Democrats, who availed themselves of the occasion of an increase of the salary of the President, and of the Judges of the Supreme Court, and of the members of the cabinet, supposed to be just and necessary for the future, to secure to themselves a disproportionate and extravagant compensation for past as well as future services.

Resolved, That while we recognize the full right of every citizen to express and act upon his convictions upon all questions of public interest, no person holding public office has the right to seek to influence the action of his subordinates by exciting their fear of loss of place if their opinions and actions shall differ from his own, and we call upon the President further to remove all public officers who have improperly interfered with the independence of the Republicans of Massachusetts in the management of their local concerns, whenever the fact is proved to their satisfaction.

Resolved, That the adoption of a policy which shall so reduce freights on railroads that the raw material, food, and coal of the West and South shall be exchanged at the least possible cost for the manufactures of New England interesting the whole country is vital to the industries of Massachusetts; that the power vested by the Constitution in Congress to regulate commerce between the States includes jurisdiction over this great subject, and that we call upon Congress and our State Legislature to so exercise all their powers over railroads and all such monopolies.

Resolved, That every great achievement for personal liberty, for the preservation of the Union, for education, for the elevation of labor, for the elevation of woman, for the extension of suffrage, which has been accomplished in this country for a generation, has been due to the Republican party; that while none of these great causes has any thing to hope for in the future from any other source, while every new truth, every claim founded on justice will in the future, as in the past, find its earliest converts, its most generous recognition, its strongest advocates and its first victories among the Republicans of Massachusetts; and that pressing duty of the day is to secure honesty and purity, the right of the people peaceably to assemble and take counsel on public matters and select their agents free from violence, intimidation, and fraud; the right to hold caucuses and conventions without being cheated and bullied, and we therefore call upon all honest Republicans, however they may differ on other questions, or howsoever they may have advanced in their reception of new ideas, to unite in purging the Commonwealth and the nation of violence, treachery, and corruption.

Resolved, That we demand such legislation on the hours of labor as will secure the ten-hour system for women and minors employed in the factories of Massachusetts.

Resolved, That the Republican party is the party of temperance, order, and law; that it favors the honest and impartial execution in good faith of all laws,

especially those for the suppression of crime, intemperance, and disorder; that the character and details of such laws must be such as the people shall decide through their representatives chosen to the two branches of the Legislature, and, when so determined, should be obeyed cheerfully by all law-abiding citizens, until repealed by the same authority.

Resolved, That the Republicans of Massachusetts look with pride upon the Republican administration of the Commonwealth, and recognize in their candidate for Governor, William B. Washburn, the same qualities of good sense, fidelity, and uprightness, the same watchfulness for the public interest and care for the public welfare which he has so conspicuously exhibited as one of our representatives in Congress, and we commend him and his associates upon the ticket this day nominated to the hearty support of the good people of the Commonwealth.

A supplementary resolution was adopted, providing that hereafter all meetings in cities for the election of delegates to the State Convention shall be held by wards; that no delegates be admitted to the convention without credentials from the proper ward officers; that no one but Republican voters are entitled to vote for delegates to the State Convention; that any ten Republican voters may demand the use of the check-list; and, if after such demand, the list is not used, delegates so chosen shall be refused seats in the hall of the convention by the committee.

The election resulted in the success of the entire Republican ticket. The total vote was 182,323, of which Governor Washburn received 72,183; William Gaston, 59,360; and 790 were scattering. The political composition of the Legislature is as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans	95	105	180
Democrats	11	65	76
Independents	4	10	14
Republican majority	10	90	90

On the temperance question 10 in the Senate are pronounced prohibitionists, 11 declare for license, and the views of the remainder are indicated as unknown; in the House, 70 are avowed prohibitionists; 79 favor license, and the views of the remaining 51 are not known.

William B. Washburn was born in Winchendon, January 31, 1820, and graduated at Yale College in 1844. After leaving college he devoted himself for manufactures, and entered public life in 1850, when he was elected to the State Senate from Orange. He became a member of the Republican party upon its organization in 1856, was elected to Congress in 1862, and was returned biennially until 1871, when he was chosen Governor of the State. He was reelected in 1872, and has now been chosen for the third time.

In the Third Congressional District an election was held to fill the vacancy caused by the death of William Whiting. Henry L. Pierce, Republican, the Mayor of Boston, was elected by a majority of 5,805 over all opponents, he having received 6,856 votes, while 788 were

cast for Benjamin Dean, and 212 for Charles G. Greene.

Massachusetts has successfully maintained her financial credit and prosperity notwithstanding the monetary and commercial depression of the year. Maturing indebtedness has been liquidated without recourse to taxation, temporary loan, or draft upon the ordinary revenues. During the year the Troy & Greenfield Railroad and Hoosac Tunnel loan was necessarily increased by further issues of scrip, amounting to nearly \$1,200,000; but the extinguishment of other maturing liabilities leaves the net increase of the funded debt less than \$800,000. The amount and character of the State debt are exhibited in the following statement:

Funded debt, January 1, 1873.....	\$27,692,704
Retired during the year:	
Union Fund loan.....	\$293,500
Alm-house loan.....	60,000
State-House Enlargement loan.....	65,000
	418,500
Balance outstanding.....	\$27,274,204
Additions during the year: Tunnel loan—	
Sterling scrip.....	\$798,600
Dollar bonds.....	400,000
New State-prison loan.....	5,000
	\$1,203,600
Present funded debt.....	\$28,477,804
Classification of outstanding liabilities:	
Railroad loans.....	\$14,501,616
War loans.....	13,236,188
Ordinary loans.....	750,000
Total.....	\$28,477,804

Installments of the funded debt, amounting to \$544,000, will mature during the present year, viz.: Of the Union Fund loan, \$300,000; State-House Enlargement loan, \$100,000; Almshouse loan, \$50,000; and the Taunton Lunatic Hospital loan, \$94,000. All these are payable from their several sinking funds, the last three being the only outstanding installments of the loans they represent. With the exception of floating liabilities, consisting mainly of sums due and uncalled for, the whole of comparatively small aggregate and fully provided for, the State has now no debt whose liquidation is not contemplated by established sinking funds and their large and increasing accumulations.

The ordinary revenues for 1874 are estimated at \$2,536,000, and there is about \$1,387,000 cash in the Treasury applicable on the same account. It is estimated that the ordinary expenses of the year will reach nearly or quite \$5,245,000. To meet the apparent deficit in resources for the payment of estimated expenses, it is thought that a State tax of from \$1,500,000 to \$2,000,000 will be required.

In addition to the funds that must be provided for ordinary expenses and the completion of the Hoosac Tunnel under the Shanly contract, an appropriation will be required for work upon the Troy & Greenfield Railroad, to place it in readiness for the traffic of the tunnel, and there will be a demand upon the Treasury for money to carry out the contract

for the improvement of the South-Boston Flats. Other public improvements to be provided for are the new State-prison, the new Insane hospitals at Danvers and Worcester, and extensive additions to that at Taunton.

The debts of the different cities of the commonwealth, together with the increase during the year, are shown in the following statement: The net increase of the debt in Boston proper is \$4,950,567; but the debts of Charlestown, Brighton, and West Roxbury, carry the total to \$8,751,780. Charlestown had a sinking fund of \$176,000, but Brighton and West Roxbury had made no provision of this kind. The debt of Newton is about the same as last year.

CITIES.	January 1, 1874.	Increase.
Boston.....	\$28,988,990	\$8,751,780
Cambridge.....	2,697,246	686,509

Gloucester.....	222,619	15,788
Newburyport.....	496,878	23,178

There has been a remarkable increase in the value of the property of Massachusetts during the past two years. In 1872 the increase in the entire taxable property of the State amounted to the unparalleled sum of \$224,000,000; while in 1873 the increase over the previous year amounted to \$71,000,000. The valuation of the entire taxable property of the State for three years is shown in the following statement:

1871.		
Real and personal estate.....	\$1,406,673,258	00
Savings-banks deposits.....	163,704,077	54
Corporations, exclusive of real estate and machinery.....	101,208,665	00
Total.....	\$4,761,591,000	54
1872.		
Real and personal estate.....	\$1,696,599,969	00
Savings-banks deposits.....	184,797,313	92
Corporations.....	104,757,278	03
Total.....	\$1,986,154,560	95
1873.		
Real and personal estate.....	\$1,763,429,990	00
Savings-banks deposits.....	203,062,156	52
Corporations.....	90,988,561	00
Total.....	\$2,057,480,707	52

In 1872 the gain in the valuation of real and personal property amounted to \$199,921,711, or very nearly \$200,000,000 in twelve months. In 1873 the increase was \$66,830,021. The following table gives the total valuation of the real and personal property of the Commonwealth, with the gain and loss by counties:

COUNTIES.	1872.	1873.	Loss and Gain.
Barnstable.....	\$15,360,530	\$14,455,468	Loss...\$844,082
Berkshire.....	39,817,625	38,218,508	Loss...1,599,117
Bristol.....	96,960,718	108,007,086	Gain...11,046,368
Dukes.....	3,391,777	3,374,734	Loss.....17,093
Essex.....	155,165,056	159,564,494	Gain...4,399,438
Franklin.....	15,871,556	16,183,031	Gain...311,475

Worcester.....	131,022,996	137,629,086	Gain...6,606,093
Total.....	\$1,696,599,969	\$1,763,429,990	

In 1873 the growth was largely checked by the Boston fire. The valuation of personal property, as returned by the assessors of cities and towns, was also materially affected by a change in the method of assessing the bank-tax, which operates throughout the State to reduce the valuation of personal property. The purchase of bank stocks by savings institutions has taken this class of property from the taxable values of the municipalities of the State. Thirty-seven per cent. of capital stock of Boston banks is held by savings institutions, insurance companies, and charitable societies, and is exempt from local taxation. The city of Boston lost upward of \$7,000,000 by this change from its list of personal property.

These two causes, however, are not sufficient

to explain the phenomenal change in value shown during the past two years. The *Boston Journal*, after showing that the increase of wealth and population have been mainly confined to the more populous centres of the Commonwealth, adds that this fact "presents to politicians and social statisticians very important problems which have important bearings upon the future of Massachusetts. Should this state of affairs continue, it must at no distant day work a political revolution in Massachusetts, while many social questions will be seriously affected by the change which the above figures indicate. A State controlled by the residents of large cities and large towns, living in compact bodies, will be a very different commonwealth from one where 'the hardy yeomanry' are sufficiently numerous to be taken into account, when politicians lay out a campaign, or legislators meet to make laws. The necessity already exists for a convention to revise the constitution of Massachusetts, which is older than two-thirds of the cities, and, as compared with the progressive constitutions adopted by several States, is a very poor bit of work. It was adapted to the stage-coach era, not to the days of railroads and the magnetic telegraph."

In the following statement are shown the grand total of personal and real estate in the cities of the State, together with the taxation for 1872 and 1873:

CITIES.	PERSONAL AND REAL.			TAXATION.			
	1872.	1873.	Gain.	Rate, 1872.	Rate, 1873.	Total Levy, 1873.	Increase.
Boston.....	\$682,724,300	\$693,831,400	\$11,107,100	11 70	12 80	\$9,031,489	\$899,123

Total.....	\$1,138,520,019	\$1,197,366,067	\$59,040,677			\$7,204,135	\$2,181,514

From the above it will be seen that in all the cities, except Charlestown, Somerville, and New Bedford, the rate of taxation has increased, and in every city, except Charlestown, there has been an increase in the tax levy.

The various educational, reformatory, charitable, and penal institutions of the State are reported to be in a prosperous condition. The new Normal School building at Worcester has been completed, and was ready for occupancy early in 1874. An additional boarding-house at Bridgewater, and a large dormitory at

Westfield, were built during the year to meet the necessities of the institutions at those points. The Agricultural College and the Technical Institutes of the State are crowded with pupils, and seem to be filling their special mission in a most satisfactory manner. The commission under the act of the Legislature of 1873 to provide for the building of a new State prison, after examining fifty-eight different sites, selected one in the western part of Concord, which has been approved by the Executive Council. The site embraces about

100 acres near the junction of the Boston & Fitchburg, Lowell & Mansfield, and Nashua & Acton Railroads.

A railway side-track will be laid to any part of the premises without expense to the State, upon which freight can be run from either of the railroads before mentioned. It was originally thought desirable to locate the prison within ten or twelve miles of Boston, while the Concord site is about eighteen miles distant. This fact alone prevented its selection at once upon the first examination. But after many months of careful study and unwearied search, and on full consultation with the officers of the prison and other persons conversant with the wants of such an institution, it was found to possess in so marked a degree all the other indispensable requisites, and seemed so greatly preferable to any other available tract, that the commission and the Council finally and unanimously determined to secure it, and the initiatory steps to obtain a satisfactory plan for the buildings were at once taken.

For many years the Massachusetts State prison has been a source of considerable revenue to the public Treasury; and it is thought that with more spacious and convenient workshops, and better facilities for motive power, the institution will become still more profitable, while its reformatory power will be greatly enlarged with the increased facilities for the classification of prisoners. The receipts during the year ending September 30, 1873, were \$152,712.65; expenses, \$129,285.27; excess in favor of the prison, \$23,427.38. The whole number of convicts October 1, 1872, was 562; received, 174; discharged (including nine deaths and one escape), 150; remaining September 30, 1873, 586.

The site selected for the new Hospital for the Insane is situated about two miles from the village of Danvers, five from Salem, and seventeen from Boston. The selection embraces about 200 acres, on an elevated plateau, and a considerable part of it is in a high state of cultivation. It is expected that operations on the buildings will be begun early in the spring.

The prohibitory question was kept prominently before the public during the year by the numerous seizures made by the State police. According to the report of the Police Commissioners, the number of places in Boston where liquor was sold was 2,952 in 1871, 2,768 in 1872, and 2,427 in 1873, showing a reduction of 525, and a reduction of ten per cent. in the cases of drunkenness and disorderly persons since the appointment of the commissioners. The work of the department in the State for the year has resulted in 8,136 liquor prosecutions, and 4,265 prosecutions for general offenses; 5,545 liquor seizures, and 105 gaming seizures; fines paid, \$145,027.47; costs paid, \$62,643.21; fees turned over to the State Treasury, \$18,849.20; bribe-money turned over to Surgeon-General, \$270; stolen prop-

erty recovered, \$29,298.10; sales of furniture from gaming-houses, \$219.76; proceeds of sales of vessels delivered to State Agent, \$10,932.14; proceeds of sales of liquor, \$13,071.14; estimated value of liquors on hand, \$50,000; in hands of Agent, \$3,000; aggregate, \$333,311.02; number sentenced to houses of correction for violation of liquor law, 521; committed, 272; details for musters, picnics, etc., 212; days of detail service, 1,030; distilled liquors seized, 40,269 gallons; malt liquors seized, 91,629 gallons; returned by order of the courts, 3,198 gallons; total expense of the department, \$149,974.66. The total force of the department comprises a chief, four clerks, seven detectives, and eighty-eight men besides, or one officer to four cities and towns; forty-eight of these are located in the cities. There is one officer to about every 17,000 of the population of the State. There is a constant demand for more officers, and the commissioners believe that the welfare of the Commonwealth requires the increase of the force to 200 men, which they recommend, and state that with that number the whole expense to the State would not be over \$300,000.

The question of prohibition is treated at length by Governor Washburn in his annual message to the Legislature of 1874. He admits that the law has been "but a partial success in some of our larger cities," and adds that "vehement and vituperative censure and condemnation, not only by laymen, but also by ministers of the gospel of peace, have been heaped upon the chief constable, the police commissioners, and the Executive, because the law is not thoroughly enforced in this city."

In Boston there seems to be a formidable opposition to the prohibitory law. Here, as in other large cities, a special State police force has been organized by the Legislature for the purpose of executing the law. In discussing this question in his message to the Common Council of Boston, Mayor Cobb takes the ground that "there can be no substantial and permanent relief but in a change of legislation." He declares in favor of a license law.

The negotiations long in progress concerning the improvement of the South-Boston flats were concluded during the year. By the terms of an agreement, signed by the Commonwealth, the Boston & Albany Railroad Company, the Boston Wharf Company, and the city of Boston, the completion of this vast enterprise will have an important influence upon the future growth and commercial prosperity of Boston.

It embraces in its ultimate scope a valuable domain of the Commonwealth bordering on the main channel of Boston Harbor, between seven and eight hundred acres in extent, along the line of whose frontage the freights of a vast inland and maritime commerce may easily be exchanged. It will greatly improve and enlarge the harbor by increasing the area of its deep water, and will, in time, undoubtedly

prove a source of much revenue to the Commonwealth. For an account of the completion of the Hoosac Tunnel, *see* HOOSAC TUNNEL.

Boston.—One of the most important events in the history of Boston during the year was the election held October 7th, which determined the annexation to Boston of Charlestown, Brighton, and West Roxbury, to take effect January 1, 1874. This seems to be only a step in the commendable policy adopted by Boston some years since of extending her municipal jurisdiction over the suburban cities and

towns, thus greatly enlarging her area and increasing her wealth and population. The original limits of Boston embraced but 690 acres; 1,700 acres were acquired by the addition of South and East Boston, and by filling the surrounding flats; 2,100 by the annexation of Roxbury; 4,800 by the annexation of Dorchester; and 880 by filling flats in other places; making the entire area of the city previous to the annexation of 1873, 10,170 acres. In 1860, the population of Boston was 177,840; in 1870, 250,526, the city ranking seventh in the United

CITY OF BOSTON.

States. Roxbury was annexed in 1867, and now constitutes the thirteenth, fourteenth, and fifteenth wards, containing, according to the census of 1870, 34,772 inhabitants. Dorchester was annexed in 1869, and now forms the sixteenth ward, with (in 1870) 12,259. By the annexation of 1873, the population of Boston has been increased to 292,489, according to the census returns of 1870, and there is little doubt but that its present population is considerably greater; the area is increased to upward of 19,000 acres and the valuation to \$765,470,651. The particulars of this increased area are given in the following statement:

	Taxable Area in Acres.	Population, 1870.	Valuation, 1873.
Boston.....	9,583	250,526	\$609,631,400
* Charlestown.....	590	28,323	34,942,129
Brighton.....	2,370	4,937	14,548,531
West Roxbury.....	6,637†	8,693	22,148,600
Total.....	19,100†	292,489	\$765,470,651

Elections were held on the same day, October 7th, in each of the cities and towns interested. In Boston the vote was light, but

largely in favor of annexation. Of the other places voting, only Brookline refused annexation. The vote of Boston was: For Charlestown, 5,960 yes, 1,863 no; Brookline, 6,205 yes, 1,516 no; West Roxbury, 6,110 yes, 1,633 no; Brighton, 5,629 yes, 2,133 no. The vote of Brighton was 1,622 yes, 128 no; West Roxbury, 720 yes, 618 no; Charlestown, 2,240 yes, 1,947 no; Brookline, 299 yes, 706 no.

The city is connected with Boston by the Charles River Bridge, 1,503 feet long, and the Warren Bridge, 1,390 feet long. The annexation of Charlestown brings Bunker Hill within the limits of Boston, gives access to a supply of water which will be sufficient for the next eight or ten years, and brings the Navy-Yard and both sides of the Charles River, and all Boston Harbor, within city jurisdiction. The freight stations of the Boston & Lowell, Maine, Fitchburg and Eastern Railroads, are also brought within the limits of the city proper, and many difficulties incident to the consigning of vessels to the Charlestown side of the river are avoided. By gaining control of Brighton, the city gets authority over its cattle-markets, and obtains one of the finest places for suburban residences in Massachusetts. The

* Valuation Charlestown, 1873.

streets of the town are wide and well laid out, and are considered better than those of any other town in New England. West Roxbury, like the other two places named, is in excellent condition financially, and is one of the wealthiest towns in the State. This, too, is largely settled by Boston merchants. Before the an-

as they related to the election of municipal and ward officers. The new wards elected their ward officers and school committee men, and voted for municipal officers in Boston at the city election in December, under the same warrant and regulations that apply in the old wards of Boston; but for all other purposes the tenure and duties of the local officers remained unchanged for the full terms for which they were chosen.

All of the places annexed are connected with Boston with lines of horse railroads, and all have excellent school and library facilities. Charlestown is at present the seat of the Massachusetts State-prison, and is largely engaged in the ice-trade. It is thought that the policy of extending the municipal limits of Boston will not end here, and that efforts will be made to incorporate other suburban cities and towns.

On the 30th of May an extensive conflagration occurred on Washington and Essex Streets, which entirely destroyed many valuable buildings, prominent among which was the Globe Theatre. The total loss was estimated at \$3,000,000, on which, however, there was a large insurance.

The rebuilding of the burned district of 1872 was promptly begun, care being taken to widen and remodel the streets. There were, in the burned section, thirty-one streets, five squares, eight places, and one court. In rebuilding it, seventeen streets have been widened, four extended, and a large square has been laid out, at a total cost to the city of about \$5,000,000. Two streets have been made forty, two forty-five, five fifty, six sixty, and one one hundred feet wide. The general plan of the streets has been but slightly changed, with the exception of the extensions of Franklin, Arch, Pearl, and Oliver Streets, but the widenings will facilitate travel in the highest degree.

In November, the total number of buildings erected or in process of construction, was 365, of which 125 were completed and 240 in progress of erection. The buildings are mostly four stories high; many of them cover more ground than those they replace, and comprise splendid structures, in which all modern improvements have been introduced. The modern Gothic appears to be the favorite style of architecture, and a majority of the structures of any pretension are of this order, though many buildings of great beauty are in other styles. About three-fourths of the new buildings have flat roofs, and the remaining one-fourth are Mansard, there being few pitch roofs.

In this section of the city, will be found, as before the fire, the great markets for wool, boot and shoe leather, and cotton cloths, from the great mills of Massachusetts, New Hampshire, and Maine.

The municipal election held in December resulted in the choice of Samuel C. Cobb, a merchant of Boston, as mayor.

The total funded and unfunded debt of the

STATE HOUSE, BOSTON.

nexation, Boston had sixteen wards. West Roxbury becomes ward seventeen; Brighton, ward nineteen; and three wards of Charlestown become respectively wards twenty, twenty-one, and twenty-two. The Board of Aldermen of the city will not be increased in number, but each new ward will be entitled to the

FANEUIL HALL, BOSTON.

election of two members to the Common Council, which will thus be increased to seventy-four members, each present ward of the city being entitled to four.

The provisions of the act of union did not take effect until January 1, 1874, except so far

city of Boston, December 31, 1873, compared with the debt at the close of 1872, as set forth in the message of Mayor Cobb, is shown in the following exhibit:

DEBT.	Dec. 31, 1872.	Dec. 31, 1873.
Funded debt.....	\$35,527,293 45	\$29,718,677 91
Unfunded debt, being loans authorized but not negotiated.....	3,961,879 27	4,090,781 19
Total.....	\$39,489,172 72	\$33,739,459 03
Increase of the total debt during the municipal year 1873.....		\$5,749,213 69

The means on hand December 31, 1873, for the payment of this debt of \$39,488,672.72, compared with those of 1872, were as follows:

MEANS.	Dec. 31, 1872.	Dec. 31, 1873.
Funds in the hands of the Board of Commissioners of the Sinking Funds.....	\$13,213,494 17	\$12,328,900 63
Public Land and other bonds in the hands of the City Treasurer pledged for the payment of the debt.....	1,187,401 15	1,223,948 70
Total.....	\$14,850,895 32	\$13,552,849 33
Increase of means during the municipal year 1873.....		\$798,645 99
The gross debt, December 31, 1873, was....	\$39,488,672 72	
The means on hand for the payment of the same, December 31, 1873, were.....	14,850,895 32	
Net debt December 31, 1873, was.....	\$25,187,777 40	

The net debt of the city, December 31, 1872, was \$20,187,209.70, which shows that

there was an increase of the net debt amounting to \$4,950,567.70 during the year 1873, while the gross debt was increased, in the same year, \$5,749,213.69.

The following statement shows the increase to the debt this day (January 5th) by the annexation of Charlestown, West Roxbury, and Brighton:

Charlestown	\$2,747,181 46
Brighton	705,450 00
West Roxbury.....	525,000 00
To which add the debt of the city as given above.....	39,488,672 72

We have the total gross debt of the consolidated city of Boston, at this date.....	\$43,468,304 18
Less redemption means:	
City of Boston.....	\$14,850,895 32
City of Charlestown....	176,418 49
	14,527,313 81

Net debt of the consolidated city of Boston, at this date..... \$28,938,990 37

The Auditor of Accounts classifies the gross debt of the consolidated city as follows:

GROSS DEBT.	Dec. 31, 1872.	Dec. 31, 1873.
City debt proper.....	\$36,079,666 48	\$31,323,808 29
Water debt (net cost of works).....	10,811,956 24	9,702,950 74
War loans (outstanding)....	1,914,500 00	1,914,500 00
Roxbury loans (outstanding).....	589,050 00	630,700 00
Dorchester loans (outstanding).....	152,500 00	167,500 00

The annual municipal expenses of Boston have greatly increased during the past few

CHARLESTOWN NAVY YARD.

years; the appropriations for the ordinary expenses in 1873-'74 amounted, in round numbers, to \$8,600,000 against \$1,900,000 in 1858-'54, twenty years ago.

MASSIMO, Prince CAMILLE VICTOR, the chief of the princely house of Massimo, one of the oldest and noblest in Rome, born at Rome

August 15, 1803; died in that city, May 12, 1873. It was said that he claimed descent from Quintus Fabius Maximus, the "Cunctator" of the Punic Wars, perhaps the most ancient pedigree, outside of the Jewish race, to be found in the world. He succeeded his father, Prince Camille Maximilian, in the pos-

session of the principality of Arsoli in May, 1840. He had been all his life the most strenuous adherent and champion of the temporal power of the Papacy in the Roman States, and until that power was overthrown was Postmaster-general for the Pontifical States. He was cheered in his last moments by "the Pontifical blessing." As a proof of his adherence to the old state of things, it is stated on good authority that from the time when King Victor Emmanuel's troops entered Rome he had kept the gates of his palace closed, and steadily refused either to retire from the Holy City or to have any thing to say to the newcomers.

MAURY, MATTHEW FONTAINE, LL. D., an American hydrographer, physicist, and author, born in Spottsylvania County, Va., January 14, 1806; died in Lexington, Va., February 1, 1878. When a child of four years old, his father removed with his family to a farm near Franklin, Tenn. Here the opportunities for early education were meagre, being only those afforded by the "Old Fields" schools of that time, but in his sixteenth year young Maury entered Harpeth Academy, then under the charge of Rev. James H. Otey, afterward Protestant Episcopal Bishop of Tennessee. Here his progress in his studies was rapid. In 1825 he received a midshipman's warrant and entered the U. S. Navy. There was then no naval academy, and most of the education the midshipmen received was from the chaplains, as many of the higher officers, though brave and gallant men, had not much reputation for scholarship. Under these circumstances many of the midshipmen gave very little attention to study. Maury was, however, one of the few who were bound to master their profession, and every leisure moment on shipboard was devoted to study. He acquired a thorough knowledge of navigation, under very great difficulties. At the age of twenty-five he had attained the rank of passed midshipman, and was appointed master to the sloop-of-war *Falmouth*, then ordered to the Pacific. The low barometer off Cape Horn, and the curious phenomena attending it, excited his attention, and he communicated the results of his observations to the *American Journal of Science*, his first scientific paper. On his return to the United States in 1834 he published a treatise on navigation, which years after became the text-book of the U. S. Navy—a bold undertaking for a passed midshipman who had been but nine years in the navy. In 1837, after twelve years of service, he was promoted to the rank of lieutenant, and soon after had the misfortune to fracture his right leg at the knee joint, and became a cripple for life. Being thus prevented from active sea-duty, he was obliged to content himself with such shore-duty as he could perform, and he turned at once to his pen. A series of papers on naval reform, and other topics of national interest, over the signature of "Harry Bluff," mostly

published in the *Southern Literary Messenger*, soon called attention to him by their boldness and their thoroughly practical character, and led to the abolition of the old Board of Navy Commissioners, the organization of the present Bureau system, and the establishment of the Naval Academy. At his instance, and in consequence of his earnest advocacy, a navy-yard was established at Memphis, a series of observations on the quantity of water, and the velocity of the current of the Mississippi near the surface and the bottom, were taken, and river-gauges established at different points. He also advocated with strong arguments the enlargement of the Illinois & Michigan Canal into a ship-canal, and the improvement of the overflowed lands of the Mississippi on a uniform system. We are indebted to him also for the warehousing system, so beneficial to our commercial interests. In 1842 Lieutenant Maury was appointed Superintendent of the Depot for Charts and Instruments at Washington, which was afterward developed into the National Observatory and Hydrographical Department of the United States. Here, by examination of the old log-books stored for fifty years in the Navy Department, he began the preparation of those wind and current charts and sailing-directions which were to make his name so famous. The first completed was one relative to the voyage between the United States and Rio Janeiro. It was some time before any captain could be induced to try this chart, but when once tried it was found to expedite the voyage so much that it was in great demand. He then drew up the form of a log containing columns for such facts as would be useful in carrying on this work, and furnished the blanks to the masters of vessels bound to foreign ports, and they were invited to join him in collecting data for making other charts. A great enthusiasm was thus aroused and he had ample returns from zealous and competent observers in all parts of the world. The information thus gathered was reduced to a system and utilized. The value of this system being now fully demonstrated, Lieutenant Maury was authorized by the U. S. Government to solicit the coöperation of European powers in the establishment of a general system of meteorological research at sea. Copies of the charts and sailing-directions were furnished without charge to the public vessels of all countries, and were also distributed gratuitously to the masters of merchant-vessels, on condition that each one thus furnished should keep a record in the prescribed form, and at the end of the voyage forward it to Washington, or to Admiral Fitzroy's office in London. He also called the Maritime Conference held at Brussels in 1853, in which the United States and nearly all the European Governments were represented, and which led to the establishment of offices to coöperate in the system of research by all of them. He then proceeded to complete his "Wind and Current Charts

and Sailing Directions." It has been computed by competent authorities that these charts have been the means of saving many millions of dollars annually to the commercial nations of the world. During the preparation of these charts he collected the material for his great work, "The Physical Geography of the Sea," published in 1855. While some of the details of this work were found to be erroneous, and were afterward corrected by the author, it was a grand contribution to hydrographical science, and received the highest encomiums from scientists in all countries. The influence of its author was felt in our naval affairs, and to his suggestions it was due that we were saved from making those premature and costly experiments in armored ships in which the European nations sunk such immense sums. He also predicted the change which has since taken place in substituting a few large guns for a great number of smaller ones, and in increasing the number of small vessels armed with two, four, or six large rifled guns. To his counsels is due also, in part, the substitution of open batteries and earthworks for casemated forts. The investigation of the phenomena of storms at sea had led him, as it did William C. Redfield, independently, and perhaps a little earlier, to look forward to the utilization of the telegraph in communicating the intelligence of coming storms, and though others have laid claim to the honor, it seems to be susceptible of proof, that these two were, in a higher sense, than any other men of this century, the fathers of our present invaluable signal-service system. The subject of deep-sea soundings had attracted his attention as early as 1848, and these soundings afterward made so thoroughly by Lieutenant Brooks, at his suggestion, led to the discovery of the telegraphic plateau, and the successful laying of the Atlantic cables. He was consulted and greatly honored by foreign governments, and received from them the decorations of their orders of merit. It was while thus in the zenith of his fame and usefulness, and perhaps a little elated by the extraordinary, though worthily won, honors which had come upon one whose attainments had been made under such difficulties, that the late civil war burst upon the nation. The one unwise step of his life, which marred somewhat the lustre of a career otherwise untarnished, was his abandonment of the observatory, and his going over to the Confederacy. His name and his knowledge were of some service to the Confederate cause, but, soon wearied of the strife, he went to Europe in 1863 and remained there till 1868, spending a portion of his time in Russia, where he prepared some text-books for the imperial princes, and a portion in England, engaged in literary and scientific labors. In 1868 he was elected to the chair of Physics in the Virginia Military Institute at Lexington. In 1871 he was chosen President of the University of Alabama, but

after some hesitation declined the position. During his professorship at Lexington he completed the preparation of a series of geographical text-books, comprising "First Lessons in Geography," "The World we live in," "Manual of Geography," and "Physical Geography." He had also made considerable progress in a series of wall-maps, and a text-book of "Practical Astronomy." These were published in New York and Baltimore.

MCGUFFEY, WILLIAM H., D. D., LL. D., a Presbyterian clergyman, college president and professor, and author of numerous school text-books, born in Washington County, Pa., in 1800; died in Charlottesville, Va., May 4, 1873. While he was a child his father removed to Trumbull County, Ohio, then a wilderness, and built a log-cabin in the woods. The boy worked hard on the backwoods farm, but diligently employed in study all the time which he could save from out-door toil. He read all the books that he could borrow, and received a little occasional instruction from a clergyman. At eighteen he began the study of Latin with borrowed books, walking several miles to recite to his ministerial friend. His father was too poor to help him, and he supported himself as a teacher until he could be fitted for college. He graduated at Washington College, Pa., in 1825, under the presidency of Andrew Wylie, D. D. Immediately after graduation, so good was the reputation of the young collegiate, that he was appointed Professor of Ancient Languages in Miami University, and in 1832 was transferred to the chair of Moral Philosophy in the same institution. In the mean time (1829), he was called to the Presbyterian ministry, and preached during the remainder of his life, though he rarely had any pastoral charge. In 1836 he was elected President of the Cincinnati College, remaining in that position until 1839. It was while he was occupying this position that he commenced the preparation of his series of Eclectic Readers and Spellers, which, though repeatedly revised and their number increased, have held their place in the popular estimation beyond almost any series in the country. In 1839 he accepted the presidency of the Ohio University at Athens, where he remained until 1845, when he assumed the duties of Professor of Moral Philosophy and Political Economy in the University of Virginia. He remained in connection with that institution until his death, working zealously and ably until disease interrupted his labors.

McILVAINE, Rt. Rev. CHARLES PETTIT, D. D., LL. D., D. C. L., Bishop of the Protestant Episcopal Diocese of Ohio, born at Burlington, N. J., January 18, 1798; died at Florence, Italy, March 12, 1873. He was a son of the late Hon. Joseph McIlvaine, United States Senator from New Jersey 1823-1826. The son graduated from Princeton College in 1816, and after a course of theological study was admitted to deacon's orders July 4, 1820, by Bishop White,

and two years later having labored in Christ Church, Georgetown, Md, received priest's orders from Bishop Kemp of Maryland. From 1825 to 1827 he was Professor of Ethics and Chaplain in the United States Military Academy at West Point. In the latter year he was called to the rectorate of St. Ann's Church, Brooklyn, where he remained till 1832, when he was elected Bishop of the Diocese of Ohio, and was consecrated October 31, 1832. In 1831 he had been appointed Professor of the Evidences of Revealed Religion and Sacred Antiquities in the University of the City of New York. As Bishop of the Diocese of Ohio, Bishop Melvaine sustained the relation of Chancellor to Kenyon College and President of the Theological Seminary at Gambier, Ohio, and gave such instruction to both on the evidences of Christianity as his other onerous duties permitted. In his position as bishop he won the esteem and respect of all denominations of Christians, and exerted a wide and powerful influence for good over the Episcopal Church in the United States. In 1853 he received the degree of D. C. L. from the University of Oxford, and in 1858 that of LL. D. from the University of Cambridge. During the late civil war he was an active and efficient member of the Sanitary and Christian Commissions, and visited England to explain the position of the United States Government on the questions then at issue. He was present also at the Pan-Anglican Council, and at the time of his death had been for many months in Europe in the hope of benefit to his health. Bishop Melvaine was an able and forcible writer. His published works were: "Lectures on the Evidences of Christianity," 1832 (these were delivered before the University of New York); "Oxford Divinity compared with that of the Roman and Anglican Churches," 1841; "The Holy Catholic Church," 1844; "The Sinner's Justification before God," 1851; "No Priest, no Altar, no Sacrifice but Christ;" "Valedictory Offering: Five Sermons," 1853; "A Word in Season to Candidates for Confirmation;" "The Doctrines of the Protestant Episcopal Church as to Confirmation;" "Chief Danger of the Church;" "The Truth and the Life," a series of Twenty-two Discourses, 1850; "Directions to Inquiring Souls." Bishop Melvaine had also edited "Select Family and Parish Sermons, 2 vols., 1839; "Memoir of the Rev. Henry W. Fox;" and "Memoir of the Rev. Charles Simeon."

MELINE, Colonel JAMES F., an American soldier and author, born in Sackett's Harbor, N. Y., about 1818; died in Brooklyn, N. Y., August 14, 1873. His father was an officer in the United States Army, and he had strong tastes for a military life. He graduated from Mount St. Mary's College, at Emmetsburg, and afterward studied law, and was admitted to the bar. He was for some years engaged in the banking business in Cincinnati, where he was

for a time connected with the *Catholic Telegraph*. For a short period before the breaking out of the civil war he was French consul in Cincinnati; but early in the war he entered the army, and served on General Pope's staff. In 1865-'66 he made the Rocky-Mountain trip, the events of which he recorded in the volume entitled "Two Thousand Miles on Horseback." He was afterward employed by the Government in connection with the Freedmen's Bureau in Georgia, during which time he was a correspondent of the *Tribune*. His latter years had been devoted entirely to literature, and he had been a regular contributor to the *Catholic World*, in which his vindication of Mary Queen of Scots, in answer to Mr. Froude, first appeared. This was afterward published in a volume. He wrote also for the *Galaxy*, and the *Nation*, and was the author of a "Life of Sixtus V.," and many other smaller works. At the time of his death he was completing a series of articles on Savonarola, three of which have been published. In the early part of the summer Colonel Melvaine visited the Springs in West Virginia, in company with Mr. Strother (Porte Crayon), but deriving no benefit physically (he was suffering from disease of the heart), he returned after a short visit, and, by the advice of physicians went to Saratoga. He remained there only a few days, and then went home to die.

MEREDITH, WILLIAM MORRIS, LL. D., an eminent statesman and cabinet officer, born in Philadelphia, June 8, 1799; died in that city, August 17, 1873. He graduated early, and with distinction from the University of Pennsylvania, studied law, and entered upon the practice of his profession about 1820. From 1824 to 1828 he represented his native city in the Pennsylvania Legislature, and from 1834 to 1849 was President of the Select Council of Philadelphia. In 1837 he was chosen a member of the convention for amending the constitution of the State. On the inauguration of President Taylor in 1849, Mr. Meredith was nominated by him Secretary of the Treasury, which position he held till the death of the President in 1850. In 1861 he became Attorney-General of his State, and filled that office until 1867. He was a member of and presided over the recent Constitutional Convention in Pennsylvania, and from his experience in public affairs was one of the most valuable members of that body. As a lawyer, Mr. Meredith occupied for many years the foremost rank in his native State, and was constantly engaged in important cases, both in the Supreme Court of Pennsylvania, and that of the United States. As an able and ready legal debater, he had few equals and scarcely any superiors in this country.

METHODISTS. I. METHODIST EPISCOPAL CHURCH.—The following is a summary of the statistics of the Methodist Episcopal Church in the United States for 1873:

CONFERENCES.	Traveling Preachers.	NUMBERS IN SOCIETY.		
		Members.	Probation-ers.	Total.

The number of local preachers was 12,261. Number of Sunday-schools, 18,031; of officers and teachers, 197,180; of scholars, 1,818,608. The number of adult baptisms during the year was 56,163; of baptisms of children, 53,287. Number of churches, 14,499; probable value of the same, \$66,332,580; number of parsonages, 4,677; probable value, \$8,542,554. The contributions of the churches and Sunday-schools during the year, for benevolent objects, were as follows: For "conference claimants," \$156,272.16; for the Missionary Society, \$672,950.54; for the Woman's Foreign Missionary Society, \$54,588.19; for Church extension, \$83,704.45; for the Tract Society, \$21,259.95; for the Sunday-school Union, \$22,052.39; for the Freedmen's Aid Society, \$29,217.18; for education, \$45,294.91.

The receipts of the Missionary Society for the year ending November 1, 1873, were \$680,936.64, showing an increase over the receipts of the previous year of \$19,780.04. The General Missionary Committee met on the 11th of November, and made the following appropriations:

I. FOREIGN MISSIONS:

1. Africa (Liberia).....	\$10,500 00
2. South America.....	12,924 00
3. China.....	68,034 00
4. Germany and Switzerland.....	21,300 00
5. Scandinavia.....	48,970 70
6. India.....	88,051 20
7. Bulgaria.....	7,200 00
8. Italy.....	15,690 00
9. Mexico.....	23,000 00
10. Japan.....	21,720 00

Total for foreign missions..... \$337,199 90

II. DOMESTIC MISSIONS:

1. To foreign populations in the United States.....	\$76,800 00
2. Indian.....	4,150 00
3. American.....	331,500 00

Total for domestic missions..... \$411,950 00

III. MISSIONS IN TERRITORIES OF U. S., to be administered as foreign missions,

IV. MISCELLANEOUS APPROPRIATIONS..... 83,000 00

Total..... \$843,149 90

The following is an exhibit of the condition of the foreign missions of the Methodist Episcopal Church, as given in the annual report for 1873:

MISSIONS.	Missionaries.	Members.	Probationers.
Africa.....	23	2,000	100
South America.....	8		
China.....	17	1,061	610
Germany.....	60	6,643	1,971
Denmark.....	6	276	146
Norway.....	12	1,367	381
Sweden.....	48	2,106	1,541
India.....	17	823	599
Western India.....	6	850	
Bulgaria.....	2		
Italy.....	3	15	40
Japan.....	5	41	8
Mexico.....	3		29
Total.....	200	14,683	5,335

The number of assistant missionaries was 435; of teachers, 317; of churches, 115; of parsonages, 61; of day-schools, 182; of pupils in the same, 7,403; of Sunday-schools, 348; of pupils in the same, 21,242; amount of mis-

sionary collections, \$4,181.41; amount of collections for church expenses, \$40,960.77.

There were connected with the domestic missions among foreign populations in the United States (including the Indian, Welsh, German, Scandinavian, and Chinese populations), 265 missionaries, 13,391 members, 8,376 probationers, 183 local preachers, 209 churches, and 122 parsonages. The amount of \$10,886.96 was contributed for missionary purposes in these missions; in the Territories were three missionaries, two helpers, and 180 probationers. Twenty-two hundred and seventy missionaries were employed in the American domestic missions. The total number of missionaries and assistants was 3,170.

The receipts of the Woman's Foreign Mis-

sionary Society for the year ending in May, 1878, were \$54,920.32. It numbered 1,397 auxiliaries, and 38,452 members. It had six missionaries in India, and six in China. The missionaries in India were stationed at Lucknow, Bareilly, and Moradabad. One hundred and fifty girls were supported at the orphanage in Bareilly, and a hospital building had been built at the same place. Zenana-work was sustained at twenty-four stations. The missions in China were at Foochow, Peking, and Kiu-Kiang. Schools were supported in these three cities.

II. METHODIST EPISCOPAL CHURCH SOUTH.—The following are the statistics of the Methodist Episcopal Church South, as reported in March, 1878:

CONFERENCES.	Traveling Preachers.	Local Preachers.	White Members.	Colored Members.	Indian Members.	Total Ministers and Members.
1. Baltimore.....	163	103	23,095	103		23,471
2. Virginia.....	159	174	43,979	599		44,220

Decrease.....	...	...	...	4,284	...	...

The number of superannuated preachers was 219; number of baptisms, 62,139; number of Sunday-schools, 6,900; of teachers, 45,998; of scholars, 812,759. Amount of collections for "conference claimants," \$65,262.44; collections for missions, \$94,139.95.

The apparent decrease in the number of colored members is accounted for by the fact that they have left this connection to join the Colored Methodist Episcopal Church in America, which was organized under the direction of the General Conference of the Church South.

The Board of Missions met at Nashville, Tenn., May 8th. It laid assessments upon the

Conference with a view of raising \$250,000, of which \$100,000 should be contributed to the board to be administered by it, and \$150,000 be left under the control of the General Conference boards. The following appropriations were made for the work directly under the control of the board:

China.....	\$7,000
Contingent.....	3,000
Mexico.....	21,000
Key West (a mission among the Cubans).....	500
For the German work.....	6,850
Indian Mission Conference.....	13,000
For work on the Pacific coast, in the Territories, and in West Virginia, Florida, and Illinois.....	24,400
Total.....	\$79,050

The remainder of the \$100,000 called for was to be reserved for new work, to be entered upon when the means are provided. The formation of Woman's Foreign Missionary Societies was recommended.

A scheme for building up a grand Central University has been under consideration for several months among the ministers and members of the Methodist Episcopal Church South. It was greatly advanced early in 1873, by the bounty of Mr. Cornelius Vanderbilt, of New York, who gave to the Board of Trust of the proposed university the sum of \$500,000 for the purchase of ground and erection of buildings, upon certain conditions, one of which was that the institution should be placed at Nashville, Tenn. The Board of Trust promptly accepted the gift with the conditions attached. At a meeting held in May, the board pledged itself, so soon as it should have a sufficient amount of funds, to set apart \$200,000 as a fund for the support at the university of young preachers and the sons of traveling preachers of the coöperating conferences. The grounds for the university have been bought, and building has been begun upon it. The faculty were to be elected, and classes opened in January, 1874.

III. COLORED METHODIST EPISCOPAL CHURCH.

—The Colored Methodist Episcopal Church in America was organized, in pursuance of a recommendation of the General Conference of the Methodist Episcopal Church South, on the 15th of December, 1870. It was designed at the time that the colored members of the Methodist Episcopal Church South should be separated from that body and attached to the colored church, and that the latter should have entire control of the work with the colored membership. The first General Conference of the Colored Methodist Episcopal Church made it a rule that membership should be confined to the colored race.

At the General Conference in 1873, Bishop Miles presented an address, in which he gave the number of conferences which had been organized to that time as fourteen. The number of traveling preachers was stated to be 635; of local preachers, 583; and of members, 67,888. That the separation of colored members from the Methodist Episcopal Church South must have gone on quite actively, in connection with the growth of the Colored Church, will readily appear from the fact that the reports of the Church South for 1872 showed an aggregate of only 3,557 colored members against 7,841 in 1871, and 19,686 in 1869.

The first General Conference in 1870, elected two bishops for the Colored Methodists. One of these, Bishop Vanderhorst, died a few months afterward. The other bishop, W. H. Miles, found the episcopal work too extensive for him to carry on without help, and called an extra session of the General Conference to elect new bishops. The Conference met at

Augusta, Ga., on the 19th of March, and elected as bishops Joseph A. Beebe, L. H. Halsey, and Isaac Lane. It also took measures for the improvement of Sunday-schools, for the organization of missionary enterprises, and for the establishment of an institution of learning. Bishop Miles has bought for the latter purpose grounds in Louisville, Ky., at a cost of \$8,500, and has called upon the friends of the Church for \$50,000, with which to carry out plans for building.

IV. CONGREGATIONAL METHODIST CHURCH.

—The first of the Congregational Methodist churches was organized in Monroe County, Georgia, in 1852. The connection numbers now about one hundred and twenty ministers and ten thousand members, most of whom are in Georgia, Alabama, Mississippi, and Texas. It has been described as "Arminian in doctrine, Methodist in usage, and Congregational in government." The fundamental articles of its constitution are as follows:

1. This Church shall be called the *Congregational Methodist Church*, and all the churches in her connection shall be congregational in their system of worship.

2. Christ only is the head of the Church, and the Word of God is the only rule of faith and conduct.

3. A Christian Church is a society of believers in our Lord Jesus Christ, and is of Divine institution.

4. No person who loves God, and obeys the Gospel of Christ, ought to be deprived of Church-membership.

5. Every man has an inalienable right to private judgment in matters of religion, and *all have an equal right* to express their opinion in any way that will not violate the laws of God or the rights of man.

6. Church trials shall be conducted on gospel principles only, and no minister or member shall be excommunicated, except for immorality, propagating unscriptural doctrines, or the neglect of duties enjoined by the Word of God.

7. The *Pastoral* or ministerial offices and duties are of Divine appointment, and regularly ordained ministers in the Church are *equal*.

8. All power necessary in the formation of rules and regulations of government and discipline is inherent in the ministers and members of the Church, but so much of that power may be delegated from time to time by representation, as the Church may judge necessary and proper.

9. The Church has the right to make and enforce such rules and regulations only as are necessary and proper, and which shall accord with the Holy Scriptures in the maintenance of the great system of practical Christianity.

10. It is the duty of all the ministers of the gospel to be faithful in the discharge of their ministerial and pastoral duties; and also of the members to esteem them highly for their work's sake, and to render them a righteous compensation for their labors.

11. No person shall be received into the Church without the consent of a majority of the members present.

12. The Church shall have the right to elect her own officers annually, which shall be an elder, church leader, deacon, steward, and secretary; and also to convene her membership at pleasure, for the purpose of transacting her own business, and such body, when convened, shall be denominated the *Church Conference*.

Other conferences, of superior and appellate jurisdiction, are the District, State, and Gen-

eral Conferences. The District Conference is composed of "delegates duly elected and authorized by the churches in the district;" the State Conference of delegates similarly accredited by the districts within the bounds of the State; and the General Conference of delegates elected and authorized by the State Conferences. The last body has jurisdiction over the general affairs of the Church. Its powers are carefully restricted under the operation of eight general rules. The District and State Conferences meet every year; the General Conference every four years. In electing delegates to the conferences, no distinction is made between ministers and laymen.

The General Conference met at Mount Jefferson, Ala., May 8, 1873. The Rev. J. J. N. Huddelston, of Mississippi, was reelected president. Twenty-four delegates were present; but little business was transacted. Provision was made for the publishing interests of the Church.

The *Congregational Methodist*, published at Opelika, Ala., is the organ of this Church.

V. FREE METHODIST CHURCH.—The number of ministers connected with the Free Methodist Church is ninety; the number of members is estimated at 6,000. The Church was incorporated under the name and style of "the Free Methodist General Conference of North America" by an act of the Legislature of the State of New York, passed April 30, 1873.

VI. AFRICAN METHODIST EPISCOPAL CHURCH.—The British Methodist Episcopal Church is

an organization for British America affiliated with the African Methodist Episcopal Church in the United States. It was formed in Chatham, Ontario, in 1856. It has a flourishing Conference in Canada. It has one bishop, Willis Nazrey. In 1872 Bishop Nazrey visited Nova Scotia, and there collected the African Methodists and organized them. He then visited British Guiana, and, as a result of his efforts, the British Guiana Conference of the British Methodist Episcopal Church met at Georgetown, April 8, 1873. Reports were received at this meeting from five circuits, five stations, and three out-stations.

The Rev. J. G. Stewart, corresponding secretary of the Missionary Society of the African Methodist Episcopal Church, visited Hayti during 1873 in the interest of the work of his society. He found there a congregation of one hundred members still in existence at Port au Prince.

VII. METHODIST EPISCOPAL CHURCH IN CANADA.—The numbers of members attached to this Church were reported at the sessions of the Conferences in 1873 as follows: Niagara Conference, 7,946; Ontario Conference, 6,380; Bay Quinte Conference, 7,492; total, 21,818. The increase from 1872 was 489. The number of traveling preachers in the three conferences was 225; of local preachers, 209.

VIII. WESLEYAN CONNECTION.—The following is a summary of the statistics of the Wesleyan Connection in Great Britain, Ireland, the colonies, etc.:

CONFERENCES.	Members.	On Trial.	Ministers.	On Trial.	Super-numeraries.

Totals.....	586,753	41,707	2,514	609	377

The Conference of the Wesleyan Methodist Connection met at Newcastle-on-Tyne, and was formally opened July 30th. The Rev. George T. Perks was elected president, and the Rev. Gervase Smith secretary. Deputations were present from the Conferences of Canada and of Eastern British America, and offered a report of the action which had been taken by their respective conferences for separation from the parent body and union under a new and independent organization. The Conference sanctioned the action of the two provincial conferences by the adoption of a minute, the principal points of which are as follows:

1. This Conference formally rescinds the Articles of Union which now subsist between the Connection in Great Britain and the Conferences of Canada and Eastern British America respectively, and gives to those Conferences the right to conclude such arrangements for their own consolidation into one

body, and for their entering into terms of union with other Methodist bodies, as shall be in accordance with the doctrines of Methodism contained in Mr. Wesley's first four volumes of "Sermons," and his "Notes on the New Testament," and with a system of discipline which, while adapted to the altered circumstances of Canadian Methodism, shall preserve the fundamental principles of a connexional form of Church government.

2. This Conference also confers upon the two Conferences now existing, and through them, and by such arrangements as they shall agree to, upon the Connection to be consolidated in the Dominion of Canada, all such rights and interests as it may now possess by virtue of the existing Articles of Union, or by virtue of any deeds or instruments relating to any trust-property secured for the benefit of either of the present Conferences.

3. This Conference further directs that the official seal of the Conference be affixed to any document which may be necessary for declaring its full concurrence in any application which the Canada Conference, or the Conference of Eastern British

* Exclusive of missionaries in Ireland.

America, may see fit to make either to the Parliament of the said Dominion, or to any provincial Legislative Assembly within the same, or to any Parliament or Legislative Assembly outside the bounds of the said Dominion, but comprised within the bounds of either of the Conferences aforesaid, for such powers as may be necessary to the vesting of the whole or any part of the trust—property now held for the use of either of the said Conferences, or of any ministers, trustees, or others in connection with either of the same, in such manner and upon such terms as shall secure the same to uses and upon trusts in connection with the proposed united Conference, similar, as nearly as may be, to those for which they are now secured.

A fourth resolution tenders the best wishes of the Conference to “the two bodies named,” and expresses the hope that intercourse will be continued between itself and them.

The preceding Conference had appointed a committee to sit during the year, and consider the subject of lay delegation. They were: 1. To obtain legal advice whether the provisions of the Poll deed would allow laymen to take part in the proceedings of the Conference; 2. If this is allowable, to consider under what regulations they should be admitted; 3. If it is not allowable, to prepare a plan for the better regulation of the committees of review. The committee reported that they had no recommendation to offer regarding the first and second points, but that they had agreed to recommend the appointment of a mixed committee to consider how far the constitution of the committees of review might be improved. Their recommendation was adopted.

The following resolution was adopted on the subject of national education:

The Conference, while receiving and adopting the report of the committee to whom the whole question of primary education was referred, expresses its regret that the essential parts of the recommendation of the committee have not been adopted by the Government in their measure for the amendment of the Elementary Education Act of 1870, and the Conference hereby records its deliberate conviction that in justice to the interests of national education, in the liberal sense, and to the different religious denominations of the country, school boards must be established everywhere, and an undenominational school placed within reasonable distance of every family.

A letter was received from Lords Shaftesbury and Ebury, representing the Vigilance Committee appointed at the Conference of Churchmen and Nonconformists of July 10th, inviting the Wesleyan body to give its help in the endeavor to rouse the public mind to some common action to counteract the danger to the Protestant faith arising from the advance of ritualism and the practice of the confessional. The following resolution was adopted, to be inserted in the minutes, a copy of it to be sent to Lord Ebury as chairman of the Vigilance Committee, but with the reservation that it should not commit the Conference to any particular party in the Church of England:

Having considered the resolution of the Manchester District Committee, calling its attention to

the danger to which scriptural Christianity and national freedom are exposed by the pretensions and movements of Popery in Great Britain and elsewhere, and more especially by the prevalence in our own country of Popish practices outside of the Romish Church; and considering further that recently a very considerable number of clergymen of the Church by law established has publicly moved with a view to procure legislation organizing the confessional as a national institution, the Conference feels bound to record its conviction of the extreme gravity of such facts, not only for any one section of the English people, but also for the nation at large. It is persuaded that the time has now come when those who value the doctrines of the Reformation, or the institutions, whether religious or national, to which they have given birth, are loudly called upon, both as citizens and as members of churches, to take all possible means for the diffusion of scriptural truth and the repression of Romish principles, and also to unite with all Protestants in promoting such measures as may tend to prevent the influence and authority of the nation from being directly or indirectly employed to further movements calculated to discredit and even to undo the Reformation, to which, under Divine Providence, are due many national benefits which Britons have good cause to esteem as blessings. The Conference expresses its belief and hope that our people generally will earnestly strive in their respective spheres of private or public influence, and in so doing will cheerfully cooperate with all who are like-minded, whether within the Established or Nonconformist Churches, in support of every lawful effort to repair the damage done in many successive years to the cause of Protestantism, and to perpetuate in England that Reformed Faith, the rejection or suppression of which in other countries of Europe has been followed by political instability and social disorder, as is witnessed at the present day in the greater part of such countries.

The Conference directed that a fraternal letter be sent to the General Conference of the Methodist Episcopal Church, South (United States), which is to meet in 1874. A committee was appointed to prepare the letter.

The following is a summary of the operations of the Wesleyan Missionary Society, as reported at the anniversary in May, 1873:

1. In nominally Christian countries—embracing England, Scotland, Wales, Ireland, France, Switzerland, Germany, Spain, and more recently Portugal and Italy; 191 ministers were employed, and there were 7,126 church-members and 6,778 scholars in the mission-schools. The missions in America, including Nova Scotia, New Brunswick, Prince Edward Island, Newfoundland, and the Bermudas, will be incorporated with the Canadian Methodist Connection. In connection with the Methodist missions in Canada, and the Eastern provinces of North America, to the Indians, and other destitute people, there were 399 missionaries employed, who had under their care 22,740 church-members, and 82,766 scholars in the mission-schools.

2. In the West Indies, including Jamaica, the Windward and Leeward Islands, the Bahamas, British Guiana, Honduras, and Hayti, 97 missionaries were employed, and there were 44,788 church-members, and 28,088 scholars in the mission-schools.

3. In Western Africa—including the river Gambia, Sierra Leone, and the Gold Coast Districts—there were 21 missionaries, 8,976 church-members, and 5,899 scholars in the mission-schools. These missions had been involved in difficulty and danger by the Ashantee War.

4. In Southern Africa—including the Cape of Good Hope, Grahamstown, Queenstown, and the Bechuana Districts, Natal, and the Transvaal Repub-

lie—there were 85 missionaries, 13,748 church-members, and 15,581 scholars in the mission-schools.

6. In Australasia—embracing Australia, and the South Sea Islands, New Zealand, the Tonga, Feejee, and Friendly Islands—there were 356 ministers, 59,819 church-members, and 104,148 scholars in the mission and other schools. In the Friendly Islands the entire population is represented as having become Christianized, and the missions are entirely supported by the voluntary contributions of the natives. The Australasian Conference has undertaken the management, and to a large extent the support, of the Australasian missions.

8. In India and Ceylon—embracing the Calcutta, Madras, Tamil, and Cingalese Districts—there were 75 missionaries, 2,976 church members, and 13,897 scholars in the mission-schools.

7. In China, eleven missionaries are employed, and there are 178 church-members, and 886 children in the mission-schools.

Full and accredited church-members.....	170,360
On trial for church-membership.....	15,616
Scholars in the mission-schools.....	245,738
Printing establishments.....	7

The fiftieth annual conference of the *Wesleyan Methodist Church in Canada* met at London, June 4th. The most important business brought before it was the consideration of the reports of the committees on the basis of union with the Methodist New Connection and with the Wesleyan Methodist Conference of Eastern British America. Plans of union with both bodies were finally adopted. It was agreed that the name of the united body should be, "The United Methodist Church of Canada;" or, if it should hereafter be found expedient to modify the name—that is, in case of a more general organic union of the Methodist Churches—it should be called "The Methodist Church of Canada." A General Conference was provided for, to meet once in four years, and to have power to make laws and regulations for the whole Church, subject to certain restrictions relating to doctrines, the preservation of the itinerant system, the general rules, and the rights and privileges of ministers, which restrictions were carefully defined and prescribed. The General Conference is to be composed of ministers and laymen in equal numbers, in the proportion of one minister and one layman for every eight members of each annual conference, with additional representation for each fraction of three-fourths, provided the whole number of delegates does not exceed two hundred and twenty, and provided also the president of each conference shall be one of those selected. The ministerial members are to be elected by ballot. The lay members are to be elected by the lay members of the district meetings; the number to be elected to be determined according to the number of church-members in the district as compared with the whole number of members within the bounds of the annual conference. The annual conferences are to be

composed of ministers only who shall have traveled four years, and have been received into full connection. They shall transact all business appertaining to the circuits, stations, or missions within their bounds, and their decisions shall be final on all questions of ministerial character. The district meetings shall be composed of all ministers and preachers on trial within the district and an equal number of laymen, who (the laymen) shall have the right of taking part in all proceedings except the examination of ministerial character. It was provided that, "in the event of union between the Wesleyan Conference and the Methodist New Connection Conference in Canada, it is understood that the United Church shall constitute a distinct community, connected with the Wesleyan Methodist and New Connection Churches in England only by fraternal ties." In order to provide some recognized head of the body during the interval between one General Conference and another, a special committee was constituted, to consist of not less than twelve persons, of equal numbers of ministers and laymen, whose duty it should be, "from one session of the General Conference to another, to watch over and guard all the rights and privileges of our Church throughout the Dominion; to promote, as far as possible, the recommendations of the General Conference, and devise such means as shall be deemed needful for the interests and welfare of the Church, and which may require immediate action; but such committee shall have no legislative power, and shall not interfere with the duties of the annual conference, nor with the duties of any officer of the church." The terms for the incorporation of the Wesleyan Conference of Eastern British America in the same General Conference with that of Canada were embodied in a paper called "the Plan of Federal Union." It provided for the division of the Eastern Conference into three annual conferences, and was made to conform, in other respects, with the plan of union with the New Connection Conference. The plans were adopted, to be laid before the quarterly meetings to be held in November, for their action. It was understood with reference to the "Plan of Federal Union," that the constitution thereby formed should be recognized as the constitution of the Wesleyan Church in Canada, whether any other bodies should come into the Union or not. Under the operation of the two plans of union, the Church in Ontario and Quebec will be divided into three conferences, to be called the Toronto, London, and Montreal Conferences. Nova Scotia and Bermuda will constitute the Nova Scotia Conference; New Brunswick and Prince Edward Island, the New Brunswick and Prince Edward Island Conference; and Newfoundland, Labrador, and the islands contiguous, the Newfoundland Conference. The scheme of union was also approved by the Conference of Eastern British America.

As the fiftieth anniversary of the first meeting of a Methodist Conference in Canada would come within the ensuing year, and it would also be the fiftieth year since the organization of the Missionary Society, the Conference determined to celebrate it as a jubilee year. Suitable religious exercises were directed to be held in October, when a free offering was to be solicited from the people, to be appropriated to the superannuated ministers' fund, the theological institutions at Coburg and Montreal, and the Missionary Society.

The returns of the votes of the quarterly meetings on the various questions submitted to them under the plan of union, so far as they were reported, showed the following results:

1. On union with the Conference of Eastern British America, 353 quarterly meetings voted yea, 2 nay.
2. On union with the New Connection Church, yeas 343, nays 12.
3. On the acceptance of lay representation in the General Conference, instead of the power before possessed by the quarterly meetings relative to legislation, yeas 331, nays 29.
4. On a proposed change in the constitution of the quarterly meetings as specified in the plan of union, yeas 330, nays 30.
5. On the acceptance of lay representation in the General Conference (representatives to be chosen by laymen only) instead of the power before possessed over certain acts of legislation by the quarterly meetings, yeas 298, nays 63.

The *Australasian Conference* met at Sydney in February. It perfected the plan which had been proposed at the preceding meeting for annual and General Conferences. Four annual conferences were created; those of New South Wales and Queensland, with the South Sea Missions; Victoria and Tasmania; South and Western Australia; and New Zealand. The General Conference will meet every three years. The principle that there should be lay representation in the Conference was affirmed by a nearly unanimous vote, and a committee was appointed to consider the subject, and report at the annual conferences. Provision was also made to secure the attendance of laymen at the financial district meetings, so that they may act with the ministers in voting for representatives on the stationing committee. An application was received from the Tongans to be erected into a distinct church. It was shown that the Friendly Islands had, during the year, contributed £9,000 for various religious purposes. According to the statistical reports there were connected with the Conference, 861 ministers, European and native; 2,948 churches and other preaching-places; 66,086 members, including those on trial; 3,261 local preachers; 5,821 class-leaders; 318,856 attendants on public worship; 112,387 Sabbath-schoolers, and 104,158 day-schoolers. There were also four colleges and a provisional theological college.

IX. METHODIST NEW CONNECTION.—The number of members reported to the Conference of 1878 was 31,161, showing an increase from the previous year of 191. The increase

in the amount raised for connectional funds was £217. The seventy-seventh annual Conference met at Hull, June 11th. A telegram was received from the Canadian Conference, stating that the terms of union with the Wesleyan Conference had been accepted, subject to the sanction of the quarterly meetings, and that a deputation would visit the next Conference in England. The weight of opinion in the Conference seemed averse to the consummation of the scheme of union, as it was believed to involve an unfair compromise of the chief distinctive feature of New Connection Methodism. A deputation was appointed to visit Canada, and represent the views of the Conference on the question; further, the subject was left in the care of the missionary committee for the year.

The following statistics of the home missions were presented: chapels, 283; missionaries, 109; local preachers, 225; members, 9,791; probationers, 512; Sunday-school teachers, 1,654; Sunday-school scholars, 18,104. The sum received for home and colonial missions was £5,087.

The Conference of the *Methodist New Connection in Canada* met at Dunnville, June 4th; the greater part of the session was occupied with the discussion of the plan of union with the Wesleyan Conference. The plan was approved by the unanimous vote of the Conference.

Much irritation was afterward excited among the Connection in Canada, by the proceedings of persons supposed to represent the parent body in England, in the endeavor to defeat the proposed Union. A paper was circulated among the churches containing the resolutions of the English Conference and committee deprecatory of the Union, and the address of the English Missionary Secretary, the design of all which was thought to be to influence the members to vote against union. On the 20th of October, the Executive Committee in Canada issued a circular declaring these movements to be in direct violation of a distinct agreement made between representatives of the English Conference and the Canadian Union Committee, that there should be no agitation of the Union question while it was pending; but that the decision of the whole matter should be left to the unbiased judgment of the quarterly meetings to be held in November.

The voting in the quarterly meetings resulted in fifty-six circuits declaring in favor of union and nineteen against it.

X. PRIMITIVE METHODISTS.—The following is a summary of the statistics of the Primitive Methodist Connection in Great Britain, the colonies, and the mission stations, for 1878: Members, 16,658; decrease from the preceding year, 806; traveling preachers, 1,005; local preachers, 14,751; leaders, 9,997; connectional chapels, 3,797; other places of worship, 2,555; Sunday-schools, 3,506; Sunday-school

teachers, 48,978; Sunday-school scholars, 296,512; day-schools, 44; scholars in the same, 4,817.

The fifty-fourth Conference met in London, June 11th. The Rev. S. Autliff was elected president. The Missionary Committee reported the year's contributions greater than ever before. The gross amount was £32,257, 11s. 1d. The missions were generally in good condition. Additional missionaries were needed for the colonies and Africa. The reports of the statistical committee showed a decrease of 806 in the number of members from the previous year.

The report of the Primitive Methodist Missionary Society, which was made April 29th, shows that the society had in the United Kingdom 64 missions, 11 circuit missions, and 126 missionaries; in Canada, 38 missions, and 46 missionaries; in New Zealand, 6 stations and 7 missionaries; in New South Wales and Queensland, 22 missions and 22 missionaries; in Victoria and Tasmania, 12 missions and 12 missionaries; in South Australia, 6 missions and 7 missionaries; in Africa, 4 stations and 6 missionaries: in all, 150 missions and 226 missionaries. The sum of £32,257 had been expended during the year in the support and enlargement of missionary operations.

The following are the statistics of the *Primitive Methodist Connection in Canada*: Number of ministers, 91; local preachers, 270; class-leaders, 269; connectional churches, 196; other preaching-places, 121; parsonages, 31; value of church property, \$218,037; church debts, \$25,190; Sunday-schools, 186; teachers, 1,170; scholars, 8,260; church-members in Sunday-schools, 6,609. The reports show a decrease of 238 members.

The following are the statistics of the *Primitive Methodist Churches in the United States*, as reported at the two Conferences in May, 1873:

Eastern District, Conference held at Plymouth, Pa., May 14th to 19th: Circuits, 16; members (approved, 909; probationers, 214), 1,123; traveling preachers, 10; local preachers, 89; class-leaders, 64; churches, 17; other preaching-places, 24; Sunday-schools, 26; teachers, 360; scholars, 1,918; missionary contributions, \$371.64.

Western District, Conference held at New Digging, Wis., May 22d to 27th: Circuits and missions, 19; members (approved, 1,632; probationers, 110), 1,742; traveling preachers, 18; local preachers, 102; class-leaders, 93; churches, 36; other preaching-places, 42; Sunday-schools, 42; teachers, 463; scholars, 2,495. Contributions for missions, \$1,413.58; for the superannuated preachers' fund, \$161.90.

Total members in the two Conferences, 2,865; traveling preachers, 28; local preachers, 191.

XI. UNITED METHODIST FREE CHURCHES.—The following are the statistics of this denomination, as presented at the Conference of

1873: Ministers, 329; supernumeraries, 24; local preachers, 3,374; leaders, 4,309; members, 66,566; members on trial, 4,861; chapels, 1,303; preaching-rooms, 277; Sunday-schools, 1,218; teachers, 24,152; scholars, 160,037; day-schools, 91; teachers, 180; scholars, 11,148; chapels registered, 978; chapels settled on the connectional deed, 385. The reports of the home circuits showed a decrease of 676 members, while those of the foreign circuits showed an increase of 335 members. Thus there appeared a net decrease of 341 members.

A communication was received from the Vigilance Committee appointed at the conference of Churchmen and Nonconformists which had recently been held, asking the assembly to aid the committee in their efforts against ritualism and the confession. The resolutions adopted by the assembly in reply to this communication expressed regret at the progress of "anti-Protestant teachings and practices in the Established Church;" advised ministers and members to coöperate with all true Protestants in efforts to disseminate information among the people on the points of difference between Protestantism and Roman Catholicism; expressed the belief that "Romanizing doctrines and practices," so far as Protestants are concerned, were almost exclusively confined to the Established Church, and that the privileges of this Church were used by "a large and rapidly-increasing section of the clergy," to the subversion of the Protestant faith; and declared that it saw in these facts additional evidences of the desirability of disestablishing the Church.

XII. BIBLE CHRISTIANS.—The fifty-sixth annual conference of the Bible Christian Connection met at Landport, Portsmouth Circuit, July 30th. The Conference was composed of sixty ministers and ten lay delegates. The Rev. J. B. Vanstone was elected president. The statistical reports showed the numbers, etc., in the Connection to be as follows: Itinerant preachers, 259; local preachers, 1,727; chapels, 870; other preaching-places, 202; members, 25,815; on trial, 612; teachers in schools, 9,411; scholars, 48,678. The number of members had decreased 894. The receipts of the Missionary Society for the year were £6,253, or £300 more than those of the preceding year, and considerably more than those of any previous year. The amounts contributed for the support of the ministry were about £250 more than those of any previous year.

The Canadian Conference of the Bible Christian denomination was held at Lindsay. The Rev. E. Roberts was chosen president. A small increase was reported in the number of members.

XIII. WESLEYAN REFORM UNION.—The annual delegate meeting of the Wesleyan Reform Union in England was held at Bakewell, commencing August 19th. It was ordered that a friendly letter be sent to those circuits which had reported a decrease in membership, urg-

ing them to increased efforts for usefulness. The relation of Sunday-schools to the Union was discussed.

XIV. PRIMITIVE WESLEYAN METHODIST CONNECTION.—The churches of this body are all in Ireland. The body originated in a separation from the Wesleyan Methodist Church, which took place in 1816, on a question of the administration of the sacraments. The primitive Wesleyans hold that while the Methodist organization is competent to provide for other functions, only ministers of Episcopal ordination are qualified to administer the sacraments. Consequently, they have received the communion from the Church of England. The Conference met in Dublin, in July. The subject of union with the Irish Methodist Conference occupied a considerable share of attention. A representative committee was appointed to meet a minister and a layman who had already been designated by the Wesleyans as their committee, and arrange a basis of satisfactory union. The action of the Conference on this subject was unanimous.

MEXICO (REPÚBLICA MEXICANA), an independent state of North America, extending from latitude 15° to 32° 43' north, and from longitude 86° 30' to 116° 50' west. It is bounded north by the United States; east by the Gulf of Mexico, the Caribbean Sea, and British Honduras; south by Guatemala; and south and west by the Pacific Ocean; and its area, according to official returns of 1869, is 1,030,442 square miles. Señor Don Antonio García y Cubas, however, in his geography, published in the same year, sets down the area at 1,972,648 square kilometres, or only 761,640 square miles.

The republic is divided into twenty-seven States, one Territory, and one Federal District, which, with their populations (in 1869), and capitals, are respectively as follows:

STATES.	Population.	Capitals.
Sonora.....	109,389	Ures.
Chihuahua.....	179,971	Chihuahua.
Coahuila.....	84,397	Saltillo.
Nueva Leon.....	174,900	Monterey.
Tamaulipas.....	108,778	Victoria.
San Luis Potosí.....	476,500	San Luis Potosí.
Zacatecas.....	397,945	Zacatecas.
Aguas Calientes.....	140,630	Aguas Calientes.
Durango.....	185,077	Durango.
Sinaloa.....	163,095	Culiacan.
Jalisco.....	924,580	Guadalajara.
Colima.....	63,333	Colima.
Michoacan.....	618,240	Morelia.
Guanajuato.....	874,043	Guanajuato.
Querétaro.....	184,286	Querétaro.
Hidalgo.....	401,287	Pachuca.
México.....	650,663	Toluca.
Morelos.....	150,384	Cuernavaca.
Guerrero.....	390,029	Guerrero (Tixtla).
Tabasco.....	121,665	Tabasco.
Puebla.....	697,768	Puebla.
Vera Cruz.....	459,362	Vera Cruz.
Oaxaca.....	646,725	Oaxaca.
Chiapas.....	194,987	San Cristóbal.
Tabasco.....	85,707	San Juan Bautista.
Campeche.....	80,966	Campeche.
Yucatan.....	422,395	Mérida.
Lower California (ter'y).....	81,645	La Paz.
Federal District.....	275,996	Méjico.
Total.....	9,176,052	

The geographer already mentioned gives 8,743,614 as the total population of the republic, distributed according to races as follows: 1,750,000 pure-blooded Indians; 2,831,000 whites; and 4,662,000 mestizoes.

Wappasus estimates the population at about 8,000,000 in 1861, thus far agreeing with Sr. García y Cubas; but his estimate of the number of Indians and mestizoes—4,800,000 of the former, and 1,190,000 of the latter—is probably farther from the truth; inasmuch as the mixed race is, by all authorities, admitted to be by far the more numerous of the two.

The following is a list of the Mexican cities having more than 20,000 inhabitants:

CITIES.	Population.
México (capital of the republic).....	200,000
Leon.....	90,000
Guadalajara.....	75,000
Puebla.....	65,000
Guanajuato.....	63,000
Querétaro.....	48,000
Celaya.....	37,000
Orizaba.....	37,000
San Miguel de Allende.....	35,000
San Luis Potosí.....	34,000
Aguas Calientes.....	31,000
Zacatecas.....	30,000
Salvatierra.....	28,000
Durango.....	26,000
Mérida.....	25,000
Oaxaca.....	25,000
Morelia.....	25,000

The President of the republic is Señor Don Sebastian Lerdo de Tejada (elected November 2, 1872); Minister of the Interior, Gomez del Palacio; Minister of Justice and Public Instruction, José Díaz Covarrubias (Director); Minister of Finance, Francisco Mejía; Minister of War and Marine, General Ignacio Mejía; Minister of Public Works, Blas Balcárcel.

The President of the Supreme Court of Justice is General Porfirio Díaz. The present Archbishop of Mexico is P. A. de Labastida; Archbishop of Michoacan, Dr. Arceiga; and of Guadalajara, Dr. P. Loza. Mexican minister plenipotentiary to the United States, Sr. Don Ignacio Mariscal; consul-general at New York, Sr. Don N. Navarro.

The national income and expenditure for the fiscal years 1871 and 1872 are given as follows:

INCOME.	
Custom-house receipts.....	\$9,076,709 74
Revenue of Department of Federal District.....	1,741,622 91
Paper stamp-duty.....	1,734,894 54
Direct contributions of Federal District.....	477,228 75
State property.....	506,488 88
Mint.....	169,484 13
Public Instruction.....	6,074 68
Carriage-tax.....	7,028 61
Post-Office.....	265,140 22
Sundries.....	4,997,989 01
Total.....	\$19,029,250 97
EXPENDITURE.	
Legislative power.....	\$690,195 82
Executive power.....	28,088 70
Judicial power.....	175,139 79
Foreign Ministry.....	110,810 49
Ministry of the Interior.....	1,359,229 07
Ministry of Justice.....	537,105 12
Ministry of Finance.....	2,557,384 15
Ministry of War.....	6,536,536 79
Ministry of Public Works.....	1,719,418 76
Sundries.....	4,622,409 52
Total.....	\$18,846,109 21

S. Lerds Atjuda

By comparing the sums of the foregoing tables, it will be seen that there was a surplus of \$679,141.76 in the year referred to.

The estimated expenditure for the following year was \$23,018,822.76. The President of the republic has a salary of \$30,000 per annum.

There is no official report of the amount of the national debt. In the item *Ministry of Finance*, in above table of expenditure, is included the sum of \$375,188.27 for amortization of the home debt. The loans contracted by the imperial government are repudiated by the present, as they were by the Juarez administration.

The army, on December 14, 1872, comprised 1,650 officers of all grades, 21,689 men, and 7,284 horses and mules.

About two-thirds of the foreign commerce is carried on with the United States. The staple articles of export are silver and copper ores, cochineal, indigo, and other dye-stuffs

and dye-woods; Sisal-hemp, ixtle, mahogany, etc.; and the imports consist of cotton, linen, woolen, and silk fabrics; iron, wrought and unwrought; machinery, hardware, provisions, etc.

The total value of the imports for the year 1870 amounted to \$23,478,000; and that of the exports \$23,135,000, of which latter sum \$17,210,000 represented precious metals.

The exports to Great Britain for the five years from 1868 to 1872 inclusive, amounted to: 1868, \$1,753,320; 1869, \$1,752,850; 1870, \$1,499,065; 1871, 1,986,620; 1872, \$2,217,620.

The value of the imports from the same country during the same period reached: 1868, \$4,242,940; 1869, \$3,158,620; 1870, \$4,554,410; 1871, \$5,845,065; 1872, \$4,215,980.

The shipping movement in the principal ports of the republic for the year ending August 31, 1872, was, as shown in the subjoined table:

PORTS.	VESSELS ENTERED.		VESSELS CLEARED.	
	Foreign.	Coasting.	Foreign.	Coasting.
Matamoros (up to July).....	13	21	8	19
Tampico.....	68	48	66	46

Total.....	794	1,960	804	1,910

The number of passengers arrived (by sea) in the republic in the same year was 5,740; and 5,095 left it.

The railway from Vera Cruz to the city of Mexico was completed in the last days of 1872; and on New-Year's Day, 1873, the first through-train descended from the latter to the former city, carrying President Lerdo de Tejada, the United States minister, and other persons of distinction, who were invited to take part in the ceremony of inauguration. The whole length of the line is 263½ miles, and the total cost of construction was \$27,000,000. The fare from terminus to terminus is: first class, \$16.00; second class, \$12.50; and third class, \$7.25. Some sixty miles of this line pass through the mountain-region, forming the ascent, by a series of terraces, from the coast to the great Mexican table-land, the mean elevation of which, on the eastern border, is 7,400

feet above the sea. This portion of the road (with an average grade of 123 feet per mile), now winding along the flank of some lofty mountain, at times on the very verge of an abyss, now threading lengthy tunnels, or intersected by bridges thrown at giddy eminences over deep ravines, gives the traveler an opportunity of surveying some of the most picturesque and grand scenery on the North American Continent.

From Apizaco, 86½ miles east of Mexico, extends a branch line to the city of Puebla, distant 29½ miles; and a line direct from Vera Cruz to Puebla is in process of construction, and trains running over a distance of seven miles. Three short railways lead from the city of Mexico to different places in the vicinity, the aggregate length being somewhat less than 20 miles.

The telegraph-lines enumerated in the annexed table were in operation at the end of 1872:

* The shipping-trade of this port was transferred to Progreso in October, 1872.

LINES BELONGING TO THE FEDERAL GOVERNMENT.

Public instruction is in a prosperous condition in Mexico; the number of schools is on the increase; and the liberality of the central and of the different State governments in their appropriations for the development of the system is most praiseworthy.

In the city of Mexico there are the following institutes supported by the General Government: The Escuela Preparatoria, the courses of which comprise the modern languages, history, mathematics, chemistry, physics, ethics, etc.; the Schools of Jurisprudence, Agriculture, Medicine, Engineering, Fine Arts and Trades, and a School for Deaf-Mutes; besides a high-school for females, seven primary schools, three of which are for females; and a night school for adults of both sexes.

The Lancasterian Society has likewise a number of primary and grammar-schools under its jurisdiction, as also a normal school; there are numerous schools sustained by the Church; and a considerable number of municipal schools supported at the expense of the municipal authorities. Among the private educational establishments the *Ateneo*, of Sr.

Don Celso Acevedo, to whose untiring zeal and able teaching the advanced state of learning in the capital is in no small measure due. There are also some forty private schools in the city of Mexico.

In the city of Mérida there are about a score of public schools; one primary in each of the five wards, and some dozen central schools. All the other towns in Yucatan have a proportionate number; the State government expends \$19,000 annually in the cause of public instruction; and liberal outlays are likewise made by the several municipalities. New schools are being founded in every part of the republic.

Commerce at Matamoras was seriously injured owing to an order issued by the Secretary of the Treasury directing the collection of 4½ per cent., in addition to the 1½ per cent. import duty already in force. There being no district judge in that place, the collector of customs was invested; pursuant to the treasury regulations, with almost unlimited power to seize, embargo, and exercise magisterial functions generally; and his abuse of authority gave rise to grave complaints on the part of the commercial community. On the 20th of January the store and property of an American citizen were seized under the pretense of collecting back import dues, which had been previously abolished, but were afterward instituted by the Mexican Government. An immediate effect of such onerous import duties was the introduction of large quantities of smuggled goods, to the detriment of honest merchants, who were compelled to sell at ruinous prices, in order to be able to compete with the smugglers. Indignation meetings were held at Monterey with a view to the suppression of the contraband trade. At Matamoras, a meeting of the merchants was held, January 13th, and a solemn protest entered against the arbitrary measures of the collector of the port, in the exaction of an illegal duty, which they regarded as a forced loan.

A large number of miners in Hidalgo were out of employment; and the works at Real del Monte—the principal mineral region in the republic—had been suspended.

On the 10th of February, Mr. Nelson, the American minister, visited President Lerdo for the purpose of presenting the congratulations of President Grant on the election of Sr. Lerdo to the presidency.

The latter expressed the hope that the friendly relations between the two countries should remain unchanged forever.

The British Government addressed a note to the Mexican Government demanding damages for raids made by Mexican citizens on British Honduras. In reply, Mr. Lerdo's government refused to consider the claim for damages; but offered to use its best endeavors to prevent in future the recurrence of the depredations, expressing at the same time the hope that the threat contained in the British note (of invad-

ing the territory of the republic in case the compensation demanded should not be granted) might not be carried out, and declaring that the republic had at all times discharged its lawful obligations.

The Roman Catholic clergy were loud in their protestations against the new law granting freedom of public worship to all religious sects; but the Government issued an order to the effect that the law should be fully observed. Under the protecting influence of this law, Protestantism is rapidly spreading in various parts of the country.

A remarkable phenomenon, in the shape of a quicksilver shower, was witnessed in the town of San Ignacio, State of Sinaloa. A thick shower of minute drops of mercury covered the plants; and samples were collected and preserved for scientific examination.

At the close of the year 1872 the entire country was at peace; but some complications, arising out of the depredations on the Rio Grande, exercised for a time an unfavorable influence upon industry and commerce.

A commission was appointed to examine into the affairs on the Texas frontier, and the following circular was issued for distribution among the Mexican and American citizens on either side of the river:

The Executive of the nation, empowered by the law of September 30th, has appointed the subscribers as a commission to examine into the facts relative to the damages complained of by citizens of the United States, and also such as the latter have caused to Mexican citizens in the States of Tamaulipas, Nuevo Leon, and Coahuila, by depredations of Indians, by robbery of cattle or other attacks upon persons or property; therefore the commission will receive all complaints which may be presented under the following rules:

First. Persons who have suffered in the territory of Mexico since February 2, 1848, any attack upon their persons or property, provided it has had its origin in invasions or incursions of individuals coming from the territory of the United States, or of individuals who at the time of committing the act resided in the territory of Mexico, and found protection afterward in the territory of the United States, may present their claims before this commission.

Second. The presentations of complaints will be made in writing on paper of the fifth seal, obtainable from the secretary of the commission, or made verbally by the personal appearance of the party interested before this commission.

Third. In either case the following shall be set forth:

1. The name and surname of the complainer or complainers, his or their domicile at the time in which the event or events took place which caused the complaint, his or their present domicile, his or their nationality, the exact or approximate date of the said events, the precise or approximate places or place where the same events took place, a brief history of the fact and its circumstances, without any opinion being expressed in regard to them, and whether any claim has or has not been presented before the mixed commission at Washington.

2. The kind, quantity, quality, and value of the property robbed or lost from any of the causes mentioned in rule first. If the complaint arises from any attack upon the person, the equivalent in an exact amount of money should be expressed.

3. The names and surnames of those who have

done the injury, if known, and the place of their residence when the facts occurred which gave rise to the complaint. If these circumstances are not known, then the reason or reasons should be expressed for believing that the injury has been occasioned by persons residing in the United States, or by persons, who, residing in the Mexican territory, have met with protection in the United States.

4. If the property robbed has been carried into the territory of the United States the circumstances of the act will be set forth, as far as known, by those complaining. It should also be shown if they have made any demand or any claim, or sought any kind of aid from any authority of the United States for the purpose of recovering that property; if the objects robbed were restored, the difficulties which may have been realized in securing their restoration, or the reasons which may have been announced by the authorities for not doing so.

5. Should the property robbed, in the territory of Mexico have been carried into the United States and converted into objects of commerce, the name and surname of the person or persons who acquired, the amount or price at which they acquired them, the place or places where the purchasers took them, and such other facts as may be known by those complaining.

6. Should those persons accused of the acts which gave rise to the complaint have found protection in the United States, the kind of protection which was extended shall be declared and shown—by whom, if the persons who protected said accused were authorities when such protection was given, or, if they had been before or were afterward, stating the public office or offices which they may have filled at any time in the United States.

Fourth. Persons complaining may present their proofs, either in writing at the time of presenting their complaint, or at any time thereafter, or verbally by a personal appearance.

Fifth. Should the proofs be in the form of documents, they should be presented before the commission, or it should be communicated to the commission in what archive or archives said documents may be found, in order that the commission may ask such copies or testimonials as may be thought necessary.

Sixth. Should the proofs proceed from witnesses, the complainant should present them before the commission; it would be better with a written interrogatory, or, at least, a verbal explanation to the commission of the points which he proposes to testify to, so that the witnesses may be interrogated upon them. The witnesses should number at least three upon each one.

Seventh. Should any witness not desire to appear, the complainant may inform the commission in order that it may issue a formal summons to compel the witness to appear.

Eighth. Heirs or representatives of persons who have suffered damages named in rule first, have, under the laws, the right to present their complaint.

NOTES.

1. This commission having for its object to make a complete inquiry, the rule of its conduct will be the most complete impartiality; and being guided by the principles of the strictest justice it invites persons residing in the territory of the United States, or individuals who have property there, and who believe themselves entitled to complain of robberies or depredations committed by bands organized in the territory of Mexico, to present their complaints before the commission with the required proofs.

2. Persons residing in the territory of Mexico are requested to give their aid to the commission in order that it may possess all the facilities necessary to fill its mission, and provide measures to remedy the evils said to have been committed on both frontiers, and prevent them in the future.

The office of the commission will be open every day, except feast-days, from ten in the morning till four in the afternoon, in the house situated on the corner of Morelas and Sixth Streets, known as "the New House of Pedro José de la Garza."

EMILIO VELASCO.

ANTONIO GARCIA CARRILLO.

AGUSTIN SILICEO.

MATAMOROS, November 21, 1872.

Señor Don José María Iglesias was elected Chief-Justice of the Supreme Court, an office equivalent to that of Vice-President, inasmuch as, on the demise of the President of the Republic, the latter is succeeded by the Chief-Justice.

Disturbances occurred in Yucatan, caused by the result of the State elections; and a large number of persons were killed.

The most important topic of the time was the insurrectionary movements of the Indians of Tepic, under one Lozada. The first battle between the insurgents and the national troops, commanded by Generals Ocorona and Flores, was fought on January 28th at Mohonera near Guadalajara. Lozada's men numbering upward of 6,000. The rebels were routed, with heavy loss, and were divided into separate bands; one of which, 2,000 strong, attempted to take possession of Mazatlan; but these in turn were defeated near the town of Rosario by a few hundred men under Colonel Altimirano. The loss sustained by the Government troops at Mohonera was little short of 400.

Immediately after the victory of Altimirano, the President of the Republic issued a decree for the closing of the port of San Blas, and authorizing General Ceballos to equip a war-vessel to cruise in the vicinity and prevent blockade-running. Ceballos was likewise instructed to interfere with the dispatch of any supplies from San Blas to the insurgents at Tepic.

The inhabitants of Mitlan, in the State of Oajaca, had risen, in March, displaced the Government authorities, and appointed in their place officers of their own choice.

The remains of an ancient temple, supposed to have been erected centuries before the discovery of Mexico, have been found in the mountains of San Juan in the State of Ohiapas; and in the vicinity of the temple have been dug up three stone statues representing Anahuac dignitaries.

About the middle of March the epizootic made its appearance at the capital, and soon became alarmingly prevalent, attacking fowls as well as horses and cattle; large numbers of afflicted animals were killed and burned in several localities, in order to check the spread of the distemper. The lack of facilities for transportation in consequence of the malady caused an enhancement in the price of the necessities of life in the city of Mexico, and elsewhere. Although of short duration, its effects were very violent and frequently fatal, especially among horses.

The United States Government received a

flattering mark of cordiality in a banquet given by President Lerdo to the American minister and secretary of legation, Messrs. Thomas H. Nelson, and Porter C. Bliss, on the eve of the departure of the former, in whose stead John W. Foster had been appointed minister. Julius A. Skilton, Esq., the American consul-general at Mexico City, and other distinguished American citizens were present at the entertainment.

The anniversary of American independence was cordially celebrated by the Mexican Government; flags were flying on all the public edifices; and the newspapers of the capital were unanimous in the expression of friendly sentiments.

The Federal District Court of Matamoros pronounced, July 23d, an important decision favorable to importers of merchandise from foreign countries, denying the right of the Government to collect a duty of one-half per cent. per pound on goods imported into the "Free Belt."

This decision was based on the provisions of the new tariff, and was made on the protest of Matamoros merchants against the exactions of this duty by the custom-house officers, who had persisted in collecting it, although the former tariff, under which it was previously imposed had been repealed. The effect of the decision will be to extend the privilege under the "Free Belt," and is applicable throughout the whole region.

Lozada, the Tepic rebel chieftain, was captured, and shot in August.

The loss of several lives, and destruction of a large quantity of property in Guanajuato, were caused by the bursting of a water-spout, and the consequent inundation of the city.

Yellow fever was unusually prevalent and fatal at Vera Cruz during the summer; there were also numerous cases of cholera there and elsewhere in the republic; and the small-pox committed frightful ravages in Oajaca.

In March, General Alatorre was appointed Governor of Yucatan.

On the occasion of the opening of the National Congress on April 1st, President Lerdo presented an address, which was responded to by Señor Don Francisco Gomez Palacio, president of that body for the month then current.

Among other subjects for deliberation in Congress was that of railways from the capital to the Pacific coast, on one hand, and to the northern frontier of the republic on the other. Two American companies, represented by the same agents as during the previous year* sued for concessions, one of the companies—that represented by Generals Rosecrans and W. J. Palmer—proposed a narrow-gauge line; while the other, by Mr. Plumb, urged the superiority of the broad-gauge. Neither, however, was successful, owing, perhaps, more to an indisposition on the part of the Government and the majority of the influential mem-

* See ANNUAL CYCLOPEDIA for 1872.

bers of Congress to encourage the naturalization of American enterprises in the republic.

Toward the end of the year a concession was granted to a Mexican company for the construction of the railway to the Pacific; but, as the project could scarcely be carried out under auspices exclusively national, it is surmised that the privilege will eventually be transferred to one or other of the two companies above mentioned. During the session of Congress in April and May, the act authorizing State governors to permit religious manifestations in public was repealed.

The late President of the Republic, Benito Juárez, was declared by Congress *Cenemérito* (well-deserving) in a high degree, and his name has been inscribed in letters of gold in the halls of Congress; the anniversaries of his birth and death are to be appropriately celebrated; and a like honor has been decreed to Father Hidalgo who took so active a part in the inauguration of the war of independence in 1810.

The Executive was authorized to appropriate \$50,000 to the erection of a monument to the memory of Juárez; the children of the latter are to have a pension of \$3,000 each per annum; and a premium of \$2,000 was offered for the best biography of him, to be presented within six months from May 1st.

The appropriation bills were the subject of animated discussions; and one presented by the Committee of Ways and Means retrenching several millions from the Government estimate, elicited an energetic debate in favor of the latter.

A new tariff was proposed by a committee of financiers appointed therefore by the President, and a subsidy of \$5,000 per kilometre was granted for a railway forty kilometres in length, intended to connect the Vera Cruz railway with the celebrated mining district of Pachuca.

Certain reform laws, issued by President Juárez at Vera Cruz, in 1859 and 1860, effecting the nationalization of Church property, and the separation of Church and State in the republic, were converted into amendments of the Federal Constitution.

Messrs. José Maria Iglesias, newly elected Chief-Justice of the Supreme Court, José M. Lozano, and Manuel Castañeda y Najera, associate justices, took their oaths of office, May 17th. The first session of Congress terminated on the 31st of May. The President delivered a speech on that occasion, in which he referred with great earnestness to the questions of public instruction, railways, and the elections, shortly to take place, of members for the seventh constitutional Congress.

The elections were held on July 18th, and were more peaceable, and attended by less disorder, than in former years. Charges of undue interference of the army and the administration were less numerous and less serious than usual, and the majority of the members

returned were supporters of the present Government.

The national Congress assembled in preliminary session on the 1st of September; but the formal opening of the session did not take place until the 16th of the same month. Here follow the more important subjects, and the speech delivered by President Lerdo on the latter date:

CITIZEN DEPUTIES: The installation of the seventh constitutional Congress is an event doubly auspicious for the Mexican people. Besides the benefits justly expected from the patriotism and the wisdom of Congress, it sees in the legal assemblage of its representatives a new and satisfactory proof that constitutional order is now firmly consolidated in the republic.

Receive, then, citizen deputies, my very sincere congratulation, because you enter upon your high functions under the most favorable circumstances, with the assurance of a fortunate present, and cheered by the confident hope of a still happier future.

When the present Executive was called to office by law, he made a formal and spontaneous manifesto, which he renewed with pleasure on being soon after favored by a popular election, to the effect that the constant rule of his conduct will ever be the faithful observance of the Constitution and of the laws of reform, which have opened a new era for our country, regenerating it with the principles of modern civilization. In conformity with his promise and his duty, the Executive has placed a check upon some advances hostile to the laws of reform, which will soon be so justly invested with constitutional sanction.

Legal order is maintained throughout the States, free from threatened disturbances, excepting a legal question, which has excited between the State authorities of Coahuila differences much to be regretted. Although this has given occasion to a call for Federal aid, the Executive has thus far judged proper to refrain from imparting such aid, as well because in his opinion the occasion foreseen by the fundamental code has not arisen, as because he considers his neutrality entirely in accordance with our federative system, and even regards the matter in dispute as a question of State constitutional law, which, it is to be desired, may receive a prompt and pacific solution through the action of the local powers.

Our relations with the friendly powers preserve the same spirit of reciprocal good-will and cordiality as heretofore. The Republic of Colombia has appointed a new consul-general in Mexico. By virtue of the resignation of the former representative of the United States, a new minister plenipotentiary has arrived, who, like his predecessor, has given renewed proofs of the sentiments of friendship fortunately existing between the two republics.

The Presidents of Bolivia, Guatemala and Uruguay, having communicated their elevation to the chief magistracy of their respective countries, the Executive has replied with the esteem and cordiality due to the governments and people of those republics.

The American Government, desiring to celebrate the centennial of the independence of the United States of America, has projected for the year 1876 a great exposition of arts, manufactures, and products of the soil and mines, to which it has invited the people and the Government of Mexico. This invitation has been accepted with satisfaction and deserved esteem by the Executive, who will endeavor to have Mexico worthily represented in the brilliant competition at Philadelphia, relying, as he does, upon the support, which, he doubts not, will be given him by Congress, in all those measures which require legislative action.

The ratification of the convention of November 27, 1872, which renewed that of July 4, 1868, having

been duly exchanged, the commissioner and the agent of Mexico in the Mixed Claims Commission are now in Washington discharging their important duties.

The commission of investigation appointed for the frontier of the Rio Bravo has not been able to terminate its labors, in spite of its assiduous efforts. Consequently, its period of duration has been extended, in accordance with the congressional decree, and by virtue of the same, a commission of investigation has been appointed for the frontiers of Chihuahua and Sonora.

The elements which have grown up during the protracted anomalous condition of Tepic afford sufficient reasons for still maintaining there a military government; but as this ought not to be indefinitely prolonged, it may now be a proper time for the representatives of the nation to examine and decide the principal question concerning the separation which that district has solicited, or its reincorporation with the State of Jalisco. An end would thus be put to the agitation maintained for so many years in that district, and Congress having made the decision which its wisdom may dictate, the condition of Tepic would be definitely fixed, to the great benefit of the general peace of the republic.

The proper commission has just concluded the draft of a code of criminal procedure, which will be promptly examined, in order that, by virtue of the authorization of Congress, it may soon receive the character of law, to the profit of a very important branch of the administration of justice.

The Executive believes it his duty to recommend to the enlightened consideration of Congress the pending project concerning the basis of a reform of the system of public instruction, since, if this could be acted upon during the present period of sessions, this important improvement might be established in time for the coming scholastic year.

It is unnecessary to recommend the pending railroad projects; their utility is so great and so well recognized, as also the anxiety of Mexican society for the realization of these enterprises, destined to produce the most abundant fruits of prosperity. The projected railroads will quickly foment our agriculture in the interior, and there will be obtained, at a later day, the great advantage of placing the republic in immediate relations with the United States and with Europe, giving also to Mexico the means of communication with Asia.

Among the pending bills those relating to a diminution of the cost of freight upon the railroad from Mexico to Vera Cruz, and to the prompt completion of the Jalapa Railroad, deserve special attention. Both these improvements will impart new life to rich and fertile regions, and will develop upon a grand scale the exportation of our tropical productions.

The Executive having been authorized to amend the tariff, intrusted its study to a commission, whose intelligent members have worthily executed their task. The examination of several points on which advice was tendered by various custom-houses has delayed the publication of the new tariff, since the Executive desires to proceed with the greatest prudence to the advantage both of commerce and of the Treasury.

The collection of the revenue and the payment of the public expenditure have been effected with the greatest regularity. Notwithstanding the outlay occasioned by the campaign of Tepic, the civil and military lists have been punctually paid, as well as the ordinary expenses of the administration.

Of the loan contracted in August of last year seven-eighths of the principal have been paid, as well as the interest which has become due. That loan freed our society from a new contribution, which would otherwise have been indispensable on account of the scarcity of resources resulting from the civil war, not then fully ended. The good-will displayed on that occasion by the subscribers to the loan was worthy of esteem, and it was but just to attend with

the greatest promptitude to the payment of principal and interest, as was demanded by good faith and the credit of the public administration.

Being fully persuaded of the immense advantages produced by telegraphic communication, care has been taken not only to preserve the existing lines, but to continue those commenced, and to construct other new ones. That of Tabasco, soon to extend to Yucatan, is nearly finished, as will shortly be those from Acapulco to Chilpancingo, and from San Luis to Tampico. A sum of money has been sent abroad sufficient to purchase the wire and apparatus for six hundred leagues more of telegraph. With these the extent of the lines belonging to the Government will soon reach 7,500 kilometres, thus proving the lively desire of the Government to establish in all the States of the republic this means of communication, so fruitful in benefits for society.

Through the just interest of facilitating in every way our communication, especially with the distant States which have hitherto not enjoyed them, it was provided that the Post-Office Department furnish a proper subsidy for the establishment of a line of diligences between the cities of Durango and Chihuahua. The contracting company has offered that before the end of the present month that line will be inaugurated, by which there will be established, for the first time, a regular service of coaches between those two cities.

The Executive being convinced that the lack of vigilance along our extensive coasts on both seas occasions great losses to the Treasury and to honest commerce, has determined to purchase four coast-guard vessels, two for the Gulf of Mexico and two for the Pacific. Smuggling will thus be prevented in great part, and also the danger of new commotions in some of our ports. The Executive has already provided a part of the sum necessary for the purchase of the said four vessels, but the amount fixed in the act of appropriation being insufficient, a proposal for that purpose will be immediately submitted to Congress, prompt action upon which is commended to your attention.

Provision has been made for the payment of the sums due to the lessees of the mints of Guanajuato, Zacatecas, and San Luis, according to the terms of their respective contracts. Had these payments not been effected before the end of the year, triple interest would then have become due. It is, besides, advantageous that these mints should remain under the immediate charge of the Government.

A million dollars has been appropriated for the above object, and for the payment of the loan, the purchase of telegraph-material, and an advance on the purchase of coast-guard vessels; and that without any failure to defray the ordinary expenses of the administration.

These facts will prove to you, citizen deputies, the zeal of the Executive in striving after all possible improvements. Although there are grave difficulties to surmount, the administration endeavors to proceed with regularity; and if, as we should hope from the patriotism and good sense of the Mexicans, peace continues to shed its inestimable blessings upon our society, we may indulge in the well-founded hope that the republic, after so many sacrifices, will obtain the most complete prosperity.

In October the Jesuits were ordered to leave the country by the earliest opportunity, the choice being given them of American, English, or French packets.

Among the important acts of the second session of Congress are the following:

The separation of Church and State; Congress cannot make laws establishing or prohibiting any religion.

Matrimony is to be henceforth a civil contract.

Religious institutions cannot possess property.

A simple promise to speak the truth, and to comply with obligations contracted, under penalties in case of violation, is substituted for the religious oath.

No one is compelled to render services of any kind without just and equitable compensation.

Contracts infringing upon personal liberty, whether in matters of work, education, or religious vows, are illegal; consequently monastic orders are not allowed by law, nor is their establishment permitted, under any pretext, or by any denomination whatever.

LERDO DE TEJADA, SR. DON SEBASTIAN, President of the Republic of Mexico, was born at Jalapa, State of Vera Cruz, on the 25th of April, 1825. He studied Latin, philosophy and theology, in Puebla, and afterward entered the College of Ildefonso, in Mexico City, where he received his diploma of lawyer in 1851. The following year he was appointed rector of that institution, at the early age of twenty-seven. In December, 1855, he became magistrate of the Supreme Court of Justice, shortly after the suppression of the special tribunals by virtue of the Juarez law, and held that post until the middle of 1857. During that interval he aided his brother Miguel, then Minister of Finance, in the decision of important questions requiring superior diplomatic skill, and affording him an opportunity to display the brilliant parts which have never failed to secure for him the admiration and applause of friends and enemies throughout his political career.

Called by President Comonfort to the portfolio of Foreign Affairs, he entered upon his duties on June 4, 1857; but resigned the office on the 15th of September following, in time to escape sharing in the downfall of the administration, an issue which, if Comonfort had given ear to the timely premonitions of Sr. Lerdo, might easily have been prevented.

The reactionary party, who, as the enemies of the Constitution of 1857 (which they still refuse to accept), had been mainly instrumental in the overthrow of Comonfort, now elected to the presidency General Zuloaga, who had sedulously defended, and ultimately proclaimed, the "Plan of Tacubaya." But Sr. Lerdo, to whom the reactionary principles have ever been repugnant, retired from public life, to devote his attention anew to Ildefonso, and the exercise of his profession as a lawyer. After the reestablishment of the constitutional government, he was elected member of the Congress which commenced in May, 1861, and lasted until September 25, 1862, during which period he was three times President of the Chamber; and he likewise formed a part of the Congress of October of the latter year, and of May, 1863. Having removed to San Luis Potosi with the national Government, which was compelled to abandon the capital

by the advancing French army, he was appointed Minister of Justice September 15, 1863, and nine days afterward Minister of Foreign Relations, which post he held uninterruptedly until January 17, 1871, and in which he served the republican cause with the utmost zeal and patriotism, contributing to the preservation of Mexican nationality, and the final defeat of the imperialists. When the United States Government interceded in behalf of the Emperor Maximilian, he declared loudly and steadfastly against the interference of a foreign power with the internal administration of the country, and went so far as to say that the pardon of the ill-fated Archduke might prove lastingly prejudicial to the republic.

Sr. Lerdo was one of the chief advisers of Juarez in the reorganization of the Government after the return of the latter to the capital and the author of several wise reforms.

In 1867 he was, by a large majority of votes, elected President of the Supreme Court of Justice, a post equivalent to that of Vice-President of the Republic; and, accordingly, on the decease of Juarez, in July, 1872, he succeeded the latter in the Executive chair, in which he was confirmed by the national voice in November of the same year.

Of easy and unassuming manners, and profound diplomatic ability; often eloquent, and always brilliant and persuasive in the tribune; a faithful and constant defender of the Constitution, without a single instance of vacillation through his whole political career as minister, deputy, chief of the cabinet, or President of the Republic; and, above all, the sincere friend of popular education, as the surest foundation of enduring national prosperity—such is the present ruler of the Mexican people.

MICHIGAN. Among the most important acts of legislation was one for the appointment of a commission to propose a revision of the constitution. The commission was to consist of eighteen members, appointed by the Governor. Two were appointed from each congressional district, and they convened at Lansing, August 27th, and chose Sullivan M. Cutcheon president, and Henry S. Clubb secretary. On the 1st of December they reported to the Governor the amended constitution proposed by them. The changes proposed are not very radical. The most important are the following: 1. Prohibiting the Legislature from passing local or special laws in any of the following cases: divorcing parties; changing names of persons or places; regulating the practice of courts, or the jurisdiction and duties of justices and constables; providing for change of name; providing for election of supervisors; summoning and impaneling grand and petit jurors; regulating interest; authorizing sales, leases, or mortgages on behalf of persons under disability, or religious corporations or societies; chartering or licensing ferries or toll-bridges; remitting fines, penalties, or forfeitures; changing the fees of officers; changing the laws of de-

seent; granting special privileges to individuals or corporations; declaring any named person of age; extending time for collection of taxes, or relieving assessors or collectors from performance of duty; punishing crimes or misdemeanors; adopting by any person of another as his child or heir; vacating or altering roads, streets, etc., alley or public ground, or building or repairing bridges, or draining swamps; exempting property from taxation. All these subjects to be provided for by general law. 2. Forbidding expenditures for schools under private or denominational control. 3. Increasing the judges of the Supreme Court to five, and giving them power to establish a code of civil procedure. 4. Leaving the amount of salaries of executive and judicial officers to be fixed by the Legislature. 5. Forbidding municipal corporations to give aid by money or credit to railroads, or any person, private corporation, or association (which, however, the courts hold cannot be done under the present constitution). 6. Requiring cities and villages to be incorporated only under general laws. 7. Forbidding the State to aid, by gift, or pledge of its credit, any person or corporation, or to subscribe, or to be interested in, the stock of any corporation, or to assume the indebtedness of any municipality. 8. Providing for an annual tax of two hundred dollars on every person engaged in the sale of intoxicating drinks, and forbidding the sale to juniors, persons under guardianship, insane and idiotic persons, paupers, and common drunkards. The proposed instrument is to be submitted for approval to a special session of the Legislature, and if approved, must then be referred to the people for adoption. The Legislature also passed an act for the appointment of a Board of Fish Commissioners, to establish a State fish-breeding establishment for the artificial propagation and cultivation of white-fish, and such other fish as they may select, and to supervise generally the fishing interest. Governor Bagley, with George Clark and George H. Jerome, constitute the board. The Legislature also provided for a commissioner of railroads, to whom every railroad corporation doing business in the State is required to make a full and detailed report of all its stock, stockholders, assets, liabilities, value of road, rolling-stock, buildings and fixtures, miles run, tons of freight moved, earnings for carriage of freight and passengers, expenses, cost of repairs and improvements, buildings, fixtures, etc., tariff of freights and passenger-fares, arrangements with express and transportation companies, running arrangements, etc. The commissioner is to examine the condition and management of roads, may inspect books and papers, require unsafe bridges and structures to be made safe, and stop the running of trains over the same if it is not done. Railroad companies are required to transport over their roads the cars and merchandise of other companies, and the commissioner may fix the com-

pensation where it cannot be agreed upon; and various other powers of railroad police are conferred upon him, and penalties provided for failure to observe his directions. Stephen S. Cobb was appointed commissioner under this act. Another important act of legislation was an amendment to the act of 1871, making the venders of intoxicating drinks responsible to the families of persons to whom liquors are sold by them. The amendment provides that "any owner or occupant of any house, dwelling, shed, or tenement, in which spirituous or intoxicating liquors are sold or bought, given away, or obtained for money, or otherwise, by means of any wheel, drawer, or any other device, for the purpose of evading the provisions of this act, shall be deemed the unlawful seller of said liquors, and shall be held responsible, and subject to all the liabilities, penalties, and provisions of this act; provided, in case the owner is not the occupant of any such building, he shall be entitled to twenty days' notice in writing of the existence of such wheel, drawer, or other device, for dealing out liquors, after which notice he shall be liable to all the fines and penalties of a liquor-dealer, under the act of which this is amendatory." Females were also made subject to imprisonment, if found guilty of violation of the prohibitory liquor-law. A State Board of Health was also provided for, consisting of Homer O. Hitchcock, Zenas E. Bliss, Robert C. Kedzie, Charles H. Brigham, Henry F. Lyshe, and John S. Goodman, with Henry B. Baber, as secretary. The secretary is made Superintendent of Vital Statistics, and is to collect statistics, and make and publish an annual report of births, marriages, and deaths. The corner-stone of the new State Capital was laid with imposing ceremonies, October 2, 1872, when an address was delivered by Hon. William A. Howard. Work progressed rapidly upon the building to the close of the year, and it is to be completed December, 1, 1877.

The salt manufactured during the year was 823,848 barrels, equivalent to 4,116,730 bushels, an increase of more than 500,000 bushels over the preceding year. The production of the copper-mines on Lake Superior for the year, was 18,514 tons; an increase of 3,848 tons over the preceding year, and being more than was ever before produced in a year. The indications of prosperous business continued to the close of the season. The iron shipped from the Lake Superior region was as follows: From Marquette, ore, 526,264 tons; pig, 25,997; from Escanaba, ore, 479,712; pig, 9,248; from L'Anse, ore, 60,899; total ore, 1,066,775 tons; pig, 35,245 tons. The first report of the Commissioner of Railroads only covers the year ending December 31, 1872, but as the office was established during 1873, and the facts reported do not appear in an official form elsewhere, they are given here. There were then thirty railroad corporations operating 2,976 miles of main line and branches within

the State. The cost of the road and equipment, allowing, where the road is only partly within the State, a proportion equal to the length, was \$115,391,015.38; operating expenses for the year, \$20,361,733.36; which were increased by other items of expense to \$21,959,621.08, or 68 per cent. of the gross earnings, which were \$31,998,253.61. Of the earnings 28 per cent. were from passengers, and 67 per cent. from freight. The total net earnings of those roads which may be said to have been in successful operation, amounted to about 6.3 per cent. of the total of their paid-up stock and debts. In operating the roads there were 146 persons injured, 64 fatally. Of these, 29 were passengers, only two of whom were fatally injured. The official information shows 333 additional miles of road to have been laid during the year 1873, making a total of 8,309, or one mile for about every 421 inhabitants, and every 17.6 square miles of territory. The use of air-brakes is now practically universal on all regular passenger-trains. The St. Mary's Falls Ship-Canal opened for the season May 5th, and closed November 18th. Passages made by sail-vessels, 1,549; by steam-vessels, 968; tonnage, 1,204,445. The most important shipments downward were copper, mass, 2,816 tons; ingot, 9,104 tons; stamp-work, 4,007 tons; manufactured, 20 tons; iron, ore, 504,121 tons; pig, 39,84 tons; silver-ore, 580 tons; fish, half-barrels, 9,228; wheat, bushels, 2,119,997; flour, barrels, 145,897. The business was considerably in excess of any former year. The manufacture of lumber was exceedingly active, and the business prosperous till near the close of the year. The whole production of pine-lumber is estimated at 2,600,000,000 feet. Prices were depressed in the last quarter, and the preparations for the manufacture in 1874 are much behind those of any year for some time. The stock on hand, however, is large, and a season of general prosperity is anticipated. Careful estimates lead to the conclusion that if the present destruction of pine continues unchecked for fifteen years, the stock of valuable timber will be substantially exhausted. The panic of September affected this State but little. The banks and bankers were generally in a sound condition, and no failures occurred, except two or three among the brokers, and in every instance the insolvency was of long standing. The losses by failures in Eastern cities were small. The mercantile community was generally found in sound condition, and the agricultural interest was prosperous, so that at the close of the year, unless in exceptional localities, money was easy, and, though trade was dull, there was no unusual distress or anxiety in business circles.

The reports of schools to the Superintendent of Public Instruction were from 70 counties, 941 townships and cities, and 5,521 districts. Number of children between the ages of five and twenty, 421,822; between eight

and fourteen, 181,604; number that attended school during the year, 807,014; of which 5,854 were under five or over twenty; average number of months school was taught, 7.07; volumes added to district libraries, 10,434; cost, \$13,380.98; number in libraries, 115,331; school-houses, stone, 80; birch, 641; frame, 4,246; log, 605; seating capacity, 399,067; value of school-houses and lots, \$8,105,391; number of graded schools, 812; teachers employed, males, 3,010; females, 8,940; average monthly wages, males, \$51.94; females, \$27.13; total wages, males, \$685,720.64; females, \$1,079,348.95; volumes in town libraries, 49,291; added during year, 4,731; cost, \$5,454.54; new districts organized, 244; number of private schools, 133; pupils attending same, 6,761; district resources for the year, \$3,743,352.70; made up as follows: On hand at beginning of year, \$530,580.27; two-mill tax, \$465,912.84; from primary-school fund, \$194,479.58; from tuition of non-resident pupils, \$31,199.81; from district taxes, \$2,095,220.17; from other sources, \$412,253.87; paid for buildings and repairs, \$597,006.68; for other purposes besides teachers' wages, \$788,902.96; on hand at close of school year (September 1st), \$594,467.18; indebtedness of districts at close of school year, \$1,707,700.16. The county superintendents made 6,377 visits to schools during the year, the town inspectors, 13,571; and the latter were paid for services, \$5,179.23. The reports of the superintendents of the poor for the year show the following facts: Paupers received into poor-houses, 3,798; average number supported, 1,482; number temporarily assisted outside, 13,785; cost of supporting paupers in poor-houses, exclusive of interest on cost of buildings, etc., and value of pauper labor, \$147,722.53; amount expended for temporary relief, \$158,089.25; whole amount expended from poor fund, \$403,096.18; number received into poor-houses who were insane, 412; idiotic, 196; blind, 47; mutes, 12; estimated value of county farms, buildings, stock, tools, etc., \$698,554.57.

The State-prison report shows the number of convicts at the beginning of the year, 589; received, 287; discharged by expiration of sentence, 186; by reversal, 4; by commutation, 4; on pardon, 17; died, 5; escaped, 5; remaining, 655; receipts from convict-labor, \$84,746.19; from other sources, \$8,244.12; total, \$92,990.31; expenditures, \$89,722.07; net income, \$2,572.13; average sentences of convicts, received, 3 years 7 months; besides 3 for life, and 1 indeterminate. The crimes punished against persons were 72; of which 1 was under second degree, 3 manslaughter, 13 rape, 2 seduction, 6 adultery, 13 felonious assaults; crimes against property, 215. Age of convicts, from sixteen to twenty-one, 65; twenty-one to thirty, 181; thirty to forty, 56; forty to fifty, 25; fifty to sixty, 4; sixty to seventy, 5; over seventy, 1; illiterate, 29;

can read only, 32; married, 93; unmarried, 194; second conviction, 11; third, 1; fourth, 3. The females in the prison have been transferred to the Detroit House of Correction. The general health of the prisoners has been good; the inspectors report their condition and discipline as satisfactory, and that there has been an absence of severe punishments. The convicts are allowed to be worked ten hours a day only. A prison library is being collected, and is made good use of, and books and magazines have been generally substituted for the allowance of tobacco, with the consent of convicts. The agent reports on this subject, "The idea that it" (tobacco) "is essential to the health of any man, and more especially for those who may have indulged in it for years, is one that I have but little respect for. After closely watching its effects for over two years, my convictions are only strengthened that it has no business in a prison, and, next to whiskey, I would prohibit it entirely. It has nothing to do with any man's health, only to destroy it, as most certainly the health of many of our men has improved, and not one, to my knowledge, has ever been injured by losing it."

The report of the management of the Asylum for the Insane at Kalamazoo shows:

ASYLUM.	Male.	Female.	Total.
Patients on January 1, 1873.....	164	140	313
Admitted during the year.....	89	75	164
Whole number treated.....	253	214	477
Discharged, recovered.....	19	7	26
" improved.....	16	8	24
" unimproved.....	15	5	20
Died.....	7	8	15
Total.....	57	28	85
Remaining, December 31.....	196	196	392

The number at the beginning of the year was all the institution could accommodate, but its capacity was increased by the partial opening of a new building erected as a "department for males," which was rendered necessary by the policy of the State, that all the insane shall be treated in public institutions. The building is expected to be completed and fully occupied within 1874, and thereafter the two sexes will be treated in two separate and distinct buildings. There will then be accommodations for 315 female and 288 male patients; the relative accommodations being proportioned to the demands made upon the asylum in previous years. Provision has also been made for the construction of a second Asylum for the Insane at some point in Eastern Michigan, which, when completed, will accommodate about 800 patients more. The Asylum for the Deaf, Dumb, and Blind, had in attendance, at the close of the year, deaf and dumb pupils, 154, of whom 72 were girls and 82 boys; blind pupils, 41, of whom 18 were girls and 23 boys. There is nothing new or peculiar in its workings.

The following is a summary exhibit of the financial transactions of the State Treasury during the fiscal twelve months closing on September 30, 1873:

Gross receipts to the State Treasury.....	\$3,192,431 52
Balance in Treasury October 1, 1872.....	971,224 03
Total for period.....	\$3,169,655 55
Gross expenditures during the same time..	2,314,942 11
Balance September 30, 1873.....	\$854,713 44
Showing a decrease in balance, and also an excess of expenditures over receipts during the period, of.....	\$123,510 54
As stated above, the gross Treasury receipts were.....	\$2,192,431 52
This covers the price of State swamp-land, expended in the construction of swamp-land State roads, being (not cash).....	223,170 01
Leaving for net cash receipts during the period.....	\$1,969,261 51
Of cash, there was received in trust.....	\$429,108 80
And from refunding and reimbursements.....	19,693 68
	448,802 48
Leaving for net cash receipts from legitimate sources of revenue.....	\$1,516,459 03
To this amount should be added amount received at General Fund, being a reimbursement of prior expenditures therefrom.....	11,542 15
Giving for entire receipts available for general purposes.....	\$1,528,001 18

The net cash revenue receipts were:

From direct taxes, \$928,452 23	
Specific taxes.....	358,226 80
Trust funds.....	185,184 99
	\$1,461,864 02
Miscellaneous.....	54,595 01
Total ordinary revenue receipts.....	\$1,516,459 03
To which add reimbursements as above.....	11,542 15
Giving for receipts for the fiscal period available for general purposes.....	\$1,528,001 18

The receipts were, through funds, as follows:

General fund from ordinary sources \$362,163 74	
do. reimbursed 11,542 15	
	\$373,705 89
Specific Tax Fund.....	358,226 80
Internal Improvement Fund..	300 00
University Fund.....	3,505 31
Normal School Fund.....	1,822 52
Primary School Fund.....	127,310 03
Agricultural College Fund....	29,583 47
Primary School five per cent. Fund.....	22,862 67
Escheats.....	100 00
Military Fund (sale of ordnance).....	568 50
	\$1,528,001 18
The cash receipts in trust were, through funds, as follows:	
General Fund.....	\$362,680 22
Specific Tax Fund.....	9,327 94
Internal Improvement Fund..	28,723 20
St. Mary's Canal Fund.....	29,271 85
Swamp-Land Fund.....	33,300 97
Swamp-Land Interest Fund....	3,786 68
University Interest Fund....	8,587 94
Normal School Interest Fund..	1,671 03
Primary School Interest Fund	51,307 39
Agricultural College Interest Fund.....	5,050 43
Asylum Fund.....	2,415 94
State Building Fund.....	740 15
Sundry Deposit Accounts....	2,236 06
	\$429,108 80

The gross expenditures, as stated above, were..... \$2,514,943 11
Which include amount of swamp-land warrants (not cash)..... 233,170 01

Leaving for cash expenditures..... \$2,081,772 10

There was expended from money received in trust... \$381,121 88

There was expended from money received as refunded, etc. 13,693 68
\$394,815 56

Leaving for amount expended from general revenue..... \$1,686,956 54

Of prior expenditures therefrom..... 11,542 15

Giving for aggregate expenditures for general purposes..... \$1,698,498 69

These expenditures were, through the several funds, as follows:

Gen'l Fund—General revenue.... \$632,401 85
Gen'l Fund—Reimbursements... 11,542 15

\$644,944 00
Internal Improvement Fund.. 62 79
University Interest Fund..... 29,797 61
University Aid Fund..... 150 00
Normal School Interest Fund.. 18,339 72
Primary School Interest Fund.. 145,923 01
Agricultural College Interest Fund..... 7,219 75
Asylum Fund..... 165,074 16
State Building Fund..... 127,839 96
Two Million Loan Sinking Fund..... 502,000 00
War Fund..... 32,350 00
Military Fund..... 6,314 53
Soldiers' Aid Fund..... 1,500 00
Dewey & Hazleton assets (on an old default)..... 2,133 16

\$1,698,498 69

The purposes for which the foregoing expenditures were made are as follows:

For salaries of State officers, deputies, and principal clerks..... \$34,032 53
Salaries of extra clerks..... 24,016 91
Awards of Board of State Auditors..... 154,314 54

Salaries and expenses of Judiciary..... \$312,365 03

55,034 38

Sundry expenses:

Trustees of Asylum..... \$447 13
Inspector of State-prison..... 1,133 30
Bureau of Insurance..... 1,335 96
Wolf bounties..... 288 00
Coroners' fees..... 1,644 10
Advertising and appraising
Salt-spring lands..... 19 30
Costs of suits..... 431 94
Dewey & Hazleton assets... 2,133 16

\$7,437 84

Military expenses..... \$6,314 53
Relief of soldiers..... 1,500 00
Bounties to soldiers..... 150 00

7,964 53

Interest upon bonded debt... \$117,748 42
Interest upon trust funds... 201,230 09
Interest upon internal improvement warrant..... 42 79

Principal of bonded debt (other than canal bonds)..... 502,000 00

Internal improvement warrant..... 20 00

General Fund appropriations.. \$296,701 49

Asylum Fund appropriations.. 165,074 16

State Building Fund appropriations..... 137,839 96

University Aid Fund appropriation..... 15,000 00

\$594,615 61

Aggregate expenditure as above..... \$1,698,498 69

The cash expenditures of money held in

trust were, through the several funds, as follows:

General Fund..... \$262,017 16
Internal Improvement Fund.. 23,723 20
St. Mary's Canal Fund..... 14,207 80
Portage Lake Ship-canal Fund 88 25
Swamp-Land Fund..... 5,466 31
Swamp-Land Interest Fund... 149 65
University Interest Fund.... 8,587 94
Normal School Interest Fund.. 1,671 03
Primary School Inter't Fund.. 51,307 39
Agricultural College Interest Fund..... 5,050 43
Asylum Fund..... 2,415 94
State Building Fund..... 740 15
Sundry Deposit Accounts.... 696 63

\$381,121 88

The principal of the bonded State debt, on September 30, 1873, stood at..... \$2,243,293 73

There has been paid since that date:

Through the Two-Million Loan Sinking Fund..... \$502,000 00
Through the St. Mary's Canal Fund..... 8,000 00
510,000 00

Leaving for amount of said debt outstanding, September 30, 1873..... \$1,733,293 73

The credit balance of the Two-Million Loan Sinking Fund, September 30, 1872, was... \$902,568 23
The credit during the fiscal year..... 209,453 42

Available during year... \$1,012,021 65
Deduct amount of bonds paid therefrom..... 502,000 00

Balance of Two-Million Loan Sinking Fund, September 30, 1873..... \$510,021 65
Add from credit balance of Canal Fund, September 30, 1873, amount of canal bonds outstanding..... 73,000 00
\$583,021 65

Leaving for debt in excess of amount in sinking funds..... \$1,150,271 13

The State tax for the year, as apportioned, was of amounts and for purposes as follows:

Agricultural College..... \$37,398 00
Asylum for Insane (Kalamazoo)... 69,000 00
Asylum for Insane (new)..... 100,000 00
Institution for the Deaf and Dumb and the Blind..... 46,000 00
Military..... 33,382 50
New State Capitol..... 200,000 00
State-prison building... 50,000 00
State Public School..... 43,000 00
State Reform School..... 33,950 00
University Building and deficit..... 38,000 00
University aid..... 31,500 00
General purposes..... 300,000 00

Total amount apportioned \$982,230 50

MILL, JOHN STUART, an English philosopher, political economist, and statesman, born in London, May 20, 1806; died at Avignon, France, May 8, 1873. He was the son of James Mill, an Examiner of Indian Correspondence in the East India House, the author of "The History of British India," and "The Phenomena of the Human Mind." The senior Mill was a friend and admirer of Jeremy Bentham, and though originally designed for the ministry in the Scottish Church, and indeed educated for it, and licensed to preach, had not only abandoned the faith of his childhood, and become a disbeliever in all religion, doubtless in perfectly sincere conviction of its error,

but was an active propagandist of this system of unbelief. He had supported himself by authorship and literary labor until 1819, when he received an appointment in the East India House. This stern, opinionated, yet learned philosopher, was unwilling that his eldest son should be educated in the ordinary way, and was, perhaps, also unable, had he been so disposed, to give him the advantages of a university education. He therefore determined to teach him himself, and, though a man of impatient and exacting temper, he carried out his purpose from the child's birth till his fourteenth year, with a fidelity and persistency which were characteristic of the man. In some respects, the education thus attained was a good one; in others it was very objectionable, and its results in a youth of less gentle and patient temper could hardly have failed to be ruinous. The boy commenced the study of Greek at three years of age, and though there were at that time no Greek lexicons except those with Latin definitions, and he knew nothing of Latin till several years later, he had, at the age of eight years, read not only all the Greek authors of the university course, but many others, and had analyzed and reported what he read daily to his father. At eight years of age he began the study of Latin, and, as he had already been studying and analyzing Greek, Roman, English, and universal history, he was soon after put into mathematics, logic, rhetoric, political economy, and metaphysics. In these latter studies he was drilled very thoroughly, and the Benthamite philosophy was assiduously inculcated, while, in political economy, the works of Adam Smith and Ricardo were critically analyzed. With all this instruction, his father took the utmost pains to prevent him from having any religious ideas whatsoever. He taught him that it was impossible to ascertain any thing in regard to the origin of the earth and of human beings, and that the question, "Who made me?" could not be answered, as any attempt at answering it by the assertion of a Creator, only pushed the inquiry one step further back, to the question, "Who made God?" At the age of fourteen, then, John Stuart Mill was a boy of uncommon attainments in the classics, in logic, rhetoric, political economy, metaphysics, and history, well-versed in mathematics and physical science, with no ideas of a God, or of any religious belief; shy, and wholly unaccustomed to association with children of his own age, and ignorant of many practical matters, and of much information on common subjects, ordinarily possessed by boys of that age. In 1820 he went to France, where he resided for upward of a year, making himself master of the French language, and occasionally attending public lectures on science. He lived for some time in Paris, in the house of the French economist, Jean Baptiste Say, where he made the acquaintance of many men distinguished then or afterward in politics. He

spent part of his time in the south of France, in the house of Sir Samuel Bentham, brother to Jeremy Bentham. During this stay in France he laid the foundation of his great familiarity with and interest in the politics as well as in the literature of the French nation. In 1823 he entered the India House, and became a clerk in the Examiner's office, where his father was Assistant Examiner. For thirty-three years he continued to be occupied in the department of the office named the Political, or the transactions of the company with the native states; although he occasionally acted in other departments, as Public Works and Education. In 1831 he was appointed Assistant Examiner, and he held that office till 1856, when on the retirement of the Examiner, he was placed at the head of the department. He was understood to have energetically assisted the directors in opposing the measure for the transfer of the India Government to the crown, which was carried in 1858. He was offered by Lord Stanley a seat at the new Indian Council, but declined on the score of failing health, and retired from office in October of the same year on a compensating allowance.

While this was the course of his official and in some sense public life, Mr. Mill maintained through all the fifty years which elapsed from his first appointment to a place in the East India House to his death, a distinct philosophical and social life, but very slightly if at all influenced by his official position. His labors in the East India Office were not, in general, very burdensome, and left him time for other intellectual pursuits, which he diligently improved. At first, entering as he did into official position at the age of seventeen, he was an ardent Benthamite, and, with a little coterie of from six to ten persons, was accustomed to meet once or twice a week at Bentham's house to discuss his philosophical theories. Two or three years later he became a member of a debating club composed of many of the most brilliant young men of that period, including such men as Macaulay, Grote, Roebuck, Thirlwall (afterward a bishop), Pried, the two brothers Bulwer, Lord Poulett Thomson, Sam. Wilberforce (afterward bishop), Albany Fonblanque, John Sterling, F. D. Maurice, etc., and in this society questions of politics, political economy, psychology, and moral science, were ardently and earnestly debated. Under their influence in part, and in part also from his own reasonings and reflections, he began to drift away from the philosophical theories of his father and Mr. Bentham, and to incline somewhat to the Positivist system enunciated about that time by Auguste Comte. But though accepting some of Comte's positions, Mr. Mill never became fully a Comtist. Against some of his views he protested earnestly, and to others he gave only a partial assent. As he himself confesses, he had no complete system of philosophy to offer; he was only dissatisfied in some particulars with all; the negations to

which he had bound himself in religion exerted their influence over his philosophy also, and after reading his criticisms on Comte, on Hamilton, Reid, and other eminent philosophers, the reader who accepts his conclusions only finds that he has been instructed what *not* to believe.

In other departments of science, Mr. Mill's contributions possess the highest value. His treatise on logic is an acknowledged and standard authority; his essay on "Liberty," one of his finest productions, has a world-wide reputation; his "Treatise on Political Economy," though in some points marred by a prejudice against the aristocratic classes, is yet the most remarkable contribution to that science ever published; and his "Considerations on Representative Government" are very clear, able, and just. We might specify other of his works which belongs to the highest class of political writing, but these are sufficient to show the ability and intellectual grasp of the man.

Mr. Mill states in his autobiography that one of the influences which had most to do with his mental progress at this and the subsequent portions of his career was his acquaintance with the lady who twenty years later became his wife. Mrs. Taylor, the lady referred to, was, in 1830, when he first met her, but twenty-three years of age. She was married to a gentleman of fortune, a brave, honorable, and pure-minded man of good education, but not in all respects of kindred tastes with herself. She was a woman of great beauty and wit, of quick intuitions, and a mind of such rare receptivity that she could make the thoughts and ideas of others her own, and dressing them in her own felicitous phrases, so disguise them that their originators did not recognize them. Between this lady and Mr. Mill there grew up such an intimacy, that their minds seemed to be but one. He was her constant visitor, and they prosecuted their literary labors together for years. Mr. Taylor having died in July, 1849, she married Mr. Mill in 1851, and died very suddenly in the spring of 1859. There is not in the literature of ancient or modern times a eulogy so eloquent yet so extravagant as Mr. Mill has written in his autobiography, of this gifted lady. Upon her he bestowed all the attributes of a goddess, and lacking the cognition and reverence which most men manifest for the Supreme Creator, he renders to her the homage and worship which would naturally ascend to the Divine Being. That she possessed rare gifts, a lofty courage, and quick perception, was undoubtedly true, but it was obviously impossible that they could have worked together so harmoniously and with such perfect sympathy, had she not possessed the faculty of mirroring his thoughts in such a brilliant fashion that he did not recognize them.

Mr. Mill became an author at a very early age, and besides a considerable amount of periodical writing produced an extensive and important series of works. His first publications

consisted of articles in the *Westminster Review*, and in 1827 he edited Bentham's work entitled "Rationale of Judicial Evidence." He took an active part in the discussions that followed the Revolution of 1830 in France, and the Reform Bill movement in England, and from 1835 to 1840 was editor and, along with Sir W. Molesworth, proprietor of the *London and Westminster Review*, where many articles of his own appeared. In 1843, he published his "System of Logic;" in 1844, "Essays on some Unsettled Questions of Political Economy;" in 1848, "The Principles of Political Economy;" in 1859, an essay on "Liberty," and "Thoughts on Parliamentary Reform;" in 1860, a selection from his contributions to reviews under the title of "Discussions and Dissertations;" in 1861, "Considerations on Representative Government;" in 1862, a small work on "Utilitarianism;" in 1865, "Auguste Comte and Positivism," and "Examination of Sir William Hamilton's Philosophy." "Inaugural Address, delivered to the University of St. Andrew," in 1867; "England and Ireland," in 1868; and an essay, entitled "The Subjection of Woman," in 1869. His "Autobiography" was published after his death. In 1865 the Liberal electors of Westminster, one of the great metropolitan boroughs, proposed Mr. Mill as candidate for Parliament. He was opposed by the Hon. Robert Grosvenor, who made liberal professions, and exercised great influence as a property-owner. Leaving the conduct of the election to his friends, Mr. Mill did little more than attend a few meetings, where, after giving a brief address, he would invite any one who wished to learn his opinions on current topics to submit his questions. This invitation was readily accepted, and he was plied with inquiries which he answered with a manly candor. On election-day the polls were attended by volunteers, principally young men, and at evening, when the votes were counted, to the surprise of every one it was found that the wealthy, aristocratic candidate was beaten, and Stuart Mill was elected a member of the House of Commons. During the three years of his parliamentary career Mr. Mill attained great distinction and popularity. He supported the Liberal measures, except the ballot, and was one of the most active advocates of woman suffrage. Mr. Mill, who had previous to entering the House lived in seclusion, all at once became the most popular man in England among the working-classes, and inspired the warmest attachment among his followers. Some of the causes of this popularity of a man least constituted to be a democratic leader are thus told by Justin McCarthy in his "Modern Leaders:" "There is something fascinating about the singular blending of the emotional, and even the romantic, with the keen, vigorous, logical intellect which is to be observed in Mill. Even political economy, in Mill's mind, is strangely guided and governed by mere feeling. Some-

body said he was a combination of Ricardo and Tom Hughes—somebody else said, rather more happily, 'I think that he is Adam Smith and Fénelon revived and rolled into one.' * * *

The admirers of Mr. Mill are, therefore, not unusually somewhat given to exalting admiration into idolatry. The classes who most admire him are the scholarly and adventurous young Radicals who have a dash of Positivism in them; the extreme Radicals who are prepared to go any and all lengths for the mere sake of change; and the working-men." At the general election of 1868, Mr. Mill, yielding to the request of his friends, was again a candidate for the House of Commons; but he had lost many supporters by his efforts to reform the municipal government of London, and, as there was also a second Liberal in the field, he was defeated, and Mr. Smith, the great news-vender and Tory candidate, was elected. Mr. Mill's popularity, however, did not wane. About a month before his death, he delivered an important speech on land reform, and seemed marked out to be the leader in the political strife to which that question will inevitably give rise. After the death of his wife who was buried at Avignon, France, Mr. Mill always resided there the greater part of the year. He himself says in his autobiography: "I bought a cottage as close as possible to the place where she is buried, and there her daughter (my fellow-sufferer and now my chief comfort), and I live constantly during a great portion of the year. My objects in life are solely those which were hers; my pursuits and occupations those in which she shared, or sympathized, and which are indissolubly associated with her. Her memory is to me a religion, and her approbation the standard by which, summing up as it does, all worthiness, I endeavor to regulate my life." In his private life he was a man of gentle and amiable disposition, modest and somewhat shy in manner, of strong affections and earnest sympathies, and of the most blameless and pure life. He had a strong sense of justice, and was unwilling ever to do any thing which might even seem to injure or grieve another. He was generous and liberal to a fault. A singular instance of his liberality is given by Mr. Herbert Spencer, who relates that when at one time the demand for his works was so small that he had resolved to discontinue their publication, Mr. Mill came forward with a proposition to bear the expense of their publication himself, that they might be continued, while at the same time he was aware that Mr. Spencer was combating his own views. His health had not been good for some years, but he died from acute disease after a sickness of not more than a week.

MINNESOTA. The Legislature of this State met at St. Paul on the 7th of January, 1873.

As large portions of the State are settled by immigrants from Europe, belonging to different nationalities, and forming, as it were, distinct

communities, a resolution was offered in the Senate on the 24th of January, providing for the printing of the Governor's message—with 1,000 copies in English, 1,000 in Norwegian, 1,000 in German, and 1,000 in Swedish; to which amendments were successively made, adding 1,000 copies in Welsh and 1,000 in French, when the resolution passed.

The Legislature adjourned *sine die* on the 7th of March, having continued sitting sixty days, the time allowed for the annual sessions by the statute.

Very numerous laws were enacted during this session, relating to matters of general as well as local or personal interest, besides bills on many subjects, after long and repeated debates, were, on the final vote, rejected, or indefinitely postponed, not a few of those being apparently of great public importance, as the resolution to submit to the people the question of a convention to revise the constitution of the State; the bill to provide for universal compulsory education, and to prevent truancy; the bill to fix the rate of interest; the temperance bill; the resolution to appoint a joint committee to inquire into what legislation was needed to prevent or restrain monopoly and extortion in railway transportation; the bills respectively providing for the establishment of reasonable maximum rates for the transportation of passengers, and regulating the rates of freight on the different railroads in the State.

Among the acts passed a very large proportion relate to internal improvements in various ways, but chiefly to roads and bridges, and other means of facilitating communication between distant places by land or water. The following are the titles of some among the acts passed: Proposing an amendment to section 2, article 4, of the constitution, providing for biennial sessions of the Legislature (instead of annual, as they now are); amending the law which exempts \$50 of the laborer's wages, by repealing the proviso which makes a distinction between married and single; to provide a more efficient method for taking depositions out of the State; limiting the rate of speed to six miles an hour where the railroad is not fenced; authorizing non-resident railroad companies to extend their lines into the State; compelling railroad companies doing business in the State, to keep a general office in the State; to establish a fund for the support of a State Inebriate Asylum from a special fund to be created by a special tax upon saloon-keepers. Also, in certain northern counties of the State, to encourage the planting and growing of trees in the State.

Among the resolutions adopted to facilitate navigation on the several rivers in the State, and in other waters, that regarding the harbor of Duluth, at the head of Lake Superior, seems to deserve a particular mention, as that city has expended considerable sums of money on a dike and canal about the harbor; but her

works have met with decided and strenuous opposition on the part of the State of Wisconsin, so that the matter was made the subject of a lawsuit, and carried to the Supreme Court at Washington.

The following preambles and resolution were adopted in both Houses almost unanimously, the vote having been, in the Senate, yeas 30, nays 4; in the House of Representatives, yeas all except one:

Whereas, By authority of the Legislature of this State, by large grants of land and liberal privileges granted to the Lake Superior & Mississippi Railroad and Northern Pacific Railroad Companies, constructed to their natural and most eligible connection with the waters of Lake Superior, in the State of Minnesota; and—

Whereas, The expectations of this State are now being rapidly realized by the cheapening of rates of transportation by the construction of said roads, and by perfecting and developing the harbor system at the head of Lake Superior, thus organized by the policy and Legislature of the State; and—

Whereas, The city of Duluth, in the furtherance of this policy, has acted in conjunction with, and under the direction of, the War Department; expended large sums of money in the improvement of said harbor, by constructing a canal through Minnesota Point, and construction of a dike across Superior Bay, said works of improvement being wholly within the State of Minnesota; and—

Whereas, The State of Wisconsin, by various acts of unfriendly legislation, and interested political and official influence, is attempting to destroy and render useless said harbor, thus made at great expense, and under warrant and direction of the War Department of the United States; and—

Whereas, The maintenance of policy and harbor system is eventually required to make a safe and commodious harbor at the head of Lake Superior, as well as to make, hold, and protect, the only port and harbor of this State on said lake: therefore—

Resolved, By the Senate and House of Representatives, That the Governor be authorized to take such necessary steps as will protect the interests of the State of Minnesota in the premises, and command the services of the Attorney-General in any action instituted affecting said harbor system, and retain and employ such other able counsel as he may deem advisable, and otherwise act as in his judgment may fully and completely protect the interests of the State and harbor of Duluth in said matter, and that the sum of ten thousand dollars, or so much thereof as may be necessary, and the same is hereby appropriated out of any moneys in the public Treasury, not otherwise appropriated, for the purpose of defraying any expenses that may be incurred in carrying out the foregoing resolution, the same to be paid out on the order of the Governor.

Of all the measures acted upon by the Legislature during the session of 1873, the greatest importance has been attached to its action in regard to the State Treasurer.

The chief points of this action and its results are as follows: On February 1st the following resolution was adopted in the Senate:

Resolved, That a committee of three be appointed to investigate and ascertain whether the surplus funds reported in the Governor's message are in the vaults of the State Treasury at the Capitol, or loaned to banks or individuals, and if so loaned, at what rate of interest, and whether said interest is paid into the State Treasury, and if not into the State Treasury, to whom paid, and what disposition has been made of the funds during the last fiscal year,

and report the result of such investigation to the Senate at an early day.

The House of Representatives adopted a resolution calling for the Treasurer's annual report.

This latter resolution the Treasurer answered by a written communication to the House on the 4th, stating that the manuscript of his report had been handed to the State printer as early as the 4th of the preceding January; that the printer had been hindered by a crowd of business, but would distribute it within a week.

On February 6th, the chairman of the Senate committee offered a resolution empowering the committee to send for witnesses, books, and papers, administer oaths, and compel the attendance of witnesses, and asking for the appointment of two additional Senators upon the committee, which was adopted, and the two additional Senators were appointed. By another resolution, adopted on the 10th, the said committee was allowed an assistant sergeant-at-arms for the purpose of subpoenaing witnesses, and other services. This committee subsequently reported that the State funds were not in the place and condition required; expressed dissatisfaction with the manner in which the Treasurer had met and answered their questions, and submitted recommendations calculated to secure order and safety in the management of the Treasury. The report was adopted, and referred to the Committee on Finance, with instructions to report a bill covering the said recommendations.

The Committee on Finance shortly after reported two bills. On the 27th a Senator pointed out some defects in these bills, and, saying that an effort should be made to correct the irregularities and abuses which had been shown to exist in the Treasury Department, offered, in lieu of them, two substitutes, one of them creating a Board of Audit for immediate action; the other fixing the salary of the Treasurer at \$8,000 per annum. These substitutes were read, and referred to the Judiciary Committee.

In the House of Representatives a resolution was offered on February 26th, "that William Seeger, Treasurer of the State of Minnesota, be impeached for corrupt conduct in office, and for crimes and misdemeanors." On the following day a substitute by way of amendment was offered, turning the resolution of impeachment into one of censure. This substitute consists of two resolutions, the substance of them being respectively, "that the State Treasurer * * * was flagrantly neglectful of his official duty in concealing the delinquency of his predecessor from the proper officers of the State government; and that no ties of family relationship can be held to justify the concealment of such official delinquency; and further, that the past management of the State Treasury as expressed by the Senate committee of investigation calls

for and demands at the hands of the representatives of the people, unqualified censure and condemnation;" and "that * * * the loaning of the State moneys to, or the depositing them with private persons, even the bondsmen of the State Treasurer, upon the implied security of their official bonds, is hazardous to the safety of the public moneys, and the Legislature should, by legal enactment, make and declare the same to be 'contrary to law,' as the constitution plainly makes it the duty of the Legislature to do, and should visit violations of the act with the severest penalties." After a protracted debate the substitute was adopted by a vote of yeas 75, nays 27, whereupon the original resolution, as amended, was passed yeas 75, nays 26.

On the 4th of March, 1873, the same representative who had proposed the two resolutions just referred to, offered the following, which was adopted:

Whereas, The 27th of last February inst., the House did by an emphatic majority pass resolutions censuring and condemning the conduct and management of the State Treasury; and—

Whereas, This House has delayed further action in the premises in order that the Treasurer of the State might recognize in the sentiment of the said resolution an imperative demand upon him for the tender of his resignation of his public trusts, and that in the opinion of the House a sufficient and reasonable time has transpired without any indication having been received of any intention on his part so to do; be it therefore

Resolved, That William Seeger, the present State Treasurer, be and hereby is requested to answer the imperative demands of the people in an immediate tender to the Governor of the State of his resignation of the trusts placed in his hands.

Resolved, That the Chief Clerk of the House serve a copy of the foregoing resolutions on said William Seeger forthwith.

To these resolutions the Treasurer gave the following answer:

I am in receipt of the resolution passed by your honorable body on March 4, 1873. I most respectfully decline to comply with the demand embodied in that resolution.

I most respectfully decline to stigmatize my administration of the Treasury by resigning my office under the circumstances which have transpired.

It is not pretended that I have ever perverted one cent of the moneys of the State to my own use. Every dollar which has ever come into my hands has been faithfully accounted for. I found when I came into office the Treasury was depleted by a large deficit; and that deficit has been made good during the first year of my term. My successor will receive it all.

If this were simply the question of giving up the office, I would not hesitate one moment, but my reputation as a public officer has been impugned, when I had no opportunity to be heard.

I am conscious of no wrong done by me. What I have done may be made the subject of judicial inquiry, and I am ready to meet that inquiry and its consequences before any tribunal.

I have the honor to be, your obedient servant,

WM. SEEGER, State Treasurer.

As soon as the reading of the Treasurer's letter was concluded, one of the representatives introduced the following resolution: "*Resolved*, That William Seeger, Treasurer of Min-

nesota, be impeached for corrupt conduct in office and for crimes and misdemeanors." A call of the House was then, on motion, ordered, and after a warm debate, the resolution was adopted, yeas 71, nays 32.

During the debate on this resolution, the most prominent among those who voted for impeachment declared that they had nothing against the Treasurer personally; one even averred that he "is known to be one of the most honest men in the State;" that it was not Mr. Seeger they sought to punish, but to establish a precedent; that he must hold the Treasurer's office no longer; that, after the passage of the resolution of censure, it was understood, and the majority of the House hoped he would resign, and even requested him to resign by an express resolution; that since he refused to resign, impeachment was the only means by which he could be removed from office.

A resolution was then adopted, whereby a committee of five was appointed "to go to the Senate and at the bar thereof, in the name of the House of Representatives and of all the people of the State of Minnesota, to impeach William Seeger, Treasurer of the State of Minnesota, of corrupt conduct, and of crimes and misdemeanors in office, and acquaint the Senate that the House of Representatives would in due time exhibit particular articles of impeachment against him and make good the same; and should demand that the Senate take order for the appearance of said William Seeger, to answer to said impeachment." The Senate entertained the charges, and through a special committee of three informed the Governor of it, that he might take such action as was required by the constitution of the State and the exigencies of the occasion.

A committee of five appointed by the Lower House drew up articles of impeachment in form to the number of four; each having one or more specifications relating to it. They were submitted to that body at the morning session of March 6th, when they, together with their respective specifications, were agreed to yeas 61, nays 35.

The day for the trial, after a protracted discussion, was fixed for the third Tuesday in May (the 20th).

On the 18th of March Mr. Seeger tendered his resignation of the Treasurer's office to the Governor, in writing, the resignation to take effect from the 1st day of April next ensuing. He states the reasons which induced him to resign, the principal among them being the information he had recently received, "that counsel fees and other expenses would require an expenditure by him of \$5,000 or \$6,000, which would reduce his family to penury;" and that "he believed himself already acquitted in the minds of all fairly-disposed men." The Governor accepted the resignation on March 26th.

The Senate met as a court of impeachment

on the 21st of May, instead of the 20th, as by adjournment.

One of the Senators having proposed the question whether a plea of "not guilty" was to be entered, the President said that Mr. Seeger had by his absence, both in person and by counsel, practically defaulted, and he supposed that the case rested with the managers. Upon this the chairman of the Board of Managers said that the accused having resigned his office, and the Governor accepted his resignation, the case had thereby undergone a material change; and that in view of these facts the Board of Managers thought best to offer some testimony setting forth the facts referred to, and then submit the question to the Senate "whether it was expedient to proceed further in the case or not." He then presented certified copies of Mr. Seeger's resignation, and of its acceptance by the Governor, and asked that they might be read. The motion was strenuously opposed by a number of Senators, who maintained that the case and the right and duty of the Court to proceed in it, remained the same after the impeached Treasurer's resignation and its acceptance by the Governor, as they were before it. One of them offered the following resolution: "*Resolved*, That this court will receive no evidence concerning the resignation of William Seeger," which, though objected to by several members of the court, was adopted by a vote of yeas 26, nays 10.

The chairman of the Board of Managers then moved "that William Seeger be found guilty without further proceedings," on the ground that by having failed to file an answer to the impeachment within the time granted him, and by his subsequent non-appearance, he was in contempt of the court; and chiefly on the ground that in his letter of resignation, a certified copy of which the said chairman introduced as a part of his motion, Mr. Seeger admitted that three of the charges made against him in the articles of impeachment were true, and therefore the plea of guilty should thereupon be entered.

The motion was opposed, and one of the Senators offered the following resolution:

That the motion offered by the Board of Managers, that a plea of guilty be entered against William Seeger, be denied;

which was adopted by a vote of yeas 24, nays 12.

Before the examination of witnesses could be commenced, counsel for the accused appeared before the court, and, on being recognized as such, said that he desired to enter for William Seeger the plea which he held in his hand, and which, by the direction of the President, he then read. It is a document signed by Mr. Seeger before a notary public on May 22, 1873, containing a literal transcript of the above-cited four articles of impeachment as preferred against him by the House of Representatives, and under each of the articles he

entered the plea of guilty "in the manner and form as in said charges and specifications alleged;" concluding the plea under each charge with the following words: "And he further says that while he committed the several acts therein charged, the same were done without any corrupt or willful intent." The motion of entering this plea met with decided opposition on the part of the Senators, who affirmed that the second part of the plea excludes the first, in that, if he had no willful intent in committing the act charged, he could not be guilty as he wanted to plead. One among the Senators observed that Mr. Seeger's denial that the acts were wrongfully committed was merely a surplusage in the plea; and the legal deduction was that the charges were sustained, and the plea of guilty should be entered. This sentiment seems to have finally prevailed, as the proposition of allowing the plea of guilty to be entered being finally put to the vote, it was carried by a majority without proportion, yeas 33, nays 4.

The Senate then proceeded to vote on the four articles of impeachment preferred, with the result that William Seeger was found guilty on all of the four charges, two-thirds and more of those voting having voted affirmatively on each of them.

The judgment of the court was thereupon rendered in the words of the following resolution, which after a short debate was adopted by all of the Senators, except one who voted "No:":

Resolved, That as the judgment of this Court William Seeger be, and he is hereby, removed from the office of Treasurer of the State.

The Senator who had proposed the foregoing resolution, then offered another, purporting to disqualify William Seeger from holding office, but stated that he offered it because the rules adopted made it important that such a resolution should be voted upon. Some remarks were made on this resolution by several Senators, and also by Mr. Seeger's counsel, when it was put to the vote, and rejected unanimously.

The court then closed its session by adjourning *sine die*.

The appropriations made by the Legislature of Minnesota at the session of 1873 for public buildings and institutions, and a variety of other objects, were very numerous.

The snow-storm which occurred in Minnesota at the end of the first weeks of the year 1873, for degree of violence, length of duration, and amount of injury done, especially to animal life, far exceeded any similar event in the past as remembered by the oldest residents. Its fury rose to the highest pitch from the commencement, and continued without sensible abatement for more than fifty hours, and was accompanied from beginning to end with so intense a cold as speedily to extinguish life, if not well protected from its impression. Its victims were very numerous, because it fell on

the country suddenly, when many people encouraged by the comparatively mild weather which then prevailed, had gone abroad with their teams for business purposes, and some for pleasure. Being caught by the storm in the open country, a large number of these miserably perished, together with their teams, stiffened to death before they could reach a place of safety; one among the remarkable peculiarities of this storm being that the abundance of the fallen snow instantly obliterated all traces of roads, while that still falling by the extreme force of the tempest concealed all surrounding objects from view, rendering even houses, or any other place of shelter, however near at hand, entirely invisible.

The loss of life and great bodily injuries caused by the storm were all found to have occurred in thirty-one of the seventy-two counties in the State as ascertained up to March 5th; the summary of their total numbers being, respectively, as follows:

Frozen to death, and bodies found.....	61
Missing, and supposed to be frozen to death.....	7
Died within a short period of amputation.....	3
Total.....	70
Injured by reason of either partial or entire loss of hands or feet.....	31
Total casualties.....	101

The loss of live-stock frozen to death during the said storm is given as follows:

Head of horned cattle.....	250
Head of horses.....	25
Head of mules.....	3
Head of sheep and hogs.....	10

It is possible, however, that the entire loss of stock, could it be known, would be at least half as much again as these figures.

On July 16, 1873, the Republican party of Minnesota held their State Convention at St. Paul, for the purpose of nominating candidates for Governor and the other State officers.

Mr. W. D. Washburn was nominated for Governor; for Lieutenant-Governor, A. Barto; for Secretary of State, S. P. Jennison; for State Treasurer, M. Grinager; for Attorney-General, George P. Wilson.

The following resolutions were adopted by the convention without debate:

Resolved, That the Republican party continues to be the party of progress and reform; that while pledging itself anew to the great principle of universal freedom and equal human rights with which it has triumphed in the past, and which it has permanently incorporated in Government, State and national, it meets boldly new questions as they arise, in the same spirit of devotion to the rights of the people, irrespective of class or condition, and that it presents the first example of a great party wise and just enough to correct its own errors and abuses.

Resolved, That whereas the Republican party has ever been the friend of the oppressed—securing freedom to the slave, giving a home to the landless, obtaining from European countries recognition of citizenship here for adopted citizens—it now greets with a hearty sympathy and an extended hand to help every movement to secure to agriculture and labor their due influence, interest, and rights.

Resolved, That the producing, commercial, and industrial interests of the country should have the best and cheapest modes of transportation possible, and while capital invested in such means of transit, whether by railroad or otherwise, should be permitted the right of reasonable remuneration, all abuse in their management, excessive rates, unjust or oppressive discriminations against localities, persons, or interests, should be controlled by law, and the people should be protected from such wrongs, and all improper and arbitrary use of the growing power of railroad and other corporations.

Resolved, That, in our opinion, no rights should be vested in railroad corporations beyond the control of future legislation, and that such laws should be enacted as will limit to just and reasonable rates, all tolls, freights, and charges, of railroad and transportation companies, and protect the people from imposition; and that the Legislature should attach such conditions to all new grants, and the amendments or extension of old charters, as will place the rights of legislative control over such corporations beyond all question.

Resolved, That we heartily applaud the active measures of the late Congress in ferreting out and exposing corruption. We have seen with profound regret, in the developments made thereby, evidence of political and official corruption and the abuse of responsible positions by men of all political parties, to further personal ends, and we demand pure official conduct and the punishment of unfaithful public men, State and national, who, having betrayed the confidence freely extended to them, shall not be shielded from the disgrace of their acts by any partisanship of ours; and we denounce all Credit Mobilier transactions, whatever be their form. That we heartily indorse the action of the late Legislature in investigating and reforming the abuses in the office of State Treasurer.

Resolved, When retrenchment is required to lighten the burden of taxation and to continue the reduction of the public debt, an increase of salaries is unwise. We condemn without reserve the voting for or receiving of increased pay for services already rendered, and demand that the provisions of the late act of Congress by which the salaries were increased should be promptly and unconditionally repealed.

Resolved, That the wise, patriotic, and efficient administration of Governor Horace Austin entitles him to the unqualified approbation of the whole people of this State. That the able and faithful discharge of the responsible duties of the office of Attorney-General by the Hon. F. R. E. Cornell merit the highest public commendation.

Resolved, That in view of the recent decision of the Land Department at Washington in favor of certain railroad companies, and against a large class of settlers upon a portion of the public lands in this State, whereby great injury and suffering are likely to result to such settlers, this convention earnestly requests such action on the part of our Senators and Representatives in Congress as shall secure the honest settler against any loss or injury as far as possible.

A new party, commonly styled "the Anti-Monopoly party," composed chiefly of farmers and mechanics, has been in progress of organization since the beginning of the year 1873. In accordance with an announcement previously published, this Party assembled in State Convention at Owatonna on the 2d of September, and nominated candidates for State officers.

Another association called "The Patrons of Husbandry" has been organized in Minnesota, its objects being "the social, intellectual, and

financial regeneration of the class." It has adopted by-laws for its regulation, one of the principal among them being "Not to meddle in politics." Its members are distributed into Granges located in the several sections of the State. As some of the Granges, upon the announcement of the Anti-Monopoly Convention to be held on September 2d, appointed delegates to represent them in it, which was in contravention of the by-laws referred to above; the chief of the association reminded them of their duty, and to the penalty attached to its infraction, by issuing the following circular letter:

STATE GRANGE OF MINNESOTA,
WINONA, MINN., August 8, 1878. }

To Subordinate Granges of Patrons of Husbandry of
the State of Minnesota :

It has come to my knowledge that certain Granges in this jurisdiction have appointed delegates to a political convention to be held at Owatonna on the 2d day of September next. I deem such action not only unwise, but in direct violation of the fundamental law of our Order, and that it subjects the Granges so doing to the danger of a revocation of their charters.

Individual patrons are under no restrictions whatever in their religious or political conduct. County councils are not recognized as belonging to the Order, or subject to its laws. We lay no claim to any control whatever over so-called Farmers' Conventions. But Granges of Patrons of Husbandry are prohibited by the law which gives them existence from engaging in either religious or political action or discussion. This prohibition is imposed for the best and wisest of purposes. It is our only safeguard against sure and speedy destruction. Upon obedience to this law depends our very existence as an Order.

It is with profound regret and mortification that I have witnessed this departure from our cherished principles. Just as success is within our grasp, and our labors are about to be rewarded by an abundant prosperity, are we to forget our mission and barter away our beloved Order for a mess of political potages? Are we to lose sight of the grand objects before us—the social, intellectual, and financial regeneration and elevation of our class, which should make our Order perpetual—for any considerations of temporary advantage, or of doubtful expediency? Patrons, let us stand firm to our principles.

I call upon the offending Granges to retrace the false steps taken; to recall their delegates elected to the convention above named, and reconsider their resolutions. I call upon the Granges in this jurisdiction "to conform to and abide by" the constitution, rules, and regulations of the Order, and to refrain from all political action or discussion.

GEO. J. PARSONS.

The Democrats and Liberal Republicans of Minnesota met on the 24th of September, at St. Paul, for the purpose of holding a joint State Convention to nominate a State ticket.

The delegates, numbering above 250, met at the appointed place and time, but made no nominations.

The chairman of the Committee on Resolutions then presented the following report, which was adopted:

Resolved, That the Liberal Republican and Democratic parties in State Convention assembled, willing to forego all party predilections for the general welfare, and to join with patriotic citizens of all parties to rescue the State and nation from their great peril,

deem it best, in the present emergency, to make no nominations of a strictly party character, but recommend all Democrats and all Liberal Republicans to yield a cordial support to the nominees of the Owatonna Convention.

The same chairman of the Committee on Resolutions also offered the following:

Resolved, That we are in favor of a tariff for revenue to the General Government only.

Resolved, That we are in favor of a return to specie payments at the earliest practicable day.

Resolved, That we are in favor of an honest administration of the State and General Government.

One of the delegates offered additional resolutions, as follows:

Resolved, That we are opposed to the doctrine that the people have already forfeited the right to control the rates of travel and transportation on the railroads of the State, and we denounce any such doctrine as pernicious in principle and ruinous in practice.

Resolved, That we are unalterably opposed to all laws and policies whereby any advantage is given to one citizen over another; and to that concentration of great wealth under unjust laws in the hands of powerful corporations which now threaten the existence of our free institutions.

The farming interest appears to be the greatest of all in Minnesota. Twenty-three years ago, the whole cultivated land of the State amounted to 1,900 acres; in 1870 it was 1,863,316 acres; of this over 1,000,000 acres were in wheat. The average production per acre is high, being of wheat, in 1868, 17.9 bushels for the whole State, against 9.95 in Iowa, and 11.88 in Ohio. It is thought that this average will hold good for a number of years. The steadily proportional increase in the number of land-owners and improved farms has also been very great. In 1864 the land-owners numbered 50,805; in 1869, 73,121; while the number of improved farms advanced from 28,737 to 45,740 within the same period.

Concerning the wheat-crop of Minnesota in 1872, the following report submitted on March 3, 1873, to the Board of Trade at St. Paul, says: "Your committee, to whom was referred the matter of ascertaining the amount of wheat in store at various points in this State, together with shipments, and the probable amount yet to come forward, beg leave to submit the following report: Total amount stored, 3,310,000 bushels.

SHIPMENTS.	
To Milwaukee, wheat	5,500,000
To Chicago, wheat	2,500,000
To Duluth, wheat	1,000,000
To St. Louis and other points	1,000,000
To all points, in flour	2,500,000
Total shipments	15,810,000
In hands of farmers	3,190,000
Total surplus	19,000,000
For seed and home consumption	6,000,000
Total crop of the State	25,000,000

"The amount in store is from official sources. Your committee believe, upon careful inquiry, that of the amount reported in store, about 5,250,000 bushels, or fully two-thirds of

the whole amount in store, is held by farmers. The wheat-crop of 1873 in the State was about the same as in 1872, or little less.

The general election in November, 1873, resulted in the election of the Republican State ticket, except for the office of State Treasurer, for which the farmers' and mechanics' candidate was elected. The majority for Governor was 4,912.

In the Legislature of 1874 the number of members belonging to either party is respectively as follows: In the Senate—Republicans 27, Democrats 13; in the House of Representatives—Republicans 53, Democrats 51; showing a Republican majority, on joint ballot, of 16.

The recognized bonded indebtedness of the State, all contracted for building State institutions, amounts, in the aggregate, to \$250,000.

The total receipts from all sources during the fiscal year ending November 29, 1873, were \$1,386,601.40; and the disbursements, \$1,168,203.05; leaving a balance of \$218,398.35 in the Treasury.

The assessed valuation of all taxable property in the State for 1872 was \$103,323,490. For 1873 it is estimated at \$112,000,000.

The State school fund, in cash, amounts to \$2,900,000, realized from the sale of about one-eighth part of the land belonging to it. Reckoning the sale of the remaining land at the same rate, it would appear that Minnesota possesses the largest school-fund of any State in the Union.

The condition of the public schools is very satisfactory, as appears from the following official statement: "Number of school districts in the State, in 1872, 2,933. In 1873 there were 3,137, an increase of 204. There are 2,568 school-houses, valued at \$2,089,201. The number of persons in the State between five and twenty-one years of age, is given as 196,065, an increase over last year of 16,045. The number of persons attending school in 1873 was 124,583; and the number between fifteen and twenty-one years, not attending, was 1,492; 8,350 attended private schools during the year; 14,448 over five, and under fifteen years, were not enrolled in either public or private schools.

There were 5,206 teachers employed in the public schools during the year, of whom 3,567 were females. The amount paid for teachers' wages was \$568,937, an increase over 1872 of \$20,989.

Not less satisfactory is the condition of the State Normal Schools, established and in full operation at Winona, Manitoba, and St. Cloud. Their attendance during the year numbered, in the aggregate, 962.

The number of students attending the State University during the year was 278, of whom 72 were females.

The permanent building of the Hospital for the Insane has been enlarged. At the end of December, 1873, there were in the hospital 303 patients.

The State Reform-School contained a larger average number of inmates during the last than in any preceding year. The managers aver that the commitment of a large proportion of them can be directly traced to the intemperate habits of their parents.

In the State-prison there were 103 convicts in confinement at the end of December, 1873. Its current expenses for the year amounted to \$31,854.87; the earnings of the convicts to \$14,692.73.

In the Soldiers' Orphans' Home, at Winona, there were 94 inmates provided and cared for by the State.

There are numerous fire and life insurance companies operating in Minnesota, the total assets of which, at the beginning of 1873, amounted to \$340,308,509, and the premiums collected by them during the year were, in the aggregate, \$1,172,771.76. They pay to the State a tax of two per cent. on premiums, which, for the year ending November 30, 1873, yielded a revenue of little less than \$22,000.

The various railroad companies whose lines are in operation within the State, are generally complained against by the people, chiefly on account of the rates charged for passenger and merchandise transportation. In order to remedy the evil, a law fixing the rates of freight for all railroad lines in the State was enacted on the 6th of March, 1871. The act was to take effect on May 1st, that same year. Its provisions were, in substance, as follows: All the railroads in this State shall be decreed to be public highways, and shall be bound to carry freights and passengers at rates not greater than the rates enacted in this act. The rates named in the act shall be deemed to be the maximum of reasonable rates; and for the violation of the provisions of the act, the offending corporation shall be subject to certain penalties and forfeitures therein named. This law has been disregarded by all the railroad corporations, for the alleged reason that it interferes with their vested rights; and is, therefore, unconstitutional and void. The Winona & St. Peter Railroad Company having refused to deliver property carried on its road upon payment of freight offered according to the rates fixed by the said law, and insisting on payment of freight according to the rates published in the schedule of its printed tariffs, the owner of the property instituted a suit against that company before the District Court to recover damages. The company met the wishes of the plaintiff, to make this case a test one, so as to put the question between the people and the railroad companies of the State forever at rest. To that end a stipulation was entered into by both parties, expressly putting aside all other questions, except that of constitutionality. Upon this stipulation the case was submitted, and in April, 1872, the court decided it in favor of the railroad company. On appeal of the plaintiff, the case was ar-

gued before the Supreme Court of the State, in the October term, the same year, when the court decided the act to be constitutional, and reversed the judgment of the court below. Its decision was filed in May, 1873. The railroad company appealed from it, and the case is now pending before the Supreme Court of the United States at Washington.

MISSISSIPPI. After a session of seventy-five days, during which few matters of general public interest were acted upon, the Legislature adjourned on the 19th of April.

Much time was consumed by the "subsidy investigation" of the charges against Attorney-General Morris, who was alleged to have received from the vice-president of the Mobile & Northwestern Railroad \$500 for his official influence to defeat a proposition pending before the Legislature to repeal the "subsidy act," passed in 1871. It was also charged against the same official that \$6,000 had been paid to remove the objections of the Attorney-General to the issuance of \$81,000 of warrants claimed by the Ripley Railroad Company. After reviewing the evidence taken during the investigation, the committee unanimously reported:

That the action of the Attorney-General, in regard to the subsidy, has been vacillating and unsatisfactory, his opinions numerous and contradictory, and the circumstances attending his different changes of such a character as to render his opinions on this subject *valueless*. Your committee, from all the facts and circumstances surrounding the matter which has been submitted to them, are impelled to the conclusion that the action of the Attorney-General in the premises suggest an unpleasant suspicion, the taint of which they regret to see fastened, *as it is*, upon the robes of a State official occupying such a position of trust and honor, but, in view of the facts developed, they cannot say less.

To facilitate the collection of debts due from railroad companies to the State, an act was passed, permitting the Mississippi Central, the Mobile & Ohio, and the Mississippi & Tennessee Railroad Companies to pay their indebtedness in five equal annual installments, with eight per cent. interest, payable semi-annually. This indebtedness had been created by a loan from the State of a trust-fund. During the war, the railroads procured the passage of a bill by the Legislature, authorizing the payment of this loan in depreciated paper. The courts, however, have decided that these payments are not valid, and that the companies are still liable. For their accommodation, therefore, the above-mentioned bill has been passed. A law was passed, making any rate of interest agreed upon in writing by the parties legal, and fixing six per cent. as the legal rate in absence of any agreement. The Board of School Directors was abolished, and their power and authority vested in the Board of Supervisors of the counties respectively, and the board of mayor and aldermen, or selectmen of each incorporated city or town of more than two thousand inhabitants. The duties of county superintendents were defined, and

provision was made for the classification of the public schools of each county. It was also provided:

That for the purpose of affording the advantage of free education to all the educable youth of this State, there shall hereafter be, and there is hereby, levied on the assessed valuation of the taxable property of the State, a tax of four mills on the dollar, and the same shall be placed on the assessment-rolls annually, in the same manner as the assessment for general purposes, provided for in section 1668, Revised Code, to be paid and collected only in legal currency of the United States, and set apart exclusively to the payment of teachers in the public schools, to be designated on the assessment-rolls as the Teachers' Fund.

The Pascagoula & Jackson Railroad Company was incorporated, and \$25,000 were appropriated for the purpose of deepening the channel at the mouth of East Pascagoula River. Through this port there is a prosperous and growing trade, to the estimated amount of \$1,000,000 annually, between Mississippi and Northern, South American, Mexican, and West Indian ports, which has been somewhat obstructed by the bar at its mouth. An act was also passed incorporating the Mississippi & New Orleans Railroad Company, for the purpose of constructing a road from Shubuta, on the Mobile & Ohio Railroad, to Shieldsboro, on the New Orleans, Mobile & Texas Railroad; and another, extending aid to the Vicksburg & Nashville Railroad Company.

The political canvass of the year was one of unusual excitement, not only on account of the somewhat peculiar attitude of the opposing parties, but also of the important constitutional questions growing out of the election.

The campaign was opened on the 27th of August, when the Republican State Convention was held at Jackson. Every county in the State was represented in the convention, which comprised a large number of colored delegates. General Adelbert Ames was nominated for Governor, having received 187 votes, while 40 were cast for Governor Powers. The other nominations included Alexander R. Davis (colored), for Lieutenant-Governor; James Hill, (colored), for Secretary of State; George H. Holland, for Treasurer; W. H. Gibbs, for Auditor; George E. Harris, for Attorney-General; and J. W. Cordozo (colored), for Superintendent of Education. The platform adopted was as follows:

Resolved, That the Republican party of the State of Mississippi, in convention assembled, recognizes as the strongest evidence of the perfection of political creed the fact that we do not find it necessary to make any new departure, nor announce any new dogmas, but simply renew our steadfast faith in the old Republican landmarks, to wit: The preservation of the Union of the States; strict enforcement of the laws; equal rights and privileges to all; universal education; retrenchment in expenditures; rigid economy, and equal and uniform taxation; opposition to the fostering of monopolies at the expense of the masses, and honesty, capacity, and fidelity, as the best test of political preference.

Resolved, That we are opposed to burdening the reconstructed State of Mississippi with the old re-

pudiated Union and Planters' Bank bonds, a debt, it may be called, contracted by locofoco Democracy, and by them repudiated, and we pledge ourselves to resist, by every lawful means in our power, the assumption, by the State government, of any and all such pretended debts.

Resolved, That we are opposed to loaning to the railroads, or other corporations, funds donated by Congress to this State for educational purposes, and we demand the prompt repeal, by the next Legislature, of the law by which agricultural scrip and Chickasaw school-funds have been diverted from the sacred objects contemplated by the donors.

Resolved, That we favor biennial sessions of the Legislature.

Resolved, That we recognize no distinctions as now existing by law in the rights of all children of the State to equal privileges, and to accept such in all public schools, colleges, or universities, and should any of said institutions of learning deny to any child, on account of race or color, its equal rights, we pledge ourselves to enforce said rights by appropriate legislation, and we further pledge ourselves to the support of our present institutions of learning, and our present educational system as above explained.

Resolved, That we have full faith in the integrity of his Excellency R. C. Powers; and all responsible positions in which he has been called upon to act, whether as chairman of the Republican State Executive Committee, Lieutenant-Governor, or Chief Executive of the State, he has proved himself to be an able, honest, and fearless advocate of Republican principles, and a firm supporter of all those measures calculated to advance the prosperity of the State.

A resolution to indorse the Kellogg government of Louisiana was received with such demonstrations of hostility, that the mover withdrew it.

General Ames made a short speech, saying, among other things that, if elected Governor, and during his term, any bill, looking to the payment of the repudiated debt, or reopening the question in any way, should come up, he would most certainly veto it.

On the 17th of September, the "Conservative-Democratic" party held a State Convention at Meridian, but deemed it inexpedient to nominate a State ticket.

On the following day, in the same city, another convention, of the "Republican party of Mississippi," was convened, and nominated the following State ticket: For Governor, James L. Alcorn, of Coahoma; for Lieutenant-Governor, H. Musgrove, of Clarke; for Auditor of Public Accounts, W. W. Bell, of Pontotoc; for Secretary of State, J. W. Stringer, of Warren; for Treasurer, W. H. Vasser, of Monroe; for Attorney-General, Beverly Matthews, of Lowndes; for Superintendent of Public Education, J. D. Webster, of Washington.

The convention unanimously adopted the following platform:

Whereas, The convention which assembled at Jackson, on the 27th day of August, 1873, was the most remarkable in the history of Mississippi, for the corrupt means used in its organization; and—

Whereas, Through the corrupt agency of a class of irresponsible non-residents of the State, who claim to be the leaders of the Republican party, the said convention was so prostituted and debauched by open bribery and unquestioned corruption as to make it the imperative duty of all honorable men to dissolve all connection with that class of corrupt

individuals whose object is the plunder of the State, and the working results of whose action must necessarily disgrace our party, and bring ruin on us all; and—

Whereas, The said convention, in presenting its candidates, has given alarming proof of the determination of the class of men now in control of that organization, to place the government of our State in the grasp of selfish non-residents, who have no bond of interest with our people—men who pay no taxes; who are strangers to our society, and whose only aim is self-aggrandizement and public plunder; and—

Whereas, The said convention, in placing at the head of its ticket an irresponsible non-resident, without any qualification in the school of statesmanship, has offered an insult to the masses of our people, and has prostituted, as far as it could, the Republican name in Mississippi; and—

Whereas, The said convention, in rejecting the claims to public confidence of the men of our party who have served the State with honor to themselves and usefulness to the public in the respective offices of the Auditor of Public Accounts and State Treasurer, and selected instead thereof, for the first-named office a man notoriously debauched; and for the second-named office, one so wholly incompetent, gave the country the proof of the purpose of the conspirators to perpetrate, through the fraudulent means at their disposal, the robbery and ruin of our people; and—

Whereas, The said ticket presented by said convention is notoriously incompetent and corrupt, and unworthy of public trust: therefore, be it

Resolved, That the Republican party of Mississippi is, as it should be, composed of the people of Mississippi; whose residence in the State gives a guarantee of an interest in the welfare of the State; whose identity with our society, white and colored, is the moving principle in the organization of our party association—and we now invite the support of all men of our State, without regard to past political affiliations; and—

Whereas, The Republicans of the State, whose interest is that of the people; whose aim is that of good government and the resulting repose of our people; who seek to bring all our people, white and colored, into the brotherhood of political embrace; who seek to establish a bond of perpetual confidence and friendship between all races of men who hold a share in the political sovereignty of the State, do in mass convention solemnly declare that we stand to-day dissolved henceforth in all political affiliation with the corrupt ring-masters of the late convention, and that in seizing the banner of our party from unworthy hands, we do so with the resolve—

1. That the first and highest duty of the government under our administration, should we succeed before the people, shall be to give protection and security to the laboring classes, and equal rights to all the people, Northern and Southern, colored and white; we pledge the people of the State our fixed and determined purpose to put this declaration into practical operation.

2. That we make no departure from our ancient creed of political faith; that we support, with all the means at our hands, the Republican party of the nation, and the Administration of President Grant; we are for the preservation of the Union and the peaceful government of our people; for the strict enforcement of the laws; for universal education, with such revisions as will give to the children of the State, rather than the idle superintendents, the full benefits of the money paid for the education of the children of the State. We are for every possible and proper retrenchment in the State government, as also in the city and county governments within our State. We are opposed to fostering monopolies at the expense of the masses of our people. We are unalterably opposed to the payment of the repudi-

ted Union and Planters' Bank bonds. We are opposed to the diversion of the Trust Funds of the State, as contemplated by the legislation of the recent session, but in favor of their proper application to the education of the children of the State, and we demand the repeal of all laws in conflict with this declaration. We are in favor of biennial sessions of the Legislature, and if the people shall grant us, we will amend the constitution of the State to that end; and, finally—

We pledge to the people our earnest and heart-felt sympathy in the struggle which they now maintain, in supplying the demands of the tax-gatherer, to reduce which, without impairing the efficiency of the government, and to make the tax equal and uniform, with no discriminations in favor of monopolies, we now make our most solemn vow.

At this time the question was raised as to the legality of holding an election for State officers during the present year. The constitution, it was claimed, contemplated biennial elections, while the statutes, which were conflicting and ambiguous, seemed to authorize annual elections. Acting upon the opinion of the Attorney-General, to whom the question had been submitted, that an election during the present year was prohibited by the constitution, and that the laws which were construed to require it were in violation of that instrument, as well as in conflict with each other, Governor Powers, on the 80th of September, issued a proclamation to the following effect:

The accompanying official opinion of the Attorney-General of the State is published for the consideration and guidance of the executive civil authorities of the several counties.

The Chief Executive is firmly convinced, after the most full consultation with the Attorney-General and leading members of the bar in various portions of the State, and after the most anxious reflection upon the grave subject here discussed by the Attorney-General, that his opinion is correct, and that according to the constitution no election should be held in this State until November, 1874, when members of Congress and all the State and county officers will be elected together, and the double and unnecessary expense of annual elections avoided for all future time.

It is the purpose of the Executive to assemble the two Houses of the Legislature, at an early day, in extraordinary session, that they may provide, by appropriate legislation, for the general election to be held on the first Tuesday after the first Monday in November, 1874.

He, therefore, appeals to the people of all parties, and enjoins it upon all the officers of the State and of the several counties, to aid him in carrying into effect the provisions of the constitution bearing on this important subject.

Accordingly, there was called an extra session of the Legislature, which convened on the 20th of October. In his message to that body, Governor Powers, after reviewing the authorities and arguments in favor of the position he had taken, stated the following conclusions:

1. That the constitution and civil government was established on the 28d of February, 1870.

2. That the first political year under the constitution commenced on the first Monday in January, 1871.

3. That the fractional period of ten months, existing between the two last-mentioned dates con-

stitutes no portion of the full terms which the first civil officers were authorized and required to hold.

4. That all officers elected in 1869, and qualified under the Constitution, were entitled to full constitutional terms from the first Monday in January, 1871.

5. That the terms of the present State officers continue until January, 1875, and until their successors are duly elected and qualified.

6. That their successors cannot be constitutionally elected until the first Tuesday succeeding the first Monday in November, 1874.

As a solution of the difficulty, the Executive recommended that the Legislature should "repeal the present unconstitutional provisions of the election law; provide for a general election in 1874, and biennially thereafter; place our legislation in harmony with the letter, spirit, and intention of the constitution, and thus save the State from imminent discord and disgrace, and consequent financial embarrassment, to say nothing of still graver consequences; save to the pockets of our overburdened tax-payers the hundreds of thousands of dollars which are expended in our annual elections; save the people from the demoralizing effects of annual campaigns, and the labor, political strife, and the neglect of private interests, which they always produce; save them from all those damaging and disastrous consequences which blight their political and material welfare, and render many of them indifferent to the results of elections, however important, instead of having every voter actively interested in securing and maintaining good government."

The Legislature, however, discussed the question, but adjourned without taking any action in relation thereto, having in the mean time afforded relief to the people by extending the time for the payment of taxes to February 1, 1874, and repealed the law exempting railroads from taxation.

The election was held November 4th, and resulted in the success of the Ames ticket. The whole vote cast was 127,211, of which Ames received 74,807, and Alcorn, 52,904, making the majority for the former 21,403. The political classification of the Legislature is:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans	20	68	88
Democrats	14	44	58
Republican majority...	6	24	30

After the election a test case was prepared, and presented to a judicial tribunal to determine the validity of the laws under which it had been held. Early in January, 1874, a decision was rendered by the Supreme Court declaring the law constitutional, and consequently the election valid.

The revenue realized from all sources during the past four years has not been sufficient to meet the expenses of the government, as will appear from the following comparative statement:

YEARS.	Warrants issued by Auditor.	Warrants canceled by Treasurer.
For 1870.....	\$1,061,249 90	\$1,033,249 85
For 1871.....	1,739,044 34	1,322,161 87
For 1872.....	1,596,828 64	1,365,923 18
For 1873.....	1,450,682 80	1,344,475 69
Total.....	\$5,887,785 68	\$4,965,808 49
Total excess of warrants issued.....		\$971,047 19

The following is an official statement of the debt at the beginning of 1874:

DEBT STATEMENT.

Above total excess.....	\$971,047 19
Warrants outstanding January 1, 1870.....	211,735 88
State indebtedness to Chickasaw School Fund.....	814,743 23
Warrants canceled by Treasurer, now represented by State bonds.....	634,650 00
Warrants canceled, represented by certificates of indebtedness.....	294,150 00
Warrants canceled, for which the State is indebted to the Common-School Fund....	615,963 49
Total liability of the State.....	\$3,448,159 29

The amounts above reported as belonging to the Chickasaw and Common-School Funds, together with \$218,150 in State bonds, which belong to the Agricultural Departments of Oxford and Alcorn Universities, are held as trust funds, the principal of which the State is not required to pay. Deduct these items from the total liability, and there remains a State debt of \$1,794,332.57, distributed as follows:

State bonds.....	\$416,500 00
Certificates of indebtedness.....	294,150 00
Insurance companies, deposits.....	280,400 00
Warrants outstanding.....	803,682 57
Total.....	\$1,794,332 57

All the public institutions of the State are represented as being overcrowded. In 1873 there were 304 inmates of the Lunatic Asylum, 25 of the Blind, 50 of the Deaf and Dumb, and 288 of the penitentiary. The penitentiary has not the capacity for one-half the present number of convicts. A large portion of them, therefore, are worked outside of the walls. Besides paying all expenses during the year, this institution reported a balance of \$4,000 in favor of the State.

MISSOURI. The first session of the Twenty-seventh General Assembly, which had convened early in January, adjourned on the 24th of March, to meet again in January, 1874. One hundred and forty-four acts were passed and signed, but most of them were of a local or unimportant nature.

Soon after the assembling of the Legislature in January, Louis V. Bogy, the candidate of the Democrats and Liberal Republicans, was elected to the United States Senate. The contest for this position occasioned a high degree of excitement, and immediately after the election it was publicly charged that money had been improperly used to secure the election of the successful candidate. These charges led to the appointment by the Legislature of a committee of five, "with power to send for persons and papers, and report to this House at as early a day as practicable if there has been

money used to advance the interest of any of the senatorial aspirants. No name, however, was mentioned in the resolution. In accordance therewith a committee was duly appointed, and at once entered upon the investigation. About the middle of February a majority report signed by four members, and a minority report signed by one member, were submitted to the Legislature. The former said: "We find that there is no evidence either directly or indirectly to criminate the Senator-elect, Hon. L. V. Bogy, and fully exonerate him;" and, secondly, "we further find that George P. Dorris, of St. Louis, did attempt to bribe two members of this General Assembly, by the offer of \$1,000 each, to wit, Hon. W. S. Pope, of Wright, and Hon. Charles H. Morgan, of Barton, to induce them to vote for him (George P. Dorris), in the Democratic caucus for United States Senator; and we also find that said Dorris placed money in the hands of other parties who are not members of this Legislature, to advance his (George P. Dorris's) interest in the election for United States Senator."

In the minority report it was stated that "it also appears, from the testimony taken before your committee, that a large sum of money, to wit, the sum of \$15,000, was brought to Jefferson City shortly prior to the election of Senator as aforesaid, by one Thomas Dorris, and that a considerable portion of that amount was used, or offered to be used, to advance the interest of some candidate for the office of United States Senator; and that the testimony, in part, goes to show that said money was intended to advance the claims of one George P. Dorris, and in part goes to show that it was designed to be used to advance the claims of L. V. Bogy; that on this issue the testimony is not satisfactory, and the undersigned states that, against his consent, a majority of said committee decided, on the 8th of February, 1873, to close the doors against further investigation by said committee, and make report to this House, by reason of which the undersigned was unable to obtain testimony clearly showing by whom said \$15,000 was furnished, or for the advancement of whose election it was intended and partly used."

It appears that Mr. Dorris had not been examined by the investigating committee, owing, it is said, to his absence from home. In consequence of the statements contained in the minority report, Mr. Bogy publicly requested that the investigation be reopened, so that Mr. Dorris might be examined, and that his (Bogy's) bank account might be investigated. The investigation accordingly was reopened, and Mr. Dorris testified, and the bank account of Mr. Bogy was examined. The committee thereupon made another report, unanimously reaffirming their first report, and asked to be discharged. This report having been submitted to the House was adopted by a vote of 61 to 22, and the House resolved "that said investigation fully exonerates Louis

V. Bogy from all suspicion of having used any corrupt means to secure his election to the distinguished office of United States Senator, and that our confidence in his purity and honesty is unimpaired."

So far as the Legislature was concerned, the matter seems to have ended here. But, shortly after Mr. Bogy had taken his seat in the United States Senate, there was presented to that body a memorial signed by certain citizens of Missouri, asserting that the investigation had been insufficient, and that the election of Louis V. Bogy as a Senator from Missouri had been obtained by the use of improper means, by bribery and corruption. In speaking on this point in the Senate, on March 18th, Senator Bogy said:

I do not, Mr. President, see how the matter can be avoided, or a remedy for the evil; but, under the circumstances, I think I may well claim as a right, due to me and to my State, that the Committee on Privileges and Elections should at once take this matter up and make a report to this body. My Legislature is yet in session. It has given no evidence whatever of a disposition to shield anybody or cover up corruption, the say-so of these men to the contrary. If there has been any corruption practised, there is the body to investigate that matter, and we are not here, while it is in session, authorized to go back of a report made by a committee of its own body, and which is sustained by a large majority. Can the Senate of the United States do this? I think not. I may be sensitive on a matter of this kind, because if I have any reputation at all, I may say, without any self-exaltation, it is that of a plain, honest man, though an ardent politician—perhaps too much so; but I have never been charged heretofore with any thing like corruption in any of my political acts. I hope that the committee will take up this matter soon and make their report, as I ask for the fullest investigation.

Mr. Bogy's good standing in the Senate does not seem to have been impaired by the introduction of this memorial.

On the 18th of May an important convention assembled in St. Louis to consider the demands of the West and South for cheap transportation. A large number of delegates were present from nearly all of the Southern and Western and some of the Eastern States. The sessions continued two days, during which many speeches were made setting forth the wonderful productive capacity of the West and South, and urging that measures be adopted by the national Government for increasing the facilities of transportation, especially by water, so that the products of this fertile region might readily reach a market. The importance of this subject was shown by Governor Woodson, of Missouri, who after calling attention to the remarkable mineral resources of Missouri, which comprises within its territory 14,000 square miles of surface underlaid by 20 feet of coal in veins, thick enough to mine, or a total of 80 feet, including all thicknesses, and which has about 175 square miles of territory underlaid with solid iron-ore, thus stated the objects for which the delegates had assembled:

I wish now to call your attention to another matter, which is of great interest and importance to a

number of States. I refer to the Missouri River as a channel of commerce, and upon the utilization of which such vast, I may say almost incalculable, interests depend. The Missouri is navigable, and if all obstructions were removed from it, and its channel properly controlled by dikes and otherwise, could be navigated throughout eight months of the year for at least 2,500 miles from its mouth. From the Iowa line to its connection with the Mississippi is 700 miles, and the bottom-lands bordering upon it average five miles in width. This bottom extends for quite as great a distance above the southern line of the State of Iowa. This gives an area of 7,000 square miles of bottom-land lying upon the Missouri River. Three-fourths of this land is not surpassed in productiveness by any in the world. Plant it all in Indian-corn, and it will average at the lowest possible calculation, one year with another, fifty bushels per acre. This makes the product 168,000,000 bushels a year. The country lying back of, but adjacent to the bottom-lands, and which naturally seeks an outlet by the Missouri River, is at least eight times as great in quantity as the bottom. We assume, then, that the Missouri flows through a slip of land forty-five miles in width, twenty-two and a half miles on either side of it being tributary to it. While this added territory is not equal, perhaps, to the rich alluvial bottoms directly upon its margin, they are still among the finest lands in America. Suppose that three-fourths of the territory under consideration are cultivable, and will yield only as much as was the average yield of the lands of Missouri in 1870, which was 81½ bushels to the acre, and you add the amount produced to that of the bottom-lands, and the grand result is 1,014,720,000 bushels, and of the value, at the prices that prevailed in 1870, of \$446,476,000. This amount of Indian-corn will probably never be grown within the territory indicated, but only because a great part of the land lying within it can be more profitably employed in the production of other staples, such as wheat, rye, barley, oats, potatoes, grass, tobacco, etc.

Now, I ask you to remember, gentlemen, that I have been considering the Missouri River alone, one of the tributaries of the great Mississippi. Mark you, gentlemen, I have been telling you of the products of one State in this great valley of the Mississippi. When you multiply the products that I have presented to you by the number of States watered by the Mississippi River, and by the number of large tributaries that flow into it—like the Missouri—then you will have an appreciable idea of the products of the great West in which you are. Tell me, then, gentlemen, what subject can attract the attention of Congress more meritorious in all respects than finding an outlet for these vast productions to the Eastern cities, and to our entire Atlantic seaboard? We can produce in the manner I have told you, but what do our productions amount to, when, as you have been told, no market is to be had for them? Who will spin and sow, and reap, if he cannot make a sale of the products of his industry? It is not to be expected. I am free to say that the great want of the people of the West, and of the Southwest, is cheap transportation. You want, gentlemen, facilities by which you can send the products of your farms to market.

The great national improvements which were considered by the convention, and to which it was thought important that the attention of the Congress should be directed, were set forth in the resolutions submitted by the Merchants' Exchange of St. Louis (a body of fourteen hundred merchants and shippers closely identified with the ocean and inland marine of the country), the most important of which were as follows:

Resolved, 1. That the deepening of the mouth of the Mississippi River is of the very first importance to the interests of the entire valley of the Mississippi, and of great moment to the whole country. The solution of this problem, we believe, will be achieved by closing up all of the inferior outlets of the river, and condensing its waters by a system of jetties to one channel. By this means a depth of at least twenty or twenty-two feet may be obtained in the Southwest Pass, an outlay insignificant when compared with the many millions that will be annually saved to the country by the work. When once accomplished, small annual appropriations will suffice to maintain the required depth forever afterward. We urge immediate attention to this subject as being one of paramount importance.

2. That experience has demonstrated the practicability of controlling the currents of the Mississippi River by a system of wing-dams, revetments, and jetties, and that by such means, judiciously applied, its channel can be permanently located and confined, and that by this method any depth required by the largest vessels may be constantly maintained from the Balize to St. Louis at a cost of a few million dollars. We, therefore, urge that, in addition to the removal of snags, wrecks, and other obstructions, from the channel, a comprehensive system of improvements, looking directly to the permanent location and deepening of the channel through shoal places below St. Louis, be at once matured and inaugurated, and that a depth of eight feet be determined as the maximum to be accomplished at first by the proposed works. This will involve the establishment of jetties and the like, at probably not more than thirty bars or shoal places between this city and New Orleans, and the removal of a few dangerous rocks at the grand chain above Cairo, and would result in an immense saving, a thousand-fold greater than the original cost. By thus deepening and confining the channel, its navigation would become much less intricate and dangerous, vexatious delays would be avoided, and a class of steamers and barges of less expensive character would be practicable, while constant employment would be afforded during the entire year for the craft navigating it.

3. That the system of improvements suggested for the river below St. Louis is eminently suited for the improvement of the Missouri, Illinois, Arkansas, Red, Ohio, Tennessee, Cumberland, and many other important streams in this valley, on each of which it should be applied on a scale commensurate with the volume of the river, and the demands of its commerce. We therefore urge with great earnestness the immediate improvement of these streams, being well assured the result will prove highly beneficial to the whole country.

4. That the improvement of the upper and lower rapids of the Mississippi should be vigorously prosecuted until the navigation of those parts of that river are made safe and convenient, and that the improvements already commenced on all other rivers of this valley should be energetically prosecuted to completion.

5. That while all these improvements can be successfully carried forward under the direction of the able engineers of the Government, in whose talents we feel a just pride, we would suggest for the consideration of Congress the propriety of having such portions of it executed by contract as can be let to responsible contractors willing to guarantee desired results for reasonable compensation.

6. That every practicable water-route to the Gulf, to the Atlantic Ocean, or to the great lakes, which can be opened and made safe and convenient at a reasonable cost, when compared with the benefits to result from it in lessening the expense of transporting the products of this valley to their various markets, should meet with favor from the General Government, and receive the unanimous support of every representative of this valley in Congress.

Resolved, 1. That we regard the completion of the James River & Kanawha Canal, the cherished scheme of its author, George Washington, connecting as it will the waters of the Atlantic with the great Mississippi Valley, as worthy the prompt and profound consideration of Congress, and that we cannot too warmly express our admiration for the State of Virginia in surrendering her interest—twelve million dollars—in this improvement, in order that the same may be dedicated to the people of the whole country to insure them cheap rates of transportation by water-line to the Atlantic coast.

2. That we recommend to Congress the consideration of the Atlantic & Great Western Canal, believing it to be an enterprise of national interest, and which, when completed, will be of a value commensurate with its cost.

3. That the Fox and Wisconsin River improvement has already become a national work, and is deserving of the continued recognition of Congress.

In other resolutions it was urged that no bridges should be authorized across the Mississippi River below St. Louis having spans of less than five hundred feet wide over the stream, and a clear height of less than seventy-five feet above high-water mark; and that Congress should pass a general bridge law defining the lengths and heights of their spans over the different navigable rivers of the Mississippi Valley, and generally control the location and construction of such bridges in a manner to prevent unnecessary injury to the navigation of said rivers.

On the 1st of October a convention of the farmers of Missouri was held in Jefferson City, to consult in relation to the interests of the agricultural classes.

A convention of the various Granges of Northwest Missouri, Kansas, and Southern Nebraska, was held in St. Joseph, December 28d. The platform framed by the Illinois State Farmers' Association at Decatur, Ill., on the 17th of December (*see ILLINOIS*), was adopted, with the following additional resolutions:

Resolved, That, believing in the time-honored political maxim of equal rights to all and exclusive privileges to none, either private or corporate, we can no longer be beguiled by the hocus-pocus of any system of special legislation by which we are robbed to enrich special interests, and we demand that tariffs, banks, railroads, telegraphs, and monopolies, shall be restrained from encroachments upon rights of the people by equal and just laws, State and national.

Resolved, That from the fact that what a farmer buys is upon the basis of a depreciated currency, and what he sells is sold upon a gold basis, since the price of our farm products is regulated by the great markets of Europe, we demand a staple and uniform currency.

The statement of the receipts and expenditures of the State government for the year is as follows:

RECEIPTS.	
Balance, January 1, 1873.....	\$786,699 33
Receipts from all other sources.....	3,563,138 28
	\$4,349,837 61
DISBURSEMENTS.	
Amount paid on warrants....	\$2,501,957 19
Uncurrent bonds (burned by committee).....	16,882 40
	\$2,518,839 59
Balance in the Treasury, January 1, 1874....	\$831,598 02

Of the balance on hand, January 1st, \$45,715 belongs to the State revenue fund; \$340,168 to the State interest fund; \$93,623 to the sinking-fund; \$100,898 to the State school moneys; \$20,498 to the State school fund; \$18,738 to the insurance department fund. The total cost of criminal trials during the year was \$180,237, of which \$27,840 was for conveying 540 convicts to the penitentiary. The total cost of assessing and collecting the revenue was \$195,419.

The Auditor makes no recommendation of measures for meeting the \$811,000 of State bonds falling due in 1874, but says the subject will be treated in the report of the fund commissioners.

In addition to defraying the cost of the government and supporting the charitable institutions of the State, there has been paid during the year \$599,000 of the State debt.

A very large sum of money is annually collected by taxation for educational purposes in Missouri, which affords the means for obtaining a good common-school education to all the children in the Commonwealth. The amount raised by taxation and otherwise during the year for the common schools comprised: State funds apportioned, \$351,879.17; county funds, revenue, \$175,224.59; township funds, revenue, \$185,512.95; amount of local tax reported, \$1,879,158.88, making the revenues of the year aggregate \$2,091,775.59. There were 7,700 organized schools in the State, and the average attendance of pupils was 230,000. The public school-houses in the State have a capacity for 300,000 pupils, or 70,000 more than the average attendance during the year. The cost was a little over nine dollars for each pupil attending school.

An important experiment was made during the year in the management of the penitentiary, which renders that institution for the first time in many years self-sustaining. In 1872 the penitentiary cost the State \$262,412, or \$718.93 per day over and above its income. "It is claimed by some," says the Governor, "that a large amount of work was done for the State by the prisoners during the year, for which nothing was paid, but my opinion is that the amounts received by the officers of the prison from the lease of the labor of the convicts during the year, and for which no account was rendered, so far as I can find, more than equal all the work done for the State."

The experiment alluded to was made in May, when, in compliance with an act passed for that purpose by the Legislature in March preceding, the State-prison was leased for ten years to parties who agreed to take charge of the prison and prisoners, clothe, feed, and guard the latter at their own expense, and to hold the State harmless on account of all expenses connected with the institution; also to pay the State an annual consideration of \$1,000. The lessees, in turn, are to have the use and control of the convicts. On the 1st of Janu-

ary, 1874, the number of convicts was 874, of whom 27 were females.

The total length of railroads in the State is 2,857 miles, valued for taxation at \$24,231,330. The aid granted by the State for building these roads amounts to \$16,762,904, and by counties and cities \$28,576,000, making the total aid by State, cities, and counties, \$45,338,904, or \$21,107,574 over the estimated value of the roads for taxable purposes, including all rolling-stock, etc. The views of the Governor relative to the railroads are too important to be overlooked. Disclaiming all intent of doing the railroad companies injustice, he thinks that all unjust discrimination against non-competing points ought to be stopped, and a fair and reasonable table of rates established, a proper regard for the protection of human life required, and strict police regulations for the government of every railroad in the State provided and enforced through the instrumentality of a well-selected judiciary and a Board of Railroad Commissioners; but the true remedy and the only effective one, so far as the regulation of transportation is concerned, must be provided by an act of Congress. While State legislation may be so formed as to afford very considerable protection against improper exactions by railroad corporations, the trial of such legislation in Massachusetts, and several other States, has demonstrated its impotency and the utter impossibility of adequate protection by it to the great producing interests of the country. Under the power delegated by the Constitution to regulate commerce between the States, Congress may, most unquestionably, establish a uniform, just, and fair rate of transportation by railroads throughout the United States. This no State Legislature can do. He therefore advises the Legislature to instruct the Senators and request the Representatives in Congress to urge the passage of a law for the purposes suggested.

An annual review of the industrial resources of Missouri shows a wonderful increase in the manufacture of iron in the State, an industry for which Missouri possesses peculiar advantages. According to the census of 1870, there were in the State 15 blast-furnaces, employing a capital of \$1,914,000, and yielding a product of \$586,293. In 1873 there were reported 12 establishments with 18 furnaces, having a capital of \$5,783,000, employing 2,421 hands, paying \$1,089,300 wages, and yielding 100,000 tons of pig-iron, valued at \$4,500,000, and 120,000 tons of rails, valued at \$1,008,000, making a total product for the year of \$5,508,000. Thus in three years the capital employed in iron and rail making has been trebled, the number of hands more than doubled, and the product increased more than fourfold.

The present State government consists of the following officers: Governor, Silas Woodson, Democrat; Lieutenant-Governor, Charles P. Johnson, Liberal; Secretary of State, Eugene F. Weigel, Liberal; Treasurer, Henry

Salmon, Democrat; Auditor, George B. Clark, Democrat; Registrar of Lands, Frederick Salmon, Liberal; Attorney-General, H. Clay Ewing, Democrat; Judges of the Supreme Court, David Wagner, Henry M. Vories, Washington Adams, Thomas A. Sherwood, Ephraim B. Ewing; Superintendent of Public Schools, John Monteith, Democrat.

St. Louis.—According to the census of 1870, St. Louis ranked third among the cities of the United States as a manufacturing centre, being surpassed by New York and Philadelphia. The capital invested in manufactures amounted to \$61,689,826; hands employed, 40,700; wages paid during the year, \$20,414,036; value of materials used, \$72,474,369; of productions \$131,192,670. The prosperity of the city during 1873 is shown by the following statistics:

During the year there were erected 1,599 buildings, including 1,228 dwellings and 331 business houses, the whole valued at \$6,765,375. The sales of real estate aggregate \$16,455,117, an increase of \$4,000,000 over 1871. The assessed value of taxable property is \$180,000,000, the true valuation being about \$475,000,000. The total tax collected for the year was: State, county, and city, \$3,760,926; internal revenue, \$3,327,655; customs, \$1,376,466; total, \$8,465,047. The total receipts of the United States sub-treasury were \$16,716,656; disbursements, \$16,732,357. Of the disbursements, \$871,318 was to pensioners. The

value of foreign goods entered in the custom-house was \$1,120,455, being an increase of \$147,631 over the preceding year. There was smelted during the year 185,733 ounces of silver, 200 ounces of gold, and 1,816,080 pounds of lead, the whole valued at \$314,694. The receipts of cotton were 59,709 bales, being an increase of 23,388 bales over the preceding year. The amount of flour manufactured was 1,884,180 barrels, an increase of 89,382 barrels over 1872. The receipts of flour were 1,283,116 barrels, an increase of 23,183 barrels; of wheat there were 6,160,217 bushels, an increase of 150,000 bushels; of corn, 7,674,186 bushels, a decrease of 1,795,201 bushels; of oats, 5,309,551 bushels, a decrease of 57,249 bushels; hay, 252,724 bales, a decrease of 22,355 bales; hemp, 16,567 bales, a decrease of 4,223 bales; tobacco, 13,037 hogsheads; of coffee, 142,963 sacks; sugar, 33,432 hogsheads, 35,314 barrels, and 50,656 boxes; cattle, 279,678 head, an increase of 16,274 head; of hogs, 973,613 head, an increase of 214,537 head. The number of hogs packed was 538,000, an increase over the previous year of 18,978. The zinc product was \$504,000; the lead product was 26,491,000 pounds, valued at \$1,854,424; white lead, \$2,228,000.

At the municipal election in April, Joseph Brown, the Democratic candidate for mayor, was elected by a majority of 4,472 over George Bain, Republican, the former receiving 15,364 votes, and the latter 10,892. The present City Council is composed of 20 Democrats and 6 Republicans.

The magnificent bridge across the Mississippi, at St. Louis, an illustration of which is given, has reached substantial completion.

BRIDGE OVER THE MISSISSIPPI, AT ST. LOUIS.

This structure was designed by James B. Eads, and begun in 1869. The superstructure, which is mainly composed of steel, is supported by four granite and limestone piers, resting on the rock-bed of the river, to which they were sunk through the sand, in one instance as much as 120 feet, by the use of wrought-iron caissons and atmospheric pressure. There is one span of 520 feet, and two of 515 feet, each

over the water-way. The height of the arches is 60 feet, and were designed to be sufficiently high to permit the passage of steamboats at all stages of water. The two road-ways, one for carriages and one for railways, are carried by four arched trusses, connected with each other by diagonal braces, the top and bottom chords of which are composed of steel tubes 16 inches in diameter. These tubes are made in sections

of about 12 feet, and consist of steel staves banded and held together by steel jackets or hoops. The top and bottom chords or tubes are 12 feet apart, connected with each other by a triangular system of bracing, so arranged as to constitute, with the tubes, an arched truss of great lightness and strength. The bridge is 54 feet wide, and cost, together with the tunnel under the city of St. Louis, by which access is gained to its western end, \$9,000,000.

By order of the War Department, a board of engineer officers was convened in August for the purpose of examining the construction of this bridge, to ascertain whether it "will prove a serious obstruction to the navigation of said river, and if so, in what manner its construction can be modified." The report of this commission was made September 11, 1873, and signed by J. H. Simpson, Colonel of Engineers, U. S. Army, and G. K. Warren, G. Weitzel, William E. Merrill, and Charles R. Suter, Majors of Engineers, to the effect that "the board are unanimously of the opinion that the bridge, as at present designed, will prove a very serious obstruction to the free navigation of the Mississippi River." The chief objection was, that the height was not sufficient for the passage of steamboats. After stating the difficulties that would arise in altering the structure, the following solution of the problem is suggested:

Under these circumstances, the board do not feel justified in recommending any change which would involve a complete remodeling of this magnificent structure, now so nearly completed. At the same time, as already stated, they deem it absolutely necessary that some provision should be made for allowing large boats to pass the bridge with safety whenever they find it necessary to do so.

They would therefore recommend, as the most feasible modification, a plan which has already been tried and found efficient at the railroad-bridge over the Ohio River, at Louisville, Ky.

Let a canal, or rather an open cut, be formed behind the east abutment of the bridge, giving at the abutment a clear width of water-way of 150 feet; the shore side of the cut should be laid out on an easy curve, joining the general shore-line about 500 feet above the bridge, and about 300 feet below it. The river-side may be entirely open, but the shore-side should be riveted vertically with stone or with crib-work to a height of about five feet above extreme high water. This wall should be provided with ring-bolts and posts, to enable boats to work through the cut with lines. Let this opening be spanned with a drawbridge, giving a clear span of 120 feet in width.

By this plan, boats as large as any now built would be able to get through the bridge in any weather and in any stage of water, and only at the cost of some little outlay.

MORAVIANS. The latest statistical reports of the Moravians at large were made at the close of the year 1872. They are given in the following table. An apparent decline is shown in the number of communicants returned by the German Province. This is explained by the fact that in the reports of some of the churches the total membership only is given. In the "Diaspora" missions in Eu-

rope, 100,000 persons are counted as in spiritual communion with the Church.

PROVINCES.	Communi- cants.	Totals.
German Province.....	4,988	7,488
Bohemian Mission.....	87	118
British Province.....	3,250	5,462
American Province.....	8,050	14,263
Foreign missionaries, with their children (about).....	316	400
Total.....	16,686	27,731
To this add the total number in the congregations of the foreign mission churches.....		69,404
Total.....		97,135
The total in 1871 was.....		96,065

The total number of bishops of the American church is seventeen, of whom five have retired from active service. Four active bishops and one retired bishop are connected with the American Province.

In the British Province, the number of congregations is thirty-eight; number of day schools, 18; of scholars, 1,382; number of boarding-schools, 14. A general home-mission society and three local home-mission associations are connected with this province, besides which, several congregations have charged themselves with particular spheres of home-missionary work. The *Training Institution*, a theological seminary at Fulneck, was established in 1860.

The Unity's Elders' Conference forms the Provincial Elders' Conference for Germany. The number of congregations in the German Province is 20; of boarding-schools, 19; there are also five smaller ones, a school for the children of missionaries at Kleinnelke, the *Padagogium*, or grammar-school at Nisky, Prussia, a normal training-school for teachers at Nisky, and a theological seminary for preparing candidates for the ministry at Gnadenfeld, Prussia.

The peculiar home-work called the Diaspora, carried on by the German section of the Church, dates from 1729. Its object is stated to be Catholic and unsectarian. It does not seek to make proselytes, or to draw members from other Protestant communities, "but to excite and foster spiritual life by means additional to those provided by the Established Church." These missions are established in Denmark, Norway, Sweden, Germany, Russia, (chiefly the Baltic provinces), Poland, and Switzerland. Four congregations have been organized in connection with the mission in Bohemia. This work is prosecuted under adverse circumstances, it being opposed by the local officers, and subjected to acts of petty persecution. It is supported by contributions from the churches at large.

The American Province is divided into two divisions, called the Northern and Southern divisions. The Northern division is subdivided into four districts, called the New York, Pennsylvania, Western, and Northwestern dis-

tricts. Twenty congregations are connected with the northern division, nine with the southern. Nine schools, and the theological seminary at Bethlehem, Pa., are sustained in the American Province. The home-mission work in this province has been carried on with great vigor, especially for about fifteen years past. An important sphere of labor has been opened to it among the German immigrants. The mission agents are instructed to aim at the foundation of Moravian congregations, which, on satisfying the conditions required for the support of a regular ministry, are recognized as belonging to the Brethren's church, and participating in all constitutional privileges. Till then they are not entitled to representation at Synods, though the missionaries themselves are full members of the Provincial Synods.

The Provincial Synod of the Moravian Church (American Province, Northern division) met at Litiz, Pa., June 11th. The Synod was composed of the three bishops, three members of the Provincial Synod, seven teachers in the schools of the Synod, and large delegations from forty-one churches. It appeared from the report of the Provincial Elders' Conference that two bishops, four presbyters, and fourteen deacons, had been ordained since the Synod of 1870; six laymen had received license to preach. The increase of communicants during the preceding six years had been thirty per cent, while it had been only eleven and a half per cent. for the foregoing period of six years. Eight churches had been built since 1870, eleven students had been graduated at the Theological Seminary during the preceding three years. The subject of revising the old Moravian class idea was referred to a committee, to report to the next Provincial Synod. A proposition was made to distribute the members of the Provincial Board among different congregations. It was thought that by this means the Provincial Elders would be brought more directly and practically in contact with the congregations, and with the work of the Church in new fields. It was urged, in support of the proposition, that the task of administering the affairs of the body was not sufficient to occupy all the time and energies of three men with no other employment. The Provincial Elders represented that they found employment for all their energies, and that the distribution proposed would render conference between them—which the wants of the Church required should be frequent—impossible. The Board of Elders were empowered to appoint one of their number to another office if they should deem it expedient, and were advised "to remove their residence to some other place than Bethlehem, Pa., if they find that such removal is practicable, and will result in decreasing the expenditures of the sustentation fund, or in improving the condition of the same." The Provincial Elders' Conference were instructed

by the Synod that before they sanction the formation or establishment of a new station or congregation, they require an assurance that the minister shall have a sufficient support. The organization of home-missionary societies was commended, and the congregations were instructed to take up at least one collection every year for home missions. It was ordered that no new church under the home-mission work should be consecrated until the payment of all expenses incurred should have been assured.

According to the report of 1872, the foreign missions of the Moravian Church were conducted in sixteen provinces, viz.: Greenland, Labrador, the North American Indian provinces, St. Thomas, St. Jan, St. Croix, Jamaica, Antigua, St. Kitts, Barbadoes, Tobago, the Mosquito coast, Surinam, South Africa West, South Africa East, Australia, and West Himalaya. The number of stations was 101. The missions were served by 811 missionaries, of whom sixteen were natives, eleven native assistants, 106 native leaders of meetings, 1,427 native helpers, and 1,171 day and Sunday-school teachers. They had seven training-schools and 805 stations, sub-stations and Sunday-schools, with 17,022 scholars. The number of baptized adults in the missions was 35,810, and the total number of persons under care and instruction was 69,139. The annual financial statement at the date of making the report, with a deficiency of 21,334 thalers (\$15,360), so that the board had, with the deficiency of the previous year, a debt of 28,362 thalers to provide for. The increase of the debt was caused, not by a diminished income, for this was 17,000 thalers more than that of the year before, but by increased expenses in building and traveling. The total expense of the work during the year was 342,300 thalers (\$246,456).

MOROCCO, SIDI MOHAMMED, Sultan of, born in 1803; died at Morocco, September 19, 1873. He was the son of the Sultan Abderrahman, whom he succeeded on the Moroccan throne, September 6, 1859. His father's reign had been made unfortunate by a succession of controversies with the maritime European powers, generally growing out of the depredations of the Rif pirates, a body of buccanners, who attacked and plundered commercial vessels, making their headquarters at towns on the Moorish coast. In 1856 the French Government had demanded compensation from Abderrahman for the losses these pirates had inflicted on their commercial marine, and had obtained it without war, the first instance on record. In September, 1859, just at the time of Sidi Mohammed's accession to the throne, Spain made a similar demand for satisfaction for a series of attacks on Spanish commerce, and for an insult to the flag, at Ceuta, in August of that year. The Emperor repudiated the responsibility sought to be imposed, and declared the Rifa rebels. This answer was not

satisfactory, and, on October 22d, Spain declared a war which lasted until March 26, 1860, when the Moorish sovereign ceded to the Spaniards an immense tract of territory, valued at more than \$50,000,000, besides guaranteeing a money indemnity of 20,000,000 piastres. Point Ceuta, opposite to and thirty-eight miles from Gibraltar, is a part of the ceded territory. After the peace of March 26, 1860, Sidi Mohammed made efforts to renew friendly relations with the European powers. He adopted measures for the improvement of navigation, and ordered the erection of many light-houses along the coasts. The concessions he made to foreigners in relation to customs duties roused dissatisfaction among many of his subjects, and in 1862 nearly compelled his abdication. In June, 1864, he issued a decree permitting free trade to all the European powers, throughout the whole extent of his empire. Several times extensive insurrections occurred, but they were always put down with a strong hand. To suppress one, more general than most of them, in 1867, he put himself at the head of an army of 30,000 men. The Moors of both sexes are remarkable for obesity, and the Sultan was reputed to be the heaviest man in his dominions. In 1863 he weighed 360 pounds, and he had since greatly increased in corpulency.

MUNDT, CLARA, *née* MILLER, a German novelist, better known by her *nom de plume* of LOUISA MÜHLBACH, born in New Brandenburg, Mecklenburg-Strelitz, January 2, 1814; died in Berlin, September 27, 1878. She was the daughter of a man of superior education, and herself received the best advantages of intellectual culture, which she zealously improved. While traveling in Italy in 1836 she met Theodor Mundt, then a promising young author. They were married in 1838, and lived for some years in Berlin, where he was appointed a professor in the University of Breslau. He was one of the leaders of the "Young Germany" party, but was for some years before his death, in 1861, in a condition of mental infirmity and helplessness. His wife had brought him back to Berlin, where she continued to reside till her death. She had won some reputation as an author before her marriage by her "First and Last Love," published in 1838, and, from that time till her death, her pen was almost constantly employed. Her works were of three classes: those in which she discussed, either in the garb of romance, or in the form of essays, those moral and social ques-

tions which in this country have come to be known as "woman's rights" doctrines; those which describe simply the scenes of every-day life; and those which are strictly historical romances. It is the last and by far the most numerous class of her works that have been chiefly republished in other countries. Messrs. Appleton translated and published twenty of the historical novels, most of them originally issued in two or three volumes. Yet Mrs. Mundt, though writing all her novels with her own hand, was not deficient in her duties as a wife, mother, or matron. She was remarkable for her extensive knowledge and ready memory on all historical subjects. Her residence in Berlin was for many years the resort of persons distinguished in the realms of literature and art, and her receptions were almost as famous as those of Madame Récamier. Her two daughters were carefully educated under her own supervision, and one became an actress, while the other is already known as a writer of fiction. The "Louisa Mühlbach" historical novels translated and republished here and in Great Britain were: "Queen Hortense;" "Goethe and Schiller;" "Andreas Hofer;" "Old Fritz and the New Era;" "Napoleon and Blucher;" "The Empress Josephine;" "Napoleon and the Queen of Prussia;" "The Daughter of an Empress;" "Marie Antoinette and her Son;" "Joseph II. and his Court;" "Frederick the Great and his Court;" "Frederick the Great and his Family;" "Berlin and Sans-Souci, or, Frederick the Great and his Friends;" "The Merchant of Berlin, and Maria Theresa and her Fireman;" "Louisa of Prussia and her Times;" "Henry VIII. and Catharine Parr;" "Prince Eugene and his Times;" "Mohammed Ali and his House;" "The Story of a Millionaire;" "Two Life Paths." The following have not been translated, though we give their titles in English: "First and Last Love" (already mentioned), 1838; "The Life of Woman: Daughter, Spouse, Artist, and Princess," 1839; "Voyager Birds," 1840; "The World," 1841; "The Nursling of Nature," 1842; "Fortune and Money," 1842; "Justin," 1843; "Gisela," 1844; "Eva," 1844; "After the Marriage," 1844; "Novels and Scenes," 1845; "Sketches of Travel," 1846; "Court Histories," 1847; "Aphra Behn," 1849; "The Nursling of Society," 1850; "The World and the Theatre," 1854; "Novels," 4 vols., 1865; "Novelettes," 2 vols., 1860-'66.

N

NAUMANN, KARL FRIEDRICH, Ph. D., a German mineralogist and author, born at Dresden, May 30, 1797; died at Leipsic, December, 1878. He was a son of the eminent musical composer Amedée Naumann, and

early developing a taste for physical science, he was sent to the Academy of Mines at Freiberg, where he was a pupil of the geologist Werner, after whose death he continued his studies at Leipsic and Jena; but learning that

F. Mohs, the celebrated mineralogist had succeeded Werner, he returned to Freiberg to study mineralogy under him. In 1821-'22, he made a voyage of scientific exploration along the coasts and into the interior of Norway, and published the results of his tour under the title of "Documents on Norway," 2 vols., in 1824. On receiving his degree at Jena in 1823, and at Leipsic in 1824, Naumann presented two theses afterward published, "Essay on Mineralogy," 1824, and "Elements of Crystallography," 1825; and in 1826 was appointed Professor of Crystallography in the Academy of Freiberg. Soon after, he was appointed also examiner in that institution, and in 1835 the chair of Geognosy was added to his previous professorship. In 1842 he was called to the University of Leipsic as Professor of Mineralogy and Geognosy. In 1866 he was appointed Privy Councillor for Mines. Prof. Naumann's other published works were: "Treatise on Mineralogy," 1828; "Treatise on Pure and Applied Crystallography," 1830; text and notes to the Geognostic map of the kingdom of Saxony, 5 numbers, 1836-1845; "Elements of Crystallography," 1841; "Elements of Mineralogy," 1846, revised and enlarged, 1854; "Treatise on Geognosy," 2 vols., with an atlas, 1850-'58. Most of these works have been many times reprinted, and some of them have been translated into other languages.

NAVY OF THE UNITED STATES. There were in the navy, at the close of the year, 165 vessels, carrying, exclusive of howitzers, 1,269 guns, being 13 vessels less than were reported the previous year. In this total are included 63 steamers, other than iron-clads and tugs, carrying 826 guns; 29 sailing-vessels, 322 guns; 48 iron-clad vessels, 121 guns; and 25 tugs, used for navy-yard and freight purposes. Of this number, there were then in commission for sea-service and distributed on the several foreign stations and on the United States coasts, 46 vessels.

There was great activity at the end of the year in the various navy-yards of the country. Besides six live-oak cruising-ships, which were undergoing complete repairs, eight new sloop-of-war, authorized by the last Congress, were in process of construction, four at the various navy-yards, three under contract in private yards, and the remaining one under private contract in the navy-yard at Kittery, Me.

The cruising-stations remained unchanged during the year. As now established, they are designated the European, Asiatic, North Atlantic, South Atlantic, North Pacific, and South Pacific. Over these, embracing the frequented waters of the globe, are scattered a cruising force of less than forty vessels, which by their presence are relied on to encourage citizens of the United States, and, if required, to protect them in their property in all lands. The commanders of the naval forces on the different stations, at the end of the year, were:

European, Rear-Admiral A. Ludlow Case; Asiatic, Rear-Admiral Thornton A. Jenkins; North Atlantic, Rear-Admiral G. H. Scott; South Atlantic, Rear-Admiral James H. Strong; North Pacific, Rear-Admiral A. M. Pennock; South Pacific, Rear-Admiral John J. Almy.

The appropriations made by Congress for the fiscal year ending June 30, 1873, including the amount of the special appropriation previously made, and expended before the date named, were in the whole, \$20,589,601.57, and the actual expenditures for that period, viz., from July, 1872, to June 30, 1873, chargeable to these appropriations, including the expenditure during the time named of the special appropriations above referred to, amounted to \$19,552,272.16, or something more than \$1,000,000 less than the whole amount appropriated. The appropriations made for the current year commencing July 1, 1873, amount in the aggregate, including the special appropriations for the new sloop-of-war (less the small amount expended before June 30, 1873), to the sum of \$23,147,857.68.

The estimates for the coming year are stated at \$19,252,235; to which is to be added \$864,589 for current repairs of buildings, docks, and incidental expenses in navy-yards, etc. These estimates are less than those of last year by more than \$2,000,000, but they do not include any extraordinary expenditure for the permanent improvement of the navy, or the amounts necessary for the repair of our iron-clad fleet, or for the continued prosecution of some of the great works necessary to the proper condition of the naval establishment of the United States. The number and yearly amount of pensions of the navy on the rolls November 1, 1873, were as follows:

PENSIONERS.	On the Rolls November 1, 1873.	Yearly amount of Pensions on the Rolls, Nov. 1, 1873.	Am't paid for pensions during fiscal year ending June 30, 1873.
Navy invalids.....	1,484	\$155,810 75	\$160,971 98
Navy widows, and others.....	1,799	290,516 00	302,936 71
Total.....	3,283	\$446,326 75	\$463,908 69

The expeditions organized under the authority of Congress for the survey of the Darien and Nicaragua routes, with the view to the construction of an interoceanic canal, have completed their labors and made final reports. The favorable report of Commander Selfridge, of the survey of the Isthmus of Darien in 1871, rendered it desirable to explore more thoroughly the region of the Napipi, and to determine how far the surveys to the south could be profitably made in the valley of the Atrato. For this purpose, Commander Selfridge was ordered to organize another expedition, which reached Panama in January, 1873. The expedition has been so successful as materially to improve upon the route already discovered and surveyed, and has marked out a line for this great enterprise that can be con-

structed within the limit of an expenditure more moderate than could have been expected, when compared with the immensity of the undertaking, and the great benefits that cannot fail, upon its completion, to accrue to commercial interests.

Briefly stated, the route selected by Commander Selfridge includes 100 miles of river-navigation of the Atrato, which has been carefully sounded, and found to be fully capable of being navigated by the largest class of ocean-steamers. Between Atrato and the Pacific, a canal or artificial cut is made but 28 miles in length. The canal, for 22 miles of this distance, passes through a plain, with a gradual rise of 90 feet. There will then remain six miles to the Pacific, of which there are a moderate open cut and three miles of tunneling. It is estimated that the work will cost between \$50,000,000 and \$60,000,000, and that it can be completed within ten years. A careful survey and soundings of the Atrato resulted in the fact that, though capable of navigation for steamboats, even in its lowest stage, to Quibuto, the head of ship-navigation was reached but a short distance above the line selected for the canal. Surveys of the interior settled the fact that it would not be profitable to explore South of the Napipi; not only because the westerly trend of the coast made the area that would have to be cut broader in extent, but also that it was traversed by numerous streams, forming the water-shed of mountainous ridges that would have to be cut transversely. Moreover, the Cordilleras, which present a marked depression near the head-waters of the Napipi, increase rapidly in altitude toward the south.

The Nicaragua expedition, in charge of Commander E. P. Lull, sailed from the United States in December, 1872, and returned in July, 1873, after proving the existence of a practicable route for an interoceanic ship-canal, having Lake Nicaragua at its summit-level. It is proposed to connect the lake with the Pacific by a canal 16.33 miles long, beginning at the mouth of the Rio del Medio, and terminating at Brito. The first seven and a half miles will require an excavation averaging 54 feet in depth, and will be the most expensive part of the whole work. For the rest of the distance, the profile is lower than the proposed level of the surface of the water; embankments will be constructed with the materials excavated. Ten locks, and one tide-lock, will be required, between the lake and the sea. There will be 56 miles of lake-navigation.

Slack-water navigation in the San Juan, from its head to the mouth of the San Carlos, is considered perfectly feasible; and it is proposed to improve the river by four dams, one each at Castillo Rapids, Balas Rapids, Machuca Rapids, and at the mouth of the San Carlos, at all of which places excellent locations for dams exist. A short section of canal with one lock will be required to get around each of the upper three dams. From just above the fourth

dam to Greytown an independent canal will be required, 41.90 miles in length, of which 36 miles will require an excavation less than the prism of the canal; the remaining four miles are made up of short reaches, where the line cuts through hills. Seven locks, besides those abreast the dams, will be required, and should be located in the hills in order to take advantage of the natural rock-foundation. Some improvement will be required in places in the river-bed, for which the amount has been computed, and the cost estimated.

The total length of the proposed canal is 61.74 miles, of which 47.37 miles are in excavation and embankment. The average depth of excavation throughout is, but nine feet above the prism of the canal. No tunnel is required. The harbor of Greytown has been partially destroyed by a silt which comes from the San Carlos, and others of the lower tributaries of the San Juan, and the branch of the river leading to Greytown has become so much filled up that it is now, at the lowest stage of the water, but 324 feet wide and six inches deep at the fork. It is proposed to shut off this branch entirely, and send all the silt-bearing water through the Colorado mouth, which empties into the sea 18 miles from Greytown, and to admit to the harbor only the water of the canal, which, being drawn from the main river above the mouth of the San Carlos, will be perfectly clean. The harbor then once cleared out will leave nothing to deteriorate it again. A short breakwater will be required to protect the entrance from the surf, also one at Brito, both of which are included in the estimate for the work. Careful gauges at the lowest stage show that Lake Nicaragua will supply thirty-eight times the maximum possible demand of water. The climate is considered perfectly healthy for temperate people who adopt the simplest sanitary precautions. Part proof of this is that not a man has been lost in either of the expeditions lately operating in the country, though constantly subjected to severe labor and exposure.

Much interest was manifested during the year in relation to the Arctic Expedition of the *Polaris*, in consequence of the important results that were made public. It will be remembered that the *Polaris*, a topsail schooner of over 400 tons, under command of Captain Hall, left the United States in June, 1871, on an expedition toward the north-pole. On the 18th of August of that year, the vessel left Upernavik, Greenland, after which no tidings were received until the 9th of May, 1873, when the United States Government was informed by telegraph from St. John's, Newfoundland, that nineteen persons, late of the *Polaris* had been rescued from the floating ice in Baffin's Bay, by the British sealing-steamer *Tigress*, and that they had safely landed at that port. The United States steamer *Frolic* having been dispatched for these persons, re-

turned early in June with two of the officers, eight of the crew, and nine Esquimaux, five of whom were children, all in good health. These persons were at once summoned to Washington, and were there examined by a board of examiners, consisting of Secretary Robeson, Commodore William Reynolds, the senior officer of the Navy Department, Prof. Spencer F. Baird of the Smithsonian Institution, and Captain H. W. Howgate, of the Army Signal Service.

From the evidence taken on this examination, and the report submitted by Secretary Robeson to the President of the United States, it appears that the *Polaris* left Tessinsac on the 24th of June, and, proceeding northward under steam, passed through Smith Sound and Kennedy Channel with very little delay or obstruction from the ice. On the 30th of August the vessel reached the highest northern latitude that has been attained by any Arctic Expedition, viz., $82^{\circ} 16'$. In this strait or channel, which Captain Hall named Robeson Straits, the ship was met by heavy floating ice, extending entirely across the straits, and barring her further progress northward. On the 3d of September the *Polaris* entered her first winter quarters in *Polaris Bay*, so named by Captain Hall, in latitude $81^{\circ} 38'$ north, and longitude $61^{\circ} 44'$ west.

Soon after Captain Hall made a sledge expedition northward as far as latitude $82^{\circ} 2'$. Having returned to the ship, October 24th, apparently in his usual fine health, he was attacked with sickness of the stomach and vomiting, and died on the 8th of November. Rumors having been set afloat that Captain Hall's death occurred under mysterious circumstances, giving grounds for suspicion that he had been unfairly dealt with by some one or more of his associates, Secretary Robeson, after taking testimony on this point, reported that "a very particular questioning of every one of the officers and crew of the *Polaris*, and of the scientific corps (except the three persons as yet unexamined) has completely satisfied my associates and myself that his death occurred from purely natural causes; that his medical treatment was judiciously adapted to his case, and that he was tenderly nursed and cared for to the last."

On the death of Captain Hall, Mr. Buddington succeeded to the command of the *Polaris*, as had been provided for in the instructions for the voyage issued by the Secretary of the Navy. The vessel remained in winter quarters until August, 1873. On the 16th of that month it was made fast to a large floe of ice in latitude about 80° north, and longitude 68° west, and while still fast to this floe drifted south through Smith's Sound nearly to Northumberland Island. On the night of the 15th of October, in latitude $79^{\circ} 58'$ north, during a violent gale of wind and snow, the ship was suddenly beset by a tremendous pressure of the ice which was driven against her from

the southward, and forced under her, pressing her up out of the water, and, by successive and violent shocks, finally throwing her over on her beam-ends.

A portion of the crew, consisting of Captain Tyson and eighteen others, were ordered to carry provisions to a safe place on the ice. While so engaged, in the darkness of an arctic night, in the midst of a fierce gale and driving snow-storm, the hawsers of the *Polaris* failed to hold her, and she broke adrift from the floe and in a few minutes was out of sight of the party who were at that moment busily at work on the ice. "It is the uniform opinion of the witnesses," says Secretary Robeson, "and our unanimous conclusion from the testimony and from the circumstances detailed, that this separation of the ship from the men, women, and children upon the ice-floe was purely accidental."

From October 15, 1872, until April 1, 1873, these nineteen men, women, and children, remained through the whole of the dark and dreary winter 187 days upon the field of floating ice which was originally about five miles in circumference. On the 1st of April, finding their icy quarters much reduced by the breaking up of the floe, and that the current was then setting them to the southward and to sea, they launched their boat into open water and pulled toward the west, in order, if possible, to gain the coast. They had now reached about latitude 59° north. On the 31st of April they were rescued by the British sealing-steamer *Tigress* about forty miles from the coast of Labrador.

Of the *Polaris* herself nothing more was known until September 19, 1873, when the arrival of the British sealing-steamer *Arctic*, at Dundee, Scotland, with six of the officers and three of her crew on board, was telegraphed to the Department of State by the United States consul at that port, with the further information that the remaining officer and the other two seamen would soon follow; all hands of the *Polaris* were picked up by the British whaling-steamer *Ravenscraig* on the 23d of June, south of Cape York, off the Greenland coast, while on their way in boats to the southward, the *Polaris* having been abandoned as a wreck.

In the mean time, however, the *Tigress*, under command of Captain James A. Greer, had been fitted out and dispatched in search of the *Polaris*; while the *Junata*, under command of D. L. Braine, was sent to assist the *Tigress*. The latter sailed from New York, July 14th, and after a search in the Arctic regions arrived at St. John's October 16th, where information of the rescue of the *Polaris* crew was received. The *Tigress* reached New York, November 9th.

The rescued officers and crew of the *Polaris* were summoned to Washington for examination, the results of which were not reported at the close of the year.

NEBRASKA. Public affairs in this State, during the past year, have been unusually quiet, and little occurred worthy of record. A session of the Legislature was held in the early part of the year, and, although one hundred and seventy-three acts were passed, the legislation was mostly of local interest. After the adjournment it was ascertained that the "act to define the boundaries of certain counties," approved March 23, 1873, contained clerical errors to such an extent as would have led to inextricable difficulties in the administration of justice and the collection of revenue in certain portions of the State; and that the "Act to incorporate cities of the first class," by an oversight, had failed to receive the signature of the President of the Senate, as required by the constitution, and thereby its validity was left in great doubt. After consultation with the Attorney-General and representatives from the localities affected, the Governor deemed these matters of sufficient importance to summon a brief extra session of the Legislature to remedy the defects.

In Nebraska, as in most of the Northwestern States, the "Farmers' Movement" was one of the chief events of the year. The views of the agricultural and industrial classes in this State are set forth in the following resolutions, which were unanimously adopted by the Convention of the "Grand Castle of the Order of American Farmers and Mechanics of Nebraska," held on the 29th and 30th of July, at Lincoln:

Whereas, When people organize themselves into a body for the accomplishment of objects of public importance, it is proper and requisite that they declare to the world the objects and principles of their organizations, and the reasons which impel them thereto: therefore be it

Resolved, By the Grand Castle of the Order of American Farmers and Mechanics in the State of Nebraska, that, although our order is a patriotic school of instruction for the young and middle-aged; is benevolent and beneficent in its objects, toward all its members and toward all mankind, seeking the highest good of all; yet it is national in its objects, and aims at the accomplishment of honesty and purity in political action; integrity, sincerity, truthfulness, and justice in our public servants; to be their masters in fact, and not in name alone; to secure a just and equitable administration of all public affairs; to rid our Legislatures and our Congress of monopolists and corruptionists, and of their control; to effect the passage and enforcement of just laws for the benefit of the whole people; and to infuse a spirit of sincerity, truth, and justice, into the entire body politic, from the centre to the extremes of the nation.

Resolved, That we deem it better, and cheaper, for our servants in Congress to prevent crime among themselves, than to investigate it, and let the criminals go unpunished.

Resolved, That in our opinion those servants of the people who robbed the Treasury of the United States by appropriating to themselves the money of the people under the name of "back and increased pay," were knowingly guilty of a gross and brazen fraud upon the nation, and by that act stamped their names with lasting infamy, and proved themselves unworthy of public confidence.

Resolved, That the unjust and oppressive tariffs of way-freights and of passenger-travel on the trunk-

line railroads of the country are frauds upon the people, whose extraordinary liberality in many instances gave to the companies the means to build the roads, in the firm belief, and with at least an implied promise, that the roads were to be built for the benefit of the people; but they now find their gift in the hands of tyrants, who seek to reduce to perpetual slavery the people who raised them from poverty to opulence.

Resolved, That as revolution or reform must come, this Order seeks and offers to the people a true and simple, yet perfect means of reform, by uniting in strong fraternal ties, and by ties of mutual interest and mutual protection, all of the industrial classes of the nation, and all who are sincerely opposed to fraud and corruption in high places, and to the tyrannical oppression of monopolies.

Resolved, That the people require, and have a right to demand reasonable and liberal means of intercommunication and commerce throughout the country, and reasonable river and ocean freights, and no pooling or oppressive combinations of railroad companies.

Resolved, That we are opposed to subsidizing corporations upon principle; that hotels, printing companies, and flouring-mills, are as justly entitled to subsidies as railroad companies; and that the issue of bonds, as gratuities or gifts to railroad corporations, as practised in this State, is prejudicial to the interests of the people.

Resolved, That while taxes for the support of government ought cheerfully to be paid, taxes extorted for the payment of bonds donated to monopolies and the interest thereon are illegal and grievously oppressive.

Resolved, That we are friends to railroads, and acknowledge their necessity and usefulness as servants, but we are opposed to them as masters.

Resolved, That we have no feelings of opposition to any body or order of men, who are sincerely opposed to monopolies, corruption, and wrong; and we will freely cooperate with all who will support the rights of the people.

Resolved, That thorough, firm, and determined organization by all the industrial classes is necessary for the accomplishment of the purposes herein contemplated.

The present State government, which is entirely Republican, is as follows: Governor, Robert W. Furnas; Secretary of State, John J. Gosper; Auditor, John B. Weston; Treasurer, Henry A. Koenig; Attorney-General, J. R. Webster; Chief-Justice, George B. Lake; Associate-Justices, Daniel Gantt and Samuel Maxwell. The Legislature is composed as follows:

MEMBERS.	Senate.	House.	Joint Ballot.
Republicans.....	11	32	43
Democrats and Liberals.....	2	7	9
Republican majority.....	9	25	34

The latest official exhibit of the finances and wealth of Nebraska is that of January 1, 1873. At that time the liabilities and resources of the State were as follows:

LIABILITIES.	
Outstanding bonds (held by State School Fund).....	
Nebraska Territorial Bonds.....	\$16,200 00
Due University Fund.....	16,000 00
General Fund warrants.....	250,295 21
Interest on General Fund warrants (estimated).....	10,000 00
Total	\$292,595 21

RESOURCES.

Cash in Treasury.....	\$356,634 85
Taxes due January 1, 1873.....	\$44,557 86
Delinquent taxes due (General and Sinking Fund).....	215,321 30
Militia expenses (due from United States)....	19,509 85
Total.....	\$836,033 86

The total appropriations necessary for 1873 and 1874 were estimated at \$259,756, including \$72,600 for salaries, \$46,000 for the Penitentiary, \$63,000 for the Insane Asylum, \$16,850 for legislative expenses, \$9,600 for official expenses, and \$51,706 for general expenses.

The public lands of the State, 360,625 acres, were valued at \$38,226,839. The valuation of other property was: town lots, \$10,229,278; merchandise, \$2,300,861; manufactures, \$251,840; stocks and shares, \$301,612; moneys and credits, \$1,536,834; household furniture, \$208,811.

There were 59,218 horses, valued at \$7,948,896; 161,835 neat-cattle, valued at \$3,288,054; 12,930 mules and asses, valued at \$331,241; 25,971 sheep, valued at \$33,983; and 182,483 swine, valued at \$3,231,564.

The railroad property was valued at \$9,507,095; telegraph property at \$362,522; while the total valuation of the State was \$69,873,818.

Nebraska has upward of 1,200 miles of railroads, while the length of the projected roads is about 800 miles more. Among the completed roads are the Union Pacific, traversing the State from Omaha to Bushnell, 463 miles; Omaha & Northwestern, from Omaha to Clinton, 114 miles; Burlington & Missouri in Nebraska, from Omaha to Kearney Junction, *via* Crete and Beatrice, 191 miles; Midland Pacific, from Nebraska City to Lincoln, 58 miles; Brownville & Fort Kearney and Pacific; Sioux City Pacific, from Sioux City to Fremont, 88 miles; Omaha & Southwestern. The projected roads are from Clinton to the Niobrara River; from Pierce to Sioux City; from Pierce to North Platte; from Pierce to Columbus; from Columbus to Crete; from Pierce, in Pierce County, to Yankton; from Fort Kearney to Jefferson; from Fairbury to Beatrice; from Beatrice to Brownville; from Beatrice to Marysville; from Fairbury to Red Cloud and thence up the Republican; from Grand Island to St. Paul in Howard County; from St. Paul to intersect the Pierce & North Platte Railroad at Junction City in Valley County. The last-named branch traverses the beautiful valley of the North Loup almost its entire length, running through Howard, Greeley, and Valley, all new counties, and but partially settled.

The agricultural resources of Nebraska are considered to be of a high order. Oats, rye, barley, potatoes, corn, wheat, buckwheat, sorghum, tobacco, sweet-potatoes, and sugar-beet, are among the crops that flourish. Not less than 50,000,000 acres are well adapted to their production. The average yield of wheat for ten years has been about 26 bushels per acre,

while from 45 to 75 bushels of corn per acre are produced.

The freedom from severe frosts in May and September makes it an excellent fruit-producing State, and it will grow apples, pears, peaches, plums, cherries, grapes, currants, strawberries, and raspberries. At the fair held in Richmond, Va., in 1871, Nebraska exhibited 176 varieties of fruit, 146 of which were apples. Iowa came next, and had 118 distinct varieties of apples. Turnips, carrots, ruta-bagas, parsnips, pumpkins, squashes, melons, grapes, cabbages, rhubarb, onions, radishes, lettuce, have all been tried and grow luxuriantly. Flax is a quick crop and has yielded 15 to 22 bushels of seed per acre in ninety days. The castor-bean has been profitably cultivated, yielding 15 to 25 bushels per acre, worth \$2.50 and \$3.00 per bushel. Wild fruits grow in abundance along all the streams, and furnish to early settlers a valuable substitute for cultivated fruits.

NÉLATON, AUGUSTE, M. D., a distinguished French physician and surgeon, born in Paris, June 17, 1807; died in that city, September 20, 1873. He was a pupil of Dupuytren, and after receiving his medical degree commenced practice in Paris in 1836, and soon after was appointed surgeon of the hospitals, and lecturer to the Faculty of Medicine. He was a good lecturer and competed for the professorship of the Surgical Clinic, a position which his master Dupuytren had once held. He failed the first time, in 1850, but succeeded in 1851, over a host of competitors, and by the brilliancy of his teaching drew around him very large classes. But his skill as an operator gained him such a reputation that he was compelled to give up his professorship in 1867, and receive the title of Emeritus Professor. He extracted the ball by which Garibaldi was so grievously wounded, and in 1867 by a skillful operation saved the life of the prince imperial. In 1866 he was appointed Surgeon in Ordinary to Napoleon III., and his private practice was beyond that of any other French surgeon. In 1856 he was elected a member of the Academy of Medicine in the section of Surgical Pathology. In 1868 he was made a Senator of France, and the year previous Grand Officer of the Legion of Honor; Rayer, Michel Lévy, and Ricord being the only other physicians who have received this honorable distinction. Science is indebted to him for some modifications in operating. He has given his name to a process for setting the shoulder, and another for the elbow, also to an operation in lithotomy called the *taille de Nélaton*. The ingenious probe called by his name, for discovering and identifying a rifle-ball by the stain of the lead, is also one of his inventions. The rigors of the siege of Paris contributed to his death, and he finally succumbed to an organic disease of the heart from which he had long suffered. Dr. Nélaton's published works were: "Recherches upon the Tuberculous Affection of the

Bones," 1837; "Treatise on Tumors of the Breast," 1839; "Comparison of Different Methods of Operating in the Treatment of Cataract," 1850; "On the Influence of Position in Surgical Diseases," 1851; "Elements of Surgical Pathology," 5 vols., 1844-1860—a work of great value. Dr. Nélaton also contributed with MM. Velpeau, Denonville, F. Guyon, etc., to the report on the "Progress of Surgery," at the Exposition in Paris in 1867.

NELSON, SAMUEL, LL. D., an American jurist, for twenty-seven years one of the Associate Justices of the Supreme Court of the United States, born at Hebron, Washington County, N. Y., November 10, 1792; died in Cooperstown, N. Y., December 13, 1873. He was of Scotch-Irish lineage, his grandfather having emigrated from the north of Ireland to Salem, Washington County, N. Y., in 1760. Young Nelson's early life was spent on the farm. In 1811, being then nineteen years old, he entered Middlebury College, Vermont, and graduated in 1813. Having selected the law for his profession, he became a student in the office of Savage & Woods, where he remained two years. He was admitted to the bar in January, 1817, and began practice in the village of Cortland. His first suits were confined to the narrow arena of the justices' courts, but in trying his first case in the Court of Common Pleas, he detected an error in practice on the part of his opponent, procured a stay of proceedings, and the execution already entered being set aside, tried his case, and gained it. This success at once brought him reputation and clients. His first appearance in politics was in 1820 as presidential elector, the vote of the State being given to James Monroe and Daniel D. Tompkins. In 1823 Governor Yates nominated him as Circuit Judge for the district which included the counties of Broome, Chenango, Cortland, Delaware, Otsego, Tioga, Tompkins, Steuben, and Yates. This post he held for eight years, proving himself equal to every emergency. On the 1st of February, 1831, he was made Associate Justice of the Supreme Court of this State. After six years' service in this position, he was promoted by Governor Marcy to the chief-justiceship, and presided over the court for eight years, at a period when its decisions were quoted as final in every State in the Union, and respected as authority in the courts of England. He was elected a member of the Constitutional Convention of 1846. He was appointed by President Tyler to fill a seat on the bench of the Supreme Court of the United States left vacant by the death of Smith Thompson, in 1844. This was more than a promotion; it was a transfer to a field of labor which presented many and varied difficulties to a judge whose previous work, while thorough and successful, had been in a comparatively narrow sphere. In the Supreme Court, his decisions did more than command the respect of bar and bench; they were conclusive and unanswerable. In

the famous Dred Scott case, Judge Nelson concurred in the decision of Chief-Justice Taney, urging that if Congress possessed power under the Constitution to abolish slavery, "it must necessarily possess the like power to establish it." During the war, his conservatism, as well as his life-long political affinities, led him to regret many encroachments of the military on the civil power, but his relations with the Administration were as harmonious as his loyalty was undoubted. In 1871 Justice Nelson was appointed by President Grant to serve as a member of the Joint High Commission to arbitrate the Alabama claims on the part of the United States. The delicate and responsible duties here imposed upon him compelled a temporary cessation of his attendance on the bench, and enfeebled as he was by age, it was evident that his strength was undergoing heavier drafts than it could safely endure. Exposure to cold during the final sessions of the Commission, the fires having been allowed to go out, it is said, brought on a serious attack of lumbago. He returned to Cooperstown still suffering from its effects, and spent a quiet summer, but at the end of that time found himself unable to return to the seat which he never occupied again. His resignation was tendered to the President in October, 1872, and Ward Hunt was appointed his successor. His death was very sudden; indeed, without warning, and without pain. Judge Nelson was a man of grave and dignified appearance, gentle and courteous in his manner. His figure was erect till his last years. He was as cheerful and his intellect as clear and strong at eighty as when he was but twenty years of age. He was slow in forming his judgments of men, and was generally reluctant to express them when they were not favorable. His career upon the bench was characterized by honesty, firmness, discretion, and the purpose to do justice.

NETHERLANDS, THE, a country in Europe. King, William III., born February 10, 1817; succeeded his father, March 17, 1849; sons—1. William, Prince of Orange, heir-apparent to the throne, born September 4, 1840, admiral-lieutenant in the navy; 2. Alexander, born May 25, 1851, lieutenant in the navy; brother of the King, Henry, born June 13, 1820. The area of the kingdom is 12,679 square miles. The population of the provinces was, according to the census of 1872, as follows:

PROVINCES	Population, 1871.	Population, 1872.
Drenthe.....	166,713	107,634
Friesland.....	300,257	304,106
Gelderland.....	486,029	487,778
Groningen.....	228,862	230,357
Limburg.....	225,352	225,702
Brabant.....	435,141	438,769
North Holland.....	591,388	602,539
South Holland.....	700,318	710,753
Overijssel.....	256,681	258,590
Zealand.....	181,581	181,650
Utrecht.....	175,037	176,524
Total.....	3,637,279	3,674,402

With regard to religion, the population was, on December 1, 1869, composed as follows:

PROVINCES.	PROTESTANTS.		CATHOLICS.		Israelites.	Other Sects.
	Total.	Per Cent.	Total.	Per Cent.		
Drenthe.....	97,533	92.3	5,578	5.2	2,339	187
Friesland.....	205,166	90.8	24,045	8.2	2,173	970
Gelderland.....	208,164	62.0	159,274	26.8	4,745	210
Groningen.....	204,715	90.8	15,796	7.0	4,599	303
Limburg.....	8,734	1.7	218,709	97.7	1,870	15
Brabant.....	49,711	11.6	377,133	87.9	1,961	62
North Holland.....	382,697	66.3	160,039	37.8	22,933	1,177
South Holland.....	508,082	73.8	166,242	34.6	12,158	1,728
Overijssel.....	171,656	68.7	75,422	39.7	3,765	305
Zea'land.....	130,557	73.5	45,048	35.9	504	460
Utrecht.....	107,756	69.1	64,145	37.0	1,514	145
Total.....	2,193,281	61.8	1,313,084	36.7	68,008	5,161

The following towns had, on December 1, 1872, more than 20,000 inhabitants:

Cities.	Population.	Cities.	Population.
Amsterdam.....	277,765	Maestricht.....	28,279
Rotterdam.....	122,471	Leeuwarden.....	26,254
Hague.....	92,785	Dordrecht.....	25,498
Utrecht.....	61,601	Bois-le-Duc.....	21,164
Leyden.....	39,574	Tilburg.....	21,153
Groningen.....	39,015	Nimwegen.....	22,785
Arnhem.....	34,064	Delft.....	22,748
Haarlem.....	32,156	Zwolle.....	21,113

The area of the Dutch colonies in the East Indies is estimated at 615,000 square miles. The population was, in 1871, as follows:

Colonies.	Population.	Colonies.	Population.
Java and Madura.....	16,891,068	Celebes.....	345,912
Western Sumatra.....	939,663	Menado.....	233,051
Bencoolen.....	123,045	Islands. { Ternate.....	95,142
Lampoon.....	110,906	{ Ambolna.....	236,737
Palembang.....	481,081	{ Banda.....	
Rio.....	39,604	Timor, 1863.....	900,000
Blanca.....	61,289	Bali and Lom- bok.....	860,000
Billiton.....	24,999	New Guinea.....	300,000
Western Borneo.....	861,603	Total.....	22,750,000
South and East- ern Borneo.....	851,519		

The foreign population of these colonies included 12,848 Europeans in the army; 35,437 other Europeans (28,003 in Java and Madura); 1,028 descendants of Europeans; 247,097 Chinese; 12,342 Arabs; and 17,757 Hindoos.

The budget for the year 1873 estimates the expenditures at 96,879,274 florins; the revenue at 91,873,719 florins; the deficit at 5,005,555, which was to be provisionally covered by the issue of bank-notes. At the commencement of 1873 the national debt was represented by a capital of 950,693,826 florins, divided as follows:

DIVISION OF DEBT.	Capital.	Interest.
Debt bearing interest at the rate of 2½ per cent.....	Fl.rins. 646,602,908	Florins. 16,165,072
Debt bearing interest at the rate of 3 per cent.....	98,612,734	2,808,381
Debt bearing interest at the rate of 3½ per cent.....	12,351,000	437,535
Debt bearing interest at the rate of 4 per cent.....	168,127,200	7,525,098
Debt bearing no interest.....	10,000,000	
Terminable annuities and sinking fund.....		557,035
Total.....	950,693,826	27,493,131

In the session of 1873, the States-General passed an act to increase the annual sum set aside as a sinking-fund for the redemption of the national debt, namely, 1,900,000 florins, by 7,000,000 florins, and thus redeem a total amount of 8,900,000 florins within the year. The entire reduction of the national debt, in the twenty-two years from 1850 to 1872, amounted to 275,016,112 florins. In the budget of the East India colonies the revenues are estimated at 133,433,472 florins; the expenditures at 123,005,777 florins; surplus, 10,427,695 florins. The colonies have no longer any public debt, as it has been transferred to the home government.

The army of the Netherlands in Europe consisted, in 1873, of 62,068 men, of whom 2,054 were officers; the East Indian army numbered 27,659 men, inclusive of 1,218 officers.

The navy, on January 1, 1873, consisted of 73 steamers, with 596 guns, and 40 sailing-vessels, with 385 guns: total, 113 vessels, and 981 guns.

The movement of shipping, in 1871, was as follows:

SHIPPING.	LOADED.		IN BALLAST.		TOTAL.	
	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.
Entered, total.....	7,940	2,223,009	408	92,322	8,351	2,315,331
Entered, Dutch.....	2,862	651,230	164	13,137	3,026	664,367
Cleared, total.....	4,632	1,408,060	2,654	941,533	8,286	2,349,592
Cleared, Dutch.....	1,819	459,565	1,153	199,543	3,002	659,108

The merchant navy, on December 31, 1871, consisted of 1,902 vessels, of 492,438 tons. The aggregate length of railroads in operation was, on January 1, 1872, 1,459 kilometres (1 kil. equals 0.62 English miles); in the course of construction, 128 kilometres; total, 1,581 kil-

ometres. The aggregate length of the State telegraph-lines, in January, 1873, was 3,288 kilometres; the aggregate length of the wires, 11,276 kilometres.

The imports and exports in 1871 were valued as follows (value expressed in florins):

COUNTRY.	Imports.	Exports.
Foreign countries	505,806,000	428,844,000
Java	80,448,000	31,214,000
West Indian colonies	511,000	252,000
Guinea	4,000	171,000
Total	586,769,000	460,481,000
Transit		188,996,000
Grand total trade	586,769,000	649,477,000

At the beginning of the year, the Dutch authorities of Java deemed it necessary to send an expedition against the Sultan of Acheen, in Sumatra. In February the minister, Fransen van de Putte, stated in the Second Chamber, in reply to an interpellation of the deputy Blussée regarding the state of affairs in that island, that the Government would find it necessary to protect its authority, and that it had sent two men-of-war to the East Indian possessions. As the negotiations with the Sultan (*see* ACHEEN), remained fruitless, war was formally declared against him on March 26th. The first expedition proved an entire failure, the commander-in-chief himself being killed, and the reëmbarkation of his troops being effected with great difficulty. Toward the close of the year a second expedition was fitted out, under the chief command of General Van Swieten, which promised to be more successful. (The history of this second expedition will be given in the ANNUAL CYCLOPEDIA of 1874.)

In July, the Minister of War resigned because the Second Chamber refused to abolish the right of substitution in the army, as proposed by the ministry. The other members remained, and the colonial minister declared his determination to stay until the second expedition should be concluded. The ministerial crisis, however, continued, as the Liberals had only a small majority, and the Conservatives and Catholics made an attempt several times to overthrow it by means of a coalition. They found it, however, impossible to form a new cabinet. On September 13th the Chamber was closed, and, on the 15th the new session was opened by the King. The speech from the throne represented the foreign and domestic relations of the kingdom as satisfactory, and promised an energetic continuation of the war against Acheen. The resignation of the Minister of War, Count Limburg-Stirum, was accepted, and the Minister of the Navy provisionally intrusted with the affairs of the war ministry. The budget for the East India colonies, for the year 1873-'74, appeared again to be favorable, the revenue being estimated at 123,000,000 florins; the expenditures at 110,000,000 florins; the surplus, notwithstanding the Achinese War, at 10,000,000 florins.

On December 14th the Second Chamber rejected the budget of the navy, in consequence of a speech made by Vice-Admiral Fabius, deputy for Amsterdam, who represented the condition of the Dutch navy as utterly wretched, and as probably insufficient to bring the war to a successful close.

NEVADA. The State government of Nevada, in 1873, was as follows:

Governor, L. R. Bradley, Democrat; Lieutenant-Governor, Frank Denver, Democrat; Chief-Justice of the Supreme Court, B. C. Whitman, Republican; Secretary of State, James D. Miner, Republican; Treasurer, J. Schooling, Democrat; Controller, W. W. Hobart, Republican; Attorney-General, L. A. Buckner, Democrat. The following is the composition of the State Legislature:

	Senate.	House.	Joint Ballot.
Republicans	16	26	52
Democrats	7	11	18
Independent	1	1	2
Republican majority	8	24	32

The leading interest of Nevada is mining, in which respect it is in the front rank of the States and Territories on the Pacific slope, that produce the precious metals. Within its borders is the famous Comstock Lode, one of the richest silver-veins known. About one third, however, of the production of this vein is gold. According to the report of the General Superintendent of Wells, Fargo & Co.'s Express, the value of the precious metals produced in Nevada exceeds that of all the other States and Territories west of the Missouri River, as is shown by the statement on page 805.

The aggregate production in those States and Territories exceeds that of 1872 by about \$10,000,000; the total yield for 1872, according to the same authority, having been \$62,236,913. Nearly the whole of this increase has been in Nevada, except a small amount in the production of Utah and Colorado. A decrease, however, is manifest in Arizona, California, British Columbia, Oregon, Washington, Idaho, and Montana.

The figures given do not furnish a correct basis for estimating the product of Arizona, but it is inappreciable as compared with the others. Mexico is represented in silver only, and the amount named will not give a correct idea of the product of the Pacific or West Mexican coast, as the Pacific Mail Steamship Company carry, independent of Wells, Fargo & Co., in addition to which large amounts are conveyed by British war-vessels to Panama, or San Francisco, of which no record is made.

The aggregate yield of the Comstock mines from July 1, 1872, to September 1, 1873, is stated at \$22,122,666.

According to the report of the Director of the United States Mint, the total amount of the precious metals from Nevada, deposited at the various mints and assay-offices to the close of the year ending June 30, 1873, was \$10,401,717, of which \$9,261,649 was gold and \$1,140,067 silver. The deposits for 1873 were \$129,787 gold and \$1,727,081 silver.

High authorities assert with confidence, that Nevada is to become the leading stock-range upon the Pacific coast; though it pre-

sents a dry appearance, yet its foot-hills and valleys abound in the most nutritious food for cattle. This, with the salubrity of the climate, offers the greatest inducements to stock-raisers.

The topography of the country shows the entire State broken by a succession of mountain-ranges, the general course of which is north and south. Though the summits of these ranges are sometimes covered with snow the entire year, yet in the valleys, during the coldest seasons, snow seldom lies, and cattle are allowed to range throughout the year without housing, and even in midwinter are driven to the markets ready for the slaughter-pens.

It is only within the past few years that this branch of industry has presented itself. The droughts in California for some years past have been so disastrous to stock-raisers that thousands of head of cattle were shipped to Nevada. As an evidence of the value attached to the land in this State, the State Surveyor-General reports that during the past year applications for purchase were made for 184,000 acres, comprising only agricultural and grazing lands, an increase of 100,000 acres over the applications of the preceding year.

The Indian tribes residing in Nevada comprise the Pah-utes, Pi-utes, Washoes, Shoshones, and Bannocks. The Pah-utes, numbering about 6,000, inhabit the western part of the State. Two reservations have been set apart for them, one known as the Walker River, and the other as the Pyramid Lake reservation, containing each 320,000 acres. There are about 2,500 of the Pi-utes, who inhabit the southeastern part of the State. They have no reservation set apart for them, nor have they any treaty with the United States. The Washoes number about 500, and the Shoshones about 2,000. The Bannocks, roaming in the northeastern part of the State, are about 1,500 in number, and are doubtless a portion of the people of that name ranging in Eastern Oregon and Southern Idaho.

Carson City is the capital of Nevada; and is also the seat of justice of Ormsby County. It is situated in Eagle Valley, four miles from Carson River, and 178 miles northeast of San Francisco; population in 1870, 3,042, of whom 697 were Chinese. It is in a fertile and picturesque region. The Sierra Nevada Mountains rise abruptly on the west, while the valley of the Carson extends far to the north and east. A railroad connects it with Virginia and Gold Hill, in Storey County, which is used chiefly to transport ore from the mines at those places to the crushing-mills on the Carson River, and to carry back timber, which is abundant on the slopes of the Sierra Nevada. The State-house is in course of construction. The branch mint occupies a fine building. The deposits of bullion for the year ending June 30, 1873, amounted to \$9,247,857.35, of which \$5,004,536.69 were gold, and \$4,243,320.66 silver. The total deposits of gold to

that date were \$10,504,074. Of this amount \$124,154 was deposited in 1870, \$1,008,809 in 1871, and \$4,371,578 in 1872. The total value of the coinage since the organization of the mint to June 30, 1873, was \$1,883,704, of which \$1,491,975 was gold, and \$391,729 silver. In addition to which, bars were manufactured, to the value of \$1,969,645 in 1871, \$7,869,287 in 1872, and \$8,490,681 in 1873: total \$18,329,613. Of the last amount, \$9,282,644 were imported silver bars, \$8,977,824 imported gold bars, and \$119,143 fine gold bars.

The State-prison is at Warm Springs, two miles to the east. There are four quartz-mills with seventy-six stamps, for the production of silver, and several churches, good schools, two daily newspapers, and the State and Odd-Fellows' Libraries. Carson City was founded as a ranch before the discovery of silver in Nevada, after which time it increased rapidly, being on the line of travel through the State previous to the opening of the Central Pacific Railroad.

NEW HAMPSHIRE. The political campaign in New Hampshire opens with the beginning of the year. This year the Democratic State Convention was held at Concord on the 8th of January. James A. Weston, of Manchester, was nominated for Governor, receiving 498 votes out of 518 on the first ballot. The nomination was declared unanimously by acclamation. Horatio Colony, of Keene, was nominated for Railroad Commissioner by acclamation, and the following platform was adopted unanimously:

We, the Democracy of the State of New Hampshire in convention assembled, hereby reaffirm, in the language of the 7th article of our Bill of Rights, that

"The people of this State have the sole and exclusive right of governing themselves as a free, sovereign and independent State, and do, and forever hereafter shall, exercise and enjoy every power, jurisdiction and right pertaining thereto, which is not or may not hereafter be by them expressly delegated to the United States of America in Congress assembled;" therefore—

Resolved, That we cordially invite the coöperation of all patriotic citizens in opposing the evident purposes of the present Administration to consolidate all power in the General Government, and to accomplish the subversion and final overthrow of all State authority.

Resolved, That the necessity of the reforms heretofore urged by us becomes more apparent in the fact that the President is attempting to subvert, by the lawless exercise of military power, the recorded will of at least three States of the Union: in the fact that he utterly ignores the rules of appointment to office which Congress prescribed for his guidance, notwithstanding his ostentatious pledge to the contrary; and in the fact that schemes are already maturing to dissipate the small remnant of our public lands.

Resolved, That the only effectual civil service reform is that which lessens the patronage of the President, and limits his eligibility to a single term of office.

Resolved, That the Credit Mobilier frauds are the legitimate fruits of the lawless, reckless and profligate policy of the present Administration; and it is due to our national interests and honor, not only that the operators shall be made to disgorge their ill-gotten

plunder, but that the modes of government shall be restored to their ancient simplicity and economy, so that jobbery and robbery shall be alike impossible.

Resolved, That we condemn the act of the late Legislature of this State whereby the State tax was increased from \$300,000 to \$600,000—believing that the former amount is adequate to meet all necessary expenses and accruing interest, and to pay the State debt as fast as this generation should be required to pay it; and we hereby demand, in behalf of a tax-burdened people, that our State government shall again be administered with the prudence and economy of the olden time.

Resolved, That we emphatically condemn the illegal use of money in our elections, and pledge ourselves to expose and bring to condign punishment all who would degrade the elective franchise by making it a matter of corrupt bargain and sale, and we pledge the best efforts of the Democratic party to restore our elections to their ancient purity.

The Republican State Convention was held at Concord, on the 14th of January, 520 delegates being present. Ezekiel A. Straw, of Manchester, was nominated for Governor by acclamation, and Edward D. Hodsdon, of Dover, received 430 votes out of 503 for Railroad Commissioner. The resolutions, which were adopted unanimously, were as follows:

1. We recognize in the result of the recent presidential election the undiminished confidence which the country reposes in the integrity, capacity, and patriotism of the Republican party. In response to

that expression, the Republicans of New Hampshire pledge anew their devotion to the following principles and sentiments:

2. We insist that the Philadelphia platform shall be faithfully and practically observed by a wise, honest, and economical administration of national affairs, by a thorough reform of the civil service, by as rapid a reduction of taxation as will gradually diminish the public debt and certainly preserve the public credit, by such an adjustment of duties upon foreign imports as will cheapen the necessities of life and bring the largest return to the labor and capital invested in the agriculture, manufactures, and commerce of the country, and by a rigid enforcement of those articles of the Constitution which guarantee equal rights and exact justice to all classes, irrespective of race, color, sex, or condition.

3. In State affairs we pledge a continuance of that policy which has successfully carried our State through great and unexampled trials, which has preserved its credit, reduced its debt, stimulated its prosperity, and made its name a synonym of integrity, industry, and intelligence throughout the Union.

4. Believing that the permanence of free government and republican institutions is dependent upon the intelligence and virtue of the people, we hail all measures wisely calculated to diffuse education, restrain intemperance, and punish all violations of the law.

5. We heartily commend the determination of the Democratic party of this State to reform its practices in the use of money in elections; and we pledge our earnest cooperation to enable that party to keep good its good resolution.

6. We again heartily present the name of Ezekiel

STATE HOUSE, CONCORD.

A. Straw as our candidate for Governor, in the confident assurance that his capacity, integrity, and patriotism, will secure his triumphant reelection.

7. We commend our candidate for Railroad Commissioner, Edward D. Hodsdon, as entirely worthy of confidence and support.

A convention of Liberal Republicans was held at Concord on the 18th of February, consisting of fifty persons, mostly members of the State Central Committee. Samuel K. Mason, of Bristol, was nominated for Governor, and William A. Heard, of Sandwich, for Railroad Commissioner. District and county conventions were held at the same time, and nomina-

tions made for Congressmen, State Senators, and county officers. Of the resolutions adopted, the following were the most significant:

Resolved, That the Liberal Republican party was called into existence to resist the growing tendency toward a centralization of unwarranted powers in the executive department of the Government, and to call a halt of the Republican party in its march toward that unfathomed sea of corruption to which it seemed hastening.

Resolved, That in the light of the recent humiliating disclosures of wholesale bribery and corruption, which must cause every true man of whatever party to hang his head in shame and disgust, and in the usurpations which have been brought to light,

particularly in the State of Louisiana, the initiation of vast schemes for the wasteful expenditure of the people's money, the necessity for the Liberal movement has been made apparent and its action a position fully vindicated.

Resolved, That whoever else be implicated in the scandals which are being dragged to the face of day, we rejoice that no taint or smell of pollution attaches to the fair fame of any of the great Liberal Republican leaders.

Resolved, That, as members of a party in whose glorious records and achievements in the past we take a fair pride, and claim a right to share, we see no way left open to us, but to maintain the integrity of the Liberal Republican organization, as a nucleus around which honest men of all parties may gather, in order to carry forward in the future those great principles which it seems to us our old party has lost sight of, and those measures of reform which are vital to the best interests, if not to the very existence, of republican institutions.

Resolved, That we make no indiscriminate warfare upon the Administration; we acknowledge and appreciate the great services which General Grant has rendered to the country; and we shall hail with approval any honest efforts, from whatever quarter they may come, to purify the political atmosphere, and to bring about a reform in the administration of public affairs; but we believe the time has come when higher motives should govern political action than a mere blind adherence to the mandates of party.

The election occurred on the 11th of March. According to the official canvass of the votes at the opening of the Legislature in June, the whole number cast for Governor was 67,821. Of these Ezekiel A. Straw, Republican, received 34,023; James A. Weston, Democrat, 32,016; John Blackmer, Temperance candidate, 1,078; Samuel K. Mason, Liberal Republican, 696, and eight votes were scattered. This made the majority of Straw over all others 223. A member of Congress was chosen in each of the three districts of the State: in the first district, William B. Small, Republican; in the second district, Austin F. Pike, Republican; and in the third district, Hosea W. Parker, Democrat. Five executive councillors were voted for, and in the first, third, and fourth districts Republicans were elected; in the fifth district a Democrat was elected; and in the second there was no choice. The vacancy was filled by the Legislature by the choice of a Republican for the second district. A full Senate of twelve members was also voted for, and seven Republicans and three Democrats were elected, while in two districts there was no choice. The Legislature filled the vacancies by choosing a Democrat from one district and a Republican from the other. The whole number of Representatives elected was 350, of whom 201 were Republicans, 146 Democrats, and 3 Liberal Republicans.

The Legislature assembled at Concord on the 4th of June. On the 11th the two Houses met in joint committee to elect the executive officers, who are not chosen by a popular vote. For Secretary of State, 316 votes were cast, of which Benjamin F. Prescott, Republican, received 194, and Isaac M. Blodgett, Democrat, 122. For State Treasurer, there were 823 votes cast, of which Solon A. Carter, Republi-

can, received 193, and George W. M. Pitman, Democrat, 130. For State Printer, there were 318 votes, 192 of which were for Edward A. Jenks, Republican, 125 for James M. Campbell, Democrat, and 3 scattering. For Commissary-General, there were only 8 votes cast, all of which were for Charles T. Montgomery, Republican.

The session of the Legislature was over before the 4th of July. Very little of the legislation is of general interest. The most important subject considered was the expediency of a revision of the constitution. There was a special committee on this subject, and a bill was brought in providing for a convention for the purpose of making the revision, but it was finally defeated in the Senate. The present constitution has been in force for eighty years, only one slight amendment having been made in that time. The principal grounds on which a revision is urged is the need of a new system of representation which shall reduce the lower branch of the Legislature and increase the Senate, the need of a new and more equitable system of taxation, and of minor courts in cities for unimportant civil and criminal cases.

The subject of allowing women to vote and hold office in school districts was brought under consideration, and the proposition was defeated in the House by a vote of 89 to 228. A proposition for increasing the salaries of the Judges of the Supreme Court also failed, as did a measure providing for a board of visitors for prisons and asylums. A new election law was passed, providing that only plain white ballots should be used, and providing for the punishment of bribery and the exercise of improper influences at elections. The act of Congress increasing the salaries of members was condemned by a joint resolution.

The finances of the State are in a very sound condition. The receipts from State tax, for the year ending May 31st, were \$3,000,000, from other sources, \$121,412.51, making a total of \$421,412.51. The expenses of the State government for the same period amounted to \$163,545.36, while \$251,908.33 of interest on the State debt was paid, making the total expenditure \$415,448.69. This left a surplus of \$5,963.82, which was applied to the payment of the principal of the debt. A brief statement of this debt is as follows:

Old liabilities, June 1, 1873.....	\$2,075,733 67
Municipal war loan.....	2,905,695 44
Total.....	\$4,981,428 11
Assets in Treasury.....	143,303 85
Net liabilities of State, June 1, 1872 ...	\$4,138,124 26
Old liabilities, June 1, 1873.....	\$1,760,220 04
Municipal war loan.....	2,905,695 44
Temporary Loan.....	236,050 00
Total.....	\$4,191,965 48
Assets in Treasury.....	59,805 04
Net indebtedness, June 1, 1873.....	\$4,132,160 44
Reduction of debt during the year.....	\$5,963 82
The reduction of the debt was unusually	

small, owing to a diminution of the State tax by nearly one-half and the payment of interest on the municipal war loan. It is nearly thirty-two years before the last of the State bonds mature, so that an average payment of \$125,000 per annum will extinguish the principal of the debt at maturity. In the estimation of the Governor, an annual tax of \$400,000 will enable the Treasury to meet this demand in addition to paying the current expenses of the government, but as there was on the meeting of the Legislature a temporary loan of \$226,000 and \$700,000 of the debt matured in the course of two years, it was deemed expedient to authorize a temporary loan of \$500,000 to meet present demands. This was done by the Legislature.

There is but one bank for discount doing business under a charter from the State, and that has a capital of but \$50,000. There are sixty-one savings-banks, seven having been organized during the year. The aggregate of deposits in these institutions on the 1st of June was \$29,758,782.27, an increase of 14 per cent. over the preceding year. The number of depositors was 94,665, or nearly one-third of the entire population.

The educational interests of the State are in a flourishing condition. The Agricultural College has taken possession of its new buildings at Hanover, and has admitted a class of 23 students.

The Insane Asylum of the State only affords accommodation for 79 out of 300 insane people, the others being left to the tender mercies of local authorities or private charity. The only provision made for the education of the deaf and dumb and the blind is the support of 17 persons at the American Asylum at Hartford, Conn., and 9 persons at the Perkins Institute, South Boston, Mass.

The State-prison is self-supporting. The profit of the labor of the inmates for the year amounted to \$8,000, and the books of the treasurer now show a balance of \$20,000 in favor of the prison.

The geological survey of the State is substantially finished, and the first volume of the report was submitted at the last session of the Legislature. A triangulation of the State by a corps of engineers of the United States Coast Survey, under the charge of Prof. E. T. Quimby, of Dartmouth College, has been in progress, and will furnish valuable data for a new map.

NEW JERSEY. The public attention of the State in the early part of the year was centred upon the passage of the General Railroad Bill, which became a law early in April, a few days before the adjournment of the Legislature. Much of the attention of that body was absorbed by the consideration of this measure. The contest for and against its passage was regarded as one between the people and the Pennsylvania Central Railroad Company; the question being, whether that corporation

should exercise the exclusive right of operating a railroad between Philadelphia and New York. This right had been held by the Camden and Amboy Railroad Company, whose railroad had been recently leased to the Pennsylvania Central Company. The passage of the law caused great rejoicing in the State. The popular sentiment may be taken as reflected in the following language:

If the late Legislature had but enacted the General Railroad law, and then adjourned without the passage of another bill, it would have been entitled to the grateful remembrance of every true Jerseyman. For more than thirty years, in the matter of railroads, our State has been under the control of a giant corporation, which, while it did much to foster railroad enterprise within the State, opposed with all the ability in its power, and by a plentiful use of money, every attempt to secure a competing line between the cities of New York and Philadelphia. It was urged that in granting the charter of the Camden & Amboy Railroad Company, one of the first to be built in the country, which was at most an experiment, and that on this account, and for certain concessions made to the State, it was given the exclusive right to carry passengers and freight between the above-named cities for a long period of years. Whenever an effort was made to obtain a charter for another road, there was a great outcry about the violation of "vested rights," and "the inviolability of contracts," which soon created a wide-spread alarm among the people, and served to secure the defeat of every project looking to a through-line. These "exclusive privileges" were extended and practically remained in force until the United Railroads of New Jersey were leased for nine hundred and ninety-nine years to the Pennsylvania Railroad Company. The terms of the lease had scarcely been ratified before a renewed effort was put forth to secure a competing road between the two principal cities on the Atlantic coast. This was as stoutly opposed as ever, but the will of the people could not be brooked any longer, and the result is the enactment of the General Railroad Law. This, then, through the action of the Legislature, has been made the year of deliverance for New Jersey, in that all barriers to future enterprise have been removed, and the right to build railroads conferred upon all who have the means and the disposition to invest it in that way. The results cannot be foretold, but every indication points to an era of permanent prosperity and material progress in our State, such as has long been hoped for, but never before realized.

In passing the "General Railroad Law" no vested rights were disturbed, as no movement had been made for that purpose until the charter granted to the Camden & Amboy Company had legally expired. An important provision of the law, which went into effect upon its passage, is that "no franchises heretofore granted to construct a railroad, or to build or establish bridges or ferries, or operate any line of travel, and take tolls or fares therefor, shall hereafter continue to be, or be construed to remain exclusive, and that no like franchise hereafter granted shall be or be construed to be exclusive, unless in such grant heretofore made or hereafter to be made it be so expressly provided."

The law fixes the number of incorporators requisite to form a new railroad company at thirteen, a majority of whom must be residents of the State. The termini of the road and the

counties through which it is to pass must be named in their articles of agreement. The incorporators must state their aggregate of capital stock at not less than \$10,000 for every mile, with the privilege of issuing bonds not exceeding the amount of the paid-up capital stock. When at least \$2,000 for every mile of road is subscribed, and ten per cent. paid in cash, an affidavit to that effect, and setting forth that it is intended in good faith to build a road, must be appended to the articles of agreement and filed for record in the office of the Secretary of State. That filing constitutes the charter. The construction of the road must be begun within six months after the date of organization. If the road is not more than fifty miles long, a track shall be ready for use in two years; if more than fifty miles, six months additional are allowed for every twenty miles.

No one can be a director who is not a stockholder. The stock shall be deemed personal property, and shall be transferable only after all previous calls shall have been fully paid thereon. No companies can use their funds for the purchase of their own or the stock of any other corporation. Fare is fixed at three cents a mile, and freight at six cents a ton for each mile (the Legislature reserving the right to reduce profits to ten per cent.), and the rate charged for freight between way-stations, or a terminal and a way-station, shall not be greater in proportion than is charged for the same between the terminal stations of such roads. Wherever a company hold real estate (and none is allowed to hold more than five acres for one depot), it shall pay taxes the same as individuals, and a tax of one-half of one per cent. on cost, equipments, and appendages of the road, is to be paid annually. The corporate existence of an association is to cease if the construction of the road is not begun within one year, or put in operation in four years from the filing of its articles of association. There are many other minor provisions concerning the location of routes, and settlement for damages; and also for the payment of officials, servants, and laborers, and the liability of stockholders and companies to creditors.

Immediately after the passage of the General Railroad Bill, articles of association, and the surveys, were filed by the National Company for a new line between Philadelphia and New York. The route extends from Yardleyville, on the Delaware River, through Trenton to Boundbrook, and thence by way of Newark and the New-Jersey Central to the terminus at Communipaw. A portion of the route had already been surveyed, under the "Stanhope" charter of the previous year, and negotiations made for the purchase of the property; but these operations were subsequently checked by a judicial injunction. These legal restraints having been removed by the passage of the new law, work was at once resumed. The New Jersey Railway Company was also or-

ganized to construct a through-line between New York and Philadelphia, and engineers at once entered upon the survey. The proposed road will cross the Pennsylvania or New Jersey Railroad at Waverly, and thence over the meadows, and unite with the New Jersey road at West End, near Jersey City. The Delaware will be crossed at or near the present terminus of the Mercer & Somerset Railroad, near Yardleyville, the route running thence to Philadelphia in as direct a course as the nature of the ground will permit.

Another important railroad enterprise in New Jersey is the Easton & Amboy road, which is designed to form a new coal-route across the State, with its terminus at Amboy, where extensive purchases have been made for a depot. Rapid progress has been made in the construction, and it is expected that by May 1, 1874, the company will have expended in round numbers \$6,000,000, and will have the best coal-road in New Jersey.

The proper mode of taxing railroad corporations was a subject earnestly discussed by the Legislature. Many of the railroad charters exempt their property from local taxation, in consideration of paying to the State a certain rate upon capital or cost of works. A law was passed by the Legislature intended to establish an equitable system of taxing railroad corporations.

It provides, first, for payment of tax to the State on cost, equipment, and appendages, at the rate which had previously been fixed; or, where no rate had been prescribed, after the rate of one-half of one per cent. upon such cost; and, secondly, for payment to municipalities on all real property therein, including improvements, not by way of repairs (except the main stem or road-bed and track, not exceeding 100 feet in width, and excepting, also, ten acres or less at termini in one body), after the rate of one per cent. on the valuation thereof. The fourth section of the act provides for the appointment of a "commissioner of railroad taxation," to assess and report the value of railroad property in the State liable, under the law, to municipal taxation. The commissioner has made a report, and values the property of railroad corporations liable to municipal taxation in 162 townships and cities, at more than \$17,000,000. Fifty-two townships and cities return "no property liable," and thirty-nine more have not reported, but in a majority of these it is known that there is no taxable railroad property. The tenth section of the act provides that any railroad corporation which claims exemption from all taxation, other than is provided for by their charters or by special laws, may, within six months from the approval of the act, file in the office of the Secretary of State a declaration surrendering all claim to such exemption, and accepting the provisions of said act. Several companies have availed themselves of that section.

The question of the validity of the lease made by the United Railroad Companies to the Pennsylvania Railroad Company (*see ANNUAL CYCLOPEDIA* for 1872), which had been carried on appeal to the Court of Errors and Appeals, was decided in July. The court reversed the decision of the Chancellor by a nearly unanimous judgment, and decided the lease to be invalid.

The Legislature adjourned on the 4th of April. No election for State officers was held in 1873. Fifteen members of the State Senate held over, and elections were held in only six counties for Senators, for terms of three years each. The entire number of members of the House was elected. The political complexion of the Legislature is as follows:

LEGISLATURE.	Senate.	House.	Joint Ballot.
Administration.....	14	32	46
Opposition.....	7	23	35
Administration majority...	7	4	11

The present State government is as follows: Governor, Joel Parker, Democrat; Secretary of State, Henry C. Kelsey, Democrat; Assistant Secretary of State, J. D. Hall, Republican; Treasurer, Josephus Sooy, Jr., Republican; Controller, Albert L. Runyon, Republican; Attorney-General, Robert Gilchrist, Democrat; Chancellor, Theodore Runyon, Democrat; Vice-Chancellor, Amzi Dodd, Republican; Chief-Justice of the Supreme Court, Mercer Beasley, Democrat; Justices of the Supreme Court, Joseph D. Bedle, Democrat; V. Darrimple, Republican; George S. Woodhull, Republican; Edward W. Scudder, Democrat; Bennet Van Syckel, Democrat; David A. Depue, Republican; Superintendent of Public Schools, E. A. Apgar, Democrat.

The commissioners appointed by Governor Parker, in April, to draft amendments to the State constitution, assembled in Trenton, July 8th. Of those originally selected, Chancellor Zabriskie had died, and Chief-Justice Mercer Beasley, Martin Ryerson, and Chancellor Runyon, had resigned. The vacancies thereby caused having been filled, the commissioners were as follows: District I., Benjamin F. Cooper, Samuel H. Gray; District II., Philemon Dickenson, John C. Ten Eyck; District III., Robert S. Green, John F. Babcock; District IV., Joseph Thompson, Jacob L. Swayze; District V., Augustus W. Cutler, Benjamin Buckley; District VI., John W. Taylor, George Ferris; District VII., D. S. Gregory, Robert Gilchrist. Ex-United States Senator Ten Eyck was elected president. The labors of the commission were concluded on the 23d of December, when the report of the committee on final revision was submitted and adopted.

The portion of the first article, relating to the taking of private property for public use, as amended, declares that private property shall not be taken for public use without just compensation, property-owners having the

right of trial by jury, and that when property is taken by any incorporated company no deduction from the compensation shall be made for benefits to the property. Paragraph 20 declares that no county, city, borough, town, township, or village, shall give any money or property, or loan its money or credit to, any individual, association, or corporation, or become security for or be the owner of any stock or bonds of any association or corporation; also that they shall not incur any indebtedness, or impose any tax, except for State, county, city, township, or village purpose. The debt of counties is limited to two per cent. of the valuation of their taxable property, and that of towns, boroughs, and townships, to four per cent.; the debt of cities is limited to eight per cent., except for water-supplies. Paragraph 21 provides that "no donation of land, or appropriation of money, shall be made by the State, or any municipal corporation, to any society, association, or corporation whatever."

In the article defining who shall be entitled to vote, the word "white" is stricken out, and it is declared that no elector in the actual military service of the State, or the United States, shall be deprived of his vote by reason of absence from his election district, and it is provided that persons convicted of bribery in legislation may be deprived of the right to vote.

The distribution of the powers of the government remains unchanged. It is also provided that all bills and joint resolutions, instead of simply being read three times in each House, shall be printed before they are received or considered, and read throughout, section by section, on three several days, in each House, before the final passage, the reading of the title only never to be taken as the reading of the bill. The compensation of the members of the Senate and General Assembly is fixed at \$500 as an annual salary, with a sum not exceeding \$25 for incidental expenses. The provisions concerning the appointment of members of the Legislature to civil office have been amended by the following substitute: "No member of the Legislature shall receive any civil appointment within this State or to the Senate of the United States from the Governor, the Governor and the Senate, or from the Legislature."

The provision relating to appropriations for public schools is amended by adding clauses providing for the establishment by the Legislature of public schools for the instruction of all persons in the State between the ages of five and eighteen.

The following new paragraphs were added to section 7 of Article IV.:

12. No trust funds shall be invested in the bonds or stock of any private corporation, unless such investment be authorized or directed in the instrument or by the person creating the trust.

13. No act of the Legislature shall limit the amount to be recovered for injuries resulting in

death, or for injuries to person or property; and in case of death from such injuries, the right of action shall survive, and the Legislature shall prescribe for whose benefit such action shall be prosecuted. Nor shall any act prescribe any limitation of time within which suits may be brought against corporations for injuries to person or property, or for other causes different from that fixed by the general laws prescribing the time for the limitation of actions.

14. No act of the Legislature shall take effect until the 4th day of July next after its passage, unless the Legislature shall, by a vote of two-thirds of all the members elected to each House, otherwise direct.

15. The Legislature shall not pass private, local, or special laws, in any of the following enumerated cases, that is to say: Laying out, opening, altering, and working, roads or highways; vacating any road, town-plot, street, alley, or public grounds; regulating the internal affairs of towns and counties; appointing local officers, or commissions to regulate municipal affairs; selecting, drawing, summoning, or impaneling grand or petit jurors; regulating the rate of interest on money; creating, increasing, or decreasing, the percentage or allowance of public officers during the term for which said officers were elected or appointed; changing the law of descent; granting to any corporation, association, or individual, the right to lay down railroad tracks; providing for changes of venue in civil or criminal cases.

The Legislature shall pass general laws providing for the cases enumerated in this paragraph, and for all other cases, which, in its judgment, may be provided for by general laws. The Legislature shall pass no special act conferring corporate powers, but they shall pass general laws under which corporations may be organized and corporate powers of every nature obtained, subject, nevertheless, to repeal or alteration at the will of the Legislature.

16. The Legislature may establish a court or courts, with original jurisdiction, over all cases of condemnation of land and assessments for improvements.

17. Property shall be assessed for taxes under general laws, and by uniform rules, according to its true value in money. No property of any kind, protected by law, except that owned by the United States, the State, counties, townships, cities, towns, or boroughs, shall be exempt by law from its full share of all State, county, township, and city taxes and assessments, except burying-grounds and cemeteries held by stock companies. No law shall be enacted or contract entered into by which the exercise of the power of taxation shall be restricted, impaired, or impeded. The Legislature may provide by law for taking away from any person or persons, natural or artificial, now possessing, or entitled to the same, any right of exemption from taxation which cannot be revoked without compensation, and for paying to such person or persons a just compensation for the right so taken away.

In section 8, paragraph 1 is so amended as to declare positively that every member of the Legislature shall take the oath of office, which is also amended by adding clauses affirming that the member has not paid or contributed any thing or made any promise in the nature of a bribe at the election at which he was elected, and that he has not and will not receive any money or valuable thing from any source to control his vote or action as a member in any case. The paragraph is further amended by adding a clause, after the one empowering members-elect to administer to each other, declaring that any member refusing to take the oath shall forfeit his membership, and that any member convicted of falsely taking

the oath, or of having broken it, shall be subject to the punishment provided for willful and corrupt perjury. A new paragraph, numbered 2, gives the form of an oath for every officer of the Legislature.

The article defining the powers and duties of the Executive is so amended as to give the Governor the power to convene the Senate alone instead of both Houses of the Legislature as at present. A two-thirds vote, instead of a majority, is required to pass a bill over the Governor's veto. The Governor is empowered to object to one or more items in an appropriation bill while approving of the others. An amendment is added, providing that the Governor shall not be elected by the Legislature to any State or United States office during the term for which he is elected Governor.

A new section is also added, declaring that conviction of felony or otherwise infamous crime, or any official delinquency under the State laws, shall, after final judgment, vacate any office held by the convicted person, and a duly-authenticated record of the conviction and judgment shall be conclusive evidence of the forfeiture, and shall authorize competent authority to fill the vacancy.

In regard to the judiciary, the present constitution provides that there shall be no more than five judges of the Inferior Court of Common Pleas in each county, one judge only for each county being appointed every year. The amendment provides that there shall be no more than two judges appointed in each county besides the justice of the Supreme Court, who may be *ex officio* judge of the Common Pleas Court; the clause referring to the appointment of one judge in each county every year is stricken out.

By an amendment to paragraph 1, section 11, the judges of the Inferior Court of Common Pleas are to be nominated by the Governor for the term of five years, and their salary, and those of the Justices of the Supreme Court and Chancellor, are not to be increased or diminished during their official term. By other amendments to section 2 the keeper and Inspectors of the State-prison are to be nominated by the Governor; the Attorney-General is to hold office for three years, and sheriffs and coroners are to be chosen at the election for members of the General Assembly, and renew their bonds annually. It is also provided that "no law shall extend the term of any public officer, or increase or diminish his salary or emoluments, after his election or appointment."

The above constitute the most important of the proposed amendments. As amended, the constitution was to be submitted to the Legislature of 1874.

Notwithstanding the large sums expended by New Jersey within the past few years in paying the war-debt, in enlarging the Capitol, in constructing another lunatic asylum, and improving other institutions, the State is in a prosperous financial condition. According to

the statement made by the Governor, the disbursements from the various State funds during the year ending October 31, 1873, amounted to \$2,862,740.80; while the receipts, exceeding the disbursements by \$71,594.29, amounted to \$2,934,335.09. The balance in bank to the credit of all the funds at the end of the year, was \$173,048. The disbursements were largely increased by payments out of the State fund on special appropriations. The payments of this character amounted to about \$470,000, of which \$383,000 were devoted to the erection of the new Lunatic Asylum and \$57,000 to reimburse the commissioners having charge of the State House extension, which had been advanced by them in former years.

The State-debt, all of which was contracted during the late war, chiefly for the support of families of volunteers, is now about \$2,600,000. This debt is represented by war bonds, of which about \$100,000 will fall due annually. These bonds, as they mature, together with interest on the whole amount unpaid, will be extinguished by a part of the money derived from the yearly taxes, together with the income of the sinking fund. No additional tax need be raised for this purpose. The present rate of assessment will serve to diminish the debt each year, causing thereby a gradual diminution of the interest. There are now in the sinking fund securities worth over \$1,300,000. If to these the securities in the State fund be added, it will be seen that the debt might at once be reduced to a small amount should the holders of the bonds that have not matured consent to accept payment and surrender them.

The rate of the tax levy for State purposes has heretofore been only one mill, and is now but a mill and a half on the dollar.

Nearly \$2,500,000 were expended for free schools during the year. The number of children of school age was 286,444, of whom 179,443 were enrolled in the public schools; 3,181 teachers were employed, and the schools were open during the year, an average of nine months and thirteen days. Eight hundred and forty-five students received instruction during the year in the Normal School at Trenton, and the Farmers' Preparatory School at Beverly; 45 students graduated from the former, all of whom are occupied in teaching. By virtue of the supplement to the act "to establish Normal School boarding-houses," passed at the last session of the Legislature, the trustees have purchased land for the purposes specified.

The commission appointed in accordance with the act of the Legislature, passed in March, to examine into the condition of the deaf, and dumb, blind and feeble-minded inhabitants of the State, report that there are over 2,000 of these unfortunates, of whom about 700 are between the ages of eight and twenty-one, and that only about one-sixth of these children are enjoying educational advantages. One hundred and twenty-five of these unfortunates are maintained and

educated by New Jersey, at institutions out of the State, at an annual cost of nearly \$40,000. In urging the Legislature to provide ample accommodations for this class of the community, Governor Parker says: "It is not proposed to increase the taxes for the purpose of building the asylums we so much need, and with which almost every State is supplied. The indications are that large sums will soon be received for grants of lands under tidal waters. Why not appropriate the moneys hereafter received from that source to this important branch of education?"

On the 1st of November there were 653 inmates of the Lunatic Asylum at Trenton, being 153 more than the building was designed to accommodate. Besides these, it is estimated that there are at least 400 patients in the various counties of the State. Work on the new Lunatic Asylum, near Morristown, was recommenced with the opening of spring, and has since progressed rapidly. It is expected that the two wings will be completed during 1874. For carrying on the work on this structure an appropriation of \$300,000 was recommended by the Governor in January, 1874.

The militia of the State comprises 131,578 persons of the legal age, of whom about 3,500 are enrolled in the uniform militia, including a large number of veterans of the late war. The expense during the year was \$66,171, of which nearly \$35,000 was for rent of armories, \$8,000 for encampments, and \$7,000 for camp and garrison equipage. Ten companies and two troops of cavalry were armed and equipped during 1873.

The managers of the State-prison report 376 new prisoners and the same number of releases by expiration of term, pardons, death, or escapes, leaving 558 inmates. Of these six are confined for life. Eighty-four of them come from New York. The earnings for the year were \$90,386.56, and expenses \$62,353.28, showing a net gain of \$28,033.28. The total assets are \$83,701.69, and the gain to the State since 1868 has been \$310,000. The prisoners are now employed at shoe-making, and making cotton and woolen cloth, at seventy-five cents per day. The health of the convicts has been good, no epidemic or contagious disease having prevailed. Five died from consumption, and five were sent to the State Lunatic Asylum.

NEW YORK. The receipts into the State Treasury of New York for the fiscal year ending September 30th, aside from the canal and school funds, amounted to \$16,808,188.24, and the expenditures of the government with the same reservations footed up to \$14,871,757.68, leaving a balance on hand of \$2,481,450.61. Taking into consideration the full accounts of the Treasury, there appeared to be a deficiency of \$9,897,212.53, but the balances of appropriations and unpaid taxes reduced the actual deficiency to \$1,800,380.49. Counting the apparent deficiency as real, the debit of the Treasury at the end of the fiscal year amounted

to \$24,655,098.20. The most important items of the expenses were \$147,419 for the pay of officers and members of the Legislature; \$115,100.38 for contingent expenses of that body; \$208,292.27 for printing; \$421,851.79 for the support of the militia and National Guard; \$951,486.13 for the support of the State-prisons and transportation of criminals; \$102,483.79 for the support of the Institution for the Deaf and Dumb; \$42,005.75 for the Institution for the Blind; \$365,329.13 for Quarantine; and \$92,463.69 for the support of the insane. The total expenditure for educational purposes was \$3,012,532.42, of which \$2,610,784.31 were the proceeds of a direct tax of 1½ mills for common schools. A defalcation amounting to \$304,957.91 was discovered in the Treasurer's office in September, which was traced to Charles H. Phelps, one of the clerks. He fled from the State, but was speedily apprehended and lodged in the jail at Albany, where he was waiting for trial at the end of the year, an indictment for larceny having been found against him. The amount of the State debt and sinking funds on the 30th of September was as follows:

FUND.	Debt.	Balance of Sinking Funds.	Balance of Debt after applying Sinking Funds.
General Fund	\$3,988,526 40	\$4,244,400 99	
Contingent...	68,000 00	30,187 21	\$37,812 73
Canal.....	11,352,830 00	1,530,941 21	9,822,688 79
Bounty.....	31,181,000 00	9,790,073 24	11,390,927 76
Total....	\$36,530,406 40	\$15,594,901 05	\$31,191,379 84

The general fund debt sinking fund includes \$1,500,000, received since the close of the fiscal year, and from the bounty debt sinking fund, the interest accrued to October 1, 1873, payable January 1, 1874, has been deducted.

The entire funded debt of the State on September 30, 1873, after deducting unapplied balances of sinking funds, amounted to..... \$35,856,725 84
On September 30, 1873, the entire funded debt of the State, after a like deduction, amounted to..... 21,191,379 84

Showing a reduction of the debt of.... \$4,195,346 50

This reduction of the State debt is apparent only—not real, as the redemptions of stock, which fell due in the year 1873, were provided for by new loans. The stock outstanding on the 30th of September, and to be hereafter redeemed, is therefore only a few hundred thousand dollars less than on the 30th of September, 1872. The following amounts of the canal State debt fell due during the year:

January 1st.....	\$847,500 00
July 1st.....	2,328,000 00
November 1st.....	1,974,600 00
Total.....	\$5,150,100 00

The only contingent debt of the State is \$68,000, incurred for the Long Island Railroad, the interest of which is paid, and the payment of the principal provided for by the company.

The total valuation of property in the State

for the year was \$2,129,626,386, of which \$1,692,523,071 was for real estate, and \$437,102,315 for personal property. The increase of valuation over that of the preceding year was \$40,998,941. In 1863 the total valuation was \$1,454,454,817, the increase in ten years being \$675,171,569. The State tax in 1873 amounted to \$14,800,903.38; in 1872, \$19,580,882.30; in 1863, 7,272,274.08. The rate of taxation in 1863 was 5 mills on the dollar; in 1872, 9½ mills; in 1873, 6⅔. The tax for the past year was apportioned as follows:

For schools.....	1½
For general purposes.....	1½
For bounty debt.....	2
For new Capital.....	6
For asylums and reformatories.....	6-16
For canal floating debt, under chapter 271, Laws of 1863.....	½
For new work on canals and extra repairs.....	½
For payment of awards by canal appraisers and Canal Commissioners, pay certificates of indebtedness, and providing for deficiency in sinking funds, etc.....	7-10
For academies and union schools.....	1-16

Total..... 6 95-100

The commission engaged in preparing amendments for the constitution during the winter of 1872-'73, sent a circular to the mayor of each city, the clerk of the Board of Supervisors of each county, the supervisors of each town, and the president of each village throughout the State, requesting a statement of the amount of the indebtedness of their respective cities, counties, towns, and villages, and the purposes for which they were created. The results of this investigation were recapitulated as follows by the committee having the matter in charge:

There have been issued by towns, cities, and villages of the State in aid of railroads and remaining unpaid, \$26,919,662.00; for the purpose of erecting public buildings, such as court-houses, city and town halls, and school-buildings, \$10,416,864.84; of the debt growing out of the recent civil war, there remains unpaid \$26,934,986.19; bonds issued for roads, boulevards, streets, avenues, and bridges, amount to \$36,658,144.59; for water-works and fire-apparatus, \$29,835,383.79; for park, local improvements, and other purposes, \$84,052,655.08; making the aggregate bonded indebtedness of counties, cities, towns, and villages of the State the enormous sum of \$214,317,676.58. The entire valuation of real and personal property of the State is \$2,124,084,143.46; showing that, aside from the debt of the State and United States, the property of the people of this State is bonded for local purposes 104 per cent. of its assessed valuation. Ulster County is bonded for 24½ per cent., Chenango, 201 per cent., and Oswego, 16 per cent. upon their assessed valuation. The entire local indebtedness outside of the city of New York is \$95,483,946.72. Thirty-nine counties have a bonded debt, and twenty-one counties have none. The amount of bonds outstanding against these thirty-nine counties amounts to \$46,685,264.40. The assessed valuation of the counties thus bonded is in the aggregate \$1,931,645,392.46, making a percentage of county debt upon the valuation of nearly 2½ per cent. The counties outside of New York have a county debt of \$15,080,159.94. There are twenty-five cities in the State, the aggregate indebtedness of which amounts to \$187,559,609.34, exclusive of the county debt of New York, and a portion of the town-debt of Yonkers, which are debts upon those cities. The aggregate assessed valuation of the cities is

\$1,497,894,469.20, showing a percentage of 9½ per cent. upon the valuation of all cities in the State. The city of Lockport has no bonded debt, but has a floating debt of \$2,794.86. This is the only city without a bonded debt. The city of Poughkeepsie has the largest amount of bonds in proportion to its assessed valuation, the debt being 31 per cent. of the valuations; Oswego comes next, being bonded to the extent of 21 per cent. of its valuations; while Binghamton and Utica are each bonded to the extent of over 16 per cent.; Brooklyn 15½ per cent., and the entire property of Kings county to the extent of 17½ per cent. New York, including the city and county debt, without deducting the \$23,000,000 in sinking fund, is bonded 10½ per cent. There are 416 towns in the State bonded, and 517 not bonded. The aggregate indebtedness of those towns amounts to \$25,140,181.83. The annual valuation of the towns bonded amounts to \$328,292,233.16—equal to 7½ per cent upon the entire assessed valuations of the towns bonded. There are sixty-six villages which have a bonded debt, the aggregate of which is \$2,204,700.09. There are one hundred and fifty-five villages which report no bonded debt, and in almost every instance of this kind, the response is accompanied with a statement that their charter forbids the issuing of bonds. Thirty-five villages did not respond.

The canal system of this State constitutes an important link in the line of transportation from the West to the seaboard, and its management is one of the important interests of the government. The financial condition of this department is also a topic of continual discussion. The canal debt on the 30th of September was as follows:

Incurrd under art. 7, sec. 1, of constitution.....	\$1,106,420 00
Incurrd under art. 7, sec. 3, of constitution.....	9,255,000 00
Incurrd under art. 7, sec. 12, of constitution.....	890,000 00
Total.....	\$11,241,420 00

Amounts in sinking funds, September 30, 1873:

Under sec. 1, art. 7.....	\$1,068,340 29
Under sec. 12, art. 7.....	442,900 92
Total.....	\$1,590,241 21

Debt unprovided for..... \$9,822,638 79

The certificates of debt mature as follows:

1871.....	\$160
1872.....	7,900
1873.....	103,400
1873.....	\$1,974,600
1874.....	3,205,420
1875.....	472,000
1877.....	880,000
1883.....	847,500
1887.....	1,562,900
1891.....	2,298,000
Amount paying interest.....	\$11,241,420
Amount not paying interest.....	111,460
Total debt.....	\$11,352,880

The average rate of interest on this debt is 5.9 per cent. These stocks were, on September 30, 1873, held as follows, viz.:

In the United States.....	\$9,377,220 00
In foreign countries.....	1,864,200 00
Total.....	\$11,241,420 00

The annual interest on the stock debt, under art. 7, sec. 3, of the constitution, is..... \$555,300 00
Amount required to purchase coin for the payment thereof, estimating coin at nine per cent. premium..... 49,977 00

Total.....	\$605,277 00
The tolls collected for the year ending September 30, 1872, were.....	\$3,060,328 89
For the year ending September 30, 1873, they were.....	3,021,603 67

A falling off of.....	\$38,725 22
The receipts from all sources for the year ending September 30, 1872, were.....	\$3,078,247 96
For the year ending September 30, 1873, they were.....	3,062,462 04

An increase of.....	\$4,204 08
The expenses for the year ending September 30, 1872, were.....	\$1,875,676 61
For the year ending September 30, 1873, they were.....	1,459,185 24

A falling off of.....	\$416,511 37
The net revenues for the year ending September 30, 1872, were.....	\$1,202,571 35
For the year ending September 30, 1873, they were.....	1,623,286 80

An increase of.....	\$420,715 45
---------------------	--------------

The following statement gives the receipts and expenditures of each of the canals for the year:

CANALS.	Income.	DISBURSEMENTS.		
		Ordinary Repairs.	Extraordinary Repairs—New Work.	Total.
Erie Canal.....	\$2,710,601 49	\$749,977 08	\$967,175 39	\$1,717,152 42
Champlain Canal.....	153,417 86	234,077 37	562,782 95	797,460 32
Oswego Canal.....	88,428 18	92,998 81	78,880 68	172,619 39
Cayuga & Seneca Canal.....	22,481 11	27,143 46	6,921 06	31,064 54
Chemung Canal.....	3,664 38	37,016 59	15,077 05	52,098 64
Chenango Canal.....	4,061 22	42,213 12	145,297 47	187,510 69
Black River Canal.....	10,988 89	70,668 73	28,089 46	98,758 19
Genesee Valley Canal.....	26,313 99	111,005 48	14,797 00	125,802 48
Onondaga Lake Canal.....			500 00	500 00
Baldwinsville Canal.....			68 78	68 78
Onondaga River Improvement.....	629 57			
Seneca River Towing-path.....	187 48			
Cayuga Inlet.....	531 05		265 53	265 53
Crooked Lake Canal.....	228 61	7,325 58	3,735 81	11,060 89
Total.....	\$3,021,527 78	\$1,878,966 19	\$1,823,585 58	\$3,197,551 77
Total disbursements on all canals in excess of all income.....		\$176,023 99		
Total income in excess of disbursements for ordinary repairs.....		1,647,561 59		

The following table shows the profit or loss in operating the several canals since 1846, and the total cost of construction of each of the canals up to September 30, 1872:

NAMES OF CANALS.	Result after crediting each canal with its tolls proper, and deducting therefrom the cost of collection and ordinary repairs.		Cost of Construction.
	Proft.	Loss.	
Erie and Champlain Canals.	\$65,118,933 71		\$50,412,710 22
Oswego Canal.	692,394 53		4,172,563 05
Cayuga and Seneca Canal.	49,650 52		1,702,675 17
Chemung Canal.		\$1,200,795 44	1,643,141 26
Crooked Lake Canal.		297,091 11	403,697 89
Chenango Canal.		1,182,292 59	4,542,107 50
Black River Canal.		850,148 12	3,417,880 65
Genesee Valley Canal.		1,596,016 62	6,433,842 90
Oneida Lake Canal.		43,581 25	441,239 29
Baldwinsville Canal.		17,343 50	29,488 84
Oneida River Improvement.	167,838 04		237,151 39
Seneca River Towing-path.	6,468 84		1,488 33
Cayuga Inlet.	2,375 62		2,968 16
Total.	\$66,037,801 30	\$5,157,168 63	
Net profits.		60,880,632 67	
Total cost of construction.			\$73,440,894 65

The canal system has a lineal length of 900 miles, of which 352 are comprised in the Erie canal. The value of the property transported on all the New York canals since they were opened amounts in the aggregate to \$7,000,000,000. During the year up to December 6th the total amount of grain and flour, reckoning a barrel of flour as equivalent to five bushels of grain, delivered at the lake-ports was, 186,798,828 bushels; at New York, 86,581,674 bushels; at the seaboard ports, 163,579,511 bushels; the amount delivered at tide-water by the Erie & Champlain Canals was 49,264,700 bushels. Among the constitutional amendments proposed by the commission, and yet to be acted upon by the people, is one removing the restriction against selling, leasing, or otherwise disposing of the Chenango Canal, the Chemung Canal, and those which connect it with the Erie, and with Cayuga Lake, and the Genesee Valley Canal, as these are no longer considered an essential part of the system. Another proposed amendment provides for funding the canal debt, and that part of the general fund debt charged on the canals. If this amendment is ratified, the Commissioners of the Canal Fund will be authorized to borrow on the credit of the State such sums as may be necessary to pay and cancel the debt now charged on the canals as the same shall fall due, by the issue and sale of bonds or certificates of stock having forty years to run from their date, bearing interest at the rate of 5 per cent. per annum, payable semi-annually, for the payment of the principal, whereof at maturity a sinking fund of 1 per cent. per annum shall be established; and the Canal Board will be directed to fix the tolls of the canals at rates sufficing, as near as may be, to provide only for said sinking fund the interest on the debt so created, and the expenses of collection, superintendence and keeping the canals in repair.

A prize of \$100,000 has been offered by the State for a canal-boat propelled by steam, which should attain a speed of not less than three miles an hour. A trial-trip was made

during the season from Syracuse to Albany, a distance of 41 miles, for boats competing for the prize. A portion of the way one of the boats made as high as 3½ miles an hour, but on the whole, the requirements of the law offering the prize were not attained, and no award was made.

The sinking fund set apart and pledged for the payment of the interest and redemption of the principal of the State debt amounts nominally to \$15,594,901.05, but in point of fact nearly two-thirds of this amount has been used up in defraying the current expenses of the government, in direct violation of the constitution. Up to the 26th of January, 1874, there had been assessed and should have been paid into the Treasury to the credit of the Bounty Debt Sinking Fund alone the sum of \$9,790,072.24. There was in point of fact invested at that time to its credit the sum of \$2,772,444.09; of which amount \$2,220,200 was invested during the year 1873, leaving a balance to be invested when the same is received into the Treasury from taxes assessed and not yet paid, as of January 1, 1874, of \$7,017,628.15; add to this the amount due the General Fund Debt Sinking Fund already paid into the Treasury, and expended in anticipation of the taxes, as above stated, \$8,998,526.40; making the total amount due to these Sinking Funds, and not yet invested, \$11,008,154.55.

A tax of 3½ mills was authorized in 1872 to meet the deficiencies of the Treasury. This should produce over \$7,000,000, but \$4,600,000 remains uncollected. There is also unpaid of the general tax of the same year \$1,500,000; there has been anticipated in the payment of various appropriations of the tax authorized in 1873, \$1,900,000, and thus the deficiency in the Treasury still to be made good by taxation is \$1,500,000.

On the 6th of May a decision was rendered by the Court of Appeals, declaring the deficiency tax act of 1873 unconstitutional. The court declared:

No law authorizing a debt to be contracted can take effect until assented to by the people, and but

one law for that purpose can be submitted at the same general election, or within three months of its passage, and the debt to be created must be for some single work or object to be distinctly specified in the law. * * *

The design of the Constitution was that the specific purpose of the debt should be specified in the act, that the Legislature and the people who were to vote upon it could read it there, and a departure from the letter of the provision may frustrate its intent. It is true here the appropriations and the authority for the debt are in the same act, so that the law is not obnoxious to the objection that would exist if they were in separate acts. But the difficulty remains that notwithstanding the form of the second section the "work or object" for which the debt is authorized is not a single work or object; neither are the objects defined or capable of being ascertained from the act itself. * * *

The act is clearly violative of the constitution, so far as it authorizes the creation of a debt, and this is the ground upon which it should be declared void, as the ground which best preserves the constitution in its integrity, and does not make the validity of the law to depend on the accidental submission of a constitutional amendment to the people at the same time. But the whole theory of the act is entirely subversive of the constitution. It proceeds upon the assumption that a State debt may be created and exist outside of the constitution, either by act of the Legislature, or the acts of the administrative or executive officers and agents of the State. * * *

A debt of six millions of dollars, or liabilities to that amount, and resting as a burden upon the people, resulting from the acts of the Legislature, and the agents and officers of the State, is an impossibility, for the reason that it is absolutely prohibited, and any attempt to create such debt or incur such liability is a nullity. There can be no floating debt under the present constitution, neither can a debt be created by making appropriations and directing expenditures in excess of taxes levied and means provided. Could the constitution and the interest of the people, in adopting it, be thus easily circumvented and frustrated, that instrument would be of little value. The fallacy that there is or can be a floating debt, or a debt created in the discretion of the Legislature by excessive appropriations, and scanty tax levies, lies at the foundation of this act, and all the kindred schemes for borrowing money under the pretense of relieving the Treasury and preserving the credit of the State. Neither the Legislature, nor the officers and agents of the State, or all combined, can create a debt or incur an obligation for or in behalf of the State, except to the amount and in the manner provided for in the constitution. * * *

As there was no valid law authorizing a debt to be contracted, there was no valid submission of any question to the people, and this view is decisive of the ingenious position taken by the counsel for the appellant, that it was the popular vote and not the effect of the vote that determined the question, whether the law imposing the tax should take effect. The law being a nullity, it was as no law in all its parts and provisions.

On the 1st of October, eighty banks were doing business under the laws of the State. During the fiscal year, circulating notes to the amount of \$20,972 were destroyed by the Bank Department. One hundred and fifteen banks were credited with lost circulation to the amount, in all, of \$480,913, the time for redeeming the same, after the usual legal notice, having expired. The amount of circulation outstanding, including that of incorporated banks, banking associations, and individual bankers, was, on the 1st October last, \$1,400,116.50.

Of this amount, the sum of \$666,240 was secured by deposits of cash, stocks, or stocks and mortgages. The residue, being circulation issued prior to the passage of the general banking law, is not secured by any deposit in the Bank Department. There were forty-one banks incorporated prior to the enactment of the general banking law that had not, on the 22d of May last, the date of an act to provide for their final closing, taken any steps toward such closing. Twelve of these have since given notice of final closing under the provisions of that act. During the fiscal year one bank discontinued business, and thirteen were organized; eleven of which commenced business. Six of these latter were changed from banks organized under the national banking laws. Condition of the banks in the State, September 18:

Capital.....	\$26,958,890 00
Loans and discounts.....	71,073,544 00
Due depositors.....	70,783,491 00

Total resources.....\$116,536,784 00

There were, on the 1st of July last, one hundred and fifty-two savings-banks reporting to the Bank Department, with assets aggregating \$314,755,770. The increase in assets during the six months ended July 1, 1873, amounted to \$9,425,439. The number of persons having deposits in these institutions was, according to the number of open accounts on the 1st day of January, 1873, 822,642, being an increase of 45,942 depositors during the year then ended.

The number of insurance companies subject to the supervision of the Insurance Department, on the 31st day of December, was 271, as follows:

New York joint-stock fire insurance companies.....	99
New York mutual insurance companies.....	7
New York marine insurance companies.....	9
New York life insurance companies.....	28
Fire insurance companies of other States.....	83
Life insurance companies of other States.....	28
Casualty insurance companies of other States.....	3
Foreign insurance companies.....	14

Total.....271

The total amount of stocks and mortgages held by the department for the protection of policy-holders of life and casualty insurance companies of the State, and of foreign insurance companies doing business within it, was \$6,840,046.

The following statement shows the condition of the public schools and the operation of the common-school system for the year ending September 30, 1873:

Total receipts, including balance on hand September 30, 1872.....	\$12,089,168 98
Total expenditures for the year.....	\$10,946,280 82
Amount paid for teachers' wages.....	\$7,217,179 59
Amount paid for school-houses, repairs, furniture, etc.....	\$1,991,932 32
Estimated value of school-houses and sites.....	\$27,070,310 00
Total number of school-houses.....	11,735
Number of districts (exclusive of cities)....	11,325
Number of teachers employed at the same time for the full legal term of school....	18,268
Number of teachers employed during any portion of the year.....	29,491
Number of children attending the public schools.....	1,080,360
Number of pupils attending the normal schools.....	6,535

Number of children of school age attending private schools.....	130,096
Number of volumes in school-district libraries.....	838,315
Number of persons in the State between the ages of five and twenty-one years....	1,545,360

The number of colleges in the State is as follows: Literary, 22; medical, 13; law-schools, 5.

The State Library now contains 90,844 volumes, 2,800 of which were added during the year.

There are, in the State Asylums for the Insane, something less than 1,600 patients; about 600 of whom are in the Utica Asylum, nearly 800 in the Willard Asylum at Ovid, and about 200 in the Hudson River State Hospital, at Poughkeepsie. There are believed to be fully as many otherwise provided for or not provided for at all. The original estimated cost of the Hudson River Hospital was less than \$800,000, and it was expected to accommodate 600 patients. Already over \$1,100,000 has been expended on it, and it accommodates only 200. The cost of the asylum at Buffalo was estimated at \$600,000; over \$500,000 has been spent on it, and \$300,000 more will be required before it is ready for any patients. Each of these institutions will cost about \$3,000,000 when finished. The new asylum at Middletown will be ready for use during 1874. It is to consist of detached buildings to which additions may be made as required. That now in progress of completion will cost \$240,000. The asylum at Utica which was built over thirty-six years ago, and has cost up to this time for construction and maintenance \$1,200,000 accommodates 600 patients. The institution at Ovid, which accommodates 800 patients, cost less than \$1,000,000. The Idiot Asylum at Syracuse cost \$125,000, and accommodates 200 inmates. The House of Refuge at Rochester cost \$165,000, and accommodates 580 inmates.

On the 30th of September there were 2,025 convicts in the State-prisons; 1,354 at Sing Sing, 1,104 at Auburn, and 567 at Clinton. The following statement shows the expenditures and earnings of each of the prisons for the year ending September 30, 1873:

NAME.	Advances from the Treasury.	Received from Earnings.	Excess of Expenditures.
Anbarn	\$213,178 73	\$129,214 78	\$84,963 94
Clinton	331,480 66	129,065 61	202,395 05
Sing Sing	372,856 74	93,686 68	279,170 06
Miscellaneous expenditures not distributed, including \$20,066.71 for transportation of convicts.....			33,970 91
Total.....	\$917,516 12	\$354,197 07	\$593,329 05

The Clinton Prison report shows items of stock on hand, and unpaid accounts for the last fiscal year, amounting to \$153,043.42, and that of Sing Sing \$31,000.38 of unpaid accounts.

All the prisons are overcrowded, and there

is need of further provision for the confinement of convicts. There are now 680 convicts securely confined in the Albany Penitentiary, and that institution pays a large revenue to the county. The building cost less than \$200,000. There has been paid from the Treasury on account of the Elmira Reformatory, the sum of \$451,811.06, and it is raised but little above the foundation-walls.

The construction of the new Capitol has advanced only so far as the first story. The original estimate placed its cost at \$4,000,000, and already \$4,961,620 has been expended on it. It is now thought that its whole cost will not fall short of \$15,000,000.

The number of immigrants who arrived at New York during the year was 266,010, against 294,581 in 1872.

The quantity of salt from the Onondaga Salt Springs, inspected during the last fiscal year, was 7,959,172 bushels—less by 40,627 bushels than the production of the preceding year. The net revenue from this source was \$21,765.75, showing a falling off as compared with the preceding year of \$12,858.37.

The National Guard consists of 8 divisions and 20 brigades, distributed as follows, viz.: One regiment, 1 battalion, and 9 separate troops of cavalry; 12 batteries of artillery, 31 regiments, 13 battalions, and 3 detached companies of infantry, making an aggregate force of 23,360. During the year two regiments of infantry have been disbanded and mustered out of service, six regiments of infantry have been reduced to battalions, and one regiment has been reorganized. Six arsenals, which had become entirely useless, have been sold, producing \$25,550, of which \$22,850 have been paid into the Treasury, and \$2,700 refunded to the village of Dunkirk and the city of Ogdensburg, from which the sites of two of the buildings were obtained.

The annual session of the Legislature, which opened at Albany on the 1st Monday in January, was brought to a close on the 30th of May. The whole number of bills passed by both Houses was 1,017, of which 883 were of a private or local character. Very few of the remaining 184 have any general interest. During the last ten days of the session 852 bills were sent to the Governor for his signature. Of the whole number passed 147 failed to receive the Executive approval. Much time was spent in the consideration of a new charter for the city of New York, which, after elaborate discussion before committees and in the two Houses, and a complete transformation by amendment, was finally defeated. Much time was also given to the subject of regulating the traffic in intoxicating liquors. A bill was submitted in the House, providing for what is known as "local option." It was entitled "An act to enable the legal voters of any town or city to determine by ballot whether the sale, giving away, or suffering to be exposed, sold, or given away therein, of intoxicating liquors,

shall be prohibited, and to regulate the sale for medicinal, mechanical, chemical, or sacramental use, and so provide for the enforcement of this act." This bill was vetoed by the Governor on the 20th of May. In giving his reasons for withholding his signature, Governor Dix said:

I fully concur in the correctness of this proposition, as a matter both of principle and policy; and I have never doubted the propriety of adopting such measures of legislation as are needed to secure the result. It lies in the direction of popular liberty—of the right of the people to regulate their local affairs in such manner as they deem essential to their welfare. My chief objection to the bill is that it contains a limitation of this principle. It leaves to the people of the several cities and towns only a partial and restricted option in deciding what it shall be lawful to drink within their respective municipal limits. It compels them to prohibit absolutely, or virtually, to accept by declining to prohibit every beverage, which can by possibility intoxicate. It permits them to express their wishes on a single proposition, but precludes such an expression on any other. It says to them in substance: If you wish to prohibit the use of ardent spirits within your limits, you must prohibit ale, beer, and cider, also; for these have, by a decision of the Court of Appeals, been classed with intoxicating liquors. If, on the other hand, you wish the inhabitants of your town or city to have the privilege of drinking beer or cider, you cannot have it unless you make the use of ardent spirits equally free from restriction. You must prohibit all or none: you cannot have the one without the other. * * * The bill, therefore, while professing to leave to the people the largest liberty in this respect, restricts them to the narrowest; they are not permitted to have a choice as to what beverages it shall be lawful to use within their respective boundaries. The bill is framed in the interest of restriction, and not of freedom of choice. I deem this narrow view of the subject exceedingly unwise. A wide difference of opinion prevails among the people of the State in regard to the propriety of distinguishing between ardent spirits and the lighter beverages, some of which do not intoxicate unless taken in uncomfortable quantities, and which, in countries where they are in general use, have proved a restraint upon the consumption of spirituous liquors, and, to a great extent, a safeguard against the prevalence of intemperance. I do not assume to decide which class of thinkers has the right side of the question. But a just toleration of the freedom of opinion ought to restrain the advocates of either from attempting to maintain their position by compulsion. It is in this view that I deem the provisions of the bill indefensible.

This action of the Governor gave rise to some rather violent animadversions in the House, but the attempt to pass the bill over his veto failed, the vote standing 2 yeas to 60 nays. A motion to recommit with instructions to exempt lager beer from its operation was lost by a vote of 42 to 78.

An act known as "the Civil Rights Bill" was passed on the 9th of April. It provides that "no citizen of this State shall by reason of race, color, or previous condition of servitude, be excepted or excluded from the full and equal enjoyment of any accommodation, advantage, facility, or privilege, furnished by * * * licensed owners, managers, or lessees, of theatres, or other places of amusements," etc. An act amending the law in relation to the crime of murder makes it impossible to convict of

murder, in the first degree, unless there is clear proof of a deliberate and premeditated design. It has been claimed that the effect of this law is virtually to abolish the death-penalty. It makes murder in the second degree homicide intentionally committed, but without deliberation or premeditation, and the penalty is imprisonment for life. In two cases, tried since the law went into operation, in the city of New York, in which the homicide was apparently intentional, verdicts were rendered of manslaughter in the third degree.

Among the other bills passed was one removing from office the police justices in the city of New York, who were elected by the people, and authorizing the mayor to fill their places by appointment; and an act to regulate the rate of interest and prevent usury. This latter act repeals the old usury law, and makes the penalty for contracting for a higher rate of interest than seven per cent. a forfeiture of the interest only instead of the whole amount of the debt. The question of granting the privilege of voting to "tax-paying female citizens" was referred to the Judiciary Committee in the Senate, with instructions to report an amendment to the constitution, but nothing was done.

The commission appointed to prepare and submit to the Legislature such amendments to the constitution of the State as they might deem expedient, held sessions at Albany during the winter of 1872-'73, and finally completed their work on the 14th of March. The report of the commission embodying the proposed changes was immediately transmitted to the Legislature. No change was made in Article I. In section 1 of Article II. the discrimination against colored citizens was removed. Section 2 provides against bribery at elections as follows:

SECTION 2. No person shall receive, expect, or offer to receive or pay, offer or promise to pay, contribute, offer or promise to contribute to another, to be paid or used, any money or other valuable thing, as a compensation or reward for the giving or withholding a vote at an election, or who shall make any promise to influence the giving or withholding of any such vote, or who shall make or become directly or indirectly interested in any bet or wager depending upon the result of any election, shall vote at such election; and upon challenge for such cause, the person so challenged, before the inspectors or other officers authorized for that purpose receive his vote, shall swear or affirm before such inspectors or other officers that he has not received or offered, does not expect to receive, has not paid, offered or promised to pay, contributed, offered or promised to contribute to another, to be paid or used, any money or other valuable thing as a compensation or reward for the giving or withholding a vote at such election, and has not made any promise to influence the giving or withholding of any such vote, nor made or become directly or indirectly interested in any bet or wager depending upon the result of such election. The Legislature at the session thereof next after the adoption of this section, shall, and from time to time thereafter may, enact laws excluding from the right of suffrage all persons convicted of bribery or any infamous crime.

In Article III. the organization of the Legis-

lature was materially changed, and the compensation of members fixed at \$1,000 a year, but the Legislature in considering the amendments restored the old provisions regarding organization, and fixed the salaries at \$1,500.

Section 8 is amended by rendering those ineligible to the Legislature who are at the time of the election, or have been within one hundred days prior thereto, members of Congress, or civil or military officers under the United States, or officers under a city government. Section 15 provides that no private or local law shall embrace more than one subject, which shall be named in the title; and that no law shall be revived or amended by reference to its title only, but the act revived or the section amended shall be inserted at length. Also, that no general law shall embrace any provision of a private or local character. Section 17, changing the method of considering bills, was stricken out by the Legislature, as was also section 18, providing that no private, special, or local bill shall be introduced after the first sixty days of a session without the consent of three-fourths of the members. Section 19 prohibits special and local bills, in certain specified cases, and requires the enactment of general laws covering these cases. Other changes in the article make a three-fifths vote necessary for the passage of all laws imposing taxes or creating debt, and forbid the Legislature, and common councils of cities, and supervisors of counties, to grant extra compensation to any officer or agent for his services. Article IV., as amended, changes the official term of the Governor and Lieutenant-Governor to three years, provides that the Governor shall receive an annual salary of \$10,000, and the use of a furnished residence; that the Lieutenant-Governor shall receive a salary of \$4,000; that it shall require a two-thirds vote of all the members elected in each branch of the Legislature to pass an act over the Governor's veto; that no bill shall become a law after the adjournment of the Legislature unless approved by the Governor within thirty days; that the Governor may veto particular items in an appropriation bill without vetoing the entire bill. The only modification afterward made by the Legislature to these amendments was to put the salary of the Lieutenant-Governor at \$5,000 a year. Article V. provides that the Controller shall be elected at the same time, and for the same term as the Governor, and receive \$6,000 a year. The Secretary of State, Attorney-General, and State Engineer, are to be appointed by the Governor, and hold office until the expiration of his term. A Superintendent of State-prisons is to be appointed by the Governor for a term of five years, to have control of the prisons, and perform the duties now imposed on the State-prison Inspectors. The Treasurer is to be chosen by the Legislature in joint convention for a term of three years. The Controller, Secretary of State, Attorney-General, Treasurer, and

State Engineer, and Surveyor, constitute the Commissioners of the Land-Office. The office of commissioner of the canal-fund is abolished, and his duties transferred to the Controller. A Superintendent of Public Works is to be appointed by the Governor, and added also to the Canal Board as now constituted. He is authorized to appoint three assistants, and is charged with the execution of all laws relating to the repairs, navigation, construction, and improvement of the canals, the canal commissioners being abolished. All offices for weighing, gauging, measuring, and inspecting merchandise, are abolished. The Legislature, in considering the amendments to this article, made the office of Secretary of State elective, and added the Lieutenant-Governor to the Commissioners of the Land Office. Article VI. was amended in the eighteenth section only wherein is inserted a provision that judicial officers of courts, not of record, in cities having a population of not less than three hundred thousand, shall be appointed by the Governor.

Article VII. is amended as follows: To section 8 is added a provision that no extra compensation shall be made to any contractor, but the Canal Board may, upon the application of a contractor, annul the contract where cause is shown. Section 6 limits the canals that may not be sold to the Erie, Oswego, Champlain, Cayuga, and Seneca, and the expenses thereon to the gross receipts of the previous year. Sections 13 and 14 are transferred to Article III., and in their place are provisions that the sinking funds for the canal debt shall be separately kept and safely invested, and not used for other purposes; and that the statute of limitations shall apply to demands against the State.

Three additional articles were proposed. The first of these, to be known as Article XV., related to the government of cities, and was stricken out by the Legislature. Article XVI. has reference to official corruption.

Article XVII. simply provides that these amendments shall be in force from the 15th of January following the election at which they are ratified. The amendments must receive the sanction of the Legislature of 1874 before being submitted to a popular vote.

A case was decided in the Superior Court of New York City in June, which gave Mrs. Avery D. Putnam a verdict of \$5,000 against a horse-railroad company, because her husband was killed by a drunken man on one of its cars. An appeal was taken, and in February, 1874, the Court of Appeals reversed the decision, holding that the company was not liable so long as its servants were not appealed to, to remove the drunken man from the car. A decision was rendered by Judge Ward Hunt, affecting the right of women to vote. Miss Susan B. Anthony, of Rochester, had secured the registration of her name and voted, claiming the right under the fourteenth amendment

of the Federal Constitution. She was prosecuted for illegal voting, and Judge Hunt decided that she possessed no such right, and fined her \$50.

A commission, appointed by the Legislature and headed by ex-Governor Horatio Seymour, to inquire into the expediency of setting apart the district known as the Adirondack region as a State Park, has reported favorably on the subject, but the matter has not yet been con-

sidered by the Legislature. This district includes some 884,480 acres in Lewis, Essex, Clinton, Franklin, St. Lawrence, Herkimer, and Hamilton Counties, and is a favorite resort of hunters, fishermen, and seekers after invigorating out-door adventure.

A convention in the interests of cheap transportation was held in New York City on the 7th of May, at which delegates were present from all parts of the country. Its purposes

SUSPENSION BRIDGE OVER THE EAST RIVER AT THE CITY OF NEW YORK.

were fully set forth in the following resolutions which were adopted after considerable discussion:

Whereas, The productive industries of the United States—plantation and farm, mine and factory, commercial and mercantile—are not only the sources of all our national and individual wealth, but also the elements on which our very national and individual existence depends; and—

Whereas, All material products are the fruits of labor and capital, and as neither labor nor capital will continue actively employed without an equivalent measurably just; and—

Whereas, Great national industries are only sustained and prospered by the interchange of the products of one section of country for those of another; and—

Whereas, The existing rates of transportation for the varied products of the Union, from one part of the country to another, and to foreign countries, as well as the transit cost of the commodities required in exchange, are in many instances injurious, and to certain interests absolutely destructive, arising, in part, at least, from an insufficiency of avenues; and—

Whereas, The great material want of the nation today is relief from the present rates of transit on American products: therefore—

Resolved, That the duty of the hour, and the mission of this association is to obtain from Congress and the several State Legislatures such legislation as may be necessary to control and limit by law, within proper constitutional and legitimate limits, the rates and charges of existing lines of transportation; to increase, where practicable, the capacity of our present water-ways, and to add such new avenues, both water

and rail, as our immensely-increased internal commerce demands; so that the producer may be fairly rewarded for his honest toil, the consumer have cheap products, and our almost limitless supplies find foreign markets, at rates to compete with the world.

Resolved, That the cheap transportation, both of persons and property, being most conducive to the free movement of the people, and the widest interchange and consumption of the products of the different parts of the Union, is essential to the welfare and prosperity of the country.

Resolved, That the constant and frequent association of the inhabitants of remote parts of the United States is not only desirable but necessary for the maintenance of a homogeneous and harmonious population within the vast area of our territory.

Resolved, That the best interests of the different parts of the country also demand the freest possible interchange of the industrial products of the varied climates and industries of the United States, so that breadstuffs, textile fabrics, coal, lumber, iron, sugar, and various products, local in their production, but general in their consumption, may all reach the consumer at the least practicable cost of transportation; and that an arbitrary and unnecessary tax, levied by the transporter over and above a fair remuneration for the investment, is a burden upon the producer and consumer that it is the part of wise statesmanship to remove.

Resolved, That certain leading railway corporations of the country, although chartered to subserve the public welfare, and endowed with the right of eminent domain, solely for that reason, have proved themselves practically monopolies, and become the tools of avaricious and unscrupulous capitalists, to be used to plunder the public, enrich themselves,

and impoverish the country through which they run.

Resolved, That many of the railway corporations of the United States have not only disregarded the public convenience and property, but have oppressed the citizens, bribed our Legislatures, and defied our executives and judges, and stand to-day the most menacing danger to American liberty, and to republican government.

Resolved, That the present system of railway management, having failed to meet the just expectations and demands of a long-suffering people, must be radically reformed and controlled by the strong hand of law, both State and national, and railway corporations compelled to perform their proper functions as the servants and not the masters of the people.

Resolved, That to this end we invoke the aid of all fair-minded men in all States of the Union in expelling and excluding from the halls of legislation, from our executive offices, and from the bench, such railway officials, railway attorneys, or other hirelings, as prostitute public office to the base uses of private gain.

Resolved, That leaving different sections and interests that desire cheap transportation to work out the problem in such a manner as they may deem best, we earnestly invoke their careful consideration, their energetic action, and their resolute will in regulating and controlling the rates of transportation and giving remunerative wages to the producer and cheap products to the consumer untaxed by unearned charges for their carriage.

Resolved, That we invite the people of the various States to organize subsidiary associations—State, county, and town to cooperate with the national association; that the power to accomplish the purposes desired rests absolutely with the suffering millions; that relief is within their reach and control by united action, and the near future will give, as certain as its need for all that and the good of all, the true solution of the problem of cheap transportation.

A convention of committees representing several temperance organizations, and of other advocates of reform in the regulation of the liquor-traffic, was held at Albany on the 24th of June. The sentiment of the delegates was expressed in the following resolutions:

Resolved, That the traffic in intoxicating liquors being a crime against God and humanity, all license laws, by which respectability is given thereto, are the great bulwark of that traffic, and while they remain upon the statute-books no great and permanent success can be reached toward its abolition; therefore it is the imperative duty of the temperance men to unite in their efforts for the immediate repeal of all such laws.

Resolved, That in their stead, as the one great, imperative need, should be enacted a law prohibiting the sale of all intoxicating liquors as a beverage.

Resolved, That at the earliest possible period an amendment to the constitution of the State should be secured, rendering null and void all legislation legalizing or attempting to legalize the sales of such liquors as a beverage, and prohibiting such sale.

Resolved, That we will make the best possible use of all existing laws bearing on the sale of intoxicating liquors, by their most rigid enforcement, through the proper officers as instruments in securing the aforesaid ends.

Resolved, That the members of this convention fully sympathize with the feeling of disappointment and mortification which pervaded the entire State upon the announcement of the veto by Governor Dix of the Local Prohibition Bill, regarding such action as in direct violation of the plighted faith of the Republican party; hostile to the moral and religious interests of the State, and unworthy its Executive head.

Resolved, That the members of the Legislature who voted for temperance measures during the last session, are entitled to the thanks of the temperance men of the State; that some of the leaders of the Republican party, who advised the Governor to veto the Local Prohibition Bill, and others who were indifferent, notwithstanding the pledges of the Republican party, deserve the indignant rebuke of the temperance men of the State for their duplicity and treachery toward those to whom they were indebted for success in the last political campaign.

Resolved, in the organized efforts to secure from Congress, and from the Legislatures of the several States, legal discrimination between malt and distilled liquors, and the practicable exemption of the former from the restrictions of excise, Sabbath, and other laws, we recognize a deliberate assault on the sanctity of the Sabbath, and the systematic continuance of a movement to denationalize the civilization of America, and to substitute a loose and demoralizing infidelity for the Christianity upon which, as a chief corner-stone, rest the republican institutions of our country.

Resolved, That we note with pleasure, and accept, as among the most encouraging signs of the times, the increased attention which of late has been given to the evils of intemperance, and the means for their suppression, by the religious journals of the State. With an earnest religious press, an earnest pulpit, and an awakened Church, the work of destroying the liquor-traffic would be soon accomplished, and a great hindrance to the spreading of the gospel quickly removed.

Resolved, That the use of alcoholic drinks for medicinal purposes will greatly weaken and cripple all prohibitory laws, until the people join with the medical men of this State, who have lately condemned such use.

Resolved, That the temperance cause is superior to all party interests or obligations, and that legislation for its promotion should be adopted to invoke the hearty support of all true men, irrespective of party relations.

Resolved, That it is the imperative duty of temperance electors to vote only for such candidates for offices, the duties of which are connected with the enactment and enforcement of a prohibitory law, as are known to heartily favor such enactment and enforcement; and, when no such persons are nominated by the political parties, it is alike the imperative duty to unite upon and support independent temperance candidates.

Resolved, That the education of the people upon the various phases of the temperance enterprise is essential to success, and that the wide circulation of the publications of the National Temperance Society are well adapted to promote this result.

Resolved, That a State Executive Temperance committee of nine be appointed by this convention to supervise the political work of temperance in the State during the coming year, and that such committee have power to add to its number one from each senatorial district, fill vacancies, and determine the number necessary to constitute a quorum.

Resolved, That the State Temperance Committee be authorized to call a State Convention prior to the 1st day of October next, to complete plans for political action at the fall election, and that the committee be instructed in the measure to perfect the most thorough organization in the several districts by local alliances, conventions, or otherwise, in order to secure the election of thoroughly reliable friends of prohibition to the next Senate and Assembly, and we also recommend that a property pledge be embodied in the constitution of our alliances for assessment in order to prosecute all violations of the present laws.

A National Temperance Convention was held at Saratoga on the 27th of August, at

which the following resolution was adopted among others:

Resolved, That the time has arrived fully to introduce the temperance issue in State and national politics; that we recommend all friends of temperance to make it henceforth the paramount issue, and we do hereby pledge our adherence to the National Prohibition party, and recommend that it be organized in each town, and city, and county, and district, and State in the Union, and, appealing to the God of righteousness and justice for guidance and support, we will maintain these organizations until success crowns our efforts.

The State Convention of the Republican party was held at Utica, on the 24th of September. The following nominations were made: T. S. Thayer, Secretary of State; A. R. Hopkins, Controller; Daniel T. Ford, Treasurer; Benjamin D. Silliman, Attorney-General; Sidney Mead, Canal Commissioner; William B. Taylor, State Engineer; M. J. Platt, State-prison Inspector. The principles on which the party proposed to conduct the succeeding canvass were set forth in these resolutions:

Resolved, That having abolished slavery, suppressed the rebellion, preserved the Union, established equal political and civil rights, restored the national credit, paid or funded a large portion of the national debt, relieved the burden of taxation, disarmed and crushed the threat of repudiation, created a uniform national currency, adjusted foreign complications, assured general stability and prosperity throughout the land, and furnished a wise, economical, and wholesome administration of public affairs, both in the nation and the State, the Republican party has not only established the strongest title to the gratitude and confidence of the people, but has presented the pledge that it will be as true to every present and future obligation as it has been to every past requirement.

Resolved, That as well for the maintenance of these great achievements as for the fulfillment of every new demand of public reform and popular rights, we believe the people will look not to the long-rejected party which has stolidly resisted every step and movement of progress and act of patriotism in our later history, but to that long-trusted party whose enduring principles and unexampled career are honorably identified with all these advances and triumphs; and which meets all questions as they arise with the same patriotic and faithful spirit.

Resolved, That the Tammany ring with its colossal plunder of the people, the pollution of the ballot-box, the defilement of the bench, the mismanagement of the public works, the increase of taxation, and the addition of \$3,600,000 to the public debt were the direct fruits of Democratic rule in this State; that with the aid of honest men of all parties, the Republican organization has overthrown the Tammany iniquity, purified the elections, elevated the judiciary, redeemed the State administration, and made provisions for all public obligations; and the completion of the reform as well as the general welfare of the State require the continuance of its work.

Resolved, That having enacted a statute permitting suits for the recovery of civil damages in cases of injury sustained by the sale of intoxicating beverages, and being committed to the principle of allowing each locality to determine for itself whether it will prohibit such sale, the Republican party has shown itself the true friend of temperance.

Resolved, That it is essential to the prosperity of the State of New York, and especially to her commercial metropolis, that all lines of communication with the producing States of the West and South,

whether by land or water, should be available for the purpose of uninterrupted and adequate transportation at minimum rates; that the subject should be considered in a broad and statesmanlike spirit, commensurate with its great importance, and that we hold it to be the paramount duty of the incoming Legislature to devise means whereby the cereals of the country may find their way with dispatch to the seaboard, and thence to the markets of the world; that especially considering the necessity of wise action to prevent a diversion of trade, the main canals of this State should be adapted to steam navigation, and by the refunding of the debts in long bonds at a low rate of interest should be made as free to the commerce of the nation as their economical maintenance without taxing the people will permit. We hold also that Congress should put forth all the power it may wisely exert within the limits of the Constitution, and recommend to the consideration of Congress the natural advantages and just claims of the great channels which run through the State.

Resolved, That the public approbation belongs to the Senators and Representatives who in the last Congress opposed the appropriation of money as an increase of compensation for congressional service already rendered and paid for, and that public censure belongs to those of whatever politics, whose votes enacted such a provision. We do not charge this wrong upon either party, although it was supported by a larger relative proportion of the opponents than of the friends of the Administration, and although among those who promoted it, and those who were conveniently absent when the votes were taken are several members of a small faction who had recently deserted their party under the pretence of unfounded charges of Republican extravagance. We commend also the Senators and Representatives who have refrained from appropriating back pay, and we hold that the only effectual mode of restoring to the United States moneys which such members of Congress have declined to receive, is by a law to cover the same into the Treasury. We therefore request the Republican Senators from this State to introduce, at the next session, a bill which shall refund to the Treasury all such moneys, including in the same such as have been merely left untouched, and all sums which have been, in one form or another, publicly or privately, renounced.

Resolved, That we point with pride to the Republican administration, both of the nation and State. The former still exhibits the honest purpose, the successful policy, and the auspicious results, which, together with his own practical wisdom and patriotic services, led to the triumphant reelection of President Grant; that the latter, by his watchful care of every public interest, equally justifies the expectations of the people, and that, with the ticket nominated to-day, we can confidently pledge a faithful and efficient government.

The Democratic Convention took place at Utica on the 1st and 2d of October. It was presided over by Hon. Horatio Seymour, and made the following nominations for the State offices to be filled: Secretary of State, Die-drich Willers; Controller, A. P. Nichols; Attorney-General, Judge Daniel Pratt; State Treasurer, Thomas Raines; Canal Commissioner, James Jackson, Jr.; State-prison Inspector, George W. Millsapangh.

The platform, which was unanimously adopted, was presented in the followings series of resolutions:

Resolved, That the Democrats of the State of New York invite the cooperation of all citizens who agree with them on the following fundamental principles enunciated by Thomas Jeffers-

son: "Equal and exact justice to all men of whatever state or persuasion, religious or political;" the support of the State governments in all their rights as the most competent administrations of our domestic concerns and the surest bulwarks against anti-republican tendencies; the preservation of the general government in its whole constitutional vigor as the sheet-anchor of our peace at home and safety abroad; a jealous care of the right of election by the people; absolute acquiescence in the decisions of the majority; the supremacy of the civil over the military authority; economy in public expenses that labor may be lightly burdened; the honest payment of our debts and sacred preservation of the public faith; the diffusion of information; the arraignment of all abuses at the bar of public reason; freedom of religion; freedom of the press and freedom of person under the protection of the *habeas corpus*.

Resolved, That we hold that special legislation, favoring private interests, and all laws infringing upon individual rights, are inimical to the public welfare, and that the granting of subsidies by the General and State governments, and the bonding of cities, towns, and villages in aid of railroads and other corporations, are wrong in principle, corrupting in tendency, and ought to cease.

Resolved, That we condemn and denounce the salary grab, and all Congressmen—Democrat or Republican—who voted for it or who have not renounced all share in the plunder seized for a service already done and paid for.

Resolved, That we condemn and denounce the President's signature to the bill which clinched this iniquity, and which gave \$5,000 to each Congressman while procuring \$100,000 for himself after Congress had just refused to increase his salary, and we demand its repeal.

Resolved, That we condemn and denounce, as utterly unworthy the people's confidence, the Republican party for having permitted the Credit Mobilier frauds to pass unpunished, in which its two Vice-Presidents, more than one of its United States Senators, and its five chairmen of the five chief committees of the House of Representatives were guilty participants, and the two foremost defenders of which have been rewarded by that party's head, one with a foreign mission, and the other with the use of the Federal patronage to elect him Governor of a neighboring State.

Resolved, That we condemn as utterly unworthy the people's confidence the Republican party which, in this State, assisted a corrupt ring to grasp, without an election, all the powers of the city government of New York, and when the Democratic party had excluded them from its ranks and united to expel them from power, itself seized the occasion to create a new and more corrupt custom-house ring on the ruins of municipal reform, and to inflict upon the tax-burdened citizens of our commercial metropolis a costly, complex, and cumbersome charter of government.

Resolved, That we condemn and denounce the conduct of the President in setting up by the bayonet a government in Louisiana not chosen by the people, having no title to authority, as a flagrant violation of the Federal Constitution and the rights of a sister State.

Resolved, That we demand revenue reform, to wit: That our custom-house revenue shall be got from low and therefore productive duties on a few articles, not from high and therefore less productive duties on two thousand articles; that the needless burden of a high protective tariff shall no longer be added to the necessary burden of a huge public debt; and since the power granted to Congress in the Constitution is limited to the collection of revenue for general uses only, we demand a revenue tariff which shall stop enriching one section at the expense of other sections, a few monopolists at the expense of the whole people.

Resolved, That we demand specie payments, for in the language of the Supreme Court, before its bench was packed to reverse a righteous decision, an act making promises to pay paper dollars a legal tender in payment of debts previously contracted is prohibited by the Constitution, and the coinage power conferred on Congress is an implicit power not to curse the people with a currency inconvertible with coinage.

Resolved, That we demand that the fiscal policy of paper inflation, protective tariff, and Government subsidies, shall be abandoned to the half-civilized nations and ages of which it is a relic, because it plunders the farmers of the United States both in the incomes and outgoes; it hamstringing our manifold industries, and converts our foreign commerce into an unsafe speculation and our domestic trade into a game of chance; it breeds extravagance in our homes and dishonesty in our public and private trusts; it fosters corrupt combinations of sectional interests and is the prime cause of the late financial disasters in which fortunes have been wrecked, credit destroyed, labor deprived of employment, and its savings of security. In the midst of these wide-spread calamities, and for this general distress, we scout the President's pill for panics, "More inflation, more subsidies, more ballooning," and we point the country to their true remedy and cure, in the tried and historic principles of the old Democracy as applicable throughout our national, State, and municipal life, which limit and localize most jealously the power intrusted to public servants and which enforce honesty and frugality in public and private affairs; which provide equal taxation for all and a currency as good as gold, and we hold out to the farmers of the United States the right hand of hearty fellowship in their just resistance to the exactions of monopolists and their just demands for these great reforms.

Resolved, That those who are vested by our laws with the appropriation and expenditure of public money should be subjected to the same restrictions, rules, and regulations as are imposed upon tax-payers and collectors, and should in like manner be required to keep such accounts of their business affairs as are demanded of merchants and manufacturers, so that an examination of their books and transactions will show any frauds and corruptions in their official business; that they shall take and subscribe to official oaths at proper periods that they have not in any way been unlawfully benefited by their official action.

Resolved, That we recognize in the Liberal Republicans worthy coadjutors, and we cordially invite them to unite with us in our efforts to restore pure government in our State and in the Federal administration.

Resolved, That the Democratic party having inaugurated the system of low tolls and cheap transportation against the violent opposition of the Republican party, reaffirms the policy at this time.

The Executive Committee of the Liberal Republican State Committee held a meeting in New York, on the 11th of September, and after considerable discussion issued the following call for a State Convention:

Whereas, The questions and issues that have heretofore divided the people of this country into political parties have ceased to exist, and the principal questions demanding consideration are those relating to the industrial or labor interests of the country, in which the people of the present day are more interested than the parties of the past; and—

Whereas, It is not reasonable to suppose that the reform in public affairs conceded to be necessary and now generally demanded, can be effected by the Republican party, which is identified with public abuses, or that it will be by the Democratic party, whose State Committee has refused to unite with us in repressing them; and—

Whereas, Many friends of public reform, hitherto members of each of these political parties, together with many who have belonged to neither of them, feel that to purify and preserve the Government is the duty of an American citizen above all other duties; and—

Whereas, The whole country, suffering in its constituent industries, under the pressure of monopolies created and upheld by the partial and unjust legislation common to both the Republican and Democratic parties, is forcibly summoned to protect itself by overthrowing them; and—

Whereas, The Liberals stand on the broadest platform of reforms and are in fullest sympathy with their fellow-citizens who are actuated by these and kindred opinions; and—

Whereas, In their judgment the time has come when those electors of the State who believe that the way to reform is in the union of all its friends, should assemble and announce their principles and their purposes:

Therefore, All electors of the State of New York who are opposed to private and official corruption, and who are in favor of capable and honest men for office, and who recognize no virtue in any political party beyond its power to govern honestly and well, and all who are opposed to the corrupt practices of the present Administration, are invited to unite in selecting three delegates and three alternate delegates from each Assembly district in the State, to meet in State Convention, in the city of Elmira, on Wednesday, the 8th day of October next, at 12 o'clock noon, for the purpose of declaring their principles and of transacting such business and taking such action as shall then be thought proper.

The convention adopted the nominations of the Democratic party, with the exception that the name of Nelson K. Hopkins was substituted for that of A. P. Nichols for Controller, and that of M. K. Platt for G. W. Millspaugh for State-prison Inspector. A platform was adopted as follows:

Resolved, That this convention of delegates from the people of New York congratulate the patriotic citizens of all States upon the indications now apparent of a growing disposition to oppose any perversion of the civil authority, and to demand in all our public ways a return to official honesty, economy, and fidelity to public interest.

Resolved, That this gratifying tendency of public sentiment justifies and encourages us to reaffirm the platform of principles set forth at Cincinnati more than a year ago, which embodies in clear and forcible terms the need of the hour, and by such affirmation we indicate the sincerity of our continued efforts and aspirations for purity of government and reform.

Resolved, That public approbation belongs to the Senators and Representatives who in the last Congress did not favor the salary increase and back-pay bill, and especially to such as have voluntarily and without pressure of public sentiment returned to the Treasury the so-called back pay; and we denounce every Senator and Representative who voted for or approved such bill, and any party who invokes congressional action to shield a guilty conscience in doing what should be done, and what some have done without legislation; and further, we feel the most sincere regret that the President of the United States should so mistake the morality of the American character, and disregard the honor of the American name, as to give his official sanction to a bill which, as far as it relates to himself, and members of each branch of Congress, was wholly uncalled for, unprecedented, demoralizing, and wicked, and we charge the Republican party with the wrong of originating and passing the bill, and we denounce in the most unqualified manner this measure and all its supporters, and demand its unconditional repeal.

Resolved, That we deem it of the highest importance to the people of all parts of our State and country that the lines of transportation between the East and West be improved so as to furnish better and cheaper transit, to the end that no route shall make inordinate charges upon produce, manufactures, or merchandise; and that no interest, whether of producer, corporation, or capitalist, can justly complain of the facilities afforded. The importance of regular, cheap, and rapid interchange of the produce of the West and merchandise of the East, both for internal consumption and general commerce, cannot be overestimated to the people of our State, and especially of our great seaboard city; enlarged water-channels, freight railways, and cheap and expeditious passage alike for outlying and inbound trade are imperatively demanded, and the attainment thereof cannot with justice and safety be delayed; and we deplore the corrupting influence of our great corporations over legislative action, whereby our agricultural interests are crippled, and the development of the resources of the country retarded.

Resolved, That the internal policy of States and municipalities cannot constitutionally be interfered with by the Federal authority, but that each must be left free in the exercise of the supreme right of local self-government, which has been, we are grieved to say, of late frequently and openly violated.

Resolved, That the course of the national Administration in patronizing irresponsible and visionary fiscal agents, in fostering primitive and unwholesome business schemes, and in its stealthy interference and favoritism, the abandonment by its members of their posts of duty for long periods of time, and the gross neglect of public business from the President down, have brought the country at last to financial discredit and distress, and it is, therefore, justly held responsible before the tribunal of public opinion for the recent disordered condition of the country, instability in exchange of trade, in the work of production and investment, depression of business, sufferings of laborers, and ruin of individuals.

Resolved, That in view of the present disaster, the result of a weak and pernicious administration, widespread corruption of the public service, defalcation of officials, peculations condoned, robberies forgiven, extortions upon merchants and importers, with the approval of the Federal authority; personalism of the Chief Executive, and, as a consequence, impaired standard of political morality, it is a matter of painful regret that unreasoning party zeal should outlive just party allegiance, and thus postpone the return to good and honest government; but still we have undiminished faith in the integrity and manhood of the people, and their ultimate purpose and ability to correct every wrong and restore every right.

Resolved, That a return of the country to a specie basis is an object of paramount importance; that as the great purpose of money, apart from being the standard of value, is to serve as the medium of exchange, and an instrument with which transfers are made, and indebtedness discharged, business integrity and even-handed prosperity unite in demanding a return to the common standard of the world; and that banking privileges should be extended to all who can give perfect security for the prompt redemption of the circulation they utter, in as good money as the Government makes the lawful money of the country.

Resolved, That we pledge ourselves to firmly resist the probability of the State government, by special legislation, being made the pliant instrument of unworthy private schemes, and we demand, in every department of public expenditure, rigid economy and good faith, and thorough investigation and punishment of all official misconduct.

The election took place on the 4th of November.

The total vote for Secretary of State was

672,129, of which D. Willers, Jr., received a majority of 9,893. The total vote for Controller was 671,919; for Treasurer, 671,257. Hopkins's majority for Controller was 4,065. Raines's majority for Treasurer was 12,835. The Prohibition ticket received 3,272 votes.

The Legislature was divided as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans.....	17	73	90
Democrats.....	12	49	61
Independents.....	9	3	5
Liberal Republicans.....	1	3	3
Vacancy.....	..	1	..
Republican majority.....	9	19	31

Two questions were submitted to the voters at this election—1. Shall the Chief Judge and the Associate Judges of the Court of Appeals, and the Justices of the Supreme Court, be hereafter elected or appointed? 2. Shall the Judges of the Superior Courts of New York City and Brooklyn, of the Court of Common Pleas of Buffalo, and the several county judges throughout the State, be hereafter elected or appointed? The majority for the election of higher Judges was 204,642; for the election of lower Judges, 208,935.

NICARAGUA (REPÚBLICA DE NICARAGUA), an independent state of Central America, lying between latitude 10° 45' and 15° 10' north, and longitude 83° 11' and 87° 38' west. It is bounded north by the Republic of Honduras, east by the Caribbean Sea, south by Costa Rica, and west by the Pacific Ocean.

According to the *Almanach de Gotha*, the area of the republic is 47,090 square miles; but in a semi-official work, entitled "*Notas Geográficas y Económicas de la República de Nicaragua*," published in Paris in 1873 by M. Paul Lévy, it is given at 40,000 square miles.

The territory of the state is divided into seven departments, which, with their populations in 1873, according to the authority named, are as follows:

Departments.	Population.
Granada.....	56,000
Leon.....	35,000
Rivas.....	20,000
Chinandega.....	19,000
Chontales.....	24,000
Matagalpa.....	28,000
Segovia.....	24,000
Total.....	206,000

To this total should be added 30,000 uncivilized, comprised of 20,000 smooos or Indians of various tribes, and 10,000 Mosquitos, zambos, black Caribs, etc.

Of the civilized inhabitants, about thirteen twenty-sixths are Indians of unmixed blood; eleven twenty-sixths mestizoes (*ladinos*, from whites and Indians, and zambos, from negroes and Indians); and two twenty-sixths whites, these last being mainly descendants of the early Spanish colonists. Nicaragua, the capital, has about 6,000 or 7,000 inhabitants.

The President of the Republic is Vicente Quadra, elected February 1, 1871; the Minister

of Foreign Affairs, A. Rivers; the Minister of Finances, Z. de la Rocha; the Minister of the Interior and of War, Falla; and the Minister of Public Instruction, F. Barbarens.

The President of the Senate is P. Chamorro; and the President of the Chamber of Deputies, Z. E. Cecadna. The consul-general of Nicaragua in New York is Alexander J. Cothel, Esq. The Bishop of Nicaragua is M. Ulloa y Calvo.

The army, in 1873, was composed of 6,000 men; 4,800 foot, 400 horse, 500 artillery, and 300 staff-officers.

Nicaragua is the most backward of the Central American States in the matter of education. The University of Leon has three faculties—medicine, law, and theology; and that of Granada has a chair of law, and 162 grammar students.

There are in the whole republic ninety-two schools for males, with an attendance of 3,871, and nine schools for females, with an attendance of 532. In other words, out of 12,000 males between the ages of seven and fifteen years, but 4,000 attended school; and but 532 out of 18,000 females of the same age.

A law exists, but is rarely enforced, requiring parents to send all their children between seven and fifteen years to school, and prescribing a fine of 45 cents per day for each infraction.

The finances of the country are, and have long been, in a deplorable condition. The revenue is for the most part derived from government monopolies on spirits, tobacco, and gunpowder, and from import duties, and a tax on slaughtered cattle. The expenditure is chiefly devoted to the maintenance of the army, and the payment of interest on the national debt.

The legal rate of interest on money is 12 per cent. per annum. The municipal revenue of the city of Managua, capital of the republic, in 1872, amounted to \$4,102.25.

The chief articles of export are indigo, India-rubber, gold, coffee, cotton, cacao, sugar, hides, deer-skins, Brazil and other dye-woods, timber, etc. The value of the exports averages about \$1,000,000 annually, and that of the imports somewhat less.

The imports from England, by far the most considerable, include cotton, woolen, and linen fabrics, cutlery, etc.; those from the United States, provisions, drugs, agricultural and other machinery; and from France and Germany, fancy articles, wines, etc.

The value of the imports at San Juan del Norte in the first quarter of 1873, with the countries from which they were received, was as follows:

Countries.	Value.
England.....	\$229,008 95
France.....	65,614 42
United States.....	19,436 80
Spain.....	2,391 34
Italy.....	2,614 64
Germany.....	2,100 64
Total.....	\$330,106 79

The value of the exports during the same period is exhibited in the following table :

ARTICLES.	Quantities in pounds.	Price.	Value.
Indigo.....	56,910	\$1 25	\$71,137 50
Brazil-wood.....	20,000	06	160 00
Coffee.....	45,530	12	5,463 60
Cacao.....	16,875	30	5,062 50
India-rubber.....	43,624	40	17,449 60
Peruvian bark.....	404	30	121 20
Deer-skins.....	4,570	30	1,371 00
Hides.....	78,290	12	9,393 60
Gold.....			55,340 00
Total.....			\$165,605 00

The tobacco crop in Masaya was unusually abundant in 1872, and the planters, encouraged thereby, began early in the following year to take measures to secure a like favorable result. The tobacco of Jalapa is reputed to be equal in flavor to the finest Copan of Honduras; and it brings \$22 per quintal for the first quality, and \$11 for the second.

Owing to a continued drought throughout the winter, a general failure of the other crops was apprehended.

Congress assembled on January 7th, and President Quadra delivered an address, the most important subject of which was the projected interoceanic canal across the territory of Nicaragua. "The grand project of opening an interoceanic canal through the American isthmus," says the President, "has attracted of late a larger share of public attention than heretofore. The United States Government has sent an exploring commission to our territory, and the results of their labors are, so far, very flattering. The Government of Nicaragua has used every means in its power to promote the development of the project, and furnished the commission with all possible facilities for the prosecution of that survey. The American Government has expressed its satisfaction with the friendly sentiments of our country; and, if the ultimate results of the reconnaissance prove equal to our present hopes, there is little doubt of the consummation on our soil of that stupendous work in which the whole commercial world is so deeply interested."

It would appear from the report of Mr. A. G. Menocal, chief-engineer of the expedition under Commander Lull, that the Nicaragua lake would be a necessary, and even a favorable element in any project for a ship-canal across the republic; necessary, on account of its position; and favorable, by reason of its inconsiderable elevation above the sea, affording an extensive summit-level, a saving of distance in the proposed canal, and an inexhaustible supply of water for the working of both branches of the latter, to the Atlantic and Pacific respectively. The first object of the expedition was, therefore, to seek a suitable route from the lake to the Pacific, which could be accomplished by proceeding in a northwesterly direction up the Estero de Panaloya to Lake Mana-

gua, and from the northern point of this last to Fonseca Bay, through the valley of Leon. Instead of the bay just named, Realejo, or any other port on the Pacific coast, might be chosen; or, by cutting direct from Lake Nicaragua across the Department of Rivas to some point on the Pacific. The branch from Lake Nicaragua to the Atlantic might lie through the San Juan River as far as navigable, and be continued by an artificial canal. Of three routes surveyed for the western branch, that from the mouth of the river Del Medio, at the lake, to the port of Brito is 16½ miles in length, and its highest point 184 feet above mean high lake. The navigation of the lake itself embraces a distance of 56 miles from the mouth of the river Del Medio to San Carlos at the issue of the river San Juan, the outlet of the lake. The eastern branch of the route, extending from San Carlos to the harbor of Greytown, is in length 108 miles, 68 of which being in slack-water navigation, by the river San Juan, and the remaining 45 miles by an inland canal. It is proposed to make the San Juan River navigable by means of four dams with short canals around them, in each of which will be a lock some 10 feet in lift. In Brito, a harbor would be made by means of a break-water, and there ships would at all times find safe and commodious anchorage. The harbor of Greytown being at present inadequate to receive large ships, owing to the sediment from the San Juan River, it is proposed to restore it to its former state by a breakwater and by dredging, after having turned the river off by the river San Carlos.

Excellent building-materials may be found in abundance and at convenient distances from the proposed routes. The country is opened and settled, particularly in the western sections; and the climate along the whole line of the projected canal is very good.

In the opinion of the chief-engineer, the magnitude of the enterprise, and the favorable conditions of the country, would induce immigration to such an extent that the improvement of the country would necessarily tend to facilitate the work, and in a measure diminish its estimated cost.

By the Rio del Medio line, 181, $\frac{7}{8}$ miles in length, the cost of construction is estimated as follows:

Western branch.....	\$21,069 775
Middle, or lake branch.....	715,668
Eastern branch.....	25,021,314
Harbor of Brito.....	776,518
Harbor of Greytown.....	918,525
Total.....	\$49,122,785
Adding twenty-five per cent. for contingent expenses.....	12,280,696
Grand total.....	\$61,403,481

Commander Lull says, in his report to the Government, that from 3,000 to 5,000 laborers would be furnished by Nicaragua and the neighboring states.

By act of Congress, under date February 9,

1873, a privilege was granted to Messrs. Hollenbeck and associates for the construction of a railway from Granada to Leon. The privilege is to extend over a term of ninety-nine years. The Government guarantees eight per cent. interest on the cost of construction, within the limit of \$10,000 per mile, for a term of fifteen years; the gauge of the line is to be not less than thirty inches; the work was to be commenced within six months from the date of the concession, subject to a voidance of the contract in case of delay beyond that period. The work is to be completed in three years and six months from the commencement; the company, after the completion of the line, is to make the necessary surveys for the extension of the line from Leon to a point on the Pacific coast.

One of the last acts of Congress was the ratification of a contract with Mr. H. Meiggs Keith for the construction of a railway from Leon to a point in the Bay of Corinto, on the Pacific coast. This line will serve as a continuation of the Hollenbeck railway.

General Don Tomás Martínez died in the city of Leon, on March 13, 1873. He was President of the Republic from 1857 to 1867, and figured prominently in most of the important political events during the twelve years immediately preceding his death. His memory, both as a soldier and a statesman, will be long cherished by his countrymen.

NOEL, Rev. and Hon. BAPTIST WRETHERSLEY, D. D., an eminent English clergyman and author; born in England in 1799; died in London, January 20, 1873. He was the youngest son of Sir Gerard Noel-Noel, Bart., and the Baroness Barham, and was educated at Trinity College, Cambridge. Having been ordained to the priesthood in the Church of England, he was appointed one of the chaplains to the Queen, and became pastor of St. John's Chapel, Bedford Row, London. For many years he was one of the most popular and influential ministers in England; and his name was identified with almost every Christian movement of the time. About the year 1848 Mr. Noel dissented from the views inculcated by the Church of England on baptism, and was so firm in his convictions that he severed his connection with that church; was publicly immersed, and joined the ministry of the Baptist Church. About this time he published his "Essay on the Union of Church and State," and also that on "Christian Baptism," indicating the step which he has taken. In 1869 he retired from his pastoral duties, but, despite his advanced years, engaged actively in evangelistic labors, being one of the founders and promoters of the "Midnight Mission," and his zeal for religion never flagged. As a preacher he was fervent, spiritual, and tender, and, although extemporaneous, his flow of thought was clear and consistent. Besides the publications already mentioned, Mr. Noel was the author of "Notes of a Tour through Ireland,"

published in 1837; "Sermons on the First Five Centuries of the Church," 1839; "Sermons to the Unconverted," 1840; "Christian Missions to Heathen Lands," 1842; "Sermons on Regeneration," 1843; "Case of the Free Church of Scotland," 1844; "Messiah: Sermons on Isaiah," 1847; "Notes of a Tour in Switzerland, 1847;" "Sermons at St. James's and Whitehall Chapels," "Christian's Faith, Hope and Joy," "Gospel of the Grace of God," 1849; "Essay on External Act of Baptism," 1850; "Christianity compared with Unitarianism," 1851; "Letters to Farant on the Church of Rome," 1852; "Notes of a Tour in the Valleys of Piedmont," 1855; "Essay on Duty of Englishmen toward the Hindoos," 1858; "Freedom and Slavery in the United States of America," and "Rebellion in America," 1863; and "Case of George William Gordon, of Jamaica," 1866.

NORTH CAROLINA. The Legislature of North Carolina, which met in November, 1872, after adjourning from December 19th to January 15th, continued its sessions till the 3d of March. The amendments to the constitution were approved, and provision was made for submitting them to a vote of the people on the 7th of August. On that date a separate vote was taken on each of the eight amendments, and they were all ratified by a majority of about 25,000 votes. The changes made in the constitution are as follows: Before amendment, section 6 of Article I. read as follows:

SECTION 6. To maintain the honor and good faith of the State untarnished, the public debt, regularly contracted before and since the rebellion, shall be regarded as inviolable and never be questioned; but the State shall never assume or pay, or authorize the collection of any debt or obligation, express or implied, incurred in aid of insurrection, or rebellion against the United States, or any claim for the loss or emancipation of any slave.

The first amendment strikes out the first clause down to and including the word "but." The same amendment strikes out altogether section 4 of Article V., which was as follows:

SEC. 4. The General Assembly shall, by appropriate legislation, and by adequate taxation, provide for the prompt and regular payment of the interest on the public debt, and, after the year 1880, it shall lay a specific annual tax upon the real and personal property of the State, and the sum thus realized shall be set apart as a sinking fund, to be devoted to the payment of the public debt.

The second amendment abolishes the office of Superintendent of Public Works, the holder of which was an executive officer elected for a term of four years.

The third amendment relates to the taking of the State census which was provided for by section 5 of Article II., as follows:

SEC. 5. An enumeration of the inhabitants of the State shall be taken under the direction of the General Assembly in the year one thousand eight hundred and seventy-five, and at the end of every ten years thereafter; and the said Senate districts shall be so altered by the General Assembly, after the first session after the return of every enumeration taken as aforesaid, or by order of Congress, that each

Senate district shall contain as near as may be an equal number of inhabitants, excluding aliens and Indians not taxed, and shall remain unaltered until the return of another enumeration, and shall at all times consist of contiguous territory; and no county shall be divided in the formation of a Senate district, unless such county shall be equitably entitled to two or more Senators.

The amendment strikes out all that precedes the words "the said Senate districts," and also the phrase "as aforesaid, or," thus doing away altogether with the State enumeration.

The fourth amendment inserts the words "or any other personal property" after the word "instruments" in section 6 of Article V., which stood thus:

Sec. 6. Property belonging to the State or to municipal corporations, shall be exempt from taxation. The General Assembly may exempt cemeteries, and property held for educational, scientific, literary, charitable or religious purposes; also wearing apparel, arms for muster, household and kitchen furniture, the mechanical and agricultural implements for mechanics and farmers, libraries and scientific instruments, to a value not exceeding three hundred dollars.

The fifth amendment strikes out section 5 of Article IX., which was as follows:

Sec. 5. The University of North Carolina, with its lands, emoluments, and franchises, is under the control of the State, and shall be held to an inseparable connection with the free public-school system of the State—

And inserts in its place:

Sec. 5. The General Assembly shall have power to provide for the election of trustees of the University of North Carolina, in whom, when chosen, shall be vested all the privileges, rights, franchises, and endowments heretofore in any wise granted to or conferred upon the trustees of said university; and the General Assembly may make such provisions, laws, and regulations, from time to time, as may be necessary and expedient for the maintenance and management of said university.

The sections relating to the appointment of trustees of the university by the Board of Education, and the powers and rights of the trustees, are also stricken out, and these matters now devolve on the Legislature.

The sixth amendment provides that the Legislature shall meet "biennially," on the third Monday in November, instead of "annually," as before.

The seventh amendment abolishes the Code Commission by striking out the sections of Article IV., providing for the appointment of three commissioners, by the convention which framed the constitution, to prepare "rules of practice and procedure" and a "code of law."

Section 7 of Article XIV. formerly read thus:

Sec. 7. No person shall hold more than one lucrative office under the State at the same time: *Provided*, That officers in the militia, justices of the peace, commissioners of public charities, and commissioners appointed for special purposes, shall not be considered officers within the meaning of this section.

The eighth amendment substituted the following for it:

Sec. 7. No person who shall hold any office or place

of trust or profit under the United States, or any department thereof, or under this State or any other State or government, shall hold or exercise any other office or place of trust or profit, under the authority of this State, or be eligible to a seat in either House of the General Assembly: *Provided*, That nothing herein contained shall extend to officers in the militia, justices of the peace, commissioners of public charities, or commissioners for special purposes.

The act of the Legislature which occupied the largest share of attention was entitled "An act for amnesty and pardon," and passed on the last day of the session. The following are its provisions in full:

SECTION 1. *The General Assembly of North Carolina do enact*, That no person, who may have committed any crime against or violation of the law of the State of North Carolina, with the exception of rape, deliberate and willful murder, arson and burglary, while a member of, or officer, or pretended officer of, the Heroes of America, Loyal Union League, Red Strings, Constitutional Union Guards, Whitebrother, Invisible Empire, Ku-klux Klan, North Carolina State Troops, North Carolina Militia, Jayhawkers, or any other organization, association, or assembly, secret or otherwise, political or otherwise, by whatever name known or called, in obedience to the commands, decrees, or determinations, by whatever name called, of such organizations, associations, or assemblies, or in obedience to the commands or orders or requests of any one exercising or pretending to exercise any authority or pretended authority by reason of his connection or attachment to any such organization, association, or assembly, shall be held to answer criminally for any such crime against or in violation of the laws of the said State of North Carolina in fact, committed or charged to have been committed previous to the first day of September, 1871. But every such person shall have free and complete amnesty and pardon therefor: *Provided*, That all persons who were not personally present at and actually participating in the crimes of willful murder, arson, and burglary, or who were not present at, and did not assent to the decree or order for the same, shall have the benefit of this act.

Sec. 2. That no person who may have been a member, officer, or pretended officer of any one of the organizations, associations, or assemblies, referred to in section one of this act shall be held to answer therefor, but every such person shall have full and complete amnesty and pardon therefor.

Sec. 3. That no person shall be held to answer criminally as accessory either before or after the fact for any crime against or violation of the laws of this State for which amnesty and pardon are provided in the preceding sections of this act, but every such person shall have full and complete amnesty and pardon therefor.

Sec. 4. That all presentments, indictments, or criminal proceedings of whatsoever nature or kind, now pending for any crimes against or violation of the laws of this State for which amnesty and pardon are provided in the preceding sections of this act, shall be forthwith dismissed, and no further criminal proceedings shall be had against such persons or any of them for any of said crimes against or violations of the laws of this State: *Provided*, That this act shall not apply to larceny and robbery: *Provided*, That the provisions of this act shall not be construed to extend amnesty and pardon to any persons who have in any way embezzled or wrongfully in any way used or misappropriated any money, bonds, evidences of indebtedness, choses in action, or any other property of any kind whatsoever belonging or appropriated by law to any railroad company, or other corporations, in which the State has or had any interest either direct or indirect, nor to Stephen Lowery, a condemned felon in the county of Robeson.

SEC. 5. That this act shall be enforced from its ratification.

"An act declaring what portion of the debt of North Carolina is valid, and to pay off the same," was introduced and discussed, but not passed. An elaborate revenue law was framed and adopted. It provides for a poll-tax of \$1.05 for school purposes; a tax of twenty cents on the hundred dollars of real and personal property for general purposes; a special tax of seven cents on \$100 to meet deficiencies; nine cents on \$100 for the Insane Asylum, and Institutions for the Deaf, Dumb, and Blind; and six cents on \$100 for the penitentiary. There is also a tax of one per cent. on incomes and profits, and license taxes for a great variety of occupations, varying in amount.

Among the less important acts passed were several incorporating new railroad companies. The following new towns were also incorporated: Apex, in Wake County; Ashborough, in Randolph; Castalia, in Nash; Colerain, in Bertie; Fair Bluff, in Columbus; Huntsville, in Mecklenburg; Jackson, in Northampton; Madison, in Rockingham; Pineville, in Mecklenburg; Rockingham, in Richmond; Selma, in Johnston; Stantonsburg, in Wilson; the village of Duplin Road, in Duplin County, and the village of Morrisville, in Iredell. The name of the town of Boon Hill, in Johnston County, was changed to Princeton, and that of McDowell, in Edenton, to Old Fort.

When the Legislature adjourned, on the 3d of March, it met again on November 17th.

There was no general election in the State this year, except that already mentioned, at which the vote was taken on the constitutional amendments. Tod R. Caldwell was inaugurated Governor, in the Supreme Court, during the vacation of the Legislature at the beginning of the year, and holds his office four years.

The financial condition of North Carolina caused considerable anxiety during the year among the officers of the State government and the people, and so threatening had become the financial aspect that the subject of repudiation began to be discussed. At the close of the fiscal year, ending September 30, 1873, the bonded debt of the State had reached \$29,547,045, in addition to \$8,471,924, of accrued interest, making a total indebtedness of \$38,018,969. The classification of this debt was as follows:

DEBT.	Principal.	Interest.
1. "Old" or ante-war bonds...	\$3,378,200	\$2,513,460
2. Bonds issued for internal improvements since the close of war, not "special tax"...	4,078,000	1,214,400
3. Bonds issued for funding, under acts of 1865-'68.....	4,128,800	1,241,040
4. Bonds and registered certificates since close of war, for other purposes.....	427,045	139,604
5. Special-tax bonds.....	11,407,000	2,844,510
6. Bonds issued after May 20, 1861, and prior to May, 1865, for internal improvement purposes, not marketable...	1,128,000	518,910
Total.....	\$29,547,045	\$8,471,924

The greater portion of the above bonds were to railroad corporations, and had become in many instances greatly depreciated, or entirely worthless. The purposes for which State bonds have been issued, at various times, with the amount and interest due October 1, 1873, are shown in the following statement:

PURPOSES FOR WHICH BONDS WERE ISSUED.	Total Amount of Bonds.	Total Amount of Interest Due.
Fayetteville & West'n Plank Road.....	\$50,500	\$15,150 00
Gaston & Weldon Railroad, and Neuse & Tar Rivers..	25,000	7,500 00
North Carolina Railroad...	2,794,000	838,200 00
Fayetteville & Centre Plank Road.....	45,000	13,500 00
Fayetteville & Warsaw Pl'k Road.....	10,000	3,000 00
Tar River.....	15,000	4,500 00
Insane Asylum.....	71,000	21,300 00
Atlantic & North Carolina Railroad.....	1,351,500	405,450 00
Albemarle & Chesapeake Canal.....	824,000	97,200 00
Western (Coalfields) Railroad.....	1,706,000	441,900 00
Western North Carolina Railroad.....	10,070,000	2,717,200 00
Wilmington, Charlotte & Rutherford Railroad.....	4,447,000	1,154,700 00
Cape Fear & Deep River Navigation Company.....	145,500	43,650 00
Chatham Railroad.....	1,200,000	360,000 00
Williamston & Tarboro Railroad.....	450,000	110,310 00
Atlantic, Tennessee & Ohio Railroad.....	147,000	85,280 00
Penitentiary.....	44,000	13,200 00
For certain purposes.....	1,011,700	303,510 00
Issued under Funding Act of March 10, 1866.....	2,417,400	726,220 00
Issued under Funding Act of August 20, 1868.....	1,711,400	515,820 00
Registered certificates issued to State Board of Education.....	868,045	126,404 85
Total.....	\$28,419,045	\$7,953,014 85
Issued for internal improvement purposes after May 20, 1861, and prior to May, 1865.....	1,128,000	
Interest due on same.....		518,910 00
Total principal and interest	\$29,547,045	\$8,471,924 85

The total valuation of real and personal estate in 1872 was \$123,500,000. The State Treasurer says: "Omitting special tax bonds altogether, the interest on the rest of our debt, supposing our accrued interest to be funded, would be \$1,406,668.99 per annum. To this add the expense of supporting the State government and it will be necessary to raise \$1,900,000 per annum, or one and three-fifths per cent. of the real and personal property. Add an amount for county taxation equal to that for State government expenses, and we have, outside the towns and cities, two and one-tenth per cent. of our property; and in many of the cities and towns the levies for municipal purposes are as large, if not larger. Now add, as the holders of special-tax bonds propose, a tax of \$855,090, or three-quarters of one per cent. on the property, and we have a grand total of two and eight-tenths per cent. It is manifest that our people cannot and will not pay such enormous levies. Any attempt to enforce it would result in total repudiation."

The financial problem was the most important subject before the Legislature at the session beginning in November. What was considered the best plan was reported by the joint select committee upon the State debt in the "bill to adjust the State debt," which was in prospect of passing both Houses at the close of the year. This provided for the issue of \$6,000,000 coupon bonds to be dated July 1, 1874, bearing six per cent. interest payable semi-annually in New York, "to compromise and pay off the outstanding debts of the State with the accrued interest on the same." These bonds were to mature as follows: \$500,000 July 1, 1904, and \$500,000 the first of each succeeding July up to July, 1916. The purposes for which these bonds are to be used are specified in the act as follows:

That the said bonds shall remain in the office of the Treasurer of the State, and shall be held by the Treasurer for the following purpose and no other, to wit: To be used in exchange for the outstanding bonds and certificates of indebtedness of the State as is herein provided, viz.: First, for all North Carolina bonds (issued for the construction of the North Carolina Railroad) with due coupons on same, fifty cents on the one dollar; second, for all ante-war bonds, dated anterior to the war, with the accrued interest on the same, thirty cents on the one dollar; third, for all bonds issued since the close of the war (other than special tax), including all funding bonds issued under the acts of the Legisla-

ture in 1866 and 1868, and all accrued interest on the same, except \$44,000 Penitentiary bonds and interest on same, twenty cents on the one dollar, and for bonds issued for internal improvement purposes after May 20, 1861, and prior to May, 1865, twenty cents on the dollar.

Provision is made for the payment of the interest on the bonds by "a tax of twenty-five cents on the \$100 valuation of all the real and personal property of the State, and eight and one-third cents on the poll is hereby levied, and shall be annually collected as other taxes. But no tax shall be collected until the proposed exchange of bonds shall be made, and it shall be the duty of the Auditor on the 1st day of November, 1874, to ascertain from the Treasurer the amount of bonds so exchanged, and shall then order the collection of a sufficient amount of tax as above provided to pay the interest on the amount of bonds so exchanged, said tax to be collected and paid into the Treasury by the 1st of January, 1875, and that the coupons coming due 1st January, 1875, shall be receivable for said taxes."

The State had 87 miles of railroads in 1841; 283 in 1851; 937 in 1861; and 1,143 in 1873.

The following table shows the railroads lying wholly or partly within the State, with the termini of the lines so projected, the length of the entire road, and the number of miles in operation in the State in 1873:

NAME OF ROAD.	Length of Line, Miles.	Miles in N.C. in operation in 1873.	Termini.	Capital Stock.

NOTT, JOSIAH CLARK, M. D., ethnologist and physiologist; born in Columbia, S. C., March 31, 1804; died at Mobile, Ala., March 31, 1873. He was a son of Judge Abraham Nott, graduated from South Carolina College in 1824, and received the degree of M. D. at Philadelphia in 1827, remaining there two years as demonstrator of anatomy. Returning to Columbia he entered upon the practice of his profession, in which he was eminently successful. In 1835 he went to Europe, spending two years in the study of medicine, natural history, and the kindred sciences, and, upon his return, resumed the practice of his profession in Mobile, where he established a medical college which the Legislature of Alabama endowed with \$50,000, and made a branch of

the State University. In the winter of 1857 he was Professor of Anatomy in the University of Louisiana. Besides many valuable articles contributed to different medical journals, Dr. Nott published several ethnological works which have attracted great attention both in Europe and the United States. Among these are two lectures on "The Connection between the Biblical and Physical History of Man" (8vo, 1849); "The Physical History of the Jewish Race," 1850; "Types of Mankind" (4to, 1854), and "Indigenous Races of the Earth," 1857. The last two were prepared with the aid of Mr. George Gliddon, who died at Panama, in 1857, and the object of the works was to refute the orthodox theory of the unity of the human race.

O

OBITUARIES, AMERICAN. *Jan. 1.*—**CAMERON**, Captain JOHN, an officer of the New York City police force, died in New York suddenly, of heart-disease, aged 65 years. He had been for twenty-seven years in the force, and was regarded as one of its most faithful and efficient officers. He had risen from a patrolman, through all the grades, to the position of captain, and was the oldest officer but one of the police. He served with distinction during the Astor-Place riot and that of 1863.

Jan. 1.—**CARLETON**, Brevet Major-General JAMES H., U. S. A., a brave and gallant officer in the late war, and in the war with Mexico, died in Texas, at the age of 59 years. He was born in Maine, and during what was known as the Aroostook War, relative to the northeastern boundary of the United States, was captain of a company of Maine riflemen. In February, 1839, after the conclusion of that controversy, he was commissioned second-lieutenant of the First United States Dragoons. He was promoted to a first-lieutenancy in March, 1845, and served on General Wool's staff in Mexico. In February 1847, he became captain, and was brevetted major for gallantry at Buena Vista. In September, 1861, he was commissioned major of the Sixth Cavalry, and ordered to Southern California. In the spring of 1862 he raised a body of troops known as the "California Column," and marched with them across the Yuma and Gila deserts to Mesilla on the Rio Grande. On April 28th he was commissioned brigadier-general of volunteers, and ordered to relieve General Canby as commander of the Department of New Mexico. He remained in command there for several years, taking part in three or four battles. On July 31, 1866, he was commissioned lieutenant-colonel of the Fourth Cavalry, and brevetted Major-General U. S. Army for his gallant services. In June, 1868, he was promoted colonel of the Second U. S. Cavalry, and ordered with his regiment soon after to Texas. General Carleton published, in 1848, a "History of the Battle of Buena Vista," and had occasionally contributed to military periodicals since that time.

Jan. 1.—**KELLEY**, Rev. EDWIN DELMONT, a Baptist clergyman and missionary to the Shans in Northern Burmah; was drowned in Shan-land, at the age of 37 years. He was born in North Clarendon, Rutland County, Vt., June 18, 1846; graduated from the University of Michigan in 1866, and from Newton Theological Seminary in June, 1871. In October of that year he sailed for Burmah, and arrived at Toungoo February 20, 1872. Though he had been not quite a year in the field, he had so far mastered the difficult language as to be able to preach in it, and manifested a remark-

able aptitude for all the details of the missionary work.

Jan. 2.—**DOD**, Rev. WILLIAM ARMSTRONG, D. D., an Episcopal clergyman; died in Princeton, N. J. He graduated from Princeton College in 1838, from 1840 to 1841 held the office of tutor, and from 1855 to 1859 lectured upon the fine arts in the college. In 1858 he changed his ecclesiastical relations, was reordained by the late Bishop Doane, and became a priest in the Protestant Episcopal Church. Subsequently he became rector of Trinity Church, Princeton, which charge he continued to hold until ill health compelled him to resign a few years previous to his death. He received his degree of D. D. from Columbia College, in 1859.

Jan. 8.—**BUTCHER**, WASHINGTON, an eminent merchant of Philadelphia; died in that city, aged 57 years. He was a man of extensive culture, and widely known for his philanthropy. For many years he was a director of the Pennsylvania Railroad Company, and, shortly before his death, he was elected president of the American Steamship Company.

Jan. 8.—**POST**, SAMUEL ADAMS LYONS LAW, an eminent teacher, and subsequently a journalist; died in Ellenville, N. Y., aged 44 years. He was born in Meredith, Delaware County, N. Y., June 10, 1829; commenced teaching at the age of fourteen, graduated from Yale College in the class of 1858, and subsequently took charge of a classical school in Derby, Conn. In 1856 he removed to Ulster County, N. Y., as principal of the Ellenville High School, with which he was connected until 1868, when, having been admitted to the bar, he entered upon the practice of law. Ill health, however, compelled him to relinquish his profession in 1871, and soon after he became editor of the *American Odd-Fellow*, published in New York.

Jan. 8.—**WELLES**, JAMES HENRY, an eminent railroad builder and financier, for nineteen years resident in New York City; died there in the 54th year of his age. He was a native of Athens, Pa., a graduate from Amherst College in 1843, and had received a legal training. He engaged extensively in farming in his native town until 1854, when he removed to New York to take an active interest in the construction of railroads and canals. He was of the highest character for integrity and honor, and disbursed his large wealth with great liberality.

Jan. 9.—**BRISTOL**, ALBERT GALLATIN, M. D., an eminent physician, and, later in life, a manufacturer of Rochester, N. Y.; died there, aged 64 years. He was a native of New Haven, Conn., a graduate of Yale College in 1827, and of the Medical Department of Yale College in 1830, and subsequently studied his profession

in Paris for two years. He first established himself in Canandaigua, N. Y., where he was very successful, but subsequently removed to Rochester, where, until the failure of his health, he occupied a very high rank in the profession.

Jan. 11.—SPRAGUE, REV. DANIEL GREENE, a Presbyterian clergyman of remarkable ability and success during a ministry of more than fifty years; died at Salem, N. Y., in the 77th year of his age. He was born at Killingly, Conn., July 8, 1796, fitted for college at Plainfield Academy, graduated from Brown University in 1819, and from Andover in 1822, and, after one year's service as a home missionary in Illinois, was pastor at Hampton, Conn., for fifteen years, at Westchester, Conn., for five years more, and at South Orange, N. J., for sixteen years, continuing to reside there for eight or nine years after his failing health had required his resignation. He had resided with his son, at Salem, N. Y., for three and a half years, and was greatly esteemed. His ministry had been remarkably successful.

Jan. 11.—WOODWARD, JAMES MONTGOMERY, a Connecticut lawyer and journalist; died at Wolcottville, Conn., aged 46 years. He graduated from the New Haven Law School in 1846, and practised his profession till 1851, when he became the principal editor of the *New Haven Daily Journal and Courier*. He continued to edit this paper till 1861, when he was elected lieutenant-colonel of the Second Regiment Connecticut militia, and was engaged in the war for nearly two years. He then resumed editorial work, first on the *Waterbury American*, and afterward at his old post at New Haven. In 1869 he was compelled to abandon his duties in consequence of failing health.

Jan. 12.—BALDWIN, OBADIAH, a centenarian of Crown Point, N. Y.; died there, aged 101 years.

Jan. 13.—FAILE, THOMAS HALL, an eminent merchant and philanthropist of New York City, one of the governors of the New York Hospital, and a liberal giver to all benevolent objects; died at Nice, France, in the 70th year of his age.

Jan. 13.—ROSE, ORRIN J., an eminent citizen of Chicago, and late U. S. consul at Ancona, Italy; died in New York City in the 46th year of his age.

Jan. 14.—MCDONALD, ANDREW, a centenarian of New Orleans, for twenty-one years a resident in that city; died there, aged 104 years.

Jan. 16.—CLEVELAND, PROF. WILLIAM CHARLES, C. E., and Professor of Civil Engineering in Cornell University, Ithaca; died there. He was a graduate of the Lawrence Scientific School of Harvard University in 1862, where he resided and practised his profession until called to the position he occupied at the time of his death. He was a man of rare talents, a passionate lover of art, and eminently

fitted for the important work of an educator of youth.

Jan. 16.—KILE, Prof. O. H., a leading educator; died at Westerly, R. I., aged about 38 years. He graduated from the University of Vermont in 1863, and had been at the head of the Westerly High School for several years.

Jan. 17.—BALLARD, DAVID C., journalist; died in Boston, aged 72 years. He was connected with the *Boston Advertiser* for a period of nearly forty years.

Jan. 18.—DORT, Colonel LOCKWOOD L., a lawyer, and officer of volunteers during the late war; died in Jersey City, aged 46 years. He was born at Groveland, N. Y., May 15, 1827. His early years were spent in his native village, and, when of age, he entered a law-office in Geneseo, N. Y. He was active in procuring enlistments during the war, was military secretary of Governor Fenton, and founded the State Military Bureau at Albany, which collected the history of the volunteer regiments and provided for the care of the sick and wounded. In 1871 he received from President Grant the appointment of Pension Agent of New York City, which position he held until ill health compelled his resignation a few weeks previous to his death.

Jan. 18.—WILSON, DANIEL M., an eminent citizen and philanthropist of New Jersey; died at Newark, aged 70 years. In early life he was engaged in mercantile pursuits in New York City, by which he acquired an ample fortune. Upon retiring from business, he became a resident of Newark, N. J., and from that time identified himself with all its important interests. He was one of the most active citizens in building the plank-road between that city and New York, and was the president of the company from its formation; was a director of several financial institutions, and president of the Republican Trust Company of Newark from its organization. For several years he was president of the American and Foreign Bible Society, and held other important offices connected with the Baptist denomination. He was also president of the Board of Trustees of the Peddie Classical and Scientific Institute, at Hightstown, N. J., to which he was a large contributor.

Jan. 19.—WALKER, MRS. MARY A., widow of the late Hon. Robert J. Walker, sister of the late Prof. Bache, grand-daughter of A. J. Dallas, and great grand-daughter of Benjamin Franklin; died in Washington, D. C.

Jan. 21.—OTIS, Mrs. HARRISON GRAY, widow of the eminent scholar, orator, and Senator of that name, and a distinguished leader of society in Boston; died in that city, aged 70 years. She was a woman of fine culture and great dignity of character, while her abundant wealth enabled her to give largely to the benevolent organizations of the day. In 1854 she published a novel, entitled "The Barclays of Boston."

Jan. 22.—DALZELL, ROBERT M., an eminent citizen and millwright of Rochester, N. Y.;

died in that city, aged 80 years. He was born near Belfast, Ireland, of Scottish ancestors. His father, John Dalzell, was a leader in the Irish rebellion of 1798, in consequence of which the old family mansion was burned, and he was forced to put to sea in an open boat. Providentially he was picked up, and landed in New York, whither his family soon followed. They settled in Vernon, Oneida County, where Robert continued to reside till 1826, when he removed to Rochester, where he ever after made his home. He was a millwright, unusually skillful and ingenious, and all the flour-mills in that city were built under his supervision. He also invented and introduced the "elevator system" in handling and stowing grain, now in general use.

Jan. 22.—MACKWOOD, Rev. —, a former bishop of the United Brethren of Christ (German Methodists); died at Luray, Page County, Va.

Jan. 23.—DENIS, HENRY RAPHAEL, an eminent lawyer of New Orleans; died in that city, aged 86 years. He was one of the oldest members of the bar, and the Supreme Court adjourned out of respect to his memory.

Jan. 23.—SHAFTER, OSCAR O., formerly Judge of the Supreme Court of California; died in Florence, Italy. He was elected one of the justices of the Supreme Court in September, 1863, and entered upon his duties in January, 1864, his term of service expiring by allotment in 1872. From 1870 to 1872 he held the position of Chief-Justice.

Jan. 24.—SEWARD, Rev. JOHN, an eminent Presbyterian clergyman and one of the pioneers in home missionary work; died at Tallmadge, Ohio, aged 89 years. He was born in Granville, Mass., January 24, 1783; prepared for college under the tuition of the Rev. Dr. Cooley; graduated from Williams College in the class of 1810, studied theology with Dr. Porter, of Washington, Conn., and received a license to preach from the Congregational Association at New Preston, Conn., June 5, 1811. Receiving a commission to labor as a missionary on the Western Reserve, he was ordained an evangelist by the Hartford North Connecticut Association in September, 1811, and the same month started for Ohio on horseback. He was first installed pastor of a church in Aurora, Portage County, where he was successfully employed till 1844, though his labors extended to all parts of the Western Reserve. In the spring of 1844 he was dismissed at his own request, and at once entered upon a charge at Solon, Cuyahoga County, where he labored fifteen years, and subsequently made his home in Tallmadge. He was the last of the signers of the constitution of the first Foreign Missionary Society.

Jan. 25.—DUNCAN, DAVID, an eminent New York banker, of the firm of Duncan, Sherman, & Co.; died at Cannes, France. He was a native of Rhode Island, and a large contributor to the benevolent institutions of that State.

Jan. 25.—TRACY, WILLIAM H., Judge of the Marine Court of New York; died in that city, aged 84 years. He was a native of New York, and in 1856 entered the office of Luke F. Cozzens, a lawyer, was admitted to the bar in 1858, and soon after was elected a member of the Assembly, representing the Thirteenth and parts of the Tenth and Seventeenth Wards of the city. When the act relative to the Marine Court was passed, making three new judges, he was elected as one, and his decisions have been reversed less frequently than those of any judge of the Marine Court.

Jan. 26.—NOBLE, LINNEUS P., an eminent antislavery leader and reformer; died in Fayetteville, N. Y., aged 71 years. Early in life he espoused the antislavery cause, and was identified with the labors of Gerrit Smith, James G. Birney, Beriah Green, and other earnest workers in that cause. He was the first publisher and one of the founders of the *National Era*, an antislavery journal published at Washington, D. C. He was also engaged in the temperance reform, and every reform of a civil, moral, or social character, found in him a cordial supporter.

Jan. 27.—CRANSTON, ROBERT B., an eminent and philanthropic citizen of Newport, R. I.; died there, aged 81 years. He was a native of Rhode Island, and was a Representative in Congress from 1837 to 1843, and again from 1847 to 1849. In 1864 he was a presidential elector. In his will he left \$75,000 to the poor of Newport "who are too honest to steal and too proud to beg."

Jan. 27.—WARDEN, FRANCIS, for thirty years a partner of A. T. Stewart in the European department of his business; died in Paris, aged 63 years. There were few American merchants on the Continent when he went to Paris in 1845, but as trade increased he was made general manager, with a corps of special buyers under his orders. For many years he selected the silks, laces, carpets, and shawls which the firm imported, and displayed rare taste and discrimination in choosing goods. The partnership was dissolved at his request about eight months previous to his death, but he continued to manage the business until disabled by his last illness. He left a fortune of \$10,000,000.

Jan. 29.—BRODIE, JOHN W., a journalist; died in New York City, aged 32 years. He was a native of Edinburgh, but most of his life was spent in London. He served during the Russian War, being stationed for a time at the hospital at Soutari. Early in 1869 he came to this country and became city editor of the *New York Dispatch*. He also contributed largely to the columns of the *Spirit of the Times*.

Jan. 31.—BUSHNEIL, NEHEMIAH, a lawyer and politician of Illinois; died at Springfield, aged 60 years. He was born in Westbrook, Conn., October 9, 1813, graduated from Yale College in the class of 1835, studied law in

Cambridge, and in 1837 was admitted to the bar in Middletown, Conn., whence he went to Quincy, Ill., and entered upon the practice of his profession. In 1851 he became President of the Chicago, Burlington & Quincy Railroad Company, and held that position until 1861, when he returned, and was appointed attorney for the road, which office he held at the time of his death. In the autumn of 1872 he was elected to represent the city of Quincy in the General Assembly of the State.

Jan. 31.—**MATTESON, JOEL A.**, formerly Governor of Illinois; died at Chicago, aged 65 years. He was a man of fine culture, an extensive traveler, and was Governor of Illinois from 1853 to 1857.

Jan. 31.—**MOSELEY, Major W. W.**, an officer of volunteers during the late war, recently a member of Assembly from the Fourth Brooklyn District; died in Brooklyn, aged 37 years. He was born in Glastenbury, Conn., in 1836, educated in the public schools and in the seminary at Cazenovia, N. Y., and upon the completion of his studies was appointed cashier of the Mechanics' Bank of Syracuse. When the war broke out he obtained a captaincy in one of the regiments forming in that locality, and subsequently was appointed to the staff of General Slocum with the rank of major, following him through the succeeding campaigns, including the celebrated march to the sea. Returning to Syracuse at the close of the war, he was appointed Collector of Internal Revenue, and subsequently removed to Brooklyn, where he served four terms in the Assembly.

Jan. —.—**BROWN, DAVID**, "the hermit of Newfane, Vt.;" died there. He was a large collector of books, and probably left the most extensive library in the State.

Feb. 1.—**PERKINS, HENRY COIT, M. D.**, A. A. S., etc., an eminent physician and scientist, of Newburyport, Mass.; died there aged 69 years. He was a graduate of Harvard University in the class of 1827.

Feb. 2.—**COLLIER, Colonel JAMES**, a prominent lawyer and politician of Ohio; died at Steubenville, Ohio, aged 84 years. He was a soldier in the War of 1812, and fought at Queenstown, where he assisted in forming the first American line on the Canadian side. After the war he removed to Steubenville, where he practised law with distinction and served as Paymaster-General of the State. When the question arose as to the boundary-line between Virginia and Ohio, he, with Thomas Ewing and John Brough, represented the latter State in the joint high commission that settled the dispute. In 1849, being then sixty years of age, he was appointed Collector for California, and he went there overland, fighting his way through the country occupied by hostile Indians, with only a small company of dragoons for an escort. When he had reached his destination he was the only officer there, and for some time he served as military Governor.

Feb. 4.—**GIFFORD, ARTHUR N.**, one of the constituent members of the New York Stock Exchange; died in New York City. He had been a member of the Exchange since November 3, 1817, and, although he had not been engaged in active business for several years, he had continued his membership of that body.

Feb. 4.—**HARVEY, Rev. JOSEPH, D. D.**, a Presbyterian clergyman, one of the founders and promoters of the Sandwich Islands Mission; died at Harvey, Mich., aged 86 years. He was born at East Haddam, Conn., March 1, 1787; graduated from Yale College in 1808, studied theology with Dr. Porter, of Washington, Conn., and in 1810 was ordained and installed over the Congregational Church in Goshen, Conn. In September, 1825, he resigned his pastorate to accept the position of Secretary of the American Education Society, at Boston, but soon after returned to his native place in impaired health. On his recovery, he accepted a call to the Congregational Church in Colchester, Conn., where he remained till 1835. During the last two years of his residence here he edited the *Evangelical Magazine*, and afterward a weekly paper entitled the *Watchman*. In 1839 he was installed pastor of the First Presbyterian Church just formed in Thompsonville, Conn., which charge he held until his resignation in 1857. The following year he removed to Michigan, where he continued to preach and teach from time to time until his death. Dr. Harvey was the first to propose the establishment of a mission in the Sandwich Islands. His degree of Doctor of Divinity was received from Amherst College in 1835.

Feb. 7.—**MARSH, Rev. FREDERICK**, a Congregationalist clergyman, died at Winchester Centre, Conn., aged 90 years. He was born in New Hartford, Conn., September 18, 1780, graduated from Yale College in the class of 1805, studied theology with Rev. Asahel Hooker, of Goshen, and, after preaching a year in different churches, was in 1809 ordained, and settled over the Congregational Church in Winchester, Conn., occupying the same house from that date until his death in his ninety-third year. In October, 1851, he was dismissed from the pastorate at his own request, and for the next ten years, until his eyesight failed, he preached for neighboring churches as needed. From 1836 to 1870 he was trustee of the "Theological Institute of Connecticut."

Feb. 9.—**MONTAGUE, CALVIN, M. D.**, an eminent physician and teacher; died at Westhampton, Mass., aged 82 years. He was born in that town in 1790, graduated from Williams College in 1814, spent two years in teaching in Virginia, and, having subsequently obtained a medical education, practised his profession in Ohio until 1836, when he returned to Westhampton and remained until his death.

Feb. 13.—**MCLEAN, Rev. WILLIAM, D. D.**, a Presbyterian clergyman, died at Washington, D. C. For a long period he had been the

financial Secretary and Treasurer of the American Colonization Society, faithfully performing his duties even after he was confined to his bed by the disease which terminated his life.

Feb. 15.—EMMET, ROBERT, an eminent lawyer, Justice of the Superior Court of N. Y.; died in New Rochelle, N. Y., aged 80 years. He was the son of Thomas Addis Emmet, the distinguished Irish exile, and nephew of the celebrated Robert Emmet. He was born in Ireland about 1792, and came to this country when a boy; was educated for his father's profession and held high rank among the members of the bar. In 1848, when an insurrection was contemplated in Ireland, he cordially coöperated with his countrymen in New York City in demonstrations of sympathy, and was one of the Directory formed for the purpose of sending material aid to the Irish patriots. He attended the great meeting held at the Tabernacle, June 6, 1848, and delivered an eloquent and stirring address, in which he said: "If Ireland cannot achieve her independence without bloodshed, let it be with blood. If reason cannot be heard, let the fight succeed. * * * I pray God that Ireland may achieve her independence without the need of such a struggle."

Feb. 18.—BARNES, SAMUEL C., an eminent teacher of public schools in Brooklyn, L. I.; died in that city, aged 60 years. He was a native of Ireland, and came to this country about the year 1830, since which period, until about 1867, he had held the position of principal in one of the Brooklyn schools, having resigned to accept the post of secretary of the East Brooklyn Savings-Bank, of which institution he was the originator. He was also the secretary of several other organizations, and had identified himself with all the interests of the city of his adoption.

Feb. 18.—HÖPKE, ADELBERT, M. D., a German journalist; died in New York. He was formerly one of the editors of the *New Yorker Journal*, and subsequently was connected with the *Staats-Zeitung*.

Feb. 19.—FENNO, A. W., a well-known actor and dramatist; died in New York City, aged 59 years. His early life was spent with his father's family, near Boston; but, at the age of sixteen, a love of adventure led him to ship on board a merchantman, as a sailor before the mast, on a voyage round the world. Returning, after a four years' cruise, he became enraptured with the life of an actor, studied for the profession, and for many years afterward pursued that vocation, varying it only with sea-voyages, of which he seemed never to tire. His greatest success was achieved in the Old Bowery Theatre, in the character of Rolla, which he acted, it is said, with genuine merit. His provincial tours, however, were numerous and extended, and probably no actor of equal merit had so much popularity and notoriety outside the metropolis without being rated as a star-actor within it.

Feb. 20.—VAN DEURSEN, WILLIAM, M. D., an eminent physician of New Brunswick, N. J.; died there, aged 83 years. He was born in New Brunswick, May 16, 1791, graduated at Rutgers College, in the class of 1809, on which occasion he pronounced the valedictory, and, having studied medicine in New York, serving as surgeon and physician in one of the hospitals, he entered upon the practice of his profession in Monmouth County, N. J. Later, he returned to his native city, and established a reputation for professional skill, which he maintained until his retirement from the active duties of his calling. Dr. Van Deursen was the eldest living trustee of Rutgers College, having been elected to that office in 1828.

Feb. 21.—GOODWIN, ISHABOD JORDAN, a prominent lawyer and political leader in New Hampshire and Maine; died in Berwick, Me., aged 66 years. He was born in Saco, Me., October 6, 1806; graduated at Bowdoin College in 1827, studied law, and for a period of forty years was a member of the Strafford (N. H.) and York County bar. He was a Democrat in politics, and, his residence being on the border-line of the States of New Hampshire and Maine, he served at different periods in each Legislature. He was a member of the Masonic fraternity, and for a time Grand-Master of the Grand Lodge of New Hampshire.

Feb. 21.—QUINN, Rev. PAUL, senior Bishop of the African Methodist Church for twenty-nine years; died in Indiana. He was the founder of the African Methodist Church in the West, and also of the Wilberforce University in Ohio.

Feb. 22.—EATON, Lieutenant-Colonel DANIEL LEWIS, a lawyer, editor, soldier, and financier; died at Washington, D. C., aged 47 years. He was born in Calais, Me., February 22, 1826; graduated at Bowdoin College in 1851, studied law, and entered upon the practice of his profession in Portland, Me., and also in St. Louis, Mo., and subsequently edited a newspaper in Pittsburg, Pa., for some years. During the late war he served on the staff of General Heintzelman, with the rank of major, was brevetted lieutenant-colonel, and later was appointed Actuary of the Freedman's Savings-Bank, Washington. Resigning this position, he was elected cashier of the Second National Bank, Washington. Upon the organization of the Territorial government, he was appointed by the President a member of the "Council," or Senate, which office he held at the time of his death.

Feb. 23.—ALLEN, Rev. JOSEPH, S. T. D., a Unitarian clergyman and author; died in Northborough, Mass., aged 88 years. He was born in Medfield, Mass., August 15, 1790; graduated at Harvard University in 1811, studied theology under Rev. Dr. Ware, at Cambridge, and was ordained pastor of the Congregational Church in Northborough, October 30, 1816, which relation he sustained until his death. In 1849 he was a delegate to the Peace Congress at Paris. He was the au-

thor of an "Historical Account of Northborough," 1826; "Memoir of Rev. Dr. Lathrop, of Springfield," 1823; "History of the Worcester Association," 1868; "Allen Genealogy," 1869; a number of text-books for day and Sunday schools, and several published sermons.

Feb. 24.—BIGELOW, URIAH C., M. D., an eminent physician of Albany, N. Y.; died there, aged 52 years. He was born in Worcester, Otsego County, N. Y. He graduated at the Albany Medical College, and, having practised four years in Berne, Albany County, he removed to Albany, and rapidly rose to a high rank in his profession. At the time of his death, he was one of the curators of the Medical College in that city, and a consulting physician to the Albany Hospital.

Feb. 24.—FRANKENSTEIN, GODFREY N., an eminent landscape and historical painter; died at Springfield, Ohio, aged about 42 years. He had been thoroughly trained in his profession, and possessed the ability to place upon canvas his conception of a great event of history with such completeness and clearness as to communicate his thought even to the dullest mind. His great picture of the "Battle of Gettysburg" was his masterpiece. It came near being destroyed at the great fire in Chicago, and was only saved by being cut from its frame. Though a very successful landscape-painter, he preferred historical, and especially battle-scenes, for his subjects.

Feb. 24.—PHELPS, ABNER, M. D., an eminent physician, politician, and author; died in Boston, aged 94 years. He was born in Belchertown, Mass., September 5, 1779; graduated from Williams College in 1806, and commenced the study of theology, but, his health failing him, he turned his attention to medicine, receiving the degree of M. D. from Brown University in 1818, and from Yale in 1814. After practising his profession for some years in Reading, he removed to Boston in 1816. While in college, he read an account of the use of railways in the quarries of Wales, which led him to believe that railroads were practicable for common travel. In 1808, his father being a member of the Legislature from Belchertown, he wrote, urging him to propose a railroad from Boston to Albany. The suggestion, however, was not then acted upon, but, in 1826, Dr. Phelps himself, being a member of the House from Boston, made the first proposition for building a railroad ever offered before any legislative body in this country. Having prepared an able report, commissioners were appointed, and the surveys made, much of the work being done under his own supervision, and at his own expense. He was for many years active in political life, and was an intimate friend and correspondent of William Wirt. He was the author of an interesting paper on "The Crucifixion of Christ."

Feb. 25.—GILLES, Commodore JOHN P., U. S. Navy, forty-eight years in the service; died in

Wilmington, Del., aged 70 years. He was a native of Wilmington, but during his youth, upon the death of his father, his mother removed her residence to Illinois, and he was appointed from that State to the United States Navy, December 12, 1825. During the late war he was actively engaged in command of the sloop Ossipee, of the Western Gulf Squadron, in 1863-'64, and contracted during this service a severe illness, which for some time unfitted him for duty. Since the war Commodore Gilles had been on duty at the navy-yard in Philadelphia, in the Lighthouse Board, and recently, up to his death, at the Naval Asylum.

Feb. 28.—MCCALLA, General JOHN M., one of the Auditors of the U. S. Treasury; died in Washington, D. C.

March 1.—BOYCE, HENRY, Judge of the Supreme Court of Louisiana; died at Cotile, La., aged 75 years.

March 1.—RICE, CALEB, a prominent citizen of Springfield, Mass., former mayor; died there, aged 81 years. Mr. Rice was born in Conway, Mass., fitted for college in Westfield, Mass., and graduated from Williams College in 1814. He was admitted to the Hampshire County bar in 1817, and practised his profession in West Springfield from 1818 to 1831. In the latter year he was chosen High-Sheriff of Hampden County, and continued in that office for twenty years, residing in Springfield after 1842. He was Mayor of Springfield from 1852 to 1854, and for more than twenty years was largely concerned in life and fire insurance.

March 2.—DURANT, CHARLES S., a veteran aeronaut; died in Jersey City, aged 68 years. He made the first balloon ascension in America, in 1833, from the Battery, at New York. Subsequently he made fourteen aerial voyages, on one occasion descending into the Atlantic Ocean. He was the author of several books of a scientific character, one of which was a "Treatise on Shells and Sea-weeds."

March 2.—JOHNSON, Major-General EDWARD, Confederate Army; died in Richmond, Va. He was born in Kentucky, and appointed a cadet from that State in 1832; graduated from the Military Academy at West Point in July, 1838, and entered the army as second-lieutenant, Sixth Infantry. He served in the Florida War, on frontier duty; in the war with Mexico, receiving the reward of brevet-major for gallant conduct at Chapultepec; served again on the frontier, and in garrison at Fort Columbus, N. Y.; became captain in 1851, and resigned in 1861, joining in the war against the United States. He became a major-general in the Confederate army in 1863, commanded a division in Ewell's corps at Gettysburg, with which he was captured at Spottsylvania, May, 1864, and was captured again at the head of a division in General S. D. Lee's corps, in 1864, near Nashville.

March 2.—WATERS, ANDREW, an educator;

died at Bunker Hill, Ill., aged 58 years. He was born in Millbury, Mass., September 27, 1814; graduated from Amherst College in 1839, commenced teaching in Delaware, and, removing to Kentucky, was engaged in his profession there for a period of seventeen years. When the late war commenced he was teaching in Tennessee, and, deeming it unsafe to remain there, on account of his antislavery sentiments, he returned to the North and spent the remainder of his life in Illinois.

March 6.—BISHOP, TIMOTHY, the oldest surviving graduate of Yale College, died in New Haven, Conn., aged 95 years. He was born in that city, October 29, 1777, graduated from Yale College in 1796, in the same class with the late Professor Silliman, and engaged in mercantile business in the city of his birth, where he resided until his death.

March 7.—CLEVELAND, Rev. JOHN P., D. D., a Presbyterian clergyman; died at Newburyport, Mass., aged 74 years. He was born in Byfield, Mass., July 19, 1798; graduated at Bowdoin College in 1821, and commenced teaching at Wolfboro, N. H. In 1825 he was appointed Professor of Mathematics at Phillips Academy, Exeter, N. H., in the mean while pursuing the study of theology. In February, 1827, he was ordained pastor of the Tabernacle Church, Salem, Mass., where he remained until 1834, and after preaching three years in Detroit, Mich., he retired from the ministry for the presidency of Marshall College, Mich. In 1841, owing to the financial embarrassment of the college, he resigned his position, and accepted a call to the Second Presbyterian Church in Cincinnati, Ohio. Subsequently he preached in Providence, Northampton, and Lowell, and was chaplain of the Thirtieth Massachusetts regiment to Ship Island and New Orleans, after which he preached only as opportunity presented.

March 8.—BUSHNELL, Prof. JACKSON JONES, an eminent Professor of Mathematics and Natural Philosophy in Ohio and Wisconsin; died at Beloit, Wis., aged 58 years. He graduated from Yale in 1841, was tutor for two years in Western Reserve College, Hudson, Ohio, and was offered a professorship there. For the next five years he was financial agent of the college, and of the Western College Society, and in 1848 was appointed Professor of Mathematics and Natural Philosophy in Beloit College; resigned in 1858, and went into business, but was reappointed in 1863, and served until his death.

March 8.—HENRY, Commander EDMUND W., U. S. N., on the retired list since 1867; died at Piermont, N. Y., aged about 59 years. He was a native of New York, and appointed from that State. He entered the navy as midshipman in April, 1842, and had been thirty-one years in the service, eighteen and a half of which were passed at sea.

March 8.—RICHMOND, WILLIAM E., a prominent citizen of Providence, R. I., for many

years a leading member of the Providence bar, and for some years editor of the *Providence Journal*; died in that city, aged 87 years.

March 9.—DEXTER, THOMAS AMORY, an eminent citizen of Boston; died there, aged 83 years. He was born May 16, 1790, and graduated at Harvard University in 1810.

March 11.—BELLOWE, HENRY A., Chief-Justice of the Supreme Court of New Hampshire; died at Concord, aged 70 years. He was appointed one of the Associate-Justices of that State in 1859, and became Chief-Justice about 1870. He received the degree of LL. D. from Dartmouth College in 1869.

March 11.—DIX, Colonel CHARLES TEMPLE, youngest son of Governor Dix, an artist of great merit; died in Rome, Italy, aged 33 years. He graduated from Union College in 1858, had early turned his attention to art, and had made good progress in his studies when, upon the breaking out of the late war, he was chosen aide-de-camp on the staff of his father, and won much credit by his faithful performance of the duties of his position. At the return of peace he devoted himself anew to his pursuit, and soon established a name among the most promising of our marine painters. His "Sunset in Capri" is a fine and spirited study of sea and shore.

March 11.—ELY, Rev. SAMUEL R., D. D., a Presbyterian clergyman and scholar; died at Roslyn, L. I., aged 70 years. He was born in West Springfield, Mass., December 29, 1803; graduated at Williams College in 1830, studied theology at Princeton, N. J., was licensed to preach in 1833, and the following year was installed pastor of a church at Carmel, N. Y., where he remained three years. In October, 1836, he became pastor of the Presbyterian Church at East Hampton, L. I., formerly Dr. Lyman Beecher's church. After a pastorate of ten years here, he removed to Brooklyn, and soon after to Roslyn, where he performed the duties of pastor for many years, accepting no salary. He received his degree of divinity from Columbia College in 1865.

March 13.—LOWELL, Hon. JOSHUA A., a political leader in Maine; died in Machias, Me., aged 72 years. He was born in Thomaston, Me., March 20, 1801; his educational advantages were limited, but he commenced active life by teaching school; studied law, and was admitted to the bar in 1826. He was a member of the Maine Legislature for several years from 1832, a Representative in Congress from that State from 1839 to 1843, and in 1844 was a presidential elector.

March 14.—GRIMES, Rev. L. A., a colored Baptist clergyman of remarkable gifts; died in Boston, aged 64 years. He was born a slave; was self-educated, but had made himself a sound and able scholar, and maintained a high rank as a preacher and pastor. He had been the pastor of the Colored Church in Boston for about twenty-five years. He was deeply interested in the education of men of color for the

ministry, and had been for some years one of the most efficient and judicious trustees of the Wayland Seminary at Washington, D. C.

March 15.—**LATIMER**, Commodore **WILLIAM K.**, U. S. N.; died at Baltimore, Md., aged about 80 years. He was born in Maryland, was appointed from that State, November 15, 1809, and was retired September 13, 1855, with the rank of captain.

March 17.—**PATTI**, **CARLO**, a distinguished musician, brother of Adeline and Carlotta Patti, died in Cincinnati.

March 19.—**RANDOLPH**, **JOSEPH FITZ**, an eminent jurist of New Jersey; died in Jersey City. He was born in Freehold, Monmouth County, in 1803, obtained an ordinary school education, studied law, and was admitted to the bar in 1825. For some years he was State's Attorney for the county, was a Representative in Congress from 1837 to 1843, was a member of the convention which framed the State constitution in 1844, and in 1845 was appointed a judge of the Supreme Court of New Jersey for seven years, after which he resumed the practice of his profession at Trenton. He was a member of the Peace Congress in 1861.

March 22.—**GREEN**, Commander **NATHANIEL**, U. S. N., a gallant officer during the late war; died at Reading, Pa., aged 37 years. He entered the navy in 1852, and served with credit throughout the entire war, participating with Farragut in the capture of New Orleans and the forts in Mobile Bay.

March 22.—**MONEGHAN**, **MARY**, a centenarian, died in New York City, at the age of 102 years. She was a native of Galway, Ireland, and came to this country at the age of sixty-seven.

March 23.—**BAKER**, **JOHN LEWIS**, a popular actor and theatrical manager, brother of Mrs. Chanfran; died in Philadelphia, aged about 53 years. He was a native of that city, and made his *début* at the Arch-Street Theatre, where he was favorably received. In 1851 he married Miss Alexina Fisher, a popular actress and vocalist, and with her played a number of very successful star engagements throughout the country. In 1852 they went to California and remained several years. In 1857 Mr. Baker managed the National Theatre in Cincinnati, and subsequently other theatres in Philadelphia and New York.

March 23.—**COLLIER**, **JOHN A.**, an eminent New York jurist; died at Binghamton, N. Y., aged 86 years. He was a member of the Twenty-first Congress, was State Controller in 1845 and 1846, and was commissioner to revise the code in 1847. He is largely quoted in law reports.

March 24.—**METZGER**, **ISAAC**, M. D., a German physician of Mount Sinai Hospital, N. Y.; died there. He was of Hebrew extraction, and a graduate of the college at Würzburg, Bavaria.

March 24.—**VREDENBERGH**, **HON. PETER**, ex-Justice of the Supreme Court of New Jersey;

died at St. Augustine, Fla., aged 68 years. He was born in Somerset County, graduated from Rutgers College in 1826, and was admitted to the bar in 1829. He began practice at Freehold, Monmouth County, and was at one time a member of the Legislative Council, under the old constitution. In 1854 he was appointed Justice of the Supreme Court, and reappointed in 1862. He was a lawyer of eminent ability, and some of his opinions now on record are among the most carefully prepared ever read from the Bench of New Jersey.

March 25.—**DRANE**, **HENRY PADELFORD**, a prominent lawyer, politician, and Surveyor of the Port of Portland, Me.; died in Boston, aged 49 years. He was born in Ellsworth, Me., October 9, 1823; graduated from Bowdoin College in the class of 1844; studied law in Portland, where he opened an office in 1847; represented that city two successive terms in the Legislature; was twice elected county attorney; was surveyor of the port, and a director of the Portland & Rochester Railroad.

March 25.—**MONTGOMERY**, Rear-Admiral **JOHN B.**, U. S. N.; died at Carlisle, Pa. He was a native of Allentown, N. J., from which state he was appointed to the service, June 4, 1812. He was a midshipman on board the flag-ship Niagara in Perry's victory on Lake Erie, September, 1814, receiving a sword and the thanks of Congress; served in the Mediterranean in 1815; participated in the capture of the Algerine frigate and brig, and the blockade of Algiers; commanded the Boston Navy-Yard in 1840, and the sloop-of-war Portsmouth, in the Pacific squadron, from 1845 to 1848, during which cruise he took possession of California, and blockaded Mazatlan some months, and, having been commissioned captain in 1853, was in command of the Pacific Squadron in 1860 and 1861. The following year he was placed in command of the Boston Navy-Yard, and was promoted to the rank of commodore. He was commissioned as rear-admiral July 25, 1866, and commanded the naval station at Sackett's Harbor from 1867 to 1869. At the time of his death he was on the retired list.

March 28.—**MASON**, Judge **THOMPSON**, Secretary of State of Maryland; died at Annapolis, Md. He was born at Montpelier, Washington County, Md., in May, 1815; graduated at Princeton College in 1836; read law in Hagerstown, and was admitted to the bar in 1838. The same year he was elected to the Legislature of Maryland, and was reelected in 1839. He was a Representative in Congress from 1841 to 1843, was elected a Judge of the Court of Appeals in 1851, and resigned in 1857, accepting the appointment of Collector of the Port of Baltimore. Subsequently he was made Secretary of the State, which office he held at the time of his death.

March 30.—**BAEKER**, Judge **ISAAC**, one of the oldest pioneers of the settlement of Ohio;

died at Athens, Ohio, aged 94 years. He was born near New Bedford, Mass., February 17, 1779. In 1788, upon the organization in New England of the Ohio Company, his father, then a young man of thirty-four, went West in company with others, and spent the winter in the settlement afterward called Marietta. Returning in the spring, he disposed of his estate, and, loading his family and effects into a large wagon, drawn by a horse and a pair of oxen, set out for Ohio, performing the journey in eight weeks. Securing a tract of one hundred acres opposite Blennerhassett's Island, a settlement was commenced, but the hostilities of the savages compelled them finally to take refuge in the garrison until the spring of 1798, when the family removed to Athens. In 1815, Judge Barker opened an hotel in the village, and was for many years a popular landlord. He held many important offices in the county, and from 1841 to 1851 was Associate Judge of the Court of Common Pleas.

March 31.—BARRAS, CHARLES M., a dramatic author; died at Coscob, Conn., aged 47 years. He was an actor of considerable merit, and acquired some distinction upon the stage in the personation of the *Hypochondriac*, an adaptation from Molière. His eccentric character and unconscious drollery made him a popular man in theatrical circles. He was the author of "The Black Crook," from which play he derived a large income.

March 31.—BENNETT, MRS. HENRIETTA AGNES CREAN, widow of the late James Gordon Bennett, died at Königstein, Saxony. She married Mr. Bennett in June, 1840, the event being heralded to the world in his peculiar style. Though in comparatively humble circumstances, Miss Crean's beauty and vivacity had made her a decided belle before her marriage, and she had attracted the attention of some of the gay men of the wealthier classes. Her marriage to Bennett, who was then supposed to be poor, and not particularly attractive in person, excited surprise among her acquaintances. The latter years of her married life were not harmonious, and much of her time was spent in Europe. She was a staunch friend of the late Napoleon III., even after his downfall.

March 31.—MAXWELL, HUGH, an eminent lawyer of New York; died in that city, aged 86 years. He was born in Scotland, in 1787, and came to this country with his parents in his fourth year; graduated at Columbia College, and, having studied law, commenced the practice of his profession in 1807. In 1814 he was appointed Assistant Judge-Advocate General in the U. S. Army; in 1819 was elected District Attorney for New York County, and was successively reelected until 1829. Returning to the practice of his profession, he became one of the leaders of the bar in his city and State. In 1849 he received from President Taylor the office of Collector of the Port of New York, holding that position through

the administrations of Taylor and Fillmore. He was a fine classical scholar, and his library was one of the best private collections in the city.

March 31.—ROLYE, EDWARD, C. E., an eminent American civil engineer; died at Valparaiso, Chili, aged 47 years. He had been engaged in railroad construction and surveys in South America since 1849, and had taken an active part in all those great railway enterprises in Chili and the Argentine Republic with which Mr. Meigs, the South-American railway king, has been identified.

March —.—BURBANK, GIDEON W., a wealthy citizen and philanthropist of Rochester; died there, aged 70 years. He was born at Deerfield, N. H., in 1808. In 1839 he removed to Rochester, and entered upon mercantile pursuits. His energy and devotion to business were rewarded by great prosperity, and, among his other liberal gifts, he endowed the Burbank professorship of Intellectual and Moral Philosophy, in the Rochester University, which was in effect the endowment of the president's chair.

March —.—MCGRATH, MRS. MARY, a centenarian, of Irish birth, but for the last thirty years a resident of New York City; died there, aged 100 years.

March —.—WHEELLOCK, REV. ALONZO, D. D., a Baptist clergyman, died in Fredonia, N. Y., aged about 73 years. Dr. Wheelock was a native of Vermont, of a studious turn from a child, and, though hampered by poverty, had acquired a good classical education, and had nearly completed a course of medical study when he was converted, united with the Baptist Church, and resolved to enter the ministry. His theological course was pursued at Hamilton Literary and Theological Institution, now the Theological Seminary of Madison University, N. Y., and, in 1829, he graduated with distinction. His ministerial life was passed, with the exception of one year, in the State of New York. He was for several years a pastor in New York City. He was a thorough and accurate scholar, an able, sound, and eloquent preacher, and was remarkably successful in his various pastorates. He was greatly beloved in all his social relations. Failing health had compelled his retirement from the active duties of the ministry three or four years before his death.

March —.—WOODBURY, REV. SILAS, a Presbyterian clergyman and teacher; died in Shelbyville, Tenn., aged 76 years. He was born in Winchendon, Mass. After his graduation from college he entered upon teaching in New York City, and for ten years was the associate of Harlan Page and Arthur Tappan in the tract cause and the city missionary work. Turning his attention to the ministry, he entered Lane Seminary, near Cincinnati, and in 1838 was licensed to preach. After ten years of missionary labor in Michigan, a bronchial affection induced him, in 1848, to remove to

Smithfield, Ky., where he preached six years. Subsequently he taught in Bedford County, Tenn., and in Shelbyville, where he died.

April 4.—WOOLLEY, General JOHN W., formerly governor of the National Military Asylum at Milwaukee, Wis.; died there.

April 5.—MOORE, ANDREW BARRY, ex-Governor of Alabama; died at Montgomery, Ala. He was originally a school-teacher in that State, and served as Governor from 1857 to 1861.

April 8.—GILSEY, PETER, a New York alderman and prominent citizen, died at his residence, aged 62 years. He was born at Hobro, in the province of Jutland, Denmark, and, after receiving a fair education, emigrated to America in 1827, landing at New York alone and friendless. He first procured employment in a piano-manufactory, and by strict economy managed to save part of his earnings from week to week, so that in a few years he was enabled to embark in an independent business. Renting a little shop in the Bowery, he bought the stock of a retail tobacconist. Here his prosperity began, and it was not long before he felt justified in removing to more extensive premises on the corner of Broadway and Cortlandt Street, where his business was carried on until his death. Here, in 1854, he erected the Gilsey Building, one of the first large iron structures raised in the city. Henceforth his investments were chiefly in Broadway real estate, from which he derived the greater part of his fortune. Among the other buildings erected by him are the St. George Hotel, the Coleman House, and Apollo Hall. In politics he was a Democrat, but, while he was interested deeply in public questions, he held no office until the municipal campaign of 1871, when he was elected alderman by about 88,000 votes. The following year he was reelected, his course in the Board having won the confidence of his constituents and the respect of his associates.

April 8.—WILLIAMS, STALHAM, an aged and influential citizen of Utica, N. Y.; died in that city, in the 100th year of his age. He was born in Deerfield, Mass., in 1773, and settled at Utica just before the War of 1812. At the organization of the Savings-Bank of Utica, in 1839, he was elected treasurer, a position which he continued to fill up to the time of his death. He was a man of spotless integrity in all the walks of life.

April 9.—GIBBS, GEORGE, an eminent philologist, antiquarian, and author; died in New Haven, Conn. He was a grandson of Oliver Wolcott, and was born in Newtown, L. I., July 8, 1817. He was formerly connected with the United States Coast Survey. For many years he devoted his time to the study of the vocabularies and folk-lore of the Indians of the Northwest. In 1846 he published "Memoirs of the Administrations of Washington and John Adams, edited from the Papers of Wolcott." He was also the author of "The Judicial Chronicle," published in 1834.

April 11.—THOMAS, REV. EVAN, D. D., a Methodist clergyman, one of the Peace Commissioners to the Modoc Indians; was murdered by them near the Lava Beds in Southern Oregon. He had been for many years an influential and successful preacher in California.

April 12.—DE PREYSTER, Colonel JOHN WATTS, JR., a gallant soldier in the late war; died in New York City. He served during the early part of the rebellion as volunteer aide-de-camp on the staff of his cousin, General Philip Kearney, and was especially commended for his gallantry at the battle of Williamsburg. At the battle of Chancellorsville he was chief of artillery of the Second Division, Sixth Corps, with the rank of major. For his gallantry on that and other occasions, on the recommendation of Major-General Hooker, he was promoted successively to be lieutenant-colonel and colonel.

April 12.—PAULSON, RICHARD, an eminent citizen of New Jersey; died at Redfield Park, aged 100 years. He had held several important offices, and was a man of high moral and religious attainments.

April 15.—IDE, WILLIAM E., M. D., an eminent Ohio physician; died in New York City, aged 57 years. He was born in Kirby, Vt., received a good education, and pursued his medical studies under the direction of Dr. Willard Parker, of New York. He was a resident of Columbus, Ohio, for a period of twenty years, and during that period identified himself with the interests of the city.

April 15.—PIFFER, REV. GEORGE, a Baptist clergyman; died in Chicago, aged 88 years. He was born in Salem, Mass., February 2, 1790, graduated from Brown University in 1811; studied theology, and was ordained and settled in Middletown, Conn., in 1812, where he preached five years, and then removed to a pastorate in Lynn, Mass. In 1822, having been attacked with hemorrhage of the lungs, he was obliged to give up preaching for a time, but in 1828 was settled in Canton, Conn., where he remained nine years, two of which were spent in obtaining funds for the establishment of the Connecticut Literary Institution in Suffield. Subsequently he preached in Fayetteville, N. Y., West Troy, and Newburg, and in Lee and Tyringham, Mass., until 1850, when in connection with his son he had for some years charge of an academy in Peekskill, N. Y. In 1870 he removed to Chicago.

April 16.—STILES, RICHARD ORESON, M. D., an eminent physician and sanitarian, late of Brooklyn, L. I.; died at Westchester, Pa., aged 42 years. He was born in Philadelphia, October 3, 1830, graduated from Yale College in 1851, studied medicine in Philadelphia, where he received his degree of M. D. in 1854, and thence went to Paris, prosecuting his studies until 1857, when he returned to this country, and was appointed Professor of Physiology in the University of Vermont. Upon this appointment he returned immedi-

ately to Paris and spent several months in reviewing his physiological studies. In 1858 he accepted the chair of Physiology in the Berkshire (Mass.) Medical Institution. In 1862 Dr. Styles, impelled by patriotic motives, entered the United States service as Surgeon of Volunteers. He was ordered at first to the charge of a general hospital at Pittsburg, Pa., but subsequently was transferred to the Army of the Potomac as surgeon-in-chief of Caldwell's division, Hancock's corps, in which position he participated in all the movements of the arduous campaign of 1863. The following year he left the service and accepted the appointment of resident physician of the Kings County Hospital, Brooklyn. Upon the organization of the Metropolitan Board of Health in 1866 he accepted the office of Deputy Registrar of Vital Statistics, and in 1868 was made Assistant Sanitary Superintendent, holding the two positions until the Board of Health was dissolved in 1870. In the summer of this year, his health failing him, he traveled in Europe to some extent, but received no permanent benefit.

April 18.—**Watson**, Commodore **JAMES M.**, U. S. N.; died at Vallejo, Cal. He was a native of Virginia, from which State he was appointed February 1, 1823; saw seventeen years of sea-service, his last cruise being in 1854; and was unemployed nearly fourteen years. In 1855 he was retired on the rank of lieutenant. In 1866 he was light-house inspector.

April 19.—**Armstrong**, Captain **JAMES F.**, U. S. N.; died in New Haven, Conn., aged 56 years. He was a native of New Jersey, from which State he was appointed March 7, 1832. In 1868 he was in command of the Navy-Yard at Pensacola. His last cruise was in 1864. He was on the reserve list for a time, but was reinstated again, and in 1871 was on duty at the Navy-Yard, Mare Island, California.

April 19.—**Bliss**, **GEORGE**, an eminent lawyer and politician of Springfield, Mass.; died there, aged 80 years. He was born in Springfield, November 16, 1793; graduated from Yale College in 1812; studied law with his father, and entered upon the practice of his profession in 1815 at Monson, Mass., where he remained seven years. Returning to Springfield, he entered into partnership with Jonathan Dwight, Jr., and in 1827 commenced public life as a member of the House of Representatives of Massachusetts, serving three successive terms, and again in 1853, when he was Speaker. In 1835 he was President of the State Senate. Among many public enterprises which occupied his attention was the completion of the Western Railroad between Worcester and Albany, of which road he was president prior to 1846, when he retired, and visited Europe. Upon his return home he became interested in other railroad schemes, chiefly at the West, in conducting which he gained a wide reputation. In May, 1860, he withdrew from all active business.

April 20.—**Landon**, **DILLON STEVENS, M. D.**, an eminent physician of Brooklyn, L. I.; died there, aged 51 years. He was a man of fine intellectual qualifications, skillful in the practice of his profession, and greatly beloved by his medical associates as well as patients. For a period of twenty years he was visiting physician of the Brooklyn City Hospital. Dr. Landon was a son-in-law of the late J. Wesley Harper, of Harper & Brothers.

April 20.—**Stoddard**, **CHARLES**, an eminent merchant and Christian philanthropist of Boston; died there, aged 71 years. He was born at Northampton, June 27, 1802, and was the son of Solomon Stoddard, a distinguished lawyer, and for many years clerk of the courts. In 1814 young Stoddard went to Portsmouth and spent two years with an uncle, but, in 1816, returned to Boston and entered the store of Tappan & Mansfield, silk merchants, with whom he remained until his majority. In 1828 he went into business for himself, establishing the firm of Edwards & Stoddard, which was dissolved in 1845, himself going into the firm of Stoddard, Lovering & Co. In 1832 he became a member of the Prudential Committee of the American Board of Missions, which place he occupied for forty years, during all of which time he negotiated the foreign exchange of the board without remuneration. He was also for thirty-three years an efficient trustee and liberal friend of Williams College, Mass., and since 1858 had devoted the whole of his income to public and private charity. He was a man of the strictest integrity, most unblemished honor, and noble impulses.

April 22.—**Whittlesey**, **ELIJAH**, a retired merchant of New York City; died at Wallingford, Conn. He had been thirty-five years in business, and was widely known for his liberality and literary culture, and owned one of the finest libraries in Connecticut.

April 24.—**Olyphant**, **GEORGE TALBOT**, an eminent merchant, of New York; died in that city, aged 54 years. He was born in New York, June 29, 1810. On account of feeble health he was taken from school at an early age, and never received a collegiate education, though he devoted much attention to classical studies. After a short business experience in the establishment of his father in New York City, he removed to Mount Morris, in the Genesee Valley, and was there engaged in agricultural pursuits for about ten years. It was in this section of the State that he acquired a considerable reputation in political life, and in the campaign of 1844 Henry Clay had few more ardent advocates. In 1849 Mr. Olyphant sailed for China for the purpose of recruiting his health, returning in the same year. Again in the following year he repeated his trip, and was returning to America when his father, who accompanied him, died in Egypt. In 1850 he united in forming the firm known as Olyphant's Sons, engaged in a very extensive China trade. In 1858 he retired from active mercantile life. He was elected a mem-

ber of the Board of Managers of the Delaware & Hudson Canal Company in March, 1852, and remained in that position till April, 1855. In that month he was chosen president of the company, *pro tem.*, and in 1858 he was elected the permanent president of the company. He continued acting in that capacity till April, 1869. Among the prominent institutions with which Mr. Olyphant was connected may be mentioned the New York City Hospital. He became one of the governors in 1853, and ever afterward took an active and zealous interest in the management of its affairs. He was constant in his efforts to improve the condition of affairs at Bloomingdale Asylum, and made almost weekly inspections of that institution. At the recent reorganization of the Erie Railway, Mr. Olyphant was made one of the directors of the company.

April 26.—BROWN, Lieutenant GEORGE EDGAR, U. S. Volunteers, a lawyer of Washington, D. C.; died there, aged 31 years. He was born in Hampden, Me., November 1, 1841; graduated from Bowdoin College in 1862, and in October of that year entered the army as sergeant of the Twenty-second Maine regiment, was promoted to be first-lieutenant, and served on the Mississippi. At the close of the war he held a position in the Patent-Office two years, and after studying law entered upon the practice of his profession in Washington.

April 26.—HOWE, Lieutenant ALMON, U. S. A.; was killed by the Modocs in the Lava Beds. He was a son of Colonel Marshall E. Howe, U. S. A., and was born in Jacksonville, Fla., May 16, 1840. He graduated from Bowdoin College in 1861, was mustered into the Fourteenth N. Y. Artillery as second-lieutenant; served through the campaign from the Wilderness to Petersburg, received a staff appointment, and rose to the rank of major. At the close of the war he held a position in the custom-house at Boston. In 1866 he was commissioned second-lieutenant in the Fourth Artillery, U. S. A., and in 1869 was promoted first-lieutenant, having previously been brevetted lieutenant-colonel of volunteers and captain in the U. S. Army for gallantry during the war. He served as ordnance-officer at Fortress Monroe, where he married a daughter of General Barry, commanding; was assigned to duty in North Carolina in pursuit of the Ku-klux gang, and afterward to duty on the Pacific.

April 26.—THOMAS, Captain EVAN, U. S. A., a gallant officer; was killed by the Modocs in the Lava Beds. He was a son of General Lorenzo Thomas, formerly adjutant-general of the army, and was born in Washington, D. C. He entered the army at the commencement of the late war, receiving the rank of second-lieutenant in the Fourth Artillery of the regular army, and was made first-lieutenant, May, 1861. He received the rank of captain by brevet, December 13, 1862; major by brevet, July 3, 1863, and captain, in August, 1864. During the fight with the Indians upon the 15th

and 16th, he had command of the mortars, rendering effective service in harassing the enemy.

April 26.—WICKS, ALFRED, a prominent citizen and philanthropist of Brooklyn, N. Y.; died there. He was a merchant, and a member of the Produce Exchange, and for many years had been identified with the interests of the city, and especially with its humanitarian movements.

April 26.—WRIGHT, Lieutenant THOMAS F., U. S. A., was killed by the Modocs in the Lava Beds. He was a son of the late General George Wright, and nephew of the late General Sumner; was born in Missouri, but migrated to California; served in the civil war as colonel of volunteers, receiving the brevet of brigadier-general; entered the regular army as first-lieutenant Thirty-second Infantry, July 28, 1866, and was assigned to the Twelfth Infantry, January 31, 1870.

April 27.—AULICK, Commodore JOHN H., U. S. Navy; died at Washington, D. C., aged 84 years. He was born in Winchester, Va., entered the navy as midshipman in 1809, and in 1812 served on the *Enterprise* in all the engagements of that vessel, carrying the British ship *Boxer* and the privateers *Fly* and *Mars*, which the *Enterprise* captured, into port. He afterward served on the *Saranac*, Ontario, *Constitution*, and *Brandywine*, and was in command of the Washington Navy-Yard from 1848 to 1846. He commanded the *Vincennes* in 1847, and the *East India Squadron*, his last cruise in 1853. In 1861 he retired on the rank of captain. Throughout his long career he was one of the most faithful and efficient officers in the service.

April 28.—WHITE, WILLIAM, a spiritualist and publisher of infidel works; died in Boston, Mass. He was the publisher of the *Banner of Light*, and numerous works on spiritualism.

April 29.—SHARKEY, WILLIAM, Governor of Mississippi; died at Washington, D. C. He was a prominent and influential man in that State, and was provisional Governor from 1865 to 1866.

April 29.—WATIES, JOHN, a civil engineer and lawyer; died in Columbia, S. C., aged 45 years. He was born in Statesburg, Sumter County, S. C., in 1828, graduated from Yale College in 1849, and, after devoting four years to civil engineering, turned his attention to the study of law, serving in the mean time as clerk of the Court of Appeals in his native State. From 1857 until his death he practised his profession in Columbia, with the exception of a period of service in the Confederate army during the rebellion.

May 1.—SHENFESSEL, PETER, a pioneer settler of Kentucky; died in Estill County, aged 109 years. He was born in February, 1764. He was long employed in the Red-River Iron-Works, and was active and vigorous in mind and body till a few days before his death.

May 2.—SMITH, Commodore WILLIAM, U. S.

Navy; died at St. Louis, Mo. He was born in Kentucky, from which State he was appointed March 4, 1823, making about fifty years in the service. He was placed on the retired and reserved list January 9, 1865.

May 3.—**BEACH, L. P.**, Surveyor-General of Washington Territory: died at Olympia, W. T. A man of fine and generous culture, he had held this important position since 1871, and was thoroughly devoted to the promotion of the best interests of the Territory. His reports were models in the fulness of their information respecting the productions and capabilities of that vast but little-known region.

May 3.—**NOTT, Rev. HANDEL GERSHOM**, a Baptist clergyman; died in Rochester, N. Y. He was born in Saybrook, Conn., November 10, 1799, graduated from Yale College in 1823, took a theological course in the Yale Seminary, and in 1826 was settled over the First Congregational Church in Nashua, N. H. Subsequently he became a Baptist, and accepted the position of agent of the American Bethel Society, and was for three years Bethel chaplain in Buffalo. Later he preached in Bath, Waterville, and Kennebunkport, Me., remaining at the latter place for a period of twelve years. His health demanding a change, he accepted a call to Avon, N. Y., in July, 1860, and, after a few years, removed to Rochester, where he continued to reside until his death.

May 5.—**McALLISTER, H. N.**, an eminent lawyer of Bellefonte, Pa.; died there. He was a prominent member of the Constitutional Convention of his State.

May 6.—**STROUFER, Captain GEORGE C.**, a brave and gallant sea-captain; died in Brooklyn, N. Y. He was famous for the rescue of the passengers of the steamer San Francisco in 1853.

May 8.—**KIRO, Judge EDWARD**, a Pennsylvania jurist; died at Philadelphia, Pa., aged 78 years. He was a native of Philadelphia, was admitted to the bar in 1816, and was President-Judge of the Court of Common Pleas from 1825 to 1851.

May 9.—**PUMPELLY, GEORGE JAMES**, a distinguished agriculturist and stock-breeder of Owego, N. Y.; died there, aged 68 years. He was born in Owego, December 11, 1805, graduated from Yale College in the class of 1826, completed the course of study at the Litchfield Law School, and in 1829 was admitted to the bar of New York City. He then entered his father's land-office, where he spent some years in the practice of his profession. About 1835 he turned his attention to agricultural improvements, and to the breeding of choice stock, in which he made great improvements.

May 10.—**BING, Rev. LEWIS M.**, a Presbyterian clergyman and home missionary; died at Minneapolis, Minn., aged 89 years. He was born at Vienna, Trumbull County, O., educated at the Western Reserve College, Hudson, O., and, after spending two years in teaching, entered Union Theological Seminary, from

which he graduated in May, 1862. In the fall of the same year he was appointed chaplain of the One Hundred and Seventy-third Regiment of New York Volunteers, and was three years in the service. A few months after leaving the army, he received a call from a church in Charlestown, Ohio, where he labored four months, and which charge he was obliged to relinquish on account of failing health. He then removed to Burlington, N. J., where, on a fruit-farm, he remained three years, during which time, however, he canvassed the county in which Burlington is situated, for the American Bible Society, and was also agent for the American and Foreign Christian Union. He preached also, occasionally, as opportunity offered and his strength permitted. Thence he removed to Paterson, N. J., where he was employed for about two years as city missionary. From Paterson he removed to Grand Rapids, Mich., as missionary of the Presbyterian Board, and the next year was appointed to the new section of country along the Grand Rapids & Indiana Railroad.

May 11.—**BAILEY, Rev. JOSEPH A., D. D.**, a Baptist clergyman of Waterbury, Conn.; died at Carlsbad, Bohemia, aged about 47 years. Dr. Bailey was a man of fine culture, an eloquent preacher, very fond of literary research, and much beloved by his people. He had gone abroad in the hope of restoring his health, which had been seriously impaired by his excessive labors in the pastorate, but derived no benefit from the waters of Carlsbad, which to him, as to so many American invalids within the past few years, seemed to have proved rather injurious than beneficial.

May 12.—**HARRIS, Lieutenant GEORGE M.**, U. S. A.; died from wounds received in the fighting at the Lava Beds, California, aged 26 years. He graduated from West Point in 1868, and was stationed at Fort Macon during the troubles with the Lowery outlaws. Subsequently, at his own request, he was transferred to Battery K, Fourth Artillery, and joined his company during the operations against the Modocs, in January last. He was a nephew of the late Bishop Melvaine, of Ohio.

May 15.—**GILMORE, Hon. SAMUEL A.**, President-Judge of the Fayette Judicial District, Pa.; died at Uniontown, Pa., aged 67 years. He had held that position since 1849, discharging the duties of his office in the most faithful and conscientious manner.

May 15.—**SMITH, Mrs. MARY SNELL**, a missionary of the American Board at Ceylon; died at Rocky Hill, Conn., aged 59 years. She was born in Cummington, Mass., September 21, 1814. In 1836 she was married to Dr. Steele, and soon after sailed from Boston for Madras. A few years after his death she married Rev. J. C. Smith, of the Ceylon mission, and was a faithful and energetic worker in the missionary field for a period of nearly thirty-six years. In 1873, upon the failure of her

own and her husband's health, she returned to this country.

May 16.—HUNT, MRS. BERAH, a centenarian of Randolph, Mass.; died there, aged 104 years, retaining her memory to her last hours.

May 17.—RUSSELL, WILLIAM, an eminent elocutionist and author of text-books in reading and oratory; died at Lancaster, Mass., aged 75 years. He was born in Glasgow, Scotland, April 28, 1798, and was educated at the Latin School and the University of Glasgow. Soon after the completion of his studies, symptoms of a pulmonary affection induced him to come to this country, and, locating in Savannah, Ga., he took charge of the Chatham Academy in that city in 1819. A few years later, upon his marriage with a Connecticut lady, he removed to New Haven, Conn., and taught the New Township Academy and the Grammar School connected with Yale College. He next devoted himself to the instruction of classes in elocution in Andover, Cambridge, and Boston. From 1826 to 1829 he had the editorial charge of the *American Journal of Education*, published in Boston; but, his duties proving too arduous for his health, he was induced to take a school for young ladies in Germantown, Pa., and classes also in Philadelphia. Subsequently, he returned to Boston, resuming his specialty in teaching there and at Andover, lecturing in the Teachers' Institutes in Rhode Island and New Hampshire, and during the winter seasons lecturing at Princeton College, and in the cities of New York and Brooklyn. In 1849 he established a seminary for teachers in New Hampshire, which he continued to direct for several years, but the severity of the winters compelled him, in the spring of 1853, to move his seminary to Lancaster, Mass. The spring and autumn months he devoted to lecturing at the Teachers' Institutes in that State, under the direction of the Secretary of the Board of Education. Mr. Russell was the author of seventeen volumes of educational periodicals, and treatises and essays on general education, and twenty-six text-books, mainly on reading and elocution.

May 18.—WHITING, MRS. MATILDA S., a missionary in Syria and Jerusalem for twenty-five years; died at Newark, N. J., aged 68 years. The first eight years of her missionary life were spent in Jerusalem, but subsequently she was transferred to Syria proper, where she remained until, in feeble health and widowed, she returned to this country. At the time of her death she was president of the Woman's Missionary Society, of Newark.

May 22.—FAGNANI, JOSEPH, a portrait-painter of great merit; died in New York. He was born in Naples, Italy, December 24, 1819, and began his professional life at the early age of sixteen years. Before completing his thirtieth year he won reputation by several crayon portraits, among the most remarkable of which was that of Baron Smucker,

chamberlain to the Queen-dowager, mother of Ferdinand II. While very young, Fagnani entered the Royal Academy at Naples, and remained there until he was eighteen. Removing next to Vienna, he gained success in his painting of the Archduke Charles. In 1842 he received and accepted a flattering offer from the Queen-Regent of Spain, Maria Christina, to make album portraits of the distinguished Spaniards who shared her exile. While under this engagement, Mr. Fagnani formed the acquaintance of Sir Robert Peel and Sir Henry Bulwer, laying the foundation of a strong and lasting friendship. In 1851, at the age of thirty-two, he came to New York City, where he married an American lady. In 1858 Mr. Fagnani revisited Europe. Hearing of his arrival, Queen Christina, then at Malmaison, sent for him to paint two portraits of herself, as well as likenesses of the Prince and Princess Ladislas Czartoriski. In 1860 he continued his industrious labors by painting two portraits of Richard Cobden. One of these was given by Fagnani to the New York Sanitary Fair, where it was bought by Morris Ketchum, who presented it to the New York Chamber of Commerce. The other was purchased by the National Portrait Gallery, London. Among the most noted of his works are, his portraits of Garibaldi, Victor Emmanuel, the Prime-Minister Ratazzi, and General Cialdini.

May 28.—WILLIAMS, REV. LORENZO D., a Methodist clergyman and educator; died in Meadville, Pa. He was for many years Professor of Natural Sciences and Vice-President of Alleghany College. His death was caused by his being thrown from a carriage.

May 29.—ATWOOD, JOHN MULLIKEN, a merchant and philanthropist of Philadelphia; died at Hartford, Conn., aged 78 years. He was born in Haverhill, Mass., August 4, 1795, and was a brother of the well-known missionary, Harriet Newell. He studied one year in Haverhill, and then, deciding upon a mercantile life, went to Boston as a clerk, and in 1816 established himself in Philadelphia, the firm being Atwood & Co., and Atwood, White & Co. In 1864 he withdrew from business, and devoted a large share of his time thenceforth to public interests. He was one of the founders of the American Sunday-school Union, and on its committee of publication for more than forty years; and was also one of the founders, and for fifteen years president, of the Merchants' Fund, a noble charity, for the relief of unfortunate merchants.

May 30.—BEVERIDGE, REV. THOMAS, D. D., a United Presbyterian clergyman; died at Xenia, Ohio, aged 77 years. For some years he was a professor in the Theological Seminary of the Associate Church at Canonsburg, Pa.

June 1.—BATES, HON. ASHER B., an eminent jurist, crown adviser for fourteen years to the Hawaiian Government; died in San Francisco, aged 68 years. He was born in Leroy, N. Y.,

May 2, 1810. Having been educated for the law, he commenced the practice of his profession in Detroit, May, 1832. His high reputation as a jurist obtained for him the responsible position under the Hawaiian Government above mentioned, the duties of which he discharged with singular discretion for a period of fourteen years. Returning to his native country, he established himself in San Francisco, and three years subsequently received from the Hon. Salmon P. Chase, then Chief-Justice of the United States Supreme Court, the appointment of Registrar in Bankruptcy for the First Congressional District of California, a position which he held until failing health compelled his resignation in 1872.

June 1.—**PAINTER, Rev. JOSEPH, D. D.,** a Presbyterian clergyman; died in Kittanning, Pa. He was a native of New Jersey, an alumnus of Princeton College, and for many years pastor of the Presbyterian Church in Kittanning.

June 2.—**HODGEN, JULIA LEE,** better known by her stage-name of "Leo Hudson," an actress of the *opéra-bouffante* school; died at St. Louis, Mo., aged 39 years. She was born in Leesburg, Va., March 22, 1843. While performing her specialty, *Mazeppa*, her trained horse, Black Bess, fell, and was so seriously injured, that it was necessary to kill her the next day. The actress attended her night and day, and the extra exertion brought on a fatal attack of brain-fever.

June 3.—**PHILBRICK, STEPHEN G.,** a venerable citizen of Tamworth, N. H.; died there, aged 102 years.

June 3.—**WALWOETH, MANSFIELD TRACY,** an American novelist; was killed by his son in New York City, aged 42 years. He was the son of the late Chancellor Walworth, and was born in Albany, in 1830. He graduated from Union College in the class of 1849, studied law, and, after his admission to the bar, practised his profession for a short time in Albany, with his father. Having a taste for literature, he soon abandoned his profession, and commenced writing for the *Home Journal*. Subsequently, he turned his pen to the preparation of sensational romances, among which were, "Lulu," "Hotspur," "Stormcliff," "Delaplaine," "Beverly," and "Warwick." At the time of his death he was writing for the *New York Weekly* a serial story, entitled "Married in Mask." He was possessed of an exceedingly unhappy disposition, which was aggravated by excesses, causing him to become a tyrant in his family, and finally resulting in his tragic death.

June 3.—**WHITON, WILSON,** an eminent teacher of the deaf and dumb; died at Hingham, Mass. He was himself a deaf-mute, and was, for a period of forty-eight years, a successful and enthusiastic teacher at the American Asylum, in Hartford, Conn., a longer term than that of any other instructor in this country, save the late Lament Clerc.

June 4.—**HUDSON, Judge —,** United States Attorney for the Memphis District of Tennessee; died in that city. He was formerly a lawyer in Chicago, and removed to Memphis not far from 1865. He was a man of strict integrity, fearless and firm in the discharge of his official duties, and honored alike at the bar and in social life.

June 5.—**BEEBE, Rev. SAMUEL J. M.,** a Presbyterian clergyman and educator; died in Nebraska City, aged about 60 years. He was a native of New York State, and an alumnus of Union College. In early life he removed to Missouri, where his abilities as an educator and scholar gave him a wide reputation. Early in the late war he removed to Brooklyn, where he established a school in Adelphi Street, and subsequently one on Clinton Avenue, both ranking high in merit. Having been urgently solicited to return to his former residence in Missouri, he went to Brunswick, in that State, and took charge of an institution there, which he resigned but a few months previous to his death.

June 6.—**PRENTISS, Hon. JOHN,** the oldest printer, newspaper editor, and publisher, in New England; died in Keene, N. H., in the 96th year of his age. Mr. Prentiss was 35 or 40 years since, active in State politics; was State Senator about 1838, and served also in the Assembly. He was father of the late Commodore G. A. Prentiss. He continued to enjoy excellent health and strength to the close of life, and his mental vigor was unimpaired. He established the *New Hampshire Sentinel* in 1799, and conducted it for forty-nine years.

June 7.—**RUSSELL, Rev. JOHN LEWIS, A. A. S.,** a Congregational (Unitarian) clergyman and scientist; died in Salem, Mass., aged 65 years. He was born in Salem in 1808, and graduated at Harvard University in 1828.

June 8.—**MAURAN, JOSEPH, M. D.,** an eminent physician and medical writer; died in New York City, aged 76 years. He was born in Barrington, Mass., December 22, 1796, graduated at Brown University in 1816, studied medicine in Providence, and at the College of Physicians and Surgeons in New York, where he received the degree of A. M. in 1819, and commenced the practice of his profession in partnership with his preceptor, Dr. Pardon Bowen, in Providence. After thirty-six years of successful practice, he spent nearly two years traveling with his family in Europe, and on his return resumed it only to a limited extent, withdrawing from it altogether in 1866. During the active portion of his life he held many important positions, and originated various public measures connected with his profession. He was one of the medical attendants at the Dexter Asylum, and a consulting-physician at the Butler Hospital for the Insane, from the foundation of these institutions to his withdrawal from practice; was twice chosen President of the Rhode Island Medical Society, was a trustee of the College of Physicians

and Surgeons in New York, and was, in 1851, Vice-President of the National Association of Physicians for revising the Pharmacopœia. He was the author of numerous articles in medical journals, among the most noted of which were those on "Non-contagiousness of Yellow Fever," on "The Uses of Opium in Rheumatism," and on "The Effects of Tobacco on Health and Longevity."

June 8.—ROBERTSON, Dr. W. H., a surgeon and medical director in the Confederate army during the late war; died at Farmville, Va., aged 43 years. He was a brother of General Beverly H. Robertson, C. S. A., on whose staff he served during the war, though at heart a Union man. In 1869 he served in the State Constitutional Convention of Virginia, and was otherwise prominent in allaying the difficulties growing out of the war.

June 8.—SABIN, Rev. LEWIS, D. D., a Congregationalist clergyman; died at Templeton, Mass., aged 66 years. He was born in Wilbraham, Mass., April 9, 1807, and at the age of six years removed, with his father, to Belcher-town. In 1831 he graduated from Amherst College with the highest honors of his class, and for four years after, with the exception of a part of 1832 and 1833, which he spent in the Theological Seminary at Andover, was the Principal of the Hopkins Academy. In August, 1835, he was licensed to preach, and was ordained June 6, 1836, as an evangelist, for the purpose of engaging in missionary service at Stanstead, Canada East. After a year in this work, he returned to Massachusetts, and in 1837 was installed pastor of the Trinitarian Church in Templeton, which charge he held for a period of thirty-five years, resigning, on account of failing health, in 1872. In 1857, he received from his *alma mater* the degree of D. D., and in 1862 was elected a member of the Board of Trustees of the college, holding that office until his death.

June 22.—BURNHAM, SAMUEL, a Boston journalist and historical writer; died in that city, aged 40 years. He was born in Rindge, Cheshire County, N. H., and was a son of the Rev. Amos W. Burnham, D. D., pastor of the Congregational Church in Rindge for a period of fifty years. The son graduated from Williams College in 1855, and, although afflicted with poor health, soon after assumed charge of the academy at Amherst, N. H. Subsequently he removed to Boston, Mass., and entered upon a career of literary industry which ended only with his death. His labors were varied and abundant. He wrote the history of East Boston, several small volumes for the American Tract Society, Boston, on natural history, was one of the editors of the *Congregationalist*, literary editor of the *Watchman and Reflector*, a correspondent for numerous religious, literary, and scientific periodicals, edited Charles Sumner's works, and, at the time of his death, had nearly completed a history of the Old South Church, of Boston.

June 22.—MOSELEY, EDWARD, State Treasurer of Connecticut in 1867 and 1868; died at Hampton, Conn., aged 60 years.

June 26.—HILLEN, Colonel SOLOMON, member of Congress, formerly mayor of Baltimore, Md.; died in that city. He was a native of Maryland, and was a Representative in Congress from that State from 1839 to 1841.

June 29.—GRANT, JESSE ROOT, father of President Grant; died at Covington, Ky., aged 78 years. He was born in Westmoreland County, Pa., in 1794, and at five years of age removed with his father's family to Deerfield, Ohio. Upon the death of his father, in 1805, he was apprenticed to a tanner, which business he followed until he reached the age of sixty years. When the War of 1812 threw that portion of the country into excitement, and unsettled business to some extent, the family removed to Maysville, Ky., and, upon the cessation of hostilities, Jesse returned, in 1815, to Ravenna, Portage County, Ohio, where he resumed his business as a tanner; but the prevalence of ague and fever in that region compelled him to go South for a while, and a few months later he established himself in the southern part of the State. Previous to the war, he held a partnership in a large tannery and leather-store in Galena, Ill., and, upon retiring from business, divided a portion of his property among his children. After the accession of his son, Ulysses, to the presidency, he was appointed postmaster at Covington, Ky., which position he held until his death, though unable for the last two years to discharge its duties.

July 1.—COOLEY, ex-Judge W. H., a prominent member of the New Orleans bar; was killed in a duel, aged 47 years. He was a native of Louisiana. His political action had drawn upon him the fierce maledictions of Colonel R. B. Rhett, editor of one of the journals of New Orleans, and an editorial article in Rhett's paper led to a challenge, which was accepted, and Judge Cooley was killed at the first fire.

July 1.—FOWLER, Prof. JOHN W., formerly a Presbyterian clergyman, and afterward a Baptist clergyman; died in Poughkeepsie, N. Y. In early life, owing to doubts upon the question of infant baptism, he abandoned the ministry, and studied law. He was an eloquent public speaker, and did effective service for Henry Clay in the presidential campaign of 1844. Later in life he became a Baptist, and reentered the ministry.

July 1.—SIDELL, Lieutenant-Colonel and Brevet Brigadier-General WILLIAM H., U. S. A., Tenth Infantry; died in New York City, aged 63 years. He was born in New York, August 21, 1810, graduated from the Military Academy at West Point, July 1, 1838, and was promoted brevet second-lieutenant, First Artillery, but, finding his duties too irksome, and desiring a more active life, he resigned, October 1, 1838, and entered upon the more congenial profes-

sion of civil engineering, serving as city surveyor of New York, assistant-engineer of the Croton Aqueduct and High Bridge, division engineer Long Island Railroad, and the roads of Western Massachusetts, and also the New York & Erie Railway. In all these enterprises he displayed such skill and ability, that he was subsequently employed by the United States in conducting the survey of the Mississippi River and of the regions lying between that and the Rocky Mountains, with a view to ascertaining a favorable route for a railroad to the Pacific. Soon after the outbreak of the war with Mexico, in 1846, he was appointed captain in the Fourth Regiment New York Volunteers, raised for service, but, owing to the speedy close of hostilities, it was not mustered in. He then turned his attention again to civil engineering, and was engaged on a number of the leading railroad lines in the Western States. His life at the South had given him an insight into the spirit which, in 1861, culminated in open war, and he was one of the earliest to offer his services to the Government to aid in its suppression. On the enlargement of the regular army he received an appointment, and, in May, 1861, was commissioned as major of the Fifteenth Infantry, and in the autumn of that year was assigned to duty as chief mustering-officer in Kentucky, in the Department of the Cumberland, then commanded by General W. T. Sherman. He continued in that service on the staffs of Generals Sherman, Buell, and Rosecrans, until the summer of 1863, when he was detailed as acting assistant provost-marshal-general of Kentucky, under the Enrollment Act of March, 1863. In addition to his duties as chief mustering-officer of the department, he was, in 1863, assigned to duty as assistant adjutant-general, at the headquarters of the Army of the Ohio, at Nashville, Tenn., which position he retained until transferred to Kentucky. For his services as provost-marshal of Kentucky, the Government conferred upon him the brevet rank of colonel and brigadier-general. In May, 1864, he was commissioned lieutenant-colonel of the Tenth Infantry, and at the close of the civil war was assigned to duty at Fort Leavenworth, where, in 1870, he had a stroke of paralysis, which led, in December of that year, to his being placed on the retired list.

July 2.—BISHOP, Rev. WILLIAM H., late bishop of the Zion Methodist Episcopal Church; died in Newark, N. J., aged 70 years.

July 2.—WILSON, Hon. JOSEPH G., LL. D., member of Congress from Oregon; died in Marietta, Ohio, aged 47 years. He was born in New Hampshire in 1826, and at an early age removed with his parents to Ohio, was educated in Marietta College, studied law, and in 1852 removed to Oregon, and commenced the practice of his profession in Salem, receiving, the same year, the appointment of clerk of the Supreme Court. From this time forward, until 1860, he was thoroughly devoted

to his duties. During this year he was appointed District Attorney for the Third Judicial District, and in 1862 was appointed to the Fifth District, and reappointed in 1864, holding the office until 1870, when he resigned and returned to his private practice. In 1870 he was the Republican candidate for Congress, and again in 1872, when he was elected by a large majority. Prior to the civil war, Judge Wilson was an ardent Whig of the strictest sect; but, when the issue of union or disunion presented itself, he met it squarely, allying himself first to the Douglas wing of the Democratic party, and afterward to the Union or National Republican party. He was an uncompromising advocate of free institutions, and aided greatly, through the press and from the platform, in preserving his State to the party of which he was a prominent member. He was a man of vigorous intellect and acknowledged purity of character.

July 5.—ROBERTSON, Hon. JOHN, Judge of the Circuit Court of Richmond, Va.; died at his residence at Mount Athos, Campbell County, Va., aged 87 years. He was a native of Virginia, and a member of Congress from that State from 1834 to 1839. He was also at one time Lieutenant-Governor of Virginia.

July 9.—SHELBY, Colonel WINCHESTER BLEDSOE, an able lawyer and a Confederate officer in the late war; died at Brandon, Miss., aged 46 years. He was born at Gallatin, Tenn., June 18, 1827, and was lineally descended from the Shelys of Revolutionary fame. When quite young he removed with his parents to Brandon, where he was educated. Choosing the law for his profession, he had already attained to a successful practice when the commencement of the war led him to enter the Confederate service. In 1872 he was an unsuccessful candidate for Congress.

July 12.—BRADFORD, General ALEXANDER B., a veteran of the Florida and Mexican Wars; died in Holly Springs, Miss. During the Mexican War he was major of the First Mississippi Rifles. Besides his military services, he had been a member of the State Legislature.

July 13.—WHITEHEAD, Rev. CHARLES, D. D., a Reformed (Dutch) clergyman, chaplain of New York City Hospital; died in the pulpit at Perth Amboy, N. J., aged 72 years. He was born in 1801, and spent his youth in Philadelphia. In 1823 he graduated from Dickinson College, and later from the New Brunswick Theological Seminary. In 1826 he was licensed to preach by the Classis of Philadelphia. After a short settlement in the Presbyterian Church at Batavia, N. Y., he removed to the Reformed Church at Hopewell in 1828. He was subsequently pastor at Somerville, N. J., Fishkill and Walden, N. Y., and of churches in Houston Street, New York, Poughkeepsie, and Washington Heights. From 1861 till his death he was chaplain of the New York City Hospital. He was spending a summer vacation at Perth Amboy, N. J., at the time of his death.

July 15.—CUSHING, JAMES, Jr., an active friend of public schools and a prominent member of the Board of Education in New York City; died there, aged 41 years. He was a native of New York, and early identified himself with the cause of education. In 1858 he held the office of school commissioner, serving as chairman of the Committee on Finance. Upon the establishment of the new Board of Education, his prominent position made him a candidate for the presidency of that body.

July 15.—MILLS, ETHELBERT SMITH, a prominent and influential citizen of Brooklyn, L. I.; was drowned at Coney Island, not without some suspicion of suicide. Mr. Mills had been a very enterprising business-man, and, from his talents, energy, and fine social nature, he had been greatly beloved; but in an evil hour he became entangled with designing men and was implicated with them in the fraudulent use of the funds of the city and of one of the trust companies. It is believed that he was at first rather the tool of others than the originator of the scheme, but it ended in marring a character otherwise greatly esteemed.

July 16.—GLENDY, Commodore WILLIAM M., U. S. N.; died in Baltimore, Md., aged 72 years. He was born in Virginia, and appointed from Maryland to the Naval Academy, which he entered in 1818. In 1827 he was commissioned as lieutenant, and served successively with the Brazil, Pacific, and East India Squadrons. He received his commission as captain, September 14, 1855, and commanded the sloop Saranac at the outbreak of the civil war. In 1862 he was promoted to the rank of commodore; made prize commissioner at Washington in 1863, and placed on special duty at Philadelphia in 1865.

July 16.—RUSH, Rt. Rev. CHRISTOPHER, Bishop of the African Methodist Episcopal Church; died in New York City, aged 96 years. He was born a slave in Craven County, N. C., in 1777, went to New York in 1798, and joined the African Methodist Episcopal Church in 1808. Having been licensed to preach in 1815, he was ordained a superintendent in 1828, and successfully occupied every position in the Church until he was made bishop in 1849. He was one of those who influenced the separation of the colored branch of the Methodist Episcopal Church, and it was his address before Bishop George which finally brought about that result. At that time there were only about 100 members, but it has since increased to 100,000. The bishop never married, and he died peacefully of old age. He was one of the remarkable men of the present century in many respects, and his counsels in the African Church were always regarded with particular veneration.

July 17.—CRISHING, SAMUEL B., an eminent civil engineer; died at Providence, R. I.

July 17.—HAGAR, —, a colored woman of Alexandria, Ky., said to be the oldest person

in the United States; died at the age of 122 years and six months.

July 18.—ASHLEY, DELOS R., late member of Congress from Nevada; died in San Francisco, Cal. He was educated for the law in Monroe, Mich., went to California in 1849, where he held the office of district attorney in 1851, '52, and '53, was a member of the California Assembly in 1854 and 1855; a State Senator in 1856 and 1857, and State Treasurer in 1862. Early in 1864 he removed to Nevada, and was elected a Representative from that State to the Thirty-ninth Congress, serving as chairman of the Committee on Mines and Mining, and on that on Free Schools in the District of Columbia. He was also reelected to the Fortieth Congress, serving on the Committee on Public Lands.

July 20.—GUINABURG, Rev. MOSES, D. D., an eminent Jewish rabbi and author; died in Boston, aged 61 years. He graduated from the University of Prague, in Bohemia, of which city he was a native, and came to America about the year 1848. He possessed a thorough Talmudical and collegiate education, and had been for some years rabbi of the Warren-Street Synagogue in Boston, resigning his charge in 1872 on account of failing health. He was the author of a book on Judaism, and some letters on the controversial points between Judaism and Christianity.

July 20.—RATHBUN, BENJAMIN, a prominent business-man of Buffalo, convicted of extensive forgeries, in 1836, and later proprietor of an hotel in New York; died at Fort Washington, New York City, aged 82 years. He entered into the hotel business, in the country, and subsequently removed to Buffalo as proprietor of the Eagle Tavern. Becoming somewhat successful in business, he made large investments during an era of speculation, and, through the influence of a nephew with whom he was in partnership, was involved in a system of forgeries which resulted in his conviction and confinement in prison for a term of five years. The nephew, Lyman Rathbun, though the most guilty of the two, escaped to Texas and fought in the struggle against the Mexicans. After serving his time in prison, Benjamin Rathbun went to New York and again embarked in hotel-life, but was not successful. His private life was said to be irreproachable.

July 22.—ETHEBRIDGE, ROBERT, Chief Clerk and acting Naval Officer of the Port of New York; died at Frankfort, Herkimer County, N. Y., aged 59 years. He was born in Herkimer County, November 4, 1814; was for several years cashier of the Mohawk Valley and Frankfort Banks; was elected County Treasurer in 1848, and again in 1866, and in 1869, and was for several years a member of the Board of Supervisors of his county.

July 22.—FOED, ELIAKIM READ, a prominent and wealthy citizen of Otsego County, N. Y.; died at Oneonta, N. Y., aged 76 years. He was born in Albany County, and emigrated

when a young man. Commencing his career as a merchant, he was enabled, by thorough devotion to business, to gather a competence, and by judicious investments in real estate became one of the wealthiest and most influential citizens of that part of the State. He was one of the projectors of the Albany & Susquehanna Railroad, of which he was a director until his death. He was also foremost in encouraging religious, educational, and industrial improvements, and his benefactions were liberal and judicious. During the late war he contributed largely to the aid of the Government and the support of soldiers' families.

July 24.—**COLLINS, ABEL C.**, a minister of the Society of Friends, one of the editorial staff of the *Tribune*; died in New York City, aged 45 years. He was born at Narragansett, R. I., in May, 1828, and was educated at Providence, R. I. He early adopted the profession of teaching, and while yet a young man removed to Dutchess County, N. Y., where he became principal of a large boarding-school. Subsequently, in 1858, he conducted a school in Wickford, R. I. In 1860 he removed to New York City, where for several years he was engaged as a produce and commission merchant in Washington Market, and in April, 1873, became connected with the *Tribune*.

July 26.—**SPEAR, Major WALLACE M.**, Chief-Engineer of Norfolk (Va.) Navy-Yard; died at Ludlow, Vt. He was a resident of Wisconsin. In 1865 he was commissioned for duty at the navy-yard in Norfolk, and in 1867 in that of Pensacola, Fla.

July 27.—**CARHON, BENJAMIN J.**, Commodore U. S. N.; died in New York City, aged 73 years. He was born in Rhode Island, and at an early age entered the naval service. On November 13, 1890, he received the appointment of pay director in the navy, with the rank of commodore. Of the thirty-eight years during which he was connected with the department, he had seen sixteen years of sea-service, and left behind him an excellent record of diligence and faithfulness in the discharge of every duty. He retired from active service November 1, 1868, his last duty having been performed on board the receiving-ship *Vandalia*, in Portsmouth Harbor, N. H.

July —.—**HICKOK, Rev. MILO JUDSON, D. D.**, a Presbyterian clergyman; died at Marietta, O. He was born about 1815, graduated from Middlebury College in 1835; was tutor and Professor of Languages in Delaware College, Newark, Del., for a time, and for ten years was pastor of the First Church of Scranton, Pa. In 1867 he was laid aside from his pastoral work by an attack of paralysis, and since that time had lived in Marietta.

August 2.—**WATERMAN, Rev. THOMAS TILLOTSON, D. D.**, an eminent Congregationalist clergyman; died at Stratford, Conn., aged 73 years. He was born near Bridgeport, Conn., in 1800; graduated from Yale College in the class of

1822, and, soon after completing his theological course, accepted a call from a Congregational church in Providence, R. I., where for several years he labored with great acceptance. In 1837 he became pastor of a church in Philadelphia, where he remained until 1843, and then returned to Providence as pastor of the Fourth Congregational Church. In 1852 he removed to Galena, Ill., and later to Winona, Wis., and, after a few years of successful labor, returned to the East, as pastor of the Congregational Church of Danielsonville, Conn. He was a popular as well as powerful preacher, and was instrumental in organizing a large number of churches, especially in the West.

August 3.—**CHEW, ROBERT S.**, Chief Clerk of the Department of State; died in Washington, D. C., aged 62 years. He was a native of Virginia, and was appointed to the chief clerkship on the advancement of William Hunter, the second Assistant Secretary of State, having served in that department more than forty years. His position was one requiring wide and almost encyclopaedic culture, and the most unflinching integrity; and in both qualifications he was invaluable to the Government.

August 4.—**LIVINGSTON, ANSON**, an eminent scholar and accomplished gentleman; died at New Brighton, Staten Island, aged 66 years. He was the son of Chief-Justice Livingston, and was born in New York, May 1, 1807. At an early age he entered Columbia College, from which he graduated with honor, and subsequently studied law, but never entered upon the practice of his profession. In youth he was remarkably fond of athletic sports, and excelled in physical as well as mental culture, often performing feats which at that time were regarded as prodigies of strength and courage. Upon the completion of his education he visited Europe, and spent several years in traveling on the Continent. On his return he assumed the management of his extensive estate, giving his leisure time to study. He was a man of fine culture, warm and true in his affections, and greatly beloved by those with whom he was brought into close contact.

August 4.—**PEARL, STEPHEN H.**, Principal of the State Normal School at Plymouth, N. H.; died there, aged 40 years. He was at one time editor of the *Fountain*, a temperance paper, in Hartford.

August 6.—**CASS, GEORGE W.**, a brother of General Lewis Cass, and a man of great intellectual ability; died in Dresden, O., aged 87½ years. He removed from New Hampshire to Ohio, with his father's family, in 1796. After his father purchased the military section on the Muskingum River, he took his family to the new home in 1801, where he spent a long and useful life. One of his sons was General George W. Cass, of Pennsylvania.

August 6.—**STODDARD, Prof. JOHN F.**, an eminent teacher, and author of school textbooks; died at Kearny, near Newark, N. J., aged 48 years. He was born in Greenfield,

Ulster County, N. Y., July 20, 1825. His early years were passed upon a farm, with only such limited means of education as the common school afforded. As years advanced the desire for an education increased, and he spent some months in the academy, but at eighteen commenced teaching. Later, he entered the New York State Normal School, and, upon his graduation therefrom in 1847, entered upon his life-work as an educator. His fondness for mathematical science gave him a remarkable facility for clearness in teaching, and his enthusiasm won the interest of his pupils, arousing them to thought and study, and in turn fitting them for the work of teaching. He delivered a series of lectures before his normal classes and teachers' institutes, in which with great earnestness he set forth the noble and high purpose of the teacher. His marked success as an author is evinced by the great popularity of his mathematical series of text-books—a popularity scarcely inferior to that of any other series in this country; and as a sign and seal of his love for mathematical science he left a fund to Rochester University, furnishing a gold medal, worth one hundred dollars, to the student who should pass the best examination in mathematics, provided he reached a certain absolute standard, which standard was so high that at one examination the medal was not awarded.

August 10.—ALLEN, A. G., a New Hampshire politician and journalist; died in Washington, D. C., aged 55 years. He was a native of New Hampshire. During the Administration of President Pierce he served as Navy Agent in Washington; subsequently he became a newspaper correspondent, and was afterward successively on the editorial staff of several Washington journals.

August 12.—MACOMB, WILLIAM H., Commodore U. S. N.; died in Philadelphia. He was a son of Alexander Macomb, Major-General U. S. A., and was born in Detroit, Mich., June 16, 1818. He entered the service as midshipman in 1834, became lieutenant in 1847, commander in 1862, captain in 1866, and commodore in 1870. From 1856 to 1858 he served on the Portsmouth, East India Squadron; in 1856, engaged and captured the Barrier Forts in Canton, China; commanded the *Metacomet* in the Paraguay Expedition; attempted the passage of the Confederate batteries at Port Hudson, March, 1863; commanded the *Shamrock*, North Atlantic Blockade Squadron, in 1864-'65; had charge of the naval force in the capture of Plymouth, N. C., October 30, 1864; and for his services on the Roanoke River, near Poplar Point, N. C., was advanced in grade and commanded the steam-sloop *Plymouth*, of the European Squadron, in 1869. In 1871 he was light-house inspector.

Aug. 13.—JOHNSON, Rev. SAMUEL ROOSEVELT, D. D., an Episcopal clergyman, Rector of St. Thomas's Church, Amenia, N. J.; died there. He was for many years Emeritus Pro-

fessor of Systematic Theology in the General Theological Seminary of the Protestant Episcopal Church, New York City.

Aug. 14.—ANDREWS, GARNETT, a political leader in Georgia; died at Washington, Wilkes County, Ga. He practised law with considerable success for many years, and also took an active part in politics. In 1855 he was nominated for Governor of Georgia, but was defeated. He was at first strongly opposed to secession, but afterward acquiesced therein.

Aug. 14.—TYLER, Rev. JOHN E., a Congregationalist clergyman and teacher; died in Vineland, N. J., aged 68 years. He was the son of Rev. Dr. J. Bennett Tyler, of the East Windsor Theological Seminary, Conn. He was for many years pastor of a Congregational church in East Windsor, and also taught in the academy there. Upon the failure of his health, he removed to Vineland, and engaged in the insurance business, preaching occasionally, as he was able.

Aug. 15.—DURAND, ELIAS, an eminent pharmacist and botanist of Philadelphia; died there, aged 79 years. He was born in Mayence, France, January 25, 1794. After studying in Paris, he joined the medical corps in Napoleon's army, and was present at the battles of Lutzen, Bautzen, Hanau, Katzbach, and Leipzig. Upon the downfall of Napoleon, he resolved to come to this country, with the view of pursuing the study of botany, and to enjoy the benefit of free institutions. He settled first in Baltimore, and afterward in Philadelphia, where he established a drug-store, which became the resort of many of the most eminent physicians of the day. Besides his celebrity as a chemist, he acquired an extended reputation as a botanist, and was thoroughly familiar with the flora of North America. He had gathered a large herbarium, embracing ten thousand species of North American plants, the work of nearly forty years. This he presented to the Museum of the *Jardin des Plantes* of Paris, in 1868. A separate gallery has been devoted to the collection in that institution, and it has been named, after the donor, *Herbaria Durandi*. Mr. Durand was a constant contributor to home and foreign scientific publications, evincing great versatility in treating scientific subjects, both in his own and the English language. He was a member of several scientific societies, both in this country and abroad.

Aug. 15.—STODDARD, WILLIAM, a Michigan State Senator and Representative; committed suicide during a temporary attack of insanity, at Litchfield, Michigan. He served four terms as a Representative, and two as Senator.

Aug. 17.—WARFORD, General A. B., a prominent railroad-man, at one time President of the Northern Pacific Railroad; died at Harrisburg, Pa. He was largely identified with the railroad and other measures for developing the interests of the Northwest, and had taken a prominent part in pushing forward

the great railway project which met with disaster so soon after his death.

Aug. 19.—**POOLZ, FITCH**, a literary man, journalist, and author; died at Peabody, Mass., aged 70 years. Though he had only a common-school education, he made good use of his advantages, and became extensively known for his literary attainments, for many years being connected with the press. He belonged to the Whig party, and was the author of several satirical and pointed ballads, that were very popular at the time. Among these was "Giles Corey's Dream." He was thoroughly conversant with the habits and manners of the period of the Salem Witchcraft (1692), and was the editor of a certain manuscript found at the tearing down of the old First Church, which, from its exact similarity to those of a more ancient date, was treasured for some time as a rare discovery. Mr. Poole, at different times, represented the town of Peabody in the Legislature; was a member of the school committee and board of selectmen; was editor of the *Danvers Wizard* when that paper was established in 1859, and retained the position until 1868. He was formerly member of the Jordan Lodge of Free and Accepted Masons. He was also the founder of the Mechanics' Institute Library, the institution which Mr. Peabody afterward endowed with his name and twenty thousand dollars, and, for the last seventeen years of his life, had been the librarian of that institution.

Aug. 20.—**HOADLEY, DAVID**, an eminent merchant and financier of New York City, for twenty years President of the Panama Railroad Company; died at Englewood, N. J., aged 67 years. While singularly modest and unassuming in his manners, few business-men possessed such sound judgment, clear perceptions, and marked executive ability. He was a man of the most unquestioned integrity, and while often placed in positions of high responsibility in the management of the affairs of great corporations, he never failed to justify in the fullest degree the confidence placed in him. He was also a man of great benevolence, never withholding his liberal aid from any deserving object.

Aug. 21.—**VAN PELT, REV. PETER, D. D.**, an Episcopal clergyman, formerly Professor of Oriental Languages in Burlington College, N. J.; died in Philadelphia, aged 75 years. After leaving Burlington he held a professorship in the Episcopal Divinity School, in West Philadelphia. For many years also he occupied the position of Secretary of the Board of Foreign Missions.

Aug. 24.—**LORD, FREDERICK B.**, a well-known railroad-man; died at Covington, Ky., aged 39 years. He was a son of the late President Lord of Dartmouth College, and graduated from that institution in the class of 1856.

Aug. 24.—**YOUNG, BENJAMIN**, an actor of negro parts; died in Philadelphia. He was remarkably successful in the delineation of

negro characters, and was particularly successful as "Uncle Tom."

Aug. 28.—**BURNETT, JUDGE DAVID**, an eminent New Jersey jurist; died at Paterson, N. J. He was born in Springfield, N. J., in 1800. At about the age of eighteen he went to New York City, where he learned the trade of printer, after which he went to Paterson, N. J., and worked three years as a journeyman printer. In September, 1825, in connection with Mr. Day, he started the *Paterson Intelligencer*. In April, 1845, he was appointed Surrogate of Passaic County; was clerk of the Board of Chosen Freeholders ten years, and was connected with several banking institutions.

Aug. 28.—**O'BRIEN, JOHN**, Secretary of the Catholic Total Abstinence Society of America; died in St. John, N. B.

Aug. 28.—**WOLLE, REV. SYLVESTER**, an eminent Moravian minister; died at Bethlehem, Pa., aged 58 years. At the time of his death he was Treasurer of the Provincial Elders' Conference, or Executive Board of the Northern Diocese of the Moravian Church, and was also, by appointment, financial agent for the Foreign and Home Missions of the Church.

Aug. 30.—**CARDOZA, JACOB N.**, a Southern journalist, widely known and esteemed in Georgia and South Carolina; died at Savannah, Ga., aged 87 years.

Aug. 30.—**ROOT, REV. DAVID**, a Congregationalist clergyman, reformer, and philanthropist; died in Chicago, aged 83 years. He was a native of Pomfret, Vt., graduated from Middlebury College, and labored several years as a missionary in Georgia. In 1819 he became pastor of the Second Presbyterian Church in Cincinnati, which position he held until 1832, when he accepted a call to the Congregational Church, in Dover, N. H. Here he became identified with the antislavery cause, for his courage and devotion to which he endured much persecution not only in Dover, but likewise in Waterbury, Conn., to which place he afterward removed. Subsequently he held a pastorate for a period of seven years in Guilford, Conn., and in 1851 removed to New Haven. The following year he retired from the ministry. Among his benevolent deeds were the endowment of a professorship in Beloit College in 1853, to the amount of \$10,000, a donation of \$20,000 to Yale Seminary in 1863, and a gift of \$5,000 to the American Missionary Association in 1866.

Sept. 1.—**HERRON, REV. ANDREW, D. D.**, a United Presbyterian minister; died at Cedarville, Ohio, aged 85 years. He was the oldest minister in that denomination. For many years he was in the Associate Church, where he was long the Stated Clerk of Synod; he subsequently transferred his membership to the Reformed Presbyterian Church, which, it will be remembered, was one of three bodies which, by their union in 1858, formed the United Presbyterian Church.

Sept. 2.—HICKMAN, ROBERT S. (known as "Beau" Hickman); died in Washington, D. C., aged 60 years. He was supposed to be a native of Virginia or Maryland. He made his appearance in Washington about the time of the Mexican War, and at once became noted for the elegance of his dress and manners. He was on intimate terms with most of the prominent men of his time, and his personal reminiscences were useful to him in his declining days in securing an odd quarter from some stranger who would listen to him. Inoffensive and civil in his manners, pleasant in his address, witty, talkative, always good-natured and respectful, "Beau" Hickman spent his time in Washington hotels and other places where the traveling public could be found, always watching for an opportunity to make a request for "that quarter." For years he lived easily and merrily on his pitiful gains, but when old age began to creep upon him, and the people had heard all his stories, his fast-waning popularity lessened his receipts, until poverty induced sickness and death.

Sept. 2.—HUBBARD, DEMAS, formerly member of Congress from New York; died at Smyrna, N. Y., aged 68 years. He was born in Winfield, Herkimer County, N. Y., January 17, 1806; received an academical education; studied law, and was for many years supervisor of Chenango County. From 1888 to 1840 he was a member of the State Legislature, and from 1865 to 1867 was a Representative from the Herkimer District to the Thirty-ninth Congress, serving on the committee on the Post-Office and Post-roads.

Sept. 2.—REID, CHESTER ISHAM, ex-Judge of the Superior Court of Massachusetts; died at Greenbrier, White Sulphur Springs, Va., aged 50 years.

Sept. 3.—RINGS, D., first Chief-Justice of Arkansas; died at Little Rock.

Sept. 4.—APPELMAN, Colonel HIRAM, late Secretary of the State of Connecticut; died at Mystic Bridge. During the late war, he commanded the Eighth Connecticut Regiment, and his death was the result of wounds received at the battle of Antietam.

Sept. 5.—LAMONT, CHARLES A., a prominent Wall-Street broker; was killed by an accidental fall in Fifth Avenue, New York City. He was highly esteemed as a citizen, and was at one time in the sugar-refining business, firm of Plume & Lamont. In 1863 he became a Wall-Street broker, in which business he was very successful.

Sept. 10.—WARE, Judge ASHUE, LL. D., an eminent admiralty jurist, and former journalist; died in Portland, Me., aged 92 years. He was born in Sherburne, Mass., February 10, 1782; graduated from Harvard University in 1804, was tutor there from 1807 to 1811, and Professor of Greek from 1811 to 1815. He edited the *Boston Yankee*, in Boston, one year, was admitted to the Boston bar in 1816, and, removing to Portland in 1817, prac-

tised his profession and edited the *Portland Eastern Argus* until 1820, when he was made Secretary of the State of Maine. From 1822 to 1866 he served as Judge of the United States District Court of Maine. In 1839 he published "Reports of Cases, United States District Court of Maine," 1822 to 1839; and later contributed to Bouvier's "Law Dictionary" articles on "Admiralty Jurisdiction," "On the Duty of Masters of Vessels," and "Privileged Debts."

Sept. 11.—MCCOOK, General EDWIN STANTON, Territorial Secretary, and at one time Acting Governor of Dakota: was assassinated at Yankton, Dakota, by P. P. Wintermute, a banker of Yankton, who had once aspired to the general's position, and who had sought a quarrel with him. General McCook was the fifth son of General Daniel McCook of New Lisbon, Columbia County, Ohio, who, with his eight sons, took an active part in the late war. They were all brave, resolute, and earnest men, and, though not remarkable for military ability, several of them, and among the number the father and three of the sons, sealed their patriotism with their blood. Edwin, born at New Lisbon, was named after Edwin M. Stanton, and was as brave as the rest. After being wounded by Wintermute, and though himself unarmed, he seized his assailant and dashed him to the floor. Wintermute fired three times, and with fatal effect.

Sept. 11.—WORTHINGTON, WILMER, M. D., a prominent and estimable physician and public citizen of Pennsylvania, born in Westchester, Pa.; died there, aged 70 years. He had a very high professional reputation, and an extensive consulting practice; had been President of the State Medical Society, and was greatly esteemed by his brethren in the profession. He had also mingled in political life, had been a member of both branches of the State Legislature, and President of the Senate. For some years previous to his death, he had been the executive officer of the Board of State Charities, having in charge the duty of making a personal visitation of all institutions, educational or humanitarian, enjoying State aid. Dr. Worthington was a man of the highest integrity and religious principle, a leading and influential elder in the Presbyterian Church, and often a commissioner in the General Assembly of that church.

Sept. 18.—PIERCE, Colonel GEORGE H., a prominent political leader of New Hampshire, long connected with the Democratic party; died in Dover, N. H.

Sept. 18.—MERRILL, Rev. SAMUEL H., a Congregationalist clergyman, and author, settled at Scarborough, Me.; died there from paralysis, with which he had been seized in the pulpit, on the 31st of August, aged 68 years. Mr. Merrill was a graduate of a Western college and of Lane Theological Seminary, and had been for many years a pastor in Maine. He went out as chaplain of the First Maine Cavalry during

the war, and subsequently wrote a "History of the First Maine Cavalry in the War," which was published in Portland.

Sept. 20.—McWILLIAM, Rev. JAMES M., a Presbyterian clergyman and teacher, of Scottish birth and education; died in Deckertown, N. J., aged 55 years. He was born in Aberdeen, Scotland, July 22, 1818, and educated at King's College, in that city. He emigrated to the United States in 1835, and began teaching at Lafayette, N. J., and after a time was persuaded, by Rev. Dr. Schaffer, to enter the Theological Seminary at Princeton. After graduating thence, he was called to preach at Oxford, N. J., and ordained there in December, 1842. He remained in the pastorate there for eleven years, and then visited Scotland, and on his return settled at Monroetown, Pa., and, with Mr. Samuel F. Colt, founded the Susquehanna Collegiate Institute, at Towanda, of which he soon afterward became principal. Except a brief absence, in the pastorate, he remained in charge of this institute till 1866, and maintained a high reputation as a teacher, especially in the classics. Retiring from this in consequence of the impaired health of his wife, he organized a church at the little mining town of Barclay, Pa., on the summit of the Alleghanies, where he remained for about three years, when he accepted a call to Deckertown, N. J., where he closed his career.

Sept. 21.—HUTTER, Rev. EDWIN WILSON, D. D., a Lutheran clergyman and scholar; died in Philadelphia, aged 60 years. He was born in Allentown, Pa., September 12, 1813. At the early age of seventeen, he was the editor and sole proprietor of two newspapers, one English, and the other German, both published in Allentown, Pa., his father, who had the management of them, having died. He was, for some time, the sole support of his mother and his five brothers and sisters. Dr. Hutter subsequently removed to Harrisburg, where he had charge of another newspaper. He spent a short time in Lancaster, and was for three years private secretary for Mr. Buchanan when he was Secretary of State, during the Administration of President Polk. From Washington he removed to Baltimore, and studied for the ministry under the late renowned Dr. Kurtz. He received and accepted a call from St. Matthew's Evangelical Lutheran Church, Philadelphia, preaching his first sermon there on the first Sunday in September, 1850. He had been ever since that period the faithful and efficient pastor of that church, beloved by all the congregation. During his pastorate eight hundred members were admitted by baptism, confirmation, and certificate. He was noted for his adherence to the Government during the civil war, preaching frequently to the soldiers prior to their leaving for the seat of war. He was also deeply interested in the Northern Home for Friendless Children, being one of the trustees of that institution at the time of his death.

Sept. 25.—BOURNE, EDWARD EMERSON, LL. D., a prominent citizen, jurist, and scholar, of Kennebunk, Me.; died there, aged 76 years. He was born in Kennebunk, March 19, 1797, fitted for college at South Berwick Academy, entered Bowdoin College at the age of fifteen, and graduated in 1816 with distinction. He commenced the study of law immediately, and was admitted to the bar in 1822. He first practised his profession in Albion, but afterward returned to Kennebunk, where, with the exception of a brief residence in York, he continued to the close of his life. He was first selectman of the town for several terms; represented it in the Legislature for a number of years; was twice County Attorney for York; and was Judge of the Probate Court for the County of York from 1856 to 1872. He was also for several years President of the Maine Historical Society, which he did much to promote and sustain. He was a Trustee or Fellow of Bowdoin College from 1866 till his death, and received from that college the honorary degree of LL. D. in 1872. In private life Judge Bourne was amiable, gentle, and courteous, while he was, in all his relations to his fellow-men, strictly honorable, just, and unblamable. He had published several occasional addresses and orations, mostly historical, a "History of the Town of Kennebunk," and had ready for publication, at his death, a "History of the Town of Wells, Me., down to 1820," in two volumes, prepared at the request of the Maine Historical Society.

Sept. 26.—DE WALDEN, THOMAS BLAIDES, an English actor and dramatic writer, resident in this country since 1844; died in New York City, aged about 60 years. He commenced life as an actor, and achieved considerable success in his profession, but after a time turned his attention to writing plays, of which he had composed and adapted more than one hundred. He left the stage in 1857, and had since been engaged in commercial life, but without success. He had continued to write for the stage, and his earlier dramas had considerable merit and popularity, his "Seven Sisters" having had a very long run at Laura Keane's Theatre, in 1860. Of late, he had descended to a lower grade of dramas, pleading that thus only could he satisfy an unrefined popular taste.

Sept. 26.—PETERS, SAMUEL H., a political leader in Louisiana, member of the Forty-third Congress, from the Fourth (or Shreveport) District; died of yellow fever in Shreveport.

Sept. 26.—WHEELWRIGHT, WILLIAM, an enterprising and philanthropic citizen of Newburyport, Mass., long engaged in engineering pursuits in South America; died in London, aged 76 years. His life had been one of great and unceasing activity. He built the first railway, the first gas-works, the first water-works, and the first iron pier ever established in South America, besides engaging in various other magnificent enterprises. He was the founder of the Pacific Mail Company, and had given away

to benevolent purposes during his life more than \$600,000. In his will, he left one-ninth of his estate (which is supposed to amount in all to about \$900,000) to found a scientific school in Newburyport.

Sept. 27.—**FOSTER, WILDER D.**, a political leader of Michigan, a member of Congress from the Fourth (or Grand Rapids) District of that State in the Forty-second and Forty-third Congresses; died at Grand Rapids, aged 54 years. He was a native of Orange County, N. Y., born in 1819, but had been, for nearly thirty years, a resident of Grand Rapids, where, for twenty-five years, he was an enterprising and hard-working merchant.

Sept. 28.—**EVANS, AUGUSTUS O.**, a journalist and politician; died in Hoboken, N. J., aged 42 years. He was born in Binghamton, N. Y., in 1831, and at twenty years of age came to Brooklyn, and was employed in a subordinate capacity on the *New York Tribune*, and finally as reporter of New Jersey news. Finding his residence in Brooklyn inconvenient, he removed to Hoboken, and soon after took charge of the *Hudson County Democrat*, of which he retained the proprietorship until March, 1873. Mr. Evans occupied the position of City Clerk of Hoboken for one or two years, was elected to the Assembly of New Jersey in 1855, and again elected in 1866, when he was chosen as Speaker of the House.

Sept. 28.—**STICKLAND, Colonel LEE**, Eighth Regiment of Maine Volunteers, and, since the war, a prominent politician of that State; died in Maine.

Sept. 29.—**GIBBINS, JAMES**, a prominent Irish citizen of Philadelphia, for some years past President of the Fenian Brotherhood; died in that city, aged 75 years.

Sept. 30.—**BALDWIN, Colonel JOHN BROWN**, a Virginian politician, political leader, and lawyer, born in Staunton, Va., January 11, 1820; died in Richmond, aged 58 years. He was educated at Staunton Academy and the University of Virginia, admitted to the bar in 1841, gained reputation as a lawyer, but, like Southern lawyers generally, soon drifted into politics. He was elected to the House of Delegates in 1846, but, differing from his constituents on some questions, was not returned for a second term. For several years following he devoted himself very sedulously to his profession, though taking a sufficient interest in military matters to become colonel of militia. He was a candidate for Judge of the Court of Appeals in 1859, but was defeated by a small majority. Though a determined Unionist up to the secession of Virginia, he decided, like many other Virginians, to go with his State; was Inspector-General of Virginia troops, then colonel of the Fifty-second Virginia Regiment, and later a member of the Confederate Congress. After the war he was returned to the Virginia House of Delegates, and chosen Speaker of the House. He was subsequently President of the Virginia Conservative Convention,

and was a member of the National Democratic Convention of 1868. He declined the nomination for Governor in 1868, and since that time, from impaired health, had mingled little in public life.

Sept.—**MILLER, JULIA A.**, a lady of Lancaster, N. H., of partially Indian descent; died there. She was a descendant, in the sixth generation, from King Philip, on her father's side, and of the fourth generation, on the mother's side, from Metalluc, chief of the St. Francis or Abenaka tribe of Indians, whose hunting-grounds were in the region of the Magalloway.

Oct. 1.—**WOODBUFF, Lieutenant EUGENE A.**, U. S. A., Corps of Engineers; died of yellow fever at Shreveport, La., aged about 29 years. He was a native of Connecticut, and served as a volunteer during the late war, was appointed to West Point from Iowa, and graduated second-lieutenant, Corps of Engineers, July 18, 1866. The following October he served as assistant-engineer in the construction of the defenses of San Francisco Harbor, Cal. He was promoted first-lieutenant, March 7, 1867. Since the settlement of Louisiana, there has been an obstruction of the Red River for a distance of many miles above Shreveport, called the Red River raft, which yearly caused the overflow of some of the best cotton-plantations of Louisiana. Early in the year 1873, Lieutenant Woodruff, by order of the Government, superintended the removal of the raft, and succeeded in making a passage wide enough for a single boat through more than forty miles of these obstructions. On the 10th of September he arrived in Shreveport from the scene of his operations, without having received any warning of the epidemic that was then raging there. He found the people panic-stricken and fleeing from the city, leaving the sick to suffer and die without nursing or medical attendance. A few humane citizens had formed themselves into a "Howard Association," but their numbers were so small that they were able to relieve but a small part of the suffering. Instead of returning to the raft, where there had not yet been a single case of yellow fever, he at once joined the Association, and, although he was not acclimated, devoted himself to the care of the sick. At the end of a week he was stricken down with the fever, and survived but a few days.

Oct. 2.—**KINNEY, Rev. EZRA D.**, a Presbyterian clergyman and evangelist; died at Darien, Conn., aged 75 years. He was born at Fort Ann, Washington County, N. Y., September 7, 1799, and, after the death of his father, removed to Granville, where he was apprenticed to a blacksmith. His conversion occurring when but little over sixteen years of age, he bought his time, and commenced studying in preparation for college, graduating from Middlebury College in the class of 1825. His health failing, he made a brief trip to Europe, and immediately upon his return entered upon his theological studies, and, in 1826, com-

menced preaching at Ticonderoga, N. Y. Subsequently, he engaged in missionary work in Troy, New York, Poughkeepsie, Waterford, Salem, and other places, organizing churches, and establishing a deep religious interest wherever he went. In 1831 he was installed pastor of a church in Champlain, N. Y., where he was eminently successful. Subsequently, he held a pastorate of three years in Bennington, Vt., and in 1838 accepted a call to Darien, Conn., where he remained for a period of twenty-one years; the remainder of his ministry of forty-six years was devoted to the work of an evangelist.

Oct. 4.—CARROLL, THOMAS KING, former Governor of Maryland; died in Dorchester County, Md., aged about 80 years.

Oct. 5.—EVERSFIELD, CHARLES, M. D., Medical Director, U. S. N.; died at North Conway, N. H. He was a native of Maryland, and had been appointed assistant-surgeon from that State in 1843, and had resided for some years in New York City, but latterly in Washington. He was promoted to the rank of Medical Director in May, 1873, after thirty years of service. He had been for some years in charge of the Naval Hospital at Washington.

Oct. 6.—BOWMAN, REV. F. H., D. D., an eminent Presbyterian clergyman of Memphis, Tenn.; died of yellow fever in that city. During the prevalence of the epidemic he was indefatigable in his devotion to the sick and dying, and fell at his post of duty. His funeral services were to be held in his church, but his congregation were so scattered for the time being that it was deemed best to have the services conducted more privately, and, while at the grave, nearly the whole ceiling of the church in which they were to have assembled, fell with a terrible crash upon the floor beneath.

Oct. 7.—CLEMENT, DR. KNUT JUNGBORN, a Danish linguist and historian; died at Bergen, N. J. He was born in the island of Amrom, Southern Frisia, Denmark, December 4, 1803. He was educated at the Universities of Kiel and Heidelberg, and became Doctor of Philosophy in 1835. At the expense of the Danish Government he took a tour of three years through the British Islands and the Continent, and on his return to Denmark he became a professor in the University of Kiel. Here he delivered courses of lectures on history, politics, economy, and criticism, which won him great renown. Dr. Clement published twelve or thirteen elaborate works, historical, linguistic, critical, political, and descriptive, and, though somewhat too much inclined to *bizarre* and improbable speculations in his linguistic theories, he maintained a very high reputation as an author and scholar. He had taken an active part in the question of the Sleswick-Holstein duchies, and, when they were given up, he emigrated to the United States, where he had resided since 1866.

Oct. 7.—JAMESON, Commodore WILLIAM, U.

S. N.; died at Alexandria, Va., aged 82 years. He was born in that State in 1791, and was appointed midshipman from the District of Columbia in 1811. During the war of 1812-'14 he was in several engagements, and received his commission as lieutenant in 1817. He attained the rank of commander in 1837, and of captain in 1844. He was faithful to the Union cause at the outbreak of the civil war, and was commissioned as commodore July 16, 1862, but, being disabled for active service by an affection of the eyes, he remained at Alexandria during the war, and was subsequently placed on the retired list.

Oct. 7.—LAW, JOHN, an Indiana jurist; died at Evansville, aged 77 years. He was born in New London, Conn., in 1796, where he obtained his early academic education, and studied law. Soon after his admission to the New London County bar, he emigrated to Indiana, and settled in Vincennes, the oldest town in the State. Here he entered upon his profession, in which he subsequently won success and position. He served one term in the Legislature of the State previous to the removal of the capital from Corydon, in Harrison County, to Indianapolis, in 1824. For many years he was judge of the district of Vincennes. He afterward served two terms in Congress, previous to the commencement of the late war. In 1859 he was President of the Indiana Historical Society, but, for several years previous to his death, he had retired from public life.

Oct. 9.—CUMMING, ALFRED, a Southern politician; died at Atlanta, Ga., aged 56 years. He was formerly Superintendent of Indian Affairs, and from 1857 to 1861 Governor of Utah Territory, during a critical period of its history. During the civil war he served in the Confederate army, and became a brigadier-general.

Oct. 9.—MARRYAT, WILLIAM W., assistant-astronomer of Lieutenant Wheeler's Exploring Expedition; died at Bozeman, Montana, aged 24 years. He had but recently gone thither, and fell a victim to mountain-fever. He was a young man of fine scientific attainments and high Christian character.

Oct. 10.—WILSON, OREGON, a distinguished painter; died at Santa Barbara, Cal. He early developed an artistic taste, and at the age of fourteen years painted a picture of Mr. Seward. At sixteen he won the Pennsylvania State prize for crayon-drawing, after which he went to Europe and spent five years in study. Upon his return home he opened a studio in New York, and painted many valuable pictures.

Oct. 10.—WOOD, REV. HENRY, D. D., Chaplain of the U. S. Navy; died at Philadelphia, aged 78 years. He was a native of New Hampshire, and entered the service as chaplain in September, 1856. He had been stationed at the Naval Asylum in Philadelphia for several years past. For some years past he had

been an occasional contributor of valuable articles to the columns of the *New York Observer*.

Oct. 13.—**RUSSELL, Colonel WILLIAM H.** ("Owl Russell"), formerly private secretary to Henry Clay; died at Washington, D. C. Colonel Russell was a native of Kentucky, and had attained to considerable prominence as a politician and office-holder there, but removed to Missouri, where he was a member of the State Legislature, and a candidate for Congress; but an opponent, taking the advantage of his foible of personal vanity, concocted a ridiculous story of his replying to the "to whoo" of an owl, by a recital of the offices he had held and expected to hold, which not only defeated his election, but fastened upon him the *sobriquet* of "Owl Russell," which clung to him through life.

Oct. 13.—**SCOTT, T. PARKIN**, Chief-Justice of the Supreme Court of Baltimore; died in that city, aged 69 years. He was the son of Judge John Scott, of Baltimore, and was born in that city, April 19, 1804. In 1825 he was admitted to the bar, and succeeded his brother as Auditor of the County Circuit Court until the new constitution of 1851. When the Circuit Court for Baltimore City was established in 1853, he was appointed Auditor, serving in that capacity for a period of ten years. He was the first President of the Catholic Institute, and for many years vice-consul for the Papal States, in Baltimore. In 1861 he took active measures to induce Maryland to join the seceding States. He published at that time a pamphlet in favor of secession, entitled "The Crisis;" was a member of the Legislature at its special session of April 26, 1861, and threw all his influence against the Union. For his course at this time he was arrested, on September 12, 1861, conveyed to Fort McHenry, and thence to Fortress Monroe, whence two weeks later he was sent to Fort Lafayette, and after two months' imprisonment there transferred to Fort Warren, in Boston Harbor, where he was confined for thirteen months more, and then released by the Government. During his incarceration his health suffered considerably. On his release he resumed practice, and at the close of the war was elected Judge of the City Court. In 1869 he was elected Chief-Justice of the Supreme Court of Baltimore, which office he continued to fill till his death. He was a man of extensive and profound legal attainments.

Oct. 14.—**BERESFORD, SAMUEL B., M. D.**, an eminent physician and surgeon of Hartford, Conn.; died there, aged about 70 years. Dr. Beresford was a native of England, and was educated there, but soon after receiving his medical diploma went out to Demerara, South America, where he practised his profession for several years in partnership with an uncle, with whom he came to Hartford about 1835, and soon attained a large practice from his skill and thorough knowledge of his profession.

He had contributed many papers to the medical journals, but left, we believe, no other publications.

Oct. 22.—**HOYT, ADOLPHUS DAVENPORT** (Dolly Davenport), a well-known actor; died at New Orleans, La. He was born at Stamford, Conn., in 1831, and made his first appearance on the stage in 1848, at Baltimore. In the earlier part of his career he acted *Claude Melnotte*, and the lovers in general, but in his riper years he excelled in such manlier juvenile parts as *Horatio* and *Montano*, and in characters fraught with grotesque humor. His *Dalton*, in the "Ticket-of-Leave Man," attracted much attention, and also his *Pinchback* in Brougham's comedy. A part of his youth was devoted to the study of law, but he left the bar for the stage, and in 1853 was at the old Broadway Theatre. In that year he married Miss Lizzie Weston, but, the match proving unfortunate, they were divorced in 1857, the lady subsequently becoming the wife of Mr. Charles Mathews. The subsequent career of Davenport was full of vicissitudes and trouble. For the last ten years he had acted for the most part in the Southern and Southwestern cities.

Oct. 23.—**SIXBURY, ROBERT**, a noted hunter on the John Brown Tract; died at Leray, Jefferson County, N. Y., at the age of 110 years and 7 months. He had acquired great reputation as a hunter in Northern New York, where he had slain over 2,200 deer. It was said that he used alcoholic stimulants to excess, and "never with any conscientious scruples." At eighty years of age he met with an accident which necessitated the amputation of one of his legs, and he assisted the country doctor to perform the operation, which he survived for a period of thirty years. He retained his vigor nearly to the last.

Oct. 24.—**BEBB, Hon. WILLIAM**, former Governor of Ohio; died at Rockford, Ill., aged 71 years. He was born of Welsh parents, in Butler County, O., December, 1802. From 1846 to 1848 he was Governor of Ohio. He was the father of the botanist, Bebb.

Oct. 25.—**HEENAN, JOHN CARMEL**, a well-known pugilist; died at Green River, Wyoming Territory, aged 39 years. He was a native of West Troy, N. Y., where he was born, May 22, 1835. In 1849 he went to California as an Argonaut, and, being a blacksmith, obtained work in a machine-shop at Benicia. Being remarkably strong and well-formed, Heenan picked up the rudiments of sparring, and soon became famous locally as a successful amateur. His first essay at the lessons of the prize-ring was a challenge to Yankee Sullivan in 1855, but it never came to any thing. In 1856 John came back to the Atlantic coast, became a proficient in the "manly art," and a match was arranged between him and John Morrissey in 1858, when a terrific struggle occurred, Morrissey winning. A year after this, in April, 1860, Heenan went to England

and fought Tom Sayers. Heenan returned to New York in July, and then went back to England in 1861 and fought with King, being again defeated. He never again entered the ring.

Oct. 26.—CAPP, REV. EDWARD PAYSON, missionary of the Presbyterian Board of Foreign Missions at Fung Chow, China; died at Yokohama, Japan, upon his way home from China, aged 37 years. He went to China in 1869 and had proved himself a faithful and efficient laborer in the field. Upon the failure of his wife's health he found it necessary to accompany her to the United States, but was taken sick at Shanghai.

Oct. 26.—WAKEFIELD, CYRUS, a wealthy importer and manufacturer, of Boston, Mass.; died there, aged 62 years. He was born in Roxbury, N. H., in February, 1811, and was the architect of his own fortune. He came to Boston about 1827, and engaged in business. He originated the rattan business in this country, and discovered several methods of utilizing the rattan waste, while of the split rattans he made chairs, settees, furniture, carriage-bodies, etc., etc. He established a large factory for these manufactures in South Reading, Mass., where his rattan-works cover seven acres of ground, and the pay-roll was about \$35,000 per month. In 1868 the town (South Reading) voted to change its name to Wakefield, in recognition of his benefactions, particularly the gift of a town-hall costing \$100,000. He left large bequests to benevolent objects.

Oct. 28.—HATCH, HORACE, M. D., an eminent physician in New York City; died there, aged 85 years. He was a native of Trowbridge, Vt., graduated from Dartmouth College in the class of 1815, and after completing his medical studies entered upon the practice of his profession in Norwich, Vt., where he remained until 1837, when he removed to Burlington. Here he continued in practice for a period of about twenty years. In the spring of 1861, having retired from the active duties of his profession, he removed with his son-in-law to Washington, D. C., where he received an appointment in the office of the Register of the Treasury, discharging the duties of his post with credit to himself until 1865, when he removed to New York. His life, professional and private, was irreproachable, and full of generous and kindly deeds. He left four sons, Dr. Horace Hatch, of Washington; William B., of the firm of Fairbanks & Co., New York; A. S. Hatch, firm of Fisk & Hatch, bankers; and Edward P., late President of the Willcox & Gibbs Sewing Machine Company, New York, and also a daughter, wife of L. E. Obitenden, Esq., of New York.

Oct. 30.—VAN ARDEN, CHARLES E., M. D., an eminent physician and scholar; died at Auburn, N. Y. Having received a good medical education, he devoted himself to his profession with a zeal and fidelity which ended only with his life. In 1852 he took charge of

the hospital at Buffalo, when the cholera was making melancholy havoc in that city. Later he was physician to the State-prison, Auburn, and on Dr. Hall's retirement became physician at the Insane Convicts' Asylum, in both of which positions he showed most estimable qualities of head and heart.

Oct.—HARBATUGH, MISS MARY, a lady missionary of the Young Men's Christian Association of Memphis, Tenn.; died there, of yellow fever. She gave up the work assigned her, and devoted herself to nursing the sick during the epidemic in that city until, becoming completely exhausted, she fell a prey to the fever herself.

Nov. 4.—STANBURY, EDWARD A., an eminent citizen of New Jersey; died in Haledon, aged 57 years. He was born in Vermont, in 1811, and, after being graduated at an Eastern college, edited a newspaper for several years. Subsequently he practised law in New York, and in 1856 removed to Haledon, or, as it was then called, Oldham. Here he became an active worker in the Republican party, and a zealous advocate of abolition. In 1866 he was elected to the Assembly by the Republicans of the Third Assembly District, Passaic County, serving one term. In 1872 he became an active supporter of the Liberal Republican party.

Nov. 5.—TRACY, HENRY R., a Boston journalist; died in that city, aged 49 years. He was formerly connected with the New York and Washington press, and had attained prominence in his profession.

Nov. 6.—LEE, MRS. MARY CUSTIS, widow of the late General Robert E. Lee, and daughter of G. W. P. Custis; died at Lexington, Va., aged 67 years. She was born at Arlington House, and was the great-granddaughter of Martha Custis, afterward wife of General Washington. Mrs. Lee was a woman of strong intellectual powers, and persistently favored the Confederate cause. She was in Richmond during the war, and, when the contest was over, accompanied her husband to Lexington, where she resided until her death.

Nov. 12.—MERRIAM, General ELA, New York militia; died in Leyden, Lewis County, N. Y., aged 79 years. He was born in Connecticut, in 1794, and a few years later removed with his father's family to the town of Leyden. At eighteen years of age he served with the State militia in the defense of the Northern frontier, and, remaining in the service, rapidly rose to the rank of brigadier-general. For about forty years preceding the era of railways, General Merriam was prominently connected with the stage-routes of Northern New York, and since with its railways. Amid his other enterprises he was also a practical farmer, managing a large estate with an enlightenment which kept pace with the latest improvements. He was one of the originators and prominent supporters of the County Agricultural Society, and a regular attendant at the meetings of the State Society, which he served in many official positions.

Nov. 13.—FRY, Captain JOSEPH, of the steamer *Virginius*; was executed by the Spanish Volunteers, at Santiago de Cuba. He was a son of Major Fry, of the U. S. Army, was educated at the Naval Academy, and was appointed a midshipman in the navy in 1841, and, after studying at Annapolis a year, was graduated a passed-midshipman. In 1847 he fought a duel with Midshipman Brown, of Mississippi, near Washington, but, after drawing his antagonist's fire, generously refused to return it. He served for twenty years in the U. S. Navy, but, when his native State seceded, he threw up his lieutenant's commission, and accepted a command in the Confederate army. After the war he resided in Albany. He was appointed to the command of the *Virginius* a few months previous to his death.

Nov. 16.—PERRY, Captain MATTHEW C., U. S. Navy; died in New York City. He was a nephew of the famous Commodore Perry, and was born in New York about the year 1820. He received his first appointment in 1835, serving in the first three years of his naval career as an officer of the frigate *Potomac*, attached to the Mediterranean Squadron. He served also in the Mexican War, and was in active service during the civil war. In April, 1862, he was retired on the rank of lieutenant, and in 1867 received the commission of captain.

Nov. 17.—MELLON, WILLIAM P., Special Treasury Agent under Secretary Chase; died in Cincinnati, aged 60 years. He was a native of Dunkirk, N. Y., studied law in the office of Salmon P. Chase, and entered upon the practice of his profession with much credit to his scholarship, but subsequently turned his attention to the development of the coal-fields of Western Virginia and Eastern Kentucky. When Mr. Chase became Secretary of the Treasury, he tendered to Mr. Mellon the position of Supervising Special Agent, and, throughout the war, the latter was one of the Secretary's most efficient political supporters. After retiring from public life, he entered business in New York, but, proving unsuccessful, had removed to Colorado, where the later years of his life were spent.

Nov. 18.—HUGHES, Rev. MELANCTHON, a Presbyterian clergyman and missionary; died at Santa Fé, New Mexico. He graduated from Miami University and Princeton Theological Seminary, and for a time was settled at Atlantic, Iowa. At the time of his death he was pastor of a Presbyterian church in Santa Fé.

Nov. 18.—STANTON, Mrs. EDWIN M., widow of the late Secretary of War; died at Chestnut Hill, near Philadelphia. She was a native of Pittsburg, and was there married to Mr. Stanton, at that time a prosperous lawyer.

Nov. 19.—BLACK, JOHN, an American diplomatist; died in Albany, aged 81 years. He was forty years a resident of the city of Mexico, where he was a long time consul, and afterward minister resident, holding the latter office during the Mexican War.

Nov. 19.—MOSELEY, WILLIAM ABBOTT, M. D., a political leader of Western New York; died in New York City. He graduated from Yale College in 1816; was a member of the New York Assembly in 1835; of the State Senate from 1838 to 1841; and a Representative in Congress from 1848 to 1847.

Nov. 20.—LINEN, JAMES, a popular poet of Scottish birth; died in New York City, aged 65 years. He spent many years in California, where he was a prominent and active member of the Scottish Benevolent Society. He was a frequent contributor to the *Knickerbocker Magazine*. The greater part of his poems were written in the Scottish dialect, and some of his earlier pieces were popular in the drawing-room circles of New York, his verse being pure, sweet, and simple.

Nov. 22.—CURTIS, NATHANIEL, father-in-law of Mr. Mixter, an eminent merchant of Boston; was lost on the *Ville du Havre*, aged 76 years. He graduated from Harvard in 1818, and afterward entered into partnership with his father in commerce and real estate, continuing in active business up to the time of his death. Having recently lost his wife, his deep depression induced him to yield to the entreaties of his son-in-law and daughter, and take a trip to Europe for the purpose of changing the current of his thoughts.

Nov. 22.—HUNTER, Captain CHARLES, U. S. Navy; was lost on the *Ville du Havre*, in mid-ocean, aged about 60 years. He was a son of John Hunter, minister to Brazil, and brother of William Hunter, Assistant Secretary of State. He was born in Newport, R. I.; entered the United States Navy as midshipman in April, 1831, and was assigned to the frigate *Potomac* of the Pacific Squadron, on which he served until 1834. He was then transferred to the frigate *Constitution* of the Mediterranean Squadron, and served on her during 1835 and 1836. Returning, he was assigned to the navy-yard in this city, and remained there during 1837. In June of that year he was promoted to be passed-midshipman, and was soon afterward transferred to the receiving-ship at the Philadelphia Navy-Yard, and served on her for the succeeding three years. He was commissioned lieutenant September 8, 1841, while serving on the sloop *Concord* of the Brazil Squadron. He was subsequently transferred to the sloop *Saratoga* of the same squadron, and served on her in 1845 and 1846, and on the brig *Bainbridge* of the same squadron in 1846 and 1847. In 1850 he was assigned to the sloop *Albany*, of the Home Squadron, and served on her for a little more than a year. He was on shore duty until 1855, and then retired at his own request. At the outbreak of the civil war he offered his services to the Government, and was commissioned commander on April 21, 1861, and assigned to the command of the steamer *Montgomery*, attached to the Gulf Blockading Squadron. In 1862, while in command of the *Montgom-*

ery, he chased a British blockade-runner into Cuban waters and fired on her. The matter was investigated, and Commander Hunter was placed on the retired list. In 1866, by act of Congress, he was promoted to be captain on the retired list, since which he had resided in Newport and its vicinity.

Nov. 22.—**MIXTER, CHARLES**, an eminent Boston merchant and railroad-builder; was lost with his wife on the *Ville du Havre*, aged 65 years. In 1843 he retired from a large commission business, and had resided for some years abroad. After a short visit to this country, they were returning to their foreign home upon the ill-fated steamer.

Nov. 23.—**SIGOURNEY, HENRY**, an eminent manufacturer of Boston; was lost on the *Ville du Havre*, aged 42 years. He graduated from Harvard University in 1851. He was a director in the Laconia and Pepperell Manufacturing Companies, and also in the Lowell Railroad Corporation.

Nov. 24.—**HITCHCOCK, SAMUEL A.**, a wealthy and philanthropic citizen of Brimfield, Mass.; died there, aged 89 years. He had been the architect of his own fortune, coming up from small beginnings and a humble position, but commenced his course of generosity when his property was much less than it ultimately became. After his retirement from business his gifts became increasingly large each year. At his death his property amounted to about \$3,000,000, and he left no will. His gifts to benevolent objects before his death comprise his endowment of the Hitchcock Free High School in his native town with \$80,000; donations to Amherst College aggregating \$175,000, \$100,000 being presented last year; contributions to the fund of the Andover Theological Seminary, \$120,000; \$50,000 to the Illinois College at Jacksonville, Ill., and \$8,000 to Tabor (Iowa) College. Mr. Hitchcock also gave to the church at Brimfield \$5,000 as a fund, and within a year, \$40,000 toward the Congregational house in Boston. The full extent of his benefactions is believed to reach \$650,000.

Nov. 27.—**NEWELL, Miss LUCY LANGDON**, a member of the Shaker community; died at Alfred, Me., aged 97 years. She was born July 4, 1776, the birthday of the republic, and was to have been a prominent figure in the Centennial Celebration at Philadelphia. She is supposed to have been the last of the children of Independence day and year.

Nov. 28.—**McKEENE, JAMES, M. D.**, an eminent physician in Topsham, Me.; died there, aged 76 years. He was a member of the medical profession fifty years, and held a professorship in Bowdoin College fourteen years.

Nov. 28.—**MORRIS, JOHN M.**, an eminent journalist; died in Washington, D. C., aged 37 years. He was a native of Connecticut, and was once editor of the *Charleston Republican*, and later of the *Washington Chronicle*. At the time of his death he was the Executive Clerk of the United States Senate.

Nov. 29.—**REDFIELD, P. M. W., M. D.**, a professor in the New York City Normal College; died in Harlem, N. Y.

Nov. 30.—**GEHBARD, LEWIS P., M. D.**, an eminent physician and medical writer of Philadelphia; died there, aged 83 years. He graduated from the University of Pennsylvania, with the class of 1813, and from that time had been in continuous practice of his profession, having first opened an office in Troy. In 1816 he removed to Philadelphia, and from that time identified himself with the benevolent enterprises of the day, among which was the formation of a colonization society, of which he was a member. He was the leader and promoter in establishing the first temperance society in Pennsylvania; the place of meeting being his parlor, and the number consisting of three—a chairman, secretary, and treasurer—who resolved themselves into an executive committee of three. As the oldest practitioner in Philadelphia, he was regarded with great esteem by the faculty, and only a few weeks previous to his death, attended a medical consultation in the interior of New Jersey.

Nov. 30.—**ROCKWELL, WILLIAM H., M. D.**, Superintendent of the Asylum for the Insane at Brattleboro, Vt.; died there, aged 74 years. He was one of the oldest superintendents in the country, and had a high reputation in the treatment of the insane for many years, but within the last two or three years there had been much complaint of his management.

Nov. —.—**SMITH, STEPHEN**, a colored citizen of Germantown, Pa.; died there. He was born a slave, but purchased his own freedom in his nineteenth year, and eventually acquired a handsome fortune, which he used with great liberality for the benefit of his race. He was a preacher in the Methodist Church, and built, at his own expense, the "Zion Methodist Church of Philadelphia."

Nov. —.—**HYDE, HENRY H.**, a veteran life-insurance agent and underwriter of Boston; died there, aged 70 years. He was of Puritan stock and New England birth. For twenty-five years he was an agent of the Mutual Life Insurance, ten of which he spent in traveling from State to State, insuring people in some cases almost against their own will—his natural eloquence and magnetic power rendering him almost resistless. For the last fifteen years he had been the General Agent of the Mutual Life Insurance at Boston.

Nov. —.—**FORSTALL, EDMOND J.**, a banker and sugar-planter of Louisiana; died there. For twenty-five years he represented the house of Baring Brothers of London, in New Orleans. He was twenty years a member of the Louisiana Legislature, and expended large sums in advancing the art of sugar-making. Mr. Forstall was an authority upon finance, and a man of general information.

Nov. —.—**HEYER, Rev. O. T.**, a Lutheran clergyman and missionary; died at the Luther-

an Theological Seminary in Philadelphia, aged 81 years. He was born in Helmstadt, Germany, but came to the United States when yet a youth, studied theology, and in 1820 supplied the pulpits of St. Michael's and Zion's German Lutheran Churches in Philadelphia. His early ministry, however, was chiefly spent in organizing churches in Western Pennsylvania, and subsequently he entered the foreign missionary field in India, and founded the Lutheran mission among the Telogoos under the direction of the General Synod. The chief labors of his life were devoted to foreign missions, and he visited the East Indies three times during the prosecution of his work, and returned from there in 1872. Since that time he had been chaplain of the Theological Seminary in Philadelphia, and was in remarkably good health, for a man of his advanced age and arduous labors, until within a few days of his death.

Dec. 4.—JONES, SYBIL, a popular preacher of the Society of Friends, died at China, Me. She was the wife of Eli Jones, also a minister of that denomination, and was a woman of great eloquence and culture, having traveled extensively in Europe, Asia, and Africa.

Dec. 7.—ADAMS, SETH, a manufacturer, and one of the inventors of the Adams printing-press, died in Newton, Mass. He had been for several years associated with his brother Isaac in the manufacture of printing-presses, and left a very large fortune. His will provides for the establishment of a home or hospital for hypochondriacs, to be built within fifteen miles of Boston.

Dec. 7.—UNDERWOOD, JOHN C., Judge of the United States District Court of Virginia; died in Washington, D. C. He was born at Litchfield, Herkimer County, N. Y., in 1808. For some years he was a resident of Clarke County, Va., where he was engaged in farming, and in 1856 was a delegate to the convention which nominated John C. Fremont for President. Being thenceforth proscribed for his political sentiments, and especially for his opposition to slavery, he removed to New York, acting as secretary to a company formed for the purpose of dealing in Southern lands. In 1861 President Lincoln nominated him as consul at Callao, Peru, but he accepted, instead, the office of Fifth Auditor in the Treasury Department, and while there was appointed Judge of the District Court of Virginia. In that position he zealously favored the Union interests by a just interpretation of the law, and braved the hostility of the Confederates by decisions which enlarged the war powers of the Government. He affirmed, early in the war, the right of the Government to confiscate the enemy's property, and also maintained the civic rights of colored citizens. It was in his district that Jefferson Davis was indicted, and it was he who refused, in June, 1866, to admit the prisoner to bail, on the ground that he was in custody of the military authorities. He still presided in May, 1867, when the Confed-

erate leader was released. Judge Underwood was very bitterly assailed because of his zeal in enforcing the Federal laws, and was latterly forced into litigation because of a decree sanctioning confiscation. He was, however, greatly misunderstood by his opponents; for he entertained kindly feelings toward them, and sought, as well as he could, to promote harmony in the South, and to advance her material interests.

Dec. 11.—KLUND, PHILIP J., a German scholar, Principal of the Hoboken Academy, died in that city, aged 62 years. He was expatriated on account of his political opinions. For several years he was professor in the Farmers' College, Cincinnati.

Dec. 11.—VAN BUREN, THOMAS H., M. D., an eminent physician and surgeon of New York city; died there.

Dec. 15.—DENT, Colonel FREDERICK F., father-in-law of President Grant, died at Washington, D. C., aged 87 years. He was born in Cumberland, Md., in 1786, entered into business as a merchant in Pittsburg, and subsequently in St. Louis, where he accumulated considerable wealth. He purchased a large farm a few miles from the city limits as a country residence, and was widely known for his hospitality. He was a rigid Democrat, and never, even in his later years, had any sympathy with the Republican party.

Dec. 15.—LOINES, JONAS P., M. D., an eminent physician of New York; died at Mount Vernon, Westchester County, N. Y. He was vaccine physician to the Eastern Dispensary, and also to the New York Quarantine Station, for several years. At the latter he vaccinated upward of 860,000 immigrants, and he also furnished vaccine virus from the arms of 40,000 children. The success attending his specialty entitled him to be named the Jenner of America.

Dec. 16.—PARKER, JOHN MASON, an American jurist; died at Owego, N. Y., aged 68 years. He was born at Granville, Washington County, N. Y., in 1805; graduated from Middlebury College, Vt., in 1825; studied law, and was a Representative in Congress from 1855 to 1859, serving on the Committees on Public Expenditures and Revolutionary Pensions. In 1859 he was elected Judge of the Supreme Court of New York, for the Sixth District, and was renominated, his term of office not expiring until 1875.

Dec. 18.—EDWARDS, WELDON N., a politician and political leader of North Carolina; died in Warren County, N. C., aged 85 years. He was born in Northampton County, N. C., in 1788, educated at Warrenton Academy, studied law, and was admitted to the bar in 1810. He was a member of Congress from that State from 1816 to 1827; a member of the North Carolina State Constitutional Convention in 1835; was in the North Carolina Assembly from 1833 to 1844; President of the State Assembly in 1850, and of the Secession Convention in 1861.

Dec. 20.—**GOULD, Mrs. GEORGE**, formerly a missionary and teacher of the A. B. C. F. M., at Mt. Lebanon, Syria; died at Jamaica Plain, near Boston. She was Corresponding Secretary of the Women's Board of Missions, having been associated with that body since its organization as one of its most earnest and efficient workers.

Dec. 22.—**AGASSIZ, Mrs. ALEXANDER**, daughter-in-law of the late Professor Agassiz; died in Cambridge, Mass., of pneumonia, superinduced by fatigue in her unceasing attentions at the time of his death. She was the granddaughter of the late Robert G. Shaw, of Boston, and was a lady of remarkable worth and culture, greatly beloved by a wide social and literary circle.

Dec. 22.—**HARRIS, WILLIAM**, for many years a leading fur dealer in Baltimore, Md.; died there, at the age of 92 years. He came to this country from Russia sixty years ago; became connected with the Hudson Bay Company, and was an intimate friend of John Jacob Astor, of New York, and Pierre Choteau, Jr., of St. Louis.

Dec. 22.—**REMOND, CHARLES LENOX**, a famous antislavery reformer; died at Reading, Mass. He was of African descent, and highly educated. He visited the great Antislavery Convention in England in 1840, and remained abroad as a lecturer for two years.

Dec. 24.—**JONES, SAMUEL T.**, a lawyer of Brooklyn, United States Commissioner, and Clerk of United States Circuit and District Courts; died in Brooklyn, aged 89 years. He was born in Wilton, Fairfield County, Conn., and at the age of eighteen went to New York and studied law with his brother.

Dec. 24.—**McINDOE, LYMAN J.**, publisher and proprietor of the *Vermont Chronicle*; died at Rutland, Vt. He had long been connected with that paper, which was the organ of the Congregationalists of Northern New England, and was greatly esteemed by all who knew him.

Dec. 25.—**RUNNELS, ex-Governor Harrison R.**; died in Bowie County, Miss. He was a native of Mississippi, but in 1841 removed to Texas, and until the war was a large cotton-planter on Red River. He early became connected with the political history of Texas, serving eight years in the Legislature, during the last of which he was Speaker of the House. In 1855 he was elected Lieutenant-Governor. In 1857 he was elected Governor of the State by a large majority over Sam Houston.

Dec. 26.—**TELLER, Colonel DANIEL W.**, a wealthy merchant of New York; died in that city. He caused surveys to be made, at his own expense, for a canal across the Isthmus of Darien.

Dec. 27.—**PATTEN, WILLIAM S.**, a banker of Providence, R. I.; died there, aged 78 years. He was a native of Newport, and a son of Rev. William Patten, D. D., for nearly fifty years pastor of a Congregationalist Church in Providence. He graduated at Brown Univer-

sity in 1818, studied law, and entered upon the practice of his profession in Newport, and subsequently removed to Providence. In November, 1831, he became cashier of the Manufacturers' Bank, which position he held for a period of more than forty-two years. After the organization of the city government, he served for several years as a member of the Common Council, and was twice president of that body. He was also, for three years, a member of the General Assembly, of the Lower House of which he was Speaker in 1847-48. He was one of the founders of the Providence Athenæum, and for thirty years was actively connected with the administration of its affairs, holding the position of vice-president of its corporation for nine years, and of president for fourteen years. In 1856 he became a trustee of Brown University, and since 1867 had been Chancellor of that institution.

Dec. 30.—**BAYLOR, Rev. R. E. B.**, a Baptist clergyman of Texas, and subsequently, for more than thirty years, a political leader; died at Gay Hill, Texas. He was a Representative in Congress from Alabama from 1829 to 1831. He was the founder of Baylor University, Texas.

Dec. —.—**GRIMKE, SARAH**, an eloquent and influential advocate of antislavery principles; died at Englewood, N. J. She was a daughter of Chief-Justice Grimke, of South Carolina, and a member of the Society of Friends. Becoming convinced of the social and moral evils of slavery, she, together with her sister, Angelina, emancipated their slaves, and came North to lecture upon slavery. Both sisters were well educated and highly accomplished, while their purity of character and deep-toned piety gave them great influence in their public course. They were ready writers, and, while lecturing through the Northern States, wrote for the press on slavery and woman's rights. Sarah was the author of a book reviewing the Bible arguments, which some of the clergy were using to prove that the degradation of the slave and woman were alike in harmony with the expressed will of God.

Dec. —.—**WHIPPLE, INDEPENDENCE**, a venerable citizen of Uxbridge, Mass; died there, aged 96 years. He was noticed, when a child, by Washington.

OBITUARIES, FOREIGN. Jan. 1.—**KRAUT, Prof. WILHELM THEODOR, Ph. D.**, a German jurist and publicist; died at Göttingen, aged 78 years. He was born at Lüneburg, in March, 1800, educated at the Universities of Göttingen and Berlin, where he studied law under Hugo, Eichorn, and Savigny. In 1825 he became instructor in the College of Justice, at Göttingen, adjunct professor in 1828, and full professor of German law in 1836, in the university. From 1850 to 1863 he sat in the Hanoverian Senate, as representative of the university. He was moderately liberal in his political opinions, but did not, like some of his brother professors, fall under the displeasure of the Government. In 1837, however, he

felt it his duty to protest against the deprivation of seven of the professors of the university, of their positions in consequence of their political opinions. Prof. Kraut had published numerous essays and dissertations on legal subjects, but the following are his ablest works: "Plan of a Course of Private German Law, comprising also Feudal Law," 1830, 8d edit., 1845; "The Instructor in the Principles of German Law," 2 vols., 1845-'47; and "The Ancient Municipal Law of Luneburg," 1845.

Jan 9.—HANNAY, JAMES, a Scottish novelist and man of letters, for some years past her Majesty's consul at Barcelona, Spain; died there, aged 46 years. He was born at Dumfries, Scotland, in 1827, and entered the Royal Navy at the age of thirteen. After serving in various ships till the autumn of 1845, he left the navy, and devoted his attention entirely to literature, contributing to many journals and periodicals, from *Punch* to the quarterly reviews. Mr. Hannay was the author of "Singleton Fontenoy," published in 1850; of "Sketches in Ultra-Marine," in 1853; and of another novel, "Eustace Conyera," in 1857, which has been translated into German. In the summer of 1858 he delivered in London a series of lectures on "Satire and Satirists." At the general election in May, 1857, he was a candidate for the Dumfries burghs, which his father had twice contested, and was defeated by the former member, Mr. William Ewart. He published, in 1861, his contributions to the *Quarterly*. Mr. Hannay became editor of the *Edinburgh Courant* in 1860, but resigned in 1864, and subsequently published "A Course of English Literature," 1866, and a family history, called "Three Hundred Years of a Norman House. The Barons of Germany, from the Tenth to the Thirteenth Century," 1867. In July, 1868, he was appointed her Majesty's consul at Barcelona, and continued in that post till his death.

Jan. 10.—DALL' ONGARO, FRANCESCO, an Italian poet, dramatist, and revolutionist; died at Naples, aged 65 years. He was born at Odezzo in Venetia, in 1803, was educated in Odezzo and Padua for the priesthood, and entered into holy orders about 1830. But he was too independent and too much in earnest to suit his superiors, and he was forbidden to preach. He then removed to Trieste, renounced his ecclesiastical functions, and devoted himself to journalism and the promotion of education. He was for many years the editor of the *Favilla*, a literary and political journal at Trieste, and with Cragliero founded the first Philotechnic Society west of the Adriatic. Busy as he was, he yet found time to write three dramas, which were successful. In 1847, he was driven from Trieste by the Austro-Venetian Government for an address which he delivered at the banquet to Richard Cobden, and which was considered too radical. He next traveled leisurely through the Italian cities, everywhere sowing the seeds of

the revolution which followed, and at this time composed his famous hymn "Return of the Tricolor," which, next to the "Marseillaise," contributed to fire the hearts of the young republicans of Southern Europe. The Pope, who early in 1848 was professedly in favor of reform, proposed to Dall' Ongaro to take the direction of the *Official Gazette* of Rome, but he declined, and soon went to Venice and put himself at the head of the revolutionary movement there, which he aided powerfully by his journal to which he had given the significant title, of "Deeds, not Words" (*Fatti e no Parole*). He participated with Garibaldi in the revolutionary movements and the fighting which followed, was a member of the Roman Constitutional Assembly, editor of the *Roman Monitor*, and reduced Ancona to quietness and order. After the siege of Rome he escaped to Switzerland, whence he was expelled in February, 1852, after the Milan insurrection, and settled in Belgium, where he supported himself for four years by his lectures and conferences on Dante and his works. In 1856 he came to Paris, was employed editorially on the *Courrier de Paris*, the *Revue Nationale* and the *Opinion Nationale*, and was on the point of being expelled from France as a countryman of Orsini, but was warned in time. He returned to Italy in 1859, and as correspondent of *La Patrie* was suspected and at first banished by Ricasoli, who, however, on explanation, revoked his decree, and created for him at Florence a professorship of Ancient and Modern Dramatic Literature. Here he remained till the removal of the capital to Rome. Signor Dall' Ongaro had been through life a prolific writer both in prose and poetry. All his writings give evidence of a patriotic and liberal spirit. His "Scenes of Italian Life" passed through many editions, as did his "Dramatic and Lyric Fantasies." His "Popular Chants" (*Stornelli Italiani*) were widely circulated and excited a powerful influence in Italy. His other principal works were numerous dramas, a part of them collected into two volumes, with the title "Il Fornaretto, etc.;" a classic comedy, after Menander, entitled "Fasma;" two volumes of poems, published in Trieste; "The History of the Devil," a Dantesque study; "Chants in the Venetian Dialect;" "Poems of Spring-time;" numerous biographies, and many uncollected essays and librettos. He was one of Italy's purest patriots.

Jan. 11.—MACAFFEE, REV. DANIEL, an eloquent Irish Wesleyan minister; died in London, aged about 83 years. His reputation as a preacher, theologian, and logician, stood very high. He was well known in Belfast and Londonderry, where he labored successfully, as he did during a long life in other parts of Ireland. He was a faithful minister, an eloquent preacher, an able writer, and in politics a sound Conservative, the friend and colleague of Dr. Cooke. His great work in the cause of

Protestantism was his contest, many years since, with O'Connell, and it was provoked by some observations about the Wesleyans, which Macaffee at once challenged and refuted. Almost worn out in the ministry, the deceased retired, and spent the last few years in London, occasionally appearing in public, and to the last proving himself an able advocate of a common Protestantism in the churches of the Reformation.

Jan. 18.—MAURO, DOMINICO, an Italian poet and patriot; died at Florence, of cancer.

Jan. 27.—OTWAY, Lady —, the widow of the late General Sir Loftus Otway, C. B., colonel of the eighty-fourth Regiment of Foot; died in London. Lady Otway was a Plantagenet, a lineal descendant from Edward III.

Jan. 31.—ROSE, Ven. Henry John, Archdeacon of Bedford, and an author and editor of distinction; died in Bedford, England, aged 73 years. He was a brother of the late Rev. Hugh James Rose, Principal of King's College, London, graduated from St. John's College, Cambridge, as fourteenth wrangler in 1821, became Fellow of his college in 1824, was Hulsean Lecturer in 1833, rector of the college living of Houghton Conquest, Bedfordshire, in 1837, Archdeacon of Bedford in 1866. He was editor of the "Encyclopædia Metropolitana" from 1839, and of the first volume of the biographical dictionary that bears his name. He also edited with Rev. J. W. Burgon a series of Scripture engravings with accompanying letter-press, and translated Neander's "Ecclesiastical History of the First Three Centuries." Among his original contributions to theological literature, were: "Ecclesiastical History from 1700 to 1858," 1858; Hulsean Lectures on "The Law of Moses viewed in Connection with the History and Character of the Jews;" "An Answer to the Case of the Dissenters," 1834; and one of the essays in the "Replies to Essays and Reviews."

Jan. —.—ARNAL, ETIENNE, a French comic actor, born at Melun (Seine-et-Oise), February 1, 1794; died at Geneva, aged 79 years. In 1808 he became a cadet of the Imperial Guard, and in 1814 took part in the defense of Paris. At the commencement of the Restoration he entered the theatre and played tragic parts, but soon after, understanding better his real vocation, turned to comedy. He remained some time at the Variétés, and left it for the Vaudeville in 1827, where he obtained a great vogue, particularly in "Mlle. Marguerite, M. Galochard," "Le Mari de la Dame de Cœur," "L'Humoriste," "Les Gants Jaunes," "Le Poltron," "L'Homme Blasé," etc. From the Vaudeville he passed to the Gymnase, went back to the Vaudeville, then returned to the Variétés, and at length engaged himself at the Palais Royal, where he remained until 1864. Arnal was a poet of considerable merit. He was the author of an "Épître à Bouffe" (1840), "Boutades en Vers" (1861), "Les Gendarmes," etc.

Jan. —.—BLAGDEN, Miss ISA, an English novelist and essayist; died in Florence. Her principal novels were, "Agnes Tremorne;" "The Woman I loved and the Woman who loved Me;" "The Cost of a Secret;" "The Crown of a Life;" and many brilliant novellettes in *Fraser*, the *Cornhill*, and *All the Year Round*. Her greatest claim to grateful remembrance, however, is her warm friendship for the Brownings, and the tender affection with which she watched over Mrs. Barrett Browning in her last illness. She performed also the same loving office for Theodosia Trollope.

Feb. 3.—HUNTER, JOHN KELSO, a Scottish author and artist; died at Pollokshields, near Glasgow. His "Retrospect of an Artist's Life" attracted some attention a few years since.

Feb. 4.—GARMENCIA, DON FRANCISCO, the second Vice-President of the Republic of Peru; died at Placentia, Italy. He was one of the ablest of the Peruvian statesmen, and his death was greatly lamented by the Peruvian people.

Feb. 7.—LE FANU, JOSEPH SHERIDAN, an Irish novelist; died in Dublin, aged 59 years. Mr. Le Fanu was best known here by his "Uncle Silas," a book full of ghostly horrors, and several other novels of less merit, but of a similarly sensational character. He was a poet and essayist, as well as a novelist, though his productions in these walks of literature have not been reproduced here. A novel of his, "Willing to Die," was running as a serial in *All the Year Round* at the time of his death.

Feb. 10.—BOWERS, Very Rev. GEORGE HULL, D. D., Dean of Manchester, an English clergyman, author, and zealous educator; died in Manchester, aged 78 years. He was educated at the Grammar-School, Pembroke, and Clare College, Cambridge, whence he graduated B. D. in 1829, and D. D. in 1849. Having been perpetual curate of Elstow, Bedfordshire, from 1819 to 1832, and Select Preacher to the University of Cambridge in 1830, he was presented by the late Duke of Bedford to the rectory of St. Paul's, Covent Garden, London, in 1831, and promoted to the deanery of Manchester in 1847. Dr. Bowers was the author of sermons preached before the University of Cambridge, in Covent Garden Church, and in the cathedral of Manchester, and of a scheme for the formation of schools for the sons of clergymen and others, combining the twofold advantages of efficiency and economy. The publication, in 1842, of this plan, led to the establishment of Marlborough College, of which Dr. Bowers was the founder, conjointly with the late Rev. Charles Eaton Plater. He was also chairman of the council of Rossall School, Fleetwood (similar in constitution to Marlborough College), visitor of the Manchester Free Grammar School, and one of the nominators to the Hulme Exhibitions at Brasenose College, Oxford. He was also the originator, in 1862, of Haileybury College

(late East-India College) on the plan of the colleges of Marlborough and Rossall.

Feb. 12.—BLACKIE, JOHN, JR., a member of the eminent publishing-house of Blackie & Sons of London, Edinburgh, and Glasgow; died in Glasgow, aged 67 years. He had been for several years Lord-Provost of Glasgow.

Feb. 17.—OGILVIE, REV. CHARLES ATMORE, D. D., an accomplished clergyman and theological writer of the English Church, and Regius Professor of Pastoral Theology in the University of Oxford since 1842; died at Oxford, aged 80 years. He was born in 1793, graduated from Balliol College, Oxford, as first-class man in Literis Humanioribus in 1815, and obtained the English essay prize in 1817. He was Fellow of Balliol College in 1816, Domestic and Examining Chaplain to the Archbishop of Canterbury, and Bampton Lecturer in 1836; Rector and Vicar of Ross, Herefordshire, in 1839; and, as we have already stated, Regius Professor at Oxford in 1842; he was also Canon of Christ Church, Oxford, for some years. He had published "The Divine Glory manifested in the Conduct and Discourses of our Lord," being the Bampton Lectures for 1836; "Considerations on the Subscription of the XXXIX. Articles," 1845; and several sermons preached at Oxford and elsewhere.

Feb. 23.—BARCLAY, REV. THOMAS, D. D., an eminent Scottish linguist, Principal of Glasgow University; died in Glasgow, aged 81 years. His linguistic attainments were remarkable, and his memory of all that he had read or heard exceedingly tenacious.

Feb. 24.—KURTZ or KURZ, HEINRICH, PH. D., a German professor and man of letters; died in Aaran, Switzerland, at the age of 68 years. He was born in Paris, but of German parents, April 28, 1805, lost his father in his childhood, was educated at Leipsic, but just as he was about to receive his degree in 1826, he was so much involved in the movements of the Burschenschaft or political societies of the students that he was compelled to leave the university. He returned to Paris in 1827, and for three years devoted himself to Oriental studies. In the autumn of 1830 he returned to Germany and became one of the editors of the *Augsburg Zeit*, an organ of the constitutional opposition, and after a few months his vigorous editorials led to his arrest and condemnation to two years' imprisonment in the fortress of Wülzburg. He occupied his time there in translating a Chinese poem into German. On his release he passed into Switzerland, where in 1834, he was appointed Professor of the German Language and literature in the Cantonal School of St. Gall. Five years after he was removed because he was a Protestant and a foreigner; but was immediately appointed to a similar professorship in the Cantonal School of Aaran, which he retained till his death. Prof. Kurtz's principal works are: "A History of German Literature," 3 vols., 1851-1864; a

fourth volume was devoted to contemporary German Literature. The work was one of great merit. An abridgment of it by the author, in 1866, has been very popular. "Studies in Literary History," 1846; "Handbook of National Poetry," 3 vols., 1840-'44; "Handbook of German Prose," 3 vols., 1845-'46; "The German Poets and Prose Writers from the middle of the Fifteenth Century to our Own Times," 3 vols., 1864. He also edited a "Library of German Writers of the Eighteenth Century," published from 1862-1869. The fruits of Prof. Kurtz's Oriental studies were seen in his "Memoir upon the Political and Religious Condition of China Twenty-three Hundred Years before our Era," published in Paris in 1830; his recasting of the "Chinese Dictionary of Basil for the Asiatic Society of France;" and his translation of a Chinese poem, "The Petal," published at St. Gall in 1866.

Feb. 24.—XINDAVELONIS, M.—, a Greek courier and general agent of Madame Angelina Bosio, the celebrated singer, who became her husband, after her separation from the Spaniard whom she had married in Copenhagen. Xindavelonis was very patient with the wayward and somewhat imperious singer, and at her death inherited her large fortune, a considerable portion of which he spent in erecting a magnificent mausoleum over her remains.

Feb.—DONOVAN, CORNELIUS, M. D., an eminent Irish physician and phrenologist; died at Lewisham, England, aged 78 years. He was a native of Queenstown, then called "the Cove of Cork," but spent his youth in the city of Cork, where he was educated. He settled in London in 1825, and was attracted by the lectures of Dr. Spurzheim, but did not devote himself to the practical labors of a phrenologist until 1840, after very careful and extended study. Since that time, with the exception of two years passed in study and travel in Canada and the United States, he had been a practical phrenologist for thirty years in London. Like most phrenologists of repute, he adopted, with a few exceptions, the names and localization of the organs propounded by Dr. Gall and afterward amplified by Dr. Spurzheim and Mr. George Combe.

Feb.—SALLES, EUSEBE FRANÇOIS, Count de, M. D., a French Orientalist and author; died at Montpellier, at the age of 76 years. He was born in that city, where he was educated and received his medical degree; came to Paris in 1817, and devoted his whole time to the study of Oriental languages, Arabic, Persian, Turkish, and Hindostani. He was first interpreter in the Expedition to Algiers in 1830. From 1836 to 1865 he was professor of Arabic at Marseilles. He was made a Chevalier of the Legion of Honor in 1843. The Count de Salles had made many and perilous journeys throughout the East to

perfect himself in his researches. He had been for more than forty years one of the ablest as well as one of the most learned of the advocates of the doctrine of the Unity of the Human Race. His principal works were: "A General History of Legal Medicine," for Bogle's "Encyclopædia," 1835; "Ali the Fox, or the Conquest of Algiers," 2 vols., 1832; "Wanderings in the Orient," 2 vols., 1840-1855; "General History of the Human Races; or Philosophic Ethnography," 1851; "Biography of Mazduc, a Persian Reformer," 1840; "New Ideas Concerning the Pyramids," 1845; "Mahomet considered as a Private Citizen, an Artist, and a Politician," 1833; and numerous works of less merit.

March 3.—**HALL, Mrs. MATTHEW**, an accomplished historical writer, the author of "Queens before the Conquest" and some historical works, died in London. She was a kinswoman of the Misses Strickland, and her principal work in connection with Miss Agnes Strickland's "Queens of England," "Queens of Scotland," and "Bachelor Kings of England," forms a continuous history of the royal personages of England from the earliest period.

March 8.—**MADDEX, Sir FREDERIC, K. H., F. R. S., F. S. A., M. R. I. A.**, a distinguished and laborious English antiquarian, for thirty years keeper of the Department of Manuscripts at the British Museum; died in London, aged 73 years. He was born at Portsmouth, England, received a careful private education, assisted Mr. Roscoe in 1825 in cataloguing the Earl of Leicester's manuscripts, in 1826 became an assistant in the Library of the British Museum, was deputy keeper of the manuscripts there as early as 1830, and head of that department from 1837 to his resignation in September, 1866. He was made a Knight of the Hanoverian Order in 1834, and Knight Baronet in 1835. He was appointed one of the Gentlemen of her Majesty's Privy Chamber in November, 1834. His published works, whether edited or original, are very numerous, and nearly all antiquarian in their character. Among them were "The Privy Purse Expenses of the Princess Mary, Daughter of Henry VIII., afterward Queen Mary, with a Memoir of the Princess, and Notes" 1830 (with Rev. Josiah Forshall); the "Wycliffite Versions of the Holy Scriptures," 4 vols. 4to, 1850 (this was the work of twenty-two years); "Havelock the Dane," 1828; "William and the Werewolf," 1832; the old English version of the "Gesta Romanorum," 1838; "Layamon's Brut, or Chronicle of Britain, a poetical semi-Saxon paraphrase of the Brut of Wace," 3 vols. 8vo, 1847; "Syr Garwayne," 1839; the "Historia Anglorum" of Matthew Paris, 1839; "Observations upon the autograph of Shakspeare and the Orthography of his name," 1837; "Documents relating to Perkin Warbeck," 1837; articles in the *Gentleman's Magazine*, the "Archæologia," and "Collectanea Typographica."

March 8.—**THOMSON, ROBERT WILLIAM, C. E.**, a distinguished member of the Royal Institute of Civil Engineers, the inventor of the locomotive traction steam engine; died in London, aged 50 years.

March 9.—**LAMBRUSCHINI, RAPHAEL**, called the Abbé LAMBRUSCHINI, in distinction from his uncle, who was bishop and afterward cardinal, an Italian writer on education; died in Rome, at the age of 85 years. He was born at Gerva, Piedmont, August 14, 1788, received his early education at home, went to Rome in 1805, to study theology, and thence to Orvieto, where his uncle was then bishop. In 1812 he was obliged to emigrate for some time to Corsica. In 1816 he returned to Florence with his family, and in 1817 established himself in a country residence near Figline, where he passed a dozen years in the study of the natural sciences, agriculture and political economy. In 1830 he resolved to devote himself wholly to the promotion of education in Tuscany. For this purpose he founded the *Tuscan Journal of Agriculture*, in 1831 or 1832, the *Teacher's Guide* in 1836, and maintained both till 1844, and subsequently edited the "Transactions of the Academy of Lovers of Husbandry," of which he was a member. His principal pedagogical work is entitled "Concerning Education," 1849; and a companion volume, "A Treatise on Instruction," was published just before his death. Both works are of standard and permanent value. The Abbé Lambruschini, was a member of the National Assembly in 1848, and ranked with the moderate Liberal party. He was for some time one of the editors of *La Patrie*, but as soon as possible returned to his farm and his educational studies.

March 17.—**SALVADOR, JOSEPH**, a Jewish historical and polemical writer; died in Paris, aged 77 years. He was born in Montpellier, France, in 1796, and was descended from one of the Jewish families who were banished from Spain at the end of the fifteenth century. He studied science, philosophy, and medicine, in the university of his native city, and at the age of twenty received his medical degree from the Faculty of Montpellier, before whom he delivered a very able thesis on the application of philosophy to pathology. From Montpellier he migrated almost immediately to Paris, where he devoted himself at once to historical and polemical studies. In 1822 he published his "Law of Moses; or, Religious and Political System of the Hebrews," 1 vol., 8vo, which was well received, but which did not satisfy him, and, six years later, he published a new edition, almost entirely rewritten, and greatly enlarged, in 3 vols., 8vo, with the title "History of the Institutions of Moses and the Hebrew People." This has been repeatedly republished, and in 1862 was again revised and partly rewritten by the author. A portion of it, relating to the trial of Christ, was replied to, very sharply, by the elder Dupin, in his "Jesus before Caiaphas and Pilate," 1829.

M. Salvador's later works were: "Jesus Christ and His Doctrine," 1888, 2 vols., 8vo; "History of the Roman Rule in Judea, and the Destruction of Jerusalem," 1846, 2 vols., 8vo. "Paris, Rome, Jerusalem; or, the Religious Question of the Nineteenth Century," 2 vols., 1859.

March 18.—GIESEBRECHT, LUDWIG, Ph. D., a distinguished German poet and historian; died in Germany in his 81st year.

March 20.—CHURCH, SIR RICHARD, G. O. H., a British officer in the Greek service, and deservedly called the Liberator of Greece; died at Athens at the age of 89 years. He was born in County Cork, Ireland, in 1785, entered the British army in 1800, served at Ferrol, Malta, and in Egypt, and then passed into the service of the King of Naples, and was severely wounded at Capri. In 1811 he raised a Greek corps, and was again seriously wounded at Stelleana. He became lieutenant-colonel in the British Army in 1812, was created C. B. in 1815, knighted in 1822, and made G. O. H. in 1837. Early in the Greek Revolution Sir Richard was appointed by the Greek National Assembly commander-in-chief of the land forces, and at once commenced operations against Athens; but owing to internal dissensions in his army, he was obliged for some time to carry on a guerrilla warfare. After the victory of Navarino, he invaded Acarnania with 5,000 men, and occupied nearly the entire province. In 1828 he compelled Ereschid Pasha to retreat, and the following year made himself master of the Ambracian Gulf, and blockaded and captured Prevesa May 17, 1829. On the conclusion of peace, Capo d'Istria, a Greek political leader, was preferred to Sir Richard as the President of the Republic, and Sir Richard retired to Argos, and lived in seclusion, having sent in his resignation to the National Assembly. After the assassination of Capo d'Istria, in 1831, he was again called to the command of the army, and for a time was a terror to the politicians of Athens. After the coronation of Otho, he was appointed a Councillor of State, and subsequently a member of the Senate, in the deliberations of which he continued to take an active part. He was the author of but one work: "Observations on an Eligible Line of Frontier for Greece," London, 1840.

March 27.—GUICCIOLI, TERESA GAMBA, Countess, a notorious, but in early life very brilliant and beautiful Italian woman, the daughter of a Romagnese nobleman, and married to a wealthy but aged Italian count, whom she forsook to become the mistress of Lord Byron; died in Rome, aged 72 years. She had married the Count Guiccioli at the age of seventeen, just after coming out of a convent, and when, a year later, she met the poet, she was in the zenith of her beauty, highly accomplished, and like many of her countrywomen, extremely indiscreet. Both parties were averse to an introduction, which was

brought about by the Countess Benzoni, at Venice, in the spring of 1819; but, once introduced to each other, they met every day, and Count Guiccioli being banished from the Tuscan states, whither they had removed, Lord Byron took the countess, and her brothers, the Counts Gamba, under his protection; first at Pisa, and afterward at Genoa. This *liaison* continued till 1823, when Byron went to Greece, whither the Counts Gamba followed him, but the countess did not. In 1851 she was married to the Marquis de Boissy, a wealthy but eccentric French nobleman, and senator, who died in 1866. In 1869 she published a narrative entitled "My Recollections of Lord Byron, and those of Eye-witnesses of his Life," a very dull book, provoked, possibly, by Mrs. Stowe's "True Story of Lady Byron." The countess manifested no consciousness of any immorality in her relations with Lord Byron.

March 28.—BELL, General Sir WILLIAM, K. O. B., a brave and veteran officer of the British Army, colonel-commandant of the Royal Artillery; died in London, aged 84 years. He entered the army, in the Thirty-fourth regiment, in March, 1811, and served under the Duke of Wellington in almost every battle in the Peninsula, until the termination of the war there, in 1814. He was afterward for some years with his regiment in Ceylon and the East Indies, and was an active participant in the first Burmese War in 1826. In 1837-'38 he was in Canada, and was actively employed during the rebellion there; while in Canada he was brevetted major-general. He subsequently served in Gibraltar, Nova Scotia, the West Indies, the Mediterranean, Turkey, and in the Crimean campaign of 1854-'55, where he commanded the Royal Artillery in the battles of the Alma and Inkerman, and was wounded at the siege of Sevastopol. He had been connected with the Royal Artillery regiment for more than thirty years (besides long previous service in the Thirty-fourth and Forty-fifth regiments, where he was appointed, in October, 1863, colonel of the One hundred and fourth regiment—Bengal Fusiliers). (The colonelcy of British regiments is an honorary appointment given to officers of high rank, the lieutenant-colonel being the real commander. Nearly all the generals, lieutenant-generals, and most of the major-generals, in the British Army, are colonels of some regiment.) From this regiment he was transferred in 1867 to the Thirty-second regiment, and subsequently reappointed to his old corps, the Royal Artillery. General Bell had received numerous war medals, with clasps indicative of the severe battles in which he had been engaged, as well as orders of merit from his own and foreign courts. He published in 1867 "Rough Notes by an Old Soldier during Fifty Years' Service," a very interesting collection of reminiscences.

March —.—HAUGHTON JAMES, an Irish merchant and reformer, associated with Buxton.

and Wilberforce in his antislavery labors, with O'Connell in the repeal agitation, and with Father Matthew in the promotion of Temperance; died in Dublin, aged 84.

March —.—**PAULOVNA**, the Grand-duchess **HELENE**, widow of the late Grand-duke Michael Romanoff, brother of the late Czar Nicholas; died in St. Petersburg, aged about 73. She was a daughter of Prince Paul, of Wurtemberg, and married the grand-duke in 1824.

April 5.—**BLASNAVATZ**, **MILIVOJ PETROVITCH**, a Servian general and statesman; died in Belgrade, aged 47 years. He was born in the Servian village of Blasnavatz, in 1826, and entered the Servian army at an early age, where he so greatly distinguished himself for brilliant military qualities that he was promoted to a captaincy before he was twenty-two years old. In 1849, as a reward for his gallant conduct in the Hungarian expedition, he received the rank of major. When peace was declared, he devoted himself to the study of military science, in all its departments; studying the art of war, and political economy, at Vienna and Paris, artillery and ordnance tactics at Metz, and the manufacture of arms and military machines in Belgium. On his return to Servia, Prince Michael, then Hospodar of Servia, called him to the ministry of War and Public Works, where his knowledge of military affairs made him invaluable. He created military establishments upon the plan of those of the great powers, and organized a militia force of 70,000 or 80,000 men to be, like the Prussian *Landwehr*, a reserve force to the regular army. On the assassination of Prince Michael in 1868, M. Blasnavatz displayed great energy and sound judgment; he established himself permanently at the palace, and by his wise and decisive action preserved order at a time when the peace of Europe was threatened, and eventually succeeded in procuring the arrest and punishment of the assassin. When the young prince Milan Obrenovitch, a cousin of Prince Michael, and but fourteen years of age, was proclaimed Hospodar, or reigning prince of Servia, the Skupohina, or National Assembly of Servia, elected Blasnavatz and two other members of the Council, regents of the young prince during his minority.

April 9.—**COLLINS**, **CHARLES AUSTIN**, an English painter and novelist, son of the late William Collins, R. A., a celebrated English painter of rustic scenes, and brother of W. Wilkie Collins; died in London, aged 45 years. He was educated at private schools, and from his twentieth to his thirtieth year was engaged in the study and practice of painting, in which he attained considerable reputation. From 1858 to his death, Mr. Collins devoted his attention almost exclusively to literary pursuits, being a regular contributor to *All the Year Round*, edited for some years by his father-in-law, the late Charles Dickens; and also to the *Cornhill Magazine*. Mr. Collins also published "A Cruise upon Wheels," 1862; "The

Bar Sinister," 1864; "Strathcainr," 1864; "At the Bar," 1866; and several other serials.

April 13.—**FOX**, General **CHARLES RICHARD**, Receiver-General of the Duchy of Lancaster, late M. P. and Surveyor-General of Ordnance, a British officer of distinction and an eminent numismatist, died in London, aged 77 years. He was born in 1796, and was the natural son of the third Lord Holland, his mother being Lady Webster, who in 1797 became Lady Holland. He was well educated and served in the navy from 1809 to 1813, taking part in some of the naval battles of the Peninsula; entered the Eighty-fifth regiment in 1815, and was for several years aide-de-camp of Gen. Sir F. Adams at Cortu. In 1824 he married Miss Mary Fitzclarence, one of the natural daughters of King William IV. He commanded the Thirty-fourth regiment in Canada in 1828-'27, and was subsequently aide-de-camp to King William IV. and Queen Victoria. He was a member of Parliament for many years, sitting successively for Colne, Tavistock, Strand, and the Tower Hamlets, and when the Whigs came into power was appointed Surveyor-General of the Ordnance. He was an extensive traveler, having visited repeatedly all the countries of Europe, much of the East, South Africa and British America, and he was a careful and judicious observer, taking full notes of what he saw. He was from early life enthusiastically devoted to the study of ancient coins, and was said to have the finest private collection of them in Great Britain. He published in 1856-'62, a finely-illustrated work entitled, "Engravings of Unedited and Rare Greek Coins, with Descriptions." He had been for some years Receiver-General of the Revenues of the Duchy of Lancaster, the Queen's private domain.

April 14.—**LYNCH**, Captain **HENRY BLOSSE**, C. B., F. R. G. S., of the late Indian Navy, a distinguished British naval officer and explorer; died in Paris, aged about 75 years. He was of Irish stock, born in Castlecarra, County Mayo, entered the navy in 1823, and was employed on the surveys of the Persian Gulf. Here he very soon acquired such thorough command of the Arabic and Persian languages that soon after receiving his commission as lieutenant (about 1825) he was appointed Arabic and Persian interpreter to the squadron, and was largely employed and trusted by Her Majesty's envoy in Persia in conducting negotiations with the independent Arab chiefs, and in examining the means of communication between the gulf and the adjacent countries. In 1832 he crossed the Nubian Desert on the northern limit of Abyssinia to the Nile and Egypt, after a perilous shipwreck in the Red Sea. In 1834 he was second in command in Chesney's expedition to the Euphrates, and subsequently assigned by the Indian Government to the command of an armed flotilla on the rivers of Mesopotamia; and he was engaged for several years in exploring those

ivers; in 1842 he was in command of a squadron off the Indus, charged to keep up communication with Sir Charles Napier in Scinde. From that period to 1851 he was second in command to the admiral-in-chief of the Indian navy, and a part of the time acting-chief himself. In 1851-'53 he was engaged in naval operations on the Irrawadi in connection with the Burmese War, and in 1853 created a Companion of the Order of the Bath for his services. In 1854 he took up his residence in Paris, where he rendered valuable services in concluding a treaty of peace with Persia. During all these years he constantly contributed to geographical science, both in his official reports and in his numerous memoirs and maps communicated to the Geographical Society.

April 18.—LAFONT, PIERRE CHERI, a distinguished French actor, who had been on the stage for fifty years; died in Paris, aged 72 years. He was born in Bordeaux, and educated as a physician and surgeon, in which capacity he entered the navy and made two voyages to the Indies. In 1822 he abandoned his profession, and, after some months' study with Doyen, was engaged near the close of that year at the Vaudeville. After ten years of successful playing there, he passed to the Novelty Theatre in 1832, and several years later was a leading actor in comedy in the London theatres. On his return to France he went back to the Vaudeville, which being burned soon after, he engaged at the Varieties in 1839, where he developed great abilities in the creation of the parts assigned to him. In May 1855 he returned to the New Vaudeville, where he continued to act with great success till 1859, when he appeared at the Gymnasium, and won great applause till his death. His last great successes were in "Rabagas" and "Le Centenaire."

April 19.—HARRIS, AUGUSTUS, stage-manager of the Italian Opera in London; died in that city, in the 47th year of his age. He was a native of Naples, born June 12, 1826. He first appeared on the stage, at the London Princess's, in 1842, as a light comedian, and this theatre he leased and managed from the fall of 1859 to the fall of 1862. For twenty-seven seasons he was connected with the Italian Opera as stage-director.

April 20.—JONES, HENRY BENGE, M. D., F. R. S., F. C. S., an eminent English physician and medical writer; died in London, aged 59 years. He was born in Lowestoft in 1814, educated at Harrow, and Trinity College, Cambridge, whence he graduated B. A. in 1836, and M. A. in 1840. He began to study medicine in London in 1836, and in 1846 was elected Physician to St. George's Hospital. Amid the cares and duties of a large practice he found time to write several medical treatises of standard reputation, and to prepare scientific papers of great value for the Philosophical Transactions of the Royal Society, Liebig's *Annalen*, *Annales de Chimie*, and the Transactions of the

Medico-Chirurgical Society and of the Chemical Society. Dr. Jones was elected a Fellow of the Royal Society in 1846. He was also Fellow of the Chemical and Vice-President of the Medico-Chirurgical Society, Foreign Member of the *Société de Biologie* of Paris, and Hon. Secretary of the Royal Institution of Great Britain. His principal published works were: "Application of Liebig's Physiology to the Cure of Gravel, Calculus, and Gout," 8vo., 1843; "On Animal Chemistry in its Relation to Stomach and Renal Diseases," 8vo., 1850; Dr. Dubois-Reymond's "Animal Electricity," edited by H. Bence Jones, M. D., small 8vo. He had also edited, with many additions, "Towne's Chemistry;" "Liebig and Kopp's Annual Report of the Progress of Chemistry," and G. J. Mulder's "Chemistry of Wine," 1857. Among his later works were: "The Life and Letters of Faraday," 2 vols., 1869, and "The Royal Institution: its Founder and its First Professors," 1871.

April 22.—TAGLIONI, MARIA, Countess des Voisins, a celebrated opera-dancer; died in Venice, aged 69 years. She was born in 1804, at Stockholm, where her father, an Italian, was ballet-master. Her mother was a daughter of Karsten, the eminent Swedish tragedian. Mlle. Taglioni was taught dancing by her father, and from 1822 to 1826 danced in theatres at Vienna, Stuttgart, and Munich. She appeared on the stage in Paris from 1827 to 1832, and the exquisite, airy style of her performance was greatly admired. She performed in "La Bayadère" in Berlin in 1832, and became so famous that she was offered more engagements in the European capitals than she could fulfill. In 1832 she married Count Gilbert des Voisins, and continued in public until 1847, when, having amassed great wealth, she retired to Italy, where she had magnificent residences in Venice and on Lake Como.

April 24.—LYELL, Lady MARY, wife of Sir Charles Lyell, and the accomplished partner in his travels and studies; died in London, aged 64 years. She was the eldest daughter of the late Leonard Horner, Esq., and was married to Sir Charles, then Mr. Lyell, in 1832. Like Lady Murchison, she had been an active and competent helper to her husband in his geological studies and explorations.

April 29.—MENZEL, WOLFGANG, a German critic and author, born at Waldenberg, Silesia, June 21, 1798; died at Stuttgart, aged 75 years. He commenced his studies in the University of Breslau, but interrupted them to enter the army as a volunteer in 1815. After the conclusion of peace, he continued his studies at Jena, which for political reasons he quitted in 1820, and took refuge in Switzerland, where he obtained a professorship in the municipal school of Aarau. He returned to Germany in 1824, and after a short residence in Heidelberg fixed himself at Stuttgart, which was his home for the remainder of his life. For some years he took an active part in politics in the King-

dom of Württemberg, advocating a moderate constitutional government. As a critic, he first made his appearance in 1823, with a work entitled "Streeckverse," marked by new and ingenious views of art and literature, and at the same time was one of the founders of a literary and critical journal, the *Literaturblatt*, which violently attacked the old German school, the disciples of Goethe, and even Goethe himself. This book, like his "History of the Germans," published in 1824-'25, conceived in a satirical point of view, created many enemies. "German Literature," a very remarkable work which provoked much controversy, and has been twice translated into English, appeared in 1829. After the Revolution of 1840, he directed his attacks against French influence, which then began to make its way into Germany. In 1849 he gave up the editorship of the *Literaturblatt* to sit as a deputy in the States Convention of Württemberg, and in 1852 by a complete summersault, avowed himself an adherent to the reactionary party. In addition to the afore-mentioned works, Menzel, who has distinguished himself as a poet and historian, has written "The Spirit of History," published in 1835; "Mythological Inquiries," in 1843; "The History of Europe, from 1798 to 1815," in 1853; "Farora," an historical romance, presenting an animated picture of the period of the Thirty Years' War; "History of Nature in a Christian Point of View," 1856; "Prussia in 1854," 1854; "The Songs of the People," 1851; "Prussia and Austria in 1866," 1866. In 1869 he published an interesting work on the most important events which had occurred between the conclusion of the Italian War in 1859 and the outbreak of the war in Germany in 1866.

May 2.—ARROWSMITH, JOHN, F. R. G. S., F. R. A. S., the last of a family of eminent geographers and map-makers, one of the founders of the Royal Geographical Society; died in Hereford Square, London, aged 83 years. He was born at Winston, in the southern part of the county of Durham, April 23, 1790. His early education was imperfect, but he more than made up for this by careful subsequent study. In 1810 he came to London to join his uncle, Aaron Arrowsmith, who was the most eminent map-maker of that day, and remained with him until his death in 1823, when Aaron Arrowsmith's sons continuing the business, John set up for himself; and in 1834, after twelve years of severe toil and great frugality, published his London atlas. This was a great advance on any thing which had preceded it, but he subsequently greatly improved it and reengraved almost every map. He produced most of the valuable maps published in the *Journal of the Royal Geographical Society*; studying with intense care and interest the narratives and drawings of the explorers in all regions. He had probably a more thorough knowledge of the actual extent of discoveries in Australia than any other man living; and

was also very thoroughly posted in Arctic, Asiatic, and African geography. Till he retired from active business in 1861 no maps in Europe surpassed in accuracy, fullness, or beauty, those of John Arrowsmith. He did not lose his interest in geography till his death; and among his last work was a series of elaborate maps of the Australian colonies, left unfinished, because there was not the necessary information to perfect them.

May 12.—CAUMONT, ARCEISSE DE, a French archaeologist, author, and President of the *Société pour la Conservation des Monuments*; died at Magny in Normandy, aged 71 years. He was born at Bayeux (Calvados), August 28, 1802, and inheriting a large property he devoted his time and his superior natural abilities to the study of the natural sciences and of archaeology. He founded the Linnæan Society of Normandy, the Society for the Preservation of Objects of Art, and those scientific congresses which, since 1833, have held their annual sessions year by year in the larger cities of France. No man in France had done so much to encourage historical and archaeological research and the love of Christian art throughout the provinces as he. The sessions of the congresses in the different cities awakened a spirit of emulation and a desire to develop all the circumstances of their early history. M. de Caumont was an officer of the Legion of Honor. His principal published works were: "A Course of Lectures on Monumental Antiquities, delivered at Caen in 1830;" "History of Art in the West of France, from the Earliest Times to the Seventeenth Century," 6 vols. 8vo., 1831-'40 (this admirable work caused his election as corresponding member of the Academy of Inscriptions and Belles-Lettres); "A Brief History of Religious, Military, and Civil Architecture in the Middle Ages," 8vo., 30 plates, 1837; "The Alphabet; or, Rudiments of Archaeology, 1850;" "The Monumental Statistics of Calvados," 3 vols., 1847-'53. He had also been a regular contributor, and much of the time editor of the *Bulletin Monumental*, the *Journal de l'Institut des Provinces*, and the "Normandy Year Books."

May 12.—COCCEIA, CARLO, an eminent Italian musical composer; died at Milan, aged 84 years. He was born at Naples, in April, 1789. His father, a distinguished violinist, wished to educate him as an architect, but his taste for music was so strong that he was finally allowed to follow his inclination. He had at first but indifferent training, but finally entered the Conservatory, and was a pupil of Paisiello. After receiving a thorough course of instruction under this eminent instructor, he was appointed musical director of Joseph Bonaparte, then king. Between 1808 and 1840 Signor Cocceia produced about sixty operas, all noteworthy for their sweetness and graceful melody. Of these but few retained their popularity; among these few are "Clotilde," "I Solitari," "Semelo," "Il Paritano," etc. In

1828 Signor Coccia removed to London, to become director of music for the Royal Theatre, and there produced his most successful opera, "Maria Stuart." His last published opera appeared in 1846. He left London about 1850, and, after visiting the principal cities of Europe, took up his residence at Palermo, whence some years later he removed to Milan.

May 13.—ROBINSON, THOMAS, D. D., Canon of Rochester, Lord Almoner's Professor of Arabic at Cambridge, and for twenty-four years Master of the Temple; died at Rochester, aged 83 years. He was born at Leicester, where his father was vicar, in 1790; was educated at Rugby and Trinity College, Cambridge, where he won high honors by his scholarship; was for many years in India as chaplain to Bishop Heber, and was subsequently Archdeacon of Madras. On his return to England he became Lord Almoner's Professor of Arabic at Cambridge. He was Rector of Thirfield, Herts, from 1853 till 1861, Master of the Temple from 1845 till 1869, and Canon of Rochester from 1854 till his death. His published works were: "The Last Days of Bishop Heber," 1827; "The Old Testament translated into Persian;" "Several Sermons and Charges delivered in India;" "The Character of St. Paul;" "Sermons before the University of Cambridge," 1840; "The Twin Fallacies of Rome;" "Five Sermons at the Temple," 1851; and "Lectures on the Study of the Oriental Languages."

May 20.—CARTIER, SIR GEORGE ETIENNE, Queen's Counsel, a Canadian statesman and political leader; died in England, in his 59th year. He was born at St. Antoine, on Chambly River, in the Province of Quebec (then Lower Canada), September 6, 1814, and was a collateral descendant of Jacques Cartier, the discoverer of Canada. He was educated at the College of St. Sulpice, Montreal; studied law, and was admitted to the bar in 1835. He soon distinguished himself as a lawyer, was elected to the Canadian Parliament in March, 1848, and offered a seat in the cabinet by Lord Elgin in 1851, and again in 1853; but declined on account of his unwillingness to leave his profession. In 1855, however, he became Provincial Secretary in the ministry, and in 1856 was appointed Attorney-General for Lower Canada. He was prime-minister from August, 1858, to May, 1862. In 1861 he contested Montreal for a seat in the Provincial Parliament with M. Dorian, the opposition candidate, whose previous immense majorities he overcame by a hard struggle. In 1864 he was again offered the premiership of the cabinet, but declined it, though he again accepted the position of Attorney-General for Lower Canada. He was the recognized leader of the French-Canadian Conservative party, and had carried several important measures in its interests. He was one of the delegates to England on the questions of confederation and the Intercolonial Railway in 1865 and 1866. On the formation of the Dominion Government,

in 1867, he was appointed Minister of Militia in the new cabinet, and retained this position till the reconstruction of the cabinet under Lord Dufferin, 1873. He was knighted in 1872.

May 22.—EWING, Rt. Rev. ALEXANDER, D. D., D. O. L., Bishop of Argyll and the Isles; died in Scotland, aged 59 years. He was ordained a priest in 1838, and consecrated Bishop of that small see in 1847. He was a man of fine classic and literary attainments, and had edited, for two or three years past, a monthly periodical called *Present Day Papers*.

June 5.—VITET, LOUIS, a French journalist, publicist, and historian; a member of the Institute of France; a cabinet officer under Louis Philippe; died in Paris, aged 71 years. He was born in Paris, October 18, 1802, and was educated for a teacher. He entered the Normal School in 1819, and, after passing through the prescribed course, taught for a while, but in 1824 launched into journalism as one of the editors of the *Globe*. In 1826 he published an historical drama, entitled "The Barricades," followed, in 1827, by "The States of Blois," and in 1829 by "The Death of Henri III." These were very popular, and were subsequently collected into two volumes, entitled "The League." After the Revolution of July, 1830, M. Vitet, having lost his situation on the *Globe* from its political change, received from M. Guizot a situation expressly created for him, that of "Inspector of Historical Monuments." In 1834 he was appointed Secretary-General of Commerce under the ministry of Duchatel; entered the Council of State in 1836, and was Vice-President of the Section of Finance in that body from 1846 to 1848. From 1834 to 1848 he was a deputy in the Legislative Assembly, and one of its most conservative members. He was not an advocate of the Revolution of 1848; but, though he failed of a place in the Constituent Assembly, he was elected to the *Corps Législatif*, and there, at the time of the *coup d'état*, supported parliamentary government so strongly, that he was thenceforth remanded to private life. He was elected a member of the Academy of Inscriptions in 1839, appointed an officer of the Legion of Honor in 1843, and elected to the Institute in 1845 as the successor of Soumet. His principal works, besides those already named, were: "History of the City of Dieppe," 2 vols., 1838; "Eustache Lesueur," an art-study, 1843; "A Monograph on the Church of Notre-Dame de Noyon," 1845; "Fragments and Miscellanies," mainly articles of criticism, 2 vols., 1846; "The States of Orleans," 1849; "The Louvre," 1852; "The Royal Academy of Painting and Sculpture," 1861; "Essays, Historical and Literary," 1862; "Studies in the History of Art," 1864; and many articles in the *Revue de Deux Mondes*, and the *Revue Contemporaine*.

June 14.—HOTTEY, JOHN CAMDEN, an enterprising but somewhat notorious publisher of London, who republished American novels very largely, altering them, without notice to

the authors, to suit his ideas, and often announcing anonymous books of inferior merit, as by popular authors; died in London.

June 21.—JAMESON, WILLIAM, M. D., an eminent English botanist and scientist, who had been for many years engaged in the study of South American botany; died at Quito, from exposure to the heat and over-fatigue in climbing Mount Chimborazo.

June 21.—SMITH, TYLER, M. D., an eminent English physician and medical writer; died at Richmond, England. His works on parturition and other topics were the result of careful and protracted observation and research, and were very popular. Most of them have been republished in this country.

June 24.—HUNT, THORNTON LEIGH, an English artist, art-critic, journalist and politician, born in London, September 10, 1810; died in London, aged 68 years. Finding the enforced leisure of the studio wearisome, he at first began to write art criticisms for the London papers; then became political editor successively of the *Constitutional*, the *North Chesire Reformer*, and *Glasgow Argus*, and finally formed a connection with the *Spectator*, which lasted from 1840 to 1860—writing also, meanwhile, for other papers and periodicals. After 1860 he devoted his attention exclusively to political affairs. Mr. Hunt published numerous pamphlets; an historical romance, entitled "The Foster-Brother," the scene of which was laid in Italy, and edited his father's "Antibiography," published in 1850, and his "Correspondence," published in 1862.

July 8.—WINTERHALTER, FRANZ-XAVIER, a celebrated portrait and *genre* painter, born in Baden, in 1806, but long resident in Paris and London; died in London, aged 67 years. He had studied his art at Munich and Rome, spending many years in the latter city. He took up his residence in Paris in 1834, and ever after regarded that city as his home, though making frequent and often protracted excursions to St. Petersburg, Leipzig, Munich, Berlin, Brussels, London, and Madrid. He was in great demand as portrait-painter to royal and princely houses, and had painted, within the past forty years, almost all the crowned heads of Europe. He had made numerous portraits of Queen Victoria, the prince consort, and the young princes and princesses; of Louis Napoleon, the Empress, and the prince imperial; and, earlier, of Louis Philippe, his Queen, and all the members of the house of Orleans, as well as of the imperial family of Russia. He had also painted many fine *genre* pictures, the most noted being "Maternal Love," 1836; "The Deceameron," "The Young Daughter of Arlecina," both in 1838; "Florinda and Roderick the Goth," 1852; "The Empress (of the French), surrounded by her Dames of Honor," etc., etc. He had received at various times the orders of merit of most of the countries of Europe, and many medals. M. Winterhalter belonged to the modern French school

of art, which believes in intensity of color, and in making a strong impression upon the senses by art; but he was, in the accuracy of his drawing, the grace of position, and the vividness and perfection of light and shade, by far the best of the school.

July 13.—MAYORGA JOSÉ MARIA, a Cuban merchant in New York City, one of the most zealous advocates of Cuban independence, and one of the largest contributors to it; died in New York City, aged 55 years. He was born in Havana, in 1818, and, after receiving a good education in the Havana University, established himself in that city in the tobacco-trade. In 1852 he came to New York, and represented several prominent tobacco-manufacturers of Cuba. Having acquired a fortune in his business, he retired from it, and engaged in dealing in real estate. He was minister of the Cuban Republic to the United States in 1871, and at his death treasurer of the Cuban fund. He was one of the founders of the Spanish Roman Catholic Church of Santiago in West Twenty-second Street, New York.

July 18.—SALOMONS, SIR DAVID, Bart., M. P., Alderman of London, and former High-Sheriff of London and Middlesex, and of Kent, and Lord-Mayor of London in 1855-'56; died in London, aged 76 years. Sir David was a member of a Jewish family of distinction in London for several generations. He was born in 1797, educated in the Jewish faith, and, having been elected High-Sheriff of London and Middlesex in 1835—the first Jew who had ever been elected to that office, an act of Parliament was passed, enabling him to qualify for it. He was elected alderman in 1835, in 1844, and in 1847, the first and second elections having been annulled in consequence of his refusing to subscribe the declaration then required by law, "on the faith of a Christian." He was elected a member of Parliament five times before he was permitted to sit, on similar grounds, but fought the battle against the oaths of abjuration, which were required of every member, with great gallantry, until 1859, when they were so far changed that he was admitted to his seat for Greenwich. This contest was not merely for himself; it opened the way thenceforward for not only Hebrews, but other dissenters, to take seats in the House of Commons. He continued in Parliament to his death. Alderman Salomon was called to the bar at the Middle Temple in 1849, was High-Sheriff of Kent in 1839-'40, and magistrate and Deputy-Lieutenant for Kent, Sussex, and Middlesex. He was created a baronet of the United Kingdom in 1869. He had written several works on "The Currency," "Corn-Laws," "Oaths," "Religious Disabilities," etc.

July 28.—ROSE, GUSTAV, Ph. D., an eminent German chemist and mineralogist; died in Berlin, aged 75 years. He was a younger brother of the famous chemist, Heinrich Rose, and was born in Berlin, March 18, 1798. He was educated in the university of that city,

and took his degree in philosophy in 1821. He studied chemistry chiefly in its application to mineralogy, and, after spending some time with Berzelius at Stockholm, he returned to Berlin, where he was appointed Conservator of the Collection of Minerals in the University, and Assistant-Professor of Mineralogy. In 1829, Humboldt chose Rose and Ehrenberg as his assistants in exploring Northern Asia. Prof. Rose subsequently described the part he took in this expedition in his "Journey to the Ural, Altai, and the Caspian Sea," 2 vols., 1837-'42. In 1839 he received his appointment as full or titular Professor of Mineralogy in the university. Prof. Rose's system of mineralogy was founded on the morphological and chemical character assumed by the minerals in the act of crystallization. His principal works were: "On Feldspar, Albite, Labrador Stone, and Anorthite," 1823; "The System of Quartz-Crystallization," 1846; "Elements of Crystallography," 1828; and "The Mineral Crystallo-Chemical System," 1852.

July 28.—**RINALDI, RINALDO**, a distinguished Italian sculptor, a pupil of Canova, and by him deemed worthy to be his successor; died in Rome.

July 30.—**HAY, Sir JAMES DOUGLAS HAMILTON, Bart.**, a Canadian statesman; died at Ottawa, Canada, aged 78 years.

July —.—**BROOK, CHARLES**, one of the owners of the Meltham Mills, Yorkshire, Eng., where the Brook's spool-cotton is manufactured, a noble and generous philanthropist; died in Meltham. He had been for many years the benefactor and father of his work-people, of whom there were several thousands in his employ. He had erected pleasant and comfortable houses for them at very low rents, had set apart a beautiful park for them, built a dining-hall, concert-room, and swimming-baths for their free use, erected churches, chapels, libraries, and school-houses, sufficient for the accommodation of all, and provided instructors, and had built and endowed at an expense of \$200,000, a convalescent home for invalid, sick, and disabled workmen and their families, in the midst of extensive and pleasant grounds, where they could have the best possible chances for recovery.

Aug. 2.—**ZOUCHE**, Right Hon. **ROBERT CURZON, Baron de LA**, an English peer, diplomatist, and author; died in London, aged 68 years. He was born in 1810, and educated at the Charter-House and Christ Church, Oxford. He was member of Parliament for Clitheroe 1830-1833, and spent some years in the East; was commissioner with Sir F. Williams for defining the boundaries between Turkey and Persia at Erzeroom, and published "Visits to the Monasteries of the Levant," in 1848; and "Armenia, a Year at Erzeroom, and the Frontiers of Russia, Turkey, and Persia," in 1854. He succeeded to the peerage of De la Zouche on the death of his mother in

May, 1870. He was a Knight of the Order of the Lion and Sun of Persia, and of the Nishan of Turkey.

Aug. 12.—**ANSTET, THOMAS CHISHOLM**, an English lawyer, publicist, and jurist; died in London, aged 57 years. He was born in London, in 1816, and educated at University College, London, and was called to the bar at the Middle Temple in 1839. He became an early contributor to the *Dublin Review*, the *Law Magazine*, etc., and took an active part in all political measures affecting the interests of the Roman Catholic body, of which he was a member. In 1841 he published "British Catholics and the New Parliament," followed by "A Guide to the Laws affecting Roman Catholics," "A letter to Lord Cottenham on Petitions of Right," a "Guide to the History of the Laws and Constitution of England, in Six Lectures," etc. In 1847-'52 he represented the Irish borough of Youghal on "liberal" principles, and held the attorney-generalship at Hong-Kong from 1854 to 1858, when he resigned, owing to differences with the Governor and law officers of the colony, and returned to England. He subsequently practised law for some years in Bombay, and for a short period was acting Judge of the High Court of that presidency. On his return to England he was appointed a Revising Barrister in 1868. He went back to India in 1870, but returned to England in a year or two and died in London.

Aug. 18.—**MANDERSTROEM, CHRISTOPH ROGER LUDWIG, Count von**, a Swedish statesman, late Minister of Foreign Affairs for the kingdom of Sweden and Norway; died at Stockholm, aged 67 years. He was born in Stockholm, in 1806. He had been Swedish ambassador to Paris for some years, when, in 1853, the late King Oscar I. recalled him to Sweden to become the Minister of Foreign Affairs in his Government. He retained this position under Charles XV., the successor of Oscar I., and did not resign until June, 1868, when he took the presidency of the College of Commerce. His administration was one of marked ability, and he had taken a noble part in initiating the beneficent reforms and progress which the Swedish kingdom has accomplished since 1860. In addition to his cabinet office, he was Grand-Chamberlain to the King, and had received the decorations of the orders of merit of most of the kingdoms of Europe. Count von Manderstroem had also a considerable reputation as an author. Aside from several very able biographical works, he had written in French and privately printed, and subsequently translated into Swedish, "A collection of hitherto unedited Documents concerning the History of Sweden under the Reign of Gustavus III."

Aug. 22.—**LEFÈVRE, ANDRÉ**, a versatile and successful French writer and poet; died at St. Sebastian, Spain, aged 39 years. He was born at Provins (Seine-et-Marne), November 9, 1834; educated at the College of Sainte-Barbe, and, after devoting many years to various

studies, embarked in 1857 upon a literary career. His first work was "Finances of Champagne in the Thirteenth and Fourteenth Centuries." He was next a large contributor to an encyclopedic work, "History of France, by its Monuments." Meanwhile he was associate editor of two magazines, and contributed two or three long and very fine poems to the *Revue des Deux Mondes*; wrote the text for a collection of photographic views of the valley of the Nile, in 1863; published the "Wonders of Architecture," in 1865; two volumes of poems and poetical translations, in 1865 and 1866; "Parks and Gardens," in 1867; "The Terrestrial Epopee," in 1868; and was meanwhile, from 1864 to 1870, the literary critic of *L'Illustration*.

Aug. 26.—WILHELM, CARL, the composer of the "Wacht am Rhein;" died at Schmalkalden, Germany. He was not a distinguished musician, but in a moment of inspiration he composed this song, which almost immediately became a national air, which roused and still rouses the German enthusiasm to the highest pitch. The Emperor Wilhelm, justly appreciating the merits of this national song, granted its author a pension of 1,000 thalers and decorated him with the Iron Cross. During the Franco-Prussian War, it was taught the infants before they could speak. A statue of Carl Wilhelm has been proposed at Coblenz, at the junction of the Rhine with the Moselle.

Sept. 8.—BEARN, Count AOUL, RENÉ DE, second secretary of the French legation at Washington; died in New York City, of diphtheria, aged 29 years. He was a member of one of the oldest and best families in France, and, though so young, had achieved distinction in the diplomatic service in Mexico, Japan, and Portugal. He was an elegant and accomplished scholar.

Sept. 12.—OBERMIEB, OTTO, M. D., a young physician and medical observer, and writer; died of cholera, in Berlin, aged 31 years. He was one of the most devoted students of his profession who had ever graduated from the University of Berlin, and had already published the result of his observations on the blood in typhus fever, which had given him a high reputation. On the appearance of cholera in Berlin, he was very active in his attendance upon the worst cases, and in his investigations of the causes and development of the pestilence. He at last thought he had discovered the clew to the absolute neutralization of the cholera-poison, and, to make sure of it, resolved to test it on himself. Having obtained some of the deadly choleraic germs, he retired to his room, placed a table with pencil and paper at his bedside, lay down upon his bed, and deliberately inserted some of the poison into a vein in his arm. His supposed cure failed to prove such, and he died seven hours after the insertion of the poison, but with scientific exactness he noted down every symptom, and his observations, until within less than half an hour of his

death. These notes are said to be of the highest value, and possess great importance in regard to the successful treatment of the disease, so that the young hero did not sacrifice his life entirely in vain.

Sept. 14.—DESAIR, M——, a French comedian of considerable note; died at Asnières, near Paris. He possessed some talent as a painter as well as a comedian; but his reputation in comic parts was the result of the immoderate use of stimulants, without which he could not keep up to the extravagant and boisterous gayety required at the Théâtre Bouffes. He was aware of the danger to his health of this practice, and, at his physician's advice, abandoned it for a time, but the theatrical audience complained that he was getting tame, and the poor fellow returned to his stimulants, and presently fell into a decline, which speedily terminated his life.

Sept. 17.—BISMARCK, JOHANNA VON PULT-KAMMER, Princess, wife of the great German chancellor; died at Berlin, aged 49 years. She was the daughter of an old Pomeranian nobleman, and was a neighbor of Bismarck, who in early life was somewhat reckless and dissipated, so much so, that he acquired the sobriquet of "The Mad Bismarck." His affection for her was nevertheless genuine and profound, and was so fully returned that her parents, who opposed the match, were silenced by her firm assurance that she would never marry any one else. The union was one of great happiness, for she gained and held her husband's confidence and love till her death, and was his wise counselor, his judicious and witty correspondent, in his frequent and long absences, and evermore the worthy partner of both his joys and sorrows. She was, moreover, a lady of much benevolence and kindness of heart, and greatly beloved by all who knew her.

Sept. 19.—DONATI, Prof. —, an eminent astronomer, for many years director of the Astronomical Observatory at Florence, and the discoverer, in 1858, of the comet known as "Donati's;" died in Florence.

Sept. 21.—BRIGHT, HENRY, an eminent English water-color painter; died at Ipswich, England, aged 59 years.

Sept. 23.—GUERRAZZI, FRANCISCO DOMINICO, an Italian liberal, and revolutionary leader, dictator at Florence in 1849; died at Rome, aged 68 years. He was born in 1805, educated for the law at the University of Pisa, but did not for some years practise his profession. He devoted himself after leaving the university to writing Byronian poetry, dramas, and historical novels, and to conspiring against the Papal Government. His political activity led to his imprisonment in 1831, in which he beguiled the weary hours by writing novels. In 1838, some years after his release, he adopted the children of his deceased brother, and for several years practised law, with great success, though devoting some attention to literature.

In 1847, the moderate Liberal leaders were in power in Tuscany, and Guerrazzi's advanced republicanism brought upon him their hostility, and led to his arrest and imprisonment in a fortress on the island of Elba. He was released soon afterward, however, and took an active part in the disturbances at Leghorn, where he was leader of the radical party. In the ministry which was formed by Montanelli in 1848 he received a portfolio. He then favored the continuance of the war for independence, and demanded a Constituent Assembly for Italy. Guerrazzi had been active in preventing popular disorders, but the flight of the Grand-duke of Tuscany, which took place later in the year, changed the aspect of affairs. A triumvirate, composed of Guerrazzi, Montanelli, and Manzoni (not the poet and novelist), was appointed by the Chambers. Until the 12th of April, 1849, Guerrazzi was dictator, and had all the responsibility of the revolutionary government in his hands. Owing to these events, the republic was declared at Rome, and many of the Tuscan patriots, including Montanelli, favored the annexation of Tuscany to the Roman states. Guerrazzi opposed this, and so the seeds of dissension sprang up among the revolutionary leaders. The Grand-duke still had many friends among the people. A reactionary movement began at Florence, which put to flight the revolutionary Government, and terminated the dictatorship of Guerrazzi, who was shut up in the fortress of Belvedere. The old Constitution was restored in Florence, and all the other towns of Tuscany followed its example. Guerrazzi was cited before the legal tribunals, and was condemned to perpetual banishment. From that time he devoted himself to literary employment. In 1855 he was allowed to return to Italy. He was elected to the Turin Parliament, where he took his seat among the extreme opposition, and retained sufficient of his old radicalism to make his opposition to the Government very uncomfortable. He was elected again in 1865, and was again conspicuous in the opposition. But his fondness for literary labor continued to the close of his life. His principal works were: a collection of tragedies written in his youth, of which "Priam" is the best known; a collection of poems, which imitated Byron too closely to be very popular. "The Battle of Benevento," an historical romance, which has often been reprinted and translated; "The Siege of Florence," and "Isabelle Orsini," both written during his first imprisonment; "Veronica Cybo;" "The Little Serpent;" and the "New Tartuffes," three novels; a drama, very popular, "I Bianchi e Neri," and a collection of miscellanies, entitled "Writings," all published in 1847; "Beatrice Cenci," an historical novel, 1850; a humorous and political periodical, entitled *The Ass*, conducted in 1856-'58. "Apology for my Life," 1857; a new romance, "Pasquale Paoli," 1865.

Sept. 26.—CHACONNAO, JEAN, a French as-

tronomer; died in Paris, aged 50 years. He was born at Lyons, June 21, 1823, and, after receiving a very profound education in the mathematical and physical sciences, was an assistant at the Observatory of Marseilles, in 1853 and 1854, and in the latter year became astronomer to the Paris Observatory. He discovered between that time and 1870 a very considerable number of asteroids, and in addition to his labors in the observatory became one of the editors of the "Annals of the Observatory," for which he published an "Atlas of Stars," 1858-'63. He was made a Chevalier of the Legion of Honor in 1858.

Sept. 26.—FARRELL, Rt. Rev. JOHN P., D. D., first Bishop of the Roman Catholic Diocese of Hamilton, Ontario, Dominion of Canada; died at Hamilton. He was a native of Kingston, Ontario, and was educated at Montreal. Soon after completing his studies, he was ordained priest, and performed his first duties at L'Original, Ottawa. He was consecrated the first bishop of the new Diocese of Hamilton in 1850. He was very widely esteemed.

Sept. 30.—ARNOLD, Mrs. MARY, widow of the distinguished teacher and historian, Thomas Arnold, of Rugby and Oxford; died at Fox How, Ambleside, aged 83 years. She was a worthy companion of her illustrious husband, both in her thorough intellectual culture and her intense zeal for truth and honor.

Sept. —.—SEGUR, PHILIPPE PAUL, Count DE, a French general and historian, a member of the Institute of France; died in Paris, aged 93 years. Born, in that city, November 4, 1780, of one of the oldest and noblest families of France, he entered the French army as a private in 1799, was Macdonald's aide-de-camp at the battle of Hohenlinden, was for some years on Napoleon's staff, and employed in diplomatic services; attached to the service of King Joseph Bonaparte in 1806, at the siege of Gaeta, was wounded in the Spanish campaigns, and in the Polish and Russian expeditions, was colonel in 1808, brigadier-general in 1810, commanded the Fourth regiment of the Guard of Honor in 1818, and distinguished himself at Rheims in 1814. He was out of favor with the Bourbons, but was promoted to be lieutenant-general and a peer of France under Louis Philippe. He took no public position under Napoleon III. Having passed through the inferior grades, he was made grand cross of the Legion of Honor in April, 1847. In 1850 he was elected to the French Institute as successor to M. de Levis. General Count de Segur published several historical works of great importance. Among these were: "History of Napoleon and the Grand Army during the Year 1812," 2 vols., 1824; "History of Russia and Peter the Great," 1829; "History of Charles VIII. King of France," 1834; "Historical Eulogy on Marshal Lobau," 1839, and many articles on military science.

Oct. 4.—GATTY, Mrs. MARGARET SCOTT,

better known as Mrs. ALFRED GATTY, an English writer and editor, died at Sheffield, Eng., aged 64 years. She was a daughter of Rev. Dr. Scott, chaplain and foreign secretary to Lord Nelson, and was born at Burnham Parsonage, in Essex, in 1809; married to Rev. Alfred Gatty, D. D. in 1839, and in connection with her husband prepared a life of her father in 1842. Her subsequent works were: "The Fairy Godmothers and other Tales," 1851; "Parables from Nature," (five series); "Worlds not realized;" "Proverbs illustrated;" "The Poor Incumbent;" "Legendary Tales;" "Aunt Judy's Tales;" "Aunt Judy's Letters;" "Old Folks from Home;" "The Human Face Divine;" "British Seaweeds from Harvey's 'Phycologia Britannica,'" 1863; "Domestic Pictures and Tales," 1865; "Waifs and Strays in Natural History," 1871. Mrs. Gatty edited *Aunt Judy's Magazine* from May, 1866, to her death. "The Travels and Adventures of Rev. Dr. Wolff, the Jewish Missionary and Explorer," taken down from his dictation, were edited in 1860 by Dr. and Mrs. Gatty.

Oct. 6.—STREZLEBOKI, Sir PAUL EDMUND, Count DE, O. B., K. O. M. G., an Australian explorer; died in Victoria, Australia, aged 77 years. His explorations were mostly conducted in South Australia, where in 1842 he discovered the copper lodes of Burra Burra, and subsequently brought to the notice of Sir R. I. Murchison (in 1846) such specimens of the quartz veins, and so clear an account of their geological position, as led that veteran geologist, from his knowledge of the Ural gold-fields, to predict the existence of gold in large quantities in South Australia.

Oct. 12.—SCHMETTAU, Rev. HERMAN, D. D., Foreign Corresponding Secretary of the British Branch of the Evangelical Alliance; died in London aged 51 years. He was a native of Hanover, and educated there. He was an accomplished scholar, thoroughly acquainted with the various languages of Europe, and possessed pleasing manners and address, and an earnest Christian spirit. In 1856, at the Conference of the Evangelical Alliance in Berlin, he formed the acquaintance of the British delegates, and Sir Oolling Eardley became so much interested in him that he invited him to come to London and take the foreign correspondence of the Alliance. He complied with the invitation, and had conducted the correspondence with great ability for seventeen years.

Oct. 17.—McCLURE, Vice-Admiral Sir ROBERT JOHN LE MEURER, C. B., a British naval officer and arctic explorer; died in London, aged 66 years. He was born in Wexford, Ireland, January 28, 1807, was educated at Eton, and subsequently sent to the military college at Sandhurst, whence he deserted and went to France. He was next placed in the British naval service, served ten years on various stations, and in 1836 accom-

panied Sir George Back on his second expedition to the arctic regions. In 1848 he accompanied Sir James Ross on his voyage in search of Sir John Franklin, and the year following was made commander. In 1850 he left Plymouth in command of the Investigator, which was provisioned for three years and had a complement of sixty-eight men, under orders to pass through Behring's Straits, and thence, if practicable, proceed to Melville Island—an achievement which was not then known to have been accomplished by any vessel. Captain McClure spent nearly four years in the arctic regions, during which he made search for traces of Sir John Franklin, still keeping in view his purpose of reaching the Atlantic from the Pacific Ocean by sailing around the seas which form the northern boundary of this continent. After meeting with great perils, and displaying remarkable fortitude, he succeeded in accomplishing his purpose, and arrived in England in September, 1854. He was treated with marked distinction on his return, received the reward of \$25,000 offered for his discovery, and subsequently was knighted and made vice-admiral.

Oct. 24.—CHACE-CALVERT FREDERICK, M. D., an eminent chemist of Manchester, England; died there, aged 54 years. He received his early education in France, and was appointed assistant-chemist at the Gobelin tapestry-works under his master, Chevreul. In 1846 he was appointed Professor of Chemistry to the Manchester Royal Institution, a position which he held till his death. He had a world-wide reputation as an analytical chemist.

Oct. 27.—HAMILTON, Mrs. JANET THOMPSON, a Scottish rustic and dialect poetess; died at Coatbridge, near Glasgow, aged 77 years. She was born in the parish of Shotts, Lanarkshire, October 12, 1795, married at the age of fifteen, and, though at that time unable to write, composed a few religious pieces when about nineteen years of age. She had not learned to write until she was past fifty, and did not again attempt poetical composition until she was fifty-five. In 1863 she published a volume of "Poems and Songs," in 1868, "Poems and Sketches," and in 1871 a third volume containing some prose as well as poetry. Her later years were passed in blindness. She had never been twenty miles from her home, had never seen a mountain, a waterfall, the sea, or any river except the Clyde. Her education, as we have seen, was very meagre, yet she possessed a large measure of poetic genius, and had written some poems which the world will "not willingly let die." Her poems are mainly on subjects of reform and social progress, and come from the heart. From 1868 to 1873, she received an annual pension of \$250 from the Literary Fund.

Oct. —.—BAHILLET-DESCHAMPS, M., the chief gardener of Paris; died in that city. He had aided M. Haussmann and M. Alphand in beautifying Paris, and was so much esteemed

that he was several times sent for by foreign sovereigns, and was honored with the titles of gardener to the Emperor of Austria, to the King of the Belgians, to Ismail Pasha, etc. His creations in and around Paris are the Bois de Boulogne, the Bois de Vincennes, the Park Monceau, the Buttes Chaumont, etc.

Nov. 8.—**ROSAS**, Don Rios, a distinguished Spanish political leader, a cabinet officer in one of the numerous ministries of Isabella Segunda, and at one time President of the Spanish Cortes; died in Madrid.

Nov. 8.—**DAOUD PASHA**, a Turkish official and statesman, for seven years governor of the Turkish province of Lebanon; died at Biarritz, France, aged 57 years. He was of a United Armenian, or Armenian Catholic family, born in Constantinople in March, 1816, educated at the University of Berlin, where he took the highest honors. After his return to Constantinople, he was for a time employed in a French commercial house at Galata, but soon taken into the employ of the Ottoman Government, and was a member of an embassy sent to Prussia by the Sultan. While thus engaged, he published a work on the Germanic Diet. He was next sent as Turkish consul-general to Vienna, and in that capacity represented the Ottoman Government, in the Commission of the Riverine States of the Danube. Recalled to Constantinople, he was employed in different duties of the interior administration of the Turkish Government, being, in 1857, censor of the press; in 1858, coöperating in the conclusion of a government loan, and, still later, as director of telegraphs, a service in which he made great improvements. In 1861, at the instance of the Commission of the Five Great Powers, Daoud was appointed *Cameican*, or Governor of Lebanon, for three years, and on that occasion was created *Mudir* (an order of merit), and elevated to the rank of a pasha of three tails. His administration was energetic and honest, and, though he had many enemies, seems to have been on the whole satisfactory. In 1864 the Sultan renewed his appointment for five years more, and his sway, though surrounded with difficulties, gradually became more popular, till May, 1868, when he was appointed Governor of Commerce for that portion of the Turkish realm. His health failed in 1873, and he had visited the Spa at Biarritz in hope of benefit, but died there. He was a member of the Berlin Academy of Sciences.

Nov. 8.—**DEMETZ**, **FÉDÉRIC AUGUSTE**, a French philanthropist who, with rare patience and zeal, had devoted nearly forty years of his life to the effectual reformation of juvenile offenders; died at Mettray, near Tours, in the 78th year of his age. He was born May 12, 1796, studied law in Paris, and was admitted to the bar in that city. In 1821, he was appointed puisne judge to the tribunal, and not long after Judge of Instruction, then Vice-President of the Chamber of Correctional Police, and finally, in 1832, Counsellor to the

Court. In 1836 he was sent to the United States, with the architect, A. Blouet, to make further studies of our penitentiary system, on which MM. de Tocqueville and de Beaumont had already reported. His report on this subject was very able. He had already become deeply interested in the condition of discharged convicts, and had written upon the subject of improving their condition; but his later investigations had shown him that great numbers of young persons and children, accused of minor crimes, and acquitted, either because they were innocent, or because they had acted without discernment, were kept in prisons where they were associated with the worst convicts, and taught to become themselves hardened criminals. He felt so deeply for these poor children, that he resolved to resign all his official honors, and devote his life to their rescue. Accordingly, having matured all his plans, and associated with himself an old classmate, M. de Bretignières de Courteilles, he founded, in 1840, at Mettray, near Tours, in the department of Indre-et-Loire, an agricultural reformatory colony. He had, for a year or two preceding, maintained in the same place, a training-school for young teachers, whom he was preparing for his greater work. He began at first with ten children, but before the close of the year he had three hundred; and, putting himself in communication with the judges of the Courts of Assizes all over France, the number of his colonists was subsequently increased to about seven hundred and fifty, at which point it was retained during his life. The children were employed on the farm, instructed in trades, in navigation, etc., and their education, and, above all, their moral training, were carefully attended to. Very few were found incorrigible, and nearly all were thoroughly reclaimed and sent forth as good citizens, a few being retained as teachers and employés. The children manifested the warmest affection for M. Demetz, as well they might. To the very last he kept a zealous, watchful care over the three thousand children who had been sent out from the colony, corresponding with them, and welcoming them back on their visits to the "colony." Many other reformatories were founded in imitation of this, "the glory of France," as Lord Brougham termed it. M. Demetz had written several works on prison discipline, besides his "Reports."

Nov. 14.—**BISCHOFFSHEIM**, **LOUIS RAPHAËL**, a banker of London and Paris; died in the latter city, aged 74 years. His parents were German Jews. He established himself as a banker at Amsterdam in 1820, and, after thirty years of success there, removed to Paris, where he amassed great wealth, and founded a Music Hall, the receipts from which were to be devoted to the poor, but the establishment, through some mismanagement, failed, though it did not involve his banking-house. He had also a private bank in London, and both his houses were concerned in the Erie Railway operations.

Nov. 14.—**NICHOLS, JOHN GOUEN, F. S. A.**, an eminent English genealogist and archaeologist, grandson of John Nichols, the famous author of "Literary Anecdotes," etc.; died in London, aged 67 years. He was born in London, in 1806, educated at Merchant Taylors' School, and, while a printer by profession, devoted himself especially to genealogical and archaeological literature. He was for some years one of the editors of the *Gentleman's Magazine*, and editor-in-chief of the "Collectanea Topographica et Genealogica," of "The Topographer and Genealogist," of "The Herald and Genealogist," and of several volumes of the publications of the Camden Society (of which he was one of the founders); of the Roxburgh Club, and of the Berkshire Ashmolean Society, and had contributed many papers to the "Archæologia" of the Society of Antiquaries, and to the Transactions of three or four other archaeological societies. He had also written the biographies for "Autographs of the Royal, Noble, Learned, and Remarkable Personages in English History," published in 1829, and had published "The Monuments of the Beauchamp Chapel, Warwick," 1833; "London Pageants," 1837; "Description of the Frescoes discovered in the Guild Chapel at Stratford-on-Avon," etc., 1838; "The Pilgrimages of Canterbury and Walsingham, translated from Erasmus," 1849; "A Descriptive Catalogue of the Works of the Camden Society," 1862; "Literary Remains of King Edward VI., with a Biography," 1867; and in 1870 a new edition of Whitaker's "Life of Whalley." He was treasurer of the Surtees Society from 1834 till his death.

Nov. 22.—**CARRASCO, REV. ANTONIO**, an eloquent young Spanish Protestant preacher, a delegate to the Alliance, and, like Prof. Pronier, lost on the Ville du Havre. He was born in 1843, and when about sixteen years old was arrested, and with Manuel Monterey, a friend of his, was condemned to the galleys for life on account of his religious and political sentiments, which were displeasing to Queen Isabella II. and her attendants. At the special request of the English and American Governments, the sentence was commuted to banishment for life. M. Carrasco went to Geneva, and there received his education. After the rule of Isabella was ended in Spain, he returned to Madrid and there established the first Protestant Church which had ever existed in that city, and had been its pastor up to the time of his death. He was a very eloquent speaker, and in the favor of the Castelar Government, by which he had been invited to take part in political affairs and to speak in the Cortes on subjects of special interest. During the sessions of the Evangelical Alliance he read a paper on "Protestant Missions in Spain." After the Alliance adjourned, M. Carrasco visited Washington and Niagara in company with others, and then returned to New York City, where he remained till he sailed.

Nov. 22.—**PRONIER, REV. CÉSAR**, a Professor of Theology in the Evangelical Seminary at Geneva, and a learned and eloquent delegate to the Conference of the Evangelical Alliance in New York City, in October, 1873; lost by the sinking of the Ville du Havre in mid-ocean. He was 42 years of age, and had distinguished himself for learning and ability, and had published several pamphlets and essays on theological subjects. Among these, two were worthy of special notice, viz., "The Ministry of the Word," and "Religious Liberty and the Syllabus." During the session of the Alliance he read a very able paper on "Catholicism in Switzerland," which was published in both reports.

Nov. 23.—**DE LARIVE, AUGUSTE, M. D., F. R. S.**, a Swiss physicist and physician, born in Geneva, October 9, 1801; died in that city, aged 72 years. He was the son of a celebrated physician and chemist, and distinguished himself very early by his chemical experiments and his scientific essays. One of them, written before he was twenty-one years of age, was deemed by Arago and D'Ampère worthy to be inserted in the "Annales de Chimie et de Physique." His investigations upon heat, made in connection with those of Marat, led the way to those of Joule and Tyndall. He was from 1824 Professor of Physics in the Academy of Geneva. From 1830 to 1836 he spent much time abroad, mainly in England, where he was elected a Fellow of the Royal Society, and took an active part in its discussions. From 1836 to 1841 he was engaged in the study of the applications of electricity to metallurgy, and in the editing of the "Bibliothèque Universelle de Genève," in which some of the results of his investigations were recorded. In 1842 he received from the Academy of Sciences the Monthyon prize of 3,000 francs, for his inventions and discoveries in electro-galvanic processes. He was elected, in 1880, a corresponding member of the Institute of France, and subsequently of the different scientific societies of Europe, and in 1864 one of the eight foreign associates of the French Academy of Sciences. Prof. De Larive had published: "Memoirs on Caustics," 1824; "Theory of the Voltaic Pile," 1836; "Archives of Electricity," a collection of essays; "A Treatise on Theoretical and Applied Electricity," in 3 large volumes, 1854-'58; and numerous biographical sketches of his learned associates and co-workers.

Dec. 17.—**HINTON, REV. JOHN HOWARD, M. A.**, an English Baptist clergyman and author; died at Bristol, England, aged 88 years. He was born at Oxford, March 24, 1791, and educated at the University of Edinburgh. Having graduated M. A., he commenced his labors as a Baptist clergyman at Haverford West, whence he removed to Reading, and afterward to London, where he ministered for some years to a large congregation in Devonshire Square, Bishopsgate. He visited the United States in

1830 or 1831, and on his return settled again at Reading, but over another congregation. Of late years he had retired from the pastorate, and resided in Bristol. Mr. Hinton was the author of "Memoirs of William Knibb;" "A History of the United States of America, from their First Discovery and Colonization to 1826; 2 vols., 4to, 100 Maps and Plates," 1832 (in the preparation of this work Mr. Hinton was assisted by several literary gentlemen in Europe and America. It was revised and new editions issued in 1842, 1843, and subsequently); "Theology, or an Attempt toward a Consistent View of the Whole Counsel of God;" "Elements of Natural History;" and numerous essays and pamphlets advocating the voluntary principle in religion and education. A complete edition of his works has been published in seven volumes.

Dec. 20.—BIXIO, Lieutenant-General GIROLAMO, called NINO, a distinguished officer of Marines, soldier and statesman, born at Genoa in 1821; died at Rome in the 53d year of his age. Like his friend Garibaldi, he served in the Sardinian Navy, from which he withdrew in 1844, to command a merchant-ship. Sharing in the political aspirations of the time, he promoted the popular demonstration of 1847 which constrained King Charles Albert to grant a liberal constitution. During the revolutionary movement of 1848-'49 he assisted in the gallant defense of Venice, and commanded the forces at Rome which repelled the first attack of the French troops under General Oudinot. When peace returned the young soldier resumed seafaring life, and met with several perilous adventures while commanding a Genoese ship in the Southern seas. In 1857 he returned to military pursuits, commanding a battalion of Alpine chasseurs under Garibaldi, then took an important part in the expedition to Sicily, fought in the first ranks at Calatafimi, and headed one of the attacking columns at Palermo, where he was wounded. He likewise distinguished himself at the capture of Reggio, and the hard-fought battle of the Volturmo. He attained the rank of lieutenant-general, and on the return of peace entered the Italian Parliament as deputy from Genoa, and used his influence with Garibaldi to moderate that general's hostility to the Cavour ministry. In 1862 he was transferred to the regular army, with the same rank as in the volunteer, and in 1863 was appointed military commander of Alexandria. In 1865 he was reelected deputy, this time in Ancona, and the year following received command of a division of the Italian Army, in view of the approaching war with Austria.

Dec. 22.—SMALLWOOD, CHARLES, M. D., LL. D., a Canadian astronomer and meteorologist; died in Montreal, aged 62 years. He was a native of Birmingham, England, had resided in Canada for twenty-one years, and had been director of the observatory at Montreal since 1865. He had at first settled at St. Martin's,

Ile Jésus, Province of Quebec, and had erected an observatory there. In 1858 McGill College, Toronto, conferred on him the degree of LL. D., and appointed him Professor of Meteorology in that institution, to which was subsequently added the chair of Astronomy. After his appointment to the Montreal Observatory, he continued his meteorological observations, and when our signal-service system was established, arranged to have Montreal, and several other Canadian towns, established as connecting stations with it. Dr. Smallwood was the author of "Contributions to Canadian Meteorology," and of many articles in the scientific periodicals, and the "Smithsonian Reports."

Dec. 26.—HUGO, FRANÇOIS, the second and last surviving son of Victor Hugo; died in Paris, aged 45 years. He was born October 22, 1828, at Paris, studied at the Charlemagne Lyceum, and won university honors. When his father was driven from France, in 1851, he and his brother Charles shared the great poet's exile, and during the succeeding seventeen years François never revisited his native land, although at liberty to do so. During this period he resided principally in Jersey and Germany, devoting his time to literary pursuits. He published in 1857 a history of the island of Jersey, and a French translation of Shakespeare's sonnets, the first made in that language. In the interval from 1860 to 1864 he completed the arduous task of translating into French all Shakespeare's works, which he reclassified and annotated. In 1869 he aided in founding the *Rappel*, the ultra-radical organ of M. Rochefort, and was in active sympathy with the republican movement which at that time so much embarrassed Napoleon III.

Dec. —.—BEAUMONT DE MONTELA, Marquis EMILE DE, a member of one of the noblest of French families; died at the monastery of La Trappe, France. He was formerly ambassador to St. Petersburg, but, abandoning the world and politics, as well as his social rank and position, he entered La Trappe about ten years ago, and had been known there simply as Brother Ambroise till his death.

ODILON-BARROT, CAMILLE HYACINTHE, often called simply BARROT, an eloquent French Liberal advocate and statesman, born at Villefort (Lozère) July 19, 1791; died in Paris, August 6, 1873. His father, J. A. Barrot, was a deputy to the Convention during the French Revolution, and voted against the death of Louis XVI., and subsequently as a member of the Corps Législatif voted against the Empire, and during the entire reign of Napoleon I. maintained his position as a leader in the royalist and Liberal opposition. The son, Odilon Barrot, was worthy of his father. He studied law and was admitted to the bar at the age of nineteen years, and in 1814, though still below the prescribed age (twenty-five years), was appointed advocate to the King's Council and

the Court of Cassation. He resigned his official position, and opposed with all his power the reestablishment of the empire during the Hundred Days. But he found himself disappointed in his hopes from the second restoration, became one of the opposition, and a leader among the Liberals. He was yet very young when he entered the Chamber of Deputies in the reign of Louis XVIII., but had already acquired a high reputation as an eloquent pleader. He was a most active member of the party which brought about the Revolution of July, 1830; and when at one time matters wore so gloomy an aspect that the number of the deputies who countenanced and encouraged the insurrection was reduced to eight, Barrot remained firm, and was one of the three commissioners appointed by the provisional Government to intimate that the crown jewels would be restored to the royal family, on condition of their immediate departure for Orléans. The proposal was accepted, and M. Odilon-Barrot accompanied the King to his embarkation. On his return he was nominated Prefect of the Seine. Under Louis Philippe, M. Odilon-Barrot was among the first to raise his voice in the Chamber of Deputies against a reactionary policy. During a visit to Great Britain in 1839, he frequently expressed his desire that a permanent alliance should subsist between England and France. He was the leader of the agitation in favor of reform, and attended several of the provincial banquets which led to the Revolution of 1848, and the downfall of Louis Philippe. Under the presidency of Louis Napoleon he was for some time a minister, and conducted the Government of France with success until 1851, when he retired from active political life, but occasionally published pamphlets in opposition to the imperial régime. One of these, "Concerning Centralization and its Effects," issued in 1861, had a wide circulation, and produced a powerful impression. In 1864 he temporarily emerged from his retirement, and took part in the public conferences held in Paris in favor of Poland. After the overthrow of the empire in 1870, and the establishment of the Provisional Government, M. Odilon-Barrot, though eighty years of age, still retained enough of the fire of his early years to plead earnestly for a republican government, and against the restoration of the Bourbon rule.

OHIO. The General Assembly met in adjourned session January 2d. Governor Noyes, in his annual message, referred to great increase of local indebtedness and said: "The evil continues and grows upon us, and is not likely to be diminished, until a remedy shall be found in positive prohibitory legal enactments, or in constitutional provisions, absolutely forbidding local public debts. Boards of officers, not always constituted of those best qualified to manage large pecuniary interests, are, under existing laws, intrusted with extraor-

dinary powers, and with a discretion which the Legislature itself would hesitate to exercise directly. Under the construction which our highest State court has given to the constitution, and under laws passed in conformity therewith, the authority of minor political organizations to create debts, if not unlimited, is at least very large and complete." The necessity for codifying and revising the school laws of the State was declared to be most urgent, and the importance of normal instruction particularly dwelt upon. The Agricultural College was commended to the generous attention of the Legislature. The Governor suggested for consideration a change in the criminal law, so as to provide that juries should fix the grade of crime, increasing the number of grades, and that less or no discretion should be left with the courts as to sentence. The valuable aid of the Reform Schools in diminishing the number of convicts sent to the penitentiary was referred to. The General Assembly was requested to cooperate with Congress in making the necessary preparations for the centennial celebration of national independence. Suggestions for improvements in the manner of listing property for taxation, and for making more effective the law for the protection of miners were made.

The General Assembly closed the session and its term of existence May 6th, having during the adjourned session passed 199 laws of a general nature, 122 local and special acts, and 49 joint resolutions. Among the more important general laws passed were a school-law, codifying all the laws relating to the establishment and government of common schools; an act accepting the cession of Virginia military lands to the State, and providing for their sale to increase the funds of the Agricultural College; providing for the holding of a convention to revise the constitution of the State; to give the veto-power to mayors of certain cities; to provide for the establishment and maintenance of public libraries in cities; to extend the time for the completion of the geological survey; to modify and amend the so-called "Boesel Railroad Law;" to prescribe the mode of ratifying by stockholders of propositions to lease railroads. The last-named law is of more than ordinary importance, as its purpose was to put obstacles in the way of absorption of local railroads by lines running through other States. Its immediate occasion was an attempt of the Atlantic & Great Western Railroad Company to secure a lease of the Cleveland, Columbus, Cincinnati & Indianapolis Railroad, which was frustrated by the passage of the act in question. The first section of the act authorizes any railroad company to aid, by subscription or otherwise, any other company for the purpose of forming a connection, when the road to be aided does not form a competing line; or it may lease or purchase any part or all of a connecting railroad under similar con-

ditions; or two connecting lines—when not competing—may make arrangements for their common benefit.

It also provides that no such arrangement, by lease or otherwise, shall be made unless at a regular meeting of the stockholders at least two-thirds of the whole stock of each company shall be voted for it, either in person or by proxy, and that the rental received shall be equal at least to the net earnings of the leased road for the fiscal year next preceding the one in which the lease is made. The second section provides that any stockholder who shall refuse his assent to the lease and give written notice, within sixty days, to the lessees, must be paid, before the consummation of the lease or other arrangement, the average market value of his stock for six months next preceding the day of the ratification of the lease. In case of disagreement as to value, the matter is to be settled by arbitration under the provisions of the law governing arbitrations. Section three also refers to details of arbitration. Section four prohibits the lease of one railroad by another unless the lessor shall be fully secured for the payment of the rental and for the preservation of the leased property in as good condition as when taken into possession. Section five provides that whatever corporation takes any action under this law shall thereafter come under the provisions of the General Railroad Law, and lose all the special privileges and immunities conferred by special charters granted before the adoption of the present constitution.

Among the joint resolutions adopted were three in relation to the law of Congress increasing the compensation of its members. One declared that "those members of Congress who voted for an increase of their own salaries retroactive in effect, and those who voted against such increase, but still accepted this increase are deserving of censure of the people of Ohio;" another set forth that "the action of the last Congress increasing the compensation of the members thereof, the President of the United States, and other officers, was unnecessary, uncalled for, and distasteful to the people of Ohio, and, it is believed, of the whole Union," and the Senators and Representatives from Ohio in Congress were instructed and requested "to zealously use all honorable effort to procure the repeal of said law, so far as it relates to such compensation, at the earliest practicable period;" the third, after reciting the fact that the second article of the twelve amendments to the Constitution of the United States, submitted by the First Congress—which article provided that "no law varying the compensation for the services of the Senators and Representatives shall take effect until an election of Representatives shall have intervened"—had not received the assent of the Legislatures of three-fourths of the several States, and therefore is still pending; declared it ratified on behalf of the State of Ohio.

The people having at the general election in October, 1871, decided in favor of a convention to revise, alter, or amend the constitution of the State, the Legislature in January passed a law ordering the election, on the first Monday in April, of delegates to the Constitutional Convention, prescribing the time for the meeting of the convention, and ordering the submission of the new constitution to the people for ratification. The election was held as directed, and resulted in the choice of 105 delegates, of whom 50 were ranked as Republicans, 46 as Democrats, and 9 as Liberals or Independents. The convention met in Columbus, May 14th, and organized by electing Morrison R. Waite, of Lucas County, on the sixth ballot, president of the convention, the vote standing 55 for Mr. Waite, 37 for Rufus King, and 12 scattering. The occupations of the members as registered were as follows: lawyers 62, farmers 16, merchants 8, physicians 6, editors and printers 3, bankers 3, mechanics 2, ministers 2, manufacturer 1, teacher 1, civil engineer 1. The convention adjourned August 8th, and reassembled at Cincinnati December 2d. At the close of the year they were still in session.

The Legislature in 1872 enacted a law (commonly known as the Boesel Law, from the name of its originator), which authorized counties, cities, incorporated villages, and townships, to build railroads, and to lease and operate the same. Under this law a number of railroad projects started into existence, and nearly ninety counties, townships, cities, and villages, voted to incur bonded debts for their construction. In 1873 bonds were deposited in the State Treasury, to be indorsed and issued to contractors for this purpose to the amount of \$3,541,594, making a total of railroad debt incurred since the passage of the act, April 23, 1872, of \$6,109,644. Of this amount \$148,700 had been indorsed by the State Treasurer and issued. In the mean time suit had been brought by one Martin Kanter, a tax-payer of the Duchouquet township, Auglaize County, to restrain the trustees of the township from issuing \$75,000 of bonds voted to construct a railroad. The suit was carried to the Supreme Court of the State, which on May 13th gave a decision, declaring the law under which the bonds were issued to be unconstitutional and void. The following is a syllabus of the decision, delivered by Chief-Justice White:

1. Taxation can only be authorized for public purposes. Where, therefore, a statute authorizes a county, township, or municipality, to levy taxes not above a given per cent. on the taxable property of the locality for the purpose of building so much of a railroad as can be built for that amount, and the part of a railroad so to be built can be of no public utility unless used to accomplish an unconstitutional purpose, such tax is illegal and cannot be imposed.

2. Section 4, Article VIII. of the constitution declares that "the General Assembly shall never authorize any county, city, town, or township, by vote of its citizens or otherwise, to become a stockholder

in any joint-stock company, corporation, or association whatever; or to raise money for, or loan its credit to, or in aid of, any such company, corporation, or association." What the General Assembly is thus prohibited from doing directly, it has no power to do indirectly.

8. Where public credit or money is furnished by any of the subdivisions of the State named, to be used in part construction of a work, which, under the statute authorizing its construction, must be completed, if completed at all, by other parties out of their own means, who are to own or have the beneficial control and management of the work when completed, the public money or credit thus used can only be regarded as furnished for, or in aid of, such parties.

4. The act of April 22, 1872, to authorize counties, townships, and the municipalities therein named, to build railroads, etc., (69 O. L. 84) authorizes the raising of money by taxation, which is equally applicable to the unlawful purpose of aiding railroad companies, and others engaged in building and operating railroads, as it is to any lawful purpose, and gives to the officers intrusted with the control and application of the money thus raised, no means or power of discrimination as to the lawfulness or unlawfulness of the work or purpose to which it is to be applied, and is thus in contravention of section 6, Article VIII. of the constitution, and therefore void.

The Prohibitionists were first in the field for the political campaign. Their State Convention was held at Delaware, February 12th, when the following ticket was put in nomination: For Governor, G. T. Stewart, Huron County; Lieutenant-Governor, William H. Foster, Franklin County; Board of Public Works, Enos H. Brosius; Judge of Supreme Court, S. E. Adams, Cuyahoga County; Treasurer of State, George Dodds, Greene County; Attorney-General, Alfred H. Mitchell, Belmont County; Auditor of State, Thomas Edmondson, Clarke County.

The platform adopted was as follows:

Resolved, 1. That we reaffirm the platform of principles and measures adopted by the National Prohibition Convention at Columbus, February 22, 1872.

2. That we demand total prohibition of the importation, manufacture, and traffic of intoxicating beverages as high crimes against God and man; and that we will not propose or accept any compromise with either, by license, regulation, or otherwise, for the obvious reason that any compromise with crime is of itself a crime.

3. That the recent more flagrant development of bribery, venality, and abounding corruption in the State and national Legislatures and administrations, demonstrates the necessity of abolishing executive and legislative patronage as to all official appointments, in both State and nation, legislative, judicial, and executive, where it is possible for election by the people; and we especially ask for the election of President and Vice-President, United States Senators, postmasters, and of all Territorial and Federal district and local officers, by direct vote of the people.

4. That one of the most important duties of Government is to protect and foster the interests of our laboring citizens, and to preserve them from the exactions and aggressions of unjust capital; that all proper aid should be given to them in securing homes for their families, not only on the public lands, but throughout the nation; that their homesteads, to a reasonable amount in value, should be made by law inviolate, while they or their families desire to occupy them; that industrial schools, and places of employment should be established; and that the sacrifice of the public lands to railroad and other

monopolies should totally cease, that they may be appropriated in limited portions to actual settlers only.

5. That enforced education of the youth of our State, who by the wrong or neglect of parents and guardians are excluded from the benefits of our free-school system, is demanded by the highest interests of the people.

6. That while it is entirely consistent for parties professing no distinguishing principles or policy, to nominate candidates solely with reference to their availability for election, we regard it as the high and imperative duty of all Prohibitionists to unite zealously in support of every ticket nominated by the Prohibition party, for the reason that it represents great principles, the success of which is far more important than that of men.

7. That we warn Prohibitionists against the suicidal policy of adopting candidates from other party tickets who are not identified with the Prohibition party, merely because they are men of temperate habits and professions, while their efforts and influence are given to parties which are in league with the liquor interest, and who thus practically oppose prohibition.

8. That in closely-contested elections good faith requires, and it is especially incumbent on Prohibitionists, to stand by their own candidates and not sacrifice them to either of the other contestants. That thus only will the power of the organization be seen and felt, and as the sincere and determined purpose of its members becomes manifest, the people will have confidence in them, and they in each other; that perseverance in this policy will soon compel a majority of the voters to support the candidate of the Prohibition party, while a contrary policy will inevitably defeat, and speedily destroy it.

9. That we urge the duty of all Prohibitionists throughout the State, without delay, to form prohibition clubs in every city and township; to thoroughly organize the party by the appointment of district, county, city, and township committees; and to nominate and sustain without compromise at the polls, full tickets of the best and most reliable members of the Prohibition party, at every election, when party lines are drawn, and for every civil office in the gift of the people.

10. That to this end we urge Prohibitionists immediately to issue calls for Prohibition conventions, to be held as early as practicable in every delegate district of the State, to nominate well-qualified candidates of the Prohibition party for the Constitutional Convention, avoiding all entangling alliances with other parties, and standing firmly by the Prohibition cause.

11. That, if the effort to incorporate such a prohibitory section in the constitution should not be successful, we are in favor of the submission of such section as an amendment, to the separate vote of the people, in the form on their ballots, of the words, "Prohibition Yes," or "Prohibition No;" and in case of such submission, the schedule therefor to provide that if approved by a majority of the electors of the State voting thereon, such prohibitory section shall take effect in all the State, but if not so ratified, it shall take effect and be in force in every county, city, township, and ward, wherein a majority of the electors then voting shall have voted in favor thereof, and shall be enforced there by similar legislation; and thereafter, on petition to the Legislature, by a majority of the qualified electors of any county, township, city, or ward, where it has not been so ratified, the said prohibitory section shall again, and as often as so petitioned for, be submitted to the electors thereof, and if approved by a majority of those then and there voting thereon, shall from the time when so ratified, in like manner, take effect and be enforced therein.

12. That we also favor the adoption by the Constitutional Convention of the provision in that article of the constitution defining the elective fran-

chise that every citizen of the United States, of the age of twenty-one years, without distinction of sex, who shall have been a resident of the State one year next preceding the election, and of the county, township, or ward in which he or she resides, such time as may be provided by law, shall have the qualification of an elector and be entitled to vote at all elections; but if the convention should refuse to adopt such a provision, and, on the contrary, should insert words excepting and disqualifying the women of this State from the exercise of this right of suffrage, then we favor the submission of that provision as an amendment to the constitution, to the separate vote of the people, in the form on their ballots, of the words, "Impartial Suffrage, Yes," or "Impartial Suffrage, No;" and in that case of such submission the schedule thereof shall provide that if approved by a majority of the electors of the State, voting thereon, the same shall control the qualification of electors at all elections in the State; but if not so ratified, then the same shall take effect and control the qualification of electors at all local elections in every county, township, city, or incorporated village and ward, wherein a majority of the electors so voting shall have voted in favor of said amendment; and thereafter, on petition to the Legislature by a majority of the qualified electors of any county, township, city, or ward, where said amendment has not been so ratified, the same shall again and as often as so petitioned for, be submitted to the electors thereof, and if approved by a majority of those then and there voting thereon, shall from the time so ratified, in like manner take effect and control the qualifications of electors at all local elections therein.

The Republican State Convention was held at Columbus, May 21st. It was presided over by Hon. James Monroe. The following nominations were made: For Governor, E. F. Noyes, of Hamilton County; Lieutenant-Governor, Alphonso Hart, of Portage County; Supreme Judge, long term, William White, of Clarke County; Supreme Judge, short term, Walter F. Stone, of Erie County; Attorney-General, John Little, of Greene County; Treasurer of State, Isaac Welsh, of Belmont County; Controller of the Treasury, W. T. Wilson, of Portage County; Board of Public Works, Philip V. Herzing, of Anglaize County. Most of these were renominations of those already in office. The following platform was adopted:

The Republican party of Ohio, by its delegates here assembled—

Resolve, 1. That the principles of the party, as heretofore expressed in its conventions, are reaffirmed, and it is declared that events have proved that their practical enforcement is essential to the welfare of the country, and the maintenance of the interests, rights, and liberties of the people.

2. That we reaffirm our confidence in our President, Ulysses S. Grant, and in the wisdom, integrity, and success of the administration of his high office.

3. That there should be rigid economy in the State and national administrations, and that taxes should be continued to be reduced in both as rapidly as consistent with good government, the maintenance of the public credit, and the certain extinguishment of the State and national debts.

4. That the public lands belong to the people, and should be sacredly reserved for homes of actual settlers, and we pronounce against all further grants of these lands to corporations.

5. That adequate provision should be made by law for the protection of persons engaged in mining and other hazardous forms of labor.

6. That the producing, commercial, and industrial

interests of the country should have the best and cheapest modes of transportation possible, and while capital invested in such means of transit, whether by railroad or otherwise, should be permitted the right of a reasonable remuneration, all abuses in their management, excessive rates, oppressive discriminations against localities, persons, or interests, should be corrected by law, and the people protected from such wrongs, and all improper and arbitrary use of the growing power of railroads and other corporations.

7. That we heartily applaud the active measures of the late Congress in ferreting out and exposing corruption, and we have seen with profound regret, in the developments made thereby, evidences of political and official corruption and the abuse of responsible positions by men of all political parties to further personal ends, and we demand pure official conduct, and the punishment of unfaithful public men who, having betrayed the confidence freely extended to them, shall not, by any partisanship of ours, be shielded from the disgrace of their acts; and we denounce all Credit Mobilier transactions, whatever be their form.

8. That when retrenchment is required to lighten the burdens of taxation, and to continue the reduction of the public debt, the increase of salaries is unwise; that we condemn, without reserve, the voting for or receiving increased pay for services already rendered; and we demand that the provisions of the late act of Congress, by which salaries were increased, shall be promptly and unconditionally repealed.

9. That we cordially welcome to our shores the oppressed of all countries, and, remembering with pleasure that adopted citizens have always proved loyal to the flag of the republic, we favor such modification of the naturalization laws as will materially shorten the time of probation before voting.

On the 16th of June a new departure in politics was taken by the Democratic Convention in Allen County, passing resolutions declaring that corruption in political parties had become chronic, and that "both political parties have demonstrated that they are powerless to check or control the existing tendency toward the utter demoralization of the politics of the country." An invitation was given to the people of Ohio, without regard to past political associations, to meet at Columbus in mass convention on the 30th day of July, to take such action as the exigencies of the time demand. In response to that invitation, a convention was held in Columbus, July 30th, which was participated in by Democrats and Liberals. Hon. T. E. Cunningham, of Allen County, called the convention to order, and George E. Pugh presided over the temporary organization. Norton S. Townshend, of Lorain County, was chosen president of the convention. A ticket was put in nomination, as follows: Governor, Isaac C. Collins (Democrat), of Cincinnati; Lieutenant-Governor, A. Saunders Platt (Liberal), of Logan County; Attorney-General, Seraphim Myers (Liberal), of Stark County; Judges of the Supreme Court, P. B. Ewing (Democrat), of Fairfield County, long term; D. C. Loudon (Democrat), of Brown, short term; Board of Public Works, James McBeth (Democrat), of Allen County; Treasurer of State, Jonathan Harshman (Democrat), of Montgomery County; Controller of the Treasury, O. P. L. Butler (Liberal), of

Franklin County. The following platform of principles was adopted:

Resolved, 1. That we declare against the infallibility of party, and that when the caucus or the convention fails to present fit candidates for office, it is the high privilege, as well as the bounden duty of all good citizens, to withhold their votes from such candidates, and, regardless of party affiliations, to support the best men presented for official position.

2. That both the Republican and the Democratic parties have outlived the issues in which they had their origin, and have outlived their usefulness, and a new organization of parties is demanded in the interests of the public welfare.

3. That the Republican party, having control of both branches of Congress and of the Executive Department, is directly responsible for the legislation known as the salary grab, for the squandering of the public lands in grants to private corporations, for the release of railroads from their just obligations to the Government, and other manifestations of corruption, as developed by the Credit Mobilier and other investigations; and that those members of the Democratic party who have aided or acquiesced in such legislation equally deserve public condemnation.

4. That we believe that the fundamental purpose of government is the protection of persons and property, and not the meddling with any regulation of the business industry or consciences of its citizens, nor the assumption of such works by Federal, State, or municipal governments, as may safely, and should properly, be left to individual enterprise.

5. That as corruption can be successfully combated only by the removal or lessening temptations, we are in favor of a resumption of the functions now exercised by the Government, and a consequent diminution of government bureaus and officials, believing, as we do, that a continually increasing army of Federal officers is an evil increasing in danger as the country grows.

6. That grants of subsidies in bonds or money, and of special privileges and exemptions to national banks and other great moneyed corporations, and all fostering of monopolies at the expense of the whole people, are unjust and oppressive.

7. That the practice of electing stockholders and officers of national banks to seats in Congress, whereby the great gains of continued irredeemable paper money are secured to those institutions by the votes of interested parties, is a national scandal, which deserves the condemnation of every good citizen, and ought to be prevented by proper legislation.

8. That we insist upon a strict adherence by the General Government to the constitutional limitations of its power, and we demand home government in all local affairs.

9. We believe that the business of the Government should be transacted upon the same principles that regulate the business of private individuals. We believe, therefore, that the appointment of subordinate officers should depend upon those qualifications, and that their terms should depend upon their fitness and efficiency, and in this respect a return to the practice of the early days of the republic is highly desirable and necessary.

10. That duties on imports, as long as such duties are necessary, should be imposed for purposes of revenue only, and not for the purpose of benefiting or enriching private individuals or companies, or favoring particular branches of industry at the expense of the whole people.

11. That it is the duty of the Government to repeal all laws that favor capital to the prejudice of labor.

The Democratic State Convention was held at Columbus, August 6th, and was presided over by General William H. Ball, of Muskingum County. The nominations were: For Governor, William Allen, of Ross County;

Lieutenant-Governor, Barnabas Burns, of Richland County; Supreme Judge, long term, H. C. Whitman, of Hamilton County; Supreme Judge, short term, C. H. Scribner, of Lucas County; Attorney-General, M. A. Dougherty, of Fairfield County; Treasurer of State, George Weimer, of Summit County; Controller of the Treasury, J. K. Newcomer, of Marion County; Board of Public Works, Chris. Schenck, of Mercer County; The platform adopted was as follows:

Resolved, 1. That the Democratic party seeks to revive no dead issues, but stands by its principles, which are suited to all times and circumstances.

It supports the Federal Government in all its constitutional authority, and opposes nullification and secession.

It defends the reserved rights of the States and of the people, and opposes the centralization that would impair or destroy them.

In order to maintain and preserve these rights, it insists upon a strict construction of the Federal Constitution.

It resists all attempts of one department of the Government to usurp or destroy the constitutional rights or independence of the other departments.

It opposes all interference by law with the private affairs or business of men, not required by the public peace or safety, and advocates the greatest individual liberty consistent with public order.

It believes in the capacity of the people for self-government, and opposes all property qualifications as conditions to the right of suffrage or eligibility to hold office.

It favors liberal laws for the naturalization of foreigners.

It insists upon equal and exact justice to all men.

It opposes all monopolies and denies that it is within the province of Government to legislate for the benefit of particular classes at the expense and to the detriment of the rest of the community.

It therefore opposes a system by which a large portion of the profit-producing wealth of the country is exempted from taxation, and demands that all constitutional means shall be used to remedy this injustice.

It insists that our tariff laws should be framed with a view to revenue, and not to tax the community for the benefit of particular industries.

It recognizes the evils of an irredeemable currency, but insists that in a return to specie payments care shall be taken not to seriously disturb the business of the country, or unjustly injure the debtor class.

It appreciates the benefits conferred by railroads, but opposes all combinations of railroad companies to prevent competition, and thus enhance the cost of transportation.

It opposes all laws that give to capital any advantage over labor.

It requires honesty and economy in every department of Government, Federal or State, and it condemns corruption, whoever may be the guilty parties.

It is in its very nature, and as a necessary result of its principles, a party of progress and supports all measures of reform or improvement that are sanctioned by justice and commended by sound, practical wisdom.

Resolved, 2. That the wealth of a country is the product of its labor, and the best use of capital is that which gives employment and liberal wages to the producing classes. Hence, every just measure that tends to protect them from oppression, to improve their condition and dignify their calling, deserves and receives our sympathy and support, and that we cordially recommend the conservative resolutions adopted at the recent National Labor Congress at Cleveland, favoring arbitration and co-operation.

Resolved, 3. That although always constituting a large majority of the American people, the agriculturists have never demanded of Government, State or Federal, any special privilege; have never infested the halls of Congress or of Legislatures with lobbyists and rings; but, on the contrary, have suffered under discriminating and unjust laws, until forbearance has ceased to be a virtue. We hereby pledge our sincere and honest efforts to obtain them a redress of grievances and equal and exact justice.

Resolved, 4. That the public lands should be sacredly reserved for actual settlers who will dwell upon and cultivate them, and that we will continue to denounce and oppose, as we have always denounced and opposed, all gifts of such lands by the Government to incorporated companies.

Resolved, 5. That the greatest danger to free institutions is the wide-spreading corruption that threatens the utter destruction of public virtue. When Credit Mobilier frauds pass unpunished; when those engaged in them are elevated to high official position; when seats in the Federal Senate are notoriously purchased; when vast sums of money are corruptly employed in popular elections; when an army of office-holders, with the sanction of the Government, use their official influence to control elections; when bribery of custom-house officials is an established usage; when rings of plunderers are recipients of millions of money appropriated for public use; when official defalcations are of such frequent occurrence as scarcely to excite attention; when presidential pardons relieve defaulters from mental punishment, and presidential appointments reward Credit Mobilier and salary-grabbing Congressmen; and when a congressional investigation is generally a whitewashing affair, it is not strange that men begin to lose confidence in free institutions, and that the fame of the great republic is tarnished throughout the civilized world. To remedy these evils we insist that the receipts and expenditures of Government shall be diminished; that its patronage shall be curtailed, and all useless offices abolished; that it shall cease to usurp functions to which it has no title; that official misconduct and fraud and corruption in elections shall be rigorously punished; and that public virtue shall be upheld and the want of it condemned, by the united voice of the people.

Resolved, 6. That we condemn without reserve the late act of Congress, granting additional salaries, as unjust and unjustifiable, and demand its immediate and unconditional repeal. And we denounce every member of Congress, whether Republican or Democrat, who supported the law, or received and retained the money procured thereby. And we especially denounce the conduct of President Grant in using the influence of his high position for its passage, and whose official signature made it a law.

Resolved, 7. That the act of the President, in setting up, by the bayonet, a government in Louisiana, not chosen by her people, and having no title whatever to rule over them, was a flagrant violation of her rights and of the Federal Constitution.

Resolved, 8. That every department of the Government being in the hands of the Republican party, they are justly responsible for the evils and wrongs in legislation and administration of which the country complains.

Resolved, 9. That under the time-honored Democratic banner, with this declaration of principles inscribed on its folds, we engage in the conflict, and we earnestly appeal to patriotic men of every class, without regard to party names or past differences, to unite with us, on terms of perfect equality, in the struggle to rescue the Government from the hands of dishonest men, and redeem it from the flood of corruption which threatens its ruin.

The election was held October 14th, and resulted in the choice of the Democratic candidate, William Allen, as Governor, and the Re-

publican candidates for all the other offices. The official count was as follows:

Governor.

William Allen, Democrat.....	214,654
E. F. Noyes, Republican.....	213,837
G. T. Stewart, Prohibition.....	10,278
Isaac Collins, Fusion.....	10,109

Lieutenant-Governor.

Alphonso Hart, Republican.....	214,228
Barnabus Burns, Democrat.....	213,593
W. H. Foster, Prohibition.....	10,739
A. S. Platt, Fusion.....	10,227

Treasurer of State.

Isaac Welch, Republican.....	213,527
George Weiner, Democrat.....	213,340
George Dadds, Prohibition.....	10,653
J. Harshman, Fusion.....	10,128

Attorney-General.

John Little, Republican.....	213,988
M. A. Dougherty, Democrat.....	213,413
A. H. Mitchell, Prohibition.....	10,649

C. H. Scribner, Democrat.....	213,551
W. Dunbar, Prohibition.....	10,540
D. A. C. Loudon, Fusion.....	10,114

The total vote on Governor was 448,878, being a falling off from the vote on Secretary of State the previous year of 70,777. The Republican falling-off was 51,993, the Democratic 37,126. The Prohibition vote increased 8,233, or was more than quintupled, drawing mostly from the Republicans, while the Fusion vote was chiefly from the Democratic strength of the preceding year.

At the same election a Legislature was chosen, the Democrats obtaining a majority in both branches. The struggle on the legislative candidates was very much confused by local issues, combined with the fact of four independent State tickets being in the field. Several successful candidates ran as independent, and in some counties the tickets were almost inextricably mixed. The general complexion of the result may be thus stated: Senate—Democrats, 21; Republicans, 14; Independent, 1. House—Democrats, 57; Republicans, 45; Independents, 3.

The fiscal year of the State government closes on the 15th of November. The following is a summary of the financial condition of the State at the close of the fiscal year 1873:

On November 15, 1872, the public funded debt of the State was.....	\$8,563,546 37
The redemptions during the year were—	
Loan of 1860.....	\$100 00
Loan of 1870.....	358,784 27
Loan of 1873.....	13,100 00
Loan of 1881.....	500 00

Total..... 372,484 27

Outstanding, November 15, 1873..... \$8,211,062 10

Of the amount outstanding on the 15th of November, the sum of \$64,215 had ceased to draw interest, the holders having been notified to surrender their stock for redemption, so that the interest-bearing funded debt of the State is \$8,146,847. The funded debt is divided as follows:

Foreign debt, payable in New York City...	\$8,209,897 10
Domestic debt, payable in Columbus.....	1,663 00

Total..... \$8,211,062 10

The local indebtedness of the State on September 1, 1873, was as follows:

Net debt of counties.....	\$3,125,537 27
Net debt of townships, including debts created by boards of education other than for separate school districts.....	401,510 18
Net debt of cities (first and second class).....	14,527,108 78
Net debt of incorporated villages.....	730,582 38
Net debt of school districts (special).....	1,248,389 71

Total..... \$30,093,128 32

The amount of reimbursable debt is—

State.....	\$8,211,062 10
Local.....	20,882,129 34

Total..... \$28,244,235 42

Irreducible debt..... 4,070,430 96

Aggregate debts in the State..... \$33,314,666 38

The local indebtedness in this statement is reckoned to September 1, 1873, and the State debt to November 15, 1873.

During the year, the State debt had been reduced \$372,484.27, but the local indebtedness had increased \$2,442,575.35.

The balance in the State Treasury on November 15, 1873, was.....	\$447,588 84
The receipts, including transfers of \$1,676,149.85 for the fiscal year ending November 15, 1873, was.....	6,366,778 06

Total amount of funds in the Treasury for the year..... \$6,814,317 50

The disbursements, including transfers, during the year, have been..... 6,684,731 06

Balance in the Treasury, November 15, 1873, \$129,586 43

The valuations of the property of the State, according to the duplicate of 1873, were as follows:

Real estate in cities, towns, and villages.....	\$342,948,200 00
Real estate not in cities, towns, etc.....	694,815,731 00
Chattel property.....	685,510,708 00

Total taxable valuation for 1873.... \$1,667,374,639 00

Increase from 1873 in the valuation of chattel (personal) property of \$31,351,118 00	
Real estate in cities, towns, and villages.....	12,363,416 00

\$43,614,534 00

Reduction in value of real estate not in cities, towns, and villages, of	603,018 00
--	------------

Total increase over valuation of 1873.... \$43,051,531 00

The taxes levied in 1873 and receivable in 1873, were:

For State purposes.....	\$4,414,537 25
For counties, cities, villages, etc.....	18,834,322 49
Delinquencies and forfeitures.....	561,522 23

Total..... \$23,810,971 97

The taxes levied in 1873 and receivable in 1874 were as follows:

For State purposes.....	\$3,477,850 25
For counties, cities, villages, etc.....	20,653,493 98
Delinquencies and forfeitures.....	343,106 75

Total..... \$26,474,450 98

The statement of the number of charters granted and papers filed under the corporation laws for the year ending November 15, 1873, shows the number granted to be 459, with a net amount of authorized capital of \$91,232,750. Of these 138 were to new manufacturing companies, 32 railroad companies, 17 street railroad companies, 67 building and loan associations, 39 mining companies, 21 savings and loan banks, 20 printing and publishing companies, 20 mutual benefit associations, and 14 associations for building hotels and tenement-houses. The total number of charters issued since the adoption of the constitution in 1851 was 4,060, with an authorized capital stock of \$875,119,613. The county auditors report the following number of corporations doing business in the State under general and special charters: Manufacturing companies, 311; railroad companies, 52; building and loan associations 211; mining companies, 37; turnpike companies, 165; street railroad companies, 25; insurance companies, 61; hotel companies, 3; printing and publishing companies, 26; gas companies, 49; transportation companies, 8; plank-road companies 13; bridge companies, 12; telegraph companies, 3; hydraulic companies 5; savings and loan associations (banks), 21; miscellaneous corporations, 155. Total, 1,148.

The statistics of the agricultural products of the State for each year are collected by the township assessors in the following spring. The grain-crops of 1872 as shown by the assessors' returns were as follows:

Wheat—Acres sown, 1,611,217; bushels produced, 18,087,664; average per acre, 11.22.

Corn—Acres, 2,520,253; bushels, 103,053,284; average, 40.89.

Oats—Acres, 971,494; bushels, 25,825,742; average, 26.58.

Barley—Acres, 72,483; bushels, 1,528,266; average, 21.08.

Rye—Acres, 25,166; bushels; 295,843; average, 11.75.

Buckwheat—Acres, 84,882; bushels 266,807; average, 7.65.

Potatoes—Acres, 105,896; bushels, 7,832,297.

The total average of the grain and potato crops of 1872 is less than that of 1871 by 252,616 acres; and the total production of 1872 is 7,746,097 bushels less than in 1871.

Sweet Potatoes—Acres, 8,026; bushels, 215,023; average, 71.

Hay—Acres, 1,822,887; tons, 1,270,779; average, .96.

Clover Hay and Seed—Acres, 549,557; tons hay, 493,171; bushels seed, 308,903; acres ploughed under for manure, 51,552.

Flax—Acres, 72,078; bushels seed, 457,379; pounds fibre, 9,060,588.

Tobacco—Acres, 46,227 pounds, 34,900,996; average, 755.

Butter and Cheese—Pounds butter, 45,413,086; pounds cheese, 34,408,857.

Sorghum—Acres, 12,932; pounds sugar, 34,599; gallons molasses, 968,180; average gallons per acre, 74.86.

Maple Sugar and Syrup—Pounds sugar, 2,690,011; gallons syrup, 356,320.

Pasturage—Number of acres reported in pasture in Ohio, in 1872, is 4,418,268, being an increase over 1871 of 175,872 acres.

Uncultivated Lands—The number of acres of uncultivated lands in Ohio, in 1872, was 5,533,865, being a decrease from 1871 of 110,256 acres.

Grapes and Wine—Acres planted in 1872, 941; acres in vineyard 15,111; pounds of grapes gathered 10,016,427; gallons of wine pressed 425,928. This was about half the product of 1871. The cultivation of the Catawba grape is found to be unprofitable, especially in the southern part of the State, on account of its liability to mildew and rot, and hence it is being abandoned, and other hardy varieties are taking its place. More than three-fifths of the product of 1872 was gathered in the four lake shore counties of Cuyahoga, Lorain, Erie, and Ottawa.

Orchards—The acres in orchards in 1872 were 391,550; bushels of apples produced 21,632,475; bushels peaches, 405,619; bushels pears, 153,968.

Live-Stock—The number and value of animals reported in 1878 were: Horses, 724,602; value \$47,212,499; average value 65.16. Mules, 23,738; value \$1,703,929; average value, \$71.74. Cattle, 1,765,331; value, \$29,449,949; average value, \$16.68. Sheep, 4,596,864; value \$11,710,407; average value, \$2.55. Hogs, 2,084,313; value, \$6,726,597; average value, \$3.23.

Wool—The wool-clip of 1872 is returned at 17,536,209 pounds, which is 1,396,878 pounds more than in 1871.

Dogs and Sheep-killing—The township assessors report 183,403 dogs in the State. The number of sheep killed and injured by dogs was reported as follows: Killed, 34,162, value, \$115,388; maimed, 22,525; estimate of injury, \$45,453; total loss, \$160,841.

Coal—The coal area of Ohio equals that of Great Britain, and is six times greater than that of France, Prussia or Austria, and about four times greater than that of Spain, which has a greater extent of coal territory than any other nation on the continent. The coal area of the State is 6,500,000 acres. The average aggregate thickness of the available seams is

20 feet. (The State geologists say this is a low estimate.) There are twenty-seven cubic feet to the ton. This gives 209,733,383,340 tons for the State. At the rate the mines of the States now yield, this amount would not be exhausted in 51,200 years, or would stand the present draft on all the mines in the United States for 4,560 years; or, with a yearly product equal to that of the mines of Great Britain, it would last 1,600 years. The coals of Ohio are especially valuable in being easily reached, in seams of convenient thickness for mining, and in being in proximity to large beds of iron-ore. Ohio coals are all bituminous, and are divided by the State geologists into three classes; first, furnace-coal; second, cooking-coal; third, cannon-coal. The first variety has the largest per cent. of fixed carbon, and is best adapted to the manufacture of iron from ore, being used for this purpose in the raw state. Half the iron made in the State is made from this variety. Several coal-seams, extending over large sections, including the great seam in Athens and Perry Counties, also the lowest stratum, which, at the places of its northern outcrop, is called Brier Hill coal, are of this valuable open-burning variety. The second class requires coking before being used in the blast-furnace, because of its tendency to cement when heated. It has a resinous lustre, and breaks into trapezoidal blocks. Cannon-coal is very compact, forms an excellent fuel for ordinary purposes, and yields a large quantity of superior illuminating gas. It resembles a dark shale, and contains a large quantity of bitumen. The amount of coal mined in the State in 1872 is returned by the assessors at 110,438,754 bushels, but this is known to be far below the actual production.

Iron—The amount of iron-ore mined in the State in 1872 is reported at 336,758 tons, employing 2,238 miners. From the native product and ores imported from Lake Superior and the lower lakes there was manufactured in 1872 pig-iron to the amount of 426,626 tons. The returns of manufactures of iron, made by the assessors, were so notoriously incorrect that it is useless to give them.

Banks—The number of national banks organized in Ohio, as reported November 1, 1873, is 180; closed and closing 12; in operation, 168; capital paid in of banks in operation, \$28,883,000; circulation, \$23,201,655; bonds on deposit, \$26,127,750; circulation issued, \$31,572,610; circulation redeemed, \$7,948,240; circulation outstanding, \$23,624,370.

Railroads—The reports made by the several railroad companies in Ohio to the Commissioner of Railroads and Telegraphs, for the year ending June 30, 1873, shows as follows: Increase of mileage in the year, 376 miles; excess of increase over that of previous year, 46 miles; length of main lines and branches, 4,162.9 miles; sidings and other tracks in the State, 1,044.18 miles; capital stock paid in, \$138,931,618.34; funded and other debt, \$140,-

248,445.78; number of passengers carried, 13,885,688; tons of freight carried, 26,589,562; gross earnings on 3,678.53 miles operated, \$38,175,332.39; net earnings, \$10,873,448.22.

The railroad mortgages recorded in the several counties, amounting to \$201,487,240.83, are liens upon the entire length of the respective roads; whereas the amount of funded and other debt, \$140,248,445.78, is the aggregate proportion of indebtedness, according to the mileage of the roads within the State of Ohio.

Canals.—There are 658 miles of canals proper, 91 miles of the Muskingum slackwater improvement, 36 miles of feeders and side-cuts, and 11 miles of reservoirs in Ohio, making a total of 796 miles, all navigable, with 806 lift and 10 guard locks. The first canal was commenced in 1825, and the last one completed in 1842. The total cost, \$14,688,666.97, being an average cost per mile of \$18,458.09.

County Buildings, etc.—The number of county buildings in the State, erected prior to July 1, 1872, is as far as reported, 261; value of same, \$6,751,200. County buildings erected prior to July 1, 1872, is as far as reported, 251; value of same, \$6,751,200. County buildings erected within the year ending June 30, 1873, 21; value of same, \$418,800. Number of buildings destroyed by fire, flood, etc., 613; value of same, \$381,387. Average value of county buildings erected the last year, \$19,919; average value of buildings destroyed the last year, \$1,856.

New Structures.—The reports of new buildings are made by the county auditors. The reports for the year ending April 30, 1873, compared with those for the years 1871 and 1872, show an increase in the number of new structures, of 2,754, and in their cost, of \$1,467,449.

Deeds, Leases, and Mortgages.—Number of deeds recorded in 1873, 82,161; number of leases, 2,576; number of mortgages recorded, 46,900; amount of money secured by mortgages, \$64,141,480.54; number of mortgages, other than railroad mortgages, canceled, 23,174; amount of money released by same, \$30,981,690.77.

Pauperism and Crime.—Paupers supported by counties, 5,959; persons supported by the State in insane asylums, 827; to reform schools, 188; total, 1,046. Number of persons prosecuted in the year ending July 1, 1872, 2,408. This shows a decrease of 277 as compared with 1872, and of 491 as compared with 1871. Indictments were pending against 469 persons, July 1, 1872, for crimes against the person, and during the year following, indictments were found against 1,009 persons for this class of crimes, making a total of 1,469 cases. Of these cases, 1,085 were disposed of, and 481 are still pending. There were under indictment for murder in the first degree, July 1, 1872, 11 persons; for murder in the second degree, 22; and for manslaughter, 20. Dur-

ing the year ending July 1, 1873, indictments were found against 27 persons for murder in the first degree; against 22 for murder in the second degree; and against 32 persons for manslaughter. The total number of persons under indictment for these three classes of crime in the year is, therefore, 134. Of these, indictments are still pending against 48, and the cases of 86 were disposed of as follows: executed 1; imprisoned in penitentiary 31; sentenced to county jail or fined 6; sentenced to reform farm 1; acquitted 22; indictments quashed and cases dropped 25.

Social and Vital Statistics.—The statistics of births, marriages, and deaths, are inaccurate, the returns not being complete. So far as they go they show the following for the year ending March 31, 1873: births, 58,977; marriages, 26,460; deaths, 27,112. Divorces for the year ending July 1, 1873, were as follows: suits pending July 1, 1872, 938; suits brought in year, 1,649; total cases, 2,587. The number granted was 1,124. Of the total number of divorces granted, 796 were on application of the wife, and 328 on application of the husband. The ratio of total number of divorces to marriages in 1873 is 1 to 23. The ratio of divorces to each specific cause to total number of marriages is as follows: adultery of husband, 1 to 210; do. of wife, 1 to 190; absence and neglect of husband, 1 to 74; do. of wife, 1 to 171; cruelty of husband, 1 to 166; do. of wife, 1 to 1,764; drunkenness of husband, 1 to 210; do. of wife, 1 to 8,307; fraud of husband, 1 to 4,410; do. of wife, 1 to 4,410; miscellaneous causes by husband, 1 to 1,102; and do. by wife, 1 to 4,410.

Naturalization.—The number of persons naturalized in Ohio (in 87 counties reported), in the year ending March 31, 1873, is 7,171, of which number 3,436 were from Germany, 1,696 from Ireland, and 994 from England and Wales.

Civil Judgments.—Number rendered, 1873, 15,018; amount of money adjudged due, \$8,619,303.27; average amount of each judgment, \$574.12.

Education.—The following is a summary of the school statistics of Ohio for the year ending August 31, 1873: Primary schools, 14,198; high-schools, 850; teachers in primary schools, 21,401; teachers in high-schools, 498; scholars enrolled in primary schools, 682,340; scholars enrolled in high-schools, 21,678; amount paid teachers in primary schools, \$3,950,565; in high-schools, \$355,171; paid for sites and buildings, \$1,487,655.94; paid for fuel and other contingent expenses, \$1,097,989.28; paid on bonds and interest, \$590,594.38; total amount paid, \$7,431,975.60; total enumeration of youth, six to twenty-one years of age, 991,708; number of universities and colleges, 30; number of academies, normal schools, etc., 44.

The following account of the Governors of Ohio, from the organization of the first civil

government in the Northwest Territory, of which the State of Ohio was a part, until the year 1873, is compiled from the report presented to the General Assembly by the Secretary of State, the data for which were obtained with much difficulty owing to the lack of official records of the early part of the history of the Territory and State:

Arthur St. Clair, of Pennsylvania, was Governor of the Northwest Territory, of which Ohio was a part, from July 13, 1788, when the first civil government was established in the Territory, until about the close of the year 1802, when he was removed by the President.

Charles W. Byrd, of Hamilton County, was Secretary of the Territory under Governor St. Clair, and was acting Governor of the Territory until March 3, 1803.

Edward Tiffin, of Ross County, was Governor of the State from March 3, 1803, to March 4, 1807, when he resigned to accept the office of United States Senator.

Thomas Kirker, became acting Governor on Tiffin's resignation, by virtue of his office as Speaker of the Senate. Return Jonathan Meigs was elected Governor on the second Tuesday of October, 1806, over Nathaniel Massie, who contested the election of Meigs on the ground that "he had not been a resident of this State for four years next preceeding the election, as required by the constitution," and the General Assembly, in joint convention, decided that he was not eligible. The office was not given to Massie, nor does it appear, from the records, that he claimed it, but Thomas Kirker, acting Governor, continued to discharge the duties of the office until December 12, 1808, when Samuel Huntington was inaugurated, he having been elected on the second Tuesday of October in that year.

Samuel Huntington, of Trumbull County, was Governor from December 12, 1808, to December 8, 1810.

Return Jonathan Meigs, of Washington County, was Governor from December 8, 1810, to March 25, 1814, when he resigned to accept the office of Postmaster-General of the United States.

Othniel Looker, of Hamilton County, who was Speaker of the Senate, became acting Governor April 14, 1814, and served until December 8, 1814.

Thomas Worthington, of Ross County, was Governor from December 8, 1814, to December 14, 1818.

Ethan Allen Brown, of Hamilton County, was Governor from December 14, 1818, to January 4, 1822, when he resigned to accept the office of United States Senator.

Allen Trimble, of Highland County, became acting Governor as Speaker of the Senate, January 7, 1822, and served until December 28, 1822.

Jeremiah Morrow, of Warren County, was Governor from December 28, 1822, to December 19, 1826.

Allen Trimble, of Highland County, was Governor from December 19, 1826, to December 18, 1830.

Duncan McArthur, of Ross County, was Governor from December 18, 1830, to December 7, 1832.

Robert Lucas, of Pike County, was Governor from December 7, 1832, to December 13, 1836.

Joseph Vance, of Champaign County, was Governor from December 13, 1836, to December 13, 1838.

Wilson Shannon, of Belmont County, was Governor from December 13, 1838, to December 16, 1840.

Thomas Corwin, of Warren County, was Governor from December 16, 1840, to December 14, 1842.

Wilson Shannon, of Belmont County, was again Governor from December 14, 1842, to April 13, 1844, when he resigned to accept the office of minister to Mexico.

Thomas W. Bartley, of Richland County, Speaker of the Senate, became acting Governor April 13, 1814, and retained the position until December 8, 1844.

Mordecai Bartley, of Richland County, was Governor from December 8, 1844, to December 12, 1846.

William Bebb, of Butler County, was Governor from December 12, 1846, to January 22, 1849.

Seabury Ford, of Geauga County, became Governor January 22, 1849. The result of the election in 1848 was not finally determined in joint convention of the two Houses of the General Assembly until January 19, 1849, and the inauguration did not take place until the 22d of that month. Governor Ford's term ended December 12, 1850.

Reuben Wood, of Cuyahoga, became Governor December 12, 1850, and resigned July 15, 1853, to accept the office of consul to Valparaiso.

William Medill, of Fairfield County, who was Lieutenant-Governor, became acting Governor July 15, 1853. In October of the same year he was elected Governor for the regular term commencing on the second Monday in January, 1854, and served until January 14, 1856.

Salmon P. Chase, of Hamilton County, was Governor from January 14, 1856, to January 9, 1860.

William Dennison, of Franklin County, was Governor from January 9, 1860, to January 13, 1862.

David Tod, of Mahoning County, was Governor from January 13, 1862, to January 12, 1864.

John Brough, of Cuyahoga County, was Governor from January 12, 1864, to August 29, 1865, when he died.

Charles Anderson, of Montgomery County, Lieutenant-Governor, became acting Governor August 29, 1865, and held the position until January 9, 1866.

Jacob D. Cox, of Trumbull County, was Governor from January 9, 1866, to January 13, 1868.

Rutherford B. Hayes, of Hamilton County, was Governor from January 13, 1868, to January 8, 1872.

Edward J. Noyes, of Hamilton County, was Governor from January 8, 1872, to January 12, 1874.

William Allen, of Ross County, was elected in October, 1873, to succeed Governor Noyes.

A remarkable temperance movement commenced in the closing days of the year at Washington Court-House. Dio Lewis was lecturing on Christmas Eve on the subject of "Woman and her Influence," and in the course of the lecture suggested that the women make an attempt to suppress the liquor-traffic in the town. A meeting of women was held next day in the church, when a committee of three women, wives of three prominent clergymen of the place, read an appeal to the liquor-dealers, asking them to abandon the traffic. A committee of sixty women was at once formed, and these went with the appeal to the several drinking-places, where the appeal was read, hymns sung, and prayers offered. On the third day the proprietor of the saloon first visited closed up his business, and gave the stock of liquors to the women, who rolled the barrels into the street, staved in the heads, and set fire to the contents. Other liquor-dealers did the same, until in a few days eleven out of the thirteen liquor-shops of the village were closed.

OLOZAGA, Don SALUSTIANO, a Spanish statesman, born at Logrono, in Old Castile, Spain, about 1808; died in Enghein, Belgium, September 26, 1873. He received his general and legal education at Logrono, and, having been admitted to the bar, commenced practice there as an advocate. Not long after he became concerned in political intrigues, and in 1831 he was arrested and imprisoned for taking part in a conspiracy against Ferdinand VII., but he contrived to escape to France, where he remained till the death of the King in 1833. Two years later he became a member of the Cortes, and was one of the most able members of the opposition to the Isturiz ministry. In 1836 he supported the ministry of Mendizabal, and when the insurrectionary movement of La Granja compelled that minister to retire, Olozaga became chief of the monarchial opposition. The following year, on his motion, the Cortes passed a bill for suppressing the monasteries, for electoral reform, and for the abolition of ecclesiastical tithes. During the struggle between Espartero and Narvaez, Olozaga fearing the ambition of the former, refused to support the proposition to prosecute the latter for his part in the insurrection of that year. But, on the accession of Espartero to power, Olozaga was made ambassador to France, a post which he held from 1840 to 1848. When Espartero had rendered himself

unpopular, and the revolutionary junta at Barcelona proclaimed the majority of Isabella, Olozaga was called from Paris to form a ministry. Although Olozaga displayed great energy at that time, he was unable to maintain his position against the opposition of the Cortes and the intrigues of Narvaez, who was really the most powerful person at Madrid. Olozaga, however, repaired secretly to the palace and induced the Queen to sign a decree for a dissolution of the Cortes. But he was abandoned by the Queen and was obliged to fly to Portugal, while a proposition was under discussion in the Cortes to execute him as guilty of high treason. Narvaez then formally assumed the chief control; Marie-Christine was recalled, and the Constitution of 1837 was revised in a conservative sense. The chiefs of the opposition being powerless against the dictatorship of Narvaez, Olozaga regained a portion of his popularity. He returned to Spain in 1847, on the faith of the amnesty which had been proclaimed; but he was immediately arrested by order of Narvaez, and imprisoned in the citadel of Pampeluna. He was condemned to exile, but the popular agitation compelled the Queen to sign an order for his recall, and he was permitted to take his place in the Cortes at the head of the Progressists. During the troubles in 1848 he was arrested, but soon released. In the revolution of July, 1854, when the Queen was obliged to place Espartero at the head of the Government as the only means of arresting the insurrection, Olozaga attached himself to the fortunes of that minister. In the Cortes he voted for maintaining the monarchy, keeping his place, however, among the Progressists. He favored the liberal laws adopted in 1855, and even united with the extreme Left in the discussion of a motion of Figueras in regard to titles of nobility, and in the proposition to censure O'Donnell after the troubles at Saragossa. The revolution of July, 1856, in which O'Donnell was successful, again deprived Olozaga of his influence with the Government. After the revolution of 1868, by which Queen Isabella was deprived of the throne, Olozaga warmly favored the new Government. He returned from Paris to Madrid, where he was received with enthusiasm. Having received the appointment of ambassador at Paris, he departed for his post the same year. He was reappointed in March, 1869, after a short residence at Madrid. He was appointed to the same post for the third time in February, 1871; but was elected President of the Chamber of Deputies at Madrid, by 168 against 110 votes, on the 4th of April, 1871. He was defeated at the autumn session of the Cortes, and soon after returned once more to Paris as ambassador, where he remained until his last illness compelled him to go to Belgium in the hope of relief.

OREGON. The agricultural classes of Oregon were unusually active during the year.

A Farmers' Convention was held at Salem on the 10th of April, and was well attended by delegates from all parts of the State. A series of resolutions was adopted, advocating measures in favor of the agricultural interests of the State. On the 24th of September a convention of the Patrons of Husbandry of Oregon and Washington Territory was held at Salem. Thirty-nine Oregon and five Washington Territory Granges were represented. The condition and aim of the order was thus reported by the committee on that subject:

That, notwithstanding our order having been but recently organized in Oregon and Washington Territory, we have accomplished much toward the furtherance of our objects and principles, and, from the earnestness with which our people are entering into the movement, we feel confident that we can and will succeed in carrying out our purposes.

Resolved, That in addition to the various purposes of the Patrons of Husbandry, as set forth in the Constitution and By-laws, looking to our social, intellectual and material advancement, we, as the State Grange of Oregon and Washington Territory, believe it our duty to mature and put in practice, through our Subordinate and State Grange, at the earliest possible date, the most feasible plan for accomplishing the following objects:

1. The establishment of a coöperative system of trade, by which producers and consumers shall deal as directly with each other as possible.

2. The purchase of farming implements, machinery, and sacks, at the manufacturers' lowest rates, making no invidious distinction in the mode of purchasing headers, mowing-machines, and farming implements.

3. The disposal of our grain and other farm productions at the highest market value, or direct shipments on the most favorable terms, or the storage of our grain at low rates, drawing upon it advances to the largest amount practicable, at the lowest rates of interest, receiving sack for sack in its delivery.

4. The establishment of Grange stores.

5. The gradual substitution of cash for credit system.

6. The eventual introduction of shipment in bulk.

Resolved, That we believe it our duty to endeavor to secure by all legitimate means such legislation as will best protect us against all ills of which we may justly complain, to labor for reduction and regulation of railroad freights and fares, and the reduction and regulation of ocean freights by reducing port charges, by abolishing the present system of rechartering ships, by giving timely information to ship-owners throughout the world of the amount of freight we can furnish them, with a view to chartering sufficient tonnage for our own purposes, and by offering other inducements to draw to our coast such shipping as will amply meet the requirements of each season, including among these inducements the importation to our State of the best classes of European laborers.

Resolved, That the interests of farmers, mechanics, and our laboring-classes, are too closely allied to admit of any estrangement, and we deem it our duty to patronize home mechanics in preference to foreign, and would here say that ours is not an organization for the purpose of reducing or degrading mechanical or field labor, but we consider it our best interest to bestow liberal patronage and fair remunerative wages on the mechanical and laboring skill of the country. Although we propose to dispense with the services of the middle-men, and buy directly from the manufacturer, while we ship direct to the consumer, we fail to see in what way the mechanic or laboring man is to be injured. Our experience already proves there is a material difference between the manufacturers' prices and those of the retail dealer; also between the producers' prices and those of the

European consumer. These differences being in our favor, when we deal directly with the manufacturer and consumer, we have money left to pay for other manufactured articles, and extend our various enterprises, thus increasing, instead of diminishing, the demand for mechanical and other skilled labor.

Resolutions were adopted favoring the improvement of the Willamette and Oregon Rivers as measures of vital importance to the farmers of Oregon.

A convention of the Oregon State Woman's Suffrage Association was held at Portland in February, when speeches were made and resolutions adopted, urging that the right of voting be conferred upon women.

The Democratic State Convention assembled in Portland on the 9th of September, and after nominating J. W. Nesmith as a candidate for Congress, adopted the following platform:

The Democratic party of the State of Oregon, in convention assembled, do declare: 1. That we recognize and support the legal and constitutional authority of the Federal Government, but insist upon the strict construction of the Federal Constitution as necessary to the preservation of the inherent rights of the people; that we oppose centralization as the most insidious and dangerous enemy of popular rights, and will continue to denounce it in every guise in which it may appear, that the several departments of our Government, legislative, executive, and judicial, are independent in their respective spheres under the Constitution, and any attempt by any one of them to usurp authority is destructive of the constitutional rights and independence of the others, and should be rejected as dangerous to civil liberty.

2. That justice demands a revision of our tariff laws, with a view to secure revenue alone, and not to tax the community in general for the benefit of particular interests, and to the detriment of the laboring-classes of the community.

3. That the wealth of the country is the product of labor, and that we heartily favor such legislation as has for its object the protection and support of the producing and laboring classes. Capital protects itself, while labor in its numerous and diversified forms needs, and must have, the fostering care of prudent and skillful legislation, and particularly is this true at this time, when the profits of production are being swallowed up in extortionate rates of transportation.

4. That all corporations are subject to legislative control; those created by Congress should be restricted and controlled by Congress, and those under State laws be subject to the control of the States creating them; and all corporations should be so controlled as to prevent them from becoming engines of oppression; and also the property of all corporations should be assessed and taxed at the same rate as the property of individuals.

5. That we view with great apprehension the widespread corruption and dishonesty that has recently marked our public service, and considering as shameful and iniquitous the recent act of Congress granting an increase of salaries, we demand its immediate repeal, and we denounce every member of Congress, Democrat or Republican, who supported the measure, and also the President of the United States, by whose approval the infamous act became a law.

6. That the act of the President in setting up by the bayonet a government in Louisiana not desired by her people, and having no title whatever to rule them, was a flagrant violation of her rights under the Federal Constitution.

7. That every department of the Government being in the hands of the Republicans, they are justly responsible for the evils and wrongs in legislation

and administration of which the country complains.

8. We are opposed to granting by the General Government of subsidies to steamship lines to import Chinese slaves to our shores, and we demand such a modification of the Burlingame treaty with China as will effectually cut off this stream of Chinese immigration.

9. We demand of Congress an additional appropriation for the removal of obstructions to the navigation of the Willamette River, and such aid by appropriation or otherwise as will open the Columbia River to free navigation, by means of a canal and locks at the Cascade portage, and the proceeds of the sales of alternate sections of the public lands to aid in the construction of the Portland, Dalles & Salt Lake Railroad.

10. That as the vast extent of our coast, embracing a distance of nearly 1,000 miles in extent, is destitute of any place of resort for vessels in stress of weather, and vast amounts of property are lost yearly thereby, together with a great many valuable lives: Therefore, be it resolved that we require of our Representatives in Congress to use every honorable effort to secure an appropriation for the harbor of Port Orford; first, as being adapted to an improvement of the kind, and also for the improvement of all places in the State that may contribute to our commercial prosperity.

11. That we most cordially invite all who favor retrenchment and reform in every department of the public service, and the restoration of the government to its former purity and efficiency, to assist us by their votes and influence in the attainment of objects so important and desirable.

Resolved, That the high crimes and revolting misdemeanors of J. M. Hipple, *alias* John H. Mitchell, meet with our most emphatic condemnation, and, in common with all good men, we demand his resignation, or his expulsion from the United States Senate.

The last resolution was passed, after a protracted debate, by a vote of 85 to 28.

The Republican State Convention assembled in Albany, on the 11th of September, and continued in session two days. Hiram Smith was nominated as Representative for Congress. The following resolutions were adopted:

Resolved, That we look with pride and satisfaction upon the prosperous condition of our country as the natural results of its application of the principles controlling the Republican party in the administration of national affairs, and that we reaffirm the principles of the party as heretofore enumerated in its conventions, and declare that their practical enforcement is essential to the welfare of the country and the maintenance of the rights and liberties of the people.

Resolved, That the Chief Executive of the nation has our unabated and unqualified confidence in his integrity, ability, and enlightened patriotism in the administration of the duties of his high office.

Resolved, That we point the discordant and chaotic political elements which oppose the Republican party today to the grand advance made by our Government on its political standing, financial credit, commercial importance and material development of the resources of the whole country as the direct, natural, and inevitable result of this enlightened policy and principles of the Republican party.

Resolved, That we denounce the recent act of Congress known as the back-pay bill and the voting for an unnecessary increased pay for services already rendered.

Resolved, That we denounce all Credit Mobilier transactions, whatever their form, and we heartily approve of the action of the late Congress in exposing and punishing corruption.

Resolved, That we favor retrenchment, and re-

form, and rigid economy, in the expenditure of the public money in the State and national administration, and the reduction of taxation as rapidly as consistent with good government and maintenance of the public credit.

Resolved, That we cordially welcome to our shores the oppressed of all countries; and remembering that our adopted fellow-citizens have always proved loyal to the flag of the Republic, we demand for them the fullest protection of the laws, and favor increased facilities for naturalization. But we condemn the cool trade, and all forms of involuntary servitude, and affirm that the safety and prosperity of free institutions demand more stringent laws to prevent such traffic.

Resolved, That the interests of this State, and the demands of its commercial relations with the other States of the Union, both present and prospectively, will warrant a liberal expenditure on the part of the national Government in the improvement of our harbors and river channels, and it is the true policy of our people that they should be so represented in Congress as shall most effectively accomplish this result.

Resolved, That true economy in the management of the public lands of the United States, as well as the settlement of our vast domain, and the development of its resources, demand liberal grants of public lands in the construction of railroads and other public works, with such limitations as will secure the ultimate sale to actual settlers.

Resolved, That we are in favor of congressional grants of public lands to aid in the construction of a railroad from Portland, Oregon, to some point of junction with the Central and Union Pacific Railroads in Salt Lake Valley, and of a railroad from the Rogue River Valley to a junction with the Central Pacific.

Resolved, That the interests of commerce demand the construction of a breakwater at Port Orford in this State for that purpose.

Resolved, That the protection of the commerce of the Columbia River demands the placing of a steam revenue-cutter with all necessary appliances at the mouth of said river.

Resolved, That the producing, commercial, and industrial interests of the country should have the best and cheapest of transportation possible, and while capital invested in such means of transit should have a reasonable remuneration, those interests should be fully protected, and the facilities for transportation should be adjusted so far as possible to the wants of every part of the State, with no unjust discrimination as to any section, person, or class, and as capital and labor are inseparably connected and mutually dependent, the resources of the State will be best developed, and the best interests of all classes promoted by mutual concessions and accommodations between labor and capital, and between the producer and carrier.

Resolved, That we are opposed to the setting apart of the Walla Walla Valley for an Indian reservation, and the candidate of this convention is hereby pledged to use his influence to secure to white settlers the lands in said valley; that the Modoc murderers of citizens at Lost River and Tule Lake, in November last, should at once be delivered to the civil authorities of this State, that they may be dealt with according to law; that we are in favor of a humane peace policy toward peaceable Indians, but full and complete protection should at all times be given to the settlers on our frontiers against the depredations of hostile and refractory tribes.

The following resolution elicited a spirited discussion, but was finally adopted after much opposition, by a vote of 67 to 27:

Resolved, That whatever may have been the misfortunes, faults, or shortcomings, of the Hon. J. H. Mitchell, United States Senator of this State, in his

early private life, we neither apologize, pass judgment upon, nor justify him, but express our unqualified belief that by his many years of consistent, upright, and honorable conduct in this State he has outlived any imputations cast upon him, and that to-day not only the Republican party, but a large majority of the people of this State, have entire confidence in his integrity, ability, and patriotism, and that he will faithfully and ably represent them in the United States Senate.

It appears that the charge against Mr. Mitchell was that he at one time was of the Mormon faith.

The election held on October 3d resulted in the choice of the Democratic candidate, J. W. Nesmith, by a majority of 2,071, in a total vote of 14,317. The present Legislature is Democratic, and is composed as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans.....	11	39	43
Democrats.....	11	17	28
Republican majority.....	..	15	15

The assessable property of the State for 1873 was returned at \$57,682,691. Deducting indebtedness and exemption amounting to \$16,982,532, the total taxable property amounted to \$40,700,159. The result of equalization increases this sum to \$45,688,924. The returns of land, exclusive of grants to corporations, show an aggregate of 3,489,394 acres, of which the assessed value was \$19,010,508, and the equalized value \$22,220,881. There were 65,789 horses; assessed value, \$2,589,617; equalized value, \$3,080,227; cattle, 232,132; assessed value, \$3,416,946; equalized value, \$3,783,061; sheep, 898,241; assessed value, \$965,461; equalized value, \$1,041,199; swine, 72,825; assessed value, \$145,641; equalized value, \$212,354.

Returns were made of the property of corporations, showing the description of property owned by each company, the assessed value thereof, the percentage added or deducted, and the equalized value. This exhibit gives 427½ miles of telegraph-line; assessed value, \$27,950; equalized value, \$42,750; 257½ miles of railroad, equalized at \$5,803, 88.3½ per mile, or \$1,494,500; 192,514 acres of land of European and Oregon Land Company; assessed value, \$146,698.93; equalized value, \$268,121.49; 484,562 acres of lands of wagon-road companies; assessed value, \$365,461; equalized value, \$477,925.

No work has been done during the year in the construction of railroads. The Oregon & California and the Oregon Central Railroads are both in good condition, and doing a fair business; the former extending from Portland to Roseburg, in Douglas County, and the latter from Portland to Saint-Joe, in Tamhill County. The North Pacific road is soon to be commenced at some point on the Columbia River, and pushed eastward through Eastern Oregon, Idaho, and Montana, to the Missouri River, and is expected to be completed within

two or three years. A charter has been granted by Congress for a railroad from the Columbia River to Salt Lake City, and a new road is now in progress from Portland to the California State line. Substantial locks for the passage of boats around the falls of the Willamette River have been completed during the year, thus greatly facilitating the navigation of that river.

These public improvements will have an important effect upon the development of the great supplies of iron-ore in the northern and western part of the State. At Oswego, six miles above Portland, on the left bank of the Willamette, smelting-works have been erected at great expense. It has been proved that the ore is of superior quality, and can be profitably worked. Extensive limestone-quarries have also been opened during the past year, in Douglas County, within a few miles of the Oregon & California Railroad.

The wool product of Oregon is fast growing in importance. The extensive grass-plains of Eastern Oregon are rapidly being settled upon by sheep-raisers. It is asserted that the quality and quantity of wool grown is not surpassed upon sheep of the same kind in the United States.

The trade in coal, lumber, and fish, is gradually increasing. The salmon-fisheries of Oregon constitute one of the leading industries of the State. Numerous large establishments are in operation on the Columbia and Willamette Rivers, and canned and pickled salmon of superior quality are shipped to all parts of the world. It is stated that one of the largest fisheries on the Columbia River prepared during the past season 32,000 cases of salmon, including 21,000 one-pound, and 11,000 two-pound cans; besides which 200 barrels and 100 kits of salted salmon were put up.

The construction of a new State House at Salem, and the building of the State University at Eugene City, in Lane County, have been begun. Work on the former was discontinued during the winter of 1873-'74, with the intention of being renewed in the spring. The commissioners expect to erect during 1874 three of the wings, and have the roof on before the winter-rains begin.

One of the most disastrous conflagrations ever known on the Pacific coast occurred in Portland on the 2d of August. About twenty blocks, in one of the most crowded parts of the city, were entirely destroyed, causing a total loss of \$1,345,400, on which there was an insurance of only \$270,000, thus making the total loss, over insurance, upward of \$1,000,000. The city had hardly recovered from the effects of the destructive fire of December, 1872, which, though very disastrous, was of less magnitude than that of this year. No little suffering was caused by the great fire of August, but prompt measures for relief were taken by officials and citizens. (For an account of the Modoc war, *see* ARMY OF THE UNITED STATES.)

ORR, JAMES LAWRENCE, LL. D., an American statesman and diplomatist, born in Craytonville, Anderson District, S. C., May 12, 1822; died in St. Petersburg, Russia, May 6, 1878. He received a good education, but until his eighteenth year was obliged to employ a part of his time behind the counter of his father, a country shopkeeper. In 1840 he entered the University of Virginia, whence he graduated in 1842, studied law, and having been admitted to the South Carolina bar, entered upon the practice of his profession in Anderson, where for several years he edited a village paper. In 1844 he was elected to the State Legislature, and reelected in 1845. In 1848 he was elected to Congress from the Second District, and was reelected until March 4, 1859, serving as Speaker from December, 1857, to March, 1859. While in Congress his principal speeches were upon the agitation of the slavery question, and its dangerous consequences to the Union. A member of the Southern Rights Convention in May, 1851, he opposed the policy, while maintaining the right of secession on the part of the several States. At the close of his congressional term he announced his intention of retiring forever from politics, but frequently addressed the public from that time until the breaking

out of the civil war, always opposing the agitation of the slavery and secession questions. On the 4th of July, 1854, Mr. Orr, with Stephen A. Douglas and others, addressed a Democratic meeting in Philadelphia, taking a strong stand against the Know-nothing party, and by his able arguments inducing members of the Democratic party, including many public men, to withstand its insidious and seductive principles. When the war broke out in 1861, Mr. Orr sided with the South, and was appointed one of the commissioners to visit Washington in behalf of South Carolina. During the war he organized a rifle regiment, which he led for a time. In 1862 he was elected to the Confederate Congress, serving until the close of the war. In 1865 he was appointed as Provisional Governor of South Carolina under President Johnson's plan of reconstruction, serving until 1868. He was at this time a Conservative, and soon joined the Republican party. In 1870 he was elected Judge of the State Circuit Court, serving until his appointment as the successor of Governor Curtin, minister plenipotentiary at St. Petersburg. In 1866 he was a delegate to the Constitutional Union (known as the "Arm-in-arm") Convention at Philadelphia, and in 1872 to the National Republican Convention.

P

PAEZ, José ANTONIO, a Venezuelan patriot, born in Arauca, province of Varinas, in 1790; died in New York City, May 6, 1878. He was brought up among the herdsmen of the plains, and when eighteen years of age became overseer of the cattle-estates of a wealthy Spaniard. In the beginning of the struggle for liberty he fought on the side of the royalists, but in 1810 joined the patriots, and in his first campaign was promoted to the rank of sergeant of cavalry. Three years later, on the approach of Bolívar to Venezuela, he was offered a captain's commission in the Spanish army, but refusing, he again joined the patriot forces. Twice he was captured, and narrowly escaped death. In February and June, 1816, he defeated the royalist commander, Don Rafael López, but the results of the campaign were not generally favorable to the insurgents. Toward the close of this year, Páez was made commander of the revolutionists, with the rank of brigadier-general, and he again defeated López, also capturing the city of Achaguas, and recovering Apure, Varinas, and Casanare. He totally routed the Spanish army on January 28, 1817, and soon after acknowledged the authority of Bolívar, and thenceforth they acted in concert. In 1819 Páez was raised to the rank of general of division for his services at Ortiz. The battle of Carabobo, in 1821, which secured the independence of Colombia, established his military reputation,

and Bolívar offered to make him general-in-chief of the army. His capture of Puerto Cabello in November, 1823, ended Spanish authority in Colombia. On the formation of the new Government he entered the Senate as representative of the department of Venezuela, and devoted himself to study in order to make up the deficiencies of his early education. At the same time he was an active politician, leading the Federal party. In the execution of a law requiring the enlistment of all citizens in Caracas, Páez gave so much offense, however, that the House of Representatives determined to impeach him. Unwilling to submit to this, Páez put himself at the head of the military, and of the party opposed to the Constitution. A rebellion followed, but Bolívar returned and recognized Páez as commander in Venezuela. The troubles continuing, in September, 1829, Venezuela was declared independent, and Páez was chosen as its first President. Two insurrections disturbed the new republic, but Páez quickly suppressed both, and was presented by his Congress with a golden sword. In 1839 he again became President. He led the revolutionists against the usurper Monagas in 1848, but was unsuccessful, and, having been captured, was imprisoned in Valencia, and afterward in the fortress of San Antonio, in the island of Cumaná. Upon being released by order of Congress, he came to the United States as an exile,

in May, 1850, and resided in New York until December, 1858, when he returned to Venezuela, his sentence of banishment having been revoked. By another revolution in 1859 he was raised to the dictatorship, which he held till 1862, when he resigned, and returned to the United States. Subsequently he visited the Argentine Republic and Peru, and returned to the United States in the autumn of 1872, remaining till his death.

PARAGUAY (REPÚBLICA DEL PARAGUAY), an independent state of South America, lying between latitude $21^{\circ} 27'$ and $27^{\circ} 30'$ south; and longitude $54^{\circ} 21'$ and $58^{\circ} 40'$ west. It is bounded north and northeast by Brazil; south-east, south, and southwest, by the Argentine Republic; and northwest by Bolivia. Indeed, Paraguay is almost entirely situated between the Paraguay River to the west, and the Paraná to the south and east. Its area, which, previous to 1872, was about 105,000 square miles, is at present perhaps not greater than 68,000 square miles, having been materially diminished in the year named, by the cession of a large portion of its territory at the north to Brazil as a war indemnity.

The population at the present time is probably not more than 1,000,000.

The President of the Republic is Señor Don Salvador Jovellanos, elected on December 12, 1871, for a term of three years.

The army, which was 60,000 strong during the late war, is now reduced to 2,000.

Owing to the complete absence of official returns, it is impossible to give exact statistics of the commerce and finances of the republic. The article *maté*, or Paraguayan tea, once exported in large quantities, is now much less extensively cultivated than before the war with Brazil and the Argentine Republic.*

The total exports may be estimated at a value of \$1,000,000; and the imports at about one-third more.

A railway was built in 1863 from Asuncion to Paraguay, a distance of some 45 miles.

There is a Paraguayan debt of £3,000,000 held in England. The loans were issued at 80 and 85 per cent. respectively; but in the year just past they were quoted at 36 and 38 per cent. severally, or a decline of more than one-half of the emission price. Both these loans were raised for special purposes, namely, the "development of the resources of the country," the promotion of immigration and colonization of the fiscal lands, etc.; both bear 8 per cent. interest, and a 2 per cent. sinking fund; and to meet these provisions for both, £300,000 per annum would be necessary. Amounts of their proceeds sufficient to meet two years' dividends and installments of principal were retained in London, but those for the £1,000,000 loan of November, 1871, were exhausted in September of last year; and those of the £2,000,000 loan of May, 1872, will be absorbed

by April 1, 1874; and as no payments were made by the Government (whose inability to meet its obligations is apparent), during 1873, and with the debt in the mean time running on at almost 60 per cent. discount, the time has come for some explanations to the bondholders.

More than one financier foresaw, at the time of the second loan especially, that it would prove a misfortune to the Paraguayan Government to have so large an indebtedness at the onset of the work of reconstruction, and before it had had time to experience the necessity of self-exertion and self-sacrifice, in order to recover gradually from the prostration with which a long conflict had thrown the country.

The thing most needed in Paraguay was a replenishment of the population, toward the accomplishment of which end, 1,000 emigrants were sent from England; but it would appear that the movement was not attended by much success, owing to the apathy of the Government. This state of things, added to a civil war, has so far rendered abortive all efforts to benefit the country. The direction of the emigration was taken out of the hands of the responsible parties in London and given in charge to the minister plenipotentiary, who, it is complained, remains in supine inactivity; while his Government, on the other hand, repudiates the engagements which he had entered into on its behalf, thus causing so much confusion, so far as the emigrants are concerned, that it was feared the interference of the British Government, in order to rescue them from starvation, would be required.

Meantime the sufferings of the unfortunate immigrants were so great as to move the population of Buenos Ayres city to compassion; a subscription opened there for the relief of the ill-starred settlers was liberally responded to, \$6,000 having been raised in less than one month.

A report was current in October that the Asuncion Government refused to allow the settlers to leave the country before the sum of £86,000 had been received from the emigration agents in London, who were said to be indebted to the Government in that amount.

A treaty of limits, negotiated by General Mitre with the Government of Asuncion, was ratified in October. By its terms the Pilcomayo was accepted as the boundary of the disputed Chaco, thus leaving Paraguay in possession of the part north of that river up to the 22d degree of south latitude, at which point begins the part claimed by Bolivia.

A revolution, headed by Caballero, broke out on March 23d, for the purpose of overthrowing the Jovellanos administration, in favor of Barreiro. The Brazilian forces of occupation, numbering 2,000 men, and the Argentine, some 500 strong, agreed to sustain the tottering Government of Jovellanos, and thus the revolutionary party was defeated.

PARKER, Rev. JOEL, D. D., a Presbyterian clergyman, born in Bethel, Vt., August 27,

* For commercial and financial statistics, see ANNUAL Cyclopedia for 1873.

1799; died in New York City, May 2, 1878. He graduated from Hamilton College in 1824, studied theology in the Auburn Seminary, and, upon the completion of his course, settled at Rochester. In 1830 he removed to New York and organized the Presbyterian Church in Thames Street, which afterward removed to Dey Street. In 1832 he was called to the First Presbyterian Church in New Orleans. Returning to New York in 1837, he became pastor of the Broadway Tabernacle, and soon afterward, President of the Union Theological Seminary. Subsequently, after a few years, pastorate in Philadelphia, he assumed the charge of the Bleecker Street Presbyterian Church, upon the death of Rev. Erskine Mason, following the society to its present site in Fourth Avenue, where he continued pastor until 1868. He was afterward settled over the Park Church in Newark, N. J., for a time, but owing to failing health his later years were spent in New York City, with his children. Dr. Parker was the author of "Lectures on Universalism," 1829; "Morals for a Young Student," 1832; "Invitations to True Happiness," 1843; "Courtship and Marriage," "Reasonings of a Pastor," "Notes on Twelve Psalms," 1849; "Sermons," 1852; "Pastor's Initiatory Catechism," 1855; edited Sermons of John W. Adams, D. D., with memoir, 1851, and "Burder's Religious Ceremonies of all Nations."

PATRONS OF HUSBANDRY, a secret organization, having for its primary and principal object the promotion of the agricultural interests of the country. It is of recent origin, though the principles which underlie it are as old as the first agricultural society ever organized. Its history is briefly this: After the close of the late civil war, the agricultural interests of the Southern States were in a condition of great depression the changes which had followed emancipation had left the questions of labor and just compensation for it unsettled. The farmers had very little money or credit; and the colored farm-laborers, distrustful of their old masters, and in many cases disposed to enjoy their new-found freedom, were an uncertain dependence, yet there was really no other. In the Northwest and West labor was not so much wanting as cheaper means of transportation to market, and fair prices to the producer for his products. Between the high charges of the railway companies and the middle-men, his crops did not bring to him the actual cost of their cultivation. Then, too, buying necessarily on credit, he was forced to pay enormous and often ruinous prices for his agricultural machines and implements, and indeed for every thing he purchased. Complaints long and loud from each section reached the Agricultural Department at Washington, and in the summer and autumn of 1867 one man connected with that department set himself the task of attempting to devise some means of relieving the farmers

from these great evils. This man was Mr. William Saunders, then, and for some years later, superintendent of the gardens and propagating houses of the Department of Agriculture. A friend of his, Mr. O. H. Kelley, at that time a clerk in the Post-Office Department had been the previous year, on a special mission through the Southern States, and had seen their condition, and on his return to his farm in Minnesota had observed also the condition of the farmers of the Northwest, as Mr. Saunders had previously done. To Mr. Kelley belongs the honor of first making the inquiry whether it was not possible to help these suffering farmers and planters by a secret organization composed of agriculturists alone, and having some resemblance to the Masonic Order, Odd-Fellows, etc. This suggestion, made in conversation with Mr. Saunders, fell into good ground. Mr. Saunders, a Scotchman by birth, saw at once in this suggestion the solution of the problem which had so long occupied his thoughts; and he proceeded with slow and cautious steps to develop it. The constitution and circulars declarative of the purposes of the new order were drawn up by Mr. Saunders alone, and when he came to the ritual and secret work of the order he associated with him Rev. A. B. Grosh (one of the highest officers and most successful expounders of Odd-Fellowship), Mr. J. R. Thompson, and Mr. Kelley. When on the 4th of December, 1867, it was determined to organize the National Grange (*see* GRANGE in this volume), others who had manifested an interest in the subject were invited to join them, and several of these at a later period attained to some renown in the order. Soon after the organization of the National Grange a Subordinate Grange was established, to exemplify the workings of its ritual. We insert here the constitution and by-laws of the National Grange, which, except some amendments not yet passed upon by all the State Granges, is substantially as it came from the hands of Mr. Saunders:

PREAMBLE.

Human happiness is the acme of earthly ambition. Individual happiness depends upon general prosperity.

The prosperity of a nation is in proportion to the value of its productions.

The soil is the source whence we derive all that constitutes wealth; without it we would have no agriculture, no manufactures, no commerce. Of all the material gifts of the Creator, the various productions of the vegetable world are of the first importance. The art of agriculture is the parent and precursor of all arts, and its products the foundation of all wealth.

The productions of the earth are subject to the influence of natural laws, invariable and indisputable; the amount produced will consequently be in proportion to the intelligence of the producer, and success will depend upon his knowledge of the action of these laws, and the proper application of their principles.

Hence, knowledge is the foundation of happiness.

The ultimate object of this organization is for mutual instruction and protection, to lighten labor by diffusing a knowledge of its aims and purposes, expand the mind by tracing the beautiful laws which the Great Creator has established in the Universe, and to enlarge our views of Creative wisdom and power.

To those who read aright, history proves that in all ages society is fragmentary, and successful results of general welfare can be secured only by general effort. Unity of action cannot be acquired without discipline, and discipline cannot be enforced without significant organization; hence we have a ceremony of initiation which binds us in mutual fraternity as with a band of iron; but although its influence is so powerful, its application is as gentle as that of the silken thread that binds a wreath of flowers.

The Patrons of Husbandry consist of the following

ORGANIZATION.

Subordinate Granges.

First Degree: Laborer (man), Maid (woman).

Second Degree: Cultivator (man), Shepherdess (woman).

Third Degree: Harvester (man), Gleaner (woman).

Fourth Degree: Husbandman (man), Matron (woman).

State Grange.

Fifth Degree: Pomona (Hope).

Composed of Masters of Subordinate Granges and their wives who are Matrons. Past Masters and their wives who are Matrons shall be honorary members and eligible to office, but not entitled to vote.

National Grange.

Sixth Degree: Flora (Charity).

Composed of Masters of State Granges and their wives who have taken the degree of Pomona. Past Masters of State Granges, and their wives who have taken said degree of Pomona, shall be honorary members and eligible to office, but not entitled to vote.

Seventh Degree: Ceres (Faith).

Members of the National Grange who have served one year therein may become members of this degree upon application and election. It shall have charge of the secret work of the Order, and shall be a court of impeachment of all officers of the National Grange.

Members of this degree are honorary members of the National Grange, and are eligible to office therein, but not entitled to vote.

CONSTITUTION.

ARTICLE I.—Officers.

SECTION 1. The officers of a Grange, either National, State, or Subordinate, consist of and rank as follows: Master, Overseer, Lecturer, Steward, Assistant Steward, Chaplain, Treasurer, Secretary, Gate-keeper, Ceres, Pomona, Flora, and Lady Assistant Steward. It is their duty to see that the laws of the Order are carried out.

Sec. 2. How chosen.—In the Subordinate Granges they shall be chosen annually; in the State Granges once in two years; and in the National Grange once in three years. All elections to be by ballot.

Vacancies by death or resignation to be filled at a special election at the next regular meeting thereof—officers so chosen to serve until the annual meeting.

Sec. 3. The Master of the National Grange may appoint members of the Order as deputies to organize Granges where no State Grange exists.

Sec. 4. There shall be an Executive Committee of the National Grange, consisting of three members, whose terms of office shall be three years, one of whom shall be elected each year.

Sec. 5. The officers of the respective Granges shall be addressed as "WORTHY."

ARTICLE II.—Meetings.

SECTION 1. *Subordinate Granges* shall meet once each month, and may hold intermediate meetings as may be deemed necessary for the good of the Order. All business meetings are confined to the Fourth Degree.

Sec. 2. *State Granges* shall meet annually at such time and place as the Grange shall from year to year determine.

Sec. 3. *The National Grange* shall meet annually on the 3d Wednesday in November, at such place as the Grange may from year to year determine. Should the National Grange adjourn without selecting the place of meeting, the Executive Committee shall appoint the place and notify the Secretary of the National Grange and the Masters of State Granges, at least thirty days before the day appointed.

ARTICLE III.—Laws.

The National Grange, at its annual session, shall frame, amend, or repeal such laws as the good of the Order may require. All laws of State and Subordinate Granges must conform to this Constitution and the laws adopted by the National Grange.

ARTICLE IV.—Ritual.

The Ritual adopted by the National Grange shall be used in all Subordinate Granges, and any desired alteration in the same must be submitted to, and receive the sanction of, the National Grange.

ARTICLE V.—Membership.

Any person interested in agricultural pursuits, of the age of sixteen years (female), and eighteen years (male), duly proposed, elected, and complying with the rules and regulations of the Order, is entitled to membership and the benefit of the degrees taken. Every application must be accompanied by the fee of membership. If rejected, the money will be refunded. Applications must be certified by members, and balloted for at a subsequent meeting. It shall require three negative votes to reject an applicant.

ARTICLE VI.—Fees for Membership.

The minimum fee for membership in a Subordinate Grange shall be, for men five dollars, and for women two dollars, for the four degrees, except charter members, who shall pay—men, three dollars, and women fifty cents.

ARTICLE VII.—Dues.

SECTION 1. The minimum of regular monthly dues shall be ten cents for each member, and each Grange may otherwise regulate its own dues.

Sec. 2. The Secretary of each Subordinate Grange shall report quarterly to the Secretary of the State Grange the names of all persons initiated or passed to higher degrees.

Sec. 3. The Treasurer of each Subordinate Grange shall report quarterly, and pay to the Treasurer of his State Grange the sum of one dollar for each man and fifty cents for each woman initiated during that quarter; also, a quarterly due of six cents for each member.

Sec. 4. The Secretary of each State Grange shall report quarterly to the Secretary of the National Grange the membership in his State, and the degrees conferred during the quarter.

Sec. 5. The Treasurer of each State Grange shall deposit to the credit of the National Grange of Patrons of Husbandry with some Banking or Trust Company in New York (to be selected by the Executive Committee), in quarterly installments, the annual due of ten cents for each member in his State, and forward the receipts for the same to the Treasurer of the National Grange.

Sec. 6. All moneys deposited with said company shall be paid out only upon the drafts of the Treasurer, signed by the Master, and countersigned by the Secretary.

Sec. 7. No State Grange shall be entitled to rep-

representation in the National Grange whose dues are unpaid for more than one quarter.

ARTICLE VIII.—*Requirements.*

SECTION 1. Reports from Subordinate Granges relative to crops, implements, stock, or any other matters called for by the National Grange, must be certified to by the Master and Secretary, and under seal of the Grange giving the same.

SEC. 2. All printed matter on whatever subject, and all information issued by the National or State to Subordinate Granges, shall be made known to the members without unnecessary delay.

SEC. 3. If any brothers or sisters of the Order are sick, it shall be the duty of the Patrons to visit them, and see that they are well provided with all things needful.

SEC. 4. Any member found guilty of wanton cruelty to animals shall be expelled from the Order.

SEC. 5. The officers of Subordinate Granges shall be on the alert in devising means by which the interests of the whole Order may be advanced; but no plan of work shall be adopted by State or Subordinate Granges without first submitting it to, and receiving the sanction of, the National Grange.

ARTICLE IX.—*Charters and Dispensations.*

SECTION 1. All charters and dispensations issue directly from the National Grange.

SEC. 2. Nine men and four women having received the four Subordinate Degrees, may receive a dispensation to organize a Subordinate Grange.

SEC. 3. Applications for dispensations shall be made to the Secretary of the National Grange, and be signed by the persons applying for the same, and be accompanied by a fee of fifteen dollars.

SEC. 4. Charter members are those persons *only* whose names are upon the application, and whose fees were paid at the time of organization. Their number shall not be less than nine men and four women, nor more than twenty men and ten women.

SEC. 5. Fifteen Subordinate Granges working in a State can apply for authority to organize a State Grange.

SEC. 6. When State Granges are organized, dispensations will be replaced by charters, issued without further fee.

SEC. 7. All charters must pass through the State Granges for record, and receive the seal and official signatures of the same.

SEC. 8. No Grange shall confer more than one degree (either *First, Second, Third, or Fourth*) at the same meeting.

SEC. 9. After a State Grange is organized, all applications for charters must pass through the same, and be approved by the Master and Secretary.

ARTICLE X.—*Duties of Officers.*

The duties of the officers of the National, State, and Subordinate Granges, shall be prescribed by the laws of the same.

ARTICLE XI.—*Treasurers.*

SECTION 1. The Treasurers of the National, State, and Subordinate Granges shall give bonds, to be approved by the officers of their respective Granges.

SEC. 2. In all Granges bills must be approved by the Master, and countersigned by the Secretary, before the Treasurer can pay the same.

ARTICLE XII.—*Restrictions.*

Religious or political questions will not be tolerated as subjects of discussion in the work of the Order, and no political or religious tests for membership shall be applied.

ARTICLE XIII.—*Amendments.*

This Constitution can be altered or amended by a two-thirds vote of the National Grange at any annual meeting, and, when such alteration or amendment shall have been ratified by three-fourths of

the State Granges, and the same reported to the Secretary of the National Grange, it shall be of full force.

BY-LAWS.

ARTICLE I. The fourth day of December, the birthday of the Patrons of Husbandry, shall be celebrated as the anniversary of the Order.

ART. II. Not less than the representation of twenty States present at any meeting of the National Grange shall constitute a quorum for the transaction of business.

ART. III. At the annual meeting of each State Grange it may elect a proxy to represent the State Grange in the National Grange in case of the inability of the Master to attend, but such proxy shall in all cases be Past-Masters of their State Granges.

ART. IV. Questions of administration and jurisprudence arising in and between State Granges, and appeals from the action and decision thereof, shall be referred to the Master and Executive Committee of the National Grange, whose decision shall be respected and obeyed until overruled by action of the National Grange.

ART. V. It shall be the duty of the Master to preside at meetings of the National Grange; see that all officers and members of committees properly perform their respective duties; to see that the Constitution, By-laws, and resolutions of the National Grange and the usages of the Order are observed and obeyed; and generally to perform all duties pertaining to such office.

ART. VI. It shall be the duty of the Secretary to keep a record of all proceedings of the National Grange, to keep a just and true account of all moneys received and deposited by him in the fiscal agency; to countersign all drafts drawn by the Treasurer; to conduct the correspondence of the National Grange, and to perform such other duties appertaining to his office as may be required by the Master and the Executive Committee.

It shall be his duty, at least once each week, to deposit with the Fiscal Agency holding the funds of the National Grange all moneys that may have come into his hands, and forward a duplicate receipt therefor to the Treasurer, and to make a full report of all transactions to the National Grange at each annual session.

It shall be his further duty to procure a monthly report from the Fiscal Agency with whom the funds of the National Grange are deposited of all moneys received and paid out by them during each month, and send a copy of such report to the Executive Committee and the Master of the National Grange.

He shall give bond in such sum and with such security as may be approved by the Executive Committee.

ARTICLE VII. Section 1. It shall be the duty of the Treasurer to issue all drafts upon the Fiscal Agency of the Order, said drafts having been previously approved by the Master and countersigned by the Secretary of the National Grange.

SEC. 2. He shall report monthly to the Master of the National Grange a statement of all moneys deposited to his credit in the fiscal agency, and of all drafts signed by him during the previous month.

SEC. 3. He shall report to the National Grange at each annual session a statement of all moneys deposited in the fiscal agency, and of all drafts signed by him since his last annual report.

It shall be his duty to collect all interest accruing on investments made by the Executive Committee, and to deposit the same in the fiscal agency.

ART. VIII. It shall be the duty of the Lecturer to visit, for the good of the Order, such portions of the United States as the Master or the Executive Committee may direct, for which services he shall receive compensation.

ART. IX. It shall be the duty of the Executive Committee to exercise a general supervision of the affairs of the Order during the recess of the National

Grange. They shall have authority to act on all matters of interest to the Order, when the National Grange is not in session; shall provide for the welfare of the Order in business matters: and shall report their acts in detail to the National Grange on the first day of its annual meeting.

The Master of the National Grange shall be considered, *ex officio*, a member of the Executive Committee.

ARTICLE X. Section 1. Such compensation for time and service shall be given the Master, Lecturer, Secretary, Treasurer, and Executive Committee, as the National Grange may from time to time determine.

Sec. 2. Whenever General Deputies are appointed by the Master of the National Grange, said deputies shall receive such compensation for time and services as may be determined by the Master or the Executive Committee: *Provided*, in no case shall pay from the National Grange be given General Deputies in any State after the formation of its State Grange.

ARTICLE XI. Section 1. The financial reports of Subordinate Granges shall be made on the first day of January, first day of April, first day of July, and first day of October.

Sec. 2. State Granges shall date their financial existence three months after the first day of January, first day of April, first day of July, and first day of October immediately following their organization.

ART. XII. Each session of the National Grange shall fix the compensation of its members.

ART. XIII. Special meetings of the National Grange shall be called by the Master upon the application of the Masters of twenty State Granges, one month's notice of such meeting being given to all members of the National Grange. No alterations or amendments to the By-Laws or Ritual shall be made at any special meeting.

ART. XIV. Upon the demand of five members, the yeas and nays may be called upon any question, and, when so called, shall be entered by the Secretary upon his minutes.

ART. XV. Past-Masters are Masters who have been duly elected and installed, and who have served out the term for which they were elected.

ART. XVI. Vacancies in office may be filled at any regular meeting of the Grange.

ART. XVII. Subordinate Granges may be consolidated in the mode and upon such terms as may be prescribed by the State Granges.

ART. XVIII. Section 1. In case satisfactory evidence shall be brought to the Master of the National Grange that a Grange has been organized contrary to the laws or usages of the Order, or is working in violation of its laws or usages, it shall be the duty of the Master to revoke the Charter of such offending Grange.

Sec. 2. In case satisfactory evidence shall come to the Master of a State Grange, that a Grange has been organized contrary to the laws and usages of the Order, or is working in violation of the same, it shall be the duty of the Master to suspend such offending Grange, and at once forward to the Master of the National Grange notice of the same, together with the evidence in the case, who shall, if in his opinion the good of the Order requires such action, revoke the Charter of such offending Grange.

Sec. 3. Granges, whose Charters are thus revoked, may appeal to the National Grange at its next session for the final action of that body.

ART. XIX. These By-Laws may be altered or amended at any annual meeting of the National Grange by a two-thirds vote of the members present.

But, with their preliminary organization thus completed, the question occurred, How should the farmers and planters be induced to accept this offered remedy for the ills from which they suffered?

It was finally arranged that Mr. Kelley should

resign his clerkship, and start on the 1st of April, 1868, on a mission to establish subordinate granges. He went under the direction of the National Grange, and was to receive a salary of \$2,000, provided he could collect that amount by the regular fees for organizing granges; but the National Grange had not the means, nor would it commit itself to a proposition to pay his salaries and expenses unless they could be collected in that way. Mr. Saunders, however, had more faith both in the cause and in Mr. Kelley's ability to make it known. He secured for him a ticket to Harrisburg, which was to be his first field of operations, gave him letters of credit on some of his friends, and saw him set out on his journey. Mr. Kelley, on starting, had but \$2.50 in his pocket. Arrived at Harrisburg, he organized a grange there, and went on toward Fredonia, N. Y., where he found good and true friends, and established a second. In his progress westward he found much opposition, but, with aid received from Mr. Saunders, he kept on his way organizing a weak grange at Columbus, Ohio, and another at Chicago. On the 1st of May he reached Minnesota, having organized four granges. In that State he established before the close of the year six more. Ten subordinate granges, in all, and the order had been in existence more than a year! Mr. Kelley remained upon his farm in Minnesota for the next two years and a half, though occasionally going out to lecture on the subject, and attending the sessions of the National Grange at Washington. The general feeling in the Northwest was not so much hostility as entire indifference to the subject. But, meantime, the order was slowly gaining ground in other directions. Colonel D. Wyatt Aiken, of Abbeville District, S. C., a warm-hearted and energetic planter, had become interested in it, and had been propagating its doctrines successfully in South Carolina, Georgia, and North Carolina, and other prominent Southern men had taken an interest in it, perceived its advantages to the South, and were making decided progress in their several States. In Iowa and Missouri, also, there was a growing feeling that it was likely to prove a good thing. Mr. Dudley W. Adams, the present Worthy Master of the National Grange, came into the order in Iowa in the beginning of 1870, and Mr. T. A. Thompson, the present Worthy Lecturer of the National Grange in February of that year. Both have proved valuable accessions to the order. Considerable changes were required in the secret work to make it more acceptable, and these having been made by Mr. Thompson in 1867, were adopted by the Executive Committee, and have added not a little to its popularity. Henceforth the progress of the order was to be one of wonderful rapidity. As we have seen, ten granges, or possibly eleven, were established in 1868; 39 in 1869; 38 in 1870; 125 in 1871; 1,105 in 1872; about 8,400 in 1873; and in the first two months of

1874, 4,618. As each subordinate grange consists of from 80 to 200 members, averaging not far from 100, the total membership of the order on the 1st of April, 1874, six years from the day when Mr. Kelley first set out on his missionary propagandism, cannot be less than 1,500,000. There are now only three States, Connecticut, Delaware, and Nevada, and three Territories, Idaho, Montana, and Washington, which have not organized State Granges, and in a few months there will not be exceptions. Iowa has about 2,000 subordinate granges, and Missouri nearly as many, while Indiana, Illinois and Kansas, are rapidly approaching the same number. Among the Southern States, Kentucky, Mississippi, Tennessee, and Georgia, have the largest number of granges, though the order is popular in all.

At the session of the National Grange in St. Louis, February 4-14, 1874; a declaration of the aims and purposes of the Order was unanimously adopted. It presents with such clearness the advantages it offers to the agriculturist, and its benevolent spirit toward all classes, even those which have been accustomed to regard it with hostility, that we cannot give the aims and objects of the order in any better form than this authoritative declaration:

Profoundly impressed with the truth that the National Grange should definitely proclaim to the world its general objects, we hereby unanimously make this declaration of the purposes of the Patrons of Husbandry:

1. United by the strong and faithful tie of agriculture, we mutually resolve to labor for the good of our order, our country, and mankind.

2. We heartily indorse the motto: "In essentials, unity; in non-essentials, liberty; in all things, charity." We shall endeavor to advance our cause by laboring to accomplish the following objects: To develop a better and higher manhood and womanhood among ourselves. To enhance the comforts and attractions of our homes, and strengthen our attachment to our pursuits. To foster mutual understanding and coöperation. To maintain inviolate our laws, and to emulate each other in labor. To hasten the good time coming; to reduce our expenses, both individual and corporate; to buy less and produce more, in order to make our farms self-sustaining. To diversify our crops, and crop no more than we can cultivate. To condense the weight of our exports, selling less in the bushel, and more on hoof and in fleece; to systematize our work, and calculate intelligently on probabilities; to discountenance the credit system, the mortgage system, the fashion system, and every other system tending to prodigality and bankruptcy. We propose meeting together, talking together, working together, buying together, selling together, and in general acting together for our mutual protection and advancement as occasion may require. We shall avoid litigation as much as possible by arbitration in the Grange. We shall constantly strive to secure entire harmony, good-will, vital brotherhood among ourselves, and to make our order perpetual. We shall earnestly endeavor to suppress personal, local, sectional, and national prejudices, all unhealthy rivalry, all selfish ambition. Faithful adherence to these principles will insure our mental, moral, social, and material advancement.

3. For our business interests we desire to bring producers and consumers, farmers and manufacturers, into the most direct and friendly relations possible. Hence we must dispense with a surplus of

middle-men; not that we are unfriendly to them, but we do not need them. Their surplus and their exactions diminish our profits. We wage no aggressive warfare against any other interest whatever. On the contrary, all our acts and all our efforts, so far as business is concerned, are not only for the benefit of the producer and consumer, but also for all other interests, and tend to bring these two parties into speedy and economical contact. Hence, we hold that transportation companies of every kind are necessary to our success; that their interests are intimately connected with our interests, and harmonious action is mutually advantageous. Keeping in view the first sentence in our declaration of principles of action, that "individual happiness depends upon general prosperity," we shall therefore advocate for every State the increase in every practical way of all facilities for transporting cheaply to the seaboard, or between home producers and consumers, all the productions of our country. We adopt it as our fixed purpose to open out the channels in Nature's great arteries, that the life-blood of commerce may flow freely. We are not enemies of railroads, navigation, and irrigating canals, nor of any corporation that will advance our industrial interests, nor of any laboring classes. In our noble order there is no communism, no agrarianism. We are opposed to such spirit and management of any corporation or enterprise as tends to oppress the people and rob them of their just profits. We are not enemies of capital, but we oppose the tyranny of monopolies. We long to see the antagonism between capital and labor removed by common consent and by enlightened statesmanship worthy of the nineteenth century. We are opposed to excessive salaries, high rates of interest, and exorbitant profits in trade. They greatly increase our burdens, and do not bear a proper proportion to the profits of the producers. We desire only self-protection and the protection of every interest of our land by legitimate transactions, legitimate trade, and legitimate profits.

4. We shall advance the cause of education among ourselves, and for our children, by all just means within our power. We especially advocate for our agricultural and industrial colleges that practical agriculture, domestic science, and all the arts, which adorn the home, be taught in their courses of study.

5. We especially and sincerely assert the oft-repeated truth taught in our organic law, that the Grange, National, State, or subordinate, is not a political or party organization. No Grange, if true to its obligations, can discuss political or religious questions, nor call political conventions, nor nominate candidates, nor even discuss their merits in its meetings. Yet the principles we teach underlie all true politics, all true statesmanship, and if properly carried out will tend to purify the whole political atmosphere of our country. For we seek the greatest good to the greatest number, but we must always bear in mind that no one by becoming a "Patron of Husbandry" gives up that inalienable right and duty, which belongs to every American citizen, to take a proper interest in the politics of his country. On the contrary, it is right for every member to do all in his power legitimately to influence for good the action of any political party to which he belongs. It is his duty to do all he can in his own party to put down bribery, corruption, and trickery; to see that none but competent, faithful, and honest men, who will unflinchingly stand by our industrial interests, are nominated for all positions. It should always characterize every "Patron of Husbandry" that the offices should seek the man and not the man the office. We acknowledge the broad principle that difference of opinion is no crime, and hold that progress toward truth is made by differences of opinion, while the fault lies in bitterness of controversy. We desire a proper equality, equity, and fairness; protection for the weak, restraint upon the strong; in short, justly-distributed burdens, and justly-distributed power. These are American ideas, the very essence

of American independence, and to advocate the contrary is unworthy of the sons and daughters of an American republic. We cherish the belief that sectionalism is, and of right should be, dead and buried with the past. Our work is for the present and the future. In our agricultural brotherhood and its purposes, we shall recognize no North, no South, no East, no West. It is reserved by every Patron, as the right of a freeman, to affiliate with any party that will best carry out his principles.

6. Ours being peculiarly a farmers' institution, we cannot admit all to our ranks. Many are excluded by the nature of our organization, not because they are professional men, or artisans, or laborers, but because they have not a sufficient direct interest in tilling or pasturing the soil, or may have some interest in conflict with our purposes. But we appeal to all good citizens for their cordial coöperation to assist in our efforts toward reform, that we may eventually remove from our midst the last vestige of tyranny and corruption. We hail the general desire for fraternal harmony, equitable compromise, and earnest coöperation, as an omen of our future success.

7. It shall be an abiding principle with us, to relieve any of our suffering brotherhood by any means at our command. Last, but not least, we proclaim it among our purposes to inculcate a proper appreciation of the abilities and sphere of woman, as is indicated by admitting her to membership and position in our order. Imploping the continued assistance of our Divine Master to guide us in our work, we here pledge ourselves to faithful and harmonious labor for all future time to return by our united efforts to the wisdom, justice, fraternity, and political purity of our forefathers.

Two or three points alluded to both in this declaration, and in the preamble to the constitution, may require a little further elucidation. The Order of "Patrons of Husbandry" is, we believe, the first of the secret societies which has admitted women into full and equal membership in all its organizations with the other sex; it is certainly the first which has given them a share of the official positions in such organizations. This has not been done in any concession to what is known as the "Woman's Rights" movement; but for two reasons: 1. That in the farmer's life, the woman, be she mother, wife, sister, or daughter, has her full share of the severe and often trying labor, not so much in the field as in the house; and, consequently, that in an institution, one of whose cardinal principles is to make home more attractive and happy, she has as much right to participate as man; and if, as is the case in every well-conducted grange, there are opportunities and methods of intellectual and social culture, her right to a share in them is as strong as that of the man. Political discussion being prohibited in the grange, there is no danger of her being instructed in politics there. 2. That thereby the attraction, purity, and elevated character of the grange, is supposed to be secured. There is no man who would be fit for membership in such an organization, who would not feel that it was a place of greater attraction for him, if his mother, wife, sister, or daughter, were to be present, and have a share in the exercises. This was a wise provision of the founders of the order, and one which will do much toward insuring its perpetuity. The social exercises, festivals,

picnics, and family-days, the singing, and the provision of musical instruments and libraries, for the granges, which have grown out of this admission of women to a participation in it, are not only very pleasant features of its life, but exert a powerful influence in refining and educating its members.

Coöperation is not an unmeaning word in the Order of "Patrons of Husbandry." All purchases and sales made through the officers of the State, or subordinate granges, being made for cash only, the order affords the finest field in the world for the successful working of the principles of coöperation; and this has already been inaugurated on a large scale, and will be greatly extended during the coming year.

PECKHAM, RUFUS W., an American jurist, born in Rensselaerville, Albany County, N. Y., December 20, 1809; lost at sea at the sinking of the *Ville du Havre*, November 22, 1873. In 1880 he became a resident of Albany, where he at once took a leading position at the bar. In 1837 he was elected District Attorney of Albany County. He was elected to Congress in 1852 on the Democratic ticket, and served one term, at the expiration of which he resumed the practice of law in partnership with Judge Tremain. In 1859 he was elected Justice of the Supreme Court, and served eight years. In 1867 he was reelected without opposition, being the candidate of both parties. While still holding this position he was, in 1870, elected to the Court of Appeals, of which he was a member at the time of his sudden death. His health had been so impaired by the hard work imposed upon the court during its earlier sessions that the physicians advised him to take a vacation. He expressed a preference for Florida, but at the suggestion of his brethren on the bench concluded to try the effect of the air of Southern France. In every position to which he was called he sustained a high reputation for integrity and fidelity to trust, and held the entire confidence of his associates.

PEET, HARVEY PRINDLE, LL. D., an eminent instructor of deaf-mutes, and author, born in Bethlem, Conn., November 19, 1794; died in New York City, January 1, 1873. He was brought up on his father's farm, and with limited advantages, doing farm-work in the summer and attending a district school in the winter. At the age of sixteen he taught a district school, and subsequently other schools of higher order, until he had earned the means for a two years' course at Phillips Academy, Andover. In 1818 he entered Yale College, from which he graduated in 1822, taking rank with the first ten in his class. It had been his intention to enter the ministry, but an invitation to teach in the American Asylum for the Deaf and Dumb, at Hartford, Conn., gave him the opportunity to develop his rare fitness for what was then a new profession. His life was thenceforward devoted to the cause of

deaf-mute education. An experience of nine years in Hartford won him the reputation of being one of the most efficient teachers of deaf-mutes in the world, and led to his being invited to take the position of Principal of the New York Institution, which under his care grew to be the largest and most successful of its kind in the world. Entering on this office in 1881, he fulfilled its duties for more than thirty-six years, during fourteen of which he was President of the Board of Directors. In 1867 Dr. Peet retired from the active labors of his position, retaining the title of Emeritus Principal, and serving upon the board until his death. In 1849 he received the degree of Doctor of Laws from the Regents of the University of the State of New York, and that of Ph. D., from the National Deaf-mute College in 1871. Dr. Peet was the author of "Course of Instruction for the Deaf and Dumb," four parts in 4 vols., 1844; "Scripture Lessons for the Deaf and Dumb," 1846; and various text-books, addresses, statistical reports, memoirs, etc.; contributed largely to the *American Annals for the Deaf and Dumb*, *Journal of Insanity*, and other periodicals.

PENNSYLVANIA. The convention to draft an amended constitution for the State of Pennsylvania, assembled at Harrisburg on November 12, 1872, and after January 1, 1873, assembled in Philadelphia and continued in session until November 3d. The constitution thus amended was submitted to the people for their approval or rejection. This election was held on December 16th. The vote for the constitution was 258,744; against the constitution, 108,594. The more important amendments may be briefly stated. A few changes are made in the declaration of rights. In the fifth section declaring that election shall be free and equal, the clause is added that

No power, civil or military, shall at any time interfere to prevent the free exercise of the right of suffrage.

The following additional declaration is made in section 7, on the liberty of the press:

No conviction shall be had in any prosecution for the publication of papers relating to the official conduct of officers or men in public capacity, or to any other matter proper for publication, investigation, or information, where the fact that such publication was not maliciously or negligently made shall be established to the satisfaction of the jury.

Section 12 declares

That no power of suspending laws shall be exercised by the Legislature or its authority.

Section 17 prohibits the Legislature from

Making irrevocable any grant of special privileges or immunities.

The article on the Legislature provides for biennial sessions of the General Assembly, the members of the House to be elected every second year, and the Senators to be elected for the term of four years.

Section 7 declares that—

No person hereafter convicted of embezzlement of public moneys, bribery, perjury, or other infamous

crime, shall be eligible to the General Assembly or to any office of profit or trust in this State.

The members of the General Assembly shall receive such salary and mileage as shall be fixed by law, and no other compensation whatever, whether as member of any committee or otherwise. No member shall receive any increase of salary or mileage under any law passed during the term for which he may have been elected.

The State shall be divided into fifty senatorial districts, and each district shall be entitled to one Senator. No county or city shall be entitled to more than one-sixth of the whole number of Senators. The House is to consist of 200 members.

The Executive Department shall consist of a Governor, a Lieutenant-Governor, a Secretary of the Commonwealth, Attorney-General, Auditor-General, State Treasurer, a Secretary of Internal Affairs, and a Superintendent of Public Instruction.

The Governor shall hold his office for four years, and shall not be eligible for the term next succeeding that for which he was elected. The Lieutenant-Governor, who shall preside over the Senate, but shall have no vote unless the Senate be equally divided, shall be elected for the same term and subject to the same provisions as the Governor. The salary of the Governor and Lieutenant-Governor shall be neither increased nor diminished after their election, nor during the term for which they shall have been elected.

In case of death, impeachment, resignation, or disability of the Governor, the powers, duties, and emoluments of the office shall devolve on the Lieutenant-Governor. On the subject of pardons, it is provided that

No pardon shall be granted, nor sentence commuted, except upon the recommendation in writing of the Lieutenant-Governor, Secretary of the Commonwealth, Attorney-General, Secretary of Internal Affairs, or any three of them, after full hearing, upon due public notice and in open session, and such recommendation, with the reasons therefor at length, shall be recorded and filed in the office of the Secretary of the Commonwealth.

Section 17 provides that

The Governor shall have power to disprove of any item or items of any bills making appropriations of money, embracing distinct items, and the part or parts of the bill approved shall be the law, and the item or items disapproved shall be void, unless re-passed according to the rules and limitations prescribed for the passage of other bills over the Executive veto.

The Secretary of Internal Affairs takes the place of the Surveyor-General, whose office shall be abolished. Besides the duties of the Surveyor-General's office, his department shall embrace a bureau of industrial statistics, and such duties relating to the charitable institutions, and the agricultural, manufacturing, mining, mineral, timber, and other material or business interests of Pennsylvania, as may be by law assigned to it. His term of office shall be for four years.

The Supreme Court is to consist of seven judges, who shall be elected by the people, and who shall hold their offices for the term of twenty-one years, if they so long behave themselves well, but shall not be eligible to re-election. Except in Philadelphia and the county of Alleghany, the Courts of Common Pleas shall remain as at present established, but not more than four counties shall at any time be included in one judicial district organized for said courts. In Philadelphia the jurisdiction and powers now vested in the District Courts and Courts of Common Pleas shall be vested in four separate and distinct courts of equal and coördinate jurisdiction composed of three judges each, and in Alleghany County of two such courts. The courts in Philadelphia and in the county of Alleghany shall from time to time detail one or more of the judges to hold the Courts of Oyer and Terminer and the Courts of Quarter Sessions.

The limited vote is to be applied whenever two or more judges of the Supreme Court are to be chosen for the same term of service. When two judges are to be chosen, each voter shall vote for one only, and when three are to be chosen he shall vote for no more than two, and the candidates highest in vote shall be declared elected. The court of *nisi prius* is abolished, and no court of original jurisdiction, to be presided over by any one or more of the judges of the Supreme Court, shall be established.

The Legislature shall have authority to abolish the office of associate judge after the terms of the present incumbents shall have expired. Whenever a county shall contain forty thousand inhabitants it shall constitute a separate judicial district, and shall elect one judge learned in the law.

In every city and county containing a population exceeding one hundred and fifty thousand, the Legislature shall, and in any other city or county may, establish a separate orphan's court, to consist of one or more judges learned in the law.

Parties by agreement filed may, in a civil suit, dispense with the trial by jury, and submit the decision of the case for hearing and determination to the court having jurisdiction. The evidence taken and the law as declared shall be filed of record, with right of appeal as in other cases and with like effect as appeals in equity.

SECTION 24. In all cases of felonious homicide, and in such other criminal cases as may be provided by law, the accused after conviction and sentence may remove the indictment, record, and all proceedings, to the Supreme Court for review, in the same manner as in civil cases.

The article on suffrage and elections provides that every person claiming the right to vote shall have been a citizen of the United States at least one month, shall have resided in the election district in which he offers to vote two months immediately preceding the

election, and shall have paid within two years a State or county tax which had been assessed at least two months and paid at least one month before the election.

Every ballot shall be numbered in the order in which it is received, and the number recorded by the election officers opposite the name of the elector who presents the ballot, and any elector may write his name on the back of his ticket.

All laws regulating elections or for the registry of voters shall be uniform throughout the State, but no elector shall be deprived of his vote by reason of his name not being registered.

Any person who shall give or promise any money or reward to an elector for his vote or for withholding the same, and any elector who shall receive or agree to receive for himself or another any money or reward, for his vote, shall forfeit the right to vote at such election; and any elector whose right to vote shall be challenged for such cause shall be required to swear or affirm that the matter of the challenge is untrue before his vote shall be received.

Any person who shall, while a candidate for office, be guilty of bribery, fraud, or willful violation of any election law, shall be forever disqualified from holding any office of trust or profit in this Commonwealth; and any person convicted of violating the election laws shall be deprived of the right of suffrage for four years.

In cases of contested elections or in proceedings investigating elections, no person shall be permitted to withhold his testimony upon the ground that it may criminate himself or subject him to public infamy; but such testimony shall not afterward be used against him in any judicial proceeding, except for perjury in such testimony.

All elections by persons in a representative capacity shall be *viva voce*.

For the purpose of voting, no person shall be deemed to have gained a residence by reason of his presence, or lost it by reason of his absence, while employed in the service, either civil or military, of this State or the United States, nor while engaged in navigating the waters of the State or of the United States, or the high-seas, nor while a student of any seminary of learning, nor while kept in a poor-house or other asylum at public expense, nor while confined in public prison.

The trial and determination of contested elections of electors of President and Vice-President, of members of the Legislature, and of all public officers, shall be by the courts of law, or by one or more of the law judges thereof. The Legislature shall by general law designate the courts by whom the several classes of election contests shall be determined, and regulate the manner of trial and all other matters relating to it.

The following is the sixteenth section of the article on "suffrage and elections: "

The Courts of Common Pleas of the several counties of the Commonwealth shall have power within their respective jurisdictions to appoint overseers of election to supervise the proceedings of election officers, and to make report to the court as may be

required; such appointments to be made for any district in a city or county, upon petition of five citizens, lawful voters of such election district, setting forth that such appointment is a reasonable precaution to secure the purity and fairness of elections; overseers shall be two in number for an election district, shall be residents therein, and shall be persons qualified to serve upon election boards, and in each case members of different political parties; whenever the members of an election board shall differ in opinion, the overseers, if they shall be agreed thereon, shall decide the question of difference; in appointing overseers of election, all the law judges of the proper court able to act at the time, shall concur in the appointments made.

On the subject of legislation the new constitution makes numerous and highly important provisions. The pernicious evil of special Legislation is cut up by the roots in the following section:

The Legislature shall not pass any local or special law.

Authorizing the creation, extension, or impairing of liens.

Regulating the affairs of counties, cities, townships, wards, borough or school districts.

Changing the names of persons or places.

Changing the venue in civil or criminal cases.

Authorizing the laying out, opening, altering, or maintaining roads, highways, streets, or alleys.

Relating to ferries or bridges, or incorporating ferries or bridge companies, except for the erection of bridges crossing streams which form boundaries between this and any other State.

Vacating roads, town-plats, streets, or alleys.

Relating to cemeteries, graveyards, or public grounds not of the State.

Authorizing the adoption or legitimatizing of children.

Locating or changing county-seats, erecting new counties, or changing county lines.

Incorporating cities, towns, or villages, or changing their charters.

For the opening and conducting of elections, or fixing or changing the place of voting.

Granting divorces.

Erecting new townships or boroughs, changing township lines, borough limits, or school districts.

Creating offices, or prescribing the powers and duties of officers in counties, cities, boroughs, townships, election or school districts.

Changing the law of descent or succession.

Regulating the practice or jurisdiction of, or changing the rules of evidence in any judicial proceeding or inquiry before courts, aldermen, or justices of the peace.

Regulating the fees or extending the powers and duties of aldermen, justices of the peace, magistrates, or constables.

Regulating the management of public schools, the building or repairing of school-houses, and the raising of money for such purposes.

Fixing the rate of interest.

Affecting the estates of minors or persons under disability, except after due notice to all parties in interest, to be re-enacted in the special enactment.

Remitting fines, penalties, and forfeitures, or refunding moneys legally paid into the Treasury.

Exempting property from taxation.

Regulating labor, trade, mining, or manufacturing. Creating corporations, or amending, renewing, or extending the charters thereof.

Granting to any corporation, association, or individual, any special or exclusive privilege or immunity.

Granting to any corporation, association, or individual the exclusive right to lay down a railroad-track.

Nor shall the Legislature indirectly enact such special or local law by the partial repeal of any general law, but laws repealing local or special acts may be passed.

Nor shall any law be passed granting any powers or privileges in any case where the granting of such powers and privileges shall have been provided for by general law, and in no case where the courts have jurisdiction, or are competent to grant the powers or give the relief asked for.

Every bill shall be read at length on three different days in each House. All amendments shall be printed before the final vote is taken on the bill, and no bill shall become a law unless on its final passage the vote is taken by yeas and nays, and unless a majority of the members elected to each House be recorded in its favor. The same provision is made in regard to amendments returned from one House to the other for concurrence, and to reports of committees of conference.

The presiding officer of each House shall, in the presence of the House, sign all bills and joint resolutions passed by the Legislature after their titles have been publicly read immediately before signing, the fact of signing to be entered on the Journal.

The general appropriation bill shall embrace nothing but appropriations for the ordinary expenses of government, interest on the public debt, and for public schools. All other appropriations must be by separate bill, embracing but one subject.

No appropriation shall be made to any charitable or educational institution not under the absolute control of the Commonwealth, other than normal schools established by law for the professional training of teachers for the public schools of the State, except by a vote of two-thirds of all the members elected to each House.

SECTION 19. No appropriations (except for pensions or gratuities for military services) shall be made for charitable, educational or benevolent purposes, to any person or community, nor to any denominational or sectarian institution, corporation, or association.

The Legislature is prohibited from creating special commissions to perform any municipal functions whatever.

No act of the Legislature shall limit the amount to be recovered for injuries resulting in death, or for injuries to person or property.

The investment of trust funds by executors and guardians in the bonds and stocks of any private corporation is prohibited.

No obligation of any railroad held or owned by the Commonwealth shall ever be exchanged, transferred, remitted, postponed, or in any way diminished by the Legislature, nor shall such obligation be released except on payment into the Treasury.

A member of the Legislature who shall solicit or receive, or consent to receive from any corporation, or person, any money, office, appointment, employment, testimonial, reward, thing of value or enjoyment, or of personal advantage or promise thereof for his vote or official influence, or for withholding the same, shall be held guilty of bribery within the meaning of the constitution, and shall incur the penal-

ties and disabilities provided for such offense. The same penalties are extended to any person who shall offer or give a bribe to any executive or judicial officer or member of the Legislature.

A member who has a personal or private interest in any measure pending before the Legislature shall disclose the fact, and shall not have a right to vote on the subject.

In the article on revenue, taxation, and finance, it is provided that all laws exempting property from taxation, except public property used for public purposes, actual places of religious worship, places of burial not used or held for private or corporate profit, and institutions of purely public charity, shall be void.

No debt created for the purposes of revenue shall ever exceed in the aggregate at any one time one million dollars.

The debt of no city, county, borough, or other municipality, shall exceed seven per cent. upon the assessed value thereof, nor shall any such municipality incur any new debt or increase its debt to an amount exceeding two per cent. upon such assessed valuation of property, without the assent of the electors at a public election held in such manner as shall be provided by law.

By the article on education the Legislature is required to provide for the maintenance of a thorough and efficient system of public schools, and to appropriate at least one million dollars every year for this purpose.

No money raised for the support of the public schools shall be used for the support of any sectarian school.

The article on railroads and canals provides that any association or corporation organized for the purpose, may construct and operate a railroad or canal between any two points in the State. Any railroad may intersect with any other railroad, and may pass its cars, empty or loaded, over such other railroad. No undue discrimination shall be made in charges or freights passing from one railroad to another, and no unnecessary delay shall be interposed in forwarding such passengers and property to their destination. The Legislature is required by general law to give full effect to these powers and rights.

Every railroad or canal company doing business in this State is required to maintain an office in the State where the transfers of its stock shall be made, and books kept for inspection by any person having a pecuniary interest in such corporation. In these books shall be recorded the amount of stock subscribed or paid in, and by whom, the names of the owners of its stock, the transfers of stock, and the names and residences of its officers.

The property of railroad companies, and of all other joint-stock companies, doing business in the State, shall forever be subject to taxation, and the power to tax the same shall not be surrendered or suspended by any grant or contract to which the State shall be a party.

No railroad or canal company, nor the lessees or managers of any railroad or canal company, shall consolidate the stock, property, or franchises of such corporation with, nor lease, purchase, or in any way control, any other railroad or canal corporation, owning or controlling a parallel or competing line. The officers of such railroad or canal company are prohibited from acting as officers of any other railroad or canal company owning or controlling a parallel or competing line. Whether railroads or canals are parallel or competing lines shall always be decided by a jury in a trial according to the course of the common law.

No incorporated company doing the business of a common carrier shall, directly or indirectly, prosecute or engage in mining or manufacturing articles for transportation over the works of said company; nor shall such company, directly or indirectly, engage in any other business than that of common carriers, or hold or acquire lands, freehold or leasehold, directly or indirectly, except such as shall be necessary for carrying on its business; but any mining or manufacturing company may carry the products of its mines and manufactories on its railroad or canal not exceeding fifty miles in length.

Presidents, directors, officers, agents, and other employes, of railroad and canal companies, shall not engage, or be interested, directly or indirectly, otherwise than as stockholders in such railroad or canal companies, in the transportation of freight or passengers, as common carriers, over the works of any company of which they are presidents, directors, agents, or employes, and they shall not so engage or be interested in the transportation of freight or passengers over the works of any other such company, except as stockholders in such company which may be leased, or the majority of the capital stock of which may be owned or controlled by the company of which they are presidents, directors, officers, agents, or employes.

No transportation company in this State shall make any discrimination in charges for either freight or passengers between or against the people of the State, nor make a higher charge for a shorter than for a longer distance, including such shorter distance, and no special rates or drawbacks shall, either directly or indirectly, be allowed excepting excursion and commutation tickets. Reasonable extra rates, within the limits of the charter of a company, may be made for any distance not exceeding fifty miles.

All discriminations by railroad companies in their rates of freight or passage over their roads in form of transportation companies, or others engaged in transportation, by abatement, drawback, or otherwise, are prohibited.

Railroad companies shall not grant free passes, or passes at a discount, to any person except officers and employes of the company.

No street passenger-railway shall be constructed within the limits of any city, borough, or township, without the consent of its local authorities.

No railroad, canal, or other transportation company, in existence at the time of the adoption of this article, shall have any beneficial legislation by general or special laws, except on condition of complete acceptance of all the provisions of this article.

The power of eminent domain shall never be

abridged or so construed as to prevent the taking by the Legislature of the property and franchises of incorporated companies, and subjecting them to public use, the same as the property of individuals, and the exercise of the police power of the State shall never be abridged or so construed as to permit corporations to conduct their business as to infringe the equal rights of individuals or the general well-being of the State.

In all elections for the managing officers of a corporation the free vote is applied. Each member or shareholder may cast the whole number of his votes, or distribute them upon two or more candidates, as he may prefer.

No foreign corporation shall do any business in this State without having one or more known places of business, and an authorized agent or agents in the State, upon whom process may be served.

Any general banking law which shall be passed shall provide for the registry and countersigning by an officer of the State of all notes or bills designed for circulation, and ample security to the full amount of the notes issued shall be deposited with the State Treasurer for their redemption.

The article on cities and city charters provides that the Legislature shall pass general laws whereby a city may be established whenever the majority of the voters of any town or borough, having a population of at least ten thousand, shall vote in favor of the same being established.

Every city shall create a sinking fund, which shall be inviolably pledged for the payment of its funded debt.

The debt of the State on November 30, 1873, was as follows:

FUNDED DEBT.	
Six per cent. loans.....	\$30,540,590 00
Five per cent. loans.....	4,972,354 01
Four and a half per cent. loans.....	57,900 00
	<u>\$35,569,994 01</u>
UNFUNDED DEBT.	
Relief notes in circulation..	\$92,949 00
Interest certificates outstanding.....	18,049 03
Interest certificates unclaimed.....	4,448 36
Domestic creditors' certificates.....	44 57
Chambersburg certificates outstanding.....	84,829 54
Chambersburg certificates unclaimed.....	367 23
	<u>196,897 93</u>
Total public debt, November 30, 1873.....	\$35,766,891 94
BONDS IN SINKING FUND.	
Amount brought forward.....	\$35,766,891 94
Bonds of the Pennsylvania Railroad Company.....	\$5,700,000 00
Bonds of the Alleghany Valley Railroad Company....	3,500,000 00
	<u>\$9,200,000 00</u>
Cash in Treasury, November 30, 1873.....	1,825,151 24
	<u>11,025,151 24</u>
Indebtedness unprovided for.....	\$14,773,670 70

The total revenue of the State government for the year ending December 1, 1873, was \$7,076,723.20. The expenditure amounted to \$6,734,027.57, leaving a balance in the Treasury on December 1, 1873, of \$1,825,151.24. Of the revenue the largest item is derived from the tax on corporation stocks, amounting to \$1,415,627.31. To this the Pennsylvania Railroad Company contributed \$226,967; the Philadelphia & Reading Company, \$164,441.11; the Lehigh Valley Company, \$98,233.68; and the Delaware, Lackawanna & Western Company, \$66,763.09.

Next in amount is the revenue from the tax on gross receipts, which reached \$797,759.42. Of this, the Philadelphia & Reading Railroad Company paid \$256,355.26, and the Pennsylvania Railroad Company \$185,727.90. This important source of revenue was cut off by the Legislature in the early part of the year, together with the State tax on horses, cattle, and other personal property, and on net earnings.

Next in importance comes the tax on loans, the revenue from which amounted in 1873 to \$688,382.93, to which the Pennsylvania Railroad Company contributed \$98,305.57; the Philadelphia & Reading Railroad Company, \$89,756.86; the Philadelphia & Reading Coal Company, \$42,823.68; the Lehigh Valley Railroad Company, \$47,449.56; the Lehigh Coal and Navigation Company, \$46,376.48; and the city of Philadelphia, \$97,016.88.

The tax on the net earnings, or income of manufacturing companies, city passenger railway companies, gas companies, bridge companies, turnpike companies, and private bankers, amounted to \$446,286.20. The revenue from the tax on tonnage was \$385,870.94, of which the Philadelphia & Reading Railroad paid \$117,820.86, and the Pennsylvania Railroad Company \$61,422.95, exclusive of the commutation of tonnage tax, amounting to \$280,000. From the tax on coal the revenue was \$336,353.91, of which the Delaware & Hudson Canal Company paid \$146,571.04; the Delaware, Lackawanna & Western Company, \$92,469.04; the Pennsylvania Coal Company, \$40,066.80, and the Lehigh Coal and Navigation Company, \$38,086.44.

The tax on personal property produced \$541,607.91. Retailers' licenses yielded a revenue of \$424,974.80; tavern licenses, \$327,973.99, and beer and restaurant licenses, \$42,165. The tax on bank stocks was \$288,148. Foreign insurance companies contributed \$353,490.78. The collateral inheritance tax paid by reluctant heirs amounted to \$327,973.99. The tax on wills, deeds, and writs, produced \$118,117.53. Premiums on charters amounted to \$68,348.76. The revenue from the tax on the enrollment of special, private, and local laws, was \$36,800.

Billiard-rooms and ten-pin alleys paid \$10,552.94; the distillers and brewers for license, \$8,009.47; the millers, \$4,480.84; the brokers,

\$10,736.98; notaries public, \$7,450; the auctioneers, \$13,765.34; the peddlers, \$2,830.88; the patent-medicine men for license, \$3,875.91.

Of his revenue of upward of seven millions, \$1,563,029.20 was absorbed in payment of interest on the State debt, the largest portion of the bonds having been raised from gold-bearing fives to six per cents. in currency. The expenditures of the executive, legislative, and judicial departments of the government amounted to \$990,987.77. For the common schools, \$804,097.89 was expended. The Soldiers' Orphan Schools consumed \$469,308.94 more. Charitable institutions cost \$439,307.13. The expenses of the Constitutional Convention were \$410,723.80. Public buildings and grounds cost \$90,591.23. The cost of the penitentiaries to the State was \$73,882, and of the House of Refuge, \$55,325. Militia expenses were \$34,227, and the Williamsport riot cost \$24,806; \$50,334 was expended in pensions and gratuities; \$1,551,762 was applied to the payment of the principal of the State debt.

With these heavy expenditures the balance in the Treasury on December 1, 1873, was little less than \$2,000,000.

It is expected that in 1874 the receipts from all sources will be \$1,500,000 less than the receipts of 1873, while the expenditures will not be diminished. This loss of revenue will be largely due to the repeal of taxes bearing heavily upon the industrial interests of the Commonwealth, and partly to the prostration of business. The receipts of 1875 may be about the same as those of 1874, but the expenditures will be greater, owing to the additional outlay necessary for schools, Legislature, and judiciary under the new constitution, which will then be in full force. Notwithstanding this enormous decrease in the receipts and increase in expenditures, it is believed that by the most rigid economy in every branch of the government and moderate appropriations the revenues in the future will be sufficient to meet all the demands on the Treasury and leave a balance to reduce the indebtedness of the State, as required by the constitution.

In compliance with the constitutional amendment of 1857, the Legislature in 1858 created a sinking fund for the payment of the interest on the State debt, and for an annual reduction of the principal in a sum not less than \$250,000 per annum. In addition to the securities designated by the amendment, the revenues arising from certain taxes were assigned to this fund. From that time, each succeeding year, the interest on the debt has been punctually paid, and the portion of principal redeemed instead of amounting to \$250,000 has grown to the immense sum of \$1,000,000 to \$2,000,000 per year. The reason is a simple one; the revenues set apart for the sinking fund, by the natural growth of these special taxes, have become annually much larger,

while the amount required to be paid on account of interest, by reason of the rapid decrease of the public debt, has every year become smaller, and in this way the annual credits to the sinking fund have swollen to proportions never contemplated by the original advocates of the measure.

The cause of education is making decided progress in Pennsylvania. The State is increasing the number of schools, enlarging each year the sphere of instruction, extending the time within which schooling may be obtained and supplying more of the conveniences necessary for the comfort and health of scholars and teachers; still there are many defects in the present system.

Prominent among these is the lack of proper training and other qualifications of the teachers of the schools. "Of the 15,008 teachers receiving certificates to teach during the year, only 374 were found to have a thorough knowledge of reading, writing, arithmetic, geography, and grammar, and that practical preparation for their profession which insures success," is the startling declaration made by the Superintendent of Common Schools. The necessity of establishing normal schools wherein students are specially qualified and trained for teachers is conspicuously shown in these statistics, and it is a gratification to know that twelve of these institutions have been erected or are in process of erection in various parts of the State. The Governor, in his address to the Legislature, expresses himself in favor of a system of compulsory education. He says: "More thorough examination of the subject strengthens me in the conviction that the State must adopt some mode to compel the attendance of those children whose parents are unwilling or unable to allow their offspring to avail themselves of the benefits our school system affords. The solution of this important question presents grave difficulties, but I expect to see them all surmounted. Some plan must be devised to snatch these children from the career of idleness and crime to which ignorance will consign them. By far the greater portion of the inmates of our penitentiaries never attended schools, or had the advantages of education. Is modern civilization unequal to the task of rescuing the children of the indigent and the criminal from such a fate?"

The Republican State Convention assembled at Harrisburg, on August 18th, to nominate candidates for State Treasurer and a Judge of the Supreme Court. W. R. Mackey was nominated for Treasurer, and Isaac Gordon for Judge of the Supreme Court. The following resolutions were unanimously adopted:

Resolved, That the Republicans of Pennsylvania, in convention assembled, renew their expressions of confidence and devotion to the principles of republicanism, and declare—

1. That they heartily indorse and we readopt the Republican national and State platforms of 1872.
2. That the national Administration demands

their continued confidence, and is entitled, by its promotion of the best interests and prosperity of the nation, to the earnest support of the people.

3. That the administration of Governor Hartranft calls for our warmest approbation. During the short time he has been in the Executive Department he has established a State policy which has justly endeared him to the people of this Commonwealth, and has amply justified the confidence we have placed in him.

4. That while earnestly in favor of constitutional reform and of such revision of our State constitution as will make it an effective instrument in preventing and punishing corrupt abuses that have crept into our present system, we demand emphatically and especially that whatever is done or left undone, the main purpose for which the Constitutional Convention was called, the absolute prevention of special legislation, shall be so placed before the people as to secure their separate and decisive expression thereon.

5. That the reduction of the State debt from \$41,000,000 to \$26,000,000, the repeal of all taxes on real estate, the establishment of schools for the education and support of soldiers' orphans, the maintenance of our excellent and prosperous system of common schools, and the establishment of a policy paying off our debt at the rate of \$2,000,000 a year, together with the generally flourishing condition of our prosperous old Commonwealth, are evidences that the Republicans, during their twelve years of control in Pennsylvania, have faithfully administered her affairs, and her government may be safely left in their hands.

6. That there should be rigid economy in the State and national administrations, and taxes should be reduced in both as rapidly as consistent with good government, the maintenance of public credit, and the certain extinguishment of the State and national debts.

7. That the public lands belong to the people and should be sacredly reserved for homes for actual settlers, and we pronounce against all further grants of these lands to corporations.

8. That adequate provision should be made by law for the protection of persons engaged in mining and other hazardous forms of labor.

9. That when retrenchment is required to lighten the burden of taxation and to continue the reduction of the public debt, an increase of salaries is unwise, and we condemn without reserve voting for or receiving increased pay for services already rendered, whether in State or nation, and demand that the provisions of the late act of Congress by which salaries were increased should promptly and unconditionally be repealed.

10. That we heartily denounce corruption, wherever found, and are sincerely desirous for honest economy and political purity in all official administrations. To secure this is the duty of every citizen, and to this end every good man should feel bound, not only to participate in politics, but to labor actively to see that none but good men secure party appointment or nomination.

11. That the practice of loading an appropriation bill, essential to the support of the Government, with objectionable legislation, in the shape of amendments, toward the close of the session, is the prolific source of abuse and fraud upon the people, and its reform is urgently demanded; that, as commerce and home industry have both uniformly prospered under a tariff so arranged as to afford both revenue and protection, the present tariff should be left undisturbed, and, as all tariffs are levied primarily for revenue, it would be a poor government indeed which could not afford to arrange its details so as to encourage the growth of home manufactures and the creation of a remunerative home market for all products of our soil.

12. That order and security in the States lately in rebellion must come through stern enforcement of

laws, enacted to protect life, liberty, and freedom of thought, and cannot be secured by rendering these just and necessary laws inoperative through executive clemency to unrepentant assassins now undergoing punishment in pursuance of law.

14. That, as during the time the Republican party has been in power, it has had to confront graver difficulties, and more new and perplexing questions of government, than ever were presented to any other party to solve, and has solved them so judiciously and wisely that the country indorses its decisions, and accepts its work, it is the only organization competent to so meet the grave issues that are now constantly arising, and to secure the just rights of the whole people.

15. That we sympathize with every movement to secure for agriculture and labor their due influence, interests, and rights, and the Republican party will be their ally in every just effort to attain their ends.

The Democratic State Convention assembled in Harrisburg on August 27th. F. M. Hutchinson was nominated for State Treasurer, and James R. Ludlow as a candidate for Judge of the Supreme Court. The following resolutions were adopted:

Resolved, That the Democratic party of Pennsylvania, in State Convention assembled, believing that the platform of the late Democratic Convention of Ohio is sound in principle, do hereby substantially resolve: First, that the Democratic party seeks to revive no dead issues; but stands by its principles, which are suited to all times and circumstances. It supports the Federal Government in all its constitutional authority, and opposes nullification and secession. It defends the reserved rights of the States and people, and opposes the centralization that would impair or destroy them. In order to preserve and maintain these rights, it insists upon a strict construction of the Federal Constitution. It resists all attempts in this department of the Government to usurp or destroy the constitutional rights or independence of other departments. It opposes all interference by law with the private affairs or business of men not required by public peace or safety, and advocates the greatest individual liberty consistent with public order. It believes in the capacity of the people for self-government, and opposes all property qualifications as conditions to the right of suffrage or eligibility to hold office. It favors a liberal law for the naturalization of foreigners. It insists upon equal and exact justice to all men. It opposes all monopolies, and denies that it is within the province of the Government to legislate for the benefit of particular classes, at the expense and to the detriment of the rest of the community. It therefore opposes the system by which a large portion of the profit-producing wealth of the country is exempted from taxation, and demands that all constitutional measures shall be used to remedy its injustice. It recognizes the evils of an irredeemable currency, but insists that in the return to specie payments care shall be taken not to seriously disturb the business of the country or unjustly injure the debtor class. It appreciates the benefits conferred by railroads, but opposes all combinations of railroad companies to prevent competition, and thus enhance the cost of transportation. It opposes all laws that give to capital any advantage over labor. It requires honesty and economy in every department, Federal or State, and it condemns corruption, whoever may be the guilty parties. It is, in its very nature, as a necessary result of its principles, a party of progress, and supports all measures of reform or improvement that are sanctioned by justice and commended by sound practical wisdom.

Resolved, That the wealth of the country is the product of its labor, and the best use of capital is that which gives employment and liberal wages to the producing classes. Hence, every just measure

that tends to protect them from oppression, and to improve their condition, and dignify their calling, deserves and receives our sympathy and support; and that we cordially recommend the conservative resolutions adopted at the recent National Labor Congress at Cleveland, favoring arbitration and co-operation.

Resolved, That although always a large majority of the American people, the agriculturists have never demanded of the Government, State or Federal, any special privilege; have never infested the halls of Congress or the Legislature with lobbyists and rings, but, on the contrary, have suffered under discriminating and unjust laws until forbearance has ceased to be a virtue. We hereby pledge our sincere and honest efforts to obtain for them a redress of their grievances, and equal and exact justice.

Resolved, That the public lands should be sacredly reserved for actual settlers, who dwell upon and cultivate them, and that we will continue to denounce and oppose, as we have always denounced and opposed, all gifts of such lands by the Government to incorporated companies.

Resolved, That the greatest danger to free institutions is the wide-spreading corruption that threatens the utter destruction of public virtue. When the Credit Mobilier frauds pass unpunished; when those engaged in them are elevated to high official position; when seats in the Federal Senate are notoriously purchased; when vast sums of money are corruptly employed in popular elections; when an army of office-holders, with the sanction of the Government, use their official influence to control elections; when the bribery of custom-house officers is an established usage; when rings of plunderers are the recipients of millions of money appropriated for public use; when official defalcations are of such frequent occurrence as scarcely to excite attention; when Presidential pardons relieve defaulters from punishment, and presidential appointments reward Credit Mobilier and salary-grabbing Congressmen, and when congressional investigation is generally a whitewashing affair, it is not strange that men begin to lose confidence in free institutions, and that the fame of the great republic is tarnished throughout the civilized world. To remedy these evils, we insist that the receipts and expenditures of the Government shall be diminished; that its patronage shall be curtailed, and all useless offices abolished; that it shall cease to usurp functions to which it has no title but official misconduct and fraud; that corruptions in elections shall be rigorously punished, and that public virtue shall be upheld, and want of it condemned by the voice of the people.

Resolved, That we condemn without reserve the act of Congress, granting additional salaries and the back-pay grabs, as unjust and unjustifiable, and demand its immediate and unconditional repeal; and we denounce every member of Congress, whether Republican or Democrat, who supported the law, or received the money procured thereby, and we especially denounce the conduct of President Grant, in using the influence of his high position for its passage, and whose official signature made it a law.

Resolved, That we will no longer tamely submit to the repetition of the election frauds by which the will of the people, expressed at the ballot-box, has been subverted for some years past, and that the Democratic State Central Committee be directed to use all their efforts to prevent a repetition of these outrages on the franchises of the people; and if, in spite of their efforts to secure an honest election, the popular will is again fraudulently overborne, to adopt such measures as will result in the certain vindication of the rights of the legal voters of this Commonwealth.

Resolved, That the act of the President in setting up by the bayonet a government in Louisiana not chosen by her people, and having no title whatever to rule over them, was a flagrant violation of her rights under the Federal Constitution.

Resolved, That every department of the Government being in the hands of the Republican party, they are justly responsible for the evils and wrongs in legislation and administration of which the country complains.

Resolved, That under the time-honored Democratic banner, with this declaration of principles inscribed on its folds, we engage in the conflict, and we earnestly appeal to patriotic men of every class, without regard to party names or past differences, to unite with us on terms of perfect equality in the struggle to rescue the Government from the hands of dishonest men, and redeem it from the flood of corruption which threatens its ruin.

The State election was held on October 14th, at which the total vote for State Treasurer was 464,294, of which Hutchinson received 219,471, and Mackey 244,823; majority for Mackey, 25,352. The total vote for Judge of the Supreme Court was 466,178; of which Ludlow received 225,946, and Gordon 240,232; Gordon's majority, 14,286. The Legislature was divided as follows:

	Republicans.	Democrats.
Senate.....	20	12
House.....	57	43

1 Liberal Republican in the Senate.

Under the amended constitution the State election will be held biennially, on the Tuesday after the first Monday in November, and the Legislature will meet on the first Tuesday in January of every second year.

On March 24th an election was held on the question of granting licenses to sell intoxicating liquors. Under an act of the Legislature of the previous year such an election was provided for in every city and county of the State,

It was also further provided that at the expiration of every subsequent period of three years a similar election should be held. The act further provided that "whenever, by the returns of elections in any city or county aforesaid, it shall appear that there is a majority against license, it shall not be lawful for any court or board of license commissioners to issue any license for the sale of spirituous vi-nous, malt, or other intoxicating liquors, or any admixture thereof, in said city or county, at any time thereafter, until, at an election as above provided, a majority shall vote in favor of license: *Provided*, That nothing contained in the provisions of this act shall prevent the issuing of licenses to druggists for the sale of liquors for medicinal and manufacturing purposes."

The question of the constitutionality of this law was brought before the Supreme Court. A majority of the court decided it to be constitutional. They held that the Legislature passed a law prohibiting the sale of intoxicating liquors, and provided penalties for a breach of its requirements. Thus it was a perfect law when it left the Governor's hands; the vote of the people did not make the law, did not give force to any prohibition, did not create a penalty, but simply expressed an opinion upon the law, their sentiments and wishes in regard to it. Such a vote might be very useful in ascertaining the utility or advisability of a particu-

lar law, and when the Legislature simply calls to its aid the vote of the people to ascertain their views, it acts strictly within its proper sphere.

The Chief-Justice (Read) and Judge Sherwood dissented. The former held that the power of making laws was given to the Legislature, and by express words confined to that body; and the Legislature could no more delegate its functions than the judiciary. This law had no force or vitality until voted upon; it was enacted not by the Legislature, but by the voters. This was permitting a portion of the citizens to inflict upon another portion uncalled for punishment and unwonted penalties. For these reasons the act was deemed unconstitutional.

At the election which was held, the majority in favor of granting licenses exceeded 22,000.

Among the acts passed at the session of the Legislature was one repealing the laws exempting real estate from taxation. By the provisions of this act the only property exempted from taxation was as follows:

All churches, meeting-houses, or other regular places of stated worship, with ten acres of land annexed thereto.

All universities, colleges, academies and school-houses belonging to any county, borough, or school district, or incorporated, erected, endowed, or established by virtue of any law of this State, with ten acres of land annexed thereto.

All court-houses and jails.

All parsonage owned by any church or religious society, with five acres of land attached thereto.

All the burial-grounds belonging to any religious congregation.

All burial-lots belonging to any person or family.

All lands and premises belonging to any person or family.

All lands and premises belonging to cemetery companies where the revenues are used solely to improve such lands and premises.

All lunatic asylums, almshouses, poor-houses, houses of refuge, and penitentiaries, with lands attached to same.

All asylums, schools and hospitals, with the lands attached to the same, where the same are supported by State appropriations.

All charitable institutions and lands attached thereto, whose chief revenues are from voluntary contributions.

The repealing clause subjects all classes of property not covered by these descriptions to general taxation.

An act was also passed, in which an appropriation was made to defray the expense of stocking the rivers of the State with fish.

A supplement to the act to reorganize the militia of the State was also adopted, which provides that in time of peace the National Guard shall comprise an aggregate not exceeding ten thousand—officers, non-commissioned officers, musicians and privates—and shall consist of two hundred companies, fully armed, uniformed, and equipped, to be distributed among the several military divisions of the State, according to the number of its taxable population; but the commander-in-

chief shall have power, in case of war, insurrection, invasion, or imminent danger thereof, to increase the force beyond the said ten thousand, and organizes the same as the exigencies of the service may require. Every company properly and legally organized shall receive annually the sum of four hundred dollars from the State Treasury.

An act was also passed making an appropriation to stock the rivers of the State with fish. The commissioners succeeded in hatching at Newport, Perry County, where the water is peculiarly fitted for the purpose, about 2,700,000 shad, which were turned into the Juniata River at that point. Twenty-six hundred black bass were also distributed in the Susquehanna, Lehigh, and Juniata Rivers during the months of July and August; and through the kindness of Prof. Spencer F. Baird, United States Fish Commissioner, 27,700 California salmon have been planted in the Susquehanna and its tributaries. The bass are not migratory fish, and are very prolific. Two or three hundred were placed in the Susquehanna, near Harrisburg, in 1870, and the rapidity with which they multiply is manifest in the great numbers of this beautiful and choice fish that are now found in the river in that vicinity.

The law of 1873, authorizing the fish commission, directed that four fish-ways should be constructed at different dams on the Susquehanna and Juniata Rivers, so as to enable shad, on their spring incursions from the sea, to make the ascent of these streams. The question whether shad will ascend an artificial way is still, however, an undecided one, and encountering this doubt the commission, in the exercise of what will be deemed a sound discretion, concluded to erect but one fish-way, and that at the Columbia dam. This way is 120 feet long by 60 feet wide, is very gradual in the incline, and made as nearly conformable as possible to natural ways over which shad do undoubtedly pass, and will afford a practical test of this experiment. If in the spring of 1874 it is found shad do pass up this fish-way the others required by law will be constructed without delay.

The result of the combined operation of the Pennsylvania Central and New Jersey Railroads for 1873 is thus stated:

EARNINGS.	
Pennsylvania Railroad.....	\$24,886,008 90
United Railroads of New Jersey.....	8,516,729 33
Delaware & Raritan Canal.....	1,590,100 13
Total.....	\$34,992,848 36

EXPENSES.	
Pennsylvania Railroad.....	\$15,440,895 16
United Railroads of New Jersey.....	6,792,188 06
Delaware & Raritan Canal..	833,321 46
	\$23,115,914 67

Net earnings..... \$11,877,034 28

The charitable and penal institutions of the State continue in most successful operation.

PERSIA, a country of Asia. Reigning sovereign, Nassr-ed-Din, Shah of Persia, born

September 4, 1829, eldest son of Shah Mohammed, succeeded to the throne at the death of his father, September 10, 1848. Children of the Shah: Muzaffer-ed-Din, heir-apparent, born in 1850; Djilal-ed-Dauleh, born in 1853. The present sovereign is the fourth of the dynasty of the Khadjars, which fully secured the rule over the country in 1794. It is within the power of the Persian monarchs to leave the crown, with disregard to the national heir, to any member of the family.

The area of Persia is estimated at 636,000 square miles. The population is about 5,000,000. The vast majority of the inhabitants of Persia are Mohammedans. The Armenian population is estimated at 4,660 families, or 26,035 souls; the Nestorians, including both Protestants, and persons who have joined the Roman Catholic Church (Chaldees about 3,500 souls, and 600 families), respectively at 4,100 families, or 25,000 souls; the Jews at 16,000 souls; the Quebres or Parsees at 1,200 families, or 7,190 souls. The new sect of the Babis, which was founded about forty years ago, is believed to have a very large number of adherents, notwithstanding the cruel persecution to which it has been subjected. The Gregorian Armenians have an archbishop at Ispahan, who resides in the suburb Djulfah; and another archbishop at Tabreez; the United Armenians have an Episcopal see in Ispahan, which was established by Pius IX. The Nestorians have two Metropolitans, and two bishops. The Chaldees, or United Nestorians, have an archbishop at Kerkuk, and a bishop at Salmas. The aggregate number of United Armenians and Nestorians is from 7,000 to 8,000.

The country is divided into twenty provinces, each of which is administered by a Beglerbeg, or civil and military governor. The provinces are subdivided into districts, superintended by a Hakim, or governor-lieutenant, whose chief duty is the collection of revenue. The towns are governed by an elective Ketkhodah, or magistrate; the villages by a Muhuleh, who administer justice, and serve as organs of intercommunication between the people and the Government.

The foreign powers which, in 1873, were represented in Persia by diplomatic agents and consuls, were Belgium, France, Great Britain, Austria, Prussia, and Turkey.

Regular budgets have not been yet published. According to the reports of the English consul, R. Thomson, the expenditures of the year 1868, amounted to 4,361,660 toman (1 toman = \$2.25): the receipts to 4,912,500 toman. The revenue is raised by assessments upon towns, villages, and districts, each of which has to contribute a fixed sum, the amount of which is changed from time to time by the tax assessors, appointed by the Government. The burthen of taxation lies upon the laboring-classes of the Mohammedan faith. Persia has no public debt.

The standing army of Persia comprises, 18,000 infantry, 10,000 irregular cavalry, 1,500 artillery, 600 regular cavalry; total 30,000 men. The reserve numbers 75,000 men, who are allowed to reside in their own villages and districts, where they may engage in agriculture and other pursuits, subject to no drill or military discipline; the infantry and artillery being usually disarmed when placed on this footing. The non-Mohammedans are exempt from military duty.

The imports of Persia are estimated at \$12,240,000; the exports at \$7,200,000. The chief article of imports are cotton-goods from England; the chief exports, silk, opium, and cotton.

The year 1873 will be memorable, in the history of Persia, for the first journey which a ruler of this country has undertaken through the great Christian countries of Europe. The intention of the Shah to make the journey was, in 1872, officially announced to the European courts, and it was carried out, notwithstanding the desperate efforts made by the Mohammedan priests to prevent it. A Russian war-steamer conveyed him across the Caspian Sea to Astrakhan, where he arrived on May 15th. He visited in succession the Governments of Russia, Germany, Belgium, England, France, Austria, Italy, and Turkey; and was everywhere received by the reigning families with great marks of honor, and by the people with exceeding curiosity. In Berlin, the visit led to the conclusion of a commercial treaty between Germany and Persia, where German interests, as Prince Bismarck remarked, had thus far been but very insufficiently represented. In Constantinople, the Shah, on August 22d, received a deputation of Israelites, who recommended the Jews living in Persia to his protection, and received a favorable response. A treaty was concluded between Turkey and Persia, placing the Persian residents of Turkey, in the case of civil suits, on a level with the most favored nations, while in all criminal cases they will be subject to the Turkish courts. On August 26th the Shah left Constantinople, and in the company of the Russian ambassador Ignatiev embarked for Poti, whence he returned *via* Tiflis to his own country.

During the sojourn of the Shah in England, a treaty was published, which the Persian Government in 1872 had concluded with Baron Julius von Reuter, in London. The treaty granted to Baron von Reuter extraordinary concessions. Article I. authorizes him to establish in London one or several companies for carrying out the enterprises mentioned in the treaty. Articles II. to VI. give him, or the company formed by him, an exclusive privilege for seventy years to construct a railroad from the Caspian to the Persian Sea, as well as any other locomotive or horse railroads, and the buildings connected with them. The land required for these purposes will be given to him free, if owned by the Government, and at a

fair rate of expropriation, if owned by private persons, to an extent of thirty metres on either side of a double-track railroad. The quarries belonging to the Government will be placed at his disposal, free of expense, and the introduction of the necessary material will be exempt from duties and taxes. According to Article VIII. both parties give bonds to the amount of £40,000, to be deposited in the Bank of England. In case the work on the railroad should not be commenced within fifteen months from the date of the concession, the bonds of Baron Reuter are forfeited to the Persian Government; in case the work has been begun and a certificate is given by the Governor of Resht that the rails required for the road as far as Teheran have arrived at Enzeli, the bonds are returned to Baron Reuter. Twenty per cent. of the net profits are given to the Government of Persia, to which also the road is transferred after seventy years, without any indemnification, unless previously another agreement has been made. Of the produce of the mines which Baron Reuter is allowed to work, the Persian Government receive fifteen per cent. Baron Reuter is allowed to work every mine, situated on the domains of the Government, except those of gold, silver, and other precious metals; also every mine on private domains unless it has already been worked for five years. The mines, after seventy years, pass over into the possession of the government under the same conditions as the railroads. Under the same conditions, the forests of the country are left to Baron Reuter for seventy years, also the canals, wells, and aqueducts. In all these cases, the Government receives fifteen per cent. of the net profit. Baron Reuter is authorized to raise a capital of £6,000,000, and the Persian government guarantees fifteen per cent. interest. After March 1, 1874, the Government transfers to Baron Reuter the administration of the taxes for a term of twenty-five years; the latter engaging to pay to the Government annually £20,000 more than it receives at present. After five years the Government will receive besides sixty per cent. of the net profit. Baron Reuter is also to have the right of refusal in case the Government should desire to authorize the establishment of a bank or credit institution, of gas-works, telegraphs, roads, mills, or manufactories. In case of different interpretation, the French text of the concession is to be regarded as the standard, not the Persian. The grant was made by the Persian Government on July 25, 1872, and was signed by Baron Reuter at London on August 24th.

When the Shah at Enzeli reentered the soil of Persia he received a petition for the deposition of the Sadri Azam (prime-minister), Mirza Hussein Khan, who had accompanied the Shah on his journey through Europe. The *Journal de St.-Petersbourg* contains the following information on this remarkable ministerial crisis: All classes of the population had united in ask-

ing for the removal of the prime-minister. More than seventy persons belonging to the clergy, the army, and the administration, several princes, and high dignitaries, at their head, Mirza-Said-Khan, the Minister of Foreign Affairs; Aesif ud Daulat, the Minister of Justice; Seit-ul-Mulk, formerly ambassador in St. Petersburg; Debir-ul-Mulk, formerly secretary of the Shah, and the chiefs of the Mooshtehed (the highest order of Mohammedan priests), had set their seals to the address. After reading their petition, all its signers retired to Niaveran, and took refuge in the gardens of the Enderun (harem) of the King. Prince Ferhad Mirza, who, during the absence of the Shah, had been intrusted with the government, and Nassr-ul-Mulk, who had been Minister of War *pro tem.*, remained in Teheran, but declared their concurrence in the petition. The three uncles of the King, who had accompanied him to Europe, Ali Kuli Mirza, Sultan Murad Mirza, and Firuz Mirza, as soon as they arrived in Resht, also retired and declared to the Shah that they would not return as long as Mirza Hussein Khan should remain first minister. The other members of the *retinue* of the Shah also showed themselves hostile to the minister. In view of this powerful opposition, Mirza Hussein Khan offered his resignation. In order to quiet the general excitement, the Shah informed Ferhad Mirza by telegraph that the resignation of Mirza Hussein Khan had been accepted, that he was no longer Sadri Azam, but that he would nevertheless remain a high dignitary of the kingdom. Notwithstanding this official announcement, the prime-minister, after effecting a reconciliation with the uncle of the Shah, succeeded in retaining his office for two more days. Owing to the persistency of his opponents, he was, however, finally ordered not to proceed with the Shah to Teheran, but to remain in Kaswin. He was offered in succession the governorship of Kum, of Kaswin, of Arabistan, and finally of Resht, and declared in favor of the latter. The Shah, on his arrival in Kaswin, sent for Nassr-ul-Mulk, who, during the absence of Sadrim Azam had been provisional Minister of War, deposed him and appointed Firuz Mirza, one of the three princes who had accompanied him on his journey, Minister of War. At the same time he addressed a letter to the chiefs of the Mooshtehed, in which he asked them to quiet the apprehensions of the clergy, and promised that Mirza Hussein Khan should not again be appointed minister. On the other hand, the Shah did not conceal his dissatisfaction with the entire demonstration. When his clergy and high dignitaries at Keut, the last station before Teheran, offered their congratulations for his safe return, he expressed his displeasure in strong terms. Later accounts from Teheran represented the fall of Mirza Hussein Khan as the result of a conspiracy between the Mohammedan priesthood, all the elements hostile to reforms, and of the wives

of the Shah, whom the prime-minister had sent home from Moscow. The Europeans in Teheran generally regarded Mirza Hussein Khan as the most prominent statesman Persia has ever had, and regarded his deposition as the end of all the hopes which had been based upon the journey of the Shah.

The official paper of Persia (*Fran*), in its number of the 19th Ramazan, 1290 (November 10, 1878), announced that Baron Reuter having failed to fulfill the conditions concerning the construction of the railroad from Resht to Bushire, within the stipulated time, the Persian Government had declared the contract concluded with him null and void.

PERU (REPÚBLICA DEL PERÚ), an independent state of South America, lying between latitude 8° 30' and 21° 28' south, and longitude 68° and 81° 20' west; and bounded north by Ecuador, east by Brazil, south by the same empire and the republic of Bolivia, and west by the Pacific Ocean. The area of the republic is estimated by most geographers at 500,000 square miles; but, in the official returns of the Peruvian Government, it is set down at 619,977 square miles.

The territorial division is into 14 departments, 2 fluvial departments, 1 littoral and 1 constitutional province, all of which, with their estimated population (in 1871), and their capitals respectively, are as follows:

DEPARTMENTS.	Population.	Capitals.
Amazonas.....	44,000	Chachapoyas.
Ancaisha.....	317,000	Huarez.
Arequipa.....	200,000	Arequipa.
Ayacucho.....	210,000	Ayacucho.
Cajamarca.....	278,000	Cajamarca.
Callao.....	40,000	Callao.
Cuzco.....	464,000	Cuzco.
Huancavéllica.....	160,000	Huancavéllica.
Huánuco.....	90,000	Huánuco.
Ica.....	64,000	Ica.
Junín.....	232,000	Cerro.
Libertad.....	56,000	Trujillo.
Lima.....	350,000	Lima.
Loreto.....	58,000	Moyobamba.
Moruegas.....	85,000	Tacna.
Piura.....	170,000	Piura.
Puno.....	305,000	Puno.
Tarapacá.....	25,000	Iquique.
Total.....	3,199,000*	

The foregoing figures for the population are those which were published officially in the year referred to; but the most reliable statistical works give it as not exceeding 2,500,000, made up of the following races, and in the following proportions, approximately: Indians, 57 per cent.; mestizoes (cholos and zambos), 23 per cent.; whites, born in the republic, 12½; negroes, 8½; Chinese, 1½; and other foreigners, 2½.

The President of the Republic is M. Pardo, elected August 2, 1872. The First Vice-President is M. Costos; President of the Council and Minister of War and Marine, J. de la Riva Agüero, who is also Minister of Foreign Af-

fairs; Minister of the Interior, F. Rosas; Minister of Justice, J. B. Sanchez; and Minister of Finances, J. M. de la Jara. The President of the Permanent Commission of the Legislature (15 members), E. F. P. Muñoz. President of the Supreme Court of Justice, B. Muñoz. Postmaster-General, C. Salmon; Inspector-General of the Army and Navy, General N. Freyre; Commandant-General of the Navy, Captain D. de la Haza. The Peruvian minister to the United States is Colonel M. Freyre. The Archbishop of Lima is F. Orueta y Castrillon.

The land-forces comprise:

Grand-marshal.....	1
Generals of division.....	4
Generals of brigade.....	26
Eight battalions of infantry, 2,614 men, 271 officers.....	2,885
Three regiments of cavalry, 638 men, 120 officers.....	758
Two regiments and one squadron of artillery, 9,192 men, 108 officers.....	9,800
Total.....	12,974

The artillery corps has 56 cannons, 86 of which are rifle-bored.

The navy consists of—

Vessels.	No. of Guns.
Six iron-clads:	
Independencia, frigate.....	14
Atahualpa, turret-ship.....	3
Manco Capac, turret-ship.....	8
Union.....	14
Victoria.....	2
Loa.....	2
Six other steamers, mounting respectively 80, 14, 4, 4, 2, and 2.....	56
Total.....	94

The Independencia, built in London in 1865, has a stern constructed as a ram, and mounts exclusively Armstrong guns on the shunt principle; on the main-deck, 12 70-pounders, weighing 4 tons each; and on the upper deck, 2 pivot-guns, 150-pounders, weighing 7 tons each, and admitting of being fired on a level with the keel.*

The two great staples of export are guano and nitrate of soda, both of which are almost exclusively sent to Great Britain. In the annexed table are exhibited the quantities and value of each of these articles, sent to that country in the five years from 1868 to 1872, inclusive:

YEARS.	GUANO.		NITRATE OF SODA.	
	Tons.	Value.	Quintals.†	Value.
1868.....	155,766	\$9,451,095	1,019,679	3,320,250
1869.....	199,122	12,905,120	884,977	3,421,600
1870.....	242,434	16,241,465	1,068,972	4,146,790
1871.....	142,365	8,555,830	1,298,905	5,077,075
1872.....	74,401	2,379,410	1,365,195	5,226,915

In 1871 the number of tons of guano sold on account of the Government in Europe and the Mauritius was 400,170, representing an aggregate of \$24,701,105; and the sales of the following year reached 459,906 tons, at a gross value of \$29,103,765. Judging from the account sales rendered for the first four months of 1873, it was fair to presume that the total proceeds of guano in that year would fall little short of \$35,000,000, or almost one-fifth of the

* The total in the article PERU, in the ANNUAL CYCLOPEDIA for 1872, resulted from an error of the types.

† See ANNUAL CYCLOPEDIA for 1872. † 100 lbs.

estimated sum of the public debt of the country. The demand for nitrate of soda is fast increasing, not only in England, as is shown by the foregoing table, but for all markets. The total exports of this commodity in 1870 were 2,500,000 quintals; in 1871 they were 3,600,000; and, in 1872, they reached 4,420,000 quintals. These statistics are from the official returns of the Prefect of Tarapacá, from which province the nitrate is almost exclusively extracted. But it must be borne in mind that, while the quantities of guano disposed of are yearly increasing, the supply is decreasing in a like ratio; and this circumstance causes no little anxiety to the Government, by whom the entire proceeds of the guano sales have been devoted to the payment of the public debt. It is asserted, in effect, that the realizable quantity of guano at the end of 1872 could not be estimated at more than 3,000,000 tons, which fact, viewed in connection with the comparatively recent discovery of extensive deposits of that fertilizer in the Bolivian portion of the Desert of Atacama, showed the necessity of bestowing special attention upon the nitrate of soda, which, accordingly, as the next most profitable source of revenue, became the object of divers legislative measures. One of these was the proposed imposition of 50 per cent. export duty on the difference between the cost price and the market value of that article as should be determined by a commission to be appointed for that purpose, and 25 per cent. duty on every one hundred pounds of the raw material (*caliche*) exported. This law was, however, modified in the matter of the 50 per cent., by constituting the saltpetre a government monopoly, the state paying \$2.40 per quintal to the producers, and reserving to itself the privilege of fixing a market price to the purchasers of the article. It was also proposed that the nitrate should be sold at the markets of Iquique and Lima.

A law was passed by Congress in April to the effect that the President should not enforce the *Estanco*, or limitation of the export of saltpetre, without giving forty-five days' notice; and that such enforcement should take place before September. The total exports are estimated at about \$35,000,000, and the imports at \$30,000,000.* According to a non-official report, the value of the importations for the year 1872 amounted to \$31,600,000.

But as there are no official returns (the publication of even those of the custom-house being prohibited by a decree issued in October, 1872), an exact statement of the foreign commerce cannot be given. Many circumstances concur, nevertheless, to show that it is steadily increasing, among which may be enumerated the figures of the following table of the exports to Great Britain, and the imports therefrom, in the five years from 1868 to 1872, inclusive:

* For the principal articles of export and import, see the ANNUAL CYCLOPEDIA for 1873.

YEARS.	Exports.	Imports.
1868.....	\$17,000,130	\$5,928,895
1869.....	19,992,890	7,119,140
1870.....	24,405,375	9,388,380
1871.....	19,889,840	11,877,640
1872.....	21,068,615	18,714,245

From the following synopsis for the port of Callao may be formed an idea of the trade with the United States:

In the course of the year, commencing October 1, 1871, and ending September 30, 1872, there entered 118 American vessels, with an aggregate tonnage of 124,085, and cargoes of lumber, wheat, coals, sperm-oil, railway-ties, etc., etc., valued at a total of \$3,641,695; and the number of vessels cleared for the United States was 114, with an aggregate of 115,604 tons, and mostly laden with guano, the total value of the cargoes being \$4,039,352.

The total shipments of petroleum received from the United States in 1871 amounted to 181,629 gallons; in 1872, 233,490 gallons; and in 1873, 272,555 gallons. The value of the produce and bullion shipped from the port of Arica in 1866 amounted to \$3,898,733; in 1867, to \$3,510,760.50; in 1868, to \$3,758,172; in 1869, to \$3,353,443.25; in 1870, to \$3,936,581.12; in 1871, to \$4,882,232.75; in 1872, to \$5,427,290.87; and up to June 30, 1873, they reached \$2,510,608.08.

The duties at the various custom-houses in the republic during the first three months of 1873 compare with those for the corresponding period of 1872 in the following manner:

MONTHS.	1872.	1873.	INCREASE IN 1873.
January.....	\$512,779 83	\$565,740 00	\$52,960 17
February.....	486,915 04	618,373 66	131,357 46
March.....	486,040 20	1,190,824 18	704,783 98
Total....	\$1,485,735 07	\$2,374,938 66	\$889,101 61

The following Government railways are completed, or in process of construction, by Mr. Henry Meiggs, the American contractor:

RAILWAYS.	Length in Miles.	Cost.	Finished in the year
Callao & Oroya.....	130	\$25,875,000	1874
Mollendo & Arequipa.....	107	11,350,000	1870
Arequipa to Puno.....	222	30,000,000	1873
Puno to Cuzco.....	290	23,437,500	1874
Chimbote to Huaraz.....	172	22,540,000	1876
Ilo to Moquegua.....	63	6,281,250	1872
Pacasmayo, Guadalupe, & Magdalena.....	68	6,055,250	1873
Total.....	1,007	\$126,000,000	

Railways belonging to private individuals:

RAILWAYS.	Length in Miles.	Cost.
Cerro de Pasco to Pasco.....	15	Not published.
Iquique to the Noria.....	37	" "
Pisagua to Salde Obispo.....	35	" "
Eten to Ferrocarril.....	28	" "
Total.....	115	\$12,000,000?

The following state railways will be built by private individuals:

RAILWAYS.	Length in Miles.	Cost.	Finished in the year
Tacna to Bolivia (Government share in this line \$75,000).....	108	\$5,625,000 00	1876
Lima to Huacho.....	89½	3,750,000 00	1876
Pisco to Ica (finished)....	48	1,364,062 50	1876
Paita to Piura.....	63	1,687,500 00	1872
Lima to Pisco.....	144	9,375,000 00	1876
Huacho.....	36	2,250,000 00	1876
Total.....	488½	\$24,051,562 50	

Projected railways:

RAILWAYS.	Length in Miles.	Cost.
Chancay to Cerro de Pasco (private).....	120	Not published.
Oroya to Chancamayo (State)...	80	" "
Tacna to Puno (State).....	301	" "
Salaverry to Ascope (State).....	40	" "
Oroya, Zanja & Ayacucho (State).....	240	" "
Oroya & Cerro de Pasco (State)...	40	" "
Trajello to Eten (private).....	146	" "
Huacho to Lambayeque (private).....	560	" "
Total.....	1,599	\$310,000,000

Railways belonging to English companies:

RAILWAYS.	Length in Miles.	Cost.
Arica to Tacna, six per cent. security.....	30½	\$6,000,000
Callao to Lima, and Lima to Chorrillos.....	15½	
Total.....	55	\$6,000,000

Hence, when the foregoing lines are completed, Peru will have an aggregate of 3,194½ miles of railway, at a cost of some \$390,000,000; to which, however, should be added at least \$85,800,000 for water-works, besides the immense sums required for the ramifications of some of the lines, and which cannot be estimated at less than \$125,000,000.

A favorable report was made of the excellent manner in which the line connecting the wine-growing district of Moquegua with the port of Ilo had been constructed. The railway, although little more than one year in operation, has already been productive of much good, as is apparent from the increase in the value of landed property in the sections of country through which it passes.

The works on the railways from Arequipa to Puno, and from the latter place to Cuzco, were carried on with great energy, in spite of the many natural obstructions to be overcome in traveling; on coming to the plain, extending from Puno to within 60 miles of Arequipa, the labor would, of course, advance more rapidly, and it was expected that that point would be reached by the middle of the year.

The railway from Chimbote to Huaraz, considered by persons familiar with the resources of the country as one of the most important of

all the Peruvian lines, had in January some 36 miles prepared for the laying of the rails.

It may not be out of place to give here the traffic on the Callao and Chorrillos line for the three months ending September 30, 1872:

Number of passengers on Callao line.....	1,004,961
Number of passengers on Chorrillos line.....	461,310
Total.....	1,466,271
Receipts from passengers and baggage.....	\$504,683 50
Receipts from freight (99,989 tons).....	291,849 75
Receipts from other sources.....	17,347 50
Total.....	\$814,880 75

No statement of the running expenses of these lines has been published.

There are now about 1,000 miles of telegraph in the republic, but the service is far from being either efficient or productive. Many of the lines lie over barren deserts, traversed only by the muleteers and Indians of the coast districts; the distances between the stations are very long; the people, on the other hand, are not yet able to appreciate the benefits arising from telegraphic communication, and the system in consequence is not so generally resorted to as might have been expected: then the enhanced cost of material; the high salaries paid to employes, and the heavy expenditures for repairs rendered necessary by continued floods and other disasters—all these circumstances combined have hitherto embarrassed the enterprise and retarded its development. At first the lines were constructed in the cheapest manner; before long, substitution of iron for the wooden posts was found to be indispensable, and the cost incurred by the change was very great; and finally the company discovered that it was necessary to place guards along the lines to prevent the destruction of the wires by the peasantry, who regard the telegraph as their enemy, destined to do away with their time-honored and profitable calling as couriers. In many instances these people have torn down the wires, and so intimidated the operators as to cause the suspension of communication for weeks and even months between some of the most important places. The company is composed of men of acknowledged energy; but their vigilance and enterprise have so far been unavailing. With a view to effectually remove these difficulties, the Minister of Public Works laid before Congress the following proposal:

The nation shall become the proprietor of all the telegraph-lines in the republic, after having paid to the company now holding the same a fair and just valuation for the stock on hand and the undertaking as it stands, covering this value with bonds pledged for the extinction of the internal debt bearing interest at 6 per cent. per annum. Permission will be granted to the Government to extend the line from Pisco to Iquique, thereby completing the electric communication from the last-named port to Paita, a distance overland of more than one thousand miles. And furthermore Congress will grant a guarantee of 5 per cent. interest on the sum of 1,500,000 soles, the estimated cost of the successful submersion of a cable from Paita to Panama.

Congress, in view of the obvious advantages

of the measures proposed, received the latter very favorably, and immediately authorized the President to carry them into execution.

Neither budget nor estimate of budget has been published since that for 1871-'72.* The revenue, mainly derived from the sale of guano, amounts usually to about \$60,000,000; while the ordinary expenditure is a little below that figure.

After long deliberation, the President came to an understanding with Messrs. Dreyfus & Co. concerning the issue of the loan of 1872, now fully authorized by Congress. Peru will, with this addition to her financial capabilities, consolidate all her foreign debts into one, and, following the example of the United States, so regulate her bonds that, by redeeming some, the interest on the whole may be assimilated; and, that end once accomplished, the remaining funds proceeding from the loan will, according to law, be appropriated for the completion of the various public railways already projected or in process of construction, and the irrigation of land held by persons unable to defray the expense thereof.

It should be added that, for the payment of the public debt, which bears interest at 5 per cent. per annum, and a 2 per cent. sinking fund, the guano belonging to the Government is pledged; and, it was hoped that the sales would reach the sum of \$35,000,000 in 1873. Besides the guano sales, there is another source of revenue rapidly growing in importance, namely, the receipts of the custom-house. These amounted in 1872 to 7,315,000 soles, or almost 25 per cent. more than in the preceding year; and it is even reported that the receipts at the Callao custom-house alone in 1873 were considerably in advance of that sum.

The receipts for the month of May at the port of Pisagua were \$22,058.58, of which \$14,166.97 represent import duties, and the remainder export duties.

Public education is undergoing a complete reform; primary schools are fast multiplying in even the remotest corners of this republic; and a bill authorizing the Executive to procure suitable professors from Europe, and appropriating the sum of 400,000 soles per annum for the expenses incurred thereby, was sanctioned by the Chamber in the month of April.

During the year 1872 there arrived at the port of Callao thirty-two ships solely engaged in the cooly trade, bringing a total of 13,580 Chinese laborers for the railways and other public works. The number imported the year preceding was 11,812; making an aggregate of 25,192 for the two years, and "representing a capital of \$11,714,280, if the worth of each immigrant be calculated at \$465, which is the minimum value."

In 1873 the cooly trade was marked by a considerable falling off; but 4,226 Chinamen had arrived during the first seven months, which is a circumstance indicative of the

stringent measures taken by the Peking Government to suppress the traffic. Peruvian economists are of opinion that, "under the existing order of things, the introduction of Chinese labor is indispensable to the prosperity of the republic." Sugar and cotton planters would be the first to suffer, inasmuch as, notwithstanding the efforts of the Government and the coöperation of the leading farmers to induce European emigrants to the Peruvian shores, no relief is obtained; hence the absence of the cooly would result in the ruin of many fortunes.

A large coal-mine is reported to have been discovered on the railway-line from Mollendo to Arequipa. The deposit is stated to be 3,000,000 square yards in extent, and the principal vein four yards in diameter. A company of Arequipa merchants was formed for working the mine; and the coal, now exclusively used in the locomotives of the line mentioned, is pronounced by the engineers to be of superior quality. This is but one of the innumerable sources of national wealth, which we look forward to as the result of the public works in active prosecution.

An important protocol was signed in February by the Minister of Foreign affairs, Señor José de la Riva Agüero, and the Colombian minister plenipotentiary to Peru, concerning the part which the republic desires to take in the work of opening an interoceanic canal across the Isthmus of Panamá. At the close of a discussion respecting the feasibility of the project, the President signed the following decree:

The protocol signed by the Peruvian Minister of Foreign Affairs and the plenipotentiary from Colombia is hereby approved, and it is understood that the participation of Peru is established in the interoceanic canal proposed by the Government of Bogotá. Therefore the national Congress must be informed of the purport of the protocol, so that acquainted with this most important matter, and when the preliminary reports respecting the practicability and cost of this great undertaking may be made known, the Government may receive authorization as to the sums of money which it may contribute, and the mode of paying the same, together with the power to stipulate the concessions and privileges which Peru shall be entitled to by virtue of her intervention.

(Sign-manual of the President) RIVA AGÜERO.

The official dispatch of Secretary Fish to the Madrid Government, relative to the state of affairs in the Spanish colonies in America, elicited much attention and a general expression of approval in Peru. Mass meetings were held in favor of the Cubans struggling for independence, and a universal sentiment of sympathy with the Cuban cause reigned throughout the country.

The news of the acquisition of Samaná Bay was bitterly commented upon by the Peruvian press, which defined that measure as the first of a series of efforts on the part of the "Colossus of the North" gradually to encroach upon the territory of her neighbors in the New World.

PHILLIPS, WILLARD, LL. D., A. A. S., an American jurist and author, born in Bridgewater, Mass., December 19, 1784; died in Cambridge, Mass., September 3, 1873. He procured the means for his education by teaching, and graduated at Harvard University in the class of 1810, remaining there a tutor until 1815. He then gave his attention to the study of law, and, having been admitted to the bar, commenced practice in Boston, and rose to eminence in his profession. At the same time he aided in the editorship of the *North American Review*, to which he was until 1834 a contributor. In 1825-'26 he was a member of the State Legislature, and in 1839 was made Judge of Probate for Suffolk County, retaining that office until 1847. In addition to the discharge of his duties as judge, he was employed for a number of years, under a legislative commission to himself and others, in reducing the laws of crimes and punishments to a systematic code, and, although the report was never adopted by the Legislature of Massachusetts, the work has had a material influence on legislation and the administration of the criminal law. In 1845 Mr. Phillips retired from the practice of his profession. He was the author of "An Appeal to the Public Spirit of the Federalists and the Good Sense of the Democrats," 1812; "Treatise on Insurance," 1823, fifth edition, 2 vols., 8vo, 1863; "Treatise on Patents," 1837; "Inventor's Guide," 1837; "A Manual of Political Economy," 1828; "Propositions concerning Protection and Free Trade," 1850; edited, with Edward Pickering, the first American edition of "Colyer on Partnership," and in 1832 published a digest of the first eight volumes of Pickering's "Reports." He also wrote many important articles for the "Encyclopædia Americana," and for some years edited and published the *American Jurist*.

PILLSBURY, Amos, a prison reformer and manager, born in New Hampshire in 1805; died in Albany, N. Y., July 14, 1873. Mr. Pillsbury's father was warden of State-prisons in New Hampshire and Connecticut for many years, and the son thus learned something of the management of prisons. In the prime of life he was appointed warden of the State-prison of Connecticut at Wethersfield, and held the position for many years. He was a strict disciplinarian, but he possessed also great organizing ability, and made the prison pay a handsome sum to the State over the cost of its support, and this without cruelty to the prisoners. Still it must be acknowledged that his rule was rigorous and severe. After leaving Wethersfield he was warden of prisons for other States for several years, and for a short time Superintendent of Police in New York City. When the new penitentiary was erected at Albany, it was planned according to his suggestions, and he became its superintendent, and continued there till his death. He made this penitentiary pay an income to the county,

but he had abated much from his early sternness and severity, and the kindly feelings and warm sympathy which he possessed were allowed more free exercise. He became a standard authority on questions of moderate prison reform, and in the summer of 1872 attended the Prison Congress in London, and took part in its discussions. General Pillsbury was a man of unblemished character, and was highly esteemed by those who knew him best.

PONIATOWSKI, Prince JOSEPH MICHEL XAVIER FRANÇOIS JEAN, an eminent musical composer, French Senator, and diplomatist, of Polish family, born at Rome February 20, 1816; died in Paris, July 4, 1878. His father, Count Stanislaus Poniatowski, was own cousin to the celebrated Polish prince of that name, and both at Rome and at Florence, where he afterward resided, was known as a great patron of the fine arts. His son, Joseph, received a military education, and went as a volunteer in the French expedition to Algeria, where he attained the rank of major in the *Chasseurs d'Afrique*. Returning to Tuscany, he was naturalized there, and in 1848 was made a Prince of Monte-Rotondo by the Grand-duke Leopold II. He was twice elected a member of the Chamber of Deputies at Florence, and subsequently made minister plenipotentiary at Paris, London, and Brussels. In February, 1851, he was made grand-officer of the Legion of Honor. He fixed his permanent residence at Paris, in August, 1854. In the following October, by an imperial decree, he became a naturalized Frenchman, and in December, 1854, was elevated to the dignity of Senator. Among the numerous operas which he composed are the following: "Jean de Procida," "Ruy Blas," "La Fiancée d'Abydos," "Esmeralda," "Don Desiderio," "La Contessina," and "Pierre de Medicis." He had also composed and caused to be executed with success the music for several masses, in the churches of Saint-Roch and Saint-Eustache.

PORTUGAL, a kingdom in Southwestern Europe. King, Louis I., born October 31, 1838; succeeded his brother, King Pedro V., November 11, 1861; married October 6, 1862, to Pia, youngest daughter of King Victor Emmanuel of Italy. Issue of the union are two sons: Carlos, born September 28, 1863, and Alfonso, born July 31, 1865. The King has a civil list of 365,000 milreis (1 milreis=\$1.08), but returns annually 55,000 milreis to be used for general purposes. Father of the King, Ferdinand, Duke of Saxe-Coburg, born October 29, 1816, son of the late Duke Ferdinand of Saxe-Coburg, married April 9, 1836, to Queen Maria I. of Portugal, obtained the title of King September 16, 1837; Regent of Portugal from November 15, 1853, to September 16, 1855; married in "morganatic" union, June 10, 1869, to Madame Hensler, elevated Countess Edla.

Portugal is divided into six provinces, the area of which and population, according to official calculations made in 1871, were as follows:

PROVINCES.	Area.	Population in 1871.
Minho.....	2,807.47	971,001
Tras-os-Montes.....	4,284.84	365,833
Beira.....	9,344.56	1,394,282
Estremadura.....	6,872.94	839,691
Alentejo.....	9,116.14	531,341
Algarve.....	1,872.64	188,422
Total.....	34,501.59	3,690,570
Azores Islands.....	996.48	258,393
Madeira Islands.....	314.65	118,379
Total provinces and islands..	35,812.72	4,367,832

The foreign possessions of Portugal are as follows:

POSSESSIONS IN AFRICA AND ASIA.	Area.	Population.
1. POSSESSIONS IN AFRICA:		
Cape Verde Islands (nine inhabited), 1869.....	1,650.25	70,164
In Senegambia (Bissao, etc.), 1843.....	25,866.75	2,500
Islands of St. Thomas and Principe, 1871.....	424.12	26,046
Aluja.....	13.60	700
Angola, Benguela, Mossamedes, 1865.....	312,531.85	2,000,000
Mozambique, Sofala, etc....	382,692.06	500,000
2. POSSESSIONS IN ASIA:		
Gua, Salcete, Barder, etc., 1864.....	1,458.48	474,234
Damao, 1866.....	155.62	40,980
Diu, 1864.....	2.76	12,308
Indian Archipelago.....	5,527.77	850,300
China: Macao, 1866.....	11.90	100,000
Total possessions.....	740,365.16	5,880,227

The two largest cities are Lisbon, with 275,286 inhabitants (1868), and Oporto, with 89,331 inhabitants. In the fifteenth century, Portugal is said to have had about 5,000,000 inhabitants; in 1732, only 1,850,000.

The Legislature is called Cortes Geraes, or General Cortes. It consists of two Chambers, the "Camara dos Pares," or Chamber of Peers, and the "Camara dos Deputados," or Chamber of Deputies. The peerage, in virtue of a law passed May 27, 1864, ceased to be hereditary in certain families, and all the members of the first Chamber are now named for life by the King. The Chamber of Peers nominate their own President and Vice-President, and in 1873, numbered 123 members. The members of the Chamber of Deputies are chosen in direct election, continental Portugal being divided into ninety-four electoral districts, and Madeira and the Azores into five; each of which return one member. All citizens, possessing a clear annual income of at least 138 milreis, have the right of voting, and all having an income of at least 890 are eligible. The annual session lasts three months, and new elections must take place at the end of every four years. In case of dissolution, a new Parliament must be called together immediately. The General Cortes meet and separate at stated periods without special intervention of the King, who also can only twice veto a law passed by both Chambers.

The following were the gross sums of the

budget of the financial year 1873 to 1874 (value expressed in milreis):

REVENUE.	
1. Direct taxes.....	5,667,219
2. Register.....	1,283,800
3. Stamped paper.....	704,000
4. Indirect taxes.....	11,200,644
5. National domain.....	2,199,084
6. Deductions from civil list and salaries.....	528,400
7. Interest on bonds in public exchequer.....	1,580,416
Total.....	23,163,564
EXPENDITURE.	
1. Interest on home and foreign debt.....	10,570,519
2. Ministry of Finance.....	3,645,678
3. Ministry of Foreign Affairs.....	247,977
4. Ministry of the Interior.....	1,832,251
5. Ministry of Worship and Justice.....	522,729
6. Ministry of War.....	3,406,022
7. Ministry of the Navy and Colonies.....	1,684,860
8. Ministry of Public Works.....	1,252,186

Total, ordinary..... 22,581,636
Total, extraordinary..... 1,925,380

The budget of the colonies for the year 1870 to 1871 was as follows:

COLONIES.	Revenue.	Expenditure.	Surplus (s), Deficit (d).
	Milreis.	Milreis.	Milreis.
Cape Verde Islands.....	137,926	163,533	(d) 25,607
St. Thomas and Principe.....	80,875	62,575	(s) 18,300
Angola.....	280,741	299,444	(d) 18,703
Mozambique.....	177,179	187,013	(d) 9,834
India.....	446,306	383,540	(s) 62,766
Macao and Timor.....	841,222	286,800	(s) 54,422
Total.....	1,464,191	1,382,905	(s) 81,286

The public debt of Portugal dates from the year 1796, when the first loan of 4,000,000 milreis was raised. In 1835 it amounted to 55,000,000 milreis; in 1838, to 62,000,000; in 1848, to 74,000,000; in 1853, to 79,000,000; in 1871, to 245,000,000; in 1872, to 349,000,000. The last loan of Portugal, issued in September, 1873, was in bonds, for the nominal amount of 38,000,000 milreis at three per cent. The bonds of this loan were all taken in Portugal, at the issue price of 43½ per cent. The interest on the public debt has frequently remained unpaid, and portions of the public debt have at various periods been repudiated.

The military system is based on the law of June 23, 1864, which has been modified by several decrees of the year 1868 as well, as by a decree of October 4, 1869. The strength of the army is to be 80,128 on the peace footing, and 68,450 on the war footing. As the state of the finances has hitherto not allowed the carrying out of this provision, the actual strength of the standing army is much less. In 1869 it amounted to only 16,640 men.

The navy of Portugal was in 1873 composed of 38 vessels (29 armed and 9 not armed), with 283 guns. It is officered by one vice-admiral, five rear-admirals, and thirty-one captains, and manned by 3,493 sailors and marines.

The trade of Portugal in the years 1869 and 1870 was as follows:

DATE.	Milreis.	Milreis.
1870.....	Imports—25,240,000	Exports—20,290,000
1869.....	22,690,000	17,810,000

The commercial navy of Portugal consisted, on January 1, 1872, of 818 vessels, of a total burden of 88,510 tons. The total length of railways in operation was, in September, 1873, 787 kilometres; and those in the course of construction, 82 kilometres. The number of post-offices, in 1872, was 599, and the number of telegraph-offices 121. The aggregate length of telegraph-lines was 3,110, and of telegraph-wires, 5,728 kilometres.

The Portuguese Chambers were opened on January 4th. The speech from the throne announced that, in consequence of the reforms introduced in the financial administration of the country, the budget no longer showed any deficit. The condition of the country was represented as flourishing, and especially agriculture and industry as rapidly advancing. The overwhelming majority of the Chambers declared, on occasion of the establishment of the Spanish Republic, their unflinching devotion to the ruling family. The so-called Iberian party, which aims at a union between Portugal and Spain, was found to have but little strength in the country. The Government believed it to be necessary to call in the reserves, and the Second Chamber, by a vote of 50 against 31 votes, adopted measures for the protection of the independence of the country. The minority was of opinion that it was unnecessary to incur so heavy expenses.

In October a manifesto was published by the pretender Dom Miguel, in which he renews his claims to the throne, and expressed his wish to coöperate as much as possible for the restoration of Pope Pius IX. Dom Miguel is the only son of the usurper Dom Miguel who in 1828 occupied the throne of Portugal, but in 1834 gave way to Queen Maria Gloria, the mother of the present King. He never renounced his claims to the Portuguese crown; and after his death, which occurred in 1866, at the castle Braunbach, in the grand-duchy of Baden, they were inherited by his son, who was born on Sept. 19, 1853, at the castle Heubach.

POUND STERLING, VALUE OF. By an act of Congress, approved March 3, 1873, it was provided that, in all payments by or to the Treasury of the United States, whether made here or in foreign countries, where it becomes necessary to compute the value of the sovereign or pound sterling, it shall be deemed equal to four dollars, eighty-six cents, and six and one-half mills; and the same rule shall be applied in appraising merchandise imported, where the value is, by the invoice, in sovereigns or pounds sterling, and in the construction of contracts payable in sovereigns or pounds sterling; and this valuation shall be the par of exchange between Great Britain and the United States; and all contracts made after January 1, 1874, based on an assumed par of exchange with Great Britain of fifty-four pence to the dollar, or four dollars, forty-four and four-ninths cents to the sovereign or pound sterling, shall be null and void.

POWERS, HIRAM, an American sculptor, born in Woodstock, Vt., July 29, 1805; died in Florence, June 27, 1873. He was the eighth of a family of nine children, and passed his youth on his father's farm, with only such opportunities for an education as could be procured at a district school, and among his acquirements was a knowledge of the first principles of drawing. The farm proving unsuccessful, he removed with his family to Ohio, and the death of his father, soon after, leaving him in destitute circumstances, he was successively a clerk in an hotel reading-room, a commercial traveller, and an apprentice to a Cincinnati clock-maker. Having become acquainted with a Prussian sculptor, who was engaged at Cincinnati on a bust of General Jackson, he acquired from this man a taste and knowledge of modeling in clay, and executed several busts and medallions which were not without merit. For seven years Mr. Powers had charge of the wax-work department of the Western Museum at Cincinnati. This employment was not calculated to suit his aspiring genius, and in 1835 he made a journey to Washington, where he was actively engaged in modeling busts of prominent men. During his residence at Cincinnati he had formed the acquaintance of Mr. Nicholas Longworth, through whose assistance and with the money which his occupation had enabled him to save, he undertook a journey to Florence. Henceforth he continued to reside in Italy and devoted himself to modeling busts. After a year's residence, having gained considerable skill in the practice of his art, he produced his statue of Eve. So great were the merits of this work that Thorwaldsen, who was the most eminent sculptor of the time, pronounced it a masterpiece. The reputation which Powers gained by his Eve increased his confidence in his own ability, and a year afterward he produced the model of his Greek Slave. This is the most popular of his works. At least six repetitions of it have been executed in marble, and there are innumerable plaster casts and copies in Parian. The "Fisher Boy," "Il Penseroso," and "Proserpine," followed, and orders for copies soon gave the artist more work than he was able to accomplish. When the projectors of the Sydenham Crystal Palace desired representative works from the chief artists of the world, Powers produced "America," which obtained for him additional laurels. Among his statues are "Washington," "Calhoun," and "The Indian Girl." The bronze statue of Webster, which now adorns the State-House grounds at Boston, is one of his latest works. Of his busts, which comprise by far the greater part of the productions of his genius, those of Adams, Jackson, Webster, Calhoun, Chief-Justice Marshall, Everett, Van Buren, and other distinguished Americans, possess the highest reputation. Mr. Powers was the inventor of a process of modeling in plaster which, by ob-

riating the necessity of taking a clay model of the subject, greatly expedites the labors of the sculptor.

PRESBYTERIANS. I. PRESBYTERIAN CHURCH IN THE UNITED STATES OF AMERICA.—The statistics of this Church were reported in May, 1873, as follows:

SYNODS.	Presby- teries.	Ministers.	Churches.	Communi- cants.

The number of licentientes was 348; of candidates for the ministry, 770; of baptisms, 25,144; of persons in Sunday-schools, 482,622; amount of contributions for home missions, \$438,522; for foreign missions, \$392,996; for education, \$253,583; for publication, \$54,893; for church erection, \$190,165; for the Ministerial Relief Fund, \$77,726; for the Freedmen's Fund, \$50,538; for the General Assembly Fund, \$31,653.04; for ministers' salaries, \$3,151,767; for sustentation, \$58,636; for congregational and miscellaneous purposes, \$4,926,551.

The General Assembly of the Presbyterian Church in the United States of America, met in Baltimore, Md., May 15th. The Rev. Howard Crosby, D. D., was chosen moderator. Upon the recommendation of a committee appointed with reference to that subject, the Assembly declared it appropriate and expedient for the Church to participate in the celebration of the one hundredth anniversary of American Independence, to be held in Philadelphia in 1876. In its resolutions the Assembly recommended that this occasion be improved "to set forth the history, principles, and polity of the Church, and to make a grateful record of the manifold goodness of God to us as a people." A plan of celebration was

approved, which embraces a series of discourses on the history of the Church: 1. From its founding in this country to the beginning of the war of the Revolution; 2. From that time to the adoption of the Presbyterian form of government in 1786; 3. From that to the present time. A fourth discussion is to be upon the "present condition, prospects, beneficent work, needs, and obligations of the Church; a fifth on the history of "education under Presbyterian influences, from the first settlement of the country to the present time;" and other papers to be prepared, and expected to give historical sketches of the several boards and other agencies established by the General Assembly. The plan further provides that an exposition be made of books published by the Board of Publication, of other works by American Presbyterian authors, and of ancient books, manuscripts, relics, and other objects pertaining to Presbyterianism; that the first Sunday in July, 1876, be observed as a day of thanksgiving, when the pastor of each church shall deliver a memorial discourse on the history of his church, and a collection shall be made to endow and provide a fire-proof building for the Presbyterian Historical Society. Special services of commemoration were appointed to be held in Philadelphia during one week in June, 1876. The committee on conference with the United Presbyterian Church had received no answer to a communication which they had sent to the corresponding committee of that Church, and were continued. The Rev. Dr. Baird, of Nashville, Tenn., addressed the Assembly as a corresponding delegate of the Cumberland Presbyterian Church. Of his own motion, without knowing that any sentiment favorable to union existed in his own church, he suggested that a committee be appointed by the General Assembly on organic union. He believed that his own General Assembly would respond to the appointment. Such a committee, consisting of three ministers and two elders, was appointed. The receipts of the Board of Publication for the year were reported to have been, including the balance from the previous year, \$306,946.28; their expenditures, \$297,425.97, of which \$71,562.71 had been paid in the new building. The sales of books and periodicals had amounted to \$157,576.78. The sum of \$55,892.16 had been received, and \$56,868.86 expended, on account of the mission fund. One hundred and fifty-eight colporteurs had been in commission laboring in forty-one States and Territories, and in Canada. The value of the grants made by the missionary committee was \$10,495. The publications of the board had been sent over a widely-extended territory in the United States, and to Syria, Persia, India, Siam, Western Africa, Mexico, and Brazil. The publication-house had been finished during the year, at a cost of \$150,000, more than two-thirds of which had been met. The standing Committee of Benevolence and Finance had been intrusted

by the previous General Assembly with the consideration of plans for developing and systematizing the benevolence of the Church. It was reported that not more than one-half of the churches had been contributing to more than two of the eight objects undertaken by the Assembly; and that probably not more than half the members of the contributing churches were taking any part in the work. In the mean time all the boards were in debt. Many difficulties were therefore to arise out of the too great number of the objects recommended by the General Assembly; besides which collections were often called for for ten or twelve stated objects outside of the church. The plan reported by the committee, and substantially approved by the Assembly, continues the Committee of Benevolence and Finance, making it their object to "promote throughout the Church, by all proper means, the regular and systematic consecration of property to the Lord, and to secure such funds for distribution among the boards according to the direction of the contributors as may, by preference of churches or individuals, be forwarded to said committee." It was not deemed expedient to restrict givers to any particular plan, but each church was urged to adopt whatever one might promise to be most efficacious. Each Presbytery was advised to appoint a standing committee, to whose particular care should be committed the benevolent work of the church. These committees are expected to report to the General Committee as often as once in six months. The churches were requested to remit monthly, or at least quarterly, for the benefit of the whole work. The consolidation of the former Board of Domestic Missions and committee on Home Missions had been completed successfully. The operations of the board during the year had, however, been lessened, in respect to both men and money. The total receipts had been \$304,717.97, or \$26,253 less than those for the preceding year. Nine hundred and ninety-two missionaries had held commissions from the board. They reported 3,944 additions to the churches in profession, and 2,383 on certificate, 136 new churches organized, 98 churches built, and \$174,232 of church debts canceled. The board were requested by the Assembly as far as possible "to make the salaries of ministers sufficient for a respectable living in the neighborhood where they reside, in order to remove all necessity and expense for ministers devoting themselves to such secular pursuits as are inconsistent with their offices." Every church receiving aid from the board was required to adopt some systematic plan of giving, "so as to develop the resources of the people, and prepare the way for self-support."

The following paper was adopted as affirming the doctrine of the Church concerning civil powers and the relation of the Church and state; it also expressed the attitude of the church toward the Southern Presbyterians:

The General Assembly, deploring the divisions that have occurred and that continue among Presbyterians in the United States of America, and earnestly desiring to do whatever is consistent with duty and fidelity to the Lord toward healing these divisions, and furthermore having good reason to hope that the action contemplated in the following paper will promote and secure this happy result, do solemnly declare—

1. That in accordance with a resolution unanimously adopted by each of the two bodies now constituting the reunited Assembly, all action touching the brethren adhering to the body popularly known as the Southern General Assembly, together with all action touching the brethren adhering to the body known as the Old School Synod of Missouri, has been since the reunion, and the same is now null and void, and therefore of no binding effect, and not to be pleaded as a proceeding in the future.

2. The Assembly also express confidence in the soundness of doctrine and in the Christian character of these brethren, and cannot doubt that a more intimate communion would lead to the speedy removal of the barriers that now separate those of like precious faith, to increased mutual affection and esteem, and to a practical manifestation of our oneness in Christ.

3. With regard to the civil magistrate and the relation of church and state, the Assembly deem it sufficient to call attention to the following statements and principles found in our Standards, to wit: (1.) "Synods and councils are to handle or conclude nothing but that which is ecclesiastical; and are not to intermeddle with civil affairs which concern the commonwealth, unless by way of humble petition in cases extraordinary, or by way of advice for satisfaction of conscience, if they be thereunto required by the civil magistrate." (Confession of Faith, Chap. XXXI., Sec. 4.) (2.) "That God alone is Lord of the conscience, and hath left it free from the doctrine and commandments of men which are in any thing contrary to his Word, or beside it in matters of faith or worship;" "That all Church power, whether exercised by the body in general, or in the way of representation by delegated authority, is only ministerial and declarative: that is to say, that the Holy Scriptures are the only rule of faith and manners; that no Church judicatory ought to pretend to make laws to bind the conscience in virtue of their own authority; and that all their decisions should be founded upon the revealed will of God." (Form of Gov., Chap. I., Secs. 1 and 7.)

4. For the purpose of carrying out the spirit of the foregoing resolutions, the Assembly will appoint two committees to confer with similar committees, if appointed by the General Assembly of the Presbyterian Church in the United States and by the Old School Synod of Missouri, to seek closer and more fraternal relations with those bodies.

The expenses of the Board of Foreign Missions for the year had been \$97,939 more than its receipts; it had closed the year with a balance against its treasury of \$128,695. Its work for the ensuing year would require \$595,080, which added to the debt made the sum it needed \$723,749. While the Assembly was discussing the means of meeting the reported deficiency, the suggestion was made that the commissioners then and there pledge their churches for contributions so far as they felt justified in doing so. Pledges were accordingly given to the amount of \$78,491. Circular letters in regard to the results of the Board of Foreign Missions were directed to be sent out to every pastor in the Church. The part of the debt remaining unprovided for was

apportioned among the different presbyteries which were expected to respond in their several amounts without diminishing their usual contributions. The workings of the scheme of sustentation had been favorable. A very large increase in the general contributions of the churches had already been realized by its means. Three hundred and eight ministers had sought and obtained relief under its provisions. The churches had given to this fund a little more than \$60,000, an amount sufficient, with the previous years' surplus, to enable the committee to meet all demands, and commence the new year with a working capital of \$12,000. The income of the Committee of Ministerial Relief was \$81,817.47. It owed \$9,887.50. Three hundred and seventy-nine cases had been helped. The amount of the permanent fund for the relief of the disabled ministers was on the 1st of April, \$104,761.99. It had yielded an income of \$5,961.92. The receipts of the standing Committee on Church Erection were \$110,774.88. One hundred and sixty-six more churches had contributed to the fund than had contributed to it the year before. Help had been given to the amount of \$88,091.85, to 160 churches. Three hundred and twenty-two churches had contributed to the Freedmen's Fund, and its receipts had increased \$5,000 over those of the previous year. The Board of Trustees of the General Assembly reported the receipts of their treasurer to have been \$72,859.08, and his expenditures \$68,395.74. The receipts of the treasurer of the Presbyterian House were \$8,488.43, and his expenditures \$7,518.19. The permanent fund amounted to \$87,188.

The missions of the Church are eleven in number: among the Indian tribes in the United States, 10 stations; in Mexico, 9; in Brazil, 5; in the United States of Colombia, 1; in Africa (Liberia, the Gaboon and Corisco, 11); in India (Lodiana, Farrukhabad, and Kolapoor, 18); in Siam and Laos, 4; in China and among the Chinese in California, 9; in Japan, 2; in Persia, 3; and in Syria, 5. There were employed in the work of these missions, 188 American and 56 native ministers, and 171 American and 387 native assistants, by teachers, and others. The total number of communicants reported (several fields failed to report) was 4,476; of scholars in the boarding and day schools, 10,201. The largest of the missions is that in India, where were employed 87 American and 12 native ministers, 50 American and 152 native assistants; and 640 communicants and 6,834 scholars were reported.

On February 25, 1878, the Presbyterian Board resolved to assume, after April 1, 1878, the missions in Chili, formerly carried on by the American and Foreign Christian Union.

II. PRESBYTERIAN CHURCH IN THE UNITED STATES (*Southern*).—The following is a summary of the statistics of this body for 1878, as compared with those for 1872:

STATISTICS.	1872.	1878.
Synods.....	11	11
Presbyteries.....	56	57
Ministers and licentates.....	912	989
Candidates.....	305	309
Churches.....	1,545	1,585
Whole number of communicants.....	91,308	98,906
Churches not reporting.....	87	84
Adults baptized.....	1,685	1,835
Infants baptized.....	3,799	3,736
Children in Sunday-schools and Bible-classes.....	55,943	54,710
MONEYS CONTRIBUTED.		
To sustentation and presbyterial domestic missions.....	\$51,699	\$63,734
To foreign missions.....	41,004	31,065
To education.....	47,533	48,603
To publication.....	10,479	11,941
To invalid fund.....	8,518	9,714
To pastors' salaries.....	432,050	477,471
To congregational purposes.....	415,955	424,105

Total.....		\$1,126,423

The General Assembly of the Presbyterian Church in the United States (commonly known as the Southern General Assembly) met at Little Rock, Ark., May 15th. The Rev. D. H. Smith, of New Orleans, was chosen moderator. The report of the Committee on Sustentation revealed several noteworthy facts relative to the condition of the Church. The receipts for the year had been: For sustentation, \$25,524.54; for the evangelistic fund, \$2,671.86; for the invalid fund, \$8,095.62. The contributions to sustentation were \$915.84, those to the invalid fund were \$1,450.62 more than similar contributions of the previous year, and the amount of the evangelistic fund was wholly additional to the previous year's accounts. Of 48 presbyteries which had contributed to these funds, it was shown that "somewhat over half" the churches (outside of the Synod of Kentucky) had contributed for sustentation, "about one-half" to evangelistic work, and "somewhat over one-fourth" to the invalid fund. Appropriations had been made to 144 pastors and supplies of churches, and 18 evangelists, and for 26 church-buildings. In the 48 presbyteries from which returns were received, 645 ministers were engaged in preaching, of whom 154 had also secular employments in part as a means of support, leaving 491 who were giving themselves wholly to the service of the Church. Seventy-nine of the ministers who had secular employment were willing to give their whole time to the ministry if they could receive a support of \$800 per annum. In 46 presbyteries, 366 churches and unions of churches were unable to give a support of that amount; 144 ministers in 45 presbyteries, wholly engaged in ministerial work, received apart from the sustentation fund, less than \$600; and 82 ministers received between \$600 and \$800. The average of the salaries outside of cities and the large towns was less than \$572. The receipts of the Committee on Foreign Missions from all sources were \$47,875.10. Of this amount, \$29,196.10 were given by churches; \$7,808.57 by Sunday-

schools. The remainder of the sum consisted chiefly of special contributions for the Campinas Institute (Brazil), and for the purchase of a press for the Chinese mission; 690 churches had contributed to the fund, against 815 which had given nothing. The receipts were about \$5,000 less than those of the previous year. Eighteen ordained missionaries were employed, of whom four were natives of the countries in which they were laboring. Added to these were 17 male and female assistant missionaries, and 10 native assistants, making 45 laborers in all. Of the missions, 3 were among the Indian tribes of the United States; 1 was in Italy, 2 in the United States of Colombia, 2 were in Brazil, and 1 was about to be established in Mexico. The total receipts of the Committee on Publication were \$63,299.35. Of this amount the churches had contributed \$8,800; books, tracts, etc., had been granted to the amount of \$7,283. The assets of the committee were \$4,706. Twenty new books had been published. The committee were authorized to accept an act of incorporation which they had obtained from the Legislature of Virginia. The delegate who had been appointed by the previous General Assembly to visit the General Synod of the Reformed Church in America, represented that he had been cordially received, and that his official salutations had been warmly responded to. The resolutions passed by the General Synod of the Reformed Church on the subject of the delegate's visit, were laid before the Assembly. The Rev. Charles H. Stitt addressed the Assembly as a corresponding delegate from the General Synod of the Reformed Church, speaking favorably of the project for a union of the two bodies. The following were unanimously adopted:

Whereas, In a paper officially communicated, the last General Synod of the Reformed Church in America has notified this General Assembly of the unanimous appointment of a committee to consider carefully the desirableness and feasibility of establishing closer relations with our Church;

Whereas, The Assembly regards said notification as indicative of a desire on the part of that venerable synod to enter into such closer relations if the way be clear;

Whereas, This Assembly on its part cordially reciprocates this feeling, and knows of no more effective method for ascertaining whether the two bodies are prepared for a nearer connection than the method of conference: therefore—

Resolved, That this Assembly do now appoint a committee to be composed of the following-named ministers and ruling elders: Rev. B. M. Palmer, D. D., Rev. Joseph B. Wilson, D. D., Rev. William Brown, D. D., Rev. R. K. Smoot, Major T. J. Kirkpatrick, William Henry Smith, and General A. M. Seales, whose duty it shall be to confer with a similar committee, if appointed by the General Synod of the Reformed Church, for the purpose of ascertaining in what manner such more intimate relations may be established, and what ought to be the nature and extent thereof, and report the result to the next General Assembly.

Resolved, That the stated clerk be directed to forward a copy of this paper to the General Synod of

the Reformed Church, to meet in New Brunswick, in June of this present year.

A circular was received from the Rev. S. S. Schmucker, D. D., proposing a confederation of churches for action on certain subjects; and inviting the General Assembly to send twenty-five delegates to the conference of the Evangelical Alliance to be held in New York in October. The following minute was adopted in reply, to wit:

Inasmuch as the General Assembly, at its first annual session in 1861, extended its fraternal salutations to all evangelical churches throughout the world, expressing its cordial desire to be in fellowship with all, especially with those of similar faith and order; by which terms and catholic spirit the Assembly still abides; yet, inasmuch as it has not now before it data sufficient for the full understanding of the character and purposes of the Evangelical Alliance, and the extent of the authority claimed for it and its "national branches," therefore—

Resolved, That the General Assembly deems it inexpedient to appoint delegates to attend the approaching meeting of the Evangelical Alliance in New York, but expresses the sincere hope that the spirit of grace may preside over their deliberations, and that all its proceedings may redound to the glory of God in the advancement of our common cause.

In fifty-four presbyteries, 711 Sunday-schools were represented, with 6,977 teachers, and 47,313 scholars. The contributions of the Sunday-schools amounted to \$25,710. Reports on evangelistic labors were received from thirty-three presbyteries. Thirty-two of them had, eleven had not, employed evangelists. Some progress had been made during the year in systematic benevolence. A revision of the rules of discipline submitted to the presbyteries by the previous General Assembly had been approved by thirty out of fifty-seven of them. Ten of the presbyteries approving had, however, declined to adopt the revision, while fifteen presbyteries had rejected it, and three had declined to vote definitely upon it. The revision was placed in the archives of the General Assembly for future reference. Union Theological Seminary was represented as in a prosperous financial condition.—Columbia Theological Seminary as in a bad financial condition. In other respects both institutions were flourishing. The resolutions of the Northern General Assembly respecting its relations with the Southern Church did not reach the General Assembly during its session, consequently no action was taken upon them.

The Independent Synod of Missouri met at St. Louis in October, and counseled the presbyteries under its jurisdiction to send commissioners to the next meeting of the Southern General Assembly.

III. — UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.—In the following statistics of this church, by synods, are given the number of presbyteries, pastors, congregations, communicants, and pastors without charge, as reported in May, 1873:

SYNODS.	Presby- teries.	Pastors.	Without Charges.	Congrega- tions.	Communi- cants.
Synod of New York.....	10	73	23	95	13,833
Synod of Pittsburgh.....	7	75	16	119	14,126
First Synod of the West..	7	70	23	135	14,390
Synod of Ohio.....	4	44	9	86	7,329
Second Synod.....	2	51	21	98	8,517
Synod of Illinois.....	7	53	22	87	6,936
Synod of Iowa.....	5	48	16	91	5,396
Synod of Kansas.....	3	21	14	48	1,071
Presbyteries not in synod.	4	6	15	19	1,064
Total.....	56	483	158	773	73,453

The total number of ministers is 591; number of licentiates, 53; number of students, 441; number of "unorganized stations," 85. The number of Sunday-schools is returned at 651; average of months open, 9.6; number of officers and teachers, 5,972; contributions of Sunday-schools, \$21,959. The contributions of the churches were as follows: For foreign missions, \$38,648; for church extension, \$19,308; for education, \$12,599; for publication, \$2,946; for the aged ministers' fund, \$1,789; for the Assembly's fund, \$1,400; general contributions, \$70,859; for salaries by congregations, \$431,119; for congregational expenses, \$267,825; total amount of contributions, \$872,918; average per member, \$11.48.

The fifteenth General Assembly met at Philadelphia, May 28th. The Rev. J. Y. Scouler, of Ohio, was chosen moderator. The receipts of the Board of Home Missions for the preceding year were reported to have been—aside from legacies and bequests—\$32,742.36, and its expenditures \$28,688.39. One hundred and sixty-five stations had been helped. The number of church-members in the 66 stations which reported wholly or partially was 8,941, and the average attendance upon religious services was, 16,549. These stations had contributed \$5,068 to the board of the church, and \$47,201 for the support of pastors or missionaries. The services of ninety-five missionaries had been asked for, but the board had had at its disposal only eighty-seven men. The receipts of the Board of Foreign Missions from all sources had been \$50,646.60. Of this sum, \$3,132.85 were from bequests and legacies, and \$2,283.99 from Sunday-schools. There was also at the disposal of the board a balance from the previous year of \$10,711.29. The expenditures of the board had been \$55,164.39. The missions of this Church are in Syria, India, Egypt, and China. There were reported, as connected with them, 21 stations and other stations, 15 licensed and ordained ministers, 22 American women missionaries, one printer, two physicians, 97 native ordained ministers and teachers, 18 churches, 563 communicants, 21 schools, and 2,323 scholars. The native churches in Egypt had contributed \$4,680.24. Books, tracts, etc., had been issued from the press in Egypt amounting to 298,000 pages. The mission property in this country was estimated to be worth about \$100,000. The

secular interests of the mission had become so large that a man specially charged with the care of them would soon have to be appointed. An estate had been bought at Burdara, on Mount Lebanon, to be made a summer resort for the missionaries in Syria and Egypt. It was resolved to undertake to send out six additional missionaries during the ensuing year. The amount of \$73,846 currency was appropriated for the year's work. The receipts of the board of church extension had been \$25,864.62, or \$6,435.47 more than those of the previous year. Thirty applications, asking \$40,908.50, had been considered, and \$37,503.84 had been appropriated. The assets of the Board of Publication were \$89,084.16, or \$10,910 more than a year ago. The schools under the care of the Board of Freedmen's Missions were closed on the 10th of June, 1872, and the teachers had returned to their homes. The receipts of the Board of Education had been \$7,886.10, and its expenditures \$7,186.25. The number of scholars in the Sunday-schools was expected to be "probably about 60,000."

The receipts of the General Assembly fund had been \$1,927.47, and those of the superannuated ministers' fund \$1,727.27.

The presbyteries were directed hereafter, in the organization of new churches, to require that the charters of such churches shall contain ascertain formula, as a definition of their ecclesiastical relations to the United Presbyterian Church of North America. It also recommended that existing charters be changed to conform to this formula. The presbyteries and congregations were also instructed, in accordance with the decision of the Supreme Court of the United States, in the case of *Watson vs. Jenner*, that "the control and possession of church property belongs only to members holding to the principles of the United Presbyterian Church, and that it will require the unanimous vote of the session and congregation to sell, dispose of, or alienate said church property; it being understood that this action does not prevent congregations from disposing of church property for the purpose of rebuilding, or the erection of a new building in a new location." In reply to a request from the Rev. S. J. Schmucker, D. D., that the General Assembly would consider his scheme for a confederation of churches, and appoint delegates to the World's Conference of the Evangelical Alliance, it replied by resolution:

That while cherishing kind and Christian regards for every follower of Christ, and for all evangelical churches, and while holding itself ready to coöperate in any good work with the servants of Christ of every name, yet this Assembly does not feel that it would be for edification for us to set aside in principle or practice any of its distinctive features as a portion of the visible Church, or even seem to affect a union which did not really exist; and, that while the Divine direction and blessing are devoutly asked for the Evangelical Alliance, in connection with every movement that has for its end the promotion

of the well-being of men, and the glory of God, yet the General Assembly does not deem it expedient or important that it make any appointment of delegates or representatives to attend the meeting of the Alliance to be held in New York, in October next.

The connection of members of the church with the new order of "The Patrons of Husbandry" was disapproved of, on the principle that the United Presbyterian Church discountenances all secret societies.

IV. REFORMED PRESBYTERIAN CHURCH.—The fiftieth meeting of the General Synod of the Reformed Presbyterian Church was held in Pittsburg, Pa., commencing May 31st. It was attended by twenty-five delegates. The Rev. S. Young was chosen moderator. The discussion and adoption of a report "On the Signs of the Times" form a regular feature of the sessions of this body. The report adopted at the present meeting noticed the following points: 1. An awakening of the public conscience on impurity and divorce, and more faithful teachings from the pulpit on these subjects; 2. The wide-spread prevalence of disregard of the civil laws bearing on moral conduct; 3. A greater degree of harmony and coöperation attained among the various schools opposed to Christianity; 4. The growth of the Roman Catholic Church in the United States, and its movements to increase its power and influence; 5. Certain teachings in the Presbyterian Church, which were held to be contrary to the teachings of Scripture; 6. The gradual removal of obstacles which impede the progress of God's truth; 7. Progress was recognized in the effort to secure a formal recognition of God in the national Constitution; 8. The increasing approach to unity among the various branches of the Church.

The Board of Domestic Missions had during the year received \$1,387.83, and had expended \$1,187.87. The Board of Foreign Missions had received, including the balance from the previous year, \$1,526.05, and had expended \$94.50. The Board were instructed to inquire whether "a feasible plan of coöperation with any of the departments of the Reformed Presbyterian Church can be devised," with the understanding that if such coöperation cannot be secured, the synod will establish an independent station in Southern India or elsewhere. The endowment fund of the theological seminary was reported to have reached \$30,538.75. It had increased during the year \$2,032. The expenses connected with the management of the fund were \$1,829.55. The trustees were contemplating the purchase of a building in Philadelphia for the use of the institution.

V. CUMBERLAND PRESBYTERIAN CHURCH.—The General Assembly of the Cumberland Presbyterian Church met at Huntsville, Ala., May 15th. The Rev. J. W. Poindexter, of Kentucky, was chosen moderator. The proposition of the Rev. S. S. Schmucker, D. D., for a confederation of churches, was favorably considered, and referred to a special committee to

report upon it at the next meeting of the General Assembly.

The fact that the General Assembly of the United States of America (Northern) had appointed a committee on the subject of union with the Cumberland Presbyterian Church was reported. Thereupon, although this General Assembly had not contemplated treating with the other Presbyterian churches in reference to union, yet, as the suggestion that a correspondence be begun on that subject had been made by its own corresponding delegate to the Presbyterian General Assembly, the committee was appointed. Decided action was taken for the promotion of temperance in the Church. Resolutions were passed declaring it the sense of the General Assembly "that it is a sin to make, buy, sell, or give, or in any way use as a beverage intoxicating drinks of any description;" urging church sessions to deal with members who should violate the principles above expressed, in such manner as would "free the church from the guilt and scandal of such unchristian conduct;" advising ministers and members of the Church to encourage temperance organizations; approving recent temperance legislation; and counseling the people to help by all prudent means in the enforcement of temperance laws where they exist. The Board of Missions had succeeded in securing the coöperation of the presbyteries in the conduct of a uniform system of operations. Interest in the subject was increasing. An opening to the foreign field had been found in Japan, where the Rev. Mr. Gordon, a minister of the Cumberland Presbyterian Church, was already laboring as a missionary. The board were instructed to send two ministers to Japan as early as practicable; they, in connection with Mr. Gordon, will form a presbytery. The committee of publication recommended the consolidation of the different papers of the denomination; the publication of works in the German language, and the establishment of a depository at St. Louis. The several educational institutions of the Church were represented as being in a condition of continued prosperity. The statistics of the Cumberland Presbyterian Church are very defective. Out of 103 presbyteries only 29 have sent up reports. The roll of ministers in these presbyteries includes one hundred and seventeen names of ministers, and three hundred of probationers for the ministry, of whom one hundred are studying. Three hundred thousand dollars were raised for endowment funds, and \$25,000 for the sustentation fund during the year ending in May, 1878.

VI. CANADA PRESBYTERIAN CHURCH.—This Church was formed in 1861 by the union of the Canada branches of the Free and the United Presbyterian Churches of Scotland. The General Assembly was organized in 1870, with four district synods and one presbytery. The following is a summary, by synods, of the statistics of the Presbyterian Church for 1878:

SYNODS.	Ministers.	Number of Stations supplied.	Communicants.
Montreal.....	71	180	10,078
Toronto.....	77	180	11,214
Hamilton.....	88	166	16,680
London.....	76	143	12,067
Manitoba.....	6	14	973
Settled charges, not reported, 14.....			1,400
Total, 19 presbyteries....	315	683	51,612

The increase of communicants over the number reported for the previous year was 1,840. The number of Sunday-school teachers is 4,112; of persons in Sunday-schools and Bible-classes, 40,864. The contributors for the year ending March 31, 1873, were as follows: For congregational purposes, \$463,390.33; for the college fund, \$15,951.66; for the home mission fund, \$18,777.87; for the foreign mission fund, \$8,216.36; for the widows' and orphans' and aged ministers' fund, \$3,662.84; for the Assembly fund, \$2,412.55; for the French Evangelization, \$5,454.51; for the Kankakee mission, \$2,640.61; Sunday-school contributions for missions, \$3,973.38; benevolent objects not otherwise specified, \$26,340.66; total contributions for congregational purposes, schemes of the church and benevolent objects, \$550,901.72.

The General Assembly of the Canada Presbyterian Church met in Toronto, June 8d. The Rev. William Reid was elected moderator. The Committee on Foreign Missions reported that their receipts had been, including the balance from the previous year, \$12,425.07. They still had a balance on hand, after deducting their expenditures, of \$5,120.50. The committee had closed its accounts with the mission to British Columbia, after having spent \$25,000 on it in twelve years. The mission had been transferred to the Board of Home Missions. The Saskatchewan mission had returned in August, 1872, thirty-two communicants, of whom six were whites, and twenty-seven were Indians and half-breeds. Six of the Indians were converts from heathenism. There were in the school fifty-four pupils, all but one of whom were Indians and half-breeds. A favorable report was made concerning the work which had been accomplished in the island of Formosa. The Committee on Home Missions reported that their total receipts had been \$21,242.90, and their expenditures, \$18,693.42. Increased contributions had been made by all the presbyteries in Ontario and Quebec. One hundred and twenty-three mission stations were reported, and fifty-three congregations had received help from the supplemental fund. The union committees of the different Presbyterian churches in Canada and the Eastern Provinces had held two conferences with reference to union into one church; one at Montreal in December, 1872, and the second at St. Johns, N. B., April, 1873. Their deliberations had ended in agreement upon a basis of union.

This basis was submitted to the General Assembly, and was adopted by a large majority. It consists of four articles, and is as follows:

1. That the Scriptures of the Old and New Testaments, being the Word of God, are the only infallible rule of faith and manners.

2. That the Westminster Confession of Faith shall form the subordinate standard of this Church; that the larger and shorter catechisms shall be adopted by the Church, and appointed to be used for instruction of the people, it being distinctly understood that nothing contained in the aforesaid confession or catechism regarding the power and duty of the civil magistrate, shall be held to sanction any principles or views inconsistent with full liberty of conscience in matters of religion.

3. That the government and worship of this Church shall be in accordance with the recognized principles and practice of Presbyterian Churches, as laid down generally in the "form of Presbyterian Church government," and in "the Directory for the Public Worship of God."

4. That this Church, while cherishing Christian affection toward the whole Church of God, and desiring to hold fraternal intercourse with it in its several branches, as opportunity offers, shall at the same time regard itself as being in such ecclesiastical relations to churches of the same doctrine, government and discipline with itself, as that ministers and probationers from those churches shall be received into this Church, subject to such regulations as shall from time to time be adopted.

The adjustment of the interests and forms on minor points of the two churches uniting was provided for in nine supplementary articles.

It was agreed that the name of the United Church should be "the Presbyterian Church of British North America." The four articles of the basis of union and the explanatory articles were then sent down to the "presbyteries, kirks, sessions, and congregations," for ratification by them. The Committee on Sunday-schools reported the number of schools to be 520; of scholars, 34,172, or 2,590 more than were reported the previous year. The missionary contributions of the Sunday-schools were \$3,924.18, or \$446.74 more than for the previous year. The amount of their contributions for all purposes was \$18,762. The receipts for the widows' and orphans' fund were \$17,061.41. Twenty-three widows or families were receiving annuities.

VII. SYNOD OF THE PRESBYTERIAN CHURCH OF CANADA IN CONNECTION WITH THE CHURCH OF SCOTLAND.—The statistics of this synod, as presented at its meeting in June, showed the number of congregations to be 183, of which 23 were vacant; the number of communicants, 11,987. The increase in the number of communicants from the previous year was 529. Returns were not received from forty-eight congregations. The synod met at Montreal, June 8d. The Rev. James Patterson was elected moderator. The minutes of the joint meetings of the committees on union held at Montreal in December, 1872, and at St. John, N. B., in April, 1873, were submitted. The basis of union and supplementary articles, as agreed upon by the committees (see Canada Presbyterian Church), were approved, and sent down

to the inferior judicatories and congregations for ratification. A favorable report was presented of the juvenile mission and Sunday-school enterprise. It was sustaining the mission in India, the only foreign mission in connection with the Church. In the Manitoba mission, forty-nine congregations had contributed to the support of the work among them.

Synod of the Lower Provinces.—The two synods of the Lower Provinces of British North America met in June. The basis of union as adopted by the joint committees of the four churches in their meetings at Montreal and St. John, and approved by the General Assembly and the Synod of the churches in Canada, was also approved by both these bodies.

VIII. CHURCH OF SCOTLAND.—Reports of the voluntary contributions in the Church of Scotland for all objects during the year ending in May, 1873, were published from 1,012 parishes. The total amount raised was £255,850 10s. 6d. Nearly three hundred churches, many of them wealthy ones, had failed to report. Of this sum, £41,561 were raised by church-door collections, £35,225 by seat-rents, £16,671 were given for parish and social missions; £10,540 for week-day and Sunday-schools; £31,851 for church extension, and kindred objects; £40,342 for the six missionary and educational schemes; £3,275 for other objects recommended by the General Assembly; the collections in Sunday-schools for missionary purposes amounted to £1,027; the gifts for the endowment of chapels were £15,715; local subscriptions, £22,710; contributions to the associations for augmenting small livings, £6,900; to the associations for female education in India and for the education of female Jews, £2,293; to other Christian and charitable objects, £27,224. The total income of the foreign mission fund was £36,477, of which £18,485 were received from home sources, and £3,081 were received by the Ladies' Society for Female Education; the remainder consisted of contributions from abroad. Thirty-seven thousand pounds had been subscribed toward the fund of £50,000 started several years before to provide homes for missionaries, and many grants had been made for this object. The sum of £3,117 had been received for the Indian mission scheme. The income of the home mission funds was £9,509. Seventy-seven mission stations were supplied, at which there was an average attendance of 9,500 persons. Fifteen thousand pounds had been raised during the year for the fund of £100 for the endowment of 100 more parishes, and fifteen parishes had been endowed. The General Assembly of the Established Church of Scotland met at Edinburgh, May 22d. Her majesty was represented by the Earl of Airlie. The Rev. Dr. Gillan was elected moderator. The Earl of Airlie presented the customary gift of £2,000 from the Queen for the spread of religion and education in the Highlands and islands of Scotland. The

Queen had also subscribed to the fund for the endowment of one hundred additional parishes. Deputies from Canada and the Eastern Provinces of North America spoke of the progress of the negotiations for the union of the Presbyterian Churches of the Provinces. The revenue of the colonial committee had risen to £5,214, while their expenses were only £2,954. A committee was appointed to address the Presbyterians of America in reference to their coöperating with this Church and the Free Church in the mission work in Rome. By the latest reports, the number of Sunday-schools connected with this Church was 1,810; number of teachers, 15,584; number of scholars, 173,281. These returns show a decrease of 435 schools, 90 teachers, and 2,200 scholars.

IX. FREE CHURCH OF SCOTLAND.—The General Assembly of the Free Church of Scotland met at Edinburgh, May 22d. The Rev. Dr. Duff was elected moderator. Since the previous meeting of the General Assembly a very strong opposition to the scheme for union with the United Presbyterian and Reformed Presbyterian Churches had been provoked in the Highlands through the agency of the opponents of union in the General Assembly, the chief of whom was the Rev. Dr. Begg. It had become evident that an attempt to push the scheme of union in the face of this opposition, would almost certainly lead to a disruption of the Church. The supporters of the union movement had therefore decided to suspend their efforts to promote that measure, and devote their energies to carrying the scheme for the "mutual eligibility" of the ministers of the three negotiating Churches to each other's pulpits. As applied to the Free Church, this scheme provided that ministers of the United Presbyterian and Reformed Presbyterian Churches may be inducted into pulpits of the Free Church on signing its formulas. The question of approval of the scheme had been submitted to the presbyteries by the previous General Assembly. The report of the votes showed that it had been approved by fifty-six presbyteries, and disapproved by fifteen presbyteries, while five presbyteries had made no response. The General Assembly was thus empowered to pass the scheme into a law. Such a step was, however, bitterly opposed by the party who had contended against the union movement. They had obtained 123,000 signatures to a petition against the measure, and threatened to secede if it were pressed. The scheme was formally submitted to the Assembly on the 28th of May. An excited debate took place upon it. Its friends finally consented to a modification in its terms, so that a minister called from one of the other bodies by a congregation of the Free Church should be required, before accepting the call, to declare his willingness to subscribe to the formulas which are subscribed by all Free Church ministers at the time of their ordination. This concession having been made, the

party opposed to the union gave their consent to have the measure adopted without a vote, provided they were allowed to enter their dissents upon the record. The resolution, as adopted, besides the provisions in relation to the signature of the Free Church formulas by ministers called from the other Churches, contains a reservation that "the Free Church still adheres to the great fundamental principles regarding the headship of Christ over the Church, and his headship over nations and rulers officially and collectively, as well as individually." To guard against any possibility of irregularity in the proceedings on this subject, the Assembly ordered the resolution to be sent down to the presbyteries for approval, after which it should become a standing act. The only point of difference between the formula of the Free Church and that of the United Presbyterian Church concerns the relation of civil magistrates to religion. The formula of the Free Church recognizes the obligation of the state to further the interests of the Lord Jesus Christ, while that of the Free Church holds that the state should have nothing to do with the Church of Christ in the way of giving it state money or state support, and that the present connections of Church and state should be severed. The subject of disestablishment came directly before the Assembly, when a resolution was adopted to the effect that the Scottish State Church is indefensible on Scriptural grounds; that it is the duty of the Free Church to assume an attitude of watchfulness in respect to the ritualism and rationalism recognized in the Church of England; that the maintenance of the established Churches in the actual circumstances of the country tends necessarily to embody the principle of concurrent endorsement of truth and error; but that, while it concerns the highest interest of religion and of the country that this state of things should come to an end, the main duty of the Free Church lies in the line of so using its influence that the public mind may be prepared for dealing with the question wisely and scripturally when it comes to be finally decided.

In connection with the home mission work of the Church, the Assembly recommended to the members that they support the new scheme for raising £20,000 in Glasgow, and £10,000 in Edinburgh, and other parts of the country, for the mining population. The increase of the home-mission fund for the year had been £12,995. The income of the fund for the conversion of the Jews was £5,471. A fund of \$5,500 had been accumulated for the building of mission premises at Constantinople. One thousand pounds were still wanted for this purpose. It was reported that the Church had raised, during the year ending in March, the total sum of £452,789 7s. 4d., made up as follows: for the sustentation fund, £186,864, 3s. 8d.; for the local building fund, £73,250, 19s. 8d.; for the congregational fund,

£147,715, 6s. 1d.; for missions and education, £77,850; miscellaneous contributions, £18,108, 18s. 3d. There are reported as connected with the Free Church of Scotland 2,614 Sunday-schools, with 18,815 teachers, 151,848 scholars, showing a decrease of 76 schools, 210 teachers, and 5,699 scholars.

X. UNITED PRESBYTERIAN CHURCH OF SCOTLAND.—The number of congregations on the roll of the synod of this Church at the end of 1872 was 611; number of communicants, 182,810, showing an increase of 1,884 during the year. The proportion of this increase was nineteen times greater in England than in Scotland. The total of contributions and income from all sources was £380,988, or £5,777 more than had ever before been collected in one year. Of this sum, £69,897 were contributed for missionary and benevolent purposes at home and abroad. The total contributions during the year for ministerial stipends were £129,780, 18s. 8d., an average of £212, 6s. 6d. for each minister. The foreign mission-fields of this Church are in Jamaica, Trinidad, Old Calabar, Kaffraria, India, China, and Spain. There were connected with them at the time of making the last report, in May, 1873, forty-three ordained European and fifteen ordained native missionaries, eight European medical missionaries, two native licentiates, eleven European male and female teachers (and two about to depart), and 220 native assistants and teachers. The number of principal stations was 64; of out-stations, 148; of communicants, 6,680; of candidates, 1,024; of week-day schools, 157; of pupils in the same, 9,188. The Mission Board had during the year sent £2,853 to Continental Europe for the help of the evangelical churches and societies there. The sum of £10,700 had been contributed for starting a mission in Japan. The synod of the United Presbyterian Church of Scotland met in Edinburgh, May 12th. The Rev. Dr. Joseph Brown, of Glasgow, was chosen moderator. A petition in favor of the resolution offered in Parliament by Mr. Small for the disestablishment of the state Churches of England and Scotland was, in accordance with a resolution unanimously passed by the synod, signed by the moderator in its name, and by 440 members of the synod. A "general and provisional" approval was given by the vote of a large majority of the synod to the scheme for a union between the English Presbyterian Church and the United Presbyterians in England. A committee was also appointed to consider on what principle a union could be effected between the United Presbyterians in Ireland, the Irish General Assembly, and the Eastern Reformed Presbyterian Synod. Arrangements were made to convert the synod into a General Assembly. The Sunday-school reports of this Church show the number of teachers to be 10,870; of scholars, 106,500.

The *United Presbyterian Synod of England* met on the 18th of October. A large majority

of the sessions and presbyteries, both in England and Scotland, had replied favorably to the overture which had been sent down to them respecting union with the English Presbyterian Church. The synod determined that the negotiations for union should be pursued on the plan of the Union Committee, with such additional federalities between the churches in England and Scotland as might be required to remove objections, and make the union more complete; that the committee should be re-appointed, and that the opinions of congregations should be ascertained in the following February and March.

XI. REFORMED PRESBYTERIAN CHURCH OF SCOTLAND.—The General Synod of this Church met at Edinburgh in May. It approved of what its committee had done in the matter of union with the United Presbyterian and Free Churches, but deprecated the "mutual eligibility" scheme, if it is to be regarded as a settlement of the whole question, although it would accept it as a step toward incorporation. It expressed the conviction that union ought to be sought, and appointed a committee to promote that object.

XII. IRISH PRESBYTERIAN CHURCH.—The General Assembly of the Irish Presbyterian Church met at Belfast in June. A proposition to enact a special law prohibiting the use of instrumental music in church services led to an excited debate. The question was disposed of by the adoption of resolutions to the effect that the Assembly would refrain from pressing any law on the subject, and that the members should give up the agitation of the question, and address themselves with increased diligence to the improvement of the psalmody of the Church. The home income of the mission fund of this Church for the year was £6,371 2s 6d. In addition to this amount, £1,040 1s had been received in India from government grants, school fees, and subscriptions. The mission is in India, and had connected with it, according to the last report, 5 stations, 4 branch stations, 7 ordained European missionaries, 51 European and native assistants, 2 high-schools, with 319 pupils, and 16 vernacular schools, with 880 pupils. The number of communicants was 138.

XIII. VICTORIA PRESBYTERIAN CHURCH.—The General Assembly of the Victoria Presbyterian Church (in Australia) met in December, 1872. A scheme of sustentation, adopted by the previous General Assembly and approved by the congregations, had just been put in operation. Its object was to raise the minimum stipend of ministers to £800. The statistical reports showed the number of settled ministers to be 114; unsettled ministers, 12; members and adherents 45,000; children in the Sunday-schools, 21,058; contributions of the congregations, £67,958; total income of the Church from all sources, £72,000. A joint scheme had been agreed upon with the clergy and members of the Church of England for

supplying the ordinances of religion to the thinly-peopled districts of the colony. The General Assembly approved of this scheme.

PROTESTANT EPISCOPAL CHURCH.

The statistics of this Church were, according to the *Church Almanac* for 1874, as follows:

DIOCESES AND MISSIONS.	Clergy.	Parishes.	Communicants.	Contributions for Missionary and Church purposes.

The following is a general statistical summary of the Church:

Dioceses.....	41
Missionary jurisdictions.....	9
Bishops.....	52
Priests and deacons.....	3,043
Whole number of clergy.....	3,095
Parishes, about.....	2,700
Ordinations—deacons (in 29 dioceses and 3 mission jurisdictions).....	147
Priests (in 23 dioceses and 3 mission jurisdictions).....	113
Total (in 34 dioceses and 3 mission jurisdictions).....	260
Candidates for deacons' order (in 31 dioceses and 2 mission jurisdictions).....	340
Churches consecrated (in 23 dioceses and 2 mission jurisdictions).....	66

Baptism—Infants (in 34 dioceses and 6 mission jurisdictions).....	27,535
Adults (in 34 dioceses and 6 mission jurisdictions).....	6,345
Not specified (in 4 dioceses and 3 mission jurisdictions).....	5,924
Total (in 38 dioceses and 8 mission jurisdictions).....	39,804
Confirmations (in 40 dioceses and 7 mission jurisdictions).....	23,515
Communicants—Number reported in 39 dioceses and 8 mission jurisdictions.....	354,857
Number in the whole Church, about.....	260,000
Marriages (in 37 dioceses and 8 mission jurisdictions).....	10,800
Burials (in 37 dioceses and 8 mission jurisdictions).....	20,850
Sunday-school teachers (in 34 dioceses and 3 mission jurisdictions).....	23,790
Scholars (in 37 dioceses and 4 mission jurisdictions).....	233,113
Contributions (in 38 dioceses and 7 mission jurisdictions).....	\$7,316,149 44

A comparison of the general statistical summary for 1873 with that of 1872 shows an increase as follows: Bishops, 1; clergy, 106; ordinations, 47; candidates, 29; churches consecrated, 14; baptisms, 8,535; confirmations, 1,888; communicants, 30,272; Sunday-school teachers, 385; Sunday-school scholars, 8,461; contributions, \$1,128,898.55. The average ratio of increase in the number of communicants in the forty-one dioceses was 3.94 per cent.; in the nine missionary jurisdictions, 25.57 per cent. The average amount of contributions for each communicant in the dioceses was \$29.43 in 1873, against \$26.22 in 1872; in the missionary jurisdictions, \$42.37 in 1873, against \$32.99 in 1872.

The *Board of Missions* of the Protestant Episcopal Church met in the city of New York on the 27th of October. Bishop Smith, of Kentucky, presided. The Domestic Committee reported their total receipts for the year to have been \$173,254.69, and their disbursements \$166,917.01. The sum of \$29,000 was held in invested funds. There had been received from legacies \$33,796.23, and through the mite-chests, \$18,962.19. Two hundred and thirty-one missionaries had been employed in thirty-six States and Territories. A resolution was passed requesting the House of Bishops to take into consideration the expediency of erecting each separate organized territory into a missionary jurisdiction, at the next general convention, and of electing seven new missionary bishops for the charge respectively of the territories. The board, in the same resolution, pledged itself heartily to support such action, if the bishops should determine so to change the missionary jurisdiction. The receipts of contributions for the Indian work had been \$67,777.79. A statement was made, in the report of the commission on this subject, of the work that had been done by the new Bishop of Niobrara. A building was nearly completed for the education of Indian boys as teachers and missionaries within the Indian Territory. The Indians of Washington Territory had made application for a teacher of the Episcopal Church. The first annual

report of the Woman's Auxiliary was made to the board. Nearly \$20,000 had been raised for the several departments of the board through its means. The contributions for the year to the work of home missions to colored people amounted to \$15,650.47, and \$14,903.51 had been spent upon the same work. The report of the commission contained some expressions respecting the apathy of the clergy and congregations regarding this course. The appointment of a missionary bishop for the colored people was mentioned as a subject for consideration, but not for immediate action. The receipts of the foreign committee for the year amounted to \$114,110, or \$3,400 more than the receipts for 1872. Fifteen new missionaries had been appointed in Africa, likewise Japan and Hayti, besides two native Chinese missionaries. The foreign work, under the care of this committee, was distributed as follows: *Greece*—One mission-school at Athens, with a female principal, twelve assistant (Greek) teachers, and 450 pupils. *West Africa* (Liberia)—Four districts, twenty stations, one bishop (white), seven presbyters and deacons, two artisans, twenty-three teachers and catechists. The gospel was preached in many native villages outside of the mission-stations. Bishop Auer was consecrated as missionary bishop for this diocese at Washington, D. C., April 17, 1873. *China*—One bishop, seven missionaries, seven woman missionaries, six native ministers and catechists; five stations, twenty-two schools, and 490 scholars. A translation of the entire Old Testament into the Mandarin dialect had been completed by Dr. Schereschewski, at Peking. The mission has a hospital at Shanghai. *Japan*—Six ordained missionaries, one missionary physician, two woman missionaries; two stations, one school, with 48 scholars. A hospital and dispensary were to be opened at Osaki as soon as a suitable building could be secured. *Hayti*—Three foreign and nine native missionaries, seven stations. *The Syppa School* (Syria), under the care of Miss Mary B. Baldwin and three assistants, had 100 scholars. **SUMMARY:** Bishops, 2; other clergy, 37; male assistants, 20; female assistants, 34; total, 93. Schools, 50; scholars, 1,648.

The total receipts of the *Evangelical Knowledge Society* for the year ending October 1, 1873, were \$27,018.48; the expenditures were \$24,180.55. The society had \$26,000 of invested funds, and \$40,513 worth of stock, books, and publications. An arrangement had been made with Mr. Thomas Whittaker, of New York, for carrying on its business.

The total receipts of the *Evangelical Educational Society* for the year ending October 1, 1873, were \$31,111.52; expenditures, \$26,102.58. The receipts were considerably less than those of the previous year, but the society had not yet suffered any embarrassment on this account. The endowment fund of the society had reached \$18,000. Ninety-seven

students had been helped during the year, and the society entered the new year with sixty-five students, and many applications on file.

The receipts of the *American Church Missionary Society* for the year ending October 1, 1873, were \$65,508.11, an increase of \$11,569.46 over the receipts of the previous year. The balance in the Treasury on October 1, 1873, was \$1,452.43. The society held \$42,000 of permanent and trust funds; sixty missionaries had been commissioned during the year for work in the domestic field, of whom forty-two were laboring at the close of the year. The foreign missions were in Costa Rica and in Mexico. Of the former mission, the work was spoken of as "small, and chiefly prospective." In Mexico, a great interest prevailed in the movement of the reformation. Two missions were carried on in the city of Mexico, and fifty mission-stations had been established in other places.

The *Bible and Common Prayer-Book Society* had distributed during the year ending October 1, 1873, 33,000 volumes. The field of distribution was spoken of in the report as extending "throughout the length and breadth of the land." New opportunities were opening constantly.

The receipts of the *General Protestant Episcopal Sunday-School Union and Church-Book Society* for the year ending in June, 1873, were \$3,858.38, and the expenditures, \$3,744.75. Thirteen thousand one hundred and seventy-five literary books, and 167,549 instructive books had been sold during the same time; 2,434 of both kinds had been given away, and 5,510 had been disposed of by order of the Society for promoting Religion and Learning, and to pastors and others having privileges.

The *Convention of the Diocese of New York* met on the 25th of September. Bishop Potter in his address spoke of the contemplated construction of a cathedral. He had appointed a committee to make the primary movement in this object, through whose agency a charter had been obtained, giving them power to buy a site and build the cathedral. The trustees had resolved, however, not to attempt the erection of such a building without sufficient pecuniary means at the outset.

A report was made at the meeting of the Board of Missions of a project for building a cathedral at Omaha, Nebraska. Three thousand dollars had been subscribed for this purpose; but as \$80,000 were needed, nothing had been done, or would be, until the enterprise could be undertaken without danger of embarrassment.

The *Year-Book of Trinity Parish, New York*, for 1874, contains statements designed to correct what is styled an exaggerated idea of the wealth of the corporation, which has prevailed for many years. It is claimed in this statement that "in estimating the value of the property the calculation ought to be limited to what yields an income." A very large part

of the Trinity estate—including the churchyards of Trinity and St. Paul's, the burial-ground on Hudson Street, and Trinity Cemetery at Carmansville—is not only unproductive, but is, much of it, an actual source of expense. Leaving out of account these unproductive lots, and estimating only what yields an income, the entire estate is represented as being worth only \$7,000,000 or \$8,000,000; it returned an income during 1873, of only about \$500,000. "Of this income," the *Year-Book* states, "a large part is consumed by the expenses of the estate. About one-tenth is given away to poor churches outside of the parish. Not one dollar is hoarded; the entire income is spent for the purposes of the sacred trust; and it frequently happens, and was almost invariably the case until within a few years, that the annual expenditures exceeded the income."

The *Confraternity of the Blessed Sacrament* is an organization of members of the Church of England and of the Protestant Episcopal Church, the main objects of which look to the advancement of ritualistic doctrines and practices. The American branch of the confraternity was organized several years ago, but did not attract attention—in fact, its existence was not generally known—until an account of the conference and anniversary of the associates which took place at St. Ignatius Church in the city of New York, on the festival of *Corpus Christi* of 1873, was published in an English paper. A greater degree of importance was attached to the proceedings than would otherwise have been by the fact that Bishop Quintard, of Tennessee, was said to have been present at the celebration. The church was furnished for the occasion in accordance with the requirements of the "advanced ritual," with candles, eucharistic lights, crosses, mural pictures, and other ornaments. An address was delivered by the Rev. Dr. F. C. Ewer, Superior-General of the American branch. He stated that while the society in 1869 numbered only 21 priests associate and 89 lay associates, it had now 377 associates, of whom 69 were priests. Daily celebrations had been instituted in Boston and Philadelphia. Celebrations still continued in New York and Baltimore, and at a point in the far West. The eucharistic vestments were worn in churches in at least ten of the forty-one dioceses, viz.: in those of Maine, Vermont, Massachusetts, Rhode Island, Connecticut, Albany, Western New York, Pennsylvania, Pittsburgh, Maryland, Florida, Tennessee, Illinois, Wisconsin, and Minnesota. Eucharistic lights, Dr. Ewer represented, had recently been placed upon the altar of Trinity Church, New York.

The secretary was directed at this meeting "to forward semi-annually to all priests associate a printed list of all priests associate, which list is to be considered confidential." A resolution was also passed expressing the grateful appreciation of the society "of the

part taken by the Rev. J. J. E. Bennett, of Frome Selwood, England, in the recent vindication of the doctrine of the Anglican Church touching the most Holy Blood of Christ. The Committee on Vestments reported that the Confraternity had supplied vestments and altar-linen to several churches, and that there was a slow but steady advance in the use of such articles.

After the publication of the report of the conference and celebration in the American papers copying the English report, the proceedings and objects of the Confraternity were severely criticised in communications in the Church papers. At length, in order to correct alleged misrepresentations, and to set forth what were regarded as the true objects of the order, the following circular was published by the authority of the Superior-General of the American branch of the Confraternity:

Whereas, Continued attacks, arising from grave misapprehension, have recently been made upon the American Branch of the Confraternity of the Blessed Sacrament; and—

Whereas, The language of those Associates of the Confraternity of the Blessed Sacrament, whose communications have been published, has, on highly-important points, been perverted, and held up as expressing what was neither expressed nor to be implied, and as indicating designs and action on the part of the American Branch of the Confraternity of the Blessed Sacrament which are not true; and—

Whereas, It is due to our Right Reverend Fathers the bishops, and to our brethren the clergy and laity, whose minds may have been influenced by the above-named attacks, that they should be officially certified of the incorrectness of the charges made: therefore—

Resolved, That we place on record the following statement, namely:

I. That it is justice to the American Branch of the Confraternity of the Blessed Sacrament that a distinction be made between the personal acts, words, or designs of any individuals who may be Associates of the Confraternity of the Blessed Sacrament and the acts, words, or designs of the Confraternity as an organization. And that any unauthorized acts, words, or designs of the former, if any there have been or are yet to be, should not be charged to the latter.

II. That the American Branch of the C. B. S. is not, and never has been, a secret society.

III. That the American Branch of the C. B. S. did not interfere in any manner whatever with the late Episcopal election in Massachusetts; that it was not organized for the purpose of mingling at all in Church politics; that it has not so mingled at any time; and that as a Confraternity it is wholly averse to ecclesiastical or any other intrigue.

IV. That the members of the American Branch of the C. B. S. are not associated for any other purpose than solely and strictly to promote the "Objects," and conform to the "Rules" set down in the Manual of the Confraternity, which are as follows, viz.:

OBJECTS.

1. The honor due to the Person of our Lord Jesus Christ in the Blessed Sacrament of his Body and Blood.

2. Mutual and Special Intercession at the time of and in union with the Eucharistic Sacrifice.

3. To promote the observance of the Catholic and primitive practice of receiving the Holy Communion fasting.

And that the sole rules that bind the Associates, are as follows, viz.:

RULES.

1. To communicate or at least to be present on Sundays and the greater festivals and other holy days, when the Holy Eucharist is celebrated, unless prevented by sickness or other urgent cause.

2. To promote, by all legitimate means, frequent and reverent celebrations of the Holy Eucharist, as the chief act of divine service.

3. To make such special intercessions as shall be from time to time directed.

5. That this council recognizes the truth of the words of the Superior-General in his Annual Address, namely, "Whatever means we may lawfully use as separate individuals, to promote the catholic truth as set forth by our Church, we should bear in mind that as a Confraternity, our great means to that end is combined prayer." And, as all wrangling in connection with its solemn objects is distasteful to the Confraternity, the Council therefore places this statement on record in no spirit of discussion, but solely for the information of our brethren. By order of the Council:

F. C. EWER, Superior-General Am. Br. C. B. S.

T. McKee Brown, Secretary.

The first step in organizing *Protestant Episcopal Churches in Europe* was taken by the Rev. William O. Lamson, in Paris, in 1858. With the consent of some individual bishops in the Protestant Episcopal Church, but without official support or sanction, he commenced services for the benefit of the American Episcopalians who might be sojourning in that city. The General Convention of 1859 enacted a canon making lawful the opening and organization of Episcopal Churches on the Continent of Europe. In the fall of the same year, Mr. Lamson organized a church in Rome, and the next year one in Florence. The services in Rome were, however, interrupted, in consequence of the breaking out of our civil war for a year, and those in Florence till 1867, when they were resumed. A fourth Episcopal church was organized in Dresden in 1868. The General Convention of 1871 took these churches under its care, and deputed the bishop of Pennsylvania to visit them as the representative of the presiding bishop. In 1873, churches were established in Geneva and Nice, making six churches in all. A handsome church-edifice has been built at Paris, and one is under course of construction at Rome.

The Dean of Canterbury, of the Church of England, was a delegate to the World's Conference of the Evangelical Alliance, which met in New York in October, 1873, and bore to the body a letter of sympathy from the Archbishop of Canterbury. On one of the Sundays which occurred during the meeting of the Conference, he participated in the celebration of a communion service in the Madison Square Presbyterian Church, New York, Rev. William Adams, D. D., pastor, in conjunction with ministers of the Presbyterian, Methodist, Baptist, and other non-Episcopal churches. Bishop Doxer, late missionary bishop to Zanzibar, who was in New York at the time, took notice of this act, and addressed a letter to Bishop Potter, of the Diocese of New York, in which he expressed his concern that the dean had so far forgotten what was due to the bishop of

the diocese, "and to himself as a dignitary of the English Church, as to officiate with ministers of various denominations in a communion service which differed materially from that of the English and American Prayer Books." He also addressed similar notes to the Dean and to the Archbishop of Canterbury. Assistant-Bishop Cummins, of Kentucky, replied to the letter of Bishop Tozer, by avowing that he also had participated in a communion service with non-Episcopal ministers, on the Sunday following the communion in which the Dean of Canterbury had participated, at the Presbyterian church on Fifth avenue, of which the Rev. Dr. John Hall was pastor. Bishop Cummins justified both his own act and the dean's, with the assertions that there was no law of the Church prohibiting such communion services, and that the authorities of the Church of England had repeatedly recognized Presbyterian orders as valid, and had admitted Presbyterian ministers to Episcopal pulpits without reordination. He cited instances from the history of the Church in illustration of his points. The positions assumed by Bishop Cummins were controverted by several Episcopal ministers in letters published in the newspapers. A voluminous correspondence took place, in which the points at issue were discussed in their various bearings. On the 3d of November, Bishop Potter published a letter in which he commended and sustained Bishop Tozer for the course he had taken in censuring the Dean of Canterbury, and explained the objections to such mixed communions as those in which the dean and Bishop Cummins had participated. On the 10th of November Bishop Cummins addressed Bishop Smith, of Kentucky, a letter resigning the office of Assistant-Bishop of Kentucky and declaring his intention to transfer his work and office to another sphere of labor. [This letter will be found in full in the article REFORMED EPISCOPAL CHURCH.] In accordance with the rules of the Church, Bishop Cummins was held for trial. Charges were formally presented against him for abandoning the Church, and a Board of Inquiry was appointed to investigate them. The board is required to meet in Kentucky, at a time and place to be designated by the presiding bishop. Bishop Cummins is entitled to six months' notice of the charges preferred against him. At the end of this period he may be deposed. He may, however, retract his abandonment of the Church, in which case further proceedings may be suspended.

PRUSSIA, a kingdom of Europe, forming part of the German Empire. King, William I., German Emperor and King of Prussia (*see* GERMANY). The table on the following page exhibits the area of the provinces and districts into which the kingdom is divided, according to the latest official accounts, as well as their population and their religious statistics:

Among the Christian sects, there were

1,565 Greek Catholics, 20,011 dissenters, 14,052 Mennonites, 9,375 Baptists, 2,531 Free Religionists, 1,870 German Catholics, 884 Christian Catholics, 874 Anglicans, 1,357 Apostolic Catholics, 987 Free Congregationalists, 600 Methodists, 68 Presbyterians, 254 Irvingites, and 592 others. Besides these, there were also 17 Mohammedans, 18 Gypsies, 32 Buddhists, 1 Fire-worshipper, 1 Chinese, 14 pagans, 6 Mormons, 1 Rationalist, and of 4,410 inhabitants the religion was unknown.

The non-German population of Prussia comprises:

NATIONALITIES.	In the Provinces of	Number.	Percentage
Lithuanians	Prussia.....	146,800	0.6
Poles.....	Silesia, Posen, Prussia, and Pomerania.	2,423,000	10.1
Czechs.....	Silesia.....	50,000	0.2
Wends.....	Brandenburg and Silesia.	53,000	0.4
Walloons.....	Rhine Provinces.....	10,400	...
Danes.....	Schleswick-Holstein...	145,000	0.6
Others.....		30,000	0.1

Of these, only the Poles and the Danes constitute a compact majority in some of the electoral districts, and are represented in the Diet by deputies who desire an ultimate separation of their nationalities from Prussia and from Germany. The Poles constitute, in the district of Oppeln, 60.1 per cent. of the population; in Posen, 59.3; in Bromberg, 46.9; in Marienwerder, 37.8; in Dantzic, 27.8; in Gumbinnen, 21.9; in Königsberg, 17.1; in Breslau, 4.8; and in Köslin, 0.7.

According to the budget for the year 1878, the revenue and expenditures were as follows:

REVENUE.		Thalers.
Ministry of Finances.....		117,007,651
Ministry of Commerce.....		76,835,628
Ministry of State.....		41,750
Ministry of Justice.....		14,005,000
Ministry of the Interior.....		931,679
Ministry of Agriculture.....		1,055,490
Ministry of Education and Ecclesiastical Affairs.....		166,284
Total		210,043,467
EXPENDITURE.		Thalers.
Costs of administration.....		72,951,463
Charges on consolidated fund.....		35,506,150
Administrative expenditures:		
1. Ministry of State.....		597,211
2. Ministry of Foreign Affairs.....		125,600
3. Ministry of Finances.....		33,273,443
4. Ministry of Commerce.....		20,594,488
5. Ministry of Justice.....		20,156,430
6. Ministry of the Interior.....		10,390,546
7. Ministry of Agriculture.....		8,656,490
8. Ministry of Education and Ecclesiastical Affairs.....		12,841,646
Total.....		210,043,467

The public debt, according to the budget of 1878, was as follows:

a. INTEREST-BEARING DEBT:	Thalers.
1. Of the old provinces.....	341,271,861
2. Of the new provinces.....	59,623,914
3. Floating debt.....	10,000,000
b. RENTER.....	7,470,000
c. DEBT BEARING NO INTEREST.....	20,930,403
Total.....	429,396,178

The Prussian Diet, which had been opened on October 22, 1872, reassembled after a brief adjournment on January 7th. By far the most important subject which came before it was the draft of four new laws regulating the relation of the state government to the state churches, and in particular to the Roman Catholic Church. They were presented by the Minister of Public Worship, Dr. Falk, on January 9th, and the discussion on them began on January 15th. They provide that all clergymen of the state churches shall have passed through a regular course of instruction at the German gymnasia and universities and abolish the so-called *seminaria puerorum*, in which boys from an early age are receiving a kind of monastic education for the priesthood. They aim at protecting the lower clergy from arbitrary measures on the part of the higher, and define the function of the new "Royal Court for Ecclesiastical Affairs," which is in future to act as a court of appeal from the decision of ecclesiastical superiors. They also abolish the legal provisions which heretofore rendered the secession from one of the state churches most difficult. The Catholic bishops of Prussia and the members of the Catholic party in the Diet declared that an attempt to enforce these laws would bring on a contest between church and state. The Evangelical Oberkirchenrath (Supreme Ecclesiastical Council) also declared its dissatisfaction with the laws, which it believed would injure the Evangelical Church no less than the Catholic. In the Herrenhaus, a number of the most prominent conservative Protestant statesmen, as the former Oberpräsident Kleist-Ketzow, and the former prime-minister, Manteuffel, violently opposed the Government; but Bismarck and the ministry remained unmoved. As some of the provisions of the new laws were at variance with the Prussian Constitution, two articles of the latter (article 15 and article 18) had first to be changed. The Chamber of Deputies adopted the change of these articles as proposed by the Government, by a vote of 245 against 110, and on March 17th, by a similar majority the draft of the four laws. The bulk of the minority consisted of the members of the Catholic party who were joined in their opposition by a few ultra-conservative Protestants, the Poles, and the socialists. The Herrenhaus, whose stubborn opposition has been broken since the Government clearly indicated in 1872 that it would not be hindered in its reformatory policy by a factious opposition of the aristocracy, and that it would know how to overcome it by constitutional means, adopted on March 18th, the proposed change of the Constitution by a vote of 93 against 68, and subsequently the entire law.

The most important events in this session of the Diet, next to the discussion and the vote on the Church law, were the explanations given by Bismarck on the ministerial crisis, and the great speech of Deputy Lasker on the

corruption in the administration of railroads. Bismarck declared that the chief reason for his resignation as prime-minister was the fact that he was overburdened with work; he admitted, however, that the opposition of some of his colleagues to his policy had likewise had an influence upon him, and he freely explained his views of the position of a prime-minister in his relations to the remainder of the ministry and the majority of the Diet. The speech of Deputy Lasker, which was made on February 7th, accused several high officers of the state, especially Counselor Wagner, for many years one of the leaders of the ultra-Conservative party, of being guilty of corrupt practices in obtaining the charters of new railroads. Prior to the speech of Lasker a letter from the President of the Ministry to the President of the Chamber of Deputies had attempted a defense of Wagner against the charges brought against him; but the facts adduced by Lasker were so overwhelming that the Government deemed it best to take the initiative in the matter, and to appoint a committee of investigation, two of the members of which were elected by the Chamber.

The exhibit of the Prussian finances, which was laid before Chamber of Deputies by the Minister of Finance on February 20th, was received by the entire Chamber with great satisfaction. The year 1872 shows a surplus of 20,000,000 thalers, 14,000,000 of which would be used for reducing the public debt.

During the discussion of the budget of the Ministry of Public Worship, several deputies of the Liberal party opposed the appropriation of any money for the support of the Supreme Ecclesiastical Council, which they denounce as a hierarchical institution, the abolition of which they demanded; the majority of the Chamber, however, supported the Government. An appropriation of \$25,000 for carrying through the synodal constitution of the Evangelical State Church was readily granted by the Liberals, who have long demanded the introduction of self-government for the Evangelical Church; only the Radical party, which fears an entire separation between church and state, voted against it.

The Catholic bishops of Prussia held a general meeting at Fulda, in order to define in a joint pastoral letter their position with regard to the new Church laws. The laws were represented by them as being at variance, in essential points, with the directly-ordained Constitution and the freedom of the Church, and, as threatening the Church with a greater danger than any to which it had been exposed since the days of Constantine.

The investigations which had taken place in consequence of the speech and motion of Dr. Lasker caused the resignation of the Minister of Commerce, Count Itzenplitz, as they left no doubt as to his incompetency for the position. His place in the ministry was filled by the appointment of Dr. Achenbach, a

prominent member of the free Conservative party, who soon gained the entire confidence of the Chamber.

In October a new general election of the members of the Prussian Diet took place. The Old Conservative party, being deprived of the support of the Government, was almost annihilated, electing no more than 20 of its candidates. The "New Conservative" party which supports the policy of the Government so far as the consolidation of the German Empire is concerned, numbered 12 members; and the "Free Conservatives" who generally support the ministry, and in many points agree with the National Liberals, 39 members. The most numerous among all the parties of the Chamber is the National Liberal, which had 128 members, while 48 were classified as "Liberals," and 57 as members of the more radical "Party of Progress." The Catholic party, or as it is called from the seats which it occupies in the Diet and in the German Reichstag, the "Centre," had largely gained in the Catholic districts, the overwhelming majority of which thus showed their entire agreement with the views of the bishops on the conflict between church and state; they numbered in the new Diet 85 members, and were, moreover, supported by 17 Polish deputies; 9 Danes were sent by Northern Schleswick, and 3 "Particularists" or adherents of the dethroned family of Hanover, which, however, by the election of 82 National Liberals, showed that the immense majority of the population was entirely satisfied with the annexation of the country to Prussia. The Minister of Public Worship, Dr. Falk, had been elected by six different constituencies. Shortly before the meeting of the Diet, Count Roon, the President of the Ministry and Minister of War, had resigned his position, and while as Minister of War he was succeeded by General von Kameke, the presidency of the ministry was again assumed by Bismarck, an indication that the aged King would not shrink from the desperate conflict between the state and the Catholic Church, and was determined to carry out the programme laid down by Bismarck, which had the support of the entire National Liberal and Free Conservative parties, and the large majority of the Party of Progress, while the Centre, the Poles, and the Old Conservatives were united in opposing it. The Diet was opened on November 12th by the Vice-President of the Ministry, Camphausen. The Emperor was prevented by indisposition from opening the Diet in person. With regard to the great question of the day, the Church conflict, the speech from the throne expressed the regret of the King that the new laws which were to regulate the relations of the state Government to the state churches had encountered the unjustified opposition of the Roman Catholic bishops. It also announced that the Government, unmindful of this resistance, would fully carry through those laws,

and would promptly take all the other necessary steps in order to prevent the interests confided to its care from suffering any injury. The Herrenhaus, at its first meeting, elected Count Otto Holberg president, and Von Bernuth and Hasselbach vice-presidents. In the House of Deputies, Herr von Bennigsen, one of the leaders of the National Liberal party, was elected president; Dr. Löwe, of the Party of Progress, and Dr. Friedenthal, of the Free Conservative party, vice-presidents. This combination showed that there was a perfect understanding between these three parties on the Church question.

Even before the Government had brought in the most important bill of the session, which provided for the introduction of civil marriage, the leader of the Catholic Centre, Windthorst, moved to change the electoral law of Prussia, which divides the votes according to the amount of taxes they pay into three classes, and gives to the wealthy and educated classes a considerable advantage over those less wealthy and intelligent, and to introduce in its place universal and equal suffrage. The surprise at this skillful move of the Centre among the Liberals was as great as the movement itself was inconvenient. Windthorst pointed to the fact, that the Liberals at all times had loudly clamored for the introduction of a universal and equal suffrage, and that Bismarck in his speech of March 28, 1867, had called the present electoral law "an absurd, miserable law, than which no worse could be found." Anxious as the Liberals were to secure the introduction of universal and equal suffrage, they were at the present time unwilling to wrest the boon from the hands of the Catholics. Only one portion of the Party of Progress, under the leadership of Prof. Virchow, of the University of Berlin, was willing; to refer the motion of Windthorst to a special committee of 14, which was at the same time to draft the required new electoral law; the majority of the House adopted a motion of Deputy Yung, to adjourn the discussion for six months.

With another liberal motion, the Catholic party was more successful. The stamp-tax, which thus far has been levied from almanacs, newspapers, and periodicals, was so unpopular among all political parties, that when Deputy Bernard, of the Catholic Centre, got the start of the other parties in the introduction of a bill, providing for the abolition of the hated tax, his motion was, notwithstanding the reluctance to support any measure proposed by the Catholic party, adopted on December 10th, by an almost unanimous vote.

On the same day, another leader of the Catholic party, Peter Reichensperger, a member of the Supreme Court of Berlin, moved that the House of Deputies declare that the ecclesiastical peace which had been destroyed since 1871 could not be attained by the passage of measures like the recent Church laws, but

only by a return to the principles which had long been practically tested. The mover pointed to the unflinching resistance which the Archbishop of Posen, Ledochowski, and the Bishop of Breslau, Dr. Forster, had made to the Government, ignoring altogether the heavy and repeated fines which had been imposed upon them, and that it had been found necessary to summon Ledochowski before the Royal Court for Church Affairs. The motion of Reichensperger was rejected by a vote of 288 against 95.

PRUSSIA, ELIZABETH, Queen-Dowager of, widow of the late King Friedrich Wilhelm IV., born at Munich, November 18, 1801; died in Berlin, December 15, 1873. She was a younger daughter of Maximilian I., King of Bavaria, and was married to Friedrich Wilhelm, then heir-apparent to the Prussian throne, November 29, 1823. She ascended the throne with her husband in 1840 as queen-consort, but, unlike her elder sister in Austria, did not attempt to rule, or to interfere in political matters. After the death of Friedrich Wilhelm IV., in 1861, she led a very retired life, not mingling in the affairs of the court. Her brother-in-law, the present Emperor of Germany, esteemed her very highly.

PUBLIC DOCUMENTS. *Message of President GRANT at the commencement of the first session of the Forty-third Congress, December 2, 1873.*

To the Senate and House of Representatives:

The year that has passed since the submission of my last message to Congress has—especially during the latter part of it—been an eventful one to the country. In the midst of great national prosperity a financial crisis has occurred that has brought low fortunes of gigantic proportions; political partisanship has almost ceased to exist, especially in the agricultural regions; and, finally, the capture upon the high-seas of a vessel bearing our flag has for a time threatened the most serious consequences, and has agitated the public mind from one end of the country to the other. But this, happily, now is in the course of satisfactory adjustment, honorable to both nations concerned.

The relations of the United States, however, with most of the other powers continue to be friendly and cordial. With France, Germany, Russia, Italy, and the minor European powers; with Brazil and most of the South American republics, and with Japan, nothing has occurred during the year to demand special notice. The correspondence between the Department of State and various diplomatic representatives in or from those countries is transmitted herewith.

In executing the will of Congress, as expressed in its joint resolution of the 14th of February last, and in accordance with the provisions of the resolution, a number of "practical artisans," of "scientific men," and of "honorary commissioners," were authorized to attend the exposition at Vienna as commissioners on the part of the United States. It is believed that we have obtained the object which Congress had in view when it passed the joint resolution, "in order to enable the people of the United States to participate in the advantages of the international exhibition of the products of agriculture, manufactures, and the fine arts, to be held at Vienna. I take pleasure in adding that the American exhibitors have received a gratifying number of diplomas and of medals.

During the exposition a conference was held at Vienna for the purpose of consultation on the systems prevailing in different countries for the protection of inventions. I authorized a representative from the Patent-Office to be present at Vienna at the time when this conference was to take place, in order to aid, as far as he might, in securing any possible additional protection to American inventors in Europe. The report of this agent will be laid before Congress.

It is my pleasant duty to announce to Congress that the Emperor of China, on attaining his majority, received the diplomatic representatives of the Western powers in person. An account of these ceremonies, and of the interesting discussions which preceded them, will be found in the documents transmitted herewith. The accompanying papers show that some advance, although slight, has been made during the past year toward the suppression of the infamous Chinese cooly-trade. I recommend Congress to inquire whether additional legislation be not needed on this subject.

The money awarded to the United States by the tribunal of arbitration at Geneva was paid by her Majesty's Government a few days in advance of the time when it would have become payable according to the terms of the treaty. In compliance with the provisions of the act of March 3, 1873, it was at once paid into the Treasury, and used to redeem, so far as it might, the public debt of the United States; and the amount so redeemed was invested in a five per cent. registered bond of the United States for \$15,500,000, which is now held by the Secretary of State, subject to the future disposition of Congress.

I renew my recommendation, made at the opening of the last session of Congress, that a commission be created for the purpose of auditing and determining the amounts of the several "direct losses growing out of the destruction of vessels and their cargoes" by the Alabama, the Florida, or the Shenandoah, after leaving Melbourne, for which the sufferers have received no equivalent or compensation, and of ascertaining the names of the persons entitled to receive compensation for the same, making the computations upon the basis indicated by the tribunal of arbitration at Geneva; and that payment of such losses be authorized to an extent not to exceed the awards of the tribunal at Geneva.

By an act approved on the 14th day of February last, Congress made provision for completing, jointly with an officer or commissioner to be named by her Britannic Majesty, the determination of so much of the boundary-line between the territory of the United States and the possessions of Great Britain as was left uncompleted by the commissioners appointed under the act of Congress of August 11, 1856. Under the provisions of this act the north-west water-boundary of the United States has been determined and marked in accordance with the award of the Emperor of Germany. A protocol and a copy of the map upon which the line was thus marked are contained in the papers submitted herewith.

I also transmit a copy of the report of the commissioner for marking the northern boundary between the United States and the British possessions west of the Lake of the Woods, of the operations of the commission during the past season. Surveys have been made to a point 497 miles west of the Lake of the Woods, leaving about 350 miles to be surveyed, the field-work of which can be completed during the next season.

The mixed commission organized under the provisions of the Treaty of Washington for settling and determining the claims of citizens of either power against the other arising out of the acts committed against their persons or property during the period between April 13, 1861, and April 9, 1865, made its final award on the 25th day of September last. It was awarded that the Government of the United States should pay to the Government of her Britannic Ma-

justice, within twelve months from the date of the award, the sum of \$1,929,819 in gold. The commission disallowed or dismissed all other claims of British subjects against the United States. The amount of the claims presented by the British Government, but disallowed or dismissed, is understood to be about \$93,000,000. It also disallowed all claims of citizens of the United States against Great Britain which were referred to it.

I recommend the early passage of an act appropriating the amount necessary to pay this award against the United States.

I have caused to be communicated to the Government of the King of Italy the thanks of this Government for the eminent services rendered by Count Corti as the third commissioner on this commission. With dignity, learning, and impartiality, he discharged duties requiring great labor and constant patience, to the satisfaction, I believe, of both governments. I recommend legislation to create a special court, to consist of three judges, who shall be empowered to hear and determine all claims of aliens upon the United States arising out of acts committed against their persons or property during the insurrection. The recent reference under the Treaty of Washington was confined to claims of British subjects arising during the period named in the Treaty; but it is understood that there are other British claims of a similar nature, arising after the 9th of April, 1865, and it is known that other claims of a like nature are advanced by citizens, or subjects, of other powers. It is desirable to have these claims also examined and disposed of.

Official information being received from the Dutch Government of a state of war between the King of the Netherlands and the Sultan of Aceh, the officers of the United States who were near the seat of the war were instructed to observe an impartial neutrality. It is believed that they have done so.

The joint commission under the convention with Mexico of 1868 having again been legally prolonged, has resumed its business, which, it is hoped, may be brought to an early conclusion. The distinguished representative of her Britannic Majesty at Washington has kindly consented, with the approval of his Government, to assume the arduous and responsible duties of umpire in this commission, and to lend the weight of his character and name to such decisions as may not receive the acquiescence of both the arbitrators appointed by the respective governments.

The commissioners appointed pursuant to the authority of Congress to examine into the nature and extent of the forays by trespassers from that country upon the herds of Texas, have made a report, which will be submitted for your consideration.

The Venezuelan Government has been apprised of the sense of Congress in regard to the awards of the joint commission under the convention of the 25th of April, 1866, as expressed in the act of the 25th of February last.

It is apprehended that that Government does not realize the character of its obligations under that convention. As there is reason to believe, however, that its hesitancy in recognizing them springs in part at least from real difficulty in discharging them in connection with its obligations to other governments, the expediency of further forbearance on our part is believed to be worthy of your consideration.

The Ottoman Government and that of Egypt have lately shown a disposition to relieve foreign consuls of the judicial powers which heretofore they have exercised in the Turkish dominions, by organizing other tribunals. As Congress, however, has by law provided for the discharge of judicial functions by consuls of the United States in that quarter under the treaty of 1830, I have not felt at liberty formally to accept the proposed change without the assent of Congress, whose decision upon the subject, at an early a period as may be convenient, is earnestly requested.

I transmit herewith for the consideration and determination of Congress an application of the republic of Santo Domingo to this Government to exercise a protectorate over that republic.

Since the adjournment of Congress the following treaties with foreign powers have been proclaimed: A naturalization convention with Denmark; a convention with Mexico for renewing the claim commission; a convention of friendship, commerce, and extradition, with the Orange Free State; and a naturalization convention with Ecuador.

I renew the recommendation made in my message of December, 1870, that Congress authorize the Postmaster-General to issue all commissions to officials appointed through his department.

I invite the earnest attention of Congress to the existing laws of the United States respecting expatriation and the election of nationality by individuals. Many citizens of the United States reside permanently abroad with their families. Under the provisions of the act approved February 10, 1855, the children of such persons are to be deemed and taken to be citizens of the United States, but the rights of citizenship are not to descend to persons whose fathers never resided in the United States.

It thus happens that persons who have never resided within the United States have been enabled to put forward a pretension to the protection of the United States against the claim to military service of the government under whose protection they were born and have been reared. In some cases even naturalized citizens of the United States have returned to the land of their birth, with intent to remain there, and their children, the issue of a marriage contracted there after their return, and who have never been in the United States, have laid claim to our protection, when the lapse of many years had been imposed upon them the duty of military service to the only government which had ever known them personally.

Until the year 1868 it was left embarrassed by conflicting opinions of courts and of jurists to determine how far the doctrine of perpetual allegiance, derived from our former colonial relations with Great Britain, was applicable to American citizens. Congress then wisely swept these doubts away by enacting that "any declaration, instruction, opinion, order, or decision of any officer of this Government which denies, restricts, impairs, or questions the right of expatriation, is inconsistent with the fundamental principles of this Government." But Congress did not indicate in that statute, nor has it since done so, what acts are deemed to work expatriation. For my own guidance in determining such questions, I required (under the provisions of the Constitution) the opinion in writing of the principal officer in each of the Executive Departments upon certain questions relating to this subject. The result satisfies me that further legislation has become necessary. I therefore commend the subject to the careful consideration of Congress, and I transmit herewith copies of the several opinions of the principal officers of the Executive Department, together with other correspondence and pertinent information on the same subject.

The United States, who led the way in the overthrow of the feudal doctrine of perpetual allegiance, are among the last to indicate how their own citizens may elect another nationality. The papers submitted herewith indicate what is necessary to place us on a par with other leading nations in liberality of legislation on this international question. We have already in our treaties assented to the principles which would need to be embodied in laws intended to accomplish such results. We have agreed that citizens of the United States may cease to be citizens, and may voluntarily render allegiance to other powers. We have agreed that residence in a foreign land, without intent to return, shall of itself work expatriation. We have agreed, in some instances, upon the length of time necessary for such contin-

ned residence to work a presumption of such intent. I invite Congress now to mark out and define when and how expatriation can be accomplished; to regulate by law the condition of American women marrying foreigners; to fix the status of children born in a foreign country of American parents residing more or less permanently abroad; and to make rules for determining such other kindred points as may seem best to Congress.

In compliance with the request of Congress, I transmitted to the American minister at Madrid, with instructions to present it to the Spanish Government, the joint resolution, approved on the 3d of March last, tendering to the people of Spain, in the name and on the behalf of the American people, the congratulations of Congress upon the efforts to consolidate in Spain the principles of universal liberty in a republican form of government.

The existence of this new republic was inaugurated by striking the fetters from the slaves in Porto Rico. This beneficent measure was followed by the release of several thousand persons illegally held as slaves in Cuba. Next, the captain-general of that colony was deprived of the power to set aside the orders of his superiors at Madrid, which had pertained to the office since 1825. The sequestered estates of American citizens, which had been the cause of long and fruitless correspondence, were ordered to be restored to their owners. All these liberal steps were taken in the face of a violent opposition directed by the reactionary slaveholders of Havana, who are vainly striving to stay the march of ideas which has terminated slavery in Christendom, Cuba only excepted. Unhappily, however, this baneful influence has thus far succeeded in defeating the efforts of all liberal-minded men in Spain to abolish slavery in Cuba, and in preventing the promised reform in that island. The struggle for political supremacy continues there.

The pro-slavery and aristocratic party in Cuba is gradually arraiging itself in more and more open hostility and defiance of the home government, while it still maintains a political connection with the republic in the peninsula; and although usurping and defying the authority of the home government, whenever such usurpation or defiance tends in the direction of oppression or of the maintenance of abuses, it is still a power in Madrid, and is recognized by the government. Thus an element more dangerous to continued colonial relations between Cuba and Spain than that which inspired the insurrection at Yara—an element opposed to granting any relief from misrule and abuse, with no aspirations after freedom, commanding no sympathies in generous breasts, aiming to rivet still stronger the shackles of slavery and oppression—has seized many of the emblems of power in Cuba, and, under professions of loyalty to the mother-country, is exhausting the resources of the island, and is doing acts which are at variance with those principles of justice, of liberality, and of right, which give nobility of character to a republic. In the interests of humanity, of civilization, and of progress, it is to be hoped that this evil influence may be soon averted.

The steamer *Virginius* was on the 26th day of September, 1870, duly registered at the port of New York as a part of the commercial marine of the United States. On the 4th of October, 1870, having received the certificate of her register in the usual legal form, she sailed from the port of New York, and has not since been within the territorial jurisdiction of the United States. On the 31st day of October last, while sailing under the flag of the United States, on the high-seas, she was forcibly seized by the Spanish gunboat *Tornado*, and was carried into the port of Santiago de Cuba, where fifty-three of her passengers and crew were inhumanly, and, so far at least as relates to those who were citizens of the United States, without due process of law, put to death.

It is a well-established principle, asserted by the United States from the beginning of their national

independence, recognized by Great Britain and other maritime powers, and stated by the Senate in a resolution passed unanimously on the 16th of June, 1858, that "American vessels on the high-seas in time of peace, bearing the American flag, remain under the jurisdiction of the country to which they belong; and therefore any visitation, molestation, or detention of such vessel by force, or by the exhibition of force, on the part of a foreign power, is in derogation of the sovereignty of the United States."

In accordance with this principle the restoration of the *Virginius*, and the surrender of the survivors of her passengers and crew, and a due reparation to the flag, and the punishment of the authorities who had been guilty of the illegal acts of violence, were demanded. The Spanish Government has recognized the justice of the demand, and has arranged for the immediate delivery of the vessel, and for the surrender of the survivors of the passengers and crew, and for a salute to the flag, and for proceedings looking to the punishment of those who may be proved to have been guilty of illegal acts of violence toward citizens of the United States, and also toward indemnifying those who may be shown to be entitled to indemnity. A copy of a protocol of a conference between the Secretary of State and the Spanish minister, in which the terms of this arrangement were agreed to, is transmitted herewith.

The correspondence on this subject with the legation of the United States in Madrid was conducted in cipher and by cable, and needs the verification of the actual text of the correspondence. It has seemed to me to be due to the importance of the case not to submit this correspondence until the accurate text can be received by mail. It is expected shortly, and will be submitted when received.

In taking leave of this subject for the present, I wish to renew the expression of my conviction, that the existence of African slavery in Cuba is a principal cause of the lamentable condition of the island. I do not doubt that Congress shares with me the hope that it will soon be made to disappear, and that peace and prosperity will follow its abolition.

The embargoing of American estates in Cuba; cruelty to American citizens detected in no act of hostility to the Spanish Government; the murdering of prisoners taken with arms in their hands; and, finally, the capture upon the high-seas of a vessel sailing under the United States flag and bearing a United States registry, have culminated in an outburst of indignation that has seemed for a time to threaten war. Pending negotiations between the United States and the Government of Spain on the subject of this capture, I have authorized the Secretary of the Navy to put our navy on a war footing, to the extent, at least, of the entire annual appropriation for that branch of the service; trusting to Congress and the public opinion of the American people to justify my action.

CONSTITUTIONAL AMENDMENTS.

Assuming from the action of the last Congress, in appointing a "Committee on Privileges and Elections," to prepare and report to this Congress a constitutional amendment to provide a better method of electing the President and Vice-President of the United States, and also from the necessity of such an amendment, that there will be submitted to the State Legislatures, for ratification, such an improvement in our Constitution, I suggest two others for your consideration:

First. To authorize the Executive to approve of so much of any measure passing the two Houses of Congress, as his judgment may dictate, without approving the whole, the disapproved portion or portions, to be subjected to the same rules as now, to wit, to be referred back to the house in which the measure or measures, originated, and if passed by a two-thirds vote of the two Houses, then to become a law without the approval of the President. I would add to this a provision that there should be no legis-

lation by Congress during the last twenty-four hours of its sitting, except upon vetoes, in order to give the Executive an opportunity to examine and approve or disapprove bills understandingly.

Second. To provide, by amendment, that when an extra session of Congress is convened by Executive proclamation, legislation during the continuance of such extra session shall be confined to such subjects as the Executive may bring before it, from time to time, in writing.

The advantages to be gained by these two amendments are too obvious for me to comment upon them. One session in each year is provided for by the Constitution, in which there are no restrictions as to the subjects of legislation by Congress. If more are required, it is always in the power of Congress, during their term of office, to provide for sessions at any time. The first of these amendments would protect the public against the many abuses, and waste of public moneys, which creep into appropriation bills, and other important measures passing during the expiring hours of Congress, to which, otherwise, due consideration cannot be given.

TREASURY DEPARTMENT.

The receipts of the Government from all sources, for the last fiscal year, were \$333,738,304, and expenditures on all accounts \$290,345,245, thus showing an excess of receipts over expenditures of \$43,392,959. But it is not probable that this favorable exhibit will be shown for the present fiscal year. Indeed, it is very doubtful whether, except with great economy on the part of Congress in making appropriations, and the same economy in administering the various departments of Government, the revenues will not fall short of meeting actual expenses, including interest on the public debt.

I commend to Congress such economy, and point out two sources where, it seems to me, it might commence, to wit, in the appropriations for public buildings in the many cities, where work has not yet been commenced; in the appropriations for river and harbor improvement in those localities where the improvements are of but little benefit to general commerce, and for fortifications.

There is a still more fruitful source of expenditure, which I will point out later in this message. I refer to the easy method of manufacturing claims for losses incurred by suppressing the late rebellion.

I would not be understood here as opposing the erection of good, substantial, and even ornamental buildings, by the Government whenever such buildings are needed. In fact, I approve of the Government owning its own buildings, in all sections of the country, and hope the day is not far distant when it will not only possess them, but will erect in the capital suitable residences for all persons who now receive commutation for quarters or rent at Government expense, and for the cabinet, thus setting an example to the States which may induce them to erect buildings for their Senators. But I would have this work conducted at a time when the revenues of the country would abundantly justify it.

The revenues have materially fallen off for the first five months of the present fiscal year from what they were expected to produce, owing to the general panic now prevailing, which commenced about the middle of September last. The full effect of this disaster, if it should not prove a "blessing in disguise," is yet to be demonstrated. In either event it is your duty to heed the lesson, and to provide by wise and well-considered legislation, as far as lies in your power, against its recurrence, and to take advantage of all benefits that may have accrued.

My own judgment is that, however much individuals may have suffered, one long step has been taken toward specie payments; that we can never have permanent prosperity until a specie basis is reached; and that a specie basis cannot be reached and maintained until our exports, exclusive of gold, pay for our imports, interest due abroad, and other

specie obligations, or so nearly so as to leave an appreciable accumulation of the precious metals in the country from the products of our mines.

The development of the mines of precious metals during the past year and the prospective development of them for years to come, are gratifying in their results. Could but one-half of the gold extracted from the mines be retained at home, our advance toward specie payments would be rapid.

To increase our exports, sufficient currency is required to keep all the industries of the country employed. Without this, national as well individual bankruptcy must ensue. Undue inflation, on the other hand, while it might give temporary relief, would only lead to inflation of prices, the impossibility of competing in our own markets for the products of home skill and labor, and repeated renewals of present experiences. Elasticity to our circulating medium, therefore, and just enough of it to transact the legitimate business of the country, and to keep all industries employed, is what is most to be desired. The exact medium is specie, the recognized medium of exchange the world over. That obtained, we shall have a currency of an exact degree of elasticity. If there be too much of it for the legitimate purposes of trade and commerce, it will flow out of the country. If too little, the reverse will result. To hold what we have and to appreciate our currency to that standard, is the problem deserving of the most serious consideration of Congress.

The experience of the present panic has proved that the currency of the country, based as it is upon the credit of the country, is the best that has ever been devised. Usually in times of such trials, currency has become worthless, or so much depreciated in value as to inflate the values of all the necessities of life as compared with the currency. Every one holding it has been anxious to dispose of it on any terms. Now we witness the reverse. Holders of currency hoard it as they did gold in former experiences of a like nature.

It is patent to the most casual observer that much more currency, or money, is required to transact the legitimate trade of the country during the fall and winter months, when the vast crops are being removed, than during the balance of the year. With our present system the amount in the country remains the same throughout the entire year, resulting in an accumulation of all the surplus capital of the country in a few centres when not employed in the moving of crops, tempted there by the offer of interest on call loans. Interest being paid, this surplus capital must earn this interest paid with a profit. Being subject to "call," it cannot be loaned, only in part at best, to the merchant or manufacturer for a fixed term. Hence, no matter how much currency there might be in the country, it would be absorbed, prices keeping pace with the volume, and panics, stringency, and disasters, would ever be recurring with the autumn. Elasticity in our monetary system, therefore, is the object to be attained first, and next to that, as far as possible, a prevention of the use of other people's money in stock and other species of speculation. To prevent the latter it seems to me that one great step would be taken by prohibiting the national banks from paying interest on deposits, by requiring them to hold their reserves in their own vaults, and by forcing them into resumption, though it would only be in legal-tender notes. For this purpose I would suggest the establishment of clearing-houses for your consideration.

To secure the former many plans have been suggested, most, if not all, of which look to me more like inflation on the one hand, or compelling the Government, on the other, to pay interest, without corresponding benefits, upon the surplus funds of the country during the seasons when otherwise unemployed.

I submit for your consideration whether this difficulty might not be overcome by authorizing the

Secretary of the Treasury to issue, at any time, to national banks of issue, any amount of their own notes below a fixed percentage of their issue, say forty per cent., upon the banks depositing with the Treasurer of the United States an amount of Government bonds equal to the amount of notes demanded, the banks to forfeit to the Government, say four per cent. of the interest accruing on the bonds so pledged during the time they remain with the Treasurer, as security for the increased circulation, the bonds so pledged to be redeemable by the banks at their pleasure, either in whole or in part, by returning their own bills for cancellation to an amount equal to the face of the bonds withdrawn. I would further suggest for your consideration the propriety of authorizing national banks to diminish their standing issue at pleasure by returning for cancellation their own bills and withdrawing so many United States bonds as are pledged for the bills returned.

In view of the great actual contraction that has taken place in the currency, and the comparative contraction continuously going on, due to the increase of population, increase of manufactures, and all the industries, I do not believe there is too much of it now for the duldest period of the year. Indeed, if clearing-houses should be established, thus forcing redemption, it is a question for your consideration whether banking should not be made free, retaining all the safeguards now required to secure bill-holders. In any modification of the present laws regulating national banks, as a further step toward preparing for resumption of specie payments I invite your attention to a consideration of the propriety of exacting from them the retention, as a part of their reserve, either the whole or a part of the gold interest accruing upon the bonds pledged as security for their issue. I have not reflected enough on the bearing this might have in producing a scarcity of coin with which to pay duties on imports to give it my positive recommendation. But your attention is invited to the subject.

During the last four years the currency has been contracted, directly, by the withdrawal of three per cent. certificates, compound-interest notes, and "seven-thirty" bonds outstanding on the 4th of March, 1869, all of which took the place of legal tenders in the bank reserves to the extent of \$63,000,000.

During the same period there has been a much larger comparative contraction of the currency. The population of the country has largely increased. More than twenty-five thousand miles of railroad have been built, requiring the active use of capital to operate them. Millions of acres of land have been opened to cultivation, requiring capital to move the products. Manufactories have multiplied beyond all precedent in the same period of time, requiring capital weekly for the payment of wages and for the purchase of material; and probably the largest of all comparative contraction arises from the organizing of free labor in the South. Now every laborer there receives his wages, and for want of savings-banks, the greater part of such wages is carried in the pocket or hoarded until required for use.

These suggestions are thrown out for your consideration, without any recommendation that they shall be adopted literally, but hoping that the best method may be arrived at to secure such an elasticity of the currency as will keep employed all the industries of the country, and prevent such an inflation as will put off indefinitely the resumption of specie payments, an object so devoutly to be wished for by all, and by none more earnestly than the class of people most directly interested—those who "earn their bread by the sweat of their brow." The decisions of Congress on this subject will have the hearty support of the Executive.

In previous messages I have called attention to the decline in American ship-building, and recommended such legislation as would secure to us our proportion of the carrying-trade. Stimulated by high rates and abundance of freight, the progress for the last

year in ship-building has been very satisfactory. There has been an increase of about three per cent. in the amount transported in American vessels over the amount of last year. With the reduced cost of material which has taken place, it may reasonably be hoped that this progress will be maintained, and even increased. However, as we pay about \$80,000,000 per annum to foreign vessels for the transportation to a market of our surplus products, thus increasing the balance of trade against us to this amount, the subject is one worthy of your serious consideration.

"Cheap transportation" is a subject that has attracted the attention of both producers and consumers for the past few years, and has contributed to, if it has not been the direct cause of, the recent panic and stringency.

As Congress, at its last session, appointed a special committee to investigate this whole subject during the vacation, and report at this session, I have nothing to recommend until their report is read.

There is one work, however, of a national character, in which the greater portion of the East and the West, the North and the South, are equally interested, to which I will invite your attention.

The State of New York has a canal connecting Lake Erie with tide-water on the Hudson River. The State of Illinois has a similar work connecting Lake Michigan with navigable water on the Illinois River, thus making water-communication inland, between the East and the West and South. These great artificial water-courses are the property of the States through which they pass, and pay toll to those States. Would it not be wise statesmanship to pledge these States that if they will open these canals for the passage of large vessels, the General Government will look after and keep in navigable condition the great public highways with which they connect, to wit, the over-land on the Hudson, the Saint Clair Flats, and the Illinois and Mississippi Rivers? This would be a national work; one of great value to the producers of the West and South, in giving them cheap transportation for their produce to the seaboard and a market; and to consumers in the East in giving them cheaper food, particularly of those articles of food which do not find a foreign market, and the prices of which, therefore, are not regulated by foreign demands. The advantages of such a work are too obvious for argument. I submit the subject to you, therefore, without further comment.

In attempting to regain our lost commerce and carrying-trade, I have heretofore called attention to the states south of us offering a field where much might be accomplished. To further this object I suggest that a small appropriation be made, accompanied with authority for the Secretary of the Navy to fit out a naval vessel to ascend the Amazon River to the mouth of the Madeira; thence to explore that river and its tributaries into Bolivia, and to report to Congress at its next session, or as soon as practicable, the accessibility of the country by water, its resources, and the population so reached. Such an exploration would cost but little; it can do no harm, and may result in establishing a trade of value to both nations.

In further connection with the Treasury Department I would recommend a revision and codification of the tariff laws, and the opening of more mints for coining money, with authority to coin for such nations as may apply.

WAR DEPARTMENT.

The attention of Congress is invited to the recommendations contained in the report of the Secretary of War herewith accompanying.

The apparent great cost of supporting the Army is fully explained by this report, and I hope will receive your attention.

While inviting your general attention to all the recommendations made by the Secretary of War,

there are two which I would especially invite you to consider: First, the importance for preparing for war in time of peace by providing proper armament for our sea-coast defenses. Proper armament is of vastly more importance than fortifications. The latter can be supplied very speedily for temporary purposes when needed; the former cannot. The second is the necessity of reopening promotion in the staff corps of the Army. Particularly is this necessity felt in the medical, pay, and Ordnance Departments.

At this time it is necessary to employ "contract surgeons" to supply the necessary medical attendance required by the army.

With the present force of the Pay Department it is now difficult to make the payments to troops provided for by law. Long delays in payments are productive of desertions and other demoralization, and the law prohibits the payment of troops by other than regular Army pay-masters.

There are now sixteen vacancies in the Ordnance Department, thus leaving that branch of the service without sufficient officers to conduct the business of the different arsenals on a large scale if ever required.

NAVY DEPARTMENT.

During the past year our Navy has been depleted by the sale of some vessels no longer fit for naval service, and by the condemnation of others not yet disposed of. This, however, has been more than compensated for by the repair of six of the old wooden ships, and by the building of eight new sloops-of-war, authorized by the last Congress. The building of these latter has occurred at a doubly fortunate time. They are about being completed at a time when they may possibly be much needed, and the work upon them has not only given direct employment to thousands of men, but has no doubt been the means of keeping open establishments for other work at a time of great financial distress.

Since the commencement of the last month, however, the distressing occurrences which have taken place in the waters of the Caribbean Sea, almost on our very seaboard, while they illustrate most forcibly the necessity always existing that a nation situated like ours should maintain in a state of possible efficiency a navy adequate to its responsibilities, has at the same time demanded that all the effective force we really have shall be put in immediate readiness for warlike service. This has been and is being done promptly and effectively, and I am assured that all the available ships and every authorized man of the American Navy will be ready for whatever action is required for the safety of our citizens or the maintenance of our honor. This, of course, will require the expenditure in a short time of some of the appropriations which were calculated to extend through the fiscal year, but Congress will, I doubt not, understand and appreciate the emergency, and will provide adequately, not only for the present preparation, but for the future maintenance of our naval force. The Secretary of the Navy has, during the past year, been quietly putting some of our most effective monitors in condition for service, and thus the exigency finds us in a much better condition for work than we could possibly have been without his action.

POST-OFFICE DEPARTMENT.

A complete exhibit is presented, in the accompanying report of the Postmaster-General, of the operations of the Post-Office Department during the year. The ordinary postal revenues for the fiscal year ended June 30, 1873, amounted to \$22,996,741.57, and the expenditures of all kinds to \$29,084,945.67. The increase of revenues over 1872 was \$1,081,815.20, and the increase of expenditures \$2,426,753.86.

Independent of the payments made from special appropriations for mail-steamship lines, the amount drawn from the general Treasury to meet deficiencies was \$5,265,475. The constant and rapid extension

of our postal service, particularly upon railways, and the improved facilities for the collection, transmission, distribution, and delivery of the mails, which are constantly being provided, account for the increased expenditures of this popular branch of the public service.

The total number of post-offices in operation, on June 30, 1873, was 33,244, a net increase of 1,301 over the number reported the preceding year. The number of presidential offices was 1,363, an increase of 163 during the year. The total length of railroad mail-routes at the close of the year was 63,467 miles, an increase of 5,546 miles over the year 1872. Fifty-nine railway post-office lines were in operation June 30, 1873, extending over 14,866 miles of railroad-routes, and performing an aggregate service of 84,925 miles daily.

The number of letters exchanged with foreign countries was 27,459,185, an increase of 3,096,085 over the previous year, and the postage thereon amounted to \$2,021,310.85. The total weight of correspondence exchanged in the mails with European countries exceeded 912 tons, an increase of 92 tons over the previous year. The total cost of the United States ocean-steamship service, including \$725,000 paid from special appropriations to subsidized lines of mail-steamers, was \$1,047,271.85.

New or additional postal conventions have been concluded with Sweden, Norway, Belgium, Germany, Canada, Newfoundland, and Japan, reducing postage rates on correspondence exchanged with those countries; and further efforts have been made to conclude a satisfactory postal convention with France, but without success.

I invite the favorable consideration of Congress to the suggestions and recommendations of the Postmaster-General for an extension of the free-delivery system in all cities having a population of not less than ten thousand; for the prepayment of postage on newspapers and other printed matter of the second class; for a uniform postage and limit of weight on miscellaneous matter; for adjusting the compensation of all postmasters not appointed by the President, by the old method of commissions on the actual receipts of the office, instead of the present mode of fixing the salary in advance upon special returns; and especially do I urge favorable action by Congress on the important recommendations of the Postmaster-General for the establishment of United States postal savings depositories.

Your attention is also again called to a consideration of the question of postal telegraphs, and the arguments adduced in support thereof, in the hope that you may take such action in connection therewith as in your judgment will most contribute to the best interests of the country.

DEPARTMENT OF JUSTICE.

Affairs in Utah require your early and special attention. The Supreme Court of the United States, in the case of *Clinton vs. Englebrecht*, decided that the United States Marshal of that Territory could not lawfully summon jurors for the district courts; and those courts hold that the territorial marshal cannot lawfully perform that duty, because he is elected by the legislative Assembly and not appointed as provided for in the act organizing the Territory. All proceedings at law are practically abolished by these decisions, and there have been but few or no jury trials in the district courts of that Territory since the last session of Congress. Property is left without protection by the courts, and crimes go unpunished. To prevent anarchy there, it is absolutely necessary that Congress provide the courts with some mode of obtaining jurors, and I recommend legislation to that end; and also that the probate courts of the Territory, now assuming to issue writs of injunction and *habeas corpus*, and to try criminal cases and questions as to land-titles, be denied all jurisdiction not possessed ordinarily by courts of that description.

I have become impressed with the belief that the act approved March 2, 1867, entitled "An act to establish a uniform system of bankruptcy throughout the United States," is productive of more evil than good at this time. Many considerations might be urged for its total repeal, but, if this is not considered advisable, I think it will not be seriously questioned that those portions of said act providing for what is called involuntary bankruptcy operate to increase the financial embarrassments of the country. Careful and prudent men very often become involved in debt in the transaction of their business, and though they may possess ample property, if it could be made available for that purpose, to meet all their liabilities, yet, on account of the extraordinary scarcity of money, they may be unable to meet all their pecuniary obligations as they become due, in consequence of which they are liable to be prostrated in their business by proceedings in bankruptcy at the instance of unrelenting creditors. People are now so easily alarmed as to monetary matters that the mere filing of a petition in bankruptcy by an unfriendly creditor will necessarily embarrass, and oftentimes accomplish the financial ruin of a responsible business man. Those who otherwise might make lawful and just arrangements to relieve themselves from difficulties produced by the present stringency in money, are prevented by their constant exposure to attack and disappointment by proceedings against them in bankruptcy; and, besides, the law is made use of in many cases by obdurate creditors to frighten or force debtors into a compliance with their wishes and to acts of injustice to other creditors and to themselves. I recommend that so much of said act as provides for involuntary bankruptcy on account of the suspension of payment be repealed.

Your careful attention is invited to the subject of claims against the Government, and to the facilities afforded by existing laws for their prosecution. Each of the Departments of State, Treasury, and War, have demands for many millions of dollars upon their files, and they are rapidly accumulating. To these may be added those now pending before Congress, the Court of Claims, and the Southern Claims Commission, making in the aggregate an immense sum. Most of these grow out of the rebellion, and are intended to indemnify persons on both sides for their losses during the war; and not a few of them are fabricated and supported by false testimony. Projects are on foot, it is believed, to induce Congress to provide for new classes of claims, and to revive old ones through the repeal or modification of the statute of limitations, by which they are now barred. I presume these schemes, if proposed, will be received with little favor by Congress, and I recommend that persons having claims against the United States cognizable by any tribunal or department thereof, be required to present them at an early day, and that legislation be directed as far as practicable to the defeat of unfounded and unjust demands upon the Government; and I would suggest, as a means of preventing fraud, that witnesses be called upon to appear in person to testify before those tribunals having said claims before them for adjudication. Probably the largest saving to the national Treasury can be secured by timely legislation on these subjects, of any of the economic measures that will be proposed.

You will be advised of the operations of the Department of Justice by the report of the Attorney-General, and I invite your attention to the amendments of existing laws suggested by him, with the view of reducing the expenses of that Department.

DEPARTMENT OF THE INTERIOR.

The policy inaugurated toward the Indians at the beginning of the last Administration has been steadily pursued, and, I believe, with beneficial results. It will be continued with only such modifications as time and experience may demonstrate as necessary.

With the encroachment of civilization upon the Indian reservations and hunting-grounds, distur-

ances have taken place between the Indians and whites during the past year, and probably will continue to do so until each race appreciates that the other has rights which must be respected.

The policy has been to collect the Indians, as rapidly as possible, on reservations—and as far as practicable within what is known as the Indian Territory—and to teach them the arts of civilization and self-support. Where found off their reservations, and endangering the peace and safety of the whites, they have been punished, and will continue to be for like offenses.

The Indian Territory south of Kansas and west of Arkansas is sufficient in area and agricultural resources to support all the Indians east of the Rocky Mountains. In time, no doubt, all of them, except a few who may select to make their homes among white people, will be collected there. As a preparatory step for this consummation, I am now satisfied that a territorial form of government should be given them, which will secure the treaty rights of the original settlers, and protect their homesteads from alienation for a period of twenty years.

The operations of the Patent-Office are growing to such a magnitude, and the accumulation of material is becoming so great, that the necessity for more room is becoming more obvious day by day. I respectfully invite your attention to the reports of the Secretary of the Interior and Commissioner of Patents on this subject.

The business of the General Land-Office exhibits a material increase in all its branches during the last fiscal year. During that time there were disposed of, out of the public lands, 18,080,606 acres, being an amount greater by 1,165,631 acres than was disposed of during the preceding year. Of the amount disposed of, 1,626,266 acres were sold for cash; 214,940 acres were located with military land-warrants; 8,798,612 acres were taken for homesteads; 653,446 acres were located with agricultural college-scrip; 6,083,536 acres were certified by railroads; 76,576 acres were granted to wagon-roads; 288,548 acres were approved to States as swamp-lands; 138,681 acres were certified for agricultural colleges, common schools, universities, and seminaries; 190,775 acres were approved to States for internal improvements; and 14,222 acres were located with Indian scrip. The cash receipts during the same time were \$3,408,515.50, being \$190,415.50 in excess of the receipts of the previous year. During the year 30,488,132 acres of public land were surveyed, an increase over the amount surveyed the previous year of 1,037,193 acres, and added to the area previously surveyed, aggregates 616,554,895 acres which have been surveyed, leaving 1,218,443,505 acres of the public land still unsurveyed.

The increased and steadily increasing facilities for reaching our unoccupied public domain, and for the transportation of surplus products, enlarges the available field for desirable homestead locations, thus stimulating settlement, and extending, year by year, in a gradually increasing ratio, the area of occupation and cultivation.

The expressed desire of the representatives of a large colony of citizens of Russia to emigrate to this country, as is understood, with the consent of their Government, if certain concessions can be made to enable them to settle in a compact colony, is of great interest, as going to show the light in which our institutions are regarded by an industrious, intelligent, and wealthy people, desirous of enjoying civil and religious liberty; and the acquisition of so large an immigration of citizens of a superior class would, without doubt, be of substantial benefit to the country. I invite attention to the suggestion of the Secretary of the Interior in this behalf.

There was paid during the last fiscal year for pensions, including the expense of disbursement \$29,185,289.62, being an amount less by \$984,050.93 than was expended for the same purpose the preceding year. Although this statement of expenditures

would indicate a material reduction in amount compared with the preceding year, it is believed that the changes in the pension laws at the last session of Congress will absorb that amount the current year. At the close of the last fiscal year there were on the pension-rolls 99,804 invalid military pensioners, and 112,088 widows, orphans, and dependent relatives of deceased soldiers, making a total of that class of 211,892; 18,266 survivors of the War of 1812, and 5,058 widows of soldiers of that war pensioned under the act of Congress of February 14, 1871, making a total of that class of 23,319; 1,480 invalid Navy pensioners, and 1,770 widows, orphans, and dependent relatives of deceased officers, sailors, and marines of the Navy, making a total of Navy pensioners of 3,250, and a grand total of pensioners of all classes of 238,411, showing a net increase during the last fiscal year of 6,182. During the last year the names of 16,405 pensioners were added to the rolls, and 10,223 names were dropped therefrom from various causes.

The system adopted for the detection of frauds against the Government in the matter of pensions, has been productive of satisfactory results, but legislation is needed to provide, if possible, against the perpetration of such frauds in future.

The evidently increasing interest in the cause of education is a most encouraging feature in the general progress and prosperity of the country, and the Bureau of Education is earnest in its efforts to give proper direction to the new appliances and increased facilities which are being offered to aid the educators of the country in their great work.

The ninth census has been completed, the report thereof published and distributed, and the working force of the bureau disbanded. The Secretary of the Interior renews his recommendation for a census to be taken in 1875, to which subject the attention of Congress is invited. The original suggestion in that behalf has met with the general approval of the country, and even if it be not deemed advisable at present to provide for a regular quinquennial census, a census taken in 1875, the report of which could be completed and published before the one hundredth anniversary of our national independence, would be especially interesting and valuable, as showing the progress of the country during the first century of our national existence. It is believed, however, that a regular census every five years would be of substantial benefit to the country, inasmuch as our growth hitherto has been so rapid that the results of the decennial census are necessarily unreliable as a basis of estimates for the latter years of a decennial period.

DISTRICT OF COLUMBIA.

Under the very efficient management of the Governor and the Board of Public Works of this District, the city of Washington is rapidly assuming the appearance of a capital of which the nation may well be proud. From being a most unsightly place three years ago, disagreeable to pass through in summer in consequence of the dust arising from unpaved streets, and almost impassable in winter from the mud, it is now one of the most sightly cities in the country, and can boast of being the best paved.

The work has been done systematically, the plans, grades, location of sewers, water and gas mains being determined upon before the work was commenced, thus securing permanency when completed. I question whether so much has ever been accomplished before in any American city for the same expenditures. The Government having large reservations in the city, and the nation at large having an interest in their capital, I recommend a liberal policy toward the District of Columbia, and that the Government should bear its just share of the expense of these improvements. Every citizen visiting the capital feels a pride in its growing beauty, and that he too is part owner of the investments made here.

I would suggest to Congress the propriety of promoting the establishment in this District of an institution of learning, or university of the highest class,

by the donation of lands. There is no place better suited for such an institution than the national capital. There is no other place in which every citizen is so directly interested.

CIVIL-SERVICE REFORM.

In three successive messages to Congress I have called attention to the subject of "civil-service reform."

Action has been taken so far as to authorize the appointment of a board to devise rules, governing methods of making appointments and promotions, but there never has been any action making these rules, or any rules, binding, or even entitled to observance where persons desire the appointment of a friend, or the removal of an official who may be disagreeable to them.

To have any rules effective they must have the acquiescence of Congress as well as of the Executive. I commend, therefore, the subject to your attention, and suggest that a special committee of Congress might confer with the civil-service board during the present session, for the purpose of devising such rules as can be maintained, and which will secure the services of honest and capable officials, and which will also protect them in a degree of independence while in office.

Proper rules will protect Congress, as well as the Executive, from much needless persecution, and will prove of great value to the public at large.

I would recommend for your favorable consideration the passage of an enabling act for the admittance of Colorado as a State in the Union. It possesses all the elements of a prosperous State, agricultural and mineral, and, I believe, has a population now to justify such admission. In connection with this I would also recommend the encouragement of a canal for purposes of irrigation, from the eastern slope of the Rocky Mountains to the Missouri River. As a rule, I am opposed to further donations of public lands for internal improvements, owned and controlled by private corporations, but in this instance I would make an exception. Between the Missouri River and the Rocky Mountains there is an arid belt of public land, from three to five hundred miles in width, perfectly valueless for the occupation of man, for the want of sufficient rain to secure the growth of any product. An irrigating canal would make productive a belt, as wide as the supply of water could be made to spread over, across this entire country, and would secure a cordon of settlements, connecting the present population of the mountain and mining regions with that of the older States. All the land reclaimed would be clear gain. If alternate sections are retained by the Government, I would suggest that the retained sections be thrown open to entry under the homestead laws, or sold to actual settlers for a very low price.

I renew my previous recommendation to Congress for general amnesty. The number engaged in the late rebellion yet laboring under disabilities is very small, but enough to keep up a constant irritation. No possible danger can accrue to the Government by restoring them to eligibility to hold office.

I suggest for your consideration the enactment of a law to better secure the civil rights which freedom should secure, but has not effectually secured, to the enfranchised slave.

U. S. GRANT.

EXECUTIVE MANSION, December 1, 1873.

Protocol of the Conference held at the Department of State, at Washington, on the 29th of November, 1873, between HAMILTON FISH, Secretary of State, and Rear-Admiral DON JOSE POLO DE BERNABE, Envoy Extraordinary and Minister Plenipotentiary of Spain.

The undersigned having met for the purpose of entering into a definite agreement respecting the

case of the steamer *Virginius*, which, while under the flag of the United States, was, on the 31st day of October last, captured on the high-seas by the Spanish man-of-war *Tornado*, have reached the following conclusions:

Spain, on her part, stipulates to restore forthwith the vessel referred to, and the survivors of her passengers and crew, and on the 25th day of December next to salute the flag of the United States. If, however, before that date, Spain should prove to the satisfaction of the Government of the United States, that the *Virginius* was not entitled to carry the flag of the United States, and was carrying it, at the time of her capture, without right, and improperly, the salute will be spontaneously dispensed with, as in such case not being necessarily requirable; but the United States will expect, in such case, a disclaimer of the intent of indignity to its flag in the act which was committed.

Furthermore, if on or before the 25th of December, 1878, it shall be made to appear to the satisfaction of the United States that the *Virginius* did not rightfully carry the American flag, and was not entitled to American papers, the United States will institute inquiry, and adopt legal proceedings against the vessel, if it be found that she has violated any law of the United States, and against any of the persons who may appear to have been guilty of illegal acts in connection therewith; it being understood that Spain will proceed, according to the second proposition made to General Sickles, and communicated in his telegram, read to Admiral Polo on the 27th instant, to investigate the conduct of those of her authorities who have infringed Spanish laws or treaty obligations, and will arraign them before competent courts, and inflict punishment on those who may have offended.

Other reciprocal reclamations to be the subject of consideration and arrangement between the two governments; and, in case of no agreement, to be the subject of arbitration, if the constitutional assent of the Senate of the United States be given thereto.

It is further stipulated that the time, manner, and place, for the surrender of the *Virginius*, and the survivors of those who were on board of her at the time of her capture, and also the time, manner, and place, for the salute to the flag of the United States, if there should be occasion for such salute, shall be subject to arrangement between the undersigned, within the next two days.

HAMILTON FISH,
JOSE POLO DE BERNABE.

Credit Mobilier.—Report of the Committee.

The Committee on the Judiciary, to which was referred the resolution of the House passed February 20, 1878 in the words following:

Resolved, That the testimony taken by the committee of this House, of which Mr. Poland, of Vermont, is chairman, be referred to the Committee on the Judiciary, with instructions to inquire whether any thing in such testimony warrants articles of impeachment of any officer of the United States not a member of this House, or makes it proper that further investigation should be ordered in his case," having fully considered the matter, pray leave to submit the following report:

It is apparent that this resolution brings before the House subjects of the gravest moment, involving most important considerations of fact and law thereto applicable. There can be no more delicate and sometimes painful duty devolved upon the House of Representatives, and no higher prerogative is given to it by the Constitution, than its power to be exercised as the grand inquest of all the nation by presenting articles of impeachment against civil officers of the Government. The very fact that one is accused who has so far possessed the confidence of his fellow-citizens, or the Executive, as to have had the

interest of the Government confided to his charge as a civil officer of the United States, brings always before the House derelictions of duty which, if found, involves consequences to the individual as well as to the country of the most serious character. Wherefore your committee have entered upon this subject with the intent to give it the fullest deliberation possible to us in the waning hours of the session, and for that purpose they have deliberated upon it in special sessions.

The resolution, it will be observed, refers to your committee "the testimony taken by the committee of this House, of which Mr. Poland is chairman, with instructions to inquire whether any thing in such testimony warrants articles of impeachment of any officer of the United States not a member of this House, or makes it proper that further investigation should be ordered in his case."

The question first presented is the conduct of what civil officers of the United States is brought into question by this testimony?

Your committee take leave to observe that a member of the House of Representatives is not an officer of the United States to whom the constitutional remedy of impeachment applies. This was long ago decided in Blount's case by the Senate of the United States, where an attempt was made to impeach him because of an alleged offense. Your committee find but two civil officers of the class liable to impeachment whose acts are called in question by the testimony submitted to us; one the Vice-President of the United States, the other Mr. Brooks, late Government director of the Union Pacific Railroad, who was an officer provided for by law, and appointed by the President. The first is still in office, the second has long since ceased to be such officer.

The case of Mr. Brooks, by the terms of the resolution, does not seem to be before us, as he is now a member of the House. If there were any doubt upon that subject, your committee would resolve it by asking instruction of the House upon that point, but the fact that the conduct of Mr. Brooks in this regard was, at the time of the passage of the resolution and now is, before the House upon a report of another committee recommending his expulsion from the House because of the transactions set forth in the evidence referred to us, would seem to furnish a conclusive reason for the exception made in his case, and determine all doubts upon the matter. Wherefore your committee have given no further consideration to the evidence in that behalf.

For the purpose of applying the precedents and principles of law which regulate the presentation and trials of impeachment, your committee have found it convenient in the case of the Vice-President to assume, without expressing any opinion upon the facts to be found therein, that the evidence proves all that can be possibly claimed to be inferred from it, because of his being a holder, directly or indirectly, and receiving the profits thereof of the stock of a corporation known as the Credit Mobilier of America while a member of Congress.

Giving, therefore, as in case of a demurrer to evidence, every possible intendment against Mr. Colfax, it would seem that it might be claimed from the evidence that in the winter of 1867-'68, he became the owner by purchase at par, and interest on that value, of certain stock in the Credit Mobilier Company from Oakes Ames, when that stock was known to both to be worth very much more than par, and that he received the profits or dividends, while Ames held the stock, and still holds the same in trust for him, although the beneficial interest in the stock, if not the legal title, remains in Mr. Colfax down to today. That during the sessions of Congress of 1867-'68 and 1868-'69, while holding such interest in the stock, Mr. Colfax, as a member of the House of Representatives, and its Speaker, presided over its deliberations. During which sessions certain matters of legislation in which his personal interests as such stockholder were involved, was attempted to be ad-

vantageously or injuriously affected by legislative action.

The Credit Mobilier of America and its connection with the Union Pacific Railroad, and the conjoint interest of the stockholders of both, have become so far matters of public notoriety that your committee do not deem it necessary to go into any recital of its history in order to an understanding of their report. It may, however, be convenient to have on record, if this report should ever be drawn into precedent, that the Credit Mobilier was a State corporation, organized by the principal stockholders of the Union Pacific road to receive from themselves the contract of building that road, which had obtained by legislative grant large endowments of lands and bonds of the United States to be held in trust only for the construction and equipment of the road, large amounts of which, to a considerable number of millions of dollars, the stockholders of the Pacific road, through the intervention of the Credit Mobilier and other devices had divided, among themselves and confederates, as pretended profits of building the road, while, in fact, they took to their own individual profit and use these very large sums belonging to the Government of the United States, and intrusted to them for a specific use only, in violation of that trust.

Drawing such inference as a jury might from the evidence if unexplained, it may be claimed that the stock was sold to Mr. Colfax to influence him as a member and Speaker of the House, and that it did so influence his action in favor of the Union Pacific road, and incidentally in his own favor as a stock and bondholder in both companies.

Your committee lay aside for the purposes of this report any thing which might be presented by the accused by way of mitigation of the facts, or which might extenuate in any degree the supposed guilt of the transaction, because we have desired, in examining the question submitted to us, to assume the facts as clearly and broadly against the accused as any inference from the evidence could possibly justify.

Assuming, then, for this purpose, the facts above stated to be proved, several questions of law meet your committee upon the threshold of the inquiry with which they are charged, "whether any thing in such testimony warrants articles of impeachment against" Mr. Colfax as a civil officer.

It is not in dispute that Mr. Colfax became interested in the Credit Mobilier stock before he was elected Vice-President, and whatever were the motives that impelled the transaction they were expected to operate upon him only as a member of the House.

Upon this question whether a bribe given a civil officer to influence his conduct as such officer is an impeachable offense your committee can have no doubt, as it is made such by the express words of the Constitution. But we are to consider, taking the harshest construction of the evidence, whether the receipt of a bribe by a person who afterward becomes a civil officer of the United States, even while holding another official position, is an act upon which an impeachment can be grounded to subject him to removal from an office which he afterward holds.

To elucidate this we first turn to the precedents.

Your committee find that in all the cases of impeachment, or attempted impeachment, under our Constitution, there is no instance where the accusation was not in regard to an act done or omitted to be done while the officer was in office. In every case it has been heretofore considered material that the articles of impeachment should allege in substance that, being such officer, and while in the exercise of the duties of his office, the accused committed the acts of alleged inculpation.

In the earliest case of impeachment by the House, that of Judge Pickering, of New Hampshire, the accusation was not even for official acts or misconduct, but he was held impeachable by both House and

Senate because of his habits of intoxication while in office. But the gravamen of complaint in that case was that those habits, and their effect, went with him, and affected him in the performance of his official duties.

The case of Judge Chase, which brought out in the prosecution and defense all the legal learning and ability of the most brilliant bar of our country, was founded wholly upon alleged acts of malfeasance and misfeasance while actually sitting as a judge.

The case of Judge Peck was for an alleged improper order upon the bench to imprison Mr. Lawless for contempt of court.

In the more recent case of the judge of the Eastern District of Tennessee, the accusation was that he abandoned his duties and took part in the rebellion while he was judge, and that official act alone was imputed to him as the offense.

In the still more recent case of a late President of the United States, the acts were all imputed to him as such officer of the United States, and the committee who prepared the articles of impeachment were careful to allege each act charged upon him as being done in the exercise of his office.

Your committee have looked with some care to the precedents of impeachment under State constitutions, which are generally framed upon the model of the Constitution of the United States in this regard, and they are not aware of any case wherein an act has been held to be impeachable, or impeachment even attempted because of it, unless that act so alleged to have been done was in the course of official duty in the office held by the accused, to remove him from which the constitutional remedy was proposed to be applied.

The very recent cases of Judges Barnard and McCunn, of New York, may be claimed to be an exception to this statement in some of the specifications under the articles presented; and if so, they are the only cases of even limited exception thereto, and of the legal value of that action, taken under the state of high political excitement in which those cases were conducted, as precedents, the House will judge. To your committee they would seem to serve as warnings, not as guides.

Going back to the Parliament of England, from whose system of parliamentary and common law we have drawn all the principles which have heretofore governed the House and Senate in matters of impeachment, we find no case, since the rights of the subject and principles of law and justice have been established, wherein a like rule is not followed.

Your committee are not unmindful that, under the claim of omnipotent power by the Parliament of England to make laws without any substantial negative on the part of the executive, in times of high party feeling, the power of impeachment residing in the Commons has been used as a punitive power as well as a remedial one, and, in some instances, has been extended to offenses alleged to have been committed while the officer was holding another office. But your committee would also call attention to the fact that in some cases impeachment was used as a method of punishing a subject who held no office at all.

In short, when the Commons of England held the power as against the executive, they punished the king's favorites by impeachment. While the Stuarts held the power as against the Commons, they punished the favorites of the people by the Star Chamber. Our Constitution, in the judgment of the committee, has furnished a safeguard against both of these sources of oppression. Both were well known and considered by our fathers in framing the Constitution. Turning to the debates, meagre as they are, it will appear that apprehension was felt that impeachment might be used against the citizen as a punitive power, and therefore words strictly guarding the extent to which the judgment might operate find place in that charter, enacting that the punishment of crime should be left to the ordinary tribunals of justice.

Finding so nearly an invariable current of precedent and authority, your committee next turned to see in how far the rule drawn from precedent accords with the plain and immutable principles of law and justice, and also in how far this rule seems to be necessary to shield the officer from what might happen again, as it has happened before, parliamentary oppression under the pressure of high party and other excitement, as well as to protect the rights of the constituency as to an elective office from being deprived of the services of their officer by his removal by impeachment, because of alleged crimes or misdemeanors committed by such officer before the people had chosen him to serve them, and which the electors well might have held not to have been a disqualification of the officer, if such charges had been made against him before the election.

Your committee, therefore, are led to inquire what is the nature, and what the objects, of impeachment under the Constitution?

Are they punitive or remedial? Or, in other words, is impeachment a constitutional remedy for removing obnoxious persons from office, and preventing their again filling office, or a power given for punishing an officer while he is an officer for some crime alleged to have been committed by him before he was such officer? Your committee are very strongly inclined to the opinion that impeachment was intended by the framers of the Constitution to be wholly remedial, and not punitive except as an incident to the judgment, because we find that the Constitution limits the judgment in impeachment by strongly restrictive words:

Judgment in cases of impeachment shall not extend further than to remove from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States.

If such judgment is a punishment for an alleged high crime and misdemeanor, then why does the same article provide for the punishment of the accused a second time for the same offense? Because the words we have quoted are followed by the provision—

But the party convicted shall, nevertheless, be subject to indictment, trial, judgment, and punishment according to law.

This, therefore, would leave the party who had been removed from office and disqualified from holding office by the judgment of impeachment, if that is a punishment for his crime, to be the second time punished for the same offense, which is contrary to natural justice against *Magna Charta*, and is most positively forbidden by the fifth article of amendment to the Constitution.

This article also throws some further light on this subject, because in its nervous language it enacts that—

No person shall be held to answer for a capital or other infamous crime, unless upon presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia when in actual service in time of war or public danger.

Nor does it appear that this view is affected by the exception in section two, article three, of the Constitution, that the trial of all crimes except in cases of impeachment shall be by jury; this exception being necessary only to make the instrument consistent in all its parts with itself, as it had already provided that the impeached could be tried by jury for his crime.

Again, we find impeachment to be remedial in this, that it only provides as a further consequence disqualification for office, by which the evil is cured that thereafter the Government may not have an officer who has so far forgotten his obligations to his official oath and to his duty as a citizen as to have been removed from office for high crimes and misdemeanors again by vote of the electors or appointment of the Executive put in place of honor or trust.

We are also inclined to believe that proceedings of

impeachment were intended to be remedial and not punitive, because we have already seen that if punitive at all an entirely inadequate punishment has been provided by the judgment; because the very highest offenses are triable by impeachment, such as treason and bribery, and the sentence may be only removal of an officer whose term extends for a few days only, as in the case under consideration.

Again, we are brought to the conclusion that proceedings of impeachment are remedial and not punitive, because in the case of Judge Pickens, before referred to, impeached for habitual intoxication, the officer was condemned because he became incapacitated for the performance of the duties of his office, and we find that impeachment is the only means known to our Constitution by which a civil officer of the United States elected by the people or a judge appointed by the Executive may be removed from office. And certainly habitual intoxication, while it may not be a crime at common law or by statute in a private person, may readily enough seem to be a very high crime and misdemeanor in a high civil officer, wholly incapacitating him from performing all his duties, so much so as to be made by the articles of war a ground for removing an officer from the military service.

Again, your committee are inclined to believe that impeachment is not punitive, because, although an officer may have been tried and convicted of a high crime, yet he may be impeached for that very crime as a remedy for public mischief, and thus, in the converse of the proposition above stated, be twice punished for the same offense.

If the conclusions to which your committee have arrived in this regard are correct, it will readily be seen that the remedial proceeding of impeachment should only be implied to high crimes and misdemeanors committed while in office, and which alone affect the officer in discharge of his duties as such, whatever may have been their effect upon him as a man, for impeachment touches the office only, and qualifications for the office, and not the man himself.

It will be seen from a few illustrations that it hardly could have been the intent of the Constitution that an officer could be impeached for a crime committed by him before his entry into the office from which he is to be removed, because, if this were so, there is no constitutional, and thus far no legal limitation as to the time during which he may be held so amenable to such impeachment.

One may have committed a high misdemeanor in his early youth, repented it, outlived it, or may have been pardoned, and, in the language of the law, "made as white as snow," and yet, without limitation, years afterward may be impeached for that crime and deprived of an office by him afterward held which he has filled to the entire satisfaction of all good men. Indeed, impeachment may in this way be used as a means of removing from the possibility of election a popular candidate whom the people desire to elect to the highest office within their gift if an opposed House of Representatives chose to impeach for a high misdemeanor of many years, standing and present that to the Senate, who, upon finding the fact, are bound to give judgment, or if not bound, might be willing to give judgment of disqualification from office forever, from the effect of which judgment no power under the Constitution could relieve, for cases of impeachment are expressly excepted, and no law could avail, nor even the unanimous election of the whole people could give absolution.

Your committee are not unmindful that the report of the learned committee of the House, made upon the testimony which has been referred to our consideration have, in the course of its reasonings, likened the cause for which a member may be expelled to the cause for which an impeachment would lie, and argue that "the close analogy between this power and the power of impeachment is deserving of consideration upon the question whether the

House may expel a member for acts done by him before his election." If this analogy is as perfect as that committee evidently supposed it to be, from the stress of argument which they impose upon it, then it becomes our duty carefully to examine the precedents in case of expulsion to ascertain the nature of that constitutional power vested in both Houses of Congress and the class of offenses upon which it may operate, and what, if any, distinction there may be between the consequences following a judgment in impeachment and a vote of expulsion.

That committee thereupon assert: "It has never been contended that the power to impeach for any cause enumerated," i. e., treason, bribery, or other high crimes, "was intended to be restricted to those which might occur after appointment to civil office."

Your committee have been unable from their investigation to find warrant for this assertion. We have already shown that all the precedents under the Constitution show impeachment to have been for acts done in the very office from which the accused was sought to be removed. We are unaware that there is any case to the contrary in the later decisions in England, or in any States of the Union, and we grieve that the committee for whom we have so high a respect have not seen fit to give authority to the House for this so grave and important a proposition of constitutional law.

Knowing the accurate learning and exhaustive research of that committee, and the long time which they have had this matter under consideration, the Committee of the Judiciary feel quite sure that if any such case in precedent could have been found it would have been stated in support of a proposition of such moment. In the more limited knowledge of your committee and in the little time we have been able to give to this investigation, we have been unable to find any authority or precedents for so broad an assertion of unquestioned power. And your committee take leave to suppose that the immense labors of the Committee on Credit Mobilier, in their investigation alone, must have permitted them to the enunciation of a proposition for which it would seem to be difficult to find either precedents or authority.

And we are emboldened in our opinion upon this point because we do not fail to observe that the learned committee in the analogy which they draw between impeachment and expulsion have not adverted to but have overlooked in their exposition of the subject, the very wide distinction of the effect of proceedings by impeachment and the effect of expulsion of a member for whatever cause.

That constitutional distinction is this: that impeachment may disqualify the impeached from ever after holding office, while expulsion never has been held, except under a statute of England long since fallen into disuse, by which alone the case of Wilkes was for a time attempted to be justified in a limited degree to have such effect. The expelled member may be and has been, frequently, reelected after expulsion. The impeached officer never can be elected or appointed to office after impeachment and a full judgment upon the finding of fact.

Considering, therefore, that the committee have overlooked so important a difference, we are permitted to believe that they may not have carefully observed other differences between expulsion and impeachment which will show the analogy which they have drawn in their argument may aid our own conclusions. Your committee feel that this analogy, whatever it may be, strengthens our argument that an officer may not be impeached for an act done before his election to office, because, before we heard the report of the learned Committee on Credit Mobilier, we had not been led to doubt that no man could or ought to be expelled for any act done by him before his election as a member of Congress.

Our first reason for not doubting on this point which we desire to recall to the House and the country is the plain words of the Constitution,

which seem to us clearly to indicate that the power of expulsion is a protective, not a punitive provision of the Constitution. It is found in section five of the first article:

Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

Expel for what? For disorderly behavior, i. e., for that behavior which renders him unfit to do his duties as a member of the House, or that present condition of mind or body which makes it unsafe or improper for the House to have him in it. We submit with some confidence that the House might expel an insane man, because it might not be safe or convenient for the House to have him within the legislative hall. They can also clearly expel a man for disorderly proceedings in the body or for such acts outside of the body as to render it at the time manifestly improper for him to be in the House. But your committee are constrained to believe that the power of expelling a member for some alleged crime, committed, it may be, years before his election, is not within the constitutional prerogative of the House.

We do not overlook the argument presented by the learned committee upon whose report we are observing by the phrase:

Every consideration of justice and sound policy would seem to require that the public interests be secured, and those chosen to be their guardians be free from pollution of high crimes, no matter at what time that pollution had attached.

But the answer seems to us an obvious one that the Constitution has given to the House of Representatives no constitutional power over such considerations of "justice and sound policy" as a qualification in representation. On the contrary, the Constitution has given this power to another and higher tribunal, to wit, the constituency of the member. Every intendment of our form of government would seem to point to that. This is a Government of the people which assumes that they are the best judges of the social, intellectual, and moral qualifications of their Representatives whom they are to choose, not anybody else to choose for them, and we therefore find in the people's Constitution and frame of government they have in the very first article and section determined that "the House of Representatives shall be composed of members chosen every second year by the people of the States," not by representatives chosen for them at the will and caprice of members of Congress from other States according to the notions of "the necessities of self-preservation and self-purification" which might suggest themselves to the reason or caprice of the members from other States in any process of "purgation or purification" which two-thirds of the members of either House may "deem necessary" to prevent bringing "the body into contempt and disgrace."

Your committee are further emboldened to take this view of this very important constitutional question because they find that in the same section it is provided what shall be the qualifications of a Representative of the people so chosen by the people themselves. On this it is solemnly enacted, unchanged during the life of the nation, that—

No person shall be a Representative who shall not have attained the age of twenty-five years, and been seven years a citizen of the United States, and who shall not when elected be an inhabitant of that State in which he shall be chosen.

Your committee believe that there is no man or body of men who can add to or take away "one jot or tittle" of these qualifications. The enumeration of such specified qualifications necessarily excludes every other. It is respectfully submitted that it is nowhere provided that the House of Representatives shall consist of such members as are left after the process of "purgation and purification" shall have

been exercised for the public safety, such as may be "deemed necessary" by any majority of the House. The power itself seems to us too dangerous, the claim of power too exaggerated, to be confided in any body of men, and therefore most wisely retained in the people themselves by the express words of the Constitution.

One need not have a lively imagination to divine how that power of "purgation and purification" can be used as a two-thirds majority shall "deem the public safety requires," so as to absorb all other powers or branches of the Government, and it may be the rights and powers of the people themselves. For example, the election of President of the United States in certain contingencies, which have more than once arisen in our history, is to be exercised by the House of Representatives voting by States, and in one of those very instances—in the case of the contest between Jefferson and Burr—a single Representative in a single State determined that contest. How easy to change that vote, and the election of the President of the whole people, by the use of this process of "purgation and purification" under the plea of the "public safety," which has been the foundation of the throne of every tyrant, and the justification of every usurper and dictator!

We can foresee also this possible, nay, probable danger, from the "purgation" by a majority of the House of the Representatives from Nebraska, Nevada, Kansas, Oregon, Florida, and Delaware, on the ground that has been sometimes stated here by Representatives from the larger States, that they are "rotten boroughs," too small to be made States, and thus the vote of six States out of the thirty-seven would be thrown out in a presidential election by States; and this claim that those States are too small to be States would furnish a ready excuse, when such an excuse is desired to accomplish a political end, to say nothing of the use of this power, to expel a single member from one or more of the balanced States where one majority in the delegation would turn the election of President and Vice-President under the claim of "purgation and purification" for public safety.

And the learned committee seem to us to have been equally unfortunate in finding precedents for this claim of power of expulsion of a member for acts done before his election and as a member of the House.

The committee have cited but two precedents in that behalf, one the case of John Smith, a member of the Senate from the State of Ohio, from which case they quote only the somewhat rhetorical report of Mr. Adams, in part in these words:

The power of expelling a member for misconduct results, on the principles of common-sense, from the interests of the nation, that the high trust of legislation shall be invested in pure hands.

The case of Smith, however, was an allegation that while a Senator, during the very term at which he was held to answer, he had been complicated in the alleged treason of Aaron Burr. It is difficult to see how that can be cited as authority as to a crime committed before the accused was a member. That case was not before the Senate. It is observable that the learned committee forget to cite the resolution of expulsion which concludes Mr. Adams's report, and shows the fact in the following words:

That John Smith, a Senator from the State of Ohio, by participation in the conspiracy of Aaron Burr against the peace, union, and liberties of the people of the United States, has been guilty of conduct incompatible with his duty and station as a Senator of the United States, and that he be, and therefore is, expelled from the Senate of the United States.

And further, during the discussion no Senator claimed that Mr. Smith could have been expelled for any act done by him before his election. But, on the contrary, Mr. Hillhouse, the able Senator from Connecticut, characterizes the report of Mr. Adams as

"one containing principles which I can never sanction by my vote;" "principles which would plant a dagger in the bosom of civil liberty."

We also take leave to suggest that the learned committee might have given in their report a little more prominence to the case of Humphrey Marshall, of Kentucky, which they only casually mention, wherein the same Senate refused to take cognizance of the charge of perjury as a ground of expulsion because the imputed offense had been committed before the election of the Senator.

In their only other citation your committee are happy to find that they draw their inspiration from the same source with the learned Committee on Credit Mobilier, which cites the case of John Wilkes as establishing the doctrine that the House of Commons of England, by the common *lex parliamentaria*, may expel a member for acts committed before he was a member of that House. Your committee had come to an entirely different conclusion upon this case. They had supposed if any thing was settled in the case of John Wilkes, it was that such act of expulsion was contrary to the "liberties of the Commons of England."

It certainly cannot be held an authority for the proposition that a member may be expelled for acts done before he was a member of the body, because the several acts of John Wilkes for which he was expelled were done after his election to that same session of Parliament to which he was elected and reelected. But *a fortiori*, because Wilkes was sustained by every lover of principles of freedom, and the acts of the House of Commons in his case have always been cited as an instance for the tyranny of parliamentary bodies.

Your committee had believed until they read this report that since the vote of the House of Commons under the lead of the Liberals of England, had blotted out the offensive record by ordering it to be expunged from the journal "as subversive of the rights of the whole body of electors of this kingdom:" of the proceedings of a body led by the same ministry who made war upon American rights and liberties, conducted the aggressions which produced the American Revolution, the conduct of such a ministry would never find a defender, much less in a committee of freemen to cite it as a precedent for the action of a constitutional representative body of a free people.

Your committee believed, and still do believe, and therefore aver, that the case of Wilkes was the cause of the limitations upon the qualifications of members put in our Constitution, and the guarded power of expulsion therein given to both Houses. The case of Wilkes was as familiar to our Revolutionary fathers when they framed our Government as is Credit Mobilier to us. They had seen and felt the effects of parliamentary oppression, and they guarded themselves sedulously from it in their Constitution of government.

Nor are your committee shaken in their opinion by the reasoning of that report that the difference of Wilkes's case to distinguish it from the case they had under advisement is, that Wilkes's was only a case of a political offense, to wit, libel, and therefore not *malum in se*; because we are brought to contemplate when that distinction is raised what might be the condition of some members of the present House of Representatives in the opinion of other members of this House, and probably some one of that learned committee itself.

It will be conceded that there is no higher crime than treason known to a government of laws. It has always been visited by the direct punishment, and in the country from which we received the body of our laws the traitor was not allowed to be buried. Dismembered and disemboweled he saw his entrails burned before his eyes while yet living, and his head was put upon a pike in its decay, grinning terror to like evil-doers, and his blood was held attainted to the latest generation, so that no pure drop

could descend to his posterity. Yet in the present House of Representatives there are men of whom some of the other members may be of opinion that they committed treason against our Government some ten or twelve years since, and might claim that one cause of the election of some of them was that their constituencies knew that they had committed such treason, sympathized with them in it, and chose them as their representatives because of that sympathy; and we of the House of Representatives would be on our part obliged to admit that in order that they might be our associates we removed constitutional disabilities to permit them to sit with us by virtue of that election. Therefore for this reason your committee might find itself compelled to dissent from this proposition stated in that report, that "it is hardly a case to be supposed that any constituency with a full knowledge of a man's guilt or moral turpitude will elect him." That depends upon the definition which the constituency gives to the act done as to its guilty quality.

We must remember that this power of expulsion has been frequently used for political purposes, and may be so again. Not many years ago the House of Representatives witnessed a motion for expulsion of the "old man eloquent," once a President of the United States, as "tainted with crime," because he presented a petition for the abolition of slavery. Nay, more, a movement for expulsion, changed to vote of censure, passed by 125 to 80, against Joshua R. Giddings, of Ohio, as a "tainted man," unfit for association with his fellow-members, because he presented a series of resolutions, declaring that some African negroes, who having endured the horrors of the middle passage in a slave-ship, had the natural and inherent right to rise upon their captors and oppressors at sea, and regain their liberty taken from them by fraud and force.

No life can be so blameless; no services so exalted; no action so just, as always to guard a man against the blasts of passion and prejudice which sometimes sweep over a deliberative assembly.

What then becomes of the doctrine put forward in that report, that the right to this process of "purgation and purification" must be maintained to prevent those tainted by crime from sitting with us? Or, as expressed in that report, "that it seems to us absurd to say an election has given a man political absolution for an offense which was unknown to his constituents." The offense of which we have spoken was known not only to the constituents but to the House, but an election has followed notwithstanding.

But the learned committee further declares as a reason why no fixed rule of law should be adopted by the House in cases of expulsion, as follows:

"That no rule, however narrow or limited, can prevent 'the exercise of this power of purgation and purification,' 'if two-thirds of the House shall see fit to expel a man because they do not like his religion, or political principles, or without any reason at all. They have no power, and there is no remedy, except by appeal to the people.'"

The minds of your committee very much reluctant such a doctrine. We deny the power, that is the legal power—while we admit the brute force—we deny the right, and there can be no legal power where there is no legal right.

It is for us now to make the precedent that shall restrain bad men in bad times from an exercise of an assumed wrongful power. The only safety either for the constituency or the Representative must be found in a steady line of precedents guiding the action of the House in the matter of expulsion founded on principles of justice and legal rights carefully restrained within the limits of constitutional law. Nay, who shall vote as a precedent for any exercise of this claimed power of "purgation and purification?" May not the next House of Representatives composed in two-thirds of its members of Republicans of the most pronounced type, under a precedent established by the report of the learned

committee, if sanctioned by the House, come back at the next session and undertake the work of "purgation and purification" from this House of men whom they believe committed treasonable acts ten years ago? And they will find no legal impediment; for pardon or removal of disabilities does not extend to cases of impeachment by express constitutional exception, and the learned committee insist that the causes justifying impeachment and expulsion are inseparable.

Who, then, will dare assert that for offenses committed ten years ago, yea, five years or one year before the election of a member, the House has power to expel at its caprice under a constitutional provision which declares "the House may punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member?"

The case of Matteson, cited by the learned committee, it seems to your committee, is peculiarly unfortunate to sustain the postulate. But Matteson's case is in so many respects like that under consideration that it deserves more than the passing notice that the report gives it.

Matteson had been engaged in a case of bribery and had been reelected; the charge had been made during the reflection and had been denied and in the last days of the short session before he was to take his seat in the next House a resolution of expulsion was brought against him for the crime of being engaged in bribery while a member of, and for slandering the then present House. Before a vote was taken upon the resolution he sent in his resignation, so that the resolution of expulsion was laid upon the table, while the other two resolutions finding him guilty of the crime were passed.

At the session of the next Congress another resolution of expulsion was introduced for the same cause and in the same words, but was antagonized because the act was done while Matteson was a member of a former Congress, and after the fullest discussion was laid on the table by the decisive vote of 96 yeas to 69 nays in a House where there were such parliamentarians as Campbell, Covode, Winter Davis, Dawes, Farnsworth, Giddings, Grow, Harlan, Olin, Pike, Seward, John Sherman, Wade, Wallbridge, and Washburne, voting in the affirmative in a case where the guilty act was proved and admitted. So that we dissent from the conclusion of the learned committee, that the case of Matteson furnishes no precedent because, as "the whole subject was ended, being laid on the table," it is impossible to say what was decided by the House.

We find ourselves, therefore, from the entire lack of precedent and upon the reason of the case, compelled to differ in the fullest manner from the doctrine of that report, in regard to "purgation and purification;" and because, among other reasons, your committee cannot well see how the fact of the knowledge of the constituency that their representative has heretofore committed a crime, can prevent his presence "bringing odium and reproach upon the body of which he is a member," which would attach to it because of the same crimes, if his constituents did not know them at the time of his election. It seems to us the impure man would need "purgation and purification" in equal degree, irrespective of the knowledge of his constituents.

Our opinion upon the whole matter, therefore, is that the right of representation is the right of the constituency and not that of the Representative; and so long as he does nothing which is disorderly or renders him unfit to be in the House while a member thereof, that except for the safety of the House or the members thereof, or for its own protection, the House has no right or legal constitutional jurisdiction or power to expel. We see no constitutional warrant for his expulsion upon any other ground, and especially not upon the ground of purgation and purification, as set forth in the report of the learned committee, against which your committee must earnestly and respectfully protest.

Your committee do not feel themselves called upon to discuss in this connection the legal consequences following from the doctrine of continuation of the offense in a man once receiving a bribe, because, if it may be laid with a *continuando* at all, the offense must continue to affect him ever after, and, therefore, having once taken a bribe, he is always deemed to be under the effect of it, for the reason that we are inclined to believe that at some time the effect of the bribe might have spent its force, and it would hardly be a safe rule for legal action to undertake to determine whether that would not happen in five years and might happen in ten. Certainly such considerations would not apply to one who had given a bribe, because the virtue thereof all went out of him when he parted with his money, and there was nothing left continuing in him save the loss of it.

For the reasons so hastily stated, and many more which might be adduced, your committee conclude that both the impeaching power bestowed upon the two Houses by the Constitution and the power of expulsion are remedial only and not punitive so as to extend to all crimes at all times, and are not to be used in any constitutional sense or right for the purpose of punishing any man for a crime committed before he becomes a member of the House or in case of a civil officer as just cause of impeachment; but we agree to the analogy stated by the learned Committee on Credit Mobilier in its so far perfect. Both are alike remedial, neither punitive.

We have, therefore, come to the opinion that so far as receiving and holding an interest in the Credit Mobilier stock is concerned there is nothing in the testimony submitted to us which would warrant impeachment in the case of the Vice-President.

In view of all the circumstances, your committee do not deem that we are now required to make any further inquiry under the resolution referred to us, and therefore report back the same and ask to be discharged from the further consideration thereof, and that the same do lie upon the table.

JNO. A. BINGHAM.
B. F. BUTLER.
CHAS. A. ELDREDGE.
J. W. PETERS.
L. D. SHOEMAKER.
D. W. VOORHEES.

I dissent from the report, but I concur in the recommendation to discharge the committee for want of time to make further investigation, and for the reason expressed in views submitted herewith.

CLARKSON N. POTTER.

February, 24, 1873.

I concur in the conclusions of the foregoing report so far as the same has reference to the question of impeachment. I do not feel called upon by the resolution submitted by the House to this committee to express any opinion in regard to the power of the House to expel for acts committed before election, and express no opinion in relation thereto.

J. M. WILSON.

Mr. Butler, of Massachusetts, rose.

Mr. Potter: "I desire to submit a report from a minority of the committee."

The Speaker: "That is reserved. The report presenting the views of the minority will now be read."

The Clerk read as follows:

I dissent from much of the committee's report, although I am constrained to consent to the recommendation that at this stage of the session they be discharged from the subject, but that is for the following reasons:

The resolution of the House expressly excluded all members of the House from the action of the committee. In effect, therefore, it is a direction to the committee to inquire whether, upon the testi-

mony referred to them, the impeachment or further investigation concerning Hon. Schuyler Colfax, Vice-President of the United States, is demanded of the House.

It would be manifestly unjust to impeach any man for false statements in giving the testimony thus referred to us without hearing him or further investigation. And at this stage of the session, with five other grave and pressing impeachment cases before the committee, such investigation is impossible.

So far, however, as the testimony referred to us charges Mr. Colfax with corruption, this is otherwise, that being the matter in issue in this investigation, and as to which Mr. Colfax both testified and adduced testimony and was heard.

But for the House of Representatives to impeach Mr. Colfax for that offense would be to impeach him without the possibility of trial. Within five days, during which the Senate will be necessarily engrossed by the most pressing legislation, Mr. Colfax's term of office will expire, and he will thereby cease to be liable to impeachment and to removal from office.

Nevertheless, while the impeachment would thus be necessarily futile, I might be disposed to insist upon it, but that, in recommending the House to impeach, the committee would necessarily assert the power of impeachment of a civil officer for crime committed before he entered upon his office.

That question is one of exceeding gravity, involving the most important considerations of the power of the Legislature and of the public good; and if now asserted, must be asserted without any precedent or settled authority—for there is absolutely no precedent upon the subject—and must be asserted on an occasion where no trial can result.

The difficulty of this question is not one of jurisdiction. The House has the jurisdiction in express terms. The Constitution declares the House of Representatives shall have the sole power of impeachment; and that removal from office shall follow impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors. Just so either House may expel a member with a concurrence of two-thirds of the body. And these powers the House has jurisdiction to exercise absolutely and without qualification, no matter how remote the offense, or how repented of, or how condoned. But for the House to impeach a high officer because, years before he entered such office, he had been an inebriate; or to expel a member because he could not write, would be a wanton and wrongful exercise of power; would be an exercise of power within its jurisdiction but without right.

The question then recurs: Can the House by any rightful exercise of its power impeach a civil officer for a crime committed before his induction into the office he holds?

Upon this most grave question I repeat there is absolutely no precedent either for or against the action.

The case of Blount, impeached in 1798, and of Peck, Chase, Johnson, and the other cases of impeachment, were for offenses committed during the term of office then still existing.

So the cases of expulsion—a power which in this respect I concede to be analogous to that of impeachment—furnish us no precedent. For the cases of expulsions from the Senate, like those of Blount, and Smith, and Bright; and the various cases of expulsions from the House, were all cases of expulsion for offenses committed during the existing term of office of the person expelled.

Even the practices of Parliament furnish in this respect no precedent. Wilkes's offense was committed after his election; and had it been otherwise, the subsequent action of Parliament in declaring their course in his case to be subversive of the rights of electors would make that case an authority against rather than a precedent for the power. I am aware that Blackstone says that by custom of Parliament

if a person "be elected to serve in the Commons, yet may the Commons upon complaint of any crime in such person, and proof thereof, judge him disabled to sit as a member." But this sentence, even if it means previous crime, was not in the first edition, and was added on the occasion of Wilkes's expulsion; and its authority fall with the subsequent action of Parliament as to that case.

In 1812 Walsh was expelled for having stolen £22,000, which offense was committed before his election. But he was expelled upon a record of his conviction obtained during that same session of Parliament. And as such expulsion can be maintained on the ground that the being convicted of felony was such a breach of good conduct during the term of office as to justify expulsion, even that case furnishes no precedent for the power, if the usage of Parliament was to control. And that it is not to control was declared by the Supreme Court in *Anderson vs. Dunn*, where the court say "the American legislative bodies have never possessed the omnipotence of Parliament, which may have led occasionally to the exercise of caprice under the specious appearance of merited resentment."

On the other hand, any precedent against the power is equally wanting. Marshall's case, in which the Senate refused, even upon his consent, to try him for an offense committed before his election, I understand to have proceeded upon other grounds; and in *Matteson's* second case, although the resolution for impeachment was rejected, it is impossible to say whether the rejection was because the offense was committed in a previous Congress, or because the previous Congress had proceeded against him for the offense. So in the case of Porter, where the House decided to admit him by a vote of 126 to 4, the debate shows that the case turned on the impropriety of excluding a man because of his opinions, not upon whether they had been expressed previous to his term of office.

If, having then no precedent to guide us, we turn to authority and opinion, we shall find the question equally unsettled.

In the Convention which framed the Constitution the original resolution provided for "impeachment or removal for malpractice or neglect of duty." (4 Elliott, p. 149.) During the debate as to impeachment of the Executive, Mr. Randolph said: "Should no regular punishment be provided it will be irregularly inflicted by tumults and insurrection;" while Dr. Franklin insisted upon impeachment as a substitute for "assassination," which, he said, "had been the previous practice in cases where the chief magistrate rendered himself obnoxious." (5 Elliott, pp. 341-342.) Later the language was changed to impeachment for treason, bribery, and maladministration; finally to "treason, bribery, and other high crimes, and misdemeanors." Much was said as to the President's being bribed to make improper treaties, corrupt negotiations with foreigners, and the like, but I have found no reference in the debates to any intention to impeach for offenses before entering upon the office.

Contemporary writings afford no better light. Hamilton treats of the power and the tribunal in the sixty-fifth and sixty-sixth numbers of the *Federalist*. Speaking of "the delicacy and magnitude of the trust," he says "that the jurisdiction extends to those offenses which proceed from the misconduct of public men, from the abuse or violation of some public trust. They are of a nature which may be denominated political, as they relate chiefly to injuries done immediately to the society itself."

In 1798 Jefferson wrote: "I see nothing in the mode of proceeding by impeachment, but the most formidable weapon for the purposes of dominant faction that ever was contrived. It would be the most effectual one of getting rid of any man whom they consider as dangerous to their views."

As the special committee say, none of the commentators limit the power to the time of the offense.

But on the other hand none assert it. They all, indeed, assert that the power is discretionary. But so far from asserting that it should be exercised for previous offenses, or from "accepting or seeming to rely upon Mr. Adams's exposition," Story expressly declares (section 805) the question to be unsettled and *sub judice*, and that he expresses no opinion thereon. Sargeant does not even refer to it in his statement of the Smith case. Rawle states the reverse (page 47), and I cannot find that Kent, or Duer, or Bayard, alludes to it.

Referring to the debates in Congress, we find that in Blount's case, Mr. Bayard and Mr. Harper maintained the power; Mr. Dallas and Mr. Ingersoll, denied it. In Smith's case, Mr. Adams and his committee maintained the power; Mr. Hillhouse denied it. In Matteson's case, Mr. Harris, Mr. Hughes, Mr. Jones, and Mr. Curtis, maintained the power; Mr. Seward, Mr. Stanton, Mr. Taylor, Mr. Nichols, Mr. Olin, Mr. Grow denied it. While lately the action of the Senate committee in the Caldwell case, in reporting that bribery vitiated the election of that Senator, instead of reporting a resolution expelling him for the bribery, would seem to indicate that they regarded the power at least as doubtful.

So that after ninety years this question is presented without precedent or settled authority, and that, too, under circumstances which, since the impeachment cannot possibly be followed by trial, our decision in favor of the power would be in effect the determination of an abstract question.

Considering, then, the question upon principle, it has been urged upon the one hand, with great force, in the language of Mr. Adams, as quoted by the special committee: "The power of expelling a member for misconduct results, on the principles of commonsense, from the interests of the nation that a high trust of legislation shall be invested in pure hands. When the trust is elective, it is not to be presumed that the constituent body will commit the deposit to the keeping of worthless characters. But when a man whom his fellow-citizens have honored with their confidence, on a pledge of a spotless reputation, has degraded himself by the commission of infamous crimes, which become suddenly and unexpectedly revealed to the world, defective indeed would be that institution which should be impotent to discard from its bosom the contagion of such a member."

On the other hand, it is to be remembered, the Constitution has defined the qualifications of the President, Senators, and Representatives, in respect of birth, age, citizenship, and residence. To these qualifications neither Congress nor any State has power to add other or further qualifications. It will be admitted that neither Congress nor any State, nor both together, can pass any valid law making freedom from crime, or good character, a qualification of or prerequisite to representation. Can either House, then, be at liberty by the exercise of its absolute power of discretion as to expulsion to create such an extra-constitutional qualification? If it be insisted that Representatives and Senators have a right, "in order to secure their own dignity and the just influence of the body," to expel from association with them a man guilty of infamous crimes before he came into office, no matter how exemplary his official behavior, may it not be answered that had the framers of the Constitution so intended they would have made good character and freedom from former crime a qualification to office. Where the former crime was known to the electors it is generally conceded, even by those who sustain the power, that it ought not to be ground for impeachment or expulsion; and the strongest case for the exercise of the power is, of course, the case put by Mr. Adams, where the former offense was not known, and where, therefore, the choice of the electors cannot be considered to be overthrown by the impeachment of the officer or the expulsion of the member. But even in the case of a former crime being unknown, the remedy of punishment by the ordinary tribunals, and the

disqualifications which would ensue from conviction, will remain. And remembering that no case for the exercise of the power claimed has, during the ninety years of this Government, ever before arisen, and that it now arises at a time when no conviction upon it is practicable, it is perhaps not too much to say that the danger to public liberty would be less in leaving a person in office whose conduct in such office is unexceptionable—but who was discovered to have been formerly guilty of a heinous crime—until he could be convicted by the ordinary tribunals of justice, or driven to resignation by the indignation of the people, than, by impeaching for him such offense, afford precedent and color to the majority to remove or expel for opinion's sake where necessary to secure complete control of the body, or to be rid of an obnoxious officer.

About this exercise of power men will be apt to decide according to their general views of the powers a Legislature should possess. According as they think with Mr. Adams, "that the institution would be defective which should be impotent to discard from its bosom the contagion of such a member until the sluggish steps of municipal justice could overtake his enormities," or remembering that too many cases have occurred in which, as Judge Story says, "whatever may have been the demerits of the accused, his final overthrow has been the result of political resentments and hatred far more than of any desire to promote public justice," may decide as they are disposed to think with Mr. Jefferson about the powers the Legislature should exercise.

For myself, I am generally disposed to support the narrowest views of the powers of the Legislature. The real source of legislative corruption grows out of the power of private and special legislation.

So long as the Legislature can create private corporations with extraordinary privileges, grant valuable franchises and monopolies, make great gifts of land, or bounty, or subsidy, just so long will Representatives be sent here, or be exposed to improper influence after they come here, to secure these favors. In some of the States private and special legislation has been forbidden by the fundamental law. I wish it were so forbidden in Congress, for then the inducement to corruption would be removed. "Where the carcass is, there will the vultures be also." And the dangers to the country in these regards will not, I fear, be prevented by the exercise of the power of impeachment for previous offenses.

Entertaining these views, I felt unwilling on the occasion of Whittemore's reelection to the Forty-first Congress to vote for his exclusion. And, in the case of Patrick Woods, I declared in the House that Congress possessed no such omnipotent power as Parliament; that its power to punish for a contempt was only the power necessary to preserve the body from indignity and interference; that the question in such cases was the right to and extent of the punishing power which the House may exercise on the principle of self-preservation.

That case was indeed not analogous to this, being the case of punishing for an assault on a member without the District; but it involved the same general considerations of the limits of the rightful exercise of the discretionary power given Congress. In that case the action of the House did not conform to my views, and subsequent reflection as well as certain authorities of which I have since learned have confirmed and strengthened them. One of these authorities arose from the action of the Legislative Assembly of Nova Scotia.

That Legislature was created by charter from the Queen, as our Congress is created by charter from the people. The charter gave no special power to the Legislature in respect of expulsion or commitment, while the provision in our Constitution has been considered not to confer any distinct power, but to limit an incidental and inherent power to the concurrence of two-thirds. That Legislature having punished one Kielly, he sued the Speaker of the

House, who pleaded the order of the House, which was sustained by the local courts, from which Kielly appealed to the Privy Council of Great Britain. The case was heard by the council, and such precedents for the action of the Assembly, both in the action of Parliament, and other colonial assemblies, appeared that the council ordered the case to be reheard, and it was accordingly reargued in 1843 before Lords Lyndhurst, Cottonham, Brougham, and Campbell, each of whom had been or subsequently became Lord High-Chancellor of England, and before Vice-Chancellors Shadwell and Wigram, Chief-Justices Vaughn and Denman, Lord Abinger, then Chief Baron of the Exchequer, Baron Parke, Mr. Justice Erskine, and Dr. Lushington.

In view of the extraordinary standing and character of these justices, I make this extract from their unanimous opinion, as delivered by Chief Baron Parke:

The whole question, says the court, is then reduced to this, whether by law the power is incident to every local Legislature.

The statute law on this subject being silent, the common law is to govern it; and what is the common law depends upon principle and precedent.

Their lordships see no reason to think that in the principle of the common law any other powers are given them than such as are necessary to the existence of such a body and the proper exercise of the functions which it is intended to execute. These powers are granted by the very act of its establishment. This is the principle which governs all legal incidents.

In conformity to this principle we feel no doubt that such an assembly has the right of protecting itself from all impediments to the due course of its proceeding. To the full extent of every measure which it may be really necessary to adopt to secure the free exercise of their legislative functions they are justified in acting by the principle of the common law. But the power of punishing any one for past misconduct as a contempt of its authority, and adjudicating upon the fact of such contempt, and the measure of punishment as a judicial body, irresponsible to the party whatever the real facts may be, is of a very different character, and by no means essentially necessary for the exercise of its functions by a local Legislature, whether representative or not. All these functions may be well performed without this extraordinary power, and with the aid of the ordinary tribunals to investigate and punish contemptuous insults and interruptions.

These powers certainly do not exist in corporate or other bodies assembled with authority to make by-laws for the government of particular trades, or united numbers of individuals. The functions of a colonial Legislature are of a higher character, and it is engaged in more important objects; but still there is no reason why it should possess the power in question.

It is said, however, that this power belongs to the House of Commons in England; and this, it is contended, affords an authority for holding that it belongs as a legal incident, by the common law, to an assembly with analogous functions. But the reason why the House of Commons has this power is not because it is a representative body with legislative functions, but by virtue of ancient usage and prescription. In some, the very exercise of the power with the sanction of the tribunals, and the acquiescence of the public for a long period of time, may raise a presumption that the power has been duly communicated by law. But in this case we have the simple question to decide, without usage, acquiescence, or statute authority.

In conclusion, therefore, I do not feel so clearly justified in holding, either upon principle, precedent, or authority, that Congress has the power to impeach a civil officer such as the Vice-President for crime committed before induction into such office, as to make me willing to recommend an impeachment for such an offense at a time when the impeachment cannot possibly be tried.

That the purchase from a man deeply interested in preventing legislation, and the holding by an officer so largely controlling legislation as a Vice-President, of shares of a company like the Credit Mobilier, earning enormous profits by an imposition upon Congress, and continuing such profits only through the absence of wholesome legislation, such purchase having been made at a price far below the market

value of the shares, and far below the returns promised and received therefrom, may well be an offense justifying impeachment, I do not doubt.

Beyond that, since no action can be taken upon any impeachment, it would be improper to express any opinion as to the facts established by the testimony referred to the committee. Common justice to a man just passing out of the reach of possible trial or acquittal forbids my here expressing an opinion about his guilt when I decline, for want of time for further investigation, to impeach him for misstatement and decline to impeach for corruption, because his alleged offense was committed before his term of office began, and it is now too late to try him upon that impeachment.

As to any guilt he must remain, as he is now, liable to the ordinary tribunals of the country and the judgment of the people. Their conclusion will be founded upon their own views. Against their final judgment we shall be alike powerless to save or to condemn. But we can, by an impracticable impeachment, admitting of no possible trial, and which can therefore add nothing to public condemnation or official purity, assert a power and establish a precedent which may come in time to be destructive of the rights of members, and thus dangerous to the liberties of the people.

CLARKSON N. POTTER.

Mr. Goodrich: "As a member of the Committee on the Judiciary, not concurring in the report, I desire that I may be permitted to submit a brief statement of the reasons for my dissent, such as I have had time to prepare. I had no opportunity to submit the remarks to the committee, for the reason that I had not time to prepare them before the committee adjourned."

To the Honorable House of Representatives:

The undersigned member of the Committee on the Judiciary that has had in charge the evidence taken by the so-called Poland committee in the Credit Mobilier investigation, with instructions to inquire whether any thing therein warrants articles of impeachment, or demands further investigation against or with reference to any officer of the United States not a member of this House, under the resolution of the House of the 20th instant, and the report of which thereon, by the majority of its members, has now been submitted, asks leave, in consideration of the importance of the subject involved, to express in this manner his dissent from the views which it advocates and adopts.

First, and more especially, he desires to dissent most emphatically from the principle it asserts that an officer of the United States or a member of this House is not liable either to impeachment or expulsion for any offense whatever, committed prior to the commencement of his term of office, during which the question of his impeachment or expulsion is

raised. Such a doctrine may be sufficiently protective to the officer, but is it so with reference to the more important interests of his constituency that may be involved? And, under this Government, it is to be borne in mind that offices are created, primarily, not for the benefit of the office-holders, but for the benefit of the constituency represented.

Suppose (what, in the future at least, may not be impossible to occur) a person should seek an election to this House or to the Senate of the United States, and should obtain it through the money and influence of some one or more of the wealthy corporations constantly asking for aid, by subsidies or otherwise, through legislation by Congress, upon the secret pledge of his vote and influence to promote the success of whatever measures such corporation or corporations might desire, can the right be denied of impeaching or expelling such person the moment he should take his seat under his purchased election, to carry out the corrupt bargain on his part to the detriment of the public interests, notwithstanding the bribery in the case actually took place before even his election to office? Or, in such case, suppose the secret pledge should be successfully concealed during the member's first term of office, and he should again be elected upon it, and should enter upon his second term, again to perform and carry out the corrupt agreement, and that then for the first time the fact of the bribery should come to light, can it be doubted that every consideration would demand his immediate impeachment or expulsion, the same as though the bribe had been received after, instead of before, his second term of office began?

Upon this illustration, and without undertaking to enter into a discussion of the question (as he has no opportunity to do), the undersigned is free to assert his full conviction that any and every offense may be made the ground either of impeachment or expulsion, even though committed before the officer's term of office began, provided the offense be one calculated to be continuing in its influence upon the member. The want of precedents for the exercise of such a power is urged by the majority of the committee in their report. I am by no means prepared to say there are none; on the contrary, one has lately occurred in my own State in the late impeachment of a judge of the Supreme Court in that State; and others, I feel quite confident, might be cited. But were precedents entirely wanting, under the broad provisions of the Constitution applicable to this case, I am, for one, prepared, in the interests of good government, to make one and plant it broadly in the history of the country for its purity and safety in the future.

I cannot concur in the report of the majority on other grounds, which it is needless here to set forth, as the ground already stated is so radically variant as to render my concurrence in it wholly impossible.

M. GOODRICH.

R

RANDALL, Rt. Rev. GEORGE MAXWELL, D. D., Missionary Bishop of the Protestant Episcopal Diocese of Colorado, having jurisdiction also in Wyoming and New Mexico, born in Warren, R. I., in 1810; died in Denver, Col., September 28, 1878. He graduated from Brown University in 1835, and was for some years a Unitarian clergyman. Having connected himself with the Episcopal Church, he was called to the pastorate of the Church of the Ascension, in Fall River, and, subse-

quently removing to Boston, became the rector of the Church of the Messiah, where he remained for a period of twenty-one years, exerting a wide influence over the affairs of the Church in that State. He was for some time editor of the *Christian Witness*, and was several times chosen deputy to the General Convention. In the years 1862 and 1865 he was elected secretary of the House of Clerical and Lay Deputies. Several of the productions of his pen have become extensively known. The

tract entitled "Why I am a Churchman" was widely circulated in the denomination. In 1865 Dr. Randall was consecrated Missionary Bishop of Colorado, etc., and his devotion to the extensive field appointed him was ardent and enthusiastic, enabling him to triumph over obstacles which to most men would have seemed insurmountable. In the organization of new churches at those points, where there was a rapid increase of population, he was usually in advance of all other denominations, and his zeal and energy in the establishment of schools and collegiate institutions was such as to command success. Jarvis Hall, at Denver, the first and so far the only collegiate institution in the Territory, which has received the grant of the university lands, was founded by him, and he was its chancellor till his death. He had also established a boys' school and a seminary for girls at other points in the Territory, and had done much for education in Wyoming and New Mexico. His death was undoubtedly hastened by his excessive labors.

RATTAZZI, URBANO, an Italian statesman, born at Alessandria, Italy, June 29, 1808; died in Frosinone, a small town in the old States of the Church, June 5, 1873. He belonged to a family already distinguished both as jurists and political leaders. He was educated at the College of Alessandria, and, having chosen the legal profession, was admitted to the bar at Turin, where he practised with great success until 1838, when he removed to Casale, where a new Court of Appeals had been established, in which he distinguished himself by his great legal attainments and his eloquence. He took no part in politics until 1848, when, after the revolution and the constitution granted by Charles Albert, he was sent by the College of Alessandria as their representative in the Chamber of Deputies at Turin, where he took his place among the ultra-Liberals. After the battle of Custoza, Charles Albert hastily formed a ministry, of which Rattazzi was a member, but this ministry lasted only eight days. On its downfall he became an active member of the opposition, of which Gioberti was the chief, until the success of his party, on the 15th of December, 1848, resulted in his selection as a member of the new ministry. This position he occupied until after the end of the armistice between Piedmont and Austria. The disastrous engagement at Novara, in March, 1849, finished the national struggle that began the previous year; the treacherous French expedition against the Roman Republic, and the return of the Pope, in 1850, were the concluding acts of the great revolution.

With the abdication of Charles Albert, Signor Rattazzi took his place in the Chamber as a Democrat among the opposition. In the course of time he became more conservative, ranking among the intelligent chiefs of the Left Centre, who demanded new reforms with moderation. He became successively Vice-President and President of the Chamber, and

shortly afterward he was made Minister of Justice in the cabinet of which Cavour, his former adversary, was the president in 1854. The reaction throughout Italy had been complete except in Piedmont, where the King kept faith with his subjects, and observed the constitutional forms conceded in 1848. The political aim of Rattazzi was to save for Piedmont as much liberty as possible in the midst of the general ruin of liberal constitutions, and he enjoyed, in consequence, a rare distinction as a patriot at this time. He was the author of the laws which effected, in Piedmont, the separation of Church and state. In 1856 he proposed a law for the abolition of religious orders. He retired from the ministry in 1858, and was succeeded by Cavour. Already in 1856 Cavour, in the Congress of Paris, had exposed the unavoidable danger of a continuance of Austrian and Papal rule, and strongly urged the withdrawal of French and Austrian troops from Italian soil. In the beginning of 1859, Victor Emmanuel proclaimed to the Sardinian Parliament his intention of actively engaging in the deliverance of Italy from Austria. Sardinia and France jointly prepared for war, which actually began in April of the same year. The late Emperor of France had reason to rejoice in the successes of Magenta and Solferino. They added to the stability of his Government by giving his subjects confidence in a fictitious prowess which it was so much to his interest to maintain. But it was not essential to the strength of the imperial dynasty to confer the boon of complete unity on Italy. Louis Napoleon was responsible for the abrupt and inconclusive Peace of Villafranca in July, 1859, by which a confederation of Italian states was proposed, with the Papal protectorate. The whole of Italy energetically rejected the scheme, and a few days after the treaty was signed Cavour was obliged to resign. He was succeeded by Rattazzi. The latter, however, only remained in office about six months. Knowing that the annexation of the duchies, whose sovereigns were in flight from the Lombard campaign, could only be purchased with the loss of Savoy and Nice, he was unwilling to agree definitely to annexation. His authority was undermined by Cavour, and he fell. Cavour was recalled to the presidency of the cabinet. In March, 1860, Victor Emmanuel assumed the title of King of Italy; the next day the duchies were incorporated with Sardinia, and six days later Savoy and Nice were ceded to France.

Toward the end of 1861 Signor Rattazzi was sent on a mission to Paris. Having returned to Italy in March, 1862, he was made President of the Council of Ministers, succeeding Signor Ricasoli, whose fall was brought about by the party of action. His accession to the ministry was expressive of the aspirations of the Italians for the possession of Rome and the desire to satisfy the conditions in favor of the Pope imposed by the French alliance.

From that time the policy of Rattazzi was of a character which cost him much of his popularity. He opposed the expedition of Garibaldi toward Rome, which, in August, 1862, resulted in the disaster which overtook the volunteers at Aspromonte. This course of the Government, which obtained no concession from France, turned the current of public opinion against him. At about the same time, he added to the suspicions with which he was regarded by marrying the somewhat noted Princess Marie de Solms, daughter of the Princess Letitia Bonaparte, and granddaughter of Lucien Bonaparte. This led to the supposition that a very close understanding subsisted between Rattazzi and the Government at Paris, and rendered him more unpopular with the Italians. He retired from office with all the ministers. He again returned to the head of affairs in 1867; but his ministry was only of short duration. Garibaldi undertook another expedition to Rome, and was defeated at Mentona, Rattazzi pursuing the same course as in 1862. Rattazzi was again obliged to resign, and, although he did not withdraw from politics, he no longer exercised a controlling influence on the policy of the Government. Under the Menabrea ministry he became once more the leader of the opposition, and the most eloquent exponent of its opinions. He continued in the opposition until his death, but the premier of the Italian ministry, Signor Lanza, was at his bedside, an anxious and tender friend, during his last hours, and a month later himself resigned his office.

RAUMER, FRIEDRICH LUDWIG GEORG VON, J. U. D., an eminent German historian and professor in the University of Berlin, born at Wörlitz, near Dessau, May 14, 1781; died in Berlin, June 14, 1878. He was the eldest son of the distinguished agriculturist Georg Friedrich von Raumer. He received his early education in the Joachimsthal Gymnasium at Berlin, and afterward pursued his studies in the Universities of Halle and Göttingen. In 1801 he became a *Referendarius*, the lowest rank in the judicial career in Prussia; the following year he was promoted to the position of *Assessor*, and in 1809 he received the office of Counselor in the ministry of Hardenberg. He attained the height of his ambition in 1811, when he was made professor at Breslau. He had already published four volumes: "Six Dialogues on War and Commerce," 1806; "The System of Taxation in England," 1810; "The Orations of Æschines and Demosthenes on the Crown," 1811, and "201 Emendations to the Arabian and Turkish Genealogical Tables," 1811. The careful research and profound learning displayed in the last two works, won him a high reputation among scholars. Prof. von Raumer visited Venice in 1815; the two following years, with the support of the Government, he undertook a more extensive journey through Germany, Switzerland, and Italy. Meantime he published: "Manual of Remarkable Pas-

sages from the Latin Historians of the Middle Ages," 1818; and "Autumn Voyage to Venice," 1816. In 1819 he was called to the Berlin University as Professor of Political Economy and History. The publication of his more important works began in 1821 with his "Lessons from Ancient History," which appeared in two volumes. Two years afterward he began the publication in six volumes of "History of the Hohenstaufens and their Times." The profundity of his genius first appeared in the latter of these works. He therein displayed the mature views of a statesman, and the liberality of a thorough and independent spirit. There was a happy combination of the school and the world, and the results of his scientific investigation were clothed in concise language. In his long life he published many more volumes, among which need only be mentioned here: "Letters from Paris and France in 1830," 2 vols., 1831; "Letters from Paris for the Preservation of Commentaries on the History of the XVIIth and XVIIIth Centuries," 1831, 2 vols.; "History of Europe from the End of the XVth Century," 10 vols., 1832-1858; "England in 1835-1841," 3 vols., 1836-1842; "Documents in the British Museum and the English Archives, throwing Light upon Modern History," 5 vols., 1836-'39; "Italy: Notices on the Knowledge of the Country," 2 vols., 1840; "The United States of North America," 2 vols., 1845; "Letters from Frankfort and Paris," 2 vols., 1849; "On the Historical Development of the Ideas of Law, State, and Politics," 1826; "On the Municipal Administration in Prussia," 1828; "Letters on Antiquities," "Miscellanies," 3 vols., 1852-'54; "Manual of Literary History," 4 vols., 1864-'66; etc., etc. In 1847 he delivered an address in honor of Friedrich II., but it was so badly received that he was obliged to resign his position as secretary and member of the Academy of Sciences at Berlin. This occurrence led to a demonstration of the people of Berlin, who elected him to the Municipal Council and the Parliament at Frankfort. His advanced age prevented him, since 1858, from any arduous labors.

REFORMED CHURCH. I. REFORMED CHURCH IN AMERICA.—The General Synod of this Church met at New Brunswick, N. J., June 4th. The Rev. A. P. Van Gilsen, D. D., was chosen president. On the first day of the session the synod as a body participated formally in the exercises connected with the dedication of the James Snyder Hall of the theological seminary at New Brunswick, and with the unveiling of the statue of the late James Snyder, the founder of the hall. The corner-stone of the Gardner A. Sage Library was also laid in connection with this occasion. The library building is to be fire-proof, with a capacity for 100,000 volumes, and will be made the depository of the archives of the General Synod.

Mr. Nicholas W. Vedder, of Utica, N. Y., had offered to the General Synod the sum of \$100,000 as the foundation of a lectureship, to be

known as the "Vedder Lecture on Modern Infidelity." The design of the proposed form was defined to be to secure five lectures each year on "the Present Aspect of Modern Infidelity, its Cause and Cure." As conditions, the donor required that the lecturer be elected by ballot by the General Synod each year for the ensuing year; that he be a member of the Reformed Church; that he deliver five lectures each year on the specified subject before the students of the college and theological seminary at New Brunswick; that he furnish a copy of the lecture to the president of the synod for publication, and that they be published by the Board of Publication of the Church, or by some other form if the Board decline, and that a copy of the work be given each student. The synod accepted the gift with the conditions, after making such proviso as should protect it against being held responsible for such unforeseen failures in securing the delivery and publication of the lectures as it might be beyond its power to prevent. The Rev. J. S. Hartley, D. D., and Prof. Tayler Lewis, were elected as lecturers for the first two years, with the understanding that hereafter each synod should choose the lecturer for the year succeeding its ecclesiastical term.

A committee on liturgy had been appointed by the General Synod held two years before. They reported that they had found two leading sentiments in the Church: one demanding a fuller liturgy; the other asking that the forms already in use be shortened. Their opposite views could not be harmonized into one plan. The committee therefore proposed to inclose in brackets certain parts of the forms, to indicate those which might be used or omitted at the discretion of the reader. The most important changes which had been made in the service were in the forms for marriage and the form for burial. A new office had been added, for the admission of baptized children into the full communion of the Church; also, one for the laying the corner-stone of a church.

On the subject of the revised constitution, it was reported that twenty-two classes, or four more than were necessary to secure its adoption, had approved it. It was, nevertheless, not declared finally adopted, on account of a supposed irregularity in the manner of submitting it to the classes, but was resubmitted, with a single amendment. A committee was appointed to prepare a history of the several departments of Christian work in which the Reformed Church has been engaged, to be used in connection with the anticipated celebration of the one-hundredth anniversary of American independence.

Corresponding delegates attended from the Northern and Southern General Assemblies of the Presbyterian Church, from the Independent (Presbyterian) Synod of Missouri, and from the General Synod of the Reformed Church in the United States, and explained the action which the bodies they respectively

represented had taken in favor of instituting closer relations with the Reformed Church in America. The subject of the action which should be taken in response to the salutations of these bodies was referred to a special committee. They made a report reviewing the relation in which the Reformed Church stood toward each of the corresponding bodies, and concluded that the choice of action lay between two modes: either to appoint a separate committee for each Church, or one large committee, which could be subdivided, as might be required. Feeling the importance of obtaining a report which should embrace the whole field, rather than several partial reports, each embodying only a limited line of thought, they proposed the following resolution, which was unanimously adopted:

Resolved, That a committee of fifteen, composed of ministers and elders, be appointed to take into consideration the whole subject of union, federal or organic, and confer with the committees appointed by the several Assemblies (North and South), and the Reformed (German) Church, and report at the next General Synod.

The committee was afterward increased to the number of twenty. The capital of the Widows' and Disabled Ministers' Fund was reported to be \$85,612. One thousand and ninety-six dollars had been added during the year. Two disabled ministers, one orphan, and seventeen widows, had been helped. Mr. James Snyder had bequeathed \$30,000 to this fund. The Board of Education was reported in debt to the amount of \$750. Two additional scholarships—the Mary Le Compte scholarship of \$3,000, and the James Peters scholarship of \$3,500—had been received. The receipts of the Board of Publication from churches and individuals were reported to have been \$10,853.32, and \$4,787.15 of this amount had been added to the Permanent Fund, making the working capital of that fund \$20,000. The receipts were \$853.32 more than those of the previous year. Fifty-six students were reported as under the care of the Board of Education. Six pupils had entered the ministry in 1872, and ten in 1873. The debt of the board was now \$6,000. The Committee on Domestic Missions reported that the board had been relieved of a debt of \$22,000, and had a balance in the treasury of \$728.44. Eighty-four ministers had ministered to as many churches. Six hundred and nine persons had made profession of faith in these churches. Four new churches had been organized, and eight churches, formerly helped by the board, had become self-sustaining. The Church Building Fund was represented as being in debt \$6,791.65.

The Committee on Foreign Missions reported that they had during the year paid off a debt of \$33,500. They estimated that \$59,000 would be required for the expenses of the ensuing year. The following table exhibits in detail the condition of the several missions under the care of this board:

MISSIONS.	China.	India.	Japan.	Total.
Stations.....	1	8	4	13
Out-stations.....	8	84	..	92
Missionaries.....	4	7	5	16
Assistant missionaries..	3	9	7	19

Communicants.....	598	738	39	1,398
Added on confession in 1872.....	50	66	26	142
Numbers in congregations.....	2,000	3,945	100	5,945
Dispensaries with beds.....	1	2	..	3
Patients treated in 1873.....	5,000	12,000	..	17,000

The Church in Japan is not denominational, but is one in which all the evangelical missions in that country have a common interest. The board have under their care nearly ten thousand Indians, at the Gila River Reserve, the Colorado agency, the Camp Verde and White Mountain Reserves. They had not, at the time of making their report, been able to send them a teacher or missionary. They recommended that two missionaries should be sent, as soon as possible, to support whom would require an annual outlay of \$4,000.

The following are the statistics of the Reformed Church, as published in connection with the proceedings of the General Synod for 1873:

CLASSES.	Churches.	Ministers.	Communicants.

The number of candidates for the ministry was 11; number of families connected with the Church, 41,244; number of baptisms of adults, 745; of infants, 4,177; number of catechumens' classes and Sunday-schools, 542; number of scholars in the same, 66,508. The amount of contributions for religious and benevolent purposes was \$276,830.32; for congregational purposes, \$1,057,430.30.

II. REFORMED CHURCH IN THE UNITED STATES.—The following is a summary, by district synods, of the statistics of the Reformed Church in the United States, for 1873:

DISTRICT SYNODS.	Ministers.	Congregations.	Members.	Members unconfirmed.
Ohio Synod (9 classes).....	174	294	20,705	12,438
Northwestern Synod (7 classes).....	120	213	13,332	10,929
Synod in the United States (8 classes).....	190	444	61,798	29,133
Pittsburg Synod (6 classes).....	58	132	10,009	7,908
Potomac Synod (5 ".....)	95	246	26,351	15,665
Total: 5 synods; 85 classes.....	535	1,230	124,195	76,133

Number of baptisms, 12,465; of confirmations, 7,497; of communicants, 110,551; of Sunday-schools, 1,044; of Sunday-school scholars, 64,588; amount of benevolent contributions, \$91,427.19.

The Board of Missions which was appointed by the General Synod of 1872 met at Harrisburg, Pa., in April, 1873. After adopting a constitution, and making provision for obtaining an act of incorporation, it passed the following resolutions:

Resolved, That, in the opinion of this board, Japan presents the most promising field for missionary effort on our part, and we, therefore, instruct the Executive Committee to obtain the information necessary to enable us to make an intelligent selection of a base of operations.

Resolved, That the Executive Committee take immediate steps to receive suitable persons to engage in the missionary work.

The Reformed Church in the United States has no missionaries in the foreign field under its immediate control. It has, however, been indirectly represented for a number of years by a foreign missionary in Syria. Formerly, the contributions of the Church for foreign missions were appropriated to his support. More recently, however, they have mainly applied to the German Evangelical Missionary Society of New York, which has two missionaries in India, both of whom are ministers in connection with the synod of the Reformed Church. These missionaries have been laboring in connection with the Chutteesgruh Mission, in India. Their last report states that fifty-six persons had been added to the Church by baptism. Their parochial school at the station contained twenty-eight pupils (nineteen boys and nine girls). They had besides a training-school with eleven young men, four village schools with about sixty-two pupils, and a sewing school. The corner-stone of a new

church, which was to cost 8,000 rupees, had been laid.

The Society for the Relief of Disabled Ministers and their Widows (connected with the Eastern Synod, or Synod of the United States) had, at the time of making its last report, an invested fund of \$11,870. Two disabled ministers and eight widows of deceased ministers were receiving a yearly appropriation of fifty dollars each.

The following are the literary and theological institutions of this Church: Heidelberg College, Tiffin, Ohio; Franklin and Marshall College, Lancaster, Pa.; Mercersburg College, Mercersburg, Pa.; Catawba College, Newton, N. C.; Clarion Collegiate Institute, Reinnersburg, Pa.; Palatinate College, Myerstown, Pa.; Arsinus College, Collegeville, Pa.; Juniata Collegiate Institute, Martinsburg, Pa.; Calvin Institute, Cleveland, Ohio. Blairstown Academy, Blairstown, Iowa; Eastern Theological Seminary, Lancaster, Pa.; Western Theological Seminary, Tiffin, Ohio; Shelby College, Shelbyville, Ill.; Allentown Female College, Allentown, P.; Mission-House, Howard's Grove, Wis.; St. John's Select School, Petersburg, Md. The Orphan Home at Komeisdorf, Pa., has ninety-eight orphans under its care, and the one at Butler, Pa., has forty-five orphans. Eleven English and five German periodicals are published in the interests of the denomination.

III. REFORMED CHURCH OF FRANCE.—A meeting of the Synod of the Reformed Church of France, designated as the second session of the First Synod was held in the Church *du Saint-Esprit*, Paris, beginning November 20th. At the opening a letter was presented, signed by the rationalistic members, declining to take part in the proceedings unless the majority would declare that the Confession of Faith adopted at the previous session was obligatory only upon its authors and adherents, and that it could neither directly nor indirectly be forced upon any of the members, present or future, pastors or laymen of the Church. It was signed by Pastor Vignié, of Nîmes, president of the meeting of the "Liberal" members of the synod. A written reply was sent, to the effect that while always ready to adopt in the course of its proceedings such ameliorations as were proved to be necessary, the synod could not forsake the principles it had proclaimed, and which it regarded as of the essence of the faith of the Reformed Church; that it had taken, and was resolved to take, no decision contrary to the liberty of the churches, or the independence of any man's conscience; but that it maintained, according to its former votes, its declaration of faith. The number of rationalistic members who withdrew was forty-two. Sixty-two members were left to transact the business of the synod. Three propositions were discussed and adopted: 1. That permission should be asked, without delay, from the Government to publish the Declaration of

Faith of June 28, 1872; 2. That permission should be asked to promulgate the decision of July 6, 1872, according to which all candidates for the sacred ministry are required, before their ordination, to declare that they adhere to the faith of the Church, such as it is stated by the General Synod. 3. That all that refers to the periodicity and powers of the General Synod shall be submitted to the approval of the Government. It was decided that the General Synod should meet every year; that it should have power to settle all conflicts which may arise between the ecclesiastical bodies, and enact general rules relative to worship, discipline, doctrinal teaching, organization, and church administration. The members of the General Synod are to be appointed by the district synods. The question as to the religious qualifications that should be required of electors was discussed, and the decision of the previous meeting of the synod confirmed, except that the limit of age was changed from twenty-five years to thirty.

After the adjournment of the synod, a decree was issued by the French Government commanding the presidents of the consistories to order an election for members of the various church courts, to be held in April, 1874, so that time might be given to correct the voting lists, according to the rule prescribed by the synod. The French Government confirmed the synod's declaration of faith early in 1874.

A petition was presented to the synod from members of the Church at Bolbec, asking it to interfere in behalf of the establishment of religious liberty in the army. The special object sought was the relief of Protestant soldiers from the obligation to take part in Roman Catholic processions and bow to the Host. A resolution was adopted in response, expressing the sympathy of the synod with the petitioners, and charging the permanent commission "to take steps with the Government for obtaining religious liberty in the army."

REFORMED EPISCOPAL CHURCH.—The events which led to the withdrawal of Assistant-Bishop Cummins, of the Diocese of Kentucky, from the Protestant Episcopal Church, have been narrated in the article "PROTESTANT EPISCOPAL CHURCH." The following is the full text of the letter in which he announced his resignation of the office of Assistant Bishop of Kentucky, and his withdrawal from the Church:

NEW YORK, November 10, 1878.

To the Right Reverend Benjamin Bowditch Smith, D. D., Bishop of the Protestant Episcopal Church in the Diocese of Kentucky.

RT. REV. AND DEAR BISHOP: Under a solemn sense of duty, and in the fear of God, I have to tell you that I am about to retire from the work in which I have been engaged for the last seven years in the Diocese of Kentucky, and thus to sever the relations which have existed so happily and harmoniously between us during that time.

It is due to you, and to my many dear friends in

the Diocese of Kentucky and elsewhere, that I should state clearly the causes which have led me to this determination:

1. First, then, you well know how heavy has been the trial of having to exercise my office in certain churches in the Diocese of Kentucky where the services are conducted so as to symbolize and to teach the people doctrines subversive of the "truth as it is in Jesus," and as it was maintained and defended by the reformers of the sixteenth century.

On each occasion that I have been called upon to officiate in those churches I have been most painfully impressed by the conviction that I was sanctioning and indorsing by my presence and official acts the dangerous errors symbolized by the services customary in ritualistic churches.

I can no longer, by my participation in such services, be "a partaker of other men's sins," and must clear my own soul of all complicity in such errors.

2. I have lost all hope that this system of error now prevailing so extensively in the Church of England, and in the Protestant Episcopal Church in this country, can be or will be eradicated by any action of the authorities of the Church Legislature or Executive. The only true remedy, in my judgment, is the judicious yet thorough revision of the Prayer Book, eliminating from it all that gives countenance, directly or indirectly, to the whole system of sacerdotalism and ritualism: a revision after the model of that recommended by the commission appointed in England under royal authority in 1689, and whose work was indorsed by the great names of Burnet, Patrick, Tillotson, and Stillingfleet, and others of the Church of England—a blessed work, which failed, alas! to receive the approval of Convocation, but was taken up afterward by the fathers of the Protestant Episcopal Church in the United States, and embodied in the Prayer Book of 1785, which they set forth and recommended for use in this country.

I propose to return to that Prayer Book, sanctioned by William White, and to tread in the steps of that saintly man, as he acted from 1785 to 1789.

3. One other reason for my present action remains to be given. On the last day of the late conference of Evangelical Alliance, I participated in the celebration of the Lord's Supper, by invitation, in the Rev. John Hall's church, in the city of New York, and united with Dr. Hall, Dr. Wm. Arnot, of Edinburgh, and Prof. Dörner, of Berlin, in that precious feast. It was a practical manifestation of the real unity of "the blessed company of all faithful people" whom God "hath knit together in one communion and fellowship, in the mystical body of his Son Jesus Christ."

The results of that participation have been such as to prove to my mind that such a step cannot be taken by one occupying the position I now hold without sadly disturbing the peace and harmony of "this Church," and without impairing my influence for good over a large portion of the same Church, very many of whom are within our own diocese.

As I cannot surrender the right and privilege thus to meet my fellow-Christians of other churches around the table of our dear Lord, I must take my place where I can do so without alienating those of my own household of faith.

I therefore leave the communion in which I have labored in the sacred ministry for over twenty-eight years, and transfer my work and office to another sphere of labor. I have an earnest hope and confidence that a basis for the union of all evangelical Christendom can be found in a communion which shall retain or restore a primitive episcopacy and a pure Scriptural liturgy, with a fidelity to the doctrine of justification by faith only. *Articulus stantis vel cadentis Ecclesie*, a position toward which the Old Catholics in Europe are rapidly tending, and which has already taken a definite form in the "Church of Jesus," in Mexico.

To this blessed work I devote the remaining years

of my life, content, if I can only see the dawn of that blessed day of the Lord.

I am, dear bishop,

Faithfully yours in Christ,

GEORGE DAVID CUMMINS.

On the 15th of November Bishop Cummins circulated privately a call for a meeting to be held on the 2d of December, at Association Hall, in the city of New York, for the purpose of organizing an Episcopal Church on the basis of the Prayer Book of 1785, known as "Bishop White's Prayer Book." It was especially stated in the call that the meeting would be for the purpose of organizing, not of discussing the expediency of organizing. A considerable number of laymen and ministers, formerly connected with the Protestant Episcopal Church, met at the appointed time and place. Among those who were especially named in the published reports as present, were the Rev. Charles Edward Cheney, of Chicago; the Rev. Mason Gallagher, of New Jersey; the Rev. Marshall B. Smith, of New Jersey; the Rev. Mr. Bourne, of New York; Messrs. John S. Dake, James L. Dawes, Frederick A. Pell, Audley Brown, Frederick Wright, Albert Crane, of Illinois; Colonel B. Ayer, of New Jersey. The meeting was opened by Bishop Cummins reading the circular letter in response to which it was held. This letter set forth the chief points which distinguish the Prayer Book of 1785 from the one in use in the Protestant Episcopal Church, in the following words:

1. The word "priest" does not appear in the book, and there is no countenance whatever to the errors of sacerdotalism. 2. The baptismal offices, the confirmation office, the Catechism, and the order of the administration of the Lord's Supper, contain no sanction of the errors of Baptismal Regeneration, the Real Presence of the Body and Blood of Christ in the elements of the Communion, and of a sacrifice by a priest in that sacred feast.

The following resolution of organization and declaration of principles having been referred to a committee and reported back, were adopted:

Resolved, That we, whose names are appended to the call for this meeting as presented by the presiding bishop, do here and now, in humble reliance upon Almighty God, organize ourselves into a Church, to be known by the style and title of "The Reformed Episcopal Church," in conformity with the following Declaration of Principles, and with the Right Rev. George David Cummins, D. D., as our presiding bishop.

DECLARATION OF PRINCIPLES.

I. The Reformed Episcopal Church, holding the faith once delivered to the saints, declares its belief in the Holy Scriptures of the Old and New Testaments as the word of God, and the sole rule of faith and practice; in the creed commonly called the Apostles' Creed; in the divine institution of the sacraments of Baptism and the Lord's Supper, and in the doctrines of grace substantially as they are set forth in the Thirty-nine Articles of religion.

II. This Church recognizes and adheres to Episcopacy, not as of divine right, but as a very ancient and desirable form of church polity.

III. This Church, retaining a Liturgy which will not be imperative or repressive of freedom in prayer,

accepts the Book of Common Prayer as it was revised, proposed, and recommended for use by the General Convention of the Protestant Episcopal Church, A. D. 1785, reserving full liberty to alter, enlarge, abridge and amend the same as may seem most conducive to the edification of the people, provided that the substance of the faith be kept entire.

IV. This Church condemns and rejects the following erroneous and strange doctrines, as contrary to God's Word:

1. That the Church of Christ exists only in one order or form of ecclesiastical polity.

2. That Christian ministers are priests in another sense than that in which all believers are a "royal priesthood."

3. That the Lord's Table is an altar on which an oblation of the Body and Blood of Christ is offered anew to the Father.

4. That the presence of Christ in the Lord's Supper is a presence in the elements of bread and wine.

5. That regeneration is inseparably connected with baptism.

The president then declared the Church formally organized, under the style and title of the "Reformed Episcopal Church." It was determined that the general meeting of the Church should be called the "General Council of the Reformed Episcopal Church," and that it should be the representative of the entire Church, to be incorporated under that name, and under that name to hold and dispose of temporalities. The General Council is to be held on the second Wednesday of May of each year. A standing committee of five ministers and five laymen, and a committee of finance of three laymen were appointed, and a layman was appointed treasurer.

It was also resolved:

That the presiding bishop, with such other bishops as may be ordained or received prior to the first annual Council, together with the Standing Committee and Secretary, and the Committee on Finance, and Treasurer, shall form a temporary Executive Committee, with power to frame a constitution and a system of laws for the government of this Church, and to consider the proposed alterations in the Prayer Book of 1785, and make such other arrangements as to them may seem advisable, to be reported to the next General Council, to be by that council confirmed or altered, and that, in the mean time, the presiding bishop, with the written consent and advice of three-fourths of the Executive Committee, shall have power to act, and to authorize action under said constitution and laws, and alter Prayer-books and other arrangements, until the same shall be altered by a majority vote of both orders at a subsequent General Council; provided that such alteration shall have no retroactive effect.

The presiding bishops and the standing committee together were authorized to prepare forms for the ordination of ministers and any other officers required before the next General Council. The following provisional rules were adopted:

1. Ministers, in good standing in other churches, shall be received in this Church on letters of dismission, without reordination, they sustaining a satisfactory examination on such points as may hereafter be determined, and subscribing to the doctrine, discipline, and worship of this Church.

2. All ordinations of bishops and other ministers in this Church shall be performed by one or more bishops, with the laying on of hands of the presbytery.

3. Communicants in good standing in other evangelical Churches shall be received on presentation of a letter of dismissal or other satisfactory evidence.

The Rev. Charles Edward Cheney, of Chicago, was elected an additional bishop, to be styled "Missionary Bishop of the Northwest." During the meeting Bishop Cummins delivered an address relating the history of the Prayer Book of 1785, and setting forth with some particularity the points of difference between it and the Book of Common Prayer.

The Rev. Charles Edward Cheney having, after due consideration of the subject decided to accept the episcopal office, was ordained bishop at Christ Church, Chicago, December 14th, by Presiding Bishop Cummins, assisted by the Rev. Messrs. Marshall B. Smith, Anson Gallagher, B. B. Leacock, W. V. Feltwell, and Charles H. Tucker.

The organization of congregations and churches in connection with the Reformed Episcopal Church was purposely delayed, in order to give time for the preparation and publication of an edition of the Prayer Book of 1785; consequently, the Church made but little visible growth during the few days of the year that remained after the organization was effected. Bishop Cummins, however, stated privately that he had letters from twenty-five or thirty clergymen in addition to those who were present at the meeting of organization, who desired to come into the communion of this Church so soon as congregations could be found for them. He also said that he had received letters from Baptist, Methodist, and Presbyterian clergymen, who desired to join the movement. Several Episcopal ministers withdrew from the Protestant Episcopal Church before the close of the year, to join the Reformed organization, and a church was formed in Peoria, Ill., during December.

The Executive Committee, appointed by the General Council of December 2d, subsequently adopted the following Constitution for the Reformed Episcopal Church, to be in force until the meeting of the General Council in May, 1874:

ARTICLE I. There shall be a General Council of the Reformed Episcopal Church, on the second Wednesday in May, in each year; and in such place as shall be determined by the council; and in case there should be an epidemic disease, or any other good cause to render it necessary to alter the place fixed on for any such meeting of the council, the bishop presiding shall have it in his power to appoint another convenient place (as near as may be to the place so fixed on) for the holding of such council; and special meetings may be called at other times in the manner hereafter to be provided for; and six ministers and six lay members shall be present before they shall proceed to business, except that three ministers and three lay members shall be sufficient to adjourn; and in all business of the council freedom of debate shall be allowed.

ART. II. The General Council shall consist of all the bishops and presbyters of the Church, with lay representatives who shall be communicants and members of the congregation they may represent. The lay representation shall consist of one deputy for each fifty communicants in each congregation now

in union with, or hereafter admitted to union with this Church: *Provided*, That each congregation shall be entitled to one deputy. The deputies shall be chosen by the respective congregations.

Provided, also, that all those persons who were present, and as signers of the original call, voted in the first General Council of this Church, shall be entitled to a seat and a vote in the General Council until otherwise ordered.

In all questions, when required by five members, the vote shall be by orders; and in such case the concurrence of both orders shall be necessary to constitute a vote of the Council.

ART. III. The bishops of this Church shall not sit as a separate House, nor exercise a veto-power, but shall be members *ex-officio* of the General Council, and, when a vote is taken by orders, they shall vote with the presbytery.

The President of the General Council shall be chosen by ballot from among the bishops, to serve for one year; and during his term of office he shall be the presiding bishop of this Church: *Provided*, That such annual election shall not preclude the election of the same bishop to that office.

ART. IV. The bishops of this Church shall be chosen or received agreeably to such rules as shall be fixed by the General Council; and their jurisdiction, powers, and duties, shall be such as the General Council may hereafter define; and any bishop of this Church may ordain, confirm, or perform any other act of the episcopal office, at the request of any bishop, or any Church destitute of a bishop.

ART. V. Any congregation not now represented, may at any time hereafter be admitted to union with this Church, and be entitled to representation, in accordance with Article II., on acceding to this Constitution and to the doctrine, discipline, and worship of this Church.

Six or more adjoining congregations in union with this Church, with six or more presbyteries of this Church, may associate themselves into a synod (taking its name from a town or city), under the jurisdiction of a bishop of this Church. Each synod shall be composed of all the ministers of this Church within its limits, and such number of lay deputies from each congregation as the synod may determine; and each synod shall have power to frame a constitution and canons for its own government, not conflicting with the constitution and canons of the General Council.

ART. VI. The mode of trying bishops and other ministers shall be provided by the General Council. The court for that purpose shall be composed of bishops and presbyteries; and the General Council shall be a court for final appeal. The sentence, in any case, shall be pronounced by a bishop of this Church.

ART. VII. No person shall be ordained to the Holy Ministry, or be received as an ordained minister from another Church, until he shall have been examined by a bishop and by two presbyters, and shall have exhibited such testimonials and other requisites as the canons of this Church may direct. Nor shall any person be so ordained, or received, until he shall have subscribed the following declaration:

I do believe the Holy Scriptures of the Old and New Testaments to be the Word of God, and to contain all things necessary to salvation; and I do solemnly engage to conform to the doctrine, discipline, and worship of the Reformed Episcopal Church, so long as I shall continue a minister thereof.

The ecclesiastical parity of presbyters of this Church, whether episcopally or otherwise ordained, shall be maintained as a fundamental principle of the Reformed Episcopal Church.

ART. VIII. A Book of Common Prayer, Administration of the Sacraments, and other Rites and Ceremonies of this Church, Articles of Religion, and Forms for Receiving, Ordaining, and Consecrating Bishops and other Ministers, when established by

this or a future General Council, shall be used in this Church, at such times, and with such liberty, as the canon on this subject shall provide; but no canon shall make its use imperative on all occasions, nor forbid the use of extempore or other prayer at suitable times. No alterations or additions shall be made in this Book of Common Prayer, or other Offices of this Church, or the Articles of Religion, unless the same shall be proposed in one General Council, and adopted at the subsequent General Council: *Provided*, That such alterations or additions may, by unanimous consent, be made by any General Council.

ART. IX. No church decorations, ornaments, vestments, or ceremonies, calculated to teach, either directly or symbolically, that the Christian ministry possesses a sacerdotal character, or that the Lord's Supper is a sacrifice, shall ever be allowed in the worship of this Church; nor shall any communion-table be constructed in the form of an altar.

ART. X. This Constitution shall be unalterable, unless the proposed alterations shall be first submitted to one General Council, and finally ratified or agreed to in the ensuing General Council: *Provided*, That such alterations may be made at any General Council by unanimous consent.

GEORGE DAVID CUMMINS, D. D., the founder and presiding bishop of the Reformed Episcopal Church, was born in the State of Delaware, December 11, 1822. He was educated at Dickinson College, Carlisle, Pa., and graduated from that institution in 1841. He entered upon the study of theology with Robert Emory, a Methodist minister, and spent two years as a preacher on trial in the Methodist Episcopal Church. He afterward joined the Protestant Episcopal Church, and was ordained a deacon in that Church by Bishop Lee, of Delaware, in October, 1845, and a priest by the same bishop, in July, 1847. He was successively appointed to the following parishes: Christ Church, Norfolk, Va., St. James's Church, Richmond, Va., Trinity Church, Washington, D. C., St. Peter's Church, Baltimore, Md., and Trinity Church, Chicago, Ill. While in charge of the last-named parish, he was elected Assistant-Bishop of Kentucky, and was consecrated to that office in Christ Church, Louisville, November, 1866. He officiated in the capacity of Assistant Bishop with satisfaction to the Church and acceptably to the people of the diocese, until the events occurred which led to his withdrawal from the Church. Bishop Cummins is particularly distinguished as a preacher of polished diction and persuasive power.

RHODE ISLAND. After a session of eleven weeks, the General Assembly, sitting in Providence, adjourned. The legislation of the session was of local importance, and more noticeable for the measures that were not passed. The question of selecting a site for the new State-House, which had occupied no little time of the session, was not decided. The proposition to take the West Burying-Ground, in Providence, as a suitable site, after having been passed unanimously in the Senate, failed in the House by one vote. The bill to make public libraries a part of the public-school system of the State, was defeated in the Senate; and the proposition to apply to railway uses the

\$100,000 forfeit of the Boston, Hartford & Erie Railroad failed, because the House did not act upon the Senate's resolution. The State Board of Valuation was continued another year, to complete its work, and there was voted a State tax of twenty cents on the hundred dollars of ratable property, according to the valuation of 1872.

The General Assembly completed its May session at Newport, on the 30th of May, and adjourned to meet in Providence, on the third Tuesday of January, 1874.

The Democratic State Convention assembled in Providence on the 18th of March, and nominated Charles R. Cutler, of Warren, for Governor; Samuel H. Wales, of Providence, for Lieutenant-Governor; William J. Miller, of Bristol, for Secretary of State; George N. Bliss, of East Providence, for Attorney-General; and William P. Congdon, of Newport, for General Treasurer. Benjamin G. Chace subsequently became the candidate for Governor, and Charles E. Gorham for Secretary of State. The following declaration of principles was adopted:

Resolved, That this convention condemns and denounces the action of the majority of the Senators and Representatives of the Forty-second Congress in passing the measure increasing the salaries of members of Congress and others as a national dishonor, and a disgraceful robbery of the public funds.

Resolved, That the recent developments in Congress, and the action of Congress thereon, in reference to the Credit Mobilier plot demonstrated to the people of this nation the real high sense of purity, morality, and integrity entertained by the representatives of the party in power at Washington, and calls for the hearty denunciation of all honest citizens.

Resolved, That we sympathize with the situation of the people of the State of Louisiana, and deplore the military rule and reign of terror inaugurated and sustained by the Federal "Ku-klux," and we hereby reaffirm the time-honored principle of the Democratic party, that a majority of the loyal people of each State have the authority to exercise the inalienable right guaranteed to them by the Constitution of the United States.

Resolved, That the naturalized citizens of the United States ought to have the same civil and political rights as the native-born citizen; and that the constitution of the State of Rhode Island, requiring as it does the naturalized citizen to own real estate as a qualification for the exercise of the right of suffrage, is an invidious distinction and entirely unjust, and should be so amended as to give equal rights to all.

The Republican Convention had assembled a few days previously and nominated the following ticket: for Governor, Henry Howard, of Coventry; for Lieutenant-Governor, Charles C. Van Zandt, of Newport; for Secretary of State, Joshua M. Addeman, of Providence; for Attorney-General, Willard Sayles, of Providence; for General Treasurer, Samuel Clark, of Lincoln.

The following resolutions were made part of the proceedings of the convention:

Resolved, That this convention commends the action of the Senators and Representatives in Congress from this State in opposing the measure to increase the salaries of members of Congress and others, and thereby denounces the passage of this bill by the

Forty-second Congress as a national dishonor and a disgraceful robbery of the public funds.

Resolved, That we appeal to the constituents of those members who assisted in the consummation of this great wrong to spare the country the mortification of seeing those individuals occupying seats in Congress after their present term of office expires.

On the 19th of March a Prohibitory State Convention was held in Providence, and was attended by 155 delegates, representing 24 towns. The convention nominated for Governor, Henry Howard; for Lieutenant-Governor, Latimer W. Ballou; for Secretary of State, Joshua M. Addeman; for Attorney-General, Willard Sayles; and for General Treasurer, Henry Goff. The following resolutions were adopted:

Resolved, That the ballot-box being the means through which a citizen is permitted to effect the government under which he lives, he is bound to use it for an expression of his opinion on a political question, as the indiscriminate sale of intoxicating beverages.

Resolved, That the system of licensing the sale of intoxicating liquors as a beverage, is at war with the material prosperity of the State, and opposed to morals and religion; that it does not, in reality, check the indulgence in what it professes to keep in subjection, notwithstanding a large sum of money may be paid by each license; that it does discriminate in favor of the wealthy dealers in liquors, and tends to demoralize every citizen.

Resolved, That we hail with much satisfaction the introduction of the temperance question in the sphere of national legislation, and we call upon Senators and Representatives in Congress from Rhode Island to give their influence and votes in favor of prohibition of the traffic in intoxicating liquors, as a beverage, in the Territories of the United States and the District of Columbia; also, for a National Commission of Inquiry concerning the liquor-traffic, and the results of restrictive and prohibitory legislation for the suppression of intemperance.

The election, held on the 2d of April, resulted in the success of the Republican ticket. Henry Howard, who was the candidate of the Republican party and had also been indorsed by the Prohibitory Convention, received a majority of 5,870 in a total vote of 18,442; 8,786 votes were cast for Mr. Chace, the Democratic nominee. The political complexion of the State Legislature chosen is as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans.....	26	55	83
Democrats.....	8	17	25
Republican majority.....	20	38	58

The bonded debt of the State, April 30, 1873, was as follows:

Bonds of October 1, 1861, payable 1881.....	\$500 00
Bonds of Sept'r 1, 1862, payable 1882.....	1,019,000 00
Bonds of April 1, 1863, payable 1883.....	265,000 00
Bonds of July 1, 1868, payable 1893.....	668,000 00
Bonds of August 1, 1864, payable 1894.....	746,000 00
Total.....	\$2,688,500 00

The General Treasurer has purchased during the year State bonds to the amount of \$75,000, reducing the State debt to \$2,563,500.

The receipts from the usual sources of revenue from April 30, 1873, to November 30,

1873, were \$191,358, making with the balance of \$161,760 in the Treasury at the former date, a total of \$353,118. The disbursements during the same period were \$323,020, leaving a balance of \$30,097 in the Treasury November 30, 1873.

The total valuation of the several cities and towns, as reported by the State Board of Valuation, is \$328,580,559, including \$243,658,190 real and \$84,872,369 personal estate.

The amount appropriated by the towns in 1873 for school purposes, in addition to the amount expended for buildings, was \$304,685, which represents an increase during ten years of \$205,569, while there has been a slight decrease within that period of the average attendance of pupils. The increase in the length of the school year to thirty-six weeks, the increase in teachers' salaries, the improvements made in school-houses and furnishings, are among the reasons for this increase in school expenditures in ten years; while the existence of a large number of private and evening schools has done much to draw from the attendance upon the public day-schools.

A large portion of Governor Howard's message to the Legislature of 1874 is devoted to the subject of institutions for savings. The opinion seems to be general that the laws governing these institutions need immediate reforming. It has been suggested that a maximum rate of interest on deposits should be established by law; that receiving large amounts from corporations and others should be discouraged by limiting the amount which any bank may receive from one depositor; and that the practice, prevalent among some banks, of sending funds to remote States in order to obtain a high rate of interest, should be prohibited. It is the opinion of Governor Howard that "the provisions of the law in regard to State supervision are wholly inadequate. Inasmuch as the appointment of a special committee to examine the condition of a bank, of itself tends to discredit and injure such institution, it follows that examinations are not likely to take place until there has been some marked violation of law or glaring mismanagement. In practice, therefore, the law is remedial only, when it should be preventive as well. A commission of annual appointment, the duties of which should be to make occasional visits of inspection to all savings and State banks, would be much more likely to discover vicious and imprudent management."

There are now thirty-seven savings institutions in the State. Notwithstanding the financial troubles of the latter part of the year, the deposits in the savings-banks of the State increased during the year more than \$4,000,000, the aggregate at the end of the year being \$46,617,188. The undivided profits amount to \$1,780,430 more. The number of depositors reached 93,124, an increase during the year of 4,460; the average amount due each was \$500.59, an increase of \$20. It is claimed to

be the largest average shown by any of the States. The average rate of dividend has been $7\frac{1}{2}$ per cent. per annum.

Efforts have been made by the Commissioners of Fisheries to reestablish within the borders of the State this important source of wealth. Shad and salmon have been placed in the Blackstone, Pawtuxet, and Pawcatuck rivers, and the commissioners hope to make an arrangement with the proper authorities of Massachusetts, whereby Warren River can also be used for this purpose. Black bass have been placed in the ponds of nine towns, and the commissioners assert the fullest confidence in their ability to stock the waters of the State successfully with this valuable fish. The fish-way at Pawtuxet has been completed, and is likely to answer the purpose for which it is intended.

RIANZARES, FERNANDO MUÑOZ, Duque de, a Spanish soldier sprung from the lowest ranks, the favorite, the husband, and subsequently king-consort of Maria Christina, ex-Queen-Dowager of Spain, born at Tarrancon (Cuenca), in Spain, 1810; died near Havre, France, September 15, 1873. He was the son of a Madrid tobaccoist, a private in the King's guard, and his sister a laundry-maid in Madrid, when in 1830 he attracted the attention of Queen Christina. She had married the previous year, as his fourth wife, Ferdinand VII., he being forty-five and she but twenty-three. She was gay, unprincipled, and selfish. The young guardsman, Muñoz, as one of the escort party of the Queen from Buen Retiro to Madrid, had picked up her embroidered handkerchief and presented it to her with true Spanish grace. He was handsome and had a fine address, and considerable vivacity of manner, and these qualities attracted the Queen, who held a conversation of several hours with him that day, took him at once into her favor, lavished on him wealth and honors and a court position, and in 1833, three months after the death of Ferdinand VII., was privately married to him. This marriage caused great scandal. After a stormy regency of eight years, Queen Christina was in 1840 driven from Spain, but three years later she returned in triumph, and in October, 1844, was married in public to Muñoz, to whom she accorded the title of Duque de Rianzares. The Queen continued in power even after her daughter Isabella had attained her majority and ascended the throne, but was finally compelled to leave the country in 1854, and never afterward regained the ascendancy she had previously exercised. The duke took little part in politics, and was content with the honor of being the Queen's husband. It was proposed in 1846 to give him a Spanish-American kingdom, but he evinced little desire for the doubtful honor. He was created a grandee of Spain of the first class, and a Knight of the Golden Fleece. In 1847, at the time of the Spanish marriages, King Louis Philippe of France gave him the grand-cross of the Legion of Honor,

and the French title of Duc de Montmorat. He had resided several years in France, and his wife, the ex-Queen, survives him.

RIGDON, SIDNEY, one of the founders of Mormonism, born in St. Clair township, Alleghany County, Pa., February 19, 1793; died in Pittsburgh, Pa., January, 1873. As a boy Rigdon seems to have been shrewd, artful, and designing. He had obtained a fair English education, and had learned the printing business, and was working at his trade in an office in Pittsburgh, in 1812-'13, when a somewhat erratic genius, a preacher, by the name of Solomon Spaulding, brought to the office, a manuscript of what he termed an historical novel. He gave it the title of "The Manuscript Found; or, The Book of Mormon." The book was crude and worthless as a fiction, but it took the fancy of Rigdon, and he copied it. It was eventually returned to the author, who soon afterward died. After remaining three or four years longer in the printing-office, Rigdon withdrew, and commenced preaching, at first professing evangelical doctrines, but before long he gathered a congregation of his own, to whom he broached some of the crudities of this "Book of Mormon." In or about 1829 he became acquainted with Joseph Smith, Jr., the Mormon prophet, and formed an association with him, furnishing him with Spaulding's manuscript, portions of which Smith published, asserting that they were translated from some golden plates which he had found. Rigdon also transferred to him as many of his followers as he could. From that time Smith and Rigdon worked together, and were partners in all their enterprises, even to their practice of polygamy. When Smith removed to Kirtland, Ohio, Rigdon went with him, was his most efficient preacher, and cashier of the bank of which Smith was president. The Missouri enterprise, which came to such a tragic ending, was mainly conducted by Rigdon, who denounced the anti-Mormons with great severity and bitterness. When the Mormons established themselves at Nauvoo, Ill., Rigdon was one of the presidents of the Church. He had been twice tarred and feathered, and several times imprisoned, for his alleged conspiracies and misdemeanors. When Joseph and Hyrum Smith were shot at Carthage, June 27, 1844, Rigdon, who was then at liberty, aspired to the leadership of the sect, but the "twelve apostles" preferred Brigham Young, and chose him. Rigdon refused to submit to his authority, and for his contumacy was declared to be "cut off from the communion of the faithful and delivered to the devil to be buffeted in the flesh for a thousand years." Thus cast out, he sank into obscurity, and for the lifetime of a generation had gone out of the memories of men, till his singular history was recalled by his death.

ROMAN CATHOLIC CHURCH. The year 1873 witnessed increased complications in the relations of the Roman Catholic Church with

the governments in various countries, especially Germany, Switzerland, Italy, Turkey, Mexico, and Brazil. Pope Pius IX. remained in the Vatican at Rome, supported by voluntary offerings of his adherents throughout the world, declining to accept the proffered stipend of the Italian Government. He was not molested in his appointments of archbishops and bishops to Italian sees, steps being taken to avoid any collision, but he could not prevent the seizure of many convents and religious houses at Rome, including even those of the generals of orders, having branches or missions in various Christian and pagan lands. In all cases the Italian Government seized not only the buildings under pretext of their being necessary for national use, but also took possession of the libraries and archives, thus in the case of the heads of orders effectually crippling the operations of those branches of the Church throughout the world.

Under instructions from the Cardinal-Vicar a protest was made by each community before yielding to force: "The undersigned, Superior of the Religious House *** having been summoned by the Junta liquidating ecclesiastical property at Rome to present in a special form, within a delay of three months, a tabular statement of the goods, credits, and debts, belonging to the said House, replies that he (or she) cannot spontaneously furnish it. But since in case of refusal, heavy penalties are threatened, he transmits, in order to avoid graver evils, the tabular statement required, and at the same time protests and declares that he takes no part in the act of spoliation, and yields only to violence."

Under the decree of January 16th, seventeen convents were seized on the 26th. A protest, made June 2d by generals and procurators of religious orders, produced no effect. A decree of June 19th doomed them all, and from that to the close of the year the work of suppression was carried on without any indulgence. The property belonging to the churches, even of St. Peter's, St. John Lateran, the especial churches of the Pope, and necessary to their maintenance, was seized and sold at auction. The seizure of the property belonging to the Irish College led to the interposition of the British Government.

This course of the Italian Government drew from Pope Pius IX. the following allocution, delivered to the cardinals of the Holy Roman Church, in the hall of the Vatican, on July 25, 1873.

VENERABLE BRETHREN: What we foretold when we addressed you at the close of the past year—to wit, that we might have to speak again of vexations of the Church daily increasing; the work of iniquity, then proposed, having now been consummated, our office calls us to declare, in whose ears seems to sound that voice of one saying: Cry!

So soon as we learned that an enactment was to be proposed to that Legislative Assembly which, in this propitious city as well as in the rest of Italy, was to suppress religious houses, and to put up ecclesiastical property to be sold; denouncing the impious

crime, we proscribed any and every project of an enactment of such kind. We declared null every acquisition of property thus robbed; and we repeated the censures that were incurred, *apo facto*, by the authors, and by the promoters, of enactments of such sort.

Not only by the Church has this enactment been branded as antagonistic to divine and ecclesiastical law; but by the lights of public legal science, as subversive of all natural and human justice; and so, of its own nature, void and null. But we see it accepted to-day, by the votes of the Legislative Assembly and of the Senate; and, finally, sanctioned by royal authority.

We judge it best, Venerable Brethren, to refrain from repeating all that we have so often largely set forth, hoping to deter these wicked rulers from their attempt, in regard to the sacrilege, the malice, the end, and the most grave injuries of this enactment. But we are forced by the duty of vindicating the rights of the Church, by the solicitude of warning the careless, and by very charity for the guilty, to raise our voice and to declare to all those who have not hesitated to propose, or to approve, or to sanction this aforesaid most iniquitous enactment; and to all commissioners, promoters, counselors, adherents, executors, or purchasers of ecclesiastical property, that whatever they have done, or may do, is to no valuable account, but void, and null. And not only so, but that they are, in the act of any participation whatever, each and all of them, stricken with the major excommunication, and with yet other ecclesiastical pains and penalties, according to the Sacred Canons, Apostolical Constitutions, and Decrees inflicted by General Councils, and especially by the Council of Trent; and that they have fallen into the most terrible vengeance of God, and are walking in plain peril of eternal damnation.

Meantime, Venerable Brethren, while necessary aids to our sovereign ministry are withdrawn more and more, while wrongs are heaped on wrongs toward persons and things sacred, while here and abroad the persecutors of the Church seem to be concerting their plots and joining their forces for the utter smothering of the exercise of ecclesiastical jurisdiction; and, to give a special instance, perhaps to interfere with the free election of him who is to sit as the Vicar of Christ in this chair of Peter, what is left to us except that we should, with all earnestness, take refuge in Him who is rich in mercy, and deserts never his servants in the time of their trouble?

And, verily, the power of Divine Providence is shown clearly in the perfect union of all the bishops with this Holy See, in their noble steadfastness against wicked enactments, and the usurpation of sacred rights; in the unbounded devotion of the whole Catholic household to this centre of unity; in that life-giving spirit, with which faith and charity are burning forth, everywhere, in works worthy of the best days of the Church.

Let us, then, strive to make ready the desired season of mercy. Let us all together, throughout the world, try to do a pious violence to our God. Let all prelates rouse their parish priests to this. Let all parish priests stir up the people of their several flocks. Let us, all and together, prostrate, and bowed down before our altars, cry out: *Come, O Lord, come! Delay not! Spare Thy people, loosen the burdens of Thy flock! Behold our dejection! It is not pleasing justifications for ourselves that we pour out our prayers before Thy face, but for the multitude of Thy tender mercies! Stir up Thy power, and come; show Thy face, and we shall be saved!*

And although we may be conscious of our unworthiness, let us not fear to draw nigh, confidently, to the Throne of Grace. Let us seek that throne by the intercession of all who now surround it. Especially, let us seek it through the holy apostles; let us seek it through the most chaste Spouse of the Mother of God (St. Joseph); let us seek it, above

all, through the Virgin Immaculate, whose intercessions with her Son have the relation, in a certain way, of commands.

But, as a preparation for this, let us strive earnestly to cleanse our conscience from dead works. For it is "on those that are just the Lord sets his eyes; and it is to their prayers that his ears are open."

That this may be accomplished more certainly, and more fully, we grant, by our apostolical authority, to all the faithful who will have duly confessed and communion, and will have prayed for the necessities of the Church, in these matters, a Plenary Indulgence, to be once gained, on whatever day the Ordinary, in each diocese, shall have appointed; which Indulgence may be applied for the souls of the faithful departed.

Therefore, Venerable Brethren, though countless and very heavy storms of persecutions and troubles rage, let us not lose courage on that account. For we are trusting in Him who never suffers those that hope in Him to be confounded. For it is the promise of God which cannot be forgotten: "*I will deliver him, because he has hoped in me!*"

The suppression of the Roman University, and of the chair of Theology in the various Italian universities, was also effected, so that the higher education of secular and regular clergy was rendered almost impossible in Italy.

The affairs of the Church in Switzerland early in the year assumed a serious aspect. On the occasion of issuing a decree in regard to proceeding to the canonization of Blessed Benedict of Labre, and Blessed Andrea da Burgio, Pius IX., January 16th, nominated Mgr. Mermillod Vicar-Apostle of Geneva, thus relieving him from even nominal dependence on the Bishop of Lausanne, without making him Bishop of Geneva. The Government of Geneva, in a circular, declared his nomination an attempt against the authority of the state, and ordered him to leave Swiss territory, if he attempted to act. He was accordingly arrested at Geneva on the 17th of February, and, in spite of his protest against the unconstitutionality of the act, forcibly conveyed beyond the frontiers into France. He soon received a letter of encouragement from the Pope, and, on the 22d of March, sent a protest to the council discussing the whole question. It was returned to him by M. Nantier, President of the Council of State of Geneva, but was again sent by the bishop, who insisted, as a Swiss citizen, on his right to have it laid before the council.

A law was then passed, March 28d, followed by another of August 26, which established an entirely new system for the Catholic Church, making new divisions of parishes, requiring the clergy to be elected by Catholics, whose names appeared on the cantonal list of electors, and forbidding any priest to perform any act as such until approved by the Government. These laws were not allowed to remain a dead letter, two priests having been arrested at the altar on the 29th of March. When the election for parish priests came off, the Catholics in communion with the Pope could not vote without forfeiting their membership, and abstained. Those who shared the views of the Old Catholics voted, M. Loyson (Father Hy-

cinthe) and two other foreign priests were elected, and installed by Government in the Catholic churches, the regular congregations being compelled to seek other edifices for the purpose of divine worship, so long as their priests were left to them. Mgr. Agnozzi, *Papal chargé d'affaires*, wrote to the Federal Council, protesting against the transfer of St. Germain's Church to the Old Catholics, but this finally led only to the rupture of all relations between the Swiss Government and the Pope. On his side, Bishop Mermillod, on the 13th of October, excommunicated M. Loyson and the other elected priests, and warned the Catholics against acknowledging them.

Five of the cantons, forming the diocese of Basle, Soleure, Berne, Aargen, and Zurich, passed laws similar to those of Geneva. On the 29th of January, the delegates of Basle declared Bishop Lachat, who refused to submit to these laws, deposed from the episcopacy, and ordered the cathedral chapter to proceed to the election of an administrator, which they refused to do. The bishop was then arrested and exiled, April 16th. The laws were enforced rigorously, and sixty-nine priests in Jura were arrested and taken from their congregations, which were thus left without pastors. Besides letters of encouragement to the bishops individually, Pius IX., on the 10th of March, addressed a brief to the Vicar-General and priests of the Canton of Geneva, and one on April 7th to the priests of Jura.

The amendments to the Prussian constitutional charter, which were intended to affect the Catholic Church in that kingdom, were not passed without a protest. The following is inserted as giving the Catholic view of the subject:

Memorandum addressed by the whole Catholic Episcopate, of the Kingdom of Prussia, to his Majesty's Ministers—presented by the Archbishops, in the name and by the desire of all the remaining Bishops of the Country, on the 30th of January, 1873:

A few days back, the King's ministers laid before the Parliament the drafts of certain laws which trench most deeply upon the whole internal mode of existence of the Catholic Church, and on her rights; and the Parliament has been requested to give its consent as soon as possible to these projected laws.

Apart from the fact that, according to all natural laws and positive jurisprudence, and by immemorial usage, the relations in German countries between the State and the Church can only be ordered legally and to any good purpose by mutual understanding between both—independent of this, the Prussian bishops had at least a right to expect that some occasion would be afforded them of expressing themselves on the subject of such important projects of laws affecting the Catholic Church, and of making known Catholic principles on the subject. They would then have been in a position to accept certain individual dispositions of the projected laws without a breach of their duty. With regard to other parts of the projected laws, an agreement might have been entered into with the Holy See. But now that these laws, although they affect the whole internal life of the Church, have been introduced by the King's Government, without any reference to the ecclesiastical authorities, and in virtue of the omnipotence which is claimed by the State; without, too, any previous understanding and negotiation with the es-

tablished ecclesiastical organs; nothing is left to the bishops save to enter their formal and solemn protest against all those dispositions of the said laws which trench upon the natural and fairly-acquired rights of the Catholic Church, and which attack the rights of conscience and of religion belonging to all Catholics.

We permit ourselves to add the following observations touching certain points, but as, in the inevitable dispatch which we are constrained to use, these remarks by no means exhaust the subject, we reserve to ourselves the right of giving further explanation on points of law, and on the grounds of what we say.

According to the Catholic doctrine, which we Catholics hold and believe unconditionally as true, because resting on Divine Revelation, and which we are as certainly justified in believing, as we are in holding that our freedom of conscience cannot be touched:

According to the nature of things, to natural law, and the laws of reason, according to the historical and justly-won rights of the Catholic Church in Germany, and of the Catholic portions of the monarchy, which are not unconditionally incorporated with the kingdom of Prussia, but whose rights to the practice, as in former days, of their religion, and the upholding by the State of their Church were guaranteed to them by the solemn promise of the monarch, by right of the agreements made between the Holy See and the Prussian Crown, or the respective sovereigns of Germany and of the Bulls founded on the same:

Finally, in virtue and by right of the dispositions of the Prussian Constitutional Charter, guaranteeing this right to the Catholic Church as to the other great Christian confessions, the Catholic Church in Prussia professes the inalienable and unassailable right to subsist in the complete entirety of her doctrine and code of morals, of her constitution and discipline, and to order and administer her affairs by means of her lawful organs.

But the very first and most essential right of every Catholic bishop and of every individual Catholic is this: to be a member of that same one Catholic Church, whose supreme Head is the Pope; and, therefore, to be and to remain in the unity of the faith, and in unhindered living union and communication with the Pope, who according to Catholic doctrine is, by Divine appointment, the foundation and the supreme pastor of the whole Catholic Church, and all parts of the same.

The second and no less essential right of every Catholic episcopal see, and of every individual Catholic is, to be governed and guided in all religious and ecclesiastical matters by none other than their lawfully appointed ecclesiastical superiors, the bishops, in subordination to the Pope; seeing that the same are, according to our Catholic faith, established by God for the purpose of governing their spiritual subjects according to the precepts of Christ, and the laws of the Catholic Church. In according with these a bishop has principally a threefold duty toward his diocese, which duty has been laid upon him by God, and which corresponds to the right—also given to him by God—of fulfilling this duty freely and without restraint or hindrance:

1. The duty and the right to proclaim the doctrine and moral code of the Catholic Church, to preserve the same intact, and to administer the Church's means of grace.

2. The duty and the right to choose, to educate, to send forth, and to induct into the ecclesiastical offices, in accordance with the laws of the Church, the priests and inferior servants of the Church, who support him in his apostolic office, and act as his helpers and representatives.

3. To the bishop belongs the right and the duty of admonishing ecclesiastics to fulfill the obligations of their respective offices, and of exhorting the faithful to accomplish their duties as Christians, and, should they obstinately refuse to obey the teaching of the Church, her doctrine and her laws, it becomes

further the bishop's duty and right to exclude the offenders from communion with the Church, and, if they are ecclesiastics, to deprive them of their spiritual office, and forbid them to exercise any of the functions of a priest.

These three duties are inextricably bound up together, so that neither can exist without the other. The bishop cannot preserve intact the body of Catholic doctrine in faith and morals, he cannot rightly and worthily guard and administer the means of grace appointed by Christ, and dispense the same to the faithful, if he cannot educate, superintend, send forth, and place according to their merits and capacities, the clergy who watch over the purity of the faith, and administer the means of grace to the people, as his representatives and by virtue of his commission. And he cannot do his duty in any of the above-mentioned points—least of all can he preserve the Catholic faith from falsification, and the constitution of the Church from destruction—if he has not the power of removing heretical or schismatic ecclesiastics, such as have in other ways proved unworthy of their office, and if he cannot exclude persistent deniers of the Church's articles of belief, and opponents or enemies of the constitution and laws of the Church, from her communion. The proposed laws attack and annihilate all these essential rights of the Catholic Church, and of her bishops; rights without which the bishops will find it impossible to fulfill their most vital duties. And the projected laws attack and annihilate these in many respects."

The laws were, however, passed and published May 15th. By them the whole status of the Catholic Church was changed. The action of the Pope was abolished by the part forbidding any foreign jurisdiction, and by the establishment of a government court of appeal, before which all ecclesiastical matters were to be brought for final decision; ecclesiastical seminaries were placed under state control as to professors and study; candidates for the priesthood were required to study at the state universities, and none were to be ordained by the bishops unless the candidates passed a state examination; and no bishop was to appoint any priest to a church without consent of Government. On the 26th of May the Archbishops of Cologne and Posen, with eleven bishops, and the Vicar-General of Culm, addressed to the Minister of State for Ecclesiastical Affairs, a declaration that it was absolutely impossible for them to coöperate in the execution of those laws. Prosecutions were at once commenced, and numbers of priests arrested, fined, and imprisoned for violations of the Falk laws. Archbishop Ledochowski, of Posen, refusing to appear before a criminal court for appointing a pastor, was fined; and under various succeeding fines all his property seized. He was then imprisoned at Ostromo. A brief of the Pope, dated November 3d, encouraged him to constancy. Similar prosecutions were begun against the Archbishop of Cologne and the Bishop of Breslau. Other prosecutions were begun against those who condemned or excommunicated the Old Catholics. The Catholic chaplains in the army were also abolished, and the whole body of adherents to that faith were in a state of great excitement, which continued into the following year. Out of this state of things grew the following correspondence:

VATICAN, August 7, 1878.

YOUR MAJESTY: The measures which have been adopted by your Majesty's Government for some time past all aim more and more at the destruction of Catholicism. When I seriously ponder over the causes which may have led to these very hard measures I confess that I am unable to discover any reasons for such a course. On the other hand, I am informed that your Majesty does not countenance the proceedings of your Government, and does not approve the harshness of the measures adopted against the Catholic religion. If, then, it be true that your Majesty does not approve thereof, and the letters which your august Majesty has addressed to me formerly might sufficiently demonstrate that you cannot approve that which is now occurring—if, I say, your Majesty does not approve of your Government continuing in the path it has chosen of further extending its rigorous measures against the religion of Jesus Christ, whereby the latter is most injuriously affected—will your Majesty then not become convinced that these measures have no other effect than that of undermining your Majesty's own throne? I speak with frankness, for my banner is truth. I speak in order to fulfill one of my duties, which consists in telling the truth to all, even to those who are not Catholics; for every one who has been baptized belongs in some way or other, which to define more precisely would be here out of place, belongs, I say, to the Pope. I cherish the conviction that your Majesty will receive my observations with your usual goodness, and will adopt the measures necessary in the present case. While offering to your most gracious Majesty the expression of my devotion and esteem, I pray to God that He may infold your Majesty and myself in one and the same bond of mercy. P. O.

His Majesty the Emperor replied in a letter to be found in the article "GERMANY."

A second letter of the Pope to the Emperor was not published by the latter, and has not been made public at Rome.

In Mexico the Catholic Church was also attacked by legislation. Congress on the 25th of September passed a decree declaring Church and State independent of each other; making marriage a civil contract under the exclusive competency of the state, and with such validity as it confers. No religious institution was to be allowed to acquire funded property, oaths were abolished, and an argumentative section prohibited religious orders. Protests followed this enactment, and even risings in some parts of Mexico, but the Government put down all opposition. The Feasts of All Saints' and All Souls' day were also replaced by the Feast of Labor and Industry.

In Brazil troubles arose from another matter. The rules of the Roman Catholic Church forbid its members to enter secret societies. The principle is well established, and several popes have by name condemned the Freemasons and other similar bodies. A member of those societies forfeits rights as a Catholic. In Brazil, however, there were religious confraternities or guilds, among which were members, who also belonged to Masonic lodges. An attempt of the bishops to enforce Catholic discipline led to a series of struggles. The lodges, first in an ingenious address, endeavored to win the favor of the bishops, and failing, began prosecutions against them for refusing to permit masses to be said for deceased members of the

confraternities who were Masons. A brief of Pius IX., issued May 29th, bore directly on this question, renewing the decision of former sovereign Pontiffs.

PIUS IX., POPE.—*To our Venerable Brother Vital-Mary, Bishop of Olinda.*

Venerable Brother, Health, and Apostolic Benediction: Our grief has been great on learning, Venerable Brother, by the exposition you have made to us, of that pest of Freemasonry, that it is so prevalent in your country, and that it has even invaded some confraternities to such an extent that some of them are entirely infected. Nevertheless, we cannot refrain from expressing our pleasure at the confidence with which you have poured into our heart the sorrow you experience, and to commend the zeal with which you have endeavored to arrest so great an evil.

This pest is old, and it has been diligently warred against by the Church, and pointed out, but in vain, to the people and governments that it threatened with destruction. As early as the year 1788, Clement XII., in his Encyclical Letter *In eminenti*, published the 28th of April of that year, complained in these words:

"We have learned that there are daily spreading themselves afar, with renewed vigor, certain societies, vulgarly called *Freemasons*, in which men of all religions and of all sects, affecting an appearance of natural integrity, bind themselves together by a compact as narrow as it is impenetrable; and he urged that the greatest vigilance was necessary, "in order that this sort of men, like robbers, break not into the house, or like foxes destroy the vine;" he proscribed these conventicles under whatsoever names they assumed, and ordered each and every one of the faithful to "avoid these societies altogether, under pain of excommunication by the act itself, *ipso facto*, and without any other declaration," an excommunication which the Roman Pontiff alone can absolve, except in *articulo mortis*. Benedict XIV., his successor, inserted and developed this constitution in his Encyclical Letter *Providas* of March 18, 1751, by which he confirmed the decrees and penalties set forth by his predecessor.

Still, this criminal secret society continues to spread, dividing itself into different sects, distinguished by a variety of names, but which remains united in communion of sentiments and of wickedness, until it has become propagated far and wide, and having acquired great strength, has emerged from the darkness in which it had concealed itself, and proved to all sensible men how justly it had been condemned by the sentinels on the watch-towers of Israel. It proclaimed itself to the eyes of all through its catechisms; its constitutions, the public acts of its lodges published by the press, and still more clearly by its public machinations, and by the facts that its design is to abolish the Catholic religion, and to accomplish this, to attack the Roman See, the centre of unity, to overthrow all legitimate human authority, to establish man in a complete autonomy, without laws, and disencumbered even by ties of blood, and dependent only on his appetites.

The satanic spirit of the sect manifested itself particularly at the close of the last century, in the violent revolutions of France, which shook the whole world, and proved that a total dissolution of human society would follow, if the powers of this criminal sect were not overcome. Accordingly, Pius VII., of holy memory, in his Encyclical Letter *Ecclesiam*, published September 18, 1821, did not content himself by once more placing before the eyes of the world the character, malice, and dangers of such societies; but again reiterated still more forcibly the condemnations and spiritual punishments threatened by his predecessors against those who are members of these societies. All this has again been confirmed, as well by Leo XII., of venerable memory

in his Apostolic Letter, *Quo graviora*, of March 13, 1826, as by ourselves in our Encyclical Letter *Qui pluribus*, of November 9, 1846.

Consequently, after these commands so often repeated by the Church and accompanied by such august approbations, after the exposition of the works of these impious societies, which have so manifestly revealed their true aim; after the perturbations, the calamities, the innumerable butcheries, which they have occasioned everywhere, and which they have not been ashamed to insolently boast of, no excuse can be made for those who permit their names to be inscribed upon their rolls.

Yet, considering that these criminal sects reveal their mysteries only to those who, by their impiety, appear worthy to receive them, exacting for this purpose from their members a solemn oath by which they swear never to reveal at any time, nor under any circumstances, to men not belonging to the society, any thing that relates to this society, and to communicate no information to the inferior grades that is reserved to the superior grades; considering that under every circumstance they conceal themselves under the veil of benevolence and mutual assistance, and that the imprudent and inexperienced are easily deluded by these appearances of feigned honesty—we consent that mercy be extended to those prodigal children, whose loss, Venerable Son, you deplore, if only attracted by this gentleness, they abandon their evil ways, and return to the Church, their Mother, from whom they have estranged themselves.

Remembering that we are the Vicar of Him who came not to call the just, but the sinner, we believe it our duty to follow the footsteps of our predecessor, Leo XII., and accordingly suspend for the space of one whole year after the contents of this Letter shall have been made known, the carrying into effect of the censures incurred by those who have enrolled themselves in these societies; and we concede that they may be absolved from these censures by any confessor approved by the Ordinaries of the place where they reside.

And if this course of clemency can neither turn the erring from their fatal purposes, nor withdraw them from so grave a crime, we decree, the aforesaid period of one year having elapsed, that the reservation of the censures be immediately removed, censures which, by virtue of our Apostolic authority, we confirm anew, declaring expressly that none, without exception, of the members of these societies, will be exempt from the spiritual punishments aforesaid, no matter what the pretext or good faith alleged, or the appearances of intrinsic probity offered by the said societies, and consequently that all, without exception, incur the same dangers of eternal damnation in adhering to these societies.

Besides, we grant you full power to proceed in accordance with all the rigors of Canon Law, against religious confraternities, that have so shamefully vitiated their character by this impiety, to disband them altogether, and to establish others that will comply with the nature of their institution.

May God grant that the consideration of the perversity of these societies, in which so many men, honored by the name of Christian, are not afraid to enter, that the thought of the anathemas so often fulminated against them by the Church, and that the knowledge of the clemency of the Holy See toward them, made known by means of this Letter to those who have been misled, may bring them back into the path of salvation, prevent the ruin of many souls, and remove the necessity on our part of resorting to severity! It is for this that we most earnestly pray to God. This is what we expect of your pastoral zeal. It is what we implore of all our children who have been misled.

And as we extend the same prayers for other Dioceses of this Empire, in which the same evils are being propagated, We desire that this Letter be communicated to our Venerable Brethren, to the end

that each one of them may take, as if spoken to himself and to his people, what we write to you.

While we pray Divine Mercy to vouchsafe to grant our desires and our thoughts, as the presage of celestial succor and of all gifts from on high, and as a token of our special good-will, we accord you and send you, with all the effusion of our love, to you, Venerable Brother, and to all your diocese, the Apostolic Benediction.

(Given at Rome, near St. Peter's, the 29th of May, 1878, in the twenty seventh year of our Pontificate.)

PIUS IX., Pope.

Pursuing the course thus indicated, Bishop Oliveira placed some of the confraternities under an interdict, and, on his refusing to remove it, or to allow masses to be said for members dying, who were also members of masonic lodges, he was arrested, and at the close of the year was in prison at Rio Janeiro, awaiting his trial for felony. The Bishop of Pernambuco was also prosecuted. Attempts were made, however, by the Brazilian Government, to settle matters by negotiation with the Pope.

The question of the power of bishops in the Catholic Church over the priests in their dioceses, came before the courts in Great Britain and in the United States. In Ireland, the case of Rev. Mr. O'Keefe, of Callan, against his bishop, and against Cardinal Cullen, was finally decided adversely to O'Keefe; while a somewhat similar case at Scranton, Pennsylvania, was still undecided at the close of the year.

The influence of Catholic bishops and clergy on the Irish elections led the British Government to prosecute several; but when Bishop Duggan, of Clonfert, was acquitted, February 15th, the other prosecutions were abandoned.

The schism among the Armenians, in the Turkish Empire, continued, and called from the Pope an Encyclical letter, on the 6th of January, 1878, reviewing the whole question. But Andrew Chaldean, Patriarch of Diarbekir, an opponent of the Vatican decrees, finally submitted in 1878, and thus put an end to the schism which he had begun.

The persecution in Japan was finally arrested, the Mikado carrying out the laws granting full liberty to the Christians, and releasing the survivors, who were still in prison. Of the 4,100 arrested from 1868 to 1870, 660 had perished in prison. The whole number of native Catholics in Japan was estimated to be from 18,000 to 24,000.

In China, Father Hue, a French missionary, and his catechist, Ise Tchouen, were put to death by the people at Kien-Kiang-Hien.

The revival of pilgrimages continued during this year, and immense crowds of pilgrims visited the grotto of Lourdes, Lasalette, Paray le Monial, St. Anne d'Aray, and other sanctuaries. The movement extended to Italy, but the Government which had declined to arrest the publication of attacks on Christianity, arrested the pilgrimages under various pretexts, and closed the Basilica of St. Francis of Assisi. The finding of the relics of St. Philip and St. James in the Church of the Holy Apostles at Rome drew many of the devout to that church,

but the frequenting of churches was attended with some risk, and the attack made on some coming from the Gesu (March 30th), in which a Mr. Vansittart, an English gentleman, was injured, led to some investigation. To enable the Catholics of Italy to join in the pilgrimages spiritually, if thus bodily unable, the Pope on the 19th of August issued the following:

PIUS IX., POPE.—*To all the Faithful of Christ to whom these Presents shall come, Health and Apostolic Benediction.*

God, who is rich in mercy, hath so ordered it in these calamitous times, that while our hearts are filled full of bitterness by reason of the wickedness of men, very many of the faithful should, on the other hand, arise out of the great Catholic world and strive to bring relief to our sorrow and affliction by numerous proofs of their love and by their manifold works of Christian piety. Among these last are surely to be reckoned those frequent and very numerous attended pilgrimages which have been made to the more renowned churches or sanctuaries, with the design that by the offering up of prayers they might obtain from the God of all consolation, through the merits and suffrages of the most Blessed and Immaculate Virgin Mary, and of the Saints in heaven, the desired peace and triumph of the Church and the liberty of the Holy Apostolic See.

But forasmuch as certain holy pilgrimages which were to have been made to the more celebrated sanctuaries of Italy have within these last few days been prohibited, to the grief of all good men, certain of the faithful of our city of Bologna have formed the design of inviting all Catholics to join in making a pilgrimage in the month of September next; and they have proposed that the said pilgrimage should be divided into three decades, or periods of ten days each. In the first decade the faithful are to be present in thought in the Holy Land, and at the places there sanctified by Christ our Lord and Redeemer, and to offer up pious prayers proper for that end; in the second decade, at the principal sanctuaries of Italy; and in the third, at those of foreign nations.

And forasmuch as the faithful above mentioned have earnestly besought us, that out of our Apostolic benignity we would deign to bestow some indulgences for this pious exercise, we, very highly commending their holy and earnest design, have with a willing mind resolved to grant the petitions presented to us as below. Wherefore, confiding in the mercy of Almighty God and on the authority of his blessed Apostles, Saints Peter and Paul, we do, in the accustomed form of the Church, remit to all and singular the faithful of Christ of both sexes, who being at least contrite in heart, shall, on any day of the month of September next ensuing have performed the aforesaid pious exercise of a spiritual pilgrimage to be made as above set forth, three hundred days of penance enjoined them, or in any other way due by them. Moreover, to all and singular the faithful of Christ of both sexes, who shall, for one entire decade, have fully completed the same pious exercise of the aforesaid spiritual pilgrimage, and who, on one day of the same decade, to be selected by them at their own discretion, being truly penitent, and having confessed, and being fortified with the Holy Communion, shall have devoutly visited any church or public oratory, and there have offered their pious prayers to God for the concord of Christian princes, the extirpation of heresies and the exaltation of Holy Mother Church—on that decade out of those three on which they shall have so done, we mercifully grant in the Lord a Plenary Indulgence and remission of all their sins. All and singular of these Indulgences we allow to be applied by way of suffrage as remissions of sins to the relaxation of

penances also for the souls of Christ's faithful, who shall have departed this life united to God in charity.

Notwithstanding the rule of our Chancery concerning the not granting of Indulgences *ad instar*, and all other Constitutions and Ordinances Apostolic whatsoever to the contrary, these our letters are to remain in force for one year. And it is our will that the same faith be given to the printed copies of these our letters, such being authenticated by the signature of a notary public, and by the seal of some ecclesiastical dignitary, as would be given to the original itself if exhibited or shown.

Given at Rome at St. Peter's, under the Ring of the Fisherman, this 19th day of August, 1873, in the twenty-eighth year of our Pontificate.

† F. CARDINAL ASQUINI.

The present Letters Apostolic were exhibited at the Secretariate of the Congregation of Indulgences, this 21st day of August, 1873, according to the form of the decree of the said Congregation, dated the 14th day of April, 1856. In testimony whereof, etc.

Given at Rome from the Secretariate of the Sacred Congregation of Indulgences and of Holy Relics, on the day and year as above.

DOMINIC SARRA, Substitute.

He also by a brief of July 8th granted indulgence for a Novenato St. Peter *in vinculis*, in allusion to his own position.

Another feature in connection with the pilgrimage to Paray le Monial, to the tomb of B. Margaret Mary Alacoque, to whom devotion to the Sacred Heart of Jesus owes its modern form, was a general dedication of dioceses, churches, institutions, and private houses, to the Sacred Heart. This became general, before the close of the year, throughout the Catholic world.

The Old Catholic movement during the year 1873 took a permanent form, yet occupied such indefinite ground that, while in some respects the members ceased to belong to the Roman Catholic Church, under others they were regarded as still part of it.

A committee was appointed at the Old Catholic Congress, to decide on the question of a bishop. On the 4th of June the Assembly of Delegates, numbering twenty priests and fifty-seven lay delegates, chose Prof. Reinkens, of Breslau, as missionary-bishop without a see. As consecration by any bishops in communion with the Pope, was out of the question, he was consecrated at Rotterdam, on the 11th of August, by the Jansenist Bishop of Deventer. Another Congress or Council of the Old Catholic body was held at Constance, Switzerland, in September, but no confession of faith, or system of discipline, was adopted. Mr. Loyson (Father Ilvacinthe) and two other sympathizers with the Old Catholic movement, were elected curés at Geneva, but Loyson disavowed all allegiance to Bishop Reinkens, who, on his side, did not recognize Mr. Loyson as one of his clergy.

On the 7th of October, Bishop Reinkens took, at the hands of Dr. Falk, the following oath:

I, Joseph Hubert Reinkens, swear an oath to Almighty and Omniscient God, upon the Holy Evangelists, that I, having been raised to the dignity of a Catholic bishop, will be subject, faithful, obedient,

and devoted to his royal Majesty, William of Prussia, and to the legitimate successor in government of his most high Majesty, will advance the interests of his most high Majesty, according to my ability, avoid injury and prejudice to them, will conscientiously observe the laws of the land, will particularly endeavor to achieve that a feeling of awe and fidelity toward the King, of love for the fatherland, of deference to the laws, and all those virtues which denote the good subject in the Christian, shall be carefully fostered in the minds of the clergy and communities intrusted to my episcopal direction; and I will not tolerate that my subordinate clergy shall teach and act in a sense opposed to the above. More especially I vow that I will not entertain any association or connection, be it within or without the kingdom, which may be prejudicial to public safety; and, should I become aware that propositions shall be made anywhere which may result in injury to the state, that I will signify the same to his royal Majesty. I promise to fulfill all this the more irrefragably in that I am persuaded that my episcopal office obliges me to nothing which can be opposed to the oath of loyalty and fidelity to his royal Majesty, or to that of obedience to the law of the land. All this I swear, so help me God and this holy Evangelism.

The patent of recognition, signed by the King, and handed by Dr. Falk to the bishop after he had taken the foregoing oath, reads thus:

We, William, by the grace of God, King of Prussia, etc., etc., give to know, and make hereby known, that we herewith, in virtue of the episcopal election held in Cologne on the 4th of June, 1873, and of the consecration to the Catholic Episcopate, performed by the Bishop of Deventer, in Rotterdam, on the 11th of August, 1873, do recognize the Ordinary Professor in the Catholic Theological Faculty of Breslau University, Dr. Joseph Hubert Reinkens, as Catholic Bishop; and, accordingly, we command our Upper Presidents, Presidents and Provincial Colleges, as well as each and every our vassals and subjects, of whatever name, position, dignity, or condition herewith, graciously and earnestly, that they shall recognize and respect the said Joseph Hubert Reinkens as Catholic bishop, and let the same possess, have, and enjoy, fully and without question by anybody, all that which may be dependent upon his office, may belong thereto, or may be exacted in virtue thereof, in the way of honors and dignities, profits and other advantages, on penalty of our royal displeasure and heavy inevitable reprehension; without prejudice, however, to all that belongs to us and to our royal and territorial princely privileges.

In witness whereof we have completed this present patent of recognition with our most exalted signature, and have caused it to be sealed with our royal signet. Thus given—BERLIN, September 19, 1873.

WILHELM.

The full purport of this step was not at once seen. The new bishop took up his residence at Bonn.

Pius IX., in an encyclical, on the 21st of November, reviewed the chief events of the year.

In the consistory of December 22d, Pius IX. created twelve cardinals: Alexander Franchi, Archbishop of Thessalonica; Flavio Chigi, Archbishop of Myra; Louis Oreglia di Santo Stefano, Archbishop of Damietta; Mariano Falcinelli Antoniaci, a Benedictine, Archbishop of Athens—the four nuncios to Spain, France, Portugal, and Austria; Joseph Hippolyte Guibert, Oblate of Mary Immaculate, Archbishop of Paris; René François Regnier, Archbishop of Cambrai; Mariano Barrio y

Fernandez, Archbishop of Valencia; Maximilian von Tarnoczy, Archbishop of Salzburg, Austria; John von Simor, Archbishop of Strigonia, and Primate of Hungary; Ignazio do Nascimento Moraes Cardosa, Patriarch of the Indies, and Archbishop of Lisbon; Father Camillus Tarquini, a Jesuit, who died soon after; Thomas Martinelli, an Augustinian.

Among the eminent persons connected with the Catholic Church who died in 1873 were Cardinals Billiat, Ouesta, and Milesi Ferretti; F. John Merlini, General of the Missionaries of the Precious Blood; F. Jerome Kaysewicz, General of the Order of the Resurrection,

Bishop Reinkens was born in the manufacturing town of Burtscheid, near Aix-la-Chapelle, on March 1, 1821. In order to support his aged father, who had lost his entire property, he entered, with one of his brothers, as working-man, a spinning-factory of Aix-la-Chapelle. Three years later he was able to begin a course of study at a gymnasium, which he rapidly finished. From 1844 to 1847 he studied, at the University of Bonn, theology and philology. After being ordained a priest at Cologne, in 1848, he received, in 1850, the degree of Doctor of Divinity, and in the same year was called by Bishop Diepenbrock to Breslau, where he became a lecturer on church history at the university, and in 1852 second cathedral preacher, 1853 extraordinary, and 1857 ordinary Professor of Theology. After the death of Bishop Diepenbrock he resigned, in 1858, his office as cathedral preacher. In the conflict which, in 1860, began between Bishop Förster, the successor of Diepenbrock, and the liberal professor, Baltzer, Reinkens sided with the latter, and from this time the strictly Catholic party in Germany regarded him as a dangerous representative of a theological liberalism. When the movement against the Vatican Council and the doctrine of papal infallibility began in Germany, Reinkens at once took a prominent part in it. His first work on the subject, entitled "Papst und Papstthum nach der Zeichnung des heil. Bernhard von Clairvaux" ("Pope and Popedom, as described by St. Bernard, of Clairvaux," Münster, 1870), involved him in a disciplinary investigation on the part of the bishop, who, at that time, was in Rome; the publication of a second work on papal infallibility ("Ueber Päpstliche Unfehlbarkeit," Munich, 1870), the bishop endeavored to prevent, with the coöperation of the Prussian Minister of Education.

On August 26th and 27th, 1870, Reinkens took part in a meeting of Catholic professors, which was held under the presidency of Döllinger, at Nuremberg, and which issued a declaration against the doctrine of papal infallibility. The Bishop of Breslau, on that account, suspended him, and forbade the students to attend his theological lectures. From that time Reinkens devoted nearly his whole energy to the promotion of the Old Catholic movement. At the first Old Catholic Congress, held in Munich

in September, 1871, he made an address on nationality and Catholicity; at the Congress of Cologne, held in September, 1872, he made the report of a special committee on the relation of the Old Catholics to other Christian denominations. From the University of Leipsic he received, in February, 1871, the honorary title of Doctor of Philosophy. Soon after his recognition by the Emperor, the Governments of Baden and Hesse also recognized him as "Catholic bishop." Immediately after his consecration as bishop, he issued a pastoral letter to the Old Catholic congregations of Germany, and subsequently (December 14th) he replied, by a second pastoral letter, to the Papal Encyclical of November 21st. Bishop Reinkens is the author of a number of works relating to Church history and philosophy, the most important of which are the following: "De Clemente Presbytero Alexandrino" (Breslau, 1851); "Hilarius von Poitiers" (Schaffhausen, 1864); "Die Einsiedler des heil Hieronymus" (Schaffhausen, 1864); "Die Gechichtsphilosophie des heil. Augustinus" (Schaffhausen, 1866); "Martin von Tours" (Breslau, 1866); "Aristoteles über Kunst, besonders über Tragödie" (Vienna, 1870). On the question of papal infallibility he published, besides the works already mentioned, six essays, under the title "Die päpstlichen Decrete von 18 Juli, 1870" (Munich, 1871).

Count MICISLAV LEDOCHOWSKI, Archbishop of Posen and Gnesen, a scion of an old noble Polish family, and eldest son of Count Joseph Ledochowski, who died on November 24, 1859, was born on October 29, 1822. After having been ordained a priest, he gained at Rome the confidence of the Pope to so high a degree that, in 1861, he was appointed Archbishop of Thebes in *partibus infidelium*, and in 1862 was sent as papal nuncio to Belgium. His election as Archbishop of Posen and Gnesen in 1866 was not only highly acceptable to Rome, but also to the Prussian Government, which was believed to have received assurances from the new archbishop that he would not use his episcopal influence for strengthening the national Polish movement, which ultimately aims at a separation of the Polish districts from Prussia and the restoration of an independent Poland. For several years the good understanding between the archbishop and the Prussian Government continued, and several of his pastoral letters, which enjoined obedience to the lawful government, were severely criticised and denounced by the Polish nationalists. At the beginning of 1871 he went to the headquarters of the new Emperor of Germany at Versailles in order to present to the Emperor a petition of the cathedral chapters of Gnesen and Posen in behalf of the restoration of the temporal power of the Pope. As the petition was not granted, the relations of the archbishop to the Prussian Government ceased. He showed himself an uncompromising champion of the claims of the Catholic Church.

Portrait

ANDREW J. H. H. H.

ROSELIUS, CHRISTIAN, LL.D., a distinguished jurist, was born in Bremen, Germany, August 15, 1802; died in New Orleans, September 5, 1873. In his boyhood he emigrated to Louisiana as a redemptioner; that is, he secured his passage by selling his services for a stated term of years. This lad, poor and friendless in a strange land, worked his way upward with indomitable will. He became remarkable for his literary and classical attainments. His speeches, whether delivered in French, German, or English, were equally correct, and even eloquent. While pursuing the occupation of a printer, he studied law, and sought the foundations of jurisprudence in the works of Justinian and the *Corpus Juris Civilis*. He acquired readily a thorough knowledge of Latin, and it was from the sources of law that his mastery over the science was so effectual. His life at the bar is written in the reports of the State Supreme Court. Rising from the modest position of a junior attorney, as those talents of such a high order became appreciated, he early took a rank among those more advanced in years and very soon was the acknowledged peer of Grymes, Mazureau, Soulé, Livingston, and other brilliant members of the bar, who were his contemporaries. For many years he was Dean of the Faculty of the University of Louisiana, and was Professor of Civil Law in that institution at the time of his death. He was elected to the Secession Convention, and refused to sign that ordinance. Being one of the few members of the bar who had been an unwavering Unionist, General Hurlbut, while in command at New Orleans offered him the highest position on the reconstructed Supreme bench. He declined the appointment because the general refused to assure him that the court should be exempt from military interference.

ROUGE, OLIVIER CHARLES CAMILLE EMANUEL, Viscount de, a French archaeologist, and member of the Institute of France, born in Paris, April 11, 1811; died in that city, January 25, 1873. He was of an old Breton family, and was destined by his father for a legal and political career, but the Revolution of 1830 having lost his father his official position, the son returned to the ancestral estates in Anjou, and busied himself for some time with agricultural pursuits. His taste for philological pursuits brought him often to Paris. He studied Hebrew and Arabic before he became interested in the hieroglyphic inscriptions, but, once attracted by them, he gave himself up wholly to Egyptian studies, and during more than eight years pursued his investigations of hieroglyphic inscriptions without any connection with the world of scholars who were interested in the same study. In 1844-'45 his first publications on these subjects attracted the attention of Letronne and Biot, and he was soon in communication with these and other philologists. As one of the editors of the *Archæological Review*, M. de Rouge presented to the Academy of Inscriptions in 1850 an in-

terpretation of an hieroglyphic funeral inscription, which was the most lucid of all the attempts at deciphering these inscriptions, and led to his election as a member of the Institute, in 1853, when he succeeded Pardessus. In 1849 he was appointed superintendent of the Egyptian Museum in the Louvre. In 1854 he became a member of the Council of State in the Section of the Interior and of Public Instruction, and not long after succeeded Charles Lenormant as Professor of Archæology in the College of France. He was created an officer in the Legion of Honor in August, 1862. Though ranking among the ablest Egyptologists, not only in France, but in Europe, the Viscount de Rouge was not a prolific writer. He had published an "Egyptian Chrestomathy," with a French translation of the text, and many monographs on archæological and philological topics in the Transactions of the Institute, and in the *Archæological Review*.

RUSSIA (Empire of all the Russias), an empire in Europe and Asia. Emperor, Alexander II., born April 17 (April 29, new style), 1818; succeeded his father, February 18 (March 2), 1855; crowned at Moscow, August 26 (September 7), 1856. Sons of the Emperor: 1. Heir-apparent, Grand-duke Alexander, born February 26 (March 10), 1845; married November 4, 1866, to Maria Dagmar (born November, 26, 1847), daughter of King Christian IX., of Denmark. (Offspring of the union are two sons; Nicholas, born May 6, 1868; and George, born April 28, 1871.) 2. Grand-duke Vladimir, born April 10, 1847. 3. Grand-duke Alexis, born January 2, 1850. 4. Grand-duke Sergius, April 29, 1857. 5. Grand-duke Paul, born September 1, 1860.

The Council of the Empire, which has to superintend the general administration of affairs, and proposes alterations whenever necessary, consisted in 1873 of thirty-one members, exclusive of the ministers who have a seat *ex officio*, and of the princes of the imperial house, who can claim the right to be present at the deliberations. The president, in 1873, was the Grand-duke Constantine, the brother of the Emperor. This Council is divided into three departments, namely, of Legislation, of Civil Administration, and of Finance. The first department is presided over by Prince Urussov, the second by Prince Peter of Oldenburg, the third by General Tchekin. The *Senate* (directing Senate), which is the high-court of justice for the empire, controlling all inferior tribunals, and examining into the state of public revenue and expenditure, and having power to appoint to a great variety of offices, and to make remonstrances to the Emperor, is divided into seven (before 1869 into eight) sections or committees, of which five sit in Petersburg and two in Moscow. In the *plenum*, or general meeting of the sections, the Minister of Justice takes the chair, as high procurator for the Emperor. The Holy Synod, established by Peter I., in 1721,

has the superintendence of all the religious affairs of the empire. The President of the Holy Synod is the Metropolitan of Novgorod. The fourth board is the Council of Ministers. It is divided into ten departments, namely:

	Incumbent.
Imperial House....	Count Alex. Adlerberg II. (app. 1870).
Foreign Affairs....	Prince Alexander Michael Gortchakoff (app. 1856).
War.....	General Count Miltutin (1862).
Navy.....	Admiral Crabbe (1860).
Interior.....	General Timascheff (1868).
Public Instruction.	Count Tolstoy (1866).
Finance.....	Privy-Councillor M. von Buntarn (1862).
Justice.....	Count Pahlen (1868).
Imperial Domains.	Privy-Councillor D. Valoniew (1872).
Public Works.....	Lieut.-Gen. Count Bobrinsky (1871).

The department of General Control, formerly a special department of the ministry, was in 1868 united with the Imperial Ministry of Public Works. The area and population of the great divisions of the Russian Empire were, according to the latest dates, as follows:

COUNTRIES.	Date.	Square Miles.	Population.
European Russia (including Poland).....	1867	1,924,307	69,904,541
Grand-duchy of Finland.....	1871	143,307	1,830,637
Countries of the Caucasus...	1871	169,751	4,893,332
Siberia.....	1867	4,717,990	3,327,637
Central Asia.....	1867	1,054,351	2,740,553
Total.....		3,008,738	92,135,740

European Russia, inclusive of the former kingdom of Poland, is divided into sixty governments, the area and population (in 1867) of which are given in the ANNUAL CYCLOPEDIA for 1872. The Grand-duchy of Finland consists of eight governments, which, according to the latest official dates, had the following area and population:

GOVERNMENTS.	Area.	Population in 1871.
Nyland.....	4,593	171,163
Åbo-Björneborg.....	9,445	300,128
Tavastehus.....	8,490	190,245
Viborg.....	13,754	281,578
St Michael.....	8,798	157,522
Kuopio.....	17,306	222,321
Wasa.....	16,043	304,094
Uleaborg.....	64,108	182,617
Total.....	142,367	1,899,657

The divisions of the countries of the Caucasus are as follows:

GOVERNMENTS, PROVINCES, AND DISTRICTS.	Area.	Population in 1871.
Government of Stavropol.....	27,374	437,118
Kuban District.....	36,077	672,224
District Ter.....	22,790	485,237
Dagestan.....	11,059	448,200
District Sakatal.....	1,587	56,802
Government of Tiflis.....	15,523	606,534
Government of Baku.....	15,095	513,560
Government of Erivan.....	10,577	452,001
Government of Kutais.....	8,730	695,491
Government of Elisabethopol.....	16,895	529,412
Military District of Sukhumi.....	2,234	70,701
District of Tchernomov.....	2,041	15,708
Total.....	169,781	4,893,332

The following cities of Russia have a population upward of 100,000 inhabitants.

Petersburg (1869)....	667,036	Odessa (1867).....	121,335
Moscow (1871)....	611,370	Kishinev (1867).....	103,043
Warsaw (1867)....	251,384	Riga (1867).....	102,043

The official estimate of revenue and expenditure for the year 1873, as sanctioned by the Emperor, is as follows: revenue, 517,349,834 rubles; expenditure, 517,322,162 rubles; surplus, 27,672 rubles.

The public debt of Russia, on January 1, 1872, amounted to 1,919,323,247 rubles.

According to the project of the transformation of the army, as elaborated by two imperial commissions, the Russian army is to consist, in future, of about 750,000 men on the peace-footing and of 2,085,000 on the war-footing.

The Russian fleet consisted, in 1872, of 268 vessels, having 34,277 horse-power, with 1,585 guns. The greater and more formidable part of this navy was stationed in the Baltic. The Black-Sea fleet numbered 32; the Caspian, 31; the Siberian or Pacific, 39; and the Lake Aral or Toorkistan squadron, 6 vessels. The rest of the ships were either stationed at Cronstadt or engaged in cruising in European waters.

The movement of commerce in 1871, exclusive of the precious metals, was as follows (value expressed in rubles): imports, 356,000,000; exports, 352,000,000.

The merchant navy, in 1872, was composed of 2,514 vessels, 185 of which were steamers.

The length of railroads in operation, on January, 1873, amounted to 14,582 kilometres. In November, 1872, the telegraph-lines in operation had an aggregate length of 57,780 kilometres, while the length of wire was 100,965 kilometres.

In January, Count Shuvalov was sent to London to inform the English Government of the intentions of the Ozar against Khiva and to calm, if possible, English sensibility. According to the speech from the throne, which was delivered on February 6th, the mission appeared to have been successful; at least, no remonstrances were officially made by England against the projected Russian expedition. The intrigues of the Khan of Khiva had, in the mean while, succeeded in exciting an insurrection among the inhabitants of the peninsula of Mangyshlak, in order to divert the attention of the Russians from the khanate. The chief instigator of the disturbances persuaded the people that the Russians intended to take away their flocks. He advised them to move at once to the borders of Khiva, where all the boys would receive a magnificent reward. Colonel Lamakin succeeded in preventing a general outbreak, but against one troop of Khirgeez, who refused to listen to his warning, he had to proceed by force. In February and March the Russian troops in several divisions set out on this expedition against Khiva, which was a most brilliant success, and the prominent

event in the history of Russia during the year 1873. (*See KHIVA.*)

In April, 1873, the Minister of Public Instruction presented to the Council of the Empire a draft prepared by a special commission, according to which 4,373 schools were to be established in the thirteen governments where thus far the provincial institutions had not commenced operations.

On April 3d, a new postal treaty between Russia and France was ratified by the representatives of both Governments at St. Petersburg.

Toward the close of April the Emperor of Germany paid a visit to his nephew, Emperor Alexander. He met with a most cordial and enthusiastic reception not only on the part of the entire imperial family, but also on the part of the masses of the population. Even papers like the *Gazette*, of Moscow, and the *Golos*, which formerly suspected Bismarck of an intention to annex the Baltic provinces to Germany, and strongly sympathized with France, now expressed themselves in a very sympathetic manner respecting both the Emperor and the German people.

The Shah of Persia arrived, on board of a Russian war-steamer, at Astrakhan, on May 15th. On May 18th he arrived at Moscow, where he remained two days. In St. Petersburg, he met, on May 22d, with a warm reception on the part of the Emperor and the Grand-dukes, and attracted general attention by his brilliant diamonds. After staying a few days, the Shah left for Berlin. Negotiations were begun between the representatives of Russia and Persia for a new commercial treaty, which was formally concluded on September 10th.

In June the official papers of the Russian Government announced that no Russian lady who, after January 1, 1874, continued to hear

lectures at the Swiss University of Zurich, would, after her return to Russia, be allowed to exercise any profession for which the authorization of the Government is required, nor have access to any examination, or any Russian institution. The number of young Russian ladies studying at Zurich has been steadily on the increase for about ten years, and in 1873 amounted to one hundred and eight, while the number of lady students from all other countries was only twenty. The great majority of these students has become imbued with socialistic ideas, and takes an active part in the socialistic agitations of the day.

The Russian Government in October made a new arrangement with the Porte, according to which all the Russian residents of Turkey, even if they acquire landed estates, shall retain the immunity conceded to them by former treaties with regard to their persons, dwellings, and movable property. The Russian ambassador in Constantinople, General Ignatiev, expressed, on this and other occasions, the most intimate friendship for the Government of Turkey, and the same sentiments were expressed by the official press of Russia, which even blamed Austria for being too ostentatious in the defense of the persecuted Christians of Bosnia.

Toward the close of the year, the Russian Government concluded a new treaty with the Khan of Bokhara, according to which the latter received the territory on the right bank of the Amoo Darya, which the Khan of Khiva had ceded to Russia; he engaged in his turn to open the whole land to free commercial intercourse with Russia, to abolish slavery, and to authorize the Russians not only to carry on trades, but also to purchase landed property. The Emir of Bokhara will keep a resident ambassador in Tashkend, and a Russian ambassador will reside in Bokhara.

S

SANDERS, GEORGE NICHOLAS, a noted politician and diplomatist, born in Lexington, Ky., February 21, 1812; died in New York City, August 12, 1873. His family were well known and esteemed throughout the South and West. His grandfather, Colonel George Nicholas, after whom he was named, proposed the State Rights resolutions of 1798, and was the successful advocate of the adoption of the Federal Constitution by Virginia, the opposition to which was led by Patrick Henry. George N. Sanders early entered political life and rendered effective aid as a speaker in the Democratic campaigns. One of his first political acts was the organization of a mass meeting in favor of the annexation of Texas. For his services during the Pierce campaign he was rewarded with the lucrative position of United States consul at Liverpool, England. Presi-

dent Buchanan appointed him Navy Agent at New York. In the campaign of 1860 he supported Mr. Douglas for the presidency. He sympathized with the South during the civil war, and was engaged with Mason, Slidell, and others, in endeavoring to secure the recognition of the Confederacy by England, France, and other European powers. In July, 1864, Mr. Sanders, with C. C. Clay, of Alabama, and James P. Holcomb, of Virginia, representing the South, entered into negotiations at Niagara Falls with Mr. Greeley, who had consulted with President Lincoln, for a treaty of peace between the two contending sections. No satisfactory conclusion was reached, and the negotiations were broken off. At the close of the war Mr. Sanders came to the City of New York, and had resided there till his death.

SAN SALVADOR (*REPÚBLICA DE SAN SALVADOR*), one of the five independent states of Central America; lying between latitude 13° and 14° 10' north, and longitude 87° and 90° west. It is bounded northeast by Nicaragua; southeast by Fonseca Bay; south by the Pacific Ocean; and northwest by Guatemala. The territory is divided into eight departments: San Miguel, San Vicente, La Paz, Chalatenango, Suchitoto, San Salvador, Sonsonate, and Santa Ana, with their capitals of the same names respectively, except La Paz, whose capital is Sacatecoluca.

The area of the republic comprises 9,600 square miles, according to Squier; but most authorities give it at 7,500 square miles approximately.

The population is computed to be about 600,000, distributed according to races in the following manner: whites, 9,000; Indians, 300,000; negroes, 1,000; and mestizoes, 290,000.

San Salvador, the capital city, had at the commencement of 1873 about 20,000 inhabitants. According to a census taken in October, it had been reduced to 16,000, a diminution to be accounted for by the earthquake of last March.

The President of the republic is General San J. Gonzalez, reelected on February 1, 1872, for a term of two years; the Vice-President is the licentiate M. Mendez; the Minister of Foreign Affairs, ———; the Minister of War and Finances, General B. Bustamante; Minister of Public Instruction, the Vice-President of the Republic; and the Minister of Justice, the licentiate M. Trigueros.

The President of the Corps Legislatif is M. Vasconcellos; President of the Senate, Dr. T. Silva; and the Bishop, T. M. Pineda y Zaldiva.

The army is 1,000 strong in time of peace, and the militia 5,000.

The chief staples of export are indigo, coffee, sugar, balsam of Peru, and India-rubber; the most important of these by far is the first. The exports of the year 1872 reached a total value of \$3,800,000; and the imports, \$3,000,000.

During the first half of the fiscal year 1872-'73, the importation through the custom-house at La Libertad, comprised 24,216 packages, at the value of \$21,099.40; the exports of 11,864 packages, valued at \$401,208.

A railway to connect the capital with the port of La Libertad is in process of construction. As early as February Mr. Bueron, the engineer, informed the Government that 1,415 metres of the line were graded and prepared for the laying of the rails; and that, with 1,910 metres more, the most difficult section—that from San Salvador to Santa Tecla—would be completed; so that only three kilometres would then be wanting to finish that portion of the line between the port of La Laguna and the capital. Five bridges required between

the Arenal and the Panteon were likewise in course of preparation; and it was regarded as probable that trains would begin to run in May over the section alluded to. The survey of the remainder of the line from Santa Tecla to La Libertad was in progress. The rails and rolling-stock for the road were shipped from Europe in 1872. The railways from San Miguel to La Union and from Santana to Acajutla via Sonsonate were progressing favorably.

There are 570 kilometres (about 220 miles) of telegraph in the republic, the lines communicating with those of Guatemala and Honduras. The working expenses of the whole telegraph system amount usually to about \$20,000, and the receipts are reported at \$22,000. These lines belong to the Government.

Much was done during the year to improve the national highways, and particularly the carriage-road from Chalatenango to the capital.

The revenue for 1873 was estimated at \$1,012,857.40.

The municipal revenues in the republic make an annual total of about \$200,000.

The consolidated debt of San Salvador was reported to be, on September 3, 1869, \$705,800, represented mainly by *libranzas*, treasury-bills, at six per cent. interest, with an annual amortization of \$24,557. The only other indebtedness of the country at that time was a floating debt of \$84,264. But this prosperous state of affairs underwent a complete change by the war with Honduras in 1872, which cost the Government, in all probability, little less than \$7,000,000.

In San Salvador, as in all the Spanish-American states, the lack of hands for the prosecution of the public works is sensibly felt, and seriously retards the material development of the country. The Government, despite the political broils and petty revolutions by which it is almost incessantly harassed, makes use of such means as it has at its disposal to remedy the evil; but as European immigrants are not easily obtained in the more prosperous of the Central-American republics, and much less so for San Salvador, coolies are looked to as the more immediate source of relief. A concession was secured in April for the introduction of 500 immigrants, Chinese and European.

At the beginning of the year, when the republic was at peace with the neighboring states, great anxiety was caused in political circles by the undecided and suspicious policy of Costa Rica, the real nature of whose relations with and intentions toward the sister republics of Central America it was somewhat difficult to define. But a short time before, a peace policy had been declared in a circular issued by Dr. Castro, of Costa Rica; but the resumption of the supreme power by President Guardia was immediately followed by the banishment of a number of leading citizens from the republic, and among them Dr. Castro himself—other acts of President Guardia (recorded in the articles *COSTA RICA*, *GUATEMALA*,

and HONDURAS in the present volume, and extending over the most of the year), tend rather to strengthen than to dispel the suspicions alluded to.

In October a treaty of alliance, offensive and defensive, was made with Guatemala and Nicaragua, and approved of by the Constituent Assembly then in session. A member of that body, speaking on the subject of the treaty, said it was by no means significant of a contemplated rupture of friendly relations with Costa Rica, but merely to lend moral force to the then present situation of the three contracting powers.

In December, 1872, a lake was dried up near a volcano that was some eighteen miles distant from the town of Santana. The lake had existed at its base for a period of 500 years. It was also observed at the same time that the volcano of Izalco, which had been in eruption until then, suddenly ceased to show signs of activity; and the supposition was that some strata which had previously intercepted communication between the two, had undergone a change of position, and so altered the channel of the subterraneous fire. Shortly afterward a violent earthquake was felt at Chinameca, department of San Salvador; a number of lives were lost, and many buildings destroyed; and that catastrophe was quickly followed by another still more awful, at San Vicente, a town of 10,000 inhabitants, the greater part of which was razed to the earth. The consternation of the people, who fled in every direction, and the groans of the wounded stifled by the noise of the falling houses, have been described as painful in the extreme. The buildings were mostly of adobes (a mixture of mud and straw, dried in the sun), and so enfeebled by previous earthquakes that the work of destruction was soon completed.

On the 4th of March several severe shocks of earthquake were felt in rapid succession at San Salvador City, and the people were so much alarmed that they betook themselves to the public squares, under shelter of temporary huts. On the night of the 19th of the same month, three shocks of unusual violence were observed, especially the third, which lasted so long that no house or public edifice was left standing in the city, save a few wooden cabins. Fortunately enough, the first two shocks were of sufficient severity to awake the inhabitants in time to quit their dwellings, and thereby the loss of life was very much less than it would otherwise have been. It is reported that about fifty persons were killed, and 500 wounded. To add to the horrors of the scene, two fires broke out in the course of the night; but, under the personal direction of President Gonzalez, efficient measures were promptly taken to extinguish the flames, and so prevent a general conflagration, preserve the public order, and rescue such persons as had escaped death, but were still confined among the ruins.

The day after the disaster the President issued a decree that the city should be rebuilt on the old site, a determination all the more surprising, as this is the eighth time the town has, since 1528, been completely destroyed by earthquakes, while partial destruction has recurred at intervals of nine years during that period. The ground on which San Salvador stood is described as being a mere shell; to a person placing his ear close to it, the noise of running water is distinctly audible; and any heavy body falling upon the surface produces a hollow sound. There is a tradition that the aboriginal inhabitants would never build in this locality.

A number of the more wealthy citizens have removed permanently to Santa Tecla and other adjacent towns.

In the following months the attention of the Government was devoted with unremitting zeal to the reconstruction of the capital, and the organization of the public-school system, and of the University of San Salvador. The last two months of the year were marked by signs of increasing prosperity in agriculture and commerce; the fairs in the several towns were held as usual; and any reactionary movements, now in one department, and now in another, were regarded with indifference by the Government.

A national exhibition was to be inaugurated in San Salvador on January 1, 1874, the main objects of which were—1. To collect together plants, seeds, and animals, of the best kinds from abroad, especially those applicable to the arts and agriculture of the country, and to improve them; 2. To bring together specimens of all the native manufactures and natural products of the republic.

Dr. Gregorio Arbizú, late Minister of Foreign Affairs, died at San Salvador City, on December 10, 1872, after a protracted illness.

SANTO DOMINGO, or HAYTI, one of the Greater Antilles, and, after Cuba, the largest and most beautiful of the West India Islands. It is occupied by two separate states: HAYTI, and the DOMINICAN REPUBLIC.

HAYTI, an independent republic, occupying the western portion, and divided from the Dominican Republic by an irregular line extending from the mouth of the river Massacre, which empties into the bay of Manzanillo on the north coast, to that of Pedernales or Anse-à-Pitre on the southern coast; and lying between latitude 17° 55' and 19° 55' north, and longitude 71° 52' and 74° 38' west; comprises an area of 10,204 square miles, inclusive of the smaller islands of La Tortue, La Gonâve, and others adjacent to its shores.

The territory of the republic is divided into six departments, each of which is subdivided into arrondissements and communes. Its population is computed at 572,000, the great majority of whom are negroes or mulattoes.

Port-au-Prince, the capital, and principal seaport, has a population of about 21,000.

The Government is based upon the Consti-

tation proclaimed on June 14, 1867, and by the terms of which the executive power vests in a President, who is elected by the people for a term of four years, and who must have attained the age of thirty-five years. No President can be reelected before the lapse of at least four years after his term of office has expired. Five ministers (of Interior and Agriculture, Justice and Public Worship, Finance, War and Marine, and Foreign Affairs), aid the President in the administration of the republic. The judicial power resides in a High Court of Cassation, which is the highest court of appeals, with superior courts in the departmental capitals, and subsidiary and primary courts in the arrondissements and communes. The legislative authority is vested in a National Assembly, composed of two bodies—the Senate and the Chamber of Deputies—these being elected by direct vote of all male citizens, for three years, and the senators are appointed by the deputies themselves for two years.

The President is General Nissage-Saget, elected March 19, 1870; and the Vice-President, General M. Domingue. The Minister of the Interior and of Agriculture is General Th. Lamothe; Minister of Justice and Public Worship, O. Rameau; Minister of Finance, O. Haentjens; Minister of War and Marine, General S. Liantand; and Minister of Foreign Affairs, General Th. Lamothe (*ad interim*). The President of the Senate is Dupont; and the President of the Supreme Court of Justice, D. Lafond. There are seven civil, criminal, and correctional tribunals at Port-au-Prince, Aux Cayes, Cape Haitien, Les Gonaïves, Jacmel, Jérémie, and Port-de-la-Paix, respectively; and six tribunals of commerce, one at each of the foregoing places, except the last. Guillaux is the name of the present archbishop.

There are no definite returns of the present strength of the Haytian army. There are in the republic four colleges, and each commune has a number of common and grammar schools.

The chief staples of export are coffee, cotton, cacao, wax, logwood, fustic and other dyes, mahogany, and tortoise-shell. Cotton, though always cultivated in Hayti, has varied in quantity at different periods; about 7,200,000 lbs. were annually sent to France before the Revolution; in 1858 the amount shipped was but 463,608 lbs.; after the outbreak of the United States civil war, the rise from 4*d.* to 2*s.* 6*d.* per lb. in England, served to stimulate cotton-planters, and increase the exports of that article to 5,000,000 lbs.; nor did the great fall in prices in 1865 cause any diminution in the crop of 1866, which reached 7,000,000 lbs.; but owing to the civil war in 1868, there was a considerable decrease, the total shipments being only 2,000,000 lbs. An interval of peace, however, brought the exports for 1871-'72 up to 4,180,315 lbs. But such is the disorganized state of society, so great

the lack of field-hands, and so demoralizing the system of peasant culture, that the yield of the most favorable year above mentioned is by far inferior to the capabilities of the country.

The production of coffee has been less intermittent. The mean annual exports of that berry, during the last fifteen years of the eighteenth century, was 70,000,000 lbs., approximately; from 1850 to 1860 it was 45,000,000 lbs.; and in the decade immediately following, 60,000,000 lbs. All the coffee of the island is known in commerce under the common designation of St. Domingo. That from Hayti is of very good quality, and relatively cheap, but shippers have too often been so unscrupulous as to send it away imperfectly hulled, and even with an addition of sand or gravel to increase the weight; hence, European purchasers, in general, are strongly prejudiced against it. It is, for the most part, sent to France, and is there bought in large quantities for the army. In the year 1872 the coffee exports to Hamburg amounted to 19,303,858 lbs.; and in 1873 to 9,401,666 lbs. The home consumption is set down at nearly 2,000,000 lbs. per annum. The production of cacao, much neglected of late years, might be extended indefinitely.

The imports from Great Britain include, though in small quantities, almost every article manufactured in that country, which owes this advantage to its direct steam communication with Hayti. Large quantities of British hardware are imported, and galvanized iron has of late years been extensively taken for roofing houses, a precaution rendered indispensable by the frequency of disastrous fires. Of provisions, which trade is mostly monopolized by the United States, only the high classes come from England. Certain kinds of American cotton fabrics now find a good market in the republic; for, though somewhat higher priced than the British, they are found to be more durable.

The total value of the imports, for the year ending September 30, 1872, was \$6,860,408.

The imports from England in 1870, \$3,900,000, were over one-half the total imports into the republic; and the same proportion was observed in the following year, notwithstanding the aggregate amount of the imports fell to \$2,500,000. The consumption of petroleum is gradually increasing: in 1871 the shipments from the United States were 40,399 gallons; 69,377 gallons in 1872; and 87,421 in 1873.

The shipping movements at all the ports in 1871-'72 were: 904 vessels entered, with an aggregate of 165,908 tons; and 850 vessels cleared, with 186,985 tons. Vessels under 50 tons burden, not being subject to tonnage-dues, do not appear on official returns.

There is little cargo in Hayti for American ports, hence it is advantageous to ship coffee and cotton for Europe *via* New York, there to be transhipped.

The finances of the republic, owing to protracted civil wars, are in extreme disorder; so that accurate statements thereof can scarcely be obtained. In 1870 the estimated revenue was 40,000,000 *gourdes*, or \$2,500,000; and the expenditures double that sum.

The income and outlay are, however, placed in an entirely different light by the President, who, in his message to the Corps Législatif, under date August 12, 1873, mentions the revenue as being "four millions and a half;" and the expenditure for the year ending September 30, 1872, as having amounted to only \$2,067,867.40.

There is a large floating debt, proceeding from the accumulation of the paper money successively emitted by several administrations, especially from 1853 to 1855, when the country was flooded by an annual emission of some \$4,500,000. This currency, which, in 1872, amounted to about \$800,000,000, has frequently been subject to considerable depreciation, fluctuating in the year last mentioned between 165 and 350, and becoming almost valueless during the late civil war. A reform was initiated by the Government to redeem the paper money; but as the rate of exchange was fixed at 300 per cent., the commercial value being 250 paper dollars to one of silver, the scheme proved abortive, and was succeeded by another, the evil effects of which are still sensibly felt in the mercantile community. This new project consisted in a temporary augmentation, first of 10, and again of 25 per cent., in the already exorbitant duties upon the exports and imports. As an almost immediate result of this short-sighted measure, smuggling was established upon a systematic basis; but one-half of the duties prescribed by law were collected by the Government; and the other half was divided between the merchants and the custom-house officials themselves.

In December of the year mentioned, more efficient measures were adopted for the purpose of relieving the country from the burden of the currency, a task which, apparently, presented no great difficulty after all, at a time when the paper money had reached such a degree of depreciation that one dollar in specie was equivalent to three hundred paper dollars. The plan now proposed was, to withdraw the notes from circulation, and supply their place with a corresponding quantity of coin. It is true the Government had not enough specie at command to begin this work of redemption; but there was, nevertheless, a certain amount in the reserve fund, and that added to the proceeds of a loan negotiated with four merchants of Port-au-Prince, furnished the Government about \$1,000,000, wherewith to inaugurate the movement. A decree was issued to the effect that in four months from the 15th of December the paper currency should cease to be a legal tender in the republic, and that the twenty-dollar notes (which had been largely

counterfeited) should at once cease to circulate. It was feared that the sudden withdrawal of the notes of the denomination mentioned, and which constituted about two-thirds of the whole currency, would be followed by popular tumults in different parts of the state; but such apprehensions were of course groundless, except in the event of tardiness on the part of the Government to fulfill its promise to give specie in exchange for the paper.

The navy is at present composed of two gunboats; a third, the *Terreur*, formerly the United States gunboat *Pequot*, and purchased in 1870, was announced to be sold in February, 1873.

An uprising took place in March at Gonaïves, under one Gallumette, a black man, chief leader of the party inimical to the Government, but it was soon suppressed by the troops; many persons were arrested, and some sixty executed without trial. Gonaïves was immediately declared in state of siege.

According to the constitution, the first Monday in April is the day fixed for the opening of the Corps Législatif; but on that day the usual number of members necessary to form a quorum were not present, so that the session was postponed, notwithstanding the suggestion from the cabinet that the members then assembled might be conveniently constituted a quorum. On May 2d, after long deliberation, the House was organized with forty-five members, General Brice being elected president (Speaker); the Executive was notified of the fact, but he promptly transmitted an answer, signed by all the cabinet, and to the effect that, "as the Senate could not organize on the day lawfully appointed therefor, on account of the absence of one single member, so it must now await the completion of its constitutional quorum of two-thirds of its members before being recognized by the Executive."

In the same month the Ministers of the Interior and of Foreign Affairs tendered their resignations, which were accepted; and a new cabinet was formed.

President Saget issued a decree on May 9th, convoking the legislative body in session extraordinary for the first Monday in July.

The President's message to that body under date August 18th, was of remarkable length. One of the topics referred to therein was the convocation by him of an extraordinary session of the Chambers, for which measure he cited as the chief motive, the urgency to deliberate upon the foreign claims against the Government in order "to avoid the possibility of new complications with foreign powers."

DOMINICAN REPUBLIC (*República Dominicana*), an independent state occupying the eastern portion of the island of Santo Domingo, or Hayti.

The territory of the republic is divided into five provinces, which are Santo Domingo, Azua de Compostela, Santa Cruz del Seybo,

Santiago de los Caballeros, and Concepcion; the area comprises 17,826 square miles; and the population is estimated at 186,500. An estimate made in 1872 by the ecclesiastical court gave the number of inhabitants at 207,000; but these figures are evidently exaggerated, and the former certainly approach more closely to the truth. Some nine-tenths of the people are said to be native Dominicans; the pure African type is not here common as it is in the other portion of the island; nor are whites of unmixed blood numerous; but the great majority are hybrids in whom the white element seems to predominate.

The capital, Santo Domingo, the oldest city in the New World, has a population of some 15,000. The Government, based upon the Constitution of November 18, 1844, and modified November 14, 1865, after the expulsion of the Spanish troops, consists of a President, indirectly elected for a term of four years; and a national Congress composed of two Houses: the *Consejo Conservador*, and the *Tribunado*. The members of the Consejo, five in number, and those of the Tribunado, fifteen, are indirectly elected, with restricted suffrage, for six years. The powers of the Congress, which embrace only the general affairs of the state, extend to declaring war or peace, and pardoning criminals; each province has its own legislature.

The President is aided in the administration by four secretaries or ministers appointed by himself: they are those of Finance, Justice, War, and Foreign Affairs.

The President of the Republic is Señor Don Ignacio Gonzales, elected December 20, 1873.

The staple articles of export are coffee, tobacco, guano, hides, wax, gold, silver, sugar, and logwood, and small quantities of mahogany and other cabinet woods.

A revolutionary movement against the administration of Baez was inaugurated early in the year; the principal leaders were Cabral, Laperon, and Altamira; many encounters took place with the Government troops, the latter being almost always unsuccessful; and the revolution ended in the downfall of Baez, whose rule was regarded as in every respect prejudicial to the interests of the country.

SAVAGE, JAMES, LL. D., an American archaeologist and genealogist, born in Boston, July 18, 1784; died in that city, March 8, 1873. Mr. Savage was a lineal descendant from Thomas Savage, one of the early settlers of New England. He graduated from Harvard College in 1803, and was the last survivor of his class. After graduation he studied law, and was admitted to the bar and common practice in 1807. He was subsequently a Representative and Senator in the General Court, or Legislature, of Massachusetts, a member of the Council, orator for the Fourth of July in 1811, and a member of the State Constitutional Convention in 1820. He was for more than a score of years treasurer of the first savings-

bank established in Boston, and for nineteen years he served in the same capacity the Massachusetts Historical Society, of which body he was at one time president, and the editor of several volumes of its collections. He belonged to several other associations, so that it may be said no good cause of letters or charity failed of his active sympathy. As an antiquarian and historian his pen was busy, and many are the cherished memorials of its diligence, looked upon and consulted as authorities, the most prominent of them being, perhaps, his admirably annotated edition of "Winthrop's Journal." Among his other published works were: "A History of the Adoption of the Federal Constitution," 1832; "A Genealogical Dictionary of the First Settlers of New England," 4 vols., 8vo, 1860-'62; and many articles in the *Monthly Anthology* and *North American Review*. He was a member of the New England Historical and Genealogical Society, and of the American Academy of Arts and Sciences. Harvard University conferred on him the degree of LL. D. in 1841.

SAXONY, JOHN NEPOMUCENE MARIE-JOSEPH I., King of, a German monarch, born in Dresden, December 12, 1801; died at Pillnitz, six miles from Dresden, October 29, 1873. He was the second son of Maximilian, Elector of Saxony, and the Princess Caroline, of Parma. In his youth, he studied jurisprudence and literature, and became an accomplished scholar. In 1821 he entered the Ministry of Finance, at Dresden, where he attained high distinction from his financial ability during the next ten years. In 1831 he retired from office, to take command of the National Guard of Saxony. He was at the same time a member of the Saxon Diet, and took an active part in framing the constitution of that year. He also devoted much time to literary and archaeological pursuits, and published a German translation of Dante's "Divina Commedia," with historical and critical notes, and an indifferent translation of Shakspeare into German. He was President of the Saxon Society of Antiquarians from 1824 till his death, and in 1852 and 1853 presided over the German Historical and Antiquarian Society. During the reign of his brother, Friedrich August II., who ascended the throne in 1836, Duke John acted with the reactionary party in the religious and political contentions which culminated in the outbreaks of 1848 and 1849. He supported the repressive policy of Baron von Beust, the principal minister, and in concert with him virtually dictated the policy of the Government. In 1854, on the death of his brother, he became King. Baron von Beust continued in office, and under his direction Saxony supported the Austrian policy of semi-hostility to the allied powers during the Crimean War, and became the champion of the smaller states in the contentions arising out of the Schleswig-Holstein question. Saxony also sought to avert the impending con-

flict between Austria and Prussia by proposing a Confederation of the middle states, which it was supposed would restrain the encroachments of these powers. This project, however, was set aside by the outbreak of war between Austria and Prussia in 1866. After ineffectual efforts to maintain an armed neutrality, Saxony placed her forces at the service of Austria, and was in a few days completely in the power of Prussia. King John fled to Bohemia, and the treasures of the royal house and of the state were removed to the same country. The decisive battle of Sadowa having placed Austria and her allies at the mercy of Prussia, King William was disposed to annex Saxony, but, yielding to the counsels of Prince Bismarck, he was satisfied with the fortress of Königsstein and a heavy indemnity. Some months later Saxony became a member of the North-German Confederation, and lost the political importance she formerly enjoyed. King John loyally accepted the results of the war, and cordially supported the German cause in the conflict with France, in which his troops acquired distinction in the field. In regulating the internal affairs of his kingdom, the late King, soon after his accession, relaxed the conservative policy he had pursued, and supported constitutional government and religious toleration. In spite of the opposition of his nobles, who wished to preserve their feudal rights, he established royal courts of justice, and approved the abolition of capital punishment by the Chambers in 1868. His son, Prince Albert of Saxony, who succeeds him, distinguished himself in the Franco-German War of 1870, for his admirable management of the Saxon contingent, known as the Twelfth Army Corps, at Gravelotte and Sedan, and subsequently before Paris.

SCHMUCKER, SAMUEL S., D. D., Emeritus Professor of Theology in the Theological Seminary at Gettysburg, and an eminent Lutheran theological writer, born in Hagerstown, Md., February 28, 1799; died in Gettysburg, Pa., July 26, 1873. He was the son of Rev. J. G. Schmucker, D. D., an eminent Lutheran minister at York, Pa., for many years. He was an alumnus of Princeton College, but for some reason did not graduate there, studied theology with his father, entered the ministry in the Lutheran Church, and was settled for his first pastorate at Newmarket, Va. He was active and influential in the organization of the General Synod at Hagerstown, in 1820, and in the establishment of the Theological Seminary at Gettysburg, in which he served as president and Professor of Didactic Theology for nearly forty years, and thus became the chief preceptor of hundreds of Lutheran ministers in this country. Subsequently, in consequence of the infirmities of advancing age, he resigned his position, and was invested by the trustees with the honor of Emeritus Professor of Theology in the institution, which he held at the time of his

death. In addition to his prominent labors in the Lutheran Church, he took a deep interest in the union of all Protestant Churches in one general representative confederation or alliance, and in 1830 published "A Fraternal Appeal" to the Churches, presenting the general features of a plan for such an alliance, and recommending it to the favorable consideration of all Protestants. He presented this plan as a delegate at the meeting of the Evangelical Alliance at London, in 1846, and had since then at intervals called the attention of the Protestant Churches of this country to its character and practicability. Dr. Schmucker's published works were: "The Christian Temple," 1824; "Popular Theology," 8vo, 1834; "Portraiture of Lutheranism," 8vo, 1840; "Psychology," 8vo, 1842; "Papal Hierarchy," 8vo, 1845; "Discourse on the Reformation;" "The Church of the Redeemer;" "Christian Pulpit," 1846; "Spiritual Worship of God," 1860; "The True History of Christ's Church," 1870. He had also translated "Storr and Platt's Theology," and prepared the "Lutheran Manual," "Lutheran Symbols," and "Lutheran Hymn-Book of 1828;" edited the *Evangelisches Magazin*, 1830, and had been a frequent contributor to the *Biblical Repository*, the *Evangelist Review*, the *Lutheran Observer*, and other religious periodicals, and had published many single sermons and addresses.

SEDGWICK, REV. ADAM, F. R. S., F. G. S., LL. D., Professor of Geology in Cambridge University till 1865, born in Dent, Yorkshire, January, 1786; died in Cambridge, January 28, 1873. He graduated as Fifth Wrangler from Cambridge in 1808, became Fellow of Trinity College in 1810, and in 1818 succeeded Prof. Hailstone as Woodwardian Professor of Geology in the university. Between 1829 and 1832 he was President of the Geological Society of London. As a geologist he gave his attention chiefly to the study of the palæozoic and crystalline rocks of England and Wales. He contributed "A Synopsis of the Classification of the British Palæozoic Rocks" to Prof. McCoy's descriptive catalogue of the "British Palæozoic Fossils" contained in the university museum collection. His remaining geological works consist of forty or fifty papers published in scientific periodicals, and the "Transactions" of the Royal, Philosophical, and Geological Societies. Besides these he had published two pamphlets on the "Right of Nomination to Professorships," in 1823; "Four Letters in Reply to R. M. Beverley, Esq.," in 1836; and a celebrated "Discourse on the Studies of the University of Cambridge," first published in 1850, and in subsequent editions expanded into a volume. He had been for some years Vice-Master and Senior Fellow of Trinity College. In 1834, Mr. Sedgwick became Prebend of Norwich. He was a conspicuous opponent of Mr. Charles Darwin's theory of the origin of species by means of natural selection, and was an es-

teemed associate of the great geologists of England. In 1858 he was elected a corresponding member of the French Institute.

SMET, Rev. PETER J. DE, a Jesuit missionary among the Indians in Oregon, born at Dendermonde, in Belgium, in 1801; died at the St. Louis University, St. Louis, May 26, 1878. He was educated for the priesthood in the Jesuit seminary at Mechlin, and was ordained a deacon in 1820. He was induced to come to America by Father Nerinckx, a Belgian missionary, and landed in Baltimore, in October, 1821. After two years of preparation in a seminary in Maryland he went to St. Louis in 1823 to join the Jesuit mission there. At that time St. Louis had a population of only about 5,000 people, and the country extending to the Rocky Mountains was unexplored and inhabited by roaming Indian tribes. Father de Smet entered with great zeal on his missionary labors. He traversed vast tracts of country, penetrated as far as Oregon, which he reached by crossing the Rocky Mountains long before the pathway had become comparatively known by the influx of immigrants into California. He lived among the Indians, learned their language and customs, and submitted voluntarily to the greatest privations. He wrote a work entitled "Letters and Sketches, and Residence in the Rocky Mountains," published in Philadelphia in 1843, which was followed in 1847 by another named "Oregon Missions and Travels over the Rocky Mountains." In 1863 his "Western Missions and Missionaries" appeared, and was followed in 1865 by a similar work in German, printed in St. Louis. Relying solely upon religious influences, he succeeded in inducing large numbers to embrace Christianity, and refrain from barbarous acts. He visited his native land from time to time, and succeeded in inducing many young clergymen to join his community at St. Louis. During the civil war when it was important to restrain some Indian tribes, who evinced hostile intentions, he was invited to Washington to confer with the authorities. When there he was offered as many men and as much money as he might require, but he declined both, and returning went among the dissatisfied, bearing, as was his custom, a religious banner, and succeeded in promoting peace. He made during the past two years his last journey to Belgium, and was everywhere received with marked attention. It was while returning from this trip, which like several previous ones he had undertaken for charitable purposes connected with his labors among the Indians, that he received injuries which unquestionably hastened his death.

SOUTH CAROLINA. The most important topic of public discussion in South Carolina, during the year, was the condition of the finances of the State and its public credit. The General Assembly, which adjourned in the latter part of February, after a session of three months, considered several measures

looking to a solution of the financial difficulties, but without accomplishing any satisfactory results.

Questions affecting the finances were brought before the courts in two important cases. One of these suits was instituted by certain taxpayers, to prevent the payment by the State of what was known as certain "conversion bonds," amounting to \$7,191,700, which it was alleged had been fraudulently issued, and were therefore void. It appears that in March, 1869, the General Assembly passed "an act to provide for the conversion of State securities," by which the State Treasurer was authorized, on the application of any person holding stock of the State, to receive the same, and issue in lieu thereof coupon bonds, signed by the Governor and Treasurer, due in twenty years, with six per cent. interest, payable semi-annually; and also, in the same manner, to issue stock of the State in exchange for coupon bonds. The legality of this transaction, as well as the validity of other State securities, having been subsequently questioned, the Legislature declared, by an act approved March, 13, 1872, that such obligations were valid and binding upon the State.

The plaintiffs in this action averred that, under the constitution, the power of the General Assembly to construct public works is limited to the purpose of defraying extraordinary expenses; that such debts must be for some single object, to be distinctly specified; and that no such law shall take effect until it shall have been passed by a two-thirds vote of each branch of the Legislature, to be recorded by yeas and nays. It was further claimed that neither of the laws above cited had been passed in conformity with such constitutional provisions.

Under the authority so given, securities to the amount of \$7,191,700 had been issued.

The plaintiffs further averred "that the whole pretended issue of the said \$7,191,700 of bonds was made without taking up, cancellation, or extinguishment of other stock or bonds previously issued in behalf of the State; that such issue was fraudulently made, with the intent to create a new debt of the State, and was not issued in lieu of other stock or bonds of the State previously issued; that all the said bonds, amounting, as aforesaid, to \$7,191,700, are therefore illegal, fraudulent, and void, and have not created, and do not now constitute, a valid obligation of the State of South Carolina." Upon hearing the above complaint, and upon motion, Judge Carpenter issued a temporary injunction, restraining the fiscal officers of the State from levying or collecting any tax for the payment of the interest on any of the bonds referred to. The other action was brought by Morton, Bliss & Co., who applied for a *mandamus* against the Controller, requiring him to cause a tax levy to be made in order to raise funds sufficient for the payment of the interest due, and to become due,

upon five different classes of bonds. The suit was upon five bonds of \$1,000 each, but the bonds of all the classes represented amounted to \$3,549,000. The five classes of bonds included in the pleadings were issued under the following authorities: 1. "An act to authorize a loan to redeem the obligations known as the bills receivable of the State of South Carolina," passed August 26, 1868; 2. "An act to authorize a State loan to pay interest on the public debt," passed August 26, 1868; 3. "An act to authorize a loan for the relief of the Treasury," passed February 17, 1869; 4. "An act to provide for the appointment of a land-commissioner, and to define his powers and duties," passed March 27, 1869; 5. "An act to amend an act entitled 'An act to provide for the appointment of a land-commissioner, and to define his powers and duties, and for other purposes,'" passed March 1, 1870.

The ground upon which the relators placed their demand for the relief sought was, that by the constitution of the State, and the several statutes passed in pursuance thereof, under which the bonds in suit were issued, it is made the absolute duty of the Controller to take such steps as are authorized by the statutes fixing the powers and duties of his office, in order to cause a tax to be levied on the taxable property of the State, sufficient in amount to pay the interest upon the bonds of the five specified classes. By the decision of the Supreme Court of the State, rendered in August, the relief prayed for was granted. The court held not only that the Controller was bound to raise the money, but that the constitution requires the Treasurer to pay it out without any legislative act or authority. As this decision required the Controller to order the necessary levy on or before the 15th of November, and as an act had been passed by the General Assembly at its previous session, withdrawing from the Controller all authority to order any tax levy, which, however, for some unexplained reason, had not been presented to the Governor, and had therefore not become a law, Governor Moses summoned an extra session of the Legislature, which assembled October 21st. "I therefore thought it proper," says that official, "that you, as the representatives of the people, in your legislative capacity, should be afforded the opportunity in season, after further reflection, of affirming your previous action in the premises, reflecting, as you do, the direct expression of the popular will." At the same time, the Governor, after "a thorough and exhaustive examination of the various classes of our public debt," gave the following results:

BONDED DEBT.

Ante-reconstruction bonded debt, outstanding October, 1873.....	\$3,761,718 41
Post-reconstruction bonded debt, first subdivision, outstanding October, 1873.....	2,748,880 60
Post-reconstruction bonded debt, second subdivision, outstanding October, 1873.....	9,341,088 34
Total.....	\$15,851,627 35

FLOATING DEBT.

The interest due and payable upon the bonded debt, on October 31, 1872, as appears by the Treasurer's books, amounts to.....	\$1,423,912 85
The interest due and payable on October 31, 1873, amounts to.....	918,880 28

Total interest, accrued and accruing, October 31, 1873..... \$2,342,793 18

There is also an unfunded balance of \$116,751.63, fundable under the acts of September and December, 1866, which may properly be included in the floating debt of the State. The special committee appointed by the Legislature, session of 1872-'73, to investigate the amount of outstanding pay certificates and bills payable, reported that they had examined outstanding pay certificates and bills payable to the amount of \$401,869.98. The total amount outstanding may be safely estimated at \$500,000. It is also estimated that there is an unpaid balance of pay certificates, of the session of 1872-'73, amounting to about \$100,000. It appears by the Treasurer's books that the State is charged with the sum of \$1,797,352.94, on account of \$3,395,000 of bonds surrendered by the Blue Ridge Railroad in accordance with the provisions of an act of the Legislature, approved March 2, 1872. There is also upon the Treasurer's book a large miscellaneous floating debt, including the unpaid free-school fund, and all unpaid appropriations, not payable as deficiencies after October 31, 1873, which is estimated at about \$450,000.

RECAPITULATION.

Interest upon bonded debt to October 31, 1873.....	\$2,342,793 18
Debt funded under acts of September and December, 1866.....	116,751 63
Pay certificates and bills payable, sessions of 1870-'71, 1871-'72.....	500,000 00
Pay certificates, session of 1872-'73.....	100,000 00
Debt due Blue Ridge Railroad.....	1,797,352 94
Miscellaneous floating debt.....	450,000 00
Total.....	\$5,306,897 75
Funded debt.....	\$15,027,503 35
Floating debt.....	5,306,897 75

Aggregate floating debt and funded debt... \$20,333,901 10

The Governor, admitting that the State is unable to pay the interest upon the debt as it stands, recommended that the bondholders be induced to consent to a reduction of the volume of the debt; in which case the Treasurer will be authorized to receive the outstanding bonds and issue in exchange therefor new bonds, or securities representing a less amount.

The extra session of the Legislature was followed by the regular session which began November 25th, and continued until December 22d, when it adjourned to January 20, 1874. The extra session passed a bill to deprive the Controller-General of the power to levy a tax. The leading topics, however, before the Legislature during this period, related to the debt and taxation. The tax-bill as passed comprises a levy of fifteen mills, as follows:

1. One and a quarter mill for executive and judicial departments.

2. One and a quarter mills for penal, charitable, and educational institutions.

3. Two mills for public schools.

4. One and a half mill for expenses of extra and regular sessions.

5. One mill for public Printing.

6. Three and a quarter mills for deficiencies.

7. Three-quarters of a mill for Bank and Trust Company (H. Solomon).

8. One mill half-yearly interest on public debt.

9. Three mills for county purposes.

Of the measures before the Legislature toward the close of the year for the arrangement of the debt, the most prominent, known as the "omnibus bill," proposed to "scale" the valid bonds, both the old and the new, at fifty per cent., and the fraudulent conversion bonds at thirty per cent.

The amount of taxable property in the State in 1873 was \$167,481,092, including \$112,884,146 real and \$55,096,946 personal property.

In 1873 the scholastic population, which includes those between six and sixteen years of age, was 230,109, of whom 145,127 were colored. The school attendance was 88,753, including 46,535 colored. There were 2,017 schools, in charge of 2,310 teachers, being an increase during the year of 98 schools and 125 teachers. From the above figures it appears that about two-thirds of the children of the State are growing up in ignorance.

The Superintendent of Education reports that the progress and success of the school system has been greatly retarded by the unsatisfactory condition of the finances of the State, and recommends that proper legislative action be taken to secure such appropriation as will cover past indebtedness.

The present State government, composed of "regular" Republicans, is as follows:

Governor, Franklin J. Moses, Jr.; Lieutenant-Governor, Richard H. Gleaves (colored); Secretary of State, Henry E. Hayne (colored); Attorney-General, Samuel W. Melton; State Treasurer, Francis L. Cardozo (colored); Comptroller-General, Samuel L. Hoge; Adjutant and Inspector-General, Henry W. Purvis; Superintendent of Education, Justus K. Jillson. The Legislature is composed as follows:

MEMBERS.	Senators.	House.	Total Ballot.
Republicans.....	95	100	125
Democrats.....	8	24	23
Republican majority.....	17	76	93

South Carolina had 378 miles of railroad in 1851, 973 in 1861, and 1,322 in 1873. The following table shows the railroads lying wholly or partly within the State, with the termini of the lines as projected, the length of the entire road, and the number of miles in operation, in 1873:

NAME OF ROAD.	TERMINI.	Miles distance between termini.	Miles in South Carolina, as in operation in 1873.

CHARLESTON.—The chief commercial city of South Carolina is Charleston, which is situated 100 miles south-southeast of Columbia, the capital of the State; 82 miles north-east of Savannah, Ga., and 455 miles south-southwest of Washington, D. C. The city, of which a fine view from the bay is given in the accompanying illustration, stands at the confluence of the Ashley and Cooper Rivers, which here unite and form a spacious harbor. These rivers run a parallel course for nearly six miles, widening as they approach the sea, thus gradually narrowing the site of the city into a peninsula. The city is built upon low and level land, and, to one approaching by water, seems to rise from the sea. The harbor is a

large estuary extending about seven miles southeast to the Atlantic, with an average width of two miles. It is landlocked on all sides, except an entrance of about a mile in width. South of this entrance, extending along the coast, is Morris Island, about five miles long, and three miles wide. The width of the inner harbor at its mouth is something over a mile. The passage is defended by four fortresses. On the right hand, at the entrance, is Fort Moultrie, on Sullivan's Island, occupying the site of the fort which, on June 28, 1776, beat off the British fleet of Sir Peter Parker. On the left hand, raised upon a shoal in the harbor, and directly covering the channel, is Fort Sumter. Immediately in front of the

city, and but a mile from it, is Castle Pinckney, covering the crest of a mud-shoal, and facing the entrance. A little south of Pinckney is Fort Ripley, a small square work, built in 1862. On the south side of the harbor, about one and a quarter mile from the city, are the ruins of Fort Johnson. The outer harbor, lying within the bar, extends from Sullivan's Island to the south channel, below the light-house, a distance of six miles. The bar consists of successive ranges of sand-banks, which stretch away before the entrance for several leagues; and, as these ranges consist in part of quicksand, they are liable, from storms and undercurrents, to occasional change of locality, greatly increasing the difficulty of pilotage. Between these successive ranges of sand are formed several channels of varying depths of water. There are four of these channels: the ship-channel, with 16 feet of water at ebb; the small or middle channel, with 14

feet; Lawford's or the south channel, with 10 feet; and Maffit's, close to the shores of Sullivan's Island. The ship-channel is eleven and a half miles from the city; the middle, seven and a half, while that of Maffit is still nearer. The lighthouse at the entrance of Charleston harbor is on Light-house Island, and west of the ship-channel, latitude $32^{\circ} 41' 55''$ north, longitude, $79^{\circ} 52' 29''$ west. The tower is of brick, 110 feet high; the light is at an elevation of 133 feet above the sea. It may be seen at a distance, in good weather, of twenty nautical miles. The beacon in front of the main light is visible at a distance of ten nautical miles. The height of the light above the sea-level is fifty feet. There are beacons also on Morris and Sullivan's Islands, at Fort Sumter, Castle Pinckney, Mount Pleasant, and on the battery at White Point, all within the harbor. From the entrance of the middle channel, a full view of the city is obtained, guided

CITY OF CHARLESTON, S. C.

by the spire of St. Michael's Church, which bears from this point about north, 68° west. The surrounding country is noted for the picturesque character of its scenery. Rice and cotton fields, oaks, magnolias, myrtles, and jasmynes, abound in profusion. On Sullivan's Island are many cottages owned by the wealthy citizens of Charleston and vicinity, and occupied by them during the summer. The mean annual temperature at Charleston is about 65° . The population in 1800 was 18,711; 1810, 24,711; 1820, 24,780; 1830, 30,289; 1840, 29,261; 1850, 42,985; 1860, 40,915, of whom 17,146 were colored; 1870, 48,958, of whom 22,749 were colored. Only 4,892 of the total population in 1871 were foreigners. The city covers a large extent of territory. The dwellings are generally isolated, having large open grounds on every side. The city is laid out with tolerable regularity; the streets, with few exceptions, crossing at right angles. The houses are mostly of brick or wood. There are few regular blocks or rows of buildings, and no regularity; but what is lost in this respect is gained in variety, and with fine gardens, open plats of shrubbery, shade and fruit

trees, creepers, vines, the magnolia, the oak, the cedar, and the pride of India, girding the white dwellings and the green verandas, the effect is highly picturesque. The battery is a popular promenade, lying near the water's edge, and commanding an extensive view of the bay; it is surrounded by fine private residences.

Upon the surrender of Columbia, the State capital, to General Sherman, February 17, 1865, Charleston was evacuated by the Confederate forces, all the public buildings, stores, cotton warehouses, shipping, etc., having been fired by order of General Hardee, who was in command of the city. On the 18th Charleston was occupied by the Federal troops, who exerted themselves to extinguish the flames. During the war many buildings were destroyed, and the towers and steeples of churches riddled with shot and shell. Business and trade were paralyzed. Since its close rapid progress has been made in the work of rebuilding, and in every department of trade and industry. In 1872, \$478,800 was spent for new buildings and repairs in the city, besides \$177,509 for similar purposes on Sullivan's Island.

But it is in its commerce that Charleston ranks highest, and, in this respect, the growth of the city since the war has been remarkable. It is the nearest of the important Southern ports to the Northern cities, and is the first harbor having ample room, and good anchorage, reached by southward-bound vessels on the long stretch from the Chesapeake. It is the principal shipping-port of the State and neighboring country. The most important article of export is cotton. In the extent of this trade, Charleston ranks next to New York and New Orleans.

The total foreign exports for the year ending July 1, 1873, were \$14,200,801, against \$10,938,480 for the previous year, an increase of \$3,267,871. The total exports of all kinds amounted to about \$40,000,000.

The manufacture of fertilizers from the valuable beds of marl and phosphate rocks in the vicinity has, since 1868, been developed into one of the most important industries in the city. In 1873 there were six factories in and

near the city, employing a capital of \$400,000. In connection with this business the manufacture of sulphuric acid is extensively carried on. The exports of crude phosphates in 1873 amounted to 27,403 tons to domestic, and 2,435 tons to foreign, ports, while 20,000 tons were used by Charleston companies in the manufacture of fertilizers, making the total receipts in the city 49,838 tons. In addition to this amount, 29,365 tons were exported from Bull River and Port Royal, making a grand total, exported, and consumed in the State, of 79,203 tons. The shipments of manufactured fertilizers in 1873 reached 56,298 tons, of which about 88,000 were manufactured in and near Charleston, the companies making their own acids.

SPAIN, a republic of Southern Europe. President, at the close of the year 1873, Emilio Castelar. Spain is divided into forty-nine provinces, which, according to the most reliable statements, had the following area and population in 1870:

PROVINCES.	Area.	Population.
Alava.....	1,205.26	103,320
Alicante.....	5,071.63	220,973
Albante.....	2,008.21	440,470
Almeria.....	3,802.42	361,553
Avila.....	2,981.60	175,210
Badajoz.....	8,687.54	431,922
Barcelona.....	2,885.21	762,555
Biscay.....	948.72	187,926
Burgos.....	5,659.86	353,560

In the budget for 1872-'73, the revenue was estimated at 588,000,000 pesetas (1 peseta = 19.3 cents); the expenditures at 627,000,000 pesetas; the deficit at 39,000,000 pesetas. The public debt amounted, on December 31, 1871, to 7,493,000,000 pesetas; the interest on the nominal capital of the debt to 202,000,000 pesetas. In May, 1873, the debt was estimated at 7,830,000,000 pesetas.

The army of Spain was reorganized, in 1868, after the model of that of France. Under the new military law, which came partly into operation in August, 1868, the armed forces of Spain consisted of—1. The permanent army. 2. The first or active reserve. 3. The second or sedentary reserve. Since then the laws on the organization of the army have been repeatedly modified, and further changes were expected. A law of September

27, 1872, provided for a liability upon all persons to be drawn for the permanent army, and fixed the time of military service at seven years; three in the active army, two in the first, and two in the second reserve. On February 17, 1873, this law was repealed, and a new one passed, according to which the army was to recruit itself by volunteers. The force in Spain was to number about 216,000 men. The army in Cuba consisted of about 60,000 men, namely, 54,400 active army, 4,000 men of reserve, militia 1,500. The army in Porto Rico consisted of 9,400 men; that in the Philippines, of 9,000. Total number of troops in the colonies, 78,100. For military purposes, the country is divided into five districts, or "capitanías generales," at the head of each of which stands a captain-general, with the rank of field-marshal.

The fleet, in 1872, was composed as follows:

NAVY.	Guns.	Horse-power.
<i>Vessels of the first class :</i>		
7 iron-clads.....	145	5,900
10 screw frigates.....	431	5,880
3 wheel-steamers.....	48	1,500
<i>Vessels of the second class :</i>		
10 wheel-steamers.....	48	3,130
8 screw-steamers.....	26	1,400
2 transports.....	...	600
<i>Vessels of the third class :</i>		
18 screw-steamers.....	43	1,820
35 iron-clad gunboats.....	35	1,400
7 wheel-steamers.....	13	867
5 wheel-steamers.....	...	660
<i>Vessels not classified :</i>		
2 steamers.....	4	310
18 gunboats.....	18	440
125	811	2,346

Of sailing-vessels, there were one frigate (28 guns), two corvettes, one transport, two pontoons. The navy was manned, in 1872, by 9,700 sailors and 5,000 marines, and commanded by 2,344 naval officers and 144 marine officers.

The following table exhibits the trade of Spain during the years 1861 to 1869; the value being expressed in reals (one real = \$0.048):

YEAR.	IMPORTS.	VALUE OF TRADE WITH AMERICA.	
	Value of Total Trade.	Spanish Flag.	Foreign Flag.
1861.....	2,021,000,000	360,000,000	67,000,000
1869.....	1,970,000,000	317,000,000	84,000,000

The aggregate length of the railroads in operation amounted, on January 1, 1873, to 5,328 kilometres (1 kilometre = 0.62 m.); the aggregate length of the telegraph-lines, on January 1, 1871, to 11,754 kilometres.

At the close of the year 1872 a grave conflict arose between the ministry, at the head of which was Forilla, and the officers of the Spanish artillery, in consequence of the appointment of General Hidalgo as Captain-

General of the Basque provinces. The officers generally protested against this appointment, because they charged Hidalgo with having ordered in 1866 some of the officers to be shot in the barracks of Sangil, or, at least, with not having prevented the mutinous soldiers from committing the deed. Hidalgo denied having either ordered or been present at the execution of the officers; and the Minister of War defended him in the Cortes, but the officers did not change their minds. Finally, the request of Hidalgo, not to send him to the Basque provinces, was accepted, and he was soon after appointed commander of the military district of Tarragona. This, however, did not satisfy the officers of the artillery, who generally offered their resignation. The ministry were determined to carry their point, and therefore accepted the resignation of all the officers, filling their places by the appointment of subaltern officers. The King doubted the expediency of this policy, and refused to sign the measures proposed by the ministry. Being, however, on the other hand, convinced that the Radical party, of which Forilla was one of the chiefs, was the only one in the country which was sufficiently strong to command a lasting majority in the Cortes, and that he would be unable to form a cabinet stronger than that presided over by Forilla, he came to the conclusion that there was no prospect of establishing a strong government, and that the best course for him to pursue would be to abdicate the throne. The royal message, in which the resignation is offered, is dated February 12, 1873.

The abdication was at once accepted; both Chambers met in joint session, and constituted themselves the sovereign Cortes of Spain. A new ministry was elected, at the head of which was Figueras, one of the leaders of the Republican party. Another leading Republican, Emilio Castelar, became Minister of Foreign Affairs, Francisca Pi y Margall, a Federal Republican, Minister of the Interior; Nicolas Salmeron y Alonzo, Minister of Justice; Francisco Salmeron y Alonzo, Minister of Colonies; General Cordova, Minister of War, José Echegaray, Minister of Finances, and Manuel Becerra, Minister of Commerce and Agriculture. (*See DIPLOMATIC CORRESPONDENCE*, in this volume.) A circular of Castelar to the diplomatic agents of Spain in foreign countries declared that the republic was the result, not of surprise, but of a conscientious consideration of the Cortes; gave due credit to the loyalty and constitutional sentiments of King Amadeo, and emphasized the peaceable character of the republic both at home and abroad. A decree of the Government appointed General Pavia commander of the Army of the North, and recalled Moriones to Madrid, to assume the command-in-chief of the artillery. On February 11th the Cortes passed a resolution declaring that the national Government assumes all powers, and declares

the republic to be the form of government of the nation, leaving to the constituent Cortes the organization of this form of government. With regard to the permanent form of government to be adopted, the ministry officially observed a non-committal attitude, although most of the members individually did not hesitate to declare in favor of a federal republic. On February 24th, the young republic had its first ministerial crisis; Figueras, Castelar, Pi y Margall, and F. Salmeron, remained members of the new ministry, while Juan Tebuan became Minister of Finance; Eduardo Chao, Minister of Commerce and Public Works; José Cristobal Sorni, Minister of the Colonies; General Acosta, Minister of War; and Admiral Oreivo, Minister of the Navy. In several places the establishment of the republic was attended by disturbances of the peace; thus, in Montilla, five prominent conservative citizens were massacred, and eight houses burned. As the army appeared to the Government to be entirely untrustworthy, a new military law was passed, which abolished conscription, and provided for recruiting by the enlistment of volunteers; in cases of emergency, the Government was authorized to mobilize the reserve. In a new circular, Castelar assured the foreign powers that the republic was definitely established, and asked them not to delay any longer the formal recognition; but only the United States and Switzerland immediately responded (February 25th). At the beginning of March a great excitement was produced by a motion to adjourn the National Assembly, and to proceed to the election of a constituent Cortes. The majority of the Cortes belonging to the former Radical (monarchical) party, distrusted the ministry; the latter threatened to resign; in Madrid, an outbreak of the Republican party was feared, and in Barcelona, threatening demonstrations were made by the Republicans. The Radicals, finally, agreed to accept a compromise proposed by General Primo de Rivera, by which the new elections were adjourned to May 10th, and the meeting of the Constituent Assembly to June 1st; the right of voting was extended to all men of twenty-one years of age, and the election of a standing committee, with executive powers, was provided, which was to represent the Chambers during their adjournment. This motion was adopted by 118 against 19 votes. In Madrid it was reported that twenty-two provinces were determined no longer to recognize the authority of the capital in case the dissolution of the Assembly should be still further postponed. The prime minister himself repaired to Valencia and Barcelona, in order to calm the excitement. The discipline in the army did not improve. In Malaga the volunteers assumed themselves the supreme command, and in Catalonia and Andalusia the Federal Republican party displayed a great strength. The provincial council of Barcelona acted like the government of an independent

state, dismissed the troops at pleasure, and re-enlisted them as volunteers. In Catalonia and Alicante the Internationals showed themselves very active, and denounced the republic of the *bourgeoisie*, and the authorities everywhere appeared almost powerless. The prime minister, Figueras, was enthusiastically received in his native city, Barcelona, but he had to connive at the ultra-federal demonstrations. After his return he made the immediate adjournment of the National Assembly and the election of the Standing Committee a cabinet question. The Assembly reluctantly conceded the demand of the prime minister, elected the Standing Committee, which consisted of members of all political parties, though a majority were known not to sympathize with the Republican majority of the ministry, and suspended its sessions. One of its last acts provided for the abolition of slavery in Porto Rico, which was to take place immediately after the publication of the law in the official gazette, but the emancipated slaves were required to serve as hired laborers for three more years, with their former masters, or the state. Political rights were to be conferred upon them five years after their emancipation. The indemnification of the masters was to be exclusively borne by the budget of Porto Rico. The official gazette at the same time published a law on the organization of eighty battalions of "Voluntarios de la República," each battalion to contain six companies of one hundred men each. In consequence of the earnest remonstrances of the Spanish Government, France ordered a stricter prohibition of the export of arms across the frontier. In several provinces, a tendency manifested itself to declare themselves independent of the central Government in Madrid. This spirit of independence especially showed itself in Malaga, where a large force of volunteers preserved order, but at the same time did not allow the central Government to send troops or gendarmes into the city. Nobody seemed to respect the orders of the Government in Madrid; the taxes were not delivered into the public Treasury, and a special tax was imposed upon the citizens to meet the expenses for the volunteers. In Fuente de Cantos, and other places of Extremadura, new troubles were caused by the Communists; in Burguillos seventeen villas were burned down, and the proprietors were coerced into signing documents, in which they ceded their property to the commune. In Cadiz, Salvochea, who for five years had been at the head of all revolutionary movements in and around Cadiz, was elected mayor. In Catalonia the energy of the new Captain-General Velarde succeeded in fully restoring military discipline. The greatest danger to the republic was in the open hostility between the majority of the ministry and the more conservative majority of the Standing Committee. When the committee met, on April 23d, and, with the exception of Figueras and Pi y Mar-

gall, all ministers were present, Echegaray and Révery represented the situation of the country in the darkest colors, and demanded the immediate convocation of the National Assembly, and the adjournment of the elections for the Constituent Cortes. The ministers Castelar and Nicolas Salmeron opposed this demand, and denied that there was any reason for adjourning the new election, or for convoking the National Assembly. It was reported that 8,000 volunteers belonging to the old militia of Madrid were assembled near the hall of the Assembly, and were ready in case of emergency, to support the Standing Committee against the ministry. A request made by Castelar that an adjournment take place for twelve hours was denied. The ministers retired for consultation, but did not return. In the mean while Pavia, the Captain-General of Madrid, retired, and the Government immediately appointed General Soria his successor; and General Contreras, who had recently returned from Catalonia, Generalissimo of the Volunteers of the Republic. As General Contreras, in the evening, was fired upon, the Government resolved to dissolve the Standing Committee. At two o'clock in the morning, the Volunteers of the Republic, who sympathized with the Federal Republicans, invaded the hall, whereupon the members of the Standing Committee immediately fled. Most of them, as Serrano, and other leading politicians, hid themselves from the rage of the people, who suspected that the committee had an intention of overthrowing the republic. On April 24th the official paper published the decree by which the National Assembly was dissolved. Another decree ordered the dissolution of seven battalions of infantry, and of the battalions of the artillery, pioneers, and cavalry of the militia of Madrid. The Minister of War, Acosta, who had formerly belonged to the Radical party, resigned, and was succeeded by Nouvilas, formerly commander of the Army of the North, and a decided adherent of the federal republic. The elections for the Constituent Cortes took place without disturbance, and, as the larger portion of the parties opposed to federal republicanism abstained from voting, an overwhelming majority of the new members were Federal Republicans (350 against only 40 belonging to all other parties combined). Only 35 per cent. of the enrolled voters had taken part in the election, against 60 per cent. of the preceding year.

The insurrectionary movements of the Carlists, which had begun in April, 1872, and continued throughout the remainder of that year, assumed much larger dimensions after the abdication of Amadeo. Between Bilbao and Miranda they destroyed the railroads, and not only in Catalonia, Aragon, and the Basque provinces, but also in other parts of the country their bands appeared in increasing numbers. Their leaders, Ollo and Dorregaray, united in the valley of Echaury, and General

Pavia undertook an expedition against them without finding them. In the valleys of the Lower Pyrenees, Dorregaray compelled all young men, from eighteen to thirty years, to enter the Carlist army, and for every one who made his escape, the commune had to pay a fine of 4,000 reals. One of the most prominent leaders of the Carlist bands was the priest Santa Cruz, who was charged with committing and allowing to be committed the most frightful cruelties. General Dorregaray, on April 1st, advanced into the province of Alava, and General Ollo united the scattered bands in the province of Navarre and disciplined them. The number of men who, in April, were under the orders of General Dorregaray, in the five provinces of Navarre, Biscaya, Guipuzcoa, Alava, and Logroño, was estimated at about 4,500, of whom 3,500 were well-armed with Remington and other breech-loaders, while 1,000 were either unarmed or only carried lances. Besides, there was a large number of scattered bands, which, in Navarre alone, were estimated at about 6,000 men, 500 of whom were cavalry, and in the other four provinces, at 9,400. Toward the close of March the official *Gazette* published a proclamation which had been signed by all the ministers, in which the whole nation was called upon to coöperate in the overthrow of the irreconcilable enemies of the republic. In the northern part of Catalonia the Carlists under Saballs and Barrancot, who were accompanied by Don Alfonso, brother of Don Carlos, and by a son of Don Enrique, captured the town of Ripoll, on the Upper Ter, and took the garrison of 180 men prisoners, after seven of them had been shot. When on the next day General Martinez Cármas advanced against them from Girona they withdrew, but a few days later, on March 29th, they surprised, near the Upper Llobregat, the important town of Berga, the garrison of which, consisting of 500 men, was compelled to surrender. According to official accounts of the Government, Saballs ordered sixty-seven of the prisoners, who were volunteers of Tarragona, to be shot. In Barcelona, the news of this massacre produced so great an excitement that several Carlist prisoners were in danger of being torn to pieces by the populace, and that several churches, the priests of which were charged with being favorable to the Carlist cause, were closed and converted into barracks. The railroads all through Northern Spain were broken up by the Carlists. The little fortress of Puicerda, on the Ségre, not far from the French frontier, with a garrison of 500 men, repulsed an attack made by Saballs, who had been created Count of Berga. All the other leaders of the Carlist party, Ollo, Dorregaray, and Lizarraga, in Navarre, Tristany, and Vallés, in Catalonia, were beaten about this time, though the permanent advantages accruing to the troops of the republic from these victories were of no long duration. Don Carlos appointed a new council of war, consisting of

General Elio, Counter-Admiral Vinate, who, under Amadeo, had made an insurrectionary movement near Murcia, and had been sentenced to death, but subsequently been pardoned, Estrada, formerly secretary of the Pretender, and Canon Vicente de Marterola. After the troops of the Government had obtained successes in the northern part of Catalonia, on the Monseu, over the Carlists, they suffered on May 5th a serious defeat, as two battalions under Colonel Navarro, were nearly annihilated by Dorregaray, near Estella. The Government officially admitted that Navarro himself, the lieutenant-colonel of the regiment, Seville, and about forty men, were taken prisoners, while at the same time one piece of ordnance and thirty-five dead and wounded had remained in the hands of the victors. The Government of Madrid had to send 600 men as reinforcements to the Basque provinces and Navarro, thus increasing the troops stationed in those provinces to thirty-eight battalions of infantry, exclusive of cavalry, artillery, gendarmes, and volunteers. In the evening of May 13th, Saballs made an attack upon the town of Mataro, and when, toward midnight, the Government troops arrived from Barcelona, the Carlists had already secured a forced contribution of \$10,000. On May 19th Tristany and Don Alfonso captured the town of Sanalucia, in the province of Lerida, which was bravely defended by 150 volunteers. Although the volunteers, before surrendering, were promised that their lives should be saved, eighteen of them were shot in the streets.

The Constituent Cortes was opened by the prime-minister, Figueras, on June 1st. In his opening speech he defended the dissolution of the Standing Committee, and insisted that Spain was prepared for the republican form of government, and that only the maintenance of order was necessary to securing the recognition of the republic by the foreign powers. With regard to home politics he announced that the Government would bring in a law on the separation between Church and State, and propose reforms in the administration of justice, and in the financial department, as well as the abolition of slavery in the island of Cuba. The aged Orense, the Marquis of Albaida, long known as a leader of the Republican party of Spain, and now one of the spokesmen of the Federal Republicans was elected President. On June 8th the Cortes, with 210 against 2 votes, resolved to establish a federal republic. After Figueras and his cabinet had resigned, Pi y Margall was charged with forming a new cabinet; his nominations were, however, not accepted, but in a secret session Figueras, with his old cabinet, was requested to remain. On the next day, however, Figueras was to form a new cabinet, one half of which consisted of radical republicans. On June 11th, again a new ministry was formed, at the head of which was Pi y Margall; most of its members were new men, and had thus far been but little

known. The new ministry declared in prominent points of its programme a speedy reorganization of the army and the restoration of military discipline. It demanded that the division of the country into Federal States be finished before the budget, which would show a deficit of 2,500,000,000 reals should be presented. Nicolas Salmeron, the former President of Justice, was elected President; and Castelar, President of the principal committee of the Cortes. It was also resolved to appoint a Committee of Constitution, to consist of twelve members of the majority and minority of the Cortes, and of thirteen representatives of the future States. Figueras left Spain and took up his residence in France. On June 28th Pi y Margall appointed a new ministry, the Cortes having repealed for this case their former resolution, according to which the ministers were to be appointed by the Cortes, and not by the prime-minister. They also authorized the new ministry to suspend in several provinces the civil rights, and to declare a state of siege. Soon a new ministerial crisis occurred. In the place of Pi y Margall, who was believed to be too much imbued with socialistic ideas, Nicolas Salmeron was appointed prime-minister, who chose his colleagues among the prominent men of the party, appointing Toler Minister of Foreign Affairs; Maisonnave, Minister of the Interior; Fernando Gonzalez, Minister of Finances; Moreno Rodriguez, Minister of Justice; General Gonzalez, Minister of War; Admiral Oviedo, Minister of the Navy; Palanca, Minister of the Colonies. The first measures of the new ministry indicated firmness, and awakened a hope for an improvement of the wretched condition of the country. In the army of General Velarda a general mutiny broke out at Igualada; Velarda himself had to flee, and with great difficulty a Government committee sent from Barcelona to the scene of the disorders, succeeded in reestablishing order. While from Catalonia a few insignificant successes of the republican troops were reported, the Carlists in Navarre surprised the column of Colonel Castañon, and dispersed it. In the beginning of July, General Acosta, formerly Minister of War, was appointed Captain-General of Catalonia, and Brigadier-General Martinez Càmpos, commander-in-chief of Gerona; Velarda assumed again his former position as Captain-General of Valencia. It was resolved to send to General Novillas, the commander-in-chief of the Army of the North, a sufficient number of reinforcements for the effective suppression of the Carlists. But, notwithstanding the energy shown by President Salmeron in the removal of untrustworthy officers and in the suppression of mutinies, the Carlists continued to make progress. In Catalonia, one of the best officers of the army, General Cabrinetty, whom the Government had left without the asked-for reinforcements, was beaten by Saballs, his whole force, consisting of about one thousand men, captured,

killed, or dispersed, and he himself killed. Berga was again captured, and the entire garrison taken prisoners. The Carlists derived new courage from the arrival upon Spanish soil of the Pretender, Don Carlos, and the transient capture of the town of Igualada. In Guernica Don Carlos took the oath upon the "fueros," the old privileges of the Basque provinces, on August 3d. Don Carlos and Saballs, the commanders of the Carlists in Prato de Slusanes, fortified this town, which is situated forty miles northwest of Barcelona. The English steam-yacht *Deerhound*, which attempted to land for the Carlists 2,000 rifles, 50 cwt. ammunition, and 40 horses, was, on August 18th, captured by a Spanish man-of-war. On August 15th the Cortes adopted a law by which 80,000 men were called to arms. The republican Government was greatly hindered in its operations against the Carlists by the more threatening attitude which the members of the Internationals assumed in Southern and Eastern Spain. The Central Committee of the Internationals had its seat at Alcoy, the most important manufacturing town of the province of Alicante. On July 10th, an insurrectionary movement broke out in the town; seventy of the most prominent citizens were seized and held as hostages; the town-hall, in which the mayor, several other town officers, some gendarmes and policemen had intrenched themselves during one night, was stormed, and the mayor, several gendarmes and policemen, and about thirty citizens, killed, a part of the town burned down, and a Committee of Public Safety appointed for the government of the town. Instead of promptly suppressing this bloody outbreak Captain-General Velarda preferred to enter into negotiations with the rebels, and to effect a compromise which secured to all the inhabitants who had taken part in the insurrection, impunity, while only the foreigners, who had taken an active part, were to be prosecuted.

Of much greater significance than this failure of the Internationals, were the movements of the extreme branch of the Federal Republicans, the "Intransigentes" (irreconcilables), who, protesting against the suspension of the civil rights, had withdrawn from the Cortes, and proclaimed the immediate independence of the several provinces of Spain, without awaiting the proclamation of the federal republic by the Cortes. In Cartagena, a member of the Cortes, Galvez, conjointly with his colleague Poveda, assumed the government of the province of Murcia, while General Contreras, likewise a member of the Cortes and who only a few months ago had been appointed by the republican Government Captain-General of Catalonia, had assumed the chief command of the armed forces. Felice organized the movement for independence in Valencia, Santa Maria in Alicante, Chersa in Castellon; General Pierrad prevailed upon the volunteers in Toledo to mutiny; another dep-

uty placed himself at the head of the insurgents in Salamanca; another entered into negotiations with the Internationals of Alcoy in order to excite a regiment to insurrection; many others fomented the revolutionary movements in Andalusia, and all remained in correspondence with their friends who were in Madrid. In most of the towns in which the Commune had been proclaimed, quiet was soon restored; but in Cartagena the partisans of state independence maintained themselves against the federal Government. The Minister of the Navy who had hastened thither in order to establish order, could not accomplish any thing, as the sailors and marines refused to obey, and joined the rebels. When even several men-of-war joined the mutineers, the President of the republic, on July 20th, issued a proclamation which declared the crew of the frigates *Almanza*, *Vittoria*, and *Mendez Nufiez*, as well as the steamer *Fernando el Catolica*, and any other man-of-war belonging to the insurgents in the department of Cartagena, as pirates, and authorized the commanders of war-vessels of friendly nations to stop the vessels, and to treat the men as pirates in accordance with the usages of naval law. On July 24th the minister of the Spanish navy was notified that the German frigate *Frederick Charles*, under command of Captain Werner, had off Cartagena taken possession of the mutinous steamer *Vigilante*, because the steamer had drawn up the red flag which was not recognized by any Government. Deputy Galvez who was the commander of the *Vigilante*, was retained as prisoner on board the German frigate. General Contreras who regarded the decree of the Madrid Government as unlawful, threatened to adopt retaliatory measures against the German consul in Cartagena, and prevailed upon the commander of the German frigate to enter into an agreement according to which the seizure of the *Vigilante* was declared a justifiable act on the ground that it had not carried a lawful flag, while after the 28th of July the departure of war-vessels obeying the government of Murcia would not be obstructed, provided they could submit to the eventualities which might ensue from any orders the commanders of the foreign war-vessels might receive from their Governments. The authorities in Cartagena also promised to respect the property and the lives of the foreign residents at Cartagena. Accordingly, on July 29th, the rebel steamers *Almanza* and *Vittoria* put to sea without being in any way hindered by the German war-vessel. They sailed under command of Contreras to Almeria, and demanded from that town a contribution of \$100,000. When the demand was refused, Contreras bombarded the town, but his attempt to land troops was repulsed. From Almeria Contreras intended to sail to Malaga, but before reaching that port, the frigates *Almanza* and *Vittoria* were captured by Captain Werner, because at the bom-

bardment of Almeria the house of the German consul, on which the German flag was flying, had been destroyed. Captain Werner, whose action did not meet with the approval of the German Government, transferred the captured frigates to the English admiral, Yelverton. The captured steamer *Vigilante* had previously been transferred by him to the Spanish consul of Gibraltar. Contreras, who had been kept as a prisoner on board the *Frederick Charles*, was set at liberty, on August 10th, and landed at Cartagena. On August 23d the Spanish fleet, under the command of Admiral Lobos, began the bombardment of Cartagena, but as the insurgents had better cannon than Lobos, the attacking fleet, which consisted of only one iron clad and several wooden frigates, had to withdraw. On August 23d the Cortes authorized the prosecution and the arrest of nine of their members who had taken part in these attempts to establish the Commune.

The war against the Carlists at this time offered no special interest. On August 24th the Carlists under Olo were completely routed near Estella, and, although they were immediately reinforced by Lizarraga, they were on the next day again defeated. From Berga, which had been captured by them, they had also to withdraw.

On August 25th Emilio Castelar was elected President of the Cortes. In an impressive speech he called attention to the critical situation of the country. Though sincerely attached to the plan of a federal republic, he believed it necessary, first to save the unity and the very existence of the country. The Government, for carrying on the administration of the country, must strengthen the principles of authority and order. If order could not be reestablished on a firm basis, the republic was in danger of perishing; for any country, placed between the alternative of anarchy and dictatorship, would choose the latter. Castelar soon fell out with the President of the Republic, Salmeron. The latter declared that having been for twenty years an uncompromising opponent of the death-penalty, he could not now order it to be applied to the insurgents. Castelar regarded it as indispensable to use for the overthrow of the insurrection the same weapons—"war against war, fire against fire, blood against blood, death against death;" otherwise, he declared we should be monks, not men. The Cortes sympathized with him, and on September 7th, Castelar was elected in place of Salmeron President of the Spanish Republic. He received 133 votes against 67 which were cast for Pi y Margall. He accepted the presidency only on condition that the constitutional guarantees should be suspended, and that he should be invested with unlimited power to employ the entire military strength of the nation against the Carlists, and for the termination of the civil war. The cabinet formed by him consisted of decided Republicans. Cárvajal became Minister of Foreign Affairs;

Maisonnave, Minister of the Interior; Debrío, Minister of Justice; Soler, Minister of the Colonies; Berges, Minister of Public Works. After authorizing the President to call out 150,000 reserves, and to arm 500,000 militia, and to contract a new loan of 100,000,000 pesetas, the Cortes were adjourned to January 2, 1874. In accordance with the powers conferred upon him, President Castelar suspended the constitutional guarantees, and began to prepare the most energetic measures for the speediest termination of the civil war. He declared his readiness to employ the services of any general to whatever political party he might formerly have belonged, who was willing to co-operate for the restoration of order, and the suppression of the civil broils. One of the first to make use of this invitation, and to offer his services for the defense of the existing order of things, was Marshal Serrano.

The Carlists, whose numbers were estimated by Castelar at about 50,000, made no progress during the remainder of the year. The dissensions among the officers increased in strength. Several of their generals resigned and retired to Bayonne, in France, and in the province of Lerida, large bands of deserters from the Carlists, reported to the leaders of the Republican troops. When the new generalissimo of the Government forces, Moriones, offered to the Carlists a battle near Estella, the latter hastily retreated, and Estella was occupied by the Government troops. A dispatch of Moriones, dated October 7th, claimed a great victory over the Carlists near Agacaza, in Navarre.

The English admiral, Yelverton, on September 1st, sent the rebel steamers *Almanza* and *Vittoria* to Gibraltar. The intransigentes of Cartagena made repeatedly desperate sorties, and undertook several plundering expeditions, without, however, meeting with any success. On October 11th there was a naval battle between the vessels of the intransigentes and the national fleet under Admiral Lobos. After a fight lasting for two hours, the vessels of the insurgents were compelled to put back to Cartagena. Admiral Lobos, without receiving permission from the Government, sailed to Gibraltar in order to take in coal, and was relieved from his command.

In December a remarkable episode occurred in the Carlist war. General Moriones, after endeavoring in vain to force the Carlists out of Estella, suddenly marched, at the head of 9,000 men, *via* Pamplona, into the northernmost districts of Navarre, leaving General Primo de Rivera behind for the protection of the country between Estella and the Ebro. After being reinforced by 3,000 men, under command of General Loma, he entered the northern part of the maritime province of Guipuzcoa. Marching southward, he raised the siege of Tolosa, the capital of the province, which had been hard pressed by the Carlists, and routed the Carlist general, Lizarraga. From Tolosa he advanced westward to the coast, with the

intention of subsequently marching southward and destroying the cannon-foundries and gun-manufactories at Azpeitia, Placencia, and Eibar, which had been occupied by the Carlists. Having advanced, however, as far as Zaranz and Guetavia, he found the road to Cestona blocked up, the Carlist commander-in-chief, General Elio, being reported to have 18,000 men under his orders between Zumaya and Cestona, along the Urola River. In consequence of these reports Moriones deemed it the best course to fall back to San Sebastian, where he pressed into the service of his troops all the vessels in the ports of San Sebastian and Pasages, and after detailing the brigade of General Loma for the defense of Tolosa, he embarked for Santoña, in the province of Santander, where he arrived on December 24th. Thence he hastened to the relief of the town of Bilbao, which, since December 28th, had been besieged by the Carlists. But finding himself again confronted by overwhelming numbers of Carlists, he for a second time saved himself with his troops by embarking.

The history of the insurrection in Cuba presents no features of great interest during the year 1878. After the establishment of the republican form of government for Spain, an appeal was made to the Cuban insurgents to abandon their struggle for independence, and to unite their efforts with those of the Spanish Republic for the permanent establishment of republican institutions, both in Spain and in the colonies. The leaders of the insurrection did not accept these propositions, and declared that they would not be satisfied with any thing short of the entire independence of Cuba. The Spanish party in Cuba, especially the volunteers, were too intensely monarchical in their sentiments to coöperate with the efforts of the new republican Government to conciliate the insurgents. With great reluctance they submitted themselves to the rule of the new Government, never concealing their predilection for a monarchy, and their ardent desire to see it soon restored in Spain. In August General Maximo Gomez was appointed commander-in-chief of the insurgents, to succeed General Agramonte. He again occupied Nuevitas, August 25th, and claimed to have gained several other victories; but at the close of the year the situation was not materially different from what it had been for several years past. Toward the close of the year an unforeseen event appeared for a time to bring to the friends of Cuban independence the sudden realization of their wishes. On October 31st the *Virginus*, a ship sailing under the American flag, was captured on the high-seas, near Jamaica, by the Spanish steamer *Tornado*, on the ground that it intended to land men and arms in Cuba for the insurgent army. Four of the most prominent Cubans found among the passengers were shot on November 4th; a few days later Captain Fry, with a large

number of others, was also executed. The Spanish Government took prompt action to stay the executions, and the Cuban authorities, though by no means concealing their dissatisfaction with the orders received from Madrid, submitted. The universal excitement in the United States, at the conduct of the Spanish authorities in Cuba, for a time appeared to make a war between Spain and the United States inevitable, which the Cubans hoped would not fail to lead to the immediate expulsion of the Spaniards from Cuba. The hopes thus raised were, however, doomed to disappointment, as the diplomatic negotiations opened between the United States and Spain led to a peaceable settlement of the whole difficulty. (See DIPLOMATIC CORRESPONDENCE.)

SPRING, Rev. GARDINER, D. D., LL. D., an American clergyman and author, for sixty-three years pastor of the Brick Presbyterian Church in New York City, born in Newburyport, Mass., February 24, 1785; died in New York City, August 18, 1878. He was the son of Rev. Samuel Spring, D. D., an eminent clergyman of Newburyport, and one of the chaplains of the Revolutionary Army. He entered Yale College, and delivered the valedictory oration at the close of his course in 1805. His thoughts were first turned to the law. He was admitted to the bar in December, 1808, and began practice with favorable prospects, but was induced to abandon the profession for that of the ministry. He attributed, in after-years, this great change in the current of his thoughts partly to the advice of his father, but still more to a striking sermon of the Rev. Dr. John M. Mason, from the text, "To the poor the Gospel is preached." He passed a year at the Andover Theological Seminary, and was licensed to preach toward the close of 1809. Early in the following summer he accepted a call to the Brick Church in Beekman Street, in this city. Although he was frequently summoned to posts of honor and responsibility—among others to the presidencies of Hamilton and Dartmouth Colleges—he did not abandon his first field of work, but maintained for half a century his reputation as one of the most popular preachers of the metropolis. In 1861 he removed with his congregation to the new church on Murray Hill. Shortly before this removal, Rev. William Hoge, D. D., of Richmond, Va., had been settled as his colleague. In 1861 Dr. Hoge resigned, and in 1862 Rev. W. G. T. Shedd, D. D., was associated with Dr. Spring, and remained as his colleague until 1872, when he was called to a professorship in Union Theological Seminary, and was succeeded by Rev. Dr. Murray. During the last few years Dr. Spring had seldom preached. As a preacher his style was direct, pointed, and vigorous, and he never suffered the congregation to slumber, but held their attention from beginning to end. Dr. Spring was an industrious author. His works grew out of his pastoral duties, and consisted mainly of courses

of lectures on the duties and privileges of the Christian life. Among his works are "The Attraction of the Cross," which was designed to illustrate the leading truths, obligations, and hopes of Christianity; "The Mercy Seat, or Thoughts suggested by the Lord's Prayer;" "First Things," a series of lectures on the great facts and moral lessons first revealed to mankind; "The Glory of Christ," an essay on his character and history, with thoughts on his mediatorial government; "The Power of the Pulpit," sermons addressed to Christian ministers on the method of rendering preaching effective; "Short Sermons to the People," a series of brief, practical discourses; "The Obligations of the World to the Bible." These, though published at different times, were collected in 9 vols. in 1853 as "Dr. Starr's Works." Aside from these he had published "Memoirs of the Late Hannah L. Murray," a New York lady distinguished for her intellectual acquirements and practical beneficence; "Dissertation on the Rule of Faith;" "Beth-el Flag;" "The Church in the Wilderness;" "Hints to Parents on Early Religious Education;" "Means of Regeneration;" "Native Depravity;" "The Doctrine of Election;" "Essays on Christian Character;" "The Mission of Sorrow;" "Fragments from the Study of a Pastor;" "The Contrast;" "The Bible not of Man." These volumes passed through many editions, and were reprinted in part in England, while some of them were translated into French and German. He commemorated his long pastorate by anniversary discourses, some of which were published under the title of "The Brick Church Memorial." Among his more recent publications were "Pulpit Ministrations, or Sabbath Readings," a series of sermons printed in 1864, and "Personal Reminiscences," published two years later.

STARRS, Very Rev. WILLIAM, D. D., a Roman Catholic clergyman, Rector of St. Patrick's Cathedral, and Vicar-General of the Arch-Diocese of New York, born at Drumquinn, County Tyrone, Ireland, in 1807; died in New York City, February 6, 1878. He was from a wealthy family, and received in early youth a good classical education. In 1823 he entered Maynooth College, near Dublin, and commenced his theological studies. He came to America in 1828, and was received into the Diocese of New York by Bishop Dubois. Not long after he entered the Sulpician Seminary (St. Mary's) at Baltimore, to complete his theological education. In September, 1834, he was ordained a priest at St. Patrick's Cathedral, New York, and remained curate of the cathedral for ten years. In 1844 he was made pastor of St. Mary's Church, in Grand Street. He retained this position until 1853, when he was appointed by Archbishop Hughes Rector of St. Patrick's Cathedral and Vicar-General of the Diocese of New York. Although his name was several times mentioned in connection with various bishoprics, he re-

tained this office till his death. When Archbishop Hughes died, in 1864, Dr. Starrs was administrator of the diocese until the appointment of the present archbishop. To the latter he acted as theologian in the Plenary Council at Baltimore in 1866. He also filled the same office at two councils of the province. In addition, he was the spiritual Superior of the Sisters of Charity for twenty years, and President of the Board of Trustees of St. Vincent's Hospital. He was also largely instrumental in instituting the Sisters of Mercy, and Sisters of the Good Shepherd. In character he was mild but not weak, kind but not placable, affable in disposition but strict in the discharge of his duties. His learning was broad rather than deep, yet there were few things appertaining to his department which he had not mastered. His faith was sincere; his devotion honest, and his purpose pure. Conservative in his tastes and opinions, he opposed innovations only when he believed these pernicious in themselves or disastrous in effect.

STORRS, RICHARD SALTER, Sen., D. D., an American clergyman and journalist, born in Longmeadow, Mass., in February, 1787; died at Braintree, Mass., August 11, 1878. He was a descendant of a long line of ministers, being of the seventh generation in a direct line. His early education was conducted at home or in the schools of his native town, but at the age of fifteen, in the fall of 1803, he entered the Sophomore Class in Yale College. He remained but a single year, his health rendering it necessary for him to resort to farm-life. In 1804 he was invited by Rev. Dr. Lyman Beecher to go over to Long Island, and take charge of Clinton Academy in his parish of East Hampton. Here he continued his college studies, and in 1806 was led to enter the Senior Class in Williams College, where he graduated in 1807. He then returned to Long Island and put himself under the care of Rev. Aaron Woolworth, of Bridgehampton, for the study of theology. After remaining about a year, he was licensed by the Suffolk Presbytery, and for a brief period took charge of the two parishes of Islip and Smithtown, on opposite sides of the island, about seventeen miles apart; preaching one Sabbath at one place, and the alternate Sabbath at the other. Going thence to Andover, he graduated in 1810, and on July 8, 1811, was ordained at Braintree, and then with one furlough of five years in the service of the Home Missionary Society of Massachusetts, Dr. Storrs remained faithful to his work to the end. His pastoral and preaching labor was always conscientiously and thoroughly done. His study was continuous, versatile, deep, and in his appropriation to his discourses of the facts and phenomena of life he was exceptionally happy. His intellectual qualifications were more solid than showy, but his style was flexible and simple. Simplicity, singleness, purity, courage, that amounted to an incredulity concerning the existence of

fear, and complete consistency of life with the thorough orthodox tenets which he held, were among the foundation qualities of his character. Besides his five years of labor for the Massachusetts Home Missionary Society, Dr. Storrs had devoted eleven or twelve years to journalism. He was for five years, between 1817 and 1825, editor of the *Boston Recorder*, and temporarily occupied the same position twenty years later; and from 1850 to 1856 he was the senior associate editor of the *Congregationalist*. The two papers were subsequently united. He had also published a "Memoir of Rev. Samuel Green," and about twenty single sermons and addresses. He was for many years a frequent contributor to the religious *Reviews*. Rev. R. S. Storrs, D.D., of Brooklyn, the eminent pulpit orator and scholar, is his only surviving child.

STRONG, THERON R., an eminent jurist, born in Litchfield, Conn., November 7, 1802; died in New York City, May 15, 1873. He was the second son of Judge Martin Strong, of Litchfield, who was for many years a distinguished lawyer and judge in Connecticut. He received a good English and classical education, and was thoroughly trained in the law by his father. In 1826, having been admitted to the bar, he opened an office at Palmyra, Wayne County, N. Y., where he resided for twenty-seven years. He was District Attorney of Wayne County for five years, and for a long time was a master and examiner in chancery. In 1839 he was elected member of Congress, where he served until 1841. The next year he was a member of the New York Legislature. In 1851 he was elected Judge of the Supreme Court, and held that office for eight years. For one year of that time he was a member of the Court of Appeals. Among his decisions was that in the celebrated *Cancemi* case, which was twice before that court during his term of office, and in which he read the opinion of the court on both occasions. More opinions written by Judge Strong were published while he was a member of the Court of Appeals than by any other member of the court except Judge Denio. Judge Strong's residence from 1853 to 1867 was in Rochester, where he resumed the practice of the law on retiring from the bench. His business during that time was very extensive, and he was engaged in nearly every case of importance in the Seventh Judicial District. He removed to New York City, in 1867, and at the time of his death was the senior member of the firm of Strong & Shepard, and in active practice before the principal courts of the State and of the United States; his services were also very largely called for as referee.

SWEDEN AND NORWAY, two kingdoms of Northern Europe, united under the same dynasty. King, Oscar II., born January 21, 1829; succeeded to the throne at the death of his brother, Charles XV., September 18, 1872. Married June 6, 1857, to Sophia, born July 9, 1836, daughter of the late Duke William of

Nassau. Offspring of the union are four sons, namely: Gustavus, heir-apparent, Duke of Wermland, born June 16, 1858; Oscar, Duke of Gothland, born November 15, 1859; Charles, Duke of Oestergötland, born February 27, 1861; and Eugen, Duke of Nerige, born August 1, 1865. King Oscar is the fourth sovereign of the house of Ponte Corvo, and grandson of Marshal Bernadotte, Prince de Ponte Corvo, who was elected heir apparent to the crown of Sweden August 21, 1810, and ascended the throne February 5, 1818.

The executive authority is in the hands of the King, who acts under the advice of a Council of State, composed of ten members, of whom two have the title of State Ministers, and eight that of Councillors of State; of the latter five are chiefs of departments. At the close of 1873, the Swedish Council of State was composed of the following members: 1. The Minister of State and Justice, Axel Adlercreutz; Minister of the Interior, 1868-'70, appointed Minister of Justice, June 3, 1870. 2. Minister of State and Foreign Affairs, Major-General Oscar M. de Björnstrjerna, appointed Minister of Foreign Affairs, December 17, 1872. 3. H. W. Bredberg, appointed November 2, 1860. 4. C. J. Berg, appointed June 4, 1868. 5. Minister of the Navy, Major-General Baron Broder Abraham Leijonhufvud, appointed January 14, 1870. 6. Minister of Finance, C. F. Woern, appointed June 3, 1870. 7. Minister of Ecclesiastical Affairs, Dr. G. Wennerberg, appointed June 3, 1870. 8. Minister of the Interior, Dr. P. A. Bergström, appointed June 3, 1870. 9. Baron O. J. O. Alströmer, appointed June 15, 1870. 10. Minister of War, Major-General Erik Oscar Weidenhielm, appointed December 5, 1871.

In Norway the King exercises his authority through a Council of State, composed of one Minister of State, and nine Councillors. Two of the councillors, together with the minister, form a delegation of the Council of State, residing at Stockholm, near the King. The following are the members of the Council of State: I. At Christiania—1. Minister of State, Fredrik Lang, appointed July, 1873. 2. Department of Finance and Customs, H. L. Hellesen, appointed December, 1863. 3. Department of Justice, John Collett Falsen, appointed November, 1869. 4. Department of the Interior, N. P. Vogt, appointed June, 1871. 5. Department of the Navy and of Postal Communications, A. O. Manthey, appointed December, 1866. 6. Department of Education and Ecclesiastical Affairs, P. P. Essendrop, appointed April, 1872. 7. Army Department, L. H. M. Segelcke, appointed April, 1872. II. Delegation of the Council at Stockholm: 1. O. R. Kierulf, Minister of State, appointed December, 1871. 2. H. O. C. Meldahl, appointed December, 1871. 3. J. L. Johansen, August, 1873.

Sweden is divided, for administrative purposes, into *läns*, which according to the latest dates had the following area and population:

Lins.	Square Miles, incl. of Lake.	Population in 1872.
Malmöhus.....	1,858	322,175
Kristianstad.....	2,510	225,126
Blekinge.....	1,149	127,377
Halland.....	1,894	125,751

Total, Sweden.....	170,591	4,260,402

The emigration, from 1851 to 1860, numbered 16,900 persons; from 1861 to 1870, 122,447; in 1868, 27,024; in 1869, 39,064; in 1870, 20,063; in 1871, 17,458. The immense majority of the population belongs to the Lutheran Church, of which the King must be a member. Of other religious denominations the Baptists have made the greatest progress since 1854; they numbered at the close of the year 1872, in ten associations, 221 churches and 9,412 members. They hold, every third year, a general conference. The Methodist Episcopal Church also has made great progress, and in 1872 numbered 1,648 (against 821 in 1871), and 1,461 members on trial. The Catholic Church embraces a population of about 5,000, under the Vicar-Apostolic of Stockholm. Moreover, there is a small number of Reformed, Moravians, Swedenborgians, and Jewish congregations. The Mormons have gained quite a number of converts, but most of them have emigrated to the United States. The native population of non-Swedish nationality embraced, in 1870, 6,611 Lapps and 27,079 Finns. The number of foreign-born persons was 12,015; of whom 2,856 were Germans, 2,795 Danes, 2,570 Norwegians, 2,018 Finns. The following towns in 1872 had a population of more than 10,000 inhabitants: Stockholm, 143,748; Göteborg, 59,329; Malmö, 27,485; Norrköping, 25,685; Karlskrona, 16,392; Gefle, 15,613; Upsala, 11,961; Jönköping, 11,751; Land, 11,225.

In the budget for 1874 the revenue was

estimated at 55,536,550 riksdalers (1 riksdaler = \$0.27). The expenditures at 60,386,550. The deficit is annually covered by the "Riksgäldskonter," the supervision of which is exclusively exercised by the Diet. This institution manages the public debt, almost exclusively incurred by the construction of railways, and it contracts for any loans the Diet may vote. It controls the following resources: any surplus over the estimated income; the surplus of any allowed expenditures; the yearly profit of the State Bank; and a special income tax, "the Bevilling," the proceeds of which for 1874 were estimated at 2,700,000 riksdalers.

The public debt, at the end of 1872, amounted to 124,768,771 riksdalers; all railway debts with the exception of a loan amounting to 1,584,000.

The total strength of the armed forces was, in September, 1873, as follows:

ARMY.	Guard.	Lins.	Reserving, Conscript in Troops.	Total.
Infantry.....	1,800	25,200	73,578	80,578
Militia of Gothland.....			5,311	5,311
Cavalry.....	440	4,740	9,974	9,154
Artillery (241 guns).....		4,673	3,311	7,984
Engineers.....		578	1,033	2,024
Military train.....			5,524	5,524
Total.....	2,940	35,583	94,950	132,775

The navy, which was entirely reorganized in 1866-'67, consisted, in September, 1873, of 14 iron-clads, 17 unarmored steamers, 8 sailing-vessels, 91 galleys; total 130 vessels, of 3,533 horse-power, and 451 guns. At the end of 1873, the navy was officered by 1 admiral, 8 commanders, 40 captains, and 44 lieutenants. The principal port is that of Karlskrona, on the Baltic.

The increase of the imports and exports since 1850 is shown by the following table:

YEAR.	Imports.	Exports.
1871.....	Riksdal r. 169,179,000	Riksdal r. 161,023,000
1870.....	141,680,000	152,202,000
1860.....	82,409,000	86,496,000
1850.....	36,550,000	38,625,000

The movement of shipping was, in 1871, as follows:

FLAG.	ARRIVALS.		CLEARANCES.	
	Loaded Vessels.	Tons.*	Loaded Vessels.	Tons.*
Swedish.....	3,114	103,529	7,221	301,327
Norwegian.....	680	33,677	2,385	213,325
Foreign.....	1,777	94,117	4,041	328,833
Total.....	5,571	231,323	13,647	643,485

The merchant navy of Sweden numbered, in 1871, 3,195 vessels, of 118,112 lasts. The number of vessels registered for the foreign trade was 1,566, of a total burden of 92,143 lasts.

* Swedish last = 3.27 tons.

The aggregate length of railroads in operation at the end of 1872 was 1,892.9 kilometres; of those in course of construction, 2,021.2 kilometres (1 kilometre=0.62 mile). The number of post-offices in 1870, was 540. The revenue amounted to 2,458,458 riksdalers; the expenditures to 2,816,924 riksdalers. The aggregate length of the state telegraph-lines was 7,057 kilometres; and of telegraph-wires 14,943 kilometres.

The area of Norway is 122,280 square miles. The population was, in 1872, estimated at 1,763,000. The following towns had, in 1870, a population of more than 10,000 inhabitants: Christiania, 66,657 (in 1872 about 70,000, and with the suburbs 80,000); Bergen, 80,252;

Drontheim, 20,858; Stavanger, 17,053; Drammen, 15,458; Christiansand, 11,468. The budget for the period ending June 30, 1874, estimates the revenue and expenditure at 5,455,704 specie dalers each (1 specie daler=\$1.11). The public debt at the end of August, 1873, had become reduced to 6,876,000 specie dalers. On January 1, 1872, the troops of the line numbered 13,000 men, the reserve forces 12,000, and the landvaern 11,000. The naval force, in 1872, consisted of 21 vessels (4 iron-clads), with an armament of 172 guns.

The imports, in 1871, amounted to 26,738,000 specie dalers, and the exports to 20,189,000.

The movement of shipping, in 1871, was as follows:

SHIPPING.	NORWEGIAN.		FOREIGN.		TOTAL.	
	Vessels.	Lasts.	Vessels.	Lasts.	Vessels.	Lasts.
Arrivals.....	7,093	573,805	5,155	224,159	12,248	797,964
Clearances.....	6,990	556,292	5,173	222,568	12,163	778,860

The merchant navy, at the end of 1872, consisted of 7,189 vessels, of a total burden of 533,548 commercial lasts (1 last=2.1 tons). The aggregate length of railroads in operation at the end of 1872 was 496 kilometres. The aggregate length of telegraph-lines 5,992 kilometres, of wires 9,852 kilometres.

On January 20th the Swedish Diet was opened by the King, who in his speech from the throne briefly reviewed the career of the former kings of the house of Bernadotte, especially of his immediate predecessor, the late King Charles XV., and expressed the wish for the establishment of a closer union between Sweden and Norway. He recommended the formation of a general staff for the army, the reorganization of the fleet so as to make it more efficient for the defense of the coast, the improvement of the public-school system, and the extension of the railroad net north of the Gefle. At the discussion of the budget for 1874, the First Chamber adopted the amount proposed for the civil list of the King, without change; while the Second Chamber, by 125 against 56 votes, resolved to reduce it by 100,000 riksdalers. In a joint session of the Chambers it was finally agreed to leave it without change. The reorganization of the army, on which the Government had in vain endeavored to come to an understanding with the representatives of the people in 1862, in 1865, in 1869, and in 1871, again engaged the attention of the Chambers. The new bill of the Government had for its object to strengthen the army and to facilitate the transition to another organization without doing away with the present system. On April 19th both Chambers adopted by large majorities a royal proposition concerning the monetary convention concluded with Denmark and Norway. On May 12th the King and the Queen were solemnly crowned in Stockholm, and on May 26th the Diet was closed by the King. The speech from the

throne states that, although the organization of the army had not yet been accomplished, there were now hopes that it would be secured at the next session. Both Chambers had agreed (the first by 55 against 54, the second by 128 against 68) that the Indelta or national militia which is kept and paid by the land-owners, and to some extent from the income of state domains expressly reserved for this purpose, should gradually be abolished within thirty-three years, in case the Government should be able to find another system of national defense offering an equal prospect of safety. On July 19th a postal treaty was concluded between the three Scandinavian kingdoms, according to which a letter in all the three kingdoms will cost 6 Danish shillings (1 shilling=about $\frac{1}{3}$ cent). In August, the King received a visit from the Crown-Prince of the German Empire, on which occasion he expressed his German sympathies. In the same month the long controversy between Swedish and Danish vessels concerning the right to pilot in the sound, was settled by an agreement of the two Governments, according to which the sound, wherever the one coast is Danish and the other Swedish, shall be open to the pilots of both nations; but where both coasts belong to one country, this alone shall have the right to pilot. The Drogden, a small strait which lies between the islands of Saltholm and Amager leads to the Bay of Copenhagen, is to be regarded as exclusively Danish water.

The Swedish Church Assembly, a body which was created in 1866, when the special representation of the clergy at the Swedish Diet was abolished, and which meets every third year, assembled at Stockholm on September 2d. It consists of 80 clergymen and 80 laymen. Of the clergymen 13 (12 bishops and the pastor primarius of Stockholm) are *ex officio* members. The committee which had been charged with elaborating the draft of a

new church law reported that its work was nearly finished. When completed it will be laid before the consistories, and subsequently, as it is expected, before an extraordinary session of the General Assembly. A member of the State Council, Wennerberg, presented eight royal letters concerning different ecclesiastical questions; among them was the publication of a new catechism, a new translation of the Bible, and a law relating to dissenters. The latter was adopted on September 24th by 43 against 13 votes.

On September 10th the submarine cable which connects Sweden with Great Britain and Denmark was opened.

In November, a royal order authorized female students to present themselves for examination at the Swedish universities, except in the faculties of theology and law.

The Storting of Norway was opened by the King on February 3d. A resolution providing for the abolition of the office of Stadtholder of Norway, for which the King has the right of nominating a Swede, although this right has for many years not been exercised, was sanctioned by the King; and the head of the Norwegian Government will henceforth always be a state minister, a native of Norway. The Storting was closed on June 9th. The speech from the throne expressed the King's satisfaction with the work of the session in general, but regretted that the Storting had refused to accept the monetary convention, and declared the new military service law to be unacceptable. On July 18th the King and the Queen were solemnly crowned at Drontheim, in the presence of Prince Arthur of England and Prince Waldemar of Denmark.

Of the new elections for the Storting, 107 out of 111 were ended at the close of the year. The Left, under the leadership of Sverdrup, has a still larger majority than in the preceding year. About one-fourth of the members were partisans of the Government. The extreme Left was only represented by five members; the remainder belonged to the Middle party.

SWITZERLAND, a republic of Central Europe, consisting of twenty-two cantons, three of which are divided each into two independent half-cantons. The supreme legislative and executive authority is vested in a Parliament of two Chambers, the Ständerath, or State Council, and the Nationalrath, or National Council. The first is composed of forty-four members, two for each canton. The Nationalrath consists of 135 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every twenty souls. Both Chambers united are called the Federal Assembly, and as such represent the supreme Government of the republic. The chief executive authority is deputed to a Federal Council, consisting of seven members, elected for three years by the Federal

Assembly. The President and Vice-President of the Federal Council, who are the first magistrates of the republic, are elected by the Federal Assembly for the term of one year, and are not reëligible till after the expiration of another year. The President of the Federal Council for the year 1873 was P. J. Cérésole, of the Canton of Vaud; Vice-President, Dr. O. Schenk, of the Canton of Berno. President of the National Council for the session of the Federal Assembly, beginning in July, 1873, G. Ziegler, of the Canton of Zurich; Vice-President, K. Feer-Herzog, of the Canton of Aargau. President of the State Council, A. Koff, of the Canton of Lucerne; Vice-President, A. Köchlin, of the Canton of Basel.

Area of Switzerland, 15,992 square miles. Population, according to the census of 1870, 2,669,147, of whom 1,566,347 (58.7 per cent.) were Evangelical; 1,084,369 (40.6 per cent.) Catholics; 11,435 members of Christian sects, and 6,996 Jews. Of the foreign residents of Switzerland, 62,228 were French, 57,245 Germans, 18,073 Italians. As regards the languages spoken in Switzerland, 384,538 households (or 69 per cent.) were German; 133,575 (24 per cent.) French; 80,079 (5.4 per cent.) Italian; 8,778 (1.6 per cent.) Romance.

The total revenue of the Confederation in the year 1872 amounted to 29,641,914 francs; the expenditures to 27,559,245 francs; surplus of 2,781,388 francs. The budget for 1873 estimated the revenue at 28,941,000 francs; the expenditures at 28,779,100 francs; surplus at 161,900 francs. The liabilities of the republic amounted, in 1871, to 80,057,593; as a set-off against which there is Federal property amounting to 27,778,268 francs.

The strength and organization of the armed forces of Switzerland were as follows, at the end of September, 1872:

TROOPS.	Bundesanzug.	Reserve.	Landwehr.	Total.
Staff.....				841
Infantry.....	66,649	39,078	54,334	160,061
Riflemen.....	6,001	3,364	4,616	13,981
Cavalry.....	1,913	1,086	1,571	4,570
Artillery.....	8,262	5,350	4,643	18,255
Engineers.....	1,245	1,059	474	3,047
Administrative troops.	299	129	74	502
Total.....	84,369	50,069	65,981	201,237

The maintenance of a standing army within the limits of the Confederation is forbidden by the Constitution. The Bundesanzug comprises the men able to bear arms, from the age of twenty to thirty; the reserve, those from thirty-one to forty; the Landwehr, those from forty-one to forty-four. Both the men of the Bundesanzug and the reserve are called together in their respective cantons for annual exercises, extending over a week for the infantry, and over two weeks for the cavalry and artillery.

The aggregate length of Swiss railways, at the end of 1870, was 1,310 kilometres; that of telegraph-lines, in September, 1872, 5,529.4

kilometres. The number of steamboats kept on the lakes of Switzerland was eighty-six, of 3,500 horse-power.

The most prominent feature of the history of Switzerland during the year 1878 was the continued conflict between the Federal authorities and the majority of the cantons, on the one hand, and the Catholic Church on the other. In January the cantons belonging to the Diocese of Basel (Aargau, Basel City, Basel Country, Berne, Thurgau, Soleure, Lucerne, and Zug) held a new conference for arranging their difficulties with Bishop Lachat. It was resolved: 1. To recall the authority given to Bishop Lachat in 1868, to occupy the Episcopal See of Basel. 2. To forbid Bishop Lachat from exercising any episcopal functions in the cantons consisting of the Diocese of Basel. 3. To request the government of the Canton of Soleure, in the capital of which the bishop resides, to give to the bishop notice to quit the episcopal palace within a stated time. 4. To request the cathedral chapter to appoint as administrator of the diocese, *pro tem.*, a person acceptable to the government of the canton. 5. To open at once negotiations for a revision of the original Diocesan Pact (Diöcesan-Vergleich), which defines the relations of the cantons constituting the Diocese of Basel to their bishop, and to invite the Cantons of Zurich, Geneva, Ticino, and Schaffhausen, to take part in the work of revision. 6. To request the Federal Council to communicate these resolutions to the Pope. Two cantons belonging to the diocese, Lucerne and Zug, protested against the deposition, and declared that they would not recognize any one else as their bishop. The Governments of Berne, Aargau, Basel Country, Soleure, and Thurgau, at once carried out the resolutions, and requested the Catholic priests of their cantons to break off at once all official correspondence with Bishop Lachat. As the Cathedral Chapter of Soleure declined to elect an administrator of the vacant diocese, the Diocesan Conference resolved, on February 14th, to take the election of an administrator into its own hands, and to request the Government of the Canton of Soleure to make a suitable nomination. In April the bishop and his chancellor, Duret, were forced by the Government of Soleure to leave the episcopal palace. As the bishop, who took up his provisional residence in the Canton of Lucerne, continued the exercise of his functions throughout the diocese, the Government of Lucerne asked him, for the sake of peace, to avoid more serious conflicts by omitting to force his claims upon the cantons which had declared against him. In accordance with this advice, the bishop, in May, notified the Federal Council that, although he still regarded himself as the lawful bishop of the entire diocese, he was willing to restrict the actual exercise of his functions for the sake of peace. A serious conflict arose in consequence of the deposition

of Bishop Lachat, in the Canton of Berne. All the parish priests of the canton, ninety-seven in number, protested against the order of their government, which forbade the further recognition of the bishop, and the continuance of all official correspondence with him, and declared that they would not conform to this order. In consequence of this declaration, the government of the canton resolved to move the deposition, by the Court of Appeal and Cassation, of all the parish priests who had signed the above protest, and who would not, within fourteen days, withdraw their signatures; and, for the present, to suspend them from their priestly functions. The suspended priests were requested, by the cantonal authorities, to surrender the civil registers; and the mayors and common councils were reminded of their responsibility in case attempts should be made to cause riots and disturbances. In order to avoid any confusion in the celebration of marriages, the provisional introduction of civil marriage, in the Catholic districts of the Jura, was resolved upon. The parish priests held a meeting toward the close of March, at which they resolved to persevere in their opposition.

On September 15, 1878, the Court of Appeal and Cassation pronounced the deposition of the parish priests, who, in the opinion of the court, were unconditionally to be regarded as officers of the state. On October 7th the Government of Berne issued an ordinance, providing for the consolidation of some of the parishes, reducing their number to eighteen. The new priests were to be introduced into their offices by the representatives of the Government; they were required to take the oath prescribed for state officers in the presence of the assembled congregation, and to promise not to enter without the consent of the state Government into an official correspondence with any episcopal or other ecclesiastical authority, nor to accept any orders from it. As the deposed priests continued to exercise their priestly functions in private buildings, and as from several places disturbances were reported, the Government, in December, forbade the deposed priests from celebrating divine worship in any building placed under the superintendence of the state, and imposed a fine of two hundred francs upon the misuse of private worship for the disturbance of the public peace. As Bishop Lachat admonished the Catholics of Berne to be firm in their resistance to the cantonal government, and as he excommunicated the priests whom the Government of Berne had appointed for some of the parishes, the Government of Berne officially remonstrated with the Government of Lucerne for allowing the bishop, while residing upon its territory, to perform such acts, and the Government of Lucerne, in December, declared that a letter of Lachat to the other Swiss bishops, dated November 80th, pronouncing the excommunication of the new priests, was an act of external jurisdiction which the bishop

was not authorized to perform in any of the cantons which did not recognize his jurisdiction. (*See ROMAN CATHOLIC CHURCH.*)

The conflict between the cantonal Government of Geneva and the Catholic Church entered into a new phase, when a papal brief of January 16, 1873, appointed Abbé Mermillod Vicar Apostolic of Geneva, with the rights of a diocesan bishop. The State Council of Geneva resolved to deprive all priests who had read the papal brief from the pulpits, of their salaries for three months. The Federal Council, in a reply to the papal brief, dated February 11th, declared that the authorities of Switzerland, at all times, had adhered to the principle that questions relating to the organization of bishoprics, could only be decided with their consent; that especially all measures of the Holy See, which had for their object the creation of new bishoprics or changes in the territorial limits of those now in existence, were of a political as well as religious nature, and required the consent of the Federal authorities, and that accordingly the Federal Council must declare as null and void any change which the Holy See would undertake to make without its consent. As regards the Catholics of Geneva, the Confederacy could only recognize the Diocese of Lausanne, as it had been in existence since 1829, it could, therefore, not recognize the new office of an Apostolical Vicar of Geneva, and would, if necessary, prevent Abbé Mermillod from exercising the functions of this office. The Government of Geneva received a copy of this reply, and was invited to present it to Abbé Mermillod, and to ask the latter for a declaration whether, in view of the Federal protest against the unlawful division of the Diocese of Lausanne and Geneva, he intended to exercise the functions of an Apostolical Vicar of Geneva. As Abbé Mermillod replied that he could not, and would not, abstain from the exercise of functions which were of a merely ecclesiastical character, the Federal Council, on February 17th, resolved to exile him from Swiss territory. The order was transmitted to the State Council of Geneva by telegraph, and executed by the latter on the same day. On March 23d a new law on Catholic worship, providing that the parish priests be elected by a majority of the Catholic voters, was adopted in Geneva by 9,081 against 151 votes, the Catholic party refusing to take part in the vote. Other laws providing for the regulation of the affairs of the Catholic Church and creating a Supreme Ecclesiastical Board of twenty-five members, twenty laymen and

five clergymen, followed. They were sanctioned by the Grand Council of the canton on August 28th, and recognized as valid laws of Geneva by the Federal Council and the Assembly. On October 12th three Catholic priests were, for the first time, elected in the city of Geneva, in accordance with the new law. As the opponents of the law again abstained from voting, Father Hyacinthe and two other Old Catholic priests of France (Hartand and Chavard) were elected.

Although the conflicts between the Church and state were nowhere so severe as in the cantons constituting the Diocese of Basel, and in the Canton of Geneva, they still existed in most of the other cantons. In the new election held in May for the renewal of the Grand Council in the Cantons of Grisons and St. Gall, the Liberal party, which was in outspoken sympathy with the policy of the Federal Council on Church questions, was successful. A number of severe measures, favoring the same policy, were passed in the entirely Catholic Canton of Ticino.

As the Pope, in his encyclical of November 21, 1873, severely condemned the measures adopted against the Catholic Church, the Federal Council, on December 12th, informed the papal nuncio, Agnozzi, that in consequence of the conduct of the Pope toward Switzerland, the Confederacy could no longer recognize a papal diplomatic agent.

As the majority both of the National and State Councils were in favor of a revision of the Federal Constitution, the Federal Council during the summer months prepared a new draft, which was submitted to the Assembly when its session was opened on November 3, 1873. While the draft had made some concessions to the opponents of an extension of the Federal authority at the expense of cantonal rights, it was more emphatic than the amendments, which had been rejected by the popular vote of 1872, in indorsing the ecclesiastical policy of the Liberal majority of the Council and the Assembly.

A Protestant Church conflict arose in the Canton of Neuchâtel, when the Grand Council in May adopted a new Church law, which enlarges the rights claimed by the state in the administration of the Church, and provided for a periodical election of all clergymen of the state Church. A considerable number of ministers of the Reformed Church declared their intention not to submit to the law, but to secede from the state Church and form a free Evangelical Church.

T

TAPPAN, LEWIS, a merchant and reformer, born in Northampton, Mass., May 23, 1788; died in Brooklyn, N. Y., June 21, 1873. He received a very thorough English education in his native town, and at the age of sixteen was

an articulated clerk in a dry-goods importing-house in Boston. He proved so faithful and valuable to his employers, that they placed the fullest confidence in him, and gave him facilities for establishing himself in business when he came

of age. He was successful so far as the dry-goods business was concerned, but involved himself heavily in the establishment of print-works, and the manufacture of cottons. In 1827 he removed to New York and became a member of the firm of Arthur Tappan & Co., which his brother had started some years before. In 1828 the two brothers established the *Journal of Commerce*, which, in 1829, became the sole property of Lewis. In 1831 he sold it, after establishing it on a paying basis, to Messrs. Hale & Halleck. In 1833 Lewis Tappan and his brother Arthur became identified with the antislavery movement, and were for years subjected to great obloquy and persecution in consequence. Lewis's house was sacked, and his furniture destroyed by a mob in July, 1834; and at other times, both he and his brother suffered personal violence at the hands of the mob. In 1837, at the time of the financial crisis, the firm of Arthur Tappan & Co. failed, with liabilities for upward of \$1,000,000, which were afterward paid in full. Not long after, Lewis Tappan withdrew from the firm, and established the first mercantile agency in the country, long known as Tappan's, which he conducted successfully for many years. He had the most prominent part in the founding of the American Missionary Society, the Antislavery Missionary Organization for both Home and Foreign Work, the circumstances of whose origin are too well known to require recapitulation. For many years he was its treasurer, and devoted much time and money to its advancement. Afterward elected its president, he held that office till 1866, when impaired hearing induced his resignation. He had been for some years a member of Plymouth Chapel, having left the Presbyterian Church for the Congregationalist about 1840. In 1871, his "Life" of his brother, Arthur Tappan, was published in New York; he was struck by paralysis for the first time just as he had sent the sheets to press.

TENNESSEE. The Legislature of this State, which had been in session since the early part of January, adjourned on the 25th of March.

The most important measure that occupied the attention of that body at this session was the bill "to fund the past-due bonds and coupons of the State, and to sustain the credit thereof." By this act it was provided "that all the outstanding, legally issued bonds of the State of Tennessee, due or to become due, before the 1st day of January, 1874 (as well as all past-due coupons, and coupons maturing on or before the 1st day of January, 1874), may be funded in 6 per cent. coupon bonds of the State of Tennessee, to be styled 'the new series of funding bonds,' redeemable, at the option of the State, after July 1, 1874, and due and payable on the 1st of July, 1914, and bearing 6 per cent. interest, evidenced by coupons attached, payable semi-annually, on the first days of January and July in each and

every year, from and including the 1st day of July, 1874, to the maturity of the bond."

The third section provides "that the faith, honor, and credit of the State of Tennessee is hereby pledged for the payment of said bonds at maturity; and for providing a sinking fund for that purpose; and for the prompt payment of the interest on said bonds, as well as the interest on the registered bonds hereinafter provided for, commencing with the interest to fall due on the 1st day of July, 1874. And it is hereby made the duty of the Treasurer of the State to set apart for that exclusive purpose so much of the revenues as may be necessary to pay the interest on said bonds, commencing with the interest that falls due the 1st day of July, 1874: *Provided, nevertheless,* That the coupons of bonds owned or held in trust by educational institutions within this State shall be paid and not funded; those past due as those not yet due, as they become due. And if those institutions elect not to fund their bonds, they shall, nevertheless, be entitled to their interest at maturity; and, *provided further,* that preference shall be given to the interest on the school-fund as provided by law."

The permanent school fund of the State, amounting to \$2,512,500, heretofore dedicated to the purpose of common schools and free education by the State constitution, together with the unpaid interest thereon to January 1, 1873, is to be funded into one bond or certificate bearing 6 per cent. interest, payable semi-annually by the State Treasurer upon the warrant of the Controller.

No coupon or bonds not now due, however, are to be paid other than those coupons falling due on and after January 1, 1874; "and only such coupons of said bonds maturing after that time as shall be presented to the Controller, who shall examine the same; and if found to have been issued according to law, shall be registered, and the registration properly indicated thereon by him; and the Secretary of State and the Controller shall each receive for each bond registered under this act the sum of fifty cents, to be paid by the party presenting said bonds for registration."

The twelfth section provides "that the bonds and coupons thereto attached, issued by authority of the General Assembly of the State, in compliance with law enacted and in force at the time of their issuance, whether they were issued previous to the 6th day of May, 1861, or subsequent to the reorganization of the State government, on the 8d day of April, 1865, may be funded or registered according to the provisions of this act: *Provided,* That all bonds and coupons thereto attached, issued by the authority or pretended authority of the General Assembly; or by the authority or pretended authority of any body or assemblage of men pretending or claiming to be the General Assembly of the State of Tennessee, from and after the 6th day of May,

1861, up to the 3d day of April, 1865, when the government of the State of Tennessee was reorganized under the constitution, and schedule thereto, ratified and adopted by the people on the 22d day of February, 1865, and all bonds or liabilities issued for war purposes shall be and are hereby expressly excepted from the provisions of this act, as hereinbefore defined; and, *provided further*, that the provisions of this act shall not embrace, but expressly exclude any and all bonds known to have been stolen or purloined from the State, or bonds which were fraudulently issued or obtained."

An important feature of the new school-law passed was the provision "that when the money derived from the school fund and taxes imposed by the State on the counties shall not be sufficient to keep up a public school for five months in the year in the school districts in the county, the county court shall levy an additional tax sufficient for this purpose, or shall submit the proposition to a vote of the people, and may levy a tax to prolong the schools beyond the five months; said tax to be levied on all property, polls, and privileges liable to taxation, but shall not exceed the entire State tax." The taxes so levied by the counties are to be collected in the same manner as other county taxes, and to be paid over to the county trustee for distribution among the school districts of the county according to their scholastic population.

A new assessment law was passed, which it is believed will secure the return of a much greater value of taxable property; and the question of calling a convention to amend the constitution of the State was discussed. Among the suggested changes needed in the present constitution are the removal of restrictions thrown around capital, by the abolition of all usury laws; a reform in the judiciary system; amendment of the poll-tax regulation as affecting suffrage; provision for the election of Lieutenant-Governor, who shall be Speaker of the Senate, and Governor, in the event of the death or resignation of the Executive; with other important and needed amendments.

In the early part of the session of the General Assembly, Charles M. Gibbs (liberal Democrat) was elected Secretary of State. On the 1st of May W. W. Hobbs resigned the office of Controller of the Treasury, and John O. Burch, of Nashville, was appointed Controller by Governor Brown.

The farmers of Tennessee met in convention in Nashville, in September, for the purpose of forming a State Farmers' Association, with the view of bringing about concert of action and unity of purpose among the agricultural classes. The convention was largely attended by delegates from all parts of the State. A permanent association of the farmers of the State was formed, and the leading questions affecting the interests of this class were discussed by able speakers, among whom was

Governor Brown. During the proceedings the following resolutions, among others, were adopted:

Whereas, We are satisfied that there are some irregularities, and perhaps oppressions on the part of our railroads; and—

Whereas, We recognize the fact that our railroad men are gentlemen of character: and—

Whereas, We do not profess to understand the details of business connected with the roads in question: therefore—

Resolved, That in order to understand and appreciate the real status of railroad management in this State, and to know whether our grievances relative to oppression and unfair dealing are well founded, we deem it more wise and judicious to approach this great question calmly and cautiously.

Resolved, That with the view of reaching the ends thus indicated, this convention appoint a committee of six able men, two from each Grand Division of the State, whose duty it shall be to confer with the managers of the railroads, and gather from them a full and accurate statement of facts and figures as to their operations.

Resolved, That this committee be empowered and authorized to treat with our railroad men, and to make such terms with regard to transportation as may be mutually beneficial.

Resolved, That the next Legislature of Tennessee is hereby earnestly petitioned to use all possible means to have repealed what is known as the ten per cent. interest law, so that all money transactions shall be based upon the legal rate of interest of six per cent.

Resolved further, That our Senators and Representatives in Congress be requested to use their influence in passing such laws as will cause United State bonds to be taxed as other property, real or personal.

Whereas, It is apparent that the labor system of Tennessee is inefficient, and has failed to meet the wants of the farmers of the State: therefore—

Resolved, That this convention instruct the corresponding secretary of this body to open a correspondence with James Holmes, Esq., of Birmingham, England, or with any other responsible parties, either of Europe or of the United States, with regard to the practicability of procuring laborers, male and female, and requesting that all the information be given possible relative to the matter.

No official report of the condition of the finances of the State has been made public since that given at the beginning of the year, and which appears in the preceding volume of this work. The State authorities began to fund the State debt early in August, and up to the close of the year had funded 1,896 bonds of \$1,000 each. It is believed that most of the Tennessee bank money, which has given the State no little embarrassment during the past two or three years, has been paid in for taxes, and canceled. At the close of the year there were not more than \$400,000 outstanding warrants, which were gradually consumed by taxpayers, anxious to save the difference between them and currency. It is believed that, by the middle of 1874, all of the Tennessee money, and State warrants, will have been paid into the Treasury.

In reply to numerous letters asking for information in relation to the operation of the new funding law, Governor Brown issued a circular letter in April, in which he said:

As to what bonds will be rejected, it is proper to state that those known as the Mineral Home Railroad bonds, amounting to \$100,000, and numbered as follows, to wit: From No. 9,851 to 9,885, and from 9,886 to 9,980, all of said numbers included, all being green bonds, without letter denoting series, and those known as the bonds of the Insurance Company of the Valley of Virginia, amounting to \$20,000, and numbered as follows, to wit, from 6,001 to 6,017, including both numbers, also Nos. 6,740, 7,546, and 7,547, all of green issue—without letter denoting series—as well as the Tennessee Confederate war bonds, will be rejected. If there be any others that may not be registered, or funded under the provisions of the funding act, their existence is not known in this department. And when it is considered that out of more than (\$13,000,000) thirteen millions retired since the early part of 1870, no such bond has been detected, the presumption is very strong that none such are in existence. The bonds and coupons presented will, however, be critically inspected, and, if any are found to have been fraudulently issued, or not issued under laws existing at the time they were issued, they will be rejected.

Believing that the new assessment law would develop a largely-increased amount of taxable property, ample to meet the requirements of the State, the Governor saw no necessity for an extra session of the General Assembly. The interest maturing July 1, 1874, will be met out of the revenues of 1873; and, should any increase in the revenue become necessary to meet subsequent installments, it can be made in the assessments and levies of 1874.

The following statement shows the educational condition of Tennessee on the 15th of October, 1873, excepting the counties of Decatur, Jackson, Marion, and Tipton, which had not reported.

Population between the ages of six and eighteen years:

White males.....	161,906
White females.....	152,130
Total whites.....	314,036
Colored males.....	53,007
Colored females.....	50,397
Total colored.....	103,404
Total between six and eighteen.....	417,442

An enumeration was ordered of all persons between the ages of eighteen and twenty-one, since for three years after the organization of the schools, such persons had the privilege of attending school; but, in many of the counties, this part of the enumeration was neglected by the directors. According to the returns made, however, this class amounts to about one-eighth of the number between six and eighteen. The incompleteness of this enumeration is unimportant, since the distribution of funds is made upon the basis of the population between six and eighteen.

Number of schools organized, white, 3,869; colored, 580; total, 3,949.

Number of pupils, between six and eighteen, enrolled, white, 146,233; colored, 23,446; total, 169,679.

Number of pupils, between eighteen and twenty-one, enrolled, white, 7,518; colored, 879; total, 8,397; total number of pupils enrolled, 178,076.

Number of teachers licensed, white males, 3,263; white females, 801; total whites, 4,064; colored males, 410; colored females, 206; total colored, 616; total number of teachers licensed, 4,680.

Number of teachers employed, white males, 2,899; white females, 177; total white, 3,676; colored males, 355; colored females, 187; total number of teachers employed, 4,218. Average per month paid teachers, \$82.04. The lowest average per month paid teachers in any county is \$20, in the county of Bledsoe. The highest is \$50.63, in the county of Obion.

On the first Monday in October, the first semi-annual installment of interest on the permanent school fund was apportioned among the counties. This amounted to \$75,375, and furnished about eighteen cents per head. The next apportionment will be made in April, 1874, and will include the State poll-tax, then in the Treasury, in addition to the second installment of interest. The State received \$30,000 from the Peabody fund in 1873.

During the year Nashville was visited by a kind of cholera, which caused the death of about 700 of its citizens. The epidemic had first appeared at Memphis, and along the Mississippi River, in the form of a cholera-morbus, quite sudden, rapid, and fatal. It made its appearance in Nashville in the latter part of May, during the continuance of the Exposition, when the city was filled with strangers. In a few days the deaths became so numerous as to cause general alarm. On the 7th of June 21 persons died from this cause, of whom 10 were colored; and on the 10th of the same month, when the epidemic had reached its height, the deaths numbered 72, including 49 colored persons. From June 7th to July 10th, 697 persons died, of whom 480 were colored.

The disease differed from Asiatic cholera, as seen in years past, only in having, in most cases, bilious evacuations in place of the peculiar "rice-water." Generally there were first greenish, watery dejections, then vomiting of ingesta and bilious matter, followed soon, if not relieved, by collapse, with the usual cold surface and extremities, and blue, shriveled skin.

If the evacuations continued long unchecked, they sometimes became purely rice-water, but in many cases they were bilious to the last. In not a few cases the dejections were entirely rice-water.

Cramps in the abdominal muscles, and in those of the extremities and other parts, were present in nearly all severe or fatal cases.

On account of the bilious evacuations, many physicians hesitated to pronounce the disease cholera, and hence it was often termed "the prevailing sickness," "the epidemic," etc.

TERRITORIES OF THE UNITED STATES. ARIZONA.—In the early part of the year no little trouble was caused by the depredations of the Apache Indians, against whom consequently military operations were

directed by Brevet Major-General Crook. The nature and result of these operations are set forth in the general orders issued by General Crook, dated at Prescott July 15th, as follows:

1. Captain George M. Randall, Twenty-third Infantry, surrounded and captured the remnant of Del-chay's band with that notorious chief himself, in the Sierra Ancha Mountains, on the 22d of April.

2. The operations of the troops under Captain Thomas McGregor, First Cavalry, in the Santa Maria Mountains, resulted in the surrender of Tomaspie's entire band of Apache Mohaves, on the 18th ultimo.

3. The operations of First-Lieutenant J. B. Babcock, First Cavalry, in Toronto Basin, and his brilliant action on the 18th ultimo, resulted in the surrender of the two bands of Tonto-Apaches under Na-ta-to-tel and Naqui-naquis.

4. Reports have just been received of the operations of Captain James Burns, Fifth Cavalry, in Castle Dome and Santa Maria Mountains, resulting in the unconditional surrender of over two hundred Apache-Mohaves, believed to be the last remnant of all the straggling renegades in Northern Arizona.

The foregoing-named officers and First-Sergeant Thomas Hanlon and Sergeant Patrick Martin, Company "G," Fifth Cavalry, are hereby thanked for their efficient services in the laborious task so thoroughly completed. These operations have not only had the effect of bringing in upon their proper reservations all the stragglers in Northern Arizona, but have also taught those already in, that no place outside of the limits prescribed is safe, and that, while the Government lends a helping and protecting hand to all Indians who wish to remain at peace and try to help themselves in peaceful pursuits, it still remains strong to punish those who prefer war and the fruits of plunder.

The total number of Apaches on the reservations is estimated at about 7,000. The Wal-lapai Apaches, about 800 in number, were at Camp Beale Springs, but were to be removed to the Mohave Reservation on the Colorado river. These Indians, when they were at war with the citizens, ranged through the mountain country, east of Mohave and Hardyville, and committed most of their depredations along the road between Prescott and Mohave.

The Apache-Mohaves and a portion of the Tonto-Apaches, about 2,000, have been located on the Verde Reservation. This reservation possesses rich agricultural land, with abundant water for irrigation.

The San Carlos Reservation is the home of from 1,200 to 1,500 Apaches, comprising the Arivaipas, Pinala, a few of the Tontos, and some of the White Mountain Indians. This reservation was established at the junction of the San Carlos and Gila Rivers, late in the year 1872, and the Indians were placed upon it early in the present year. The Apaches of San Carlos are regarded as the most treacherous and restless in the Territory. Many of them have made frequent raids of theft and murder, and it is only recently that they have been brought into subjection. There is abundance of agricultural land on the reservation, and an irrigating ditch has been constructed which will afford an ample water-supply. A considerable area of land has already been planted. It is now hoped that, under a strong

military government, these Indians will remain at peace.

There are 1,600 Apaches at the White-Mountain Reservation, under Major Randall of the military, and Agent Roberts, of the civil service.

Finally, there is a band of Indians known as Cachise's Apaches, located upon the Chiricahua Reservation, near the Sonora line. The number of these Indians has been variously stated at from 800 to 1,200. The exact figure cannot be given, as the Apaches are not required to be counted at Chiricahua, as at the other reservations. This reservation was established in October, 1872, by General O. Howard. The Chiricahua Reservation is sixty miles in extent, east and west, and seventy-five miles north and south, and over this vast region of country the Indians roam at will, subject to no authority save that of their chief, Cachise, who reports to the resident agent, Captain Jeffers.

According to the best estimates of well-informed military officers, there are still about 1,000 Apaches off of the reservations, so that the total number of Apaches in Arizona may be stated at 8,000. Of the 1,000 thousand still in the mountains, perhaps 800 are "warriors."

The construction of the San Diego and California military telegraph had reached a point twenty-three miles east of San Diego in September, and was progressing rapidly.

COLORADO.—In his annual message to Congress in December, 1873, President Grant thus advised about this Territory:

"I would recommend for your favorable consideration the passage of an enabling act, for the admittance of Colorado as a State into the Union. It possesses all the elements of a prosperous State, agricultural and mineral, and I believe has a population to justify such admission."

During the past few years repeated efforts have been made for the admission of the Territory into the Union as a State, especially in 1871-'72, when the Territorial Legislature memorialized Congress for that purpose. A year later these efforts were defeated by the passage of a bill by Congress, requiring a population of 125,000 in the Territory as a condition of admission into the Union. During the past year another determined effort was made by the people, and petitions to Congress were circulated in all parts of the Territory.

Colorado is situated between latitude 37° and 41° north, and longitude 102° and 109° west; it is nearly in the form of a parallelogram, with an average length east and west of 380 miles, and a breadth north and south of 280 miles. It embraces an area of 104,500 square miles, and is divided into twenty-one counties. The principal cities and towns are: Denver, the capital and chief city, in Arapahoe County, population in 1870, 4,759; Central City, 2,360, and Black Hawk, 1,068, in Gilpin County; and Georgetown, Pueblo, Golden City, Trinidad, Greeley, Kit Carson,

Boulder City, Cañon City, and Colorado City, with populations less than 1,000. In population, Colorado, in 1870, ranked fourth among the Territories; but its population has greatly increased since that year, and is believed to be now about 125,000. According to the United States census, the population in 1860 was 34,277; in 1870, 89,864, which included 456 colored persons, 7 Chinese, and 180 Indians. The tribal Indians of Colorado are the Tabeguache band of Utes, at the Los Pinos agency, numbering 3,000 in 1872, and the Yampa, Grand River, and Uintah bands of the White River agency, numbering 800. They have a reservation of 14,784,000 acres, extending from the southern boundary of the Territory to 15 miles north of the 40th parallel, and from the 107th meridian to the western boundary. The White River agency, on the river of that name, is in the northern part of the reservation; the Los Pinos agency is in the southeastern part. These agencies are under the charge of the Unitarians. These Indians receive annuities in goods, clothing, etc., of \$40,000, and a like sum in subsistence. There are also a few Indians roaming in the eastern part of the Territory. The number of male citizens of the United States in 1870, twenty-one years old and over, was 15,515. Of the total population, 24,820 were males and 15,044 females; and 33,265 were native and 6,599 foreign born. Of the natives, 6,344 were born in the Territory, 8,378 in New Mexico, 1,812 in Illinois, 809 in Indiana, 1,310 in Iowa, 1,704 in Missouri, 621 in Massachusetts, 2,778 in New York, 2,057 in Ohio, and 1,552 in Pennsylvania; of the foreigners, 1,685 were born in Ireland, 1,456 in Germany, 1,358 in England, and 758 in British America; and 1,235 persons born in the Territory were living in other States and Territories. The number of families was 9,358; of dwellings, 10,009. The area over which gold and silver mines are worked has been greatly extended during the past few years. The rich Mount Lincoln, Gold Hill, San Juan, Caribou, and Hardscrabble regions have been discovered, rivaling the best that have yet been opened in the Territories, and attracting many miners from California, Nevada, and Idaho. The deposits at the branch mint at Denver for the year ending June 30, 1873, amounted to \$818,368, of which \$3,465 were silver. The total deposits of gold which had been made at this office up to June 30, 1873, amounted to \$6,357,275, of which \$5,761,487 were the product of Colorado. The product was \$6,451,213 in gold bars, and \$19,879 in silver bars. According to official mint-returns, the deposits of gold from Colorado at the United States mint, branches, and assay-offices, up to June 30, 1873, amounted to \$20,574,914, the deposits for 1873 being \$1,167,598. Reckoning the deposits at one-third of the total product of the mines, the total yield of gold for the Territory to June 30, 1873, was more than \$60,000,000.

The chief silver-producing county is Clear Creek, which yields about 2,000 tons of silver-ore per annum. The actual development of the prominent silver lodes dates from 1867. Up to June 30, 1873, the deposits of silver from Colorado at the various United States mints and assay-offices amounted to \$1,548,090. Copper-ores containing from 10 to 15 per cent. of copper, and iron-ores yielding from 50 to 60 per cent. of that metal, abound. Valuable beds of coal, resembling anthracite in appearance, have been found in veins 14 feet thick, of which 18 feet are workable coal. The value of these beds is greatly increased by the simultaneous occurrence of fine clay and iron-ore, the former found in layers from three to five feet thick. Salt-springs occur in South Park, where extensive works have been erected. The chief crops are wheat, barley, oats, and rye. The average yield of wheat is 25 bushels per acre. Except in the southern districts, the nights are rather cold for corn; but in the valleys of the Arkansas and tributaries 30 bushels per acre may be raised. Large crops of buckwheat and hay are produced; 500 bushels of potatoes have been obtained from a single acre. But Colorado excels as a grazing and dairy country, deriving great advantages from the peculiarity of its nutritious grasses, upon which cattle thrive the whole year, and of which there is a great variety in the valleys and on the mountain-sides. The uplands and ridges between the water-courses are covered with a short, crisp, drab-colored grass. These grasses are not destroyed by frosts, but, becoming cured during the winter months, retain their nutritious qualities, and afford excellent pasturage at all seasons.

According to the returns made to the Territorial Auditor, there are in the Territory over 400,000 head of cattle and 1,000,000 sheep, the aggregate value of which is more than \$8,000,000. The increase of flocks, sales, and imports, wool and hides, gives an annual trade of \$2,500,000.

The subject of increasing the agricultural resources of the Territory by means of irrigation has always been an important one with those citizens interested in its welfare. There is an abundance of water-power in Colorado, but, as yet, the chief manufacturing establishments are some 60 lumber-mills, producing annually about 20,000,000 feet, valued at \$400,000, and about 65 flour-mills, with a yearly product of about \$1,225,000. The estimated annual value of manufactures of all classes is stated at \$2,500,000. Mining constitutes a leading industry, but the extent of the operations cannot be accurately determined. In 1870 there were reported 105 stamp-mills, with more than 1,800 stamps, which were mostly for the reduction of gold.

The principal agricultural products of Colorado for 1873 have thus been stated by a local authority, which are here given, however, as only approximately correct:

Gold and silver.....	\$5,000,000
Coal.....	1,275,000
Cereals.....	6,750,000
Live-stock.....	2,000,000
Wool.....	600,000
Lumber.....	400,000
Flour.....	1,225,000
Dairy.....	950,000

Total..... \$18,200,000

According to returns made by county assessors to the Territorial Auditor, the assessed value of property in 1873 was \$35,582,438; in 1872, \$31,260,257; and in 1871, \$24,112,078. "These assessment returns," says one of the local press, "show probably the real value of property in the Territory; and since their total (in 1873) is \$35,582,438, it is safe to assert that the actual wealth of Colorado is \$53,373,657, exclusive of mines and mining property, which is neither assessed nor taxed."

In the construction of railroads in Colorado the progress has been remarkable in recent years. The first railroad was begun in 1869, and at the end of 1871 the Territory contained 392 miles of completed railroads. At the end of 1873 about 600 miles were in operation, and many miles of new roads were in progress. The lines in operation were: the Denver Pacific, from Cheyenne, Wyoming Territory, to Denver, 106 miles; the Kansas Pacific, from Kansas City, Mo., to Denver, 639 miles; the Denver & Boulder Valley, from Hughes, on the Denver Pacific, 18 miles from Denver, to Boulder City, 27 miles; the Colorado Central, which will open a line of communication between Denver and the mountain towns and cities, completed to Black Hawk, 38 miles, with branches from Fork's Creek to Floyd Hill, 4 miles, and from Golden City to Longmont, 41 miles; the Arkansas Valley, from Kit Carson on the Kansas Pacific to Pueblo, completed to West Los Animas; and the Denver & Rio Grande Railroad, which will connect Denver with El Paso in Mexico, completed to Pueblo, 118 miles, with a branch to Coal Banks, 38 miles. The Denver & Rio Grande was the first narrow-gauge railroad built in the United States. The gauge is three feet, and the maximum grade 75 feet to the mile. The length of railroads in operation in the Territory in 1873, with the capital stock and cost of construction of the entire lines, so far as ascertainable, was as follows:

LINE.	Length in Territory Miles.	Capital Stock.	Cost of Road and Equipments.
Denver Pacific.....	96	\$2,500,000	\$5,000,000
Denver & Boulder Valley.....	97		450,000
Kansas Pacific.....	184	9,038,000	36,737,300
Colorado Central.....	83	1,474,000	8,300,000
Denver & Rio Grande.....	156	4,500,000	7,520,500
Arkansas Valley.....	56		
Total.....	600		

Of the above, 112 miles were completed during the year. In addition to this, according to a local authority, enough grading has been done

to render almost certain the construction of the following during the ensuing twelve months: Arkansas Valley, 96 miles; Denver & Rio Grande, 90; Golden & South Platte, 17; Denver & South Park, 30; Julesburg, 170; Atchison, Topeka & Santa Fé, 100. Total, 502.

The Territory is supplied with 180 schools, attended by 4,756 pupils; about 90 churches of various denominations, and seven daily, 31 weekly, and five monthly newspapers and periodicals. It contains nearly 900 miles of telegraph, six national banks with an aggregate capital of \$400,000, and agencies of about 40 insurance companies.

The present Territorial government of Colorado is as follows: Governor, Samuel H. Elbert; Secretary, Frank Hull; Chief-Justice, Moses Hallett; Associate Justices, Ebenezer T. Wells, James B. Belford; United States Attorney, H. C. Alleman; United States Marshal, Mark A. Schaffenburg; Surveyor-General, William H. Lessig; Assayer United States Mint, J. F. L. Schirmer; Superintendent of Public Instruction, Horace M. Hale; Auditor, James B. Thompson; Treasurer, George T. Clark.

During 1873 the explorations of the United States Geological and Geographical Survey were prosecuted with great success under Dr. F. V. Hayden. The area authorized by Congress to be explored comprised the mountainous portion of the Territory which was divided into three districts of about 7,000 or 8,000 square miles each; each district being about 130 miles long, and 58 broad. The northern district included the Middle Park, the middle district the South Park, and the southern the San Luis Valley. To each of these districts was assigned a distinct party, consisting of two topographers, a geologist, two packers, and a cook, with sometimes one or two additional assistants. The whole area constituted a section about 160 miles broad, embracing within its limits some of the grandest ranges of the Rocky Mountain system at their point of greatest elevation, and the most remarkable as well as the most extended groups of high peaks to be found anywhere on the continent.

"The Territory of Colorado," says Dr. Hayden, "comprises one of the most interesting areas on the continent, both in a geological and a geographical point of view. It forms the centre of greatest elevation in the Rocky Mountain chain. In Central Colorado, the chain proper is about 120 miles broad, made up of three lofty parallel ranges running nearly north-northwest, flanked on the west by great plateaus and groups of peaks. Between the ranges lie the great elevated basins known as 'the Parks.' The Front or Colorado range, which rises abruptly from the plains, is seen from Denver in a grand panorama 140 miles long. From its snowy, serrated crest rise many peaks between 12,000 and 13,000 feet high, and six that reach above 14,000 feet. The latter are Long's, Gray's, and Pike's Peaks,

and Mounts Rosalie and Evans. On the west side of the Parks is the Park Range, in the highest group of which Mount Lincoln and Quandary Peak rise to about 14,200 feet. From the summit of Mount Lincoln the eye sweeps over a wilderness of high peaks, which can be equalled nowhere except in the Andes or the Himalayas. Two hundred peaks of nearly 13,000 feet, and about twenty-five rising to 14,000 feet and upward, are simultaneously comprised within the scope of vision."

DAKOTA.—This Territory embraces an area of 150,932 square miles, lying between latitude 42° 30' and 49° north, having an average length, north and south, of about 450 miles, and a breadth, east and west, of about 350 miles. Most of the Territory west and south of the Missouri River is unorganized. The remainder is divided into eighty-three counties. The only considerable town is Yankton, the capital, situated in the southeast corner of the Territory, on the Missouri River, and having a population in 1870 of 737. The Territorial government is as follows: Governor, John L. Pennington; Secretary, Oscar Whitney; Chief-Justice, Peter C. Shannon; Associate Justices, J. P. Kiddler and A. H. Barnes; District Attorney, William Pound; Surveyor-General, W. Pitt Dewey; Marshal, J. H. Burdick; Collector of Internal Revenue, G. P. Beunett; Treasurer, G. C. Maynard; Auditor, T. J. Sloan; Superintendent of Public Schools, E. W. Miller.

Liberals.....	2	7	
Anti-Republican majority.....	1	..	

In 1870 the population was 14,181, who are chiefly engaged in agriculture. The tribal Indians number about 29,000. Manufacturing industry is not yet developed; but there is abundant water-power, which, with the advantages for sheep-farming, will greatly facilitate the development of woollen manufactures. The total length of completed railroads in the Territory is 255 miles. The Northern Pacific Railroad, from Duluth, Minnesota, at the head of Lake Superior, to Puget's Sound, Washington Territory, is to cross the north Central portion of Dakota. In July, 1873, it was in operation to the Missouri River, in Central Dakota, and its extension was in rapid progress; the Dakota Southern Railway connects Sioux City, Iowa, and Yankton, sixty-one miles. The Dakota & Northwestern, from Yankton northwest to the Big-Cheyenne River (constructed and operated from Sioux City to Yankton, by the Dakota Southern Company); the Dakota Central, from Yankton north to a connection with the Northern Pacific, about 280 miles, and other lines are projected.

DISTRICT OF COLUMBIA.—In 1871 a territorial form of government was provided by Congress for the District of Columbia, which was

constituted a body corporate, with the executive power vested in a Governor and Secretary appointed by the President of the United States, with the advice and consent of the Senate, for four years: and in a Controller, Collector Auditor, Treasurer, Attorney, Registrar, Superintendent of Assessments and Taxes, Water Registrar and Survey, appointed by local authority. The Legislature consists of a Council of eleven members, who are appointed by the President, with the advice and consent of the Senate, and hold office for two years; and a House of twenty-two delegates elected annually by the people. The Governor is vested with the veto-power, but a bill may be passed over such veto by a two-thirds vote of each House. The Supreme Court consists of a chief and four associate justices, who receive their appointment from the President.

The District of Columbia embraces an area of sixty-four square miles, and is ten miles long from northwest to southeast. The population in 1870 was 131,700. The assessed value of real estate for the fiscal year ending June 30, 1873, was \$87,869,924; the valuation of Washington City was \$72,880,880; of Georgetown, \$6,366,488; of the county of Washington, \$8,623,056. The estimated valuation for the year ending June 30, 1874, was \$95,500,000. Personal property is not now assessed, but the Controller, in his report of April 28, 1873, estimates the actual value of all property, including that of the Federal Government, at \$200,000,000.

On the 10th of September H. D. Cooke tendered his resignation as Governor of the Territory, which was accepted two days later by President Grant, who appointed to the office Alexander R. Shepherd. The present Government was appointed by President Grant, and is Republican. The other officers are: Secretary, Richard Harrington; Board of Public Works, Alexander R. Shepherd, President; Henry A. Willard, Vice-President; James A. Magruder, Treasurer; Adolph Cluss and John B. Blake.

The sessions of the Legislature being biennial, the latest report on the financial condition of the Territory is for the year ending November 30, 1873. At that date the total indebtedness was \$185,495, of which \$77,255 was bonded. The principal of these bonds will become due in January, 1875. The chief industry of Idaho is mining. Gold was first discovered, in paying quantities, on Oro-Fine Creek, a northern tributary of the Clearwater, in 1860. The Boise Basin mines were discovered in 1862, and the Owyhee mines the following year. The product of the Territory, prior to 1868, is stated, by J. Ross Browne, at \$45,000,000; the subsequent yield, according to R. W. Raymond, United States Commissioner of Mining Statistics, has been as follows: 1868, \$7,000,000; 1869, \$7,000,000; 1870, \$6,000,000; 1871, \$5,000,000, making the total product, to the beginning of 1872, \$70,000,000. The gold deposited at the various United States mints and assay-offices, to June 30, 1873, amounted to \$18,389,785; silver, \$300,401. A United States assay-office was established at Boise City, in 1872. The production of the precious metals in Idaho, in 1873, is thus returned: Gold-dust and bullion by express, \$1,171,181; gold-dust and bullion by other conveyances, \$234,226; silver bullion by express, \$938,297; total \$2,343,654. Governor Bennett recommends the appointment of a commissioner of immigration, "whose sole duty it shall be to employ all the means which experience has proved efficient, to induce people to settle among us." He says: "We have all the necessary elements to make this a prosperous and growing Territory, and speedily to become a State. Here is a soil which produces in abundance all the agricultural products, awaiting only the labor of the husbandman; here are vast mountains of mineral wealth, only needing the labor of intelligent heads and willing hands; here are boundless ranges of pasturage, where all kinds of stock multiply and fatten; a climate unsurpassed for health and pleasantness; and on every hand are seen the beauties and grandeurs of Nature to attract the eye and inspire the heart. And yet we have not the people to develop all these immense resources." Boise City, the capital of Idaho Territory, and of Ada County, is situated on the north bank of the Boise River, about 520 miles northeast of San Francisco, and 265 miles northwest of Salt Lake City. In 1870 it had a population of 995. It contains a penitentiary, a United States assay-office, a national bank, three grist-mills, and three newspapers. It is reached in two days by stage, from Indian Creek, Utah, on the Central Pacific Railroad. The place was formerly a trading-post of the Hudson Bay Fur Company; it now commands the trade of the miners on the western slope of the Rocky Mountains, and of the surrounding agricultural country.

INDIAN TERRITORY.—This Territory is ex-

clusively set apart for the occupation of various tribes of Indians, who are in a semi-civilized condition, with forms of government, industries, schools, etc., of their own. An account of the various tribes was given in the preceding volume of this work, and there has been no movement of importance during the year to be recorded.

MONTANA.—The present Territorial government is as follows: Governor, Benjamin F. Potts; Secretary, James E. Callaway; Chief Justice, Decius S. Wade; Associate Justices, Hiram Knowles, Franklin G. Service; District Attorney, Mortimer C. Page; Surveyor-General, John E. Blaine; Superintendent of Indian Affairs, Jasper A. Viall; United States Commissioner, E. W. Carpenter; Auditor, William H. Rodgers; Treasurer, Richard O. Hickman. The capital is Virginia City.

According to the message of Governor Potts to the Legislature in January, 1874, the total registered indebtedness of the Territory was \$128,762, including bonds to the amount of \$104,800, bearing interest at the rate of 12 per cent. per annum. The decrease of the registered indebtedness during the year was \$13,786. The reported indebtedness of the several counties was \$432,987. The reports of several of the counties do not include the accrued interest on the debt of such counties, which will increase the aggregate county indebtedness beyond the amount stated.

The total amount of taxes assessed for territorial purposes for 1873 was \$89,214.

The number and value of the stock in the Territory are reported as follows:

STOCK.	Number.	Value.
Oxen.....	17,323	\$484,693
Cows and stock-cattle.....	86,944	1,720,945
Horses.....	19,905	788,020
Mules.....	1,406	117,329
Sheep.....	10,597	33,699

Six hundred and twenty thousand three hundred and ninety acres of the public domain have been taken up under the laws of the United States by actual settlers, and 818,089 acres are under cultivation.

During the year ninety schools were open, and attended by 1,981 pupils. The superintendent says, that "the provisions of the present school law, which requires that the education of children of African descent shall be provided for in separate schools, practically excludes them from all opportunity to obtain an education." The Governor recommends that the law be so amended "as to afford an opportunity for each child in the Territory, without distinction, to enjoy all the benefits that are to be derived from a system of free schools established, and supported by the people."

The penitentiary at Deer Lodge City was transferred on the 15th of May by the United States to the Territorial authorities.

During the year an extra session of the Legislature was held, beginning April 14th.

The following statement of the production of the precious metals in Montana in 1873 is given by the General Superintendent of Wells, Fargo & Co's Express: Gold dust and bullion by express, \$3,241,238; by other conveyances, \$648,247; silver bullion by express, \$3,325; total, 3,892,810.

NEW MEXICO.—The Legislature of New Mexico, which holds biennial sessions limited to forty days, assembled at Santa Fé on the first Monday in December. It consists of thirteen members in the Senate and twenty-six in the House. Of these, thirty-six are Republicans and three Democrats; thirty-three are Mexicans, and six Americans. About nine-tenths of the voters of the Territory are natives. Owing to the predominance of the Mexican element, the debates and business of the Legislature are conducted in the Spanish language, which is interpreted for the Americans. The acts of the Assembly are published in both languages. The Delegate to Congress is Stephen B. Elkins, a Republican, elected by a majority of 3,818. The Territorial officers are: Governor, Marsh Giddings; Auditor, Trinidad Alarid; Treasurer, Antonio Ortiz y Salazar; Adjutant-General, T. S. Tucker; Attorney-General, S. F. Conway; Attorney, Second District, Benjamin Stevens; Attorney, Third District, J. D. Bail; Librarian, James C. McKenzie.

The present population of New Mexico is estimated at from 110,000 to 120,000. Santa Fé, the capital, is the largest town, and has about 6,000 inhabitants. The other chief points are Albuquerque, population 1,500; Mora, 1,000; Ocate, 1,200; La Junta, 1,100; Los Vegas, 2,800; Taos, 1,700. The Territory is divided into thirteen counties. It is without railroads, though several approach near it. The Denver & Rio Grande (narrow-gauge) Railway is in operation to Pueblo, within 120 miles of the New Mexican borders, and is graded sixty miles farther in this direction. It will probably be open to Trinidad, some thirty miles from the territorial boundaries, by the summer of 1874. The Atchison, Topeka & Santa Fé Railroad is completed to Granada, Colorado, within one hundred and thirty-five miles, and the Kansas Pacific (Kit Carson branch) to West Las Animas, within about the same distance from the New Mexican boundaries. The latter road is aiming for the Cimmaron country; the Atchison, Topeka & Santa Fé for the capital of the Territory, and the Denver & Rio Grande for Central New Mexico and the capital of Old Mexico. In anticipation of railways at an early day, the last Legislature passed a general railroad law, and a law enabling counties to issue bonds in aid of railways, as well as an act condemning lands for right of way. Among the measures recommended by Governor Giddings for the consideration of the Legislature is another memorial to Congress in relation to the old Spanish grants, referring to which he says: "There are

large tracts of lands covered by grants made long ago, and if one attempts to settle on some of the best lands he finds, perhaps, that some man has one of these grants, the boundaries of which he cannot learn, as the grant has not been surveyed, marked, or bounded, and it may, upon investigation, overlap the very land which the immigrant of to-day wishes to secure for a home. There is so much uncertainty about it that a wise and prudent man refuses to lay foundations on such precarious tenure, and he who was ready but a day since to invest his money and become a permanent resident of New Mexico is to-day driven away from the most delightful climate to seek a residence in some other country."

Two years ago the Legislature provided for a system of common schools and for their support by taxation. During the past year free schools have been maintained, and a lively interest in the subject is manifested by the people.

The bonded debt of the Territory amounts to a little less than \$60,000, which bears interest at the rate of ten per cent. per annum. In addition to which there are outstanding warrants amounting to about \$30,000; but the uncollected taxes due the Territory exceed this amount.

New Mexico has suffered greatly from Indian raids. There are in this Territory of the different bands of Utes, Apaches and Navajoes, according to the estimate of ex-Governor Arny, now Indian agent, 4,278 warriors, 5,326 women and 4,745 children; total, 14,349. The Pueblos, who hold large grants, principally in the county of Santa Fé, occupy twenty villages, with an aggregate population of 7,683, and own lands to the amount of 500,000 acres. Of the Pueblos, Governor Giddings remarks: "They are quiet, docile, law-abiding, self-supporting communities, and among the best inhabitants of New Mexico, never seeking aid from abroad, nor has the Government ever bestowed a dollar upon them. They are entitled to great credit for their good behavior always, and their constant loyalty to the Government, and to the interests of the whites have they constantly attached themselves in resisting the encroachments of the wild, hostile Indians."

While fully nine-tenths of the voters are natives, three Americans have been elected to Congress since 1851, and at every election since that time Americans have been elected to the Legislature. During the war the natives were unanimously loyal to the Government. They desire immigration, building of railroads, increased educational advantages, and the introduction of capital and labor.

UTAH.—On the 14th of February President Grant laid before the Senate a message recommending special legislation for Utah. This was deemed necessary in consequence of the judicial difficulties that had arisen in that Territory. The United States Courts had been greatly embarrassed by the action of the Terri-

torial Legislature in conferring criminal jurisdiction and the power to issue writs of *habeas corpus* on probate courts, and by their consequent interference with the administration of justice. This action on the part of the Legislature was deemed by the President to be clearly beyond the power or authority of that body.

The present Territorial government is as follows: Governor, George L. Woods; Secretary, George A. Black; Marshal, George R. Maxwell; District Attorney, William Carey; Chief Justice, James B. McKean; Associate Justices, Philip H. Emerson and Jacob S. Boreman.

The Legislative Council is composed of thirteen members and the House of Representatives of twenty-six members, all of whom are Mormons.

More grain was harvested in Utah in 1873 than ever before in one season. The land now cultivated amounts to 225,000 acres, an increase of 75,000 acres over the area under cultivation in 1869. The total value of farm products the past year was not less than \$6,000,000. Utah has a system of irrigation more extensive than that of any other Territory, while from the mountain-streams alone the area of land susceptible of irrigation is tenfold greater than that now used for agricultural purposes.

Manufacturing interests are increasing in every branch. Twelve thousand pairs of boots and shoes were made the past year by two factories. There are in the Territory numerous flouring, saw, and planing mills, and eight woolen-mills, which manufacture large quantities of superior cloth. Water-power is abundant.

The mines of coal, iron, and silver, however, constitute the basis of the Territory's wealth. The mineral belt of silver bearing ore traverses the Territory in a northeast and southwest direction, and is probably 50 miles in width by 250 miles long. It is estimated that the yield of silver mines in 1873 was \$3,055,440.

The most valuable coal-fields yet discovered are situated in San Pete County. The coal is bituminous, dense and compact, and possesses excellent coking qualities. The seam now worked averages three feet six inches in thickness, and is developed by a level 900 feet long, running parallel with the strike of the vein.

More extensive deposits, but said to be of inferior quality, are found in Castle Valley and on the western slope of the Wahsatch range, in Iron County, where one vein has been opened at intervals a distance of fifteen miles southerly from the head of Cedar Creek Cañon.

Bodies of iron-ore are found in the vicinity of the iron-springs in Iron County. They occur in the form of ledges, standing nearly vertical, varying from five to twenty feet in width; and, by reason of the more rapid disintegration of the granite walls on either side, stand at some points from 10 to 30 feet above the formation. These outcrops are from 800 to 1,500

feet in length, and their extremes are about ten miles apart.

The mountain-slopes are covered for hundreds of feet with fragments of this ore, varying in weight from a few pounds to many tons. The ore is chiefly magnetic, and is said to yield 65 per cent. of metal. All necessary fluxes are near for the proper treatment of the ore.

Railroads in several directions are in progress without aid from the General Government or local taxation. Six separate lines of railroad with an aggregate length of 366 miles are in operation, and two more lines, one 16 and the other 20 miles long, will be completed during 1874.

WASHINGTON.—The present Territorial government is as follows: Governor, Elisha P. Ferry; Secretary, Henry G. Struve; Chief Justice, O. Jacobs; Associate Justices, R. S. Greene, and J. R. Lewis; Marshal, E. S. Kearney; United States District Attorney, S. C. Wingard; Superintendent of Indian Affairs, R. H. Milroy; Surveyor-General, William McMicken; Collector, J. R. Hayden; Auditor, J. M. Murphy; Treasurer, E. T. Gunn; The Territorial Legislature comprises 6 Democrats and 3 Republicans in the Council, and 21 Democrats and 9 Republicans in the House. The capital is Olympia.

Among the measures passed by the Legislature at its session in the autumn, were:

An act to locate a Territorial road from Klickitat Prairie, in Lewis County, *via* Eden Prairie, to a point on the Northern Pacific Railroad, at or near the 25-mile post of said road, from Kalama, in Cowlitz County, and an act submitting to the voters of Washington Territory at the next general election, a proposition for calling a convention to form a State constitution, and apply for admission of the State of Washington into the Union.

Strong efforts were made to secure the passage of an act extending to women the right to vote; but the bill was lost in the House, the vote being 12 for and 18 against it.

The financial condition of the Territory is shown by the following statement from the Treasurer's report:

Total cash receipts for two years ending September 30, 1873.....	\$76,501 06
Total disbursements.....	72,695 91
Balance in Treasury.....	\$3,805 25
Amount of outstanding warrants October 31, 1871.....	\$33,506 84
Amount of interest on warrants October 31, 1871.....	5,079 85
Total debt, October 31, 1871....	\$33,586 73
Outstanding warrants, September 30, 1873:	
Balance of old issue.....	\$2,070 25
Interest on same.....	418 05
Amount of Porter's issue.....	24,651 60
Interest on same.....	2,577 87
Total debt, September 30, 1873.	\$29,717 77
Reduction of debt.....	\$3,868 95
The assessed value of property in 1871 was \$11,582,980, and in 1873, \$14,125,050.	

The following statement of the precious metals produced in the Territory in 1873 is made by the General Superintendent of the Wells, Fargo & Co. Express: Gold dust and bullion by express, \$171,951; by other conveyances, \$34,390; silver bullion by express, \$3,054; total, \$209,395.

WYOMING.—The third Legislative Assembly of Wyoming Territory convened at the capital, Cheyenne, on the 4th of November. As no Territorial buildings had been provided, the sessions were held in the Court-House. The Legislature meets biennially, and its sittings are limited to forty days. The Upper House, known as the Council, consists of nine members; in the Lower House there are thirteen members. There are four Territorial districts: the first comprising Laramie County; the second, Uintah; the third, Sweetwater and Carbon; and the fourth, Albany. There are 5 Republicans and 4 Democrats in the Council, and 7 Republicans and 6 Democrats in the House. The Territorial officers are: Governor, J. A. Campbell, appointed in 1869, upon the organization of the Territory; Secretary, Jason B. Brown, an attorney of Cheyenne, lately appointed in place of H. Glafcke, editor of the *Cheyenne Leader*; United States Marshal, Frank Wolcott; Surveyor-General, Silas Reed, lately appointed in place of Dr. Latham; Auditor, Dr. J. H. Hayford, editor of *Laramie Sentinel*; Treasurer, S. W. Downey; Chief-Justice, J. W. Fisher; Delegate to Congress, W. R. Steele, a prominent lawyer of Cheyenne.

In 1870 Wyoming contained 11,518 inhabitants; the present population is estimated at 18,000. The Territory was organized in 1868, being carved out of Dakota. The settled portion lies almost wholly along the Union Pacific Railroad, which traverses its borders for a distance of 420 miles. The Northern Pacific Railroad, when in operation, will pass along its northern border, but the distance between the two roads will be about 270 miles. The Territory has great natural resources, but the Indian troubles have prevented its settlement to any considerable extent off the line of the railroad. The valleys of many of its numerous streams are known to be fertile; this is especially true of all the tributaries of the North Platte; and, wherever the lands can be properly irrigated, abundant crops are produced. The valleys of the Laramie, Chugwater, and other streams, produce heavy growths of rich indigenous grasses, hundreds of tons of which are annually cured for hay. The stock-ranges are excellent, and Laramie Plains are famous throughout the West for fat cattle.

Coal-mining is the principal industry of the Territory. The Union Pacific Railroad and its terminal stations get their supply along the line, between Laramie and Evanstown. On Cooper Creek, fifteen miles west of Laramie, a nine-inch vein is worked, and at Creston, just east of the continental divide, a good vein is worked. The coal-seam at Separation is

eleven feet thick. Near Point of Rocks there are five veins, the thickest being six and a half feet. Coal is also mined at other points. Nearly all the land between Rock Creek and Cooper's Creek has been selected in advance of the public surveys for mining purposes, with a view of securing title when surveyed.

Several new postal routes and thoroughfares have been opened within the past few months, giving better access to all parts of the Territory.

The experiment of woman suffrage in Wyoming has attracted general attention. Attempts have been made in the Territory to repeal the law, but without success. The practical working of the measure is thus stated by the Governor in his message: "The experiment of granting to women a voice in the government, which has been inaugurated, for the first time in the history of our country, by the first Legislative Assembly of Wyoming, has now been tried for four years. I have heretofore taken occasion to express my views in regard to the wisdom and justice of this measure, and my conviction that its adoption had been attended only by good results. Two years more of observation of the practical working of the system have only served to deepen my conviction that what we, in this Territory, have done, has been well done, and that our system of impartial suffrage is an unqualified success."

TEXAS. The political affairs of this State at the close of the year were of such a nature as to become national in importance.

As the tenure of office of some of the State officials was involved in doubt, while the laws, so far as any existed governing elections, were also of doubtful import, the Legislature, at its session in the early part of the year, passed an act providing for a general election in December. Under this law, which had been approved by Governor Davis, the political contest was begun by both parties. First in the field were the Republicans, who held their State Convention at Dallas, August 20th, and having renominated Governor Davis, adopted the following platform:

1. That we reaffirm our devotion to the principles enunciated by the National Republican platform, and to the wise and just Administration of President Grant.

2. We are earnestly in favor of the establishment and maintenance of a system of public free schools, such as is required by Article IX. of our State constitution, with such improvements as experience has shown to be desirable, and we strongly condemn the practical abolition by the Thirteenth Legislature of the system that was in operation.

3. We are in favor of such laws by the Legislature as will give full and ample protection to every citizen of the State in the enjoyment of all his rights as a citizen.

4. We are opposed to special legislation, believing that general laws may be framed which can obviate the necessity of special, and which would be more just and less apt to be enacted from corrupt motives.

5. We are in favor of judicious State aid to immigration, such as is contemplated by Article XI. of our constitution.

6. We desire to be taxed for public purposes only;

that taxation should be imposed at equal and uniform rates upon property; very little if any to be put upon occupations; while we desire to have our State government administered with real economy, avoiding, alike, parsimony and extravagance; we wish our public debt paid according to its terms; we are opposed to the creation of any new public debts, and we are inflexibly opposed to repudiation in any form.

7. The speedy development of the varied resources of our State we regard with favor, and to this end do pledge ourselves to extend every reasonable facility and aid toward the establishment of an equalized and judicious railway system for the State; that the success of the railways building in Texas materially depends upon carrying out in perfect good faith our obligations heretofore made, whereby capitalists have been and may be induced to come into our midst.

8. We declare ourselves opposed to the enactment of any public laws that may operate unequally upon citizens on account of their race, nativity, or belief, and that we are in favor of the largest amount of personal liberty consistent with the security of our people in the enjoyment of life and property.

9. We respectfully ask the national Government to dismount, disarm, and put upon securely guarded reservations the savage tribes that continually ravage our large frontier.

10. Again we ask our General Government to relieve such of our citizens as are under political disabilities, and to improve the harbors upon our coasts as the national interests require doing so. We trust the present Congress of the United States will not permit itself to be prejudiced against our people so as to treat them with injustice or illiberality because the members from Texas in the last Congress dishonestly voted themselves and took back pay which they should be made to disgorge.

11. We are in favor of short sessions of the Legislature. We desire to have our Public Printing Law repealed, and the public printing let on contract to the lowest bidder, who can do it as required.

12. We express our strong disapprobation of the bad acts and worse omissions of the Thirteenth Legislature; we condemn its useless expenditures of public money, chiefly upon itself, its indiscriminate squandering of the public domain, to a large extent upon purely speculative and worthless corporations, and the unjust and discriminating legislation in favor of the rich and against the poor whites. We cannot take time and space to enumerate its misdeeds. We cannot forbear to denounce its unscrupulous efforts to make homesteads subject to sale under execution; at the same time we congratulate ourselves and the people of the State that its oppressive Landlord and Tenant Bill was effectually vetoed by the Governor.

13. We trust that from this time forward the people will take steps to relieve themselves from the risk of vicious legislation by electing Senators and Representatives, as well as other State officers, on account of their qualifications and character.

14. We heartily commend to the consideration of the people the resolution adopted by the German Convention, held at Austin, on the 7th and 8th of August, 1873.

The Democratic Convention assembled in Austin September 5th, and continued in session two days, being one of the largest and most enthusiastic conventions of the party ever held in the State. The following ticket was placed in nomination: For Governor, Judge Richard Coke; Lieutenant-Governor, Colonel R. B. Hubbard; Controller of Public Accounts, Colonel Stephen H. Darden; Commissioner of the General Land-Office, J. J. Gross; Treasurer, A. J. Dorn; Superintendent

of Public Instruction, O. N. Hollingsworth. The platform adopted was as follows:

We, the Democracy of Texas, in convention assembled, relying on the virtue and intelligence of the people, again declare our principles and policy, and ask for them the popular approval. And—

I. We declare our adhesion to the time-honored principles of the Democratic party; our devotion to popular liberty regulated by law; and to constitutional government simple in machinery, and to be administered with the strictest economy.

II. We congratulate the people of Texas on the repeal by the Thirteenth Legislature of a number of the oppressive, odious, and unconstitutional acts, passed by the Twelfth Legislature, in pursuance of the radical policy to overthrow the government of the people, and among which acts were:

1. The Militia Law, whereby the Governor was authorized to suspend the writ of *habeas corpus* and establish martial law, thereby depriving the citizens of all legal and constitutional protection, and subjecting their lives, liberty, and property to the unrestrained caprice and malignity of a partisan Executive.

2. The Police Bill, designed and intended, among other things, to create a system of secret espionage, by hired informers, upon the people; at war with the principles of civil liberty; odious to all freemen, and heretofore tolerated only in the despotism of the Old World, and the execution of which act was for the most part intrusted to a class of men of degraded and infamous character.

3. The Enabling Act, under which the Governor was authorized to appoint district attorneys who were made elective by the constitution; to appoint all municipal officers, and to fill all vacancies that might occur in the offices of clerks and sheriffs, thereby designedly bestowing on him great power and patronage, to enable him to continue radical misrule over this people.

4. The registration and election laws, which were framed and intended for the purpose of preventing free and fair elections; they openly encouraged the perpetuation of frauds to defeat the will of the people, and to perpetuate radical misrule, presenting to our people the extraordinary and humiliating spectacle of surrounding the places of registration and voting with an armed partisan police with which to intimidate and overawe the citizens.

5. The act relating to public free schools, which, among many other bad features, provided the means of enabling public officials to speculate in school-books, in the building and furniture for school-houses, in the salaries of teachers, and furnished high salaries for a large and useless number of officers, which gave the radical party the means to pay their political missionaries who traveled for radical purposes and frauds, from one end of the State to the other.

6. And we further congratulate the people of Texas that the Democratic members of the Thirteenth Legislature, so far as it was possible to accomplish their object in presence of the capricious vetoes of the Governor, and the opposition of his partisans in the Senate, repealed the foregoing obnoxious measures, by just and wholesome laws, bearing alike on all, and which if honestly and faithfully executed will rebound to the lasting good of the country and prosperity of the people.

IV. The Democratic party, when it comes into the possession of the government of the State, will administer it in the interest and for the benefit of the whole people, and not of a party; and, however much we may have been provoked to hostile and retaliatory legislation, by the outrages committed on us by the radical Legislature and State government, it will be a part of our great mission to rise superior to our just resentments, and administer the government in such manner that every citizen, whatever his politics, religion, nationality, or color, shall feel

that he is securely protected in his life, liberty, and property.

V. The school fund, sacredly set apart for the education of the children of the State, has, under the operation of the misrule of the party in power, been plundered by speculation, squandered and perverted to political purposes. The Democratic party through us, reaffirms its past opinion and the policy it has ever pursued, that it is the bounden duty of the State to maintain an efficient system of free common schools, and secure the means of a common education to every child in the State, and we advocate the gradual sale of the alternate section of land belonging to the common-school fund; as also of the asylum and university lands, under such restrictions as will secure the funds arising therefrom to the purposes for which they were intended, and giving in such sales proper preferences to actual settlers in good faith thereon.

VI. It was the Democratic party which first inaugurated the wise and generous policy which has made the United States the asylum of all nations from oppressive government, and less favorable means of livelihood and independence; and the Democratic party of Texas, true to the early teachings and uniform practices of the party, advocates the most liberal and active policy to encourage and increase foreign immigration, to develop the resources of our fertile State, as well as to perpetuate the government, through the intelligence and moral worth of her citizens. And that every adopted citizen may enter into the spirit of perfect freedom of thought and action in matters of conscience, the Democracy of Texas, in convention assembled, declare it to be our firm conviction that legal interferences with merely the social habits of any class of citizens, native or of foreign birth, is contrary to sound policy, to genuine democracy, and to the enlightened spirit of the age.

VII. The Democratic party is, and has ever been, in favor of throwing as few impediments as possible in the way of Europeans making the United States the land of their adoption; and to enable foreigners to enter into citizenship without needless trouble, delay, or expense, we declare it to be our conviction that a foreigner who desires it should have the right to make his declaration of intention to become a citizen before the clerk, in vacation or in open court, as may be to him most convenient; and we favor the passage of a law to that effect.

VIII. We condemn in the strongest terms all corruption in public officials, and demand the strictest honesty and economy in the administration of public trusts, from the highest to the lowest officer of the Government.

IX. That the Democracy of Texas adhere to their past policy of developing the material resources of the State, and fostering the best interests of the people by encouraging the construction of railroads. That to this end, and to encourage the investment of capital in such enterprises, we favor the granting of liberal charters to companies able to build such railroads, and of donating to such companies alternate sections of the vacant lands, under proper restrictions, and with such provisions of law as will protect the people against oppression and unreasonable exactions, until each section of the State has its equal proportion of railroad facilities.

2. That we are opposed to granting money subsidies by the State to secure the building of railroads, as unequal in the distribution of burdens and benefits, and unjust in principle.

3. This convention denounces as false and slanderous the imputation, sought to be attached to the State of Texas, by her enemies, that she contemplates the repudiation of any of her just and legal liabilities.

X. We consider the constitutional amendments proposed by the last Legislature as eminently necessary, and recommend their adoption by the people.

XI. The situation and sufferings of our frontiersmen and their families arouse our deep and sincere sympathy; and we do hereby pledge the most earnest exertions of the Democratic party to secure their speedy and adequate protection in the future, believing them to be paramount to all other duties.

XII. We favor the calling of a constitutional convention by our next Legislature.

XIII. We invite all good men, whatever may have been their past political preferences, to unite with the Democratic party in removing from place and power those radical officials who now in part control the State government, in order to insure an honest administration of the laws, and an honest and economical expenditure of the public moneys, and to throw theegis of justice and protection over the person and property of every individual whatsoever in the State of Texas.

The election was held on the 2d of December, and resulted in the success of the entire Democratic ticket by an overwhelming majority. Eighty-five thousand five hundred and forty-nine votes were cast for Coke, and 42,668 for Governor Davis. For Lieutenant-Governor, Mr. Hubbard received 86,825 votes, while 42,812 were polled for Mr. Taylor, the Republican candidate. At the same time a new Legislature was chosen.

It was this election which caused, perhaps, the highest political excitement known in the State. The constitutionality of the law under which the election was held having been doubted, a case was prepared by the Republicans for the purpose of obtaining from the Supreme Court a decision on this question. For this purpose it was arranged that Rodriguez, a Mexican, should vote twice. For doing this he was arrested. The case was then carried to the Supreme Court on an application for a writ of *habeas corpus*.

On January 5, 1874, the decision was rendered by the court, declaring the law authorizing the election unconstitutional. Acting upon the assumption that under this decision the election was void, and therefore that the successful candidates were not entitled to administer the offices to which they had been elected, Governor Davis determined to prevent their recognition as lawful officials, and on the 12th of January issued the following proclamation:

Austin, January 12, 1874.

In the name and by the authority of the State of Texas, to all to whom these presents shall come, greeting.

Whereas, The Supreme Court of the State has in a recent decision declared the election held on the second day of December, 1873, in substance to be invalid, by reason of the unconstitutionality of the law under which said election was held; and—

Whereas, Great public injury and further dangerous complications of public affairs are likely to result from any attempt on the part of those claiming to have been chosen as members of the Legislature, and other officers at said election, to assume the positions they claim, therefore, for these and other reasons which it is not necessary to incorporate herein, it is deemed advisable, and it is so ordered, that those who have been chosen as legislators and other officers shall not attempt to assume the positions they claim unless by further action of adequate authority. Such election may hereafter be validated. All good citizens are advised to abide the decision

of the competent tribunal, and aid in maintaining public order and moderate counsels.

In testimony whereof, I have hereunto signed my hand and caused the great seal of the State to be affixed, at the city of Austin, this 12th day of January, A. D. 1874.

(Signed) E. J. DAVIS, Governor.

To sustain him in his position and to prevent apprehended violence, Governor Davis had also applied to the President of the United States for the use of Federal troops. This application was denied in the following dispatch received from Washington:

EXECUTIVE MANSION, January 12, 1874.

To Governor Davis, Austin, Texas:

Your dispatches and letters reciting the action of the Supreme Court of Texas in declaring the late election unconstitutional, and asking the use of troops to prevent apprehended violence, are received.

The call is not made in accordance with the Constitution of the United States and the acts of Congress under it, and cannot, therefore, be granted.

The act of the Legislature of Texas providing for the recent election having received your approval, and both political parties having made nominations and having conducted a political campaign under its provisions, would it not be prudent, as well as right, to yield to the verdict of the people as expressed by their ballots?

(Signed)

U. S. GEANT.

On the 18th the newly-elected Legislature met at the capital, and both Houses were organized without opposition. A committee having waited upon Governor Davis and notified him of the organization of the Fourteenth Legislature, the Executive replied that he could not recognize them as a legally elected and constituted Legislature. The written reasons for this decision were given the same day by Governor Davis in the following communication:

EXECUTIVE OFFICE, STATE OF TEXAS, {
Austin, January 18, 1874. }

GENTLEMEN: In reply to your verbal communication made to me to-day I have to state that I do not think it advisable for the public good that I should disregard the decision of the Supreme Court made recently touching the late election, by recognizing the gentlemen you represent as being the constitutionally elected Fourteenth Legislature.

It seems to me that there is some better solution of the present difficulty than that the government and those claiming to be the elected as a Legislature should jointly combine to overthrow the judiciary and disregard their construction of the constitution. I must believe that such a course would leave the door open for dangerous uncertainty in the future, both in the matter of authority to enact the legislation that may be improvised by the gentlemen you represent, and in the matter of the constitution and the existence of the highest tribunal of our State. There may be found two Supreme Courts, and even two Legislatures claiming authority. It is even now claimed by some that the Thirteenth Legislature is at present the only legally existing Legislature, and that it only can constitutionally convene and provide for this emergency. It will then, after all, be a settlement brought about by a species of revolution or violence, as against the court making the decision. It is true it is easy enough, and it seems the simplest solution of the present difficulty, that we should jointly adopt the course, as this Supreme Court has no way of enforcing its decisions as against the Executive and Legislature combined; but I consider that in this case the easiest course is now one that I would like to be a party to. I will be happy to join

you and the gentlemen you represent in applying the promptest and most feasible remedy in this difficulty. It has been repeatedly held that the recognition of Congress and the Executive of the United States will settle the question as to what body of men constitute the Legislature and which is the proper State government. This way affords a solution to be accepted by all. I am more free to act with independence in securing with you or those gentlemen that sort of solution, because I feel myself entirely disinterested herein. I accept the election, whether constitutional or not, as conclusive against myself, and will, in no event, continue to exercise the functions of the office I hold beyond my constitutional term of four years.

EDMUND J. DAVIS, Governor.

To the Honorable H. EPPERSON and other gentlemen of the committee.

On the same day (13th) the Thirteenth Legislature met in the basement of the Capitol, but there was not a quorum of either House present.

On the 15th the following communication was addressed to Governor Davis by a committee of the Fourteenth Legislature:

COMMITTEE-ROOM, AUSTIN, January 15, 1874.

Governor E. J. Davis.

SIR: The House of Representatives of the Fourteenth Legislature yesterday passed the following resolution:

Whereas, The Secretary of State has refused to deliver to the Speaker of the House of Representatives the returns of the election held in October last for Governor, Lieutenant-Governor, and constitutional amendments: therefore, be it

Resolved, That a committee of seven be appointed by the Speaker, whose immediate duty it shall be to arrive at and determine the results of the returns of said election for Governor, Lieutenant-Governor, and constitutional amendments, from such source and by such means as are deemed best and most practicable by said committee; and said committee shall report their action to this House at as early a period as possible. Said committee may employ all the necessary clerks and messengers, and may invoke the power of the Sergeant-at-Arms and his assistants, and other officers of the House, to aid them in the discharge of their duties. The committee shall have power to send for persons and papers anywhere in the State. All processes issued by said committee shall be directed to the Sergeant-at-Arms or Assistant Sergeant-at-Arms of the House of Representatives, and shall be signed by the chairman and at least one other member of said committee, and shall be executed by the Sergeant-at-Arms or any assistant.

The committee appointed under the resolution have instructed me to address to you this communication, and request you, as the Chief Executive of the State, to direct the Secretary of State to deliver to the Speaker of the House of Representatives, or this committee, the returns of the elections held December 2, 1873, in accordance with the law and in accordance with your proclamation. In reply to the demand by this House of Representatives for such returns, the Secretary of State refuses to deliver them till you recognize the Fourteenth Legislature. The Secretary of State, being an officer of your own appointment, and amenable to your direction and orders, this committee have deemed it proper to invoke your aid in this respect, so that the law relating to this matter may be faithfully executed. If the views held by you resulting from the late opinion of the Supreme Court be correct, the delivery of the returns cannot affect the status of yourself and the others interested, while the withholding of them may tend to further complications, and may entail considerable expense upon the State in procuring them from other sources. In view of all the circum-

stances, the committee trust you will comply with this request.

Yours, respectfully, D. N. BARZIZA,
Chairman of the Committee.

Governor Davis replied that he did not think that the Legislature was entitled to the election returns, but, if the committee would go to the Secretary's office and take them of their own accord, no resistance would be made. The official returns having been obtained, the vote of the State was counted, and Richard Coke declared to be elected Governor for four years, and R. D. Hubbard Lieutenant-Governor for the same period. Governor Coke, having taken the oath of office, delivered his inaugural address. The Capitol was now guarded by armed troops. On the following day another application was made for Federal interference, and refused as follows:

AUSTIN, TEXAS, January 16, 1874.

George H. Williams, Attorney-General:

The newly-elected Governor (Coke) was inaugurated last night. Armed men are guarding the approaches to the offices at the Capitol. Other armed men have possession of the legislative halls. A conflict seems inevitable. A message from you may save us from this disaster.

THOMAS F. PURNELL, U. S. Marshal.

To this the Attorney-General replied:

I can only appeal to the parties to peaceably settle their differences if possible. Cannot some one negotiate a settlement? I have no power to interfere with force, nor have you any duty to perform in respect to the matter except to use your moral influence.

The opposition to the new Legislature soon ceased, and that body proceeded with its duties. One of the first proceedings was the election of General Samuel Bell Maxey to represent Texas in the United States Senate for six years, from March 4, 1875. Senator Maxey was born in Southern Kentucky, and was graduated at West Point in 1846. After serving as a lieutenant in the Mexican War, he resigned his position in the army and began the practice of law at Paris, in Lamar County, Texas, where he now resides. On the breaking out of the war, he entered the Confederate service as a colonel, and subsequently attained the rank of general. After the close of the war he resumed his law practice in Texas.

The Thirteenth Legislature, which had assembled January 14, 1873, adjourned on the 7th of June, after a session of nearly five months.

The entire bonded debt of the State at the end of 1873 was stated at \$1,661,181; due to school fund, \$806,806; floating debt, about \$500,000. Besides these, there was a claim in New York on bonds deposited as collaterals, not over \$400,000, and railroad claims for subsidies not adjusted and not exceeding \$3,000,000. The estimates for 1874 embraced \$80,700 for March and September interest; \$108,716, frontier defense; appropriations for 1873, not paid, about \$500,000; ordinary expenses for 1874, \$500,000. To meet these the Treasury holds, cash, \$36,173; unpaid taxes for 1873, \$802,790; bonds deposited in New York,

\$900,000; and the income from taxes for 1874.

Governor Coke informed the Legislature that there was no need of increasing the rate of taxation, advised economy in the appropriations, said the March and September interest on the debt would be paid out of the current means, asked for authority to fund the floating debt, settle claims in New York and sell the bonds deposited there, and added that "we ought to settle what we now owe, and hereafter pay as we go."

GALVESTON.—The chief city of Texas, in point of population and commercial importance, is Galveston, situated at the northeast extremity of Galveston Island, at the mouth of the bay of the same name, 180 miles east-southeast of Austin, and 290 miles west by south of New Orleans. In 1870 the population was 18,818, of whom 8,007 were colored, and 8,614 foreigners. At the end of 1873 the population was estimated by local authority as high as 35,000.

The harbor is the best in the State, and has thirteen feet of water over the bar at low tide. The city is provided with good wharves, and large storehouses adjoining them. The trade and commerce for the year ending September 1, 1873, as reported by the Chamber of Commerce, were as follows:

EXPORTS.

Cotton—323,502 bales.....	\$32,428,806
Wool—3,878 bags.....	801,896
Hides—460,583.....	2,565,985
Cattle—60,699.....	1,013,980
Tallow.....	714,600
Bones.....	19,200
Peltries.....	21,800
Horns.....	46,450
Pecans.....	16,080
Beeswax.....	14,300
Hair.....	6,750

Total exports.....\$37,045,747

IMPORTS.

Foreign—gold.....	\$2,460,610
Domestic—currency.....	\$7,851,221

Total imports.....\$29,811,831

Among the imports were 42,500 bags of coffee, received direct from Rio Janeiro. The tonnage arrived during the year amounted to 784,376. The number of immigrants that arrived was 44,614.

The chief business is the shipping of cotton. The Southern Cotton Press Company have in use fourteen brick warehouse coverings, thirty-five acres, while the Texas Cotton Company use three brick warehouses, occupying seven and a half acres. The receipts and shipments of cotton for a series of years have been as follows:

DATE.	Receipts.	Shipments.
	Bales.	Bales.
1868.....	92,682	101,749
1869.....	123,466	123,430
1870.....	129,808	225,215
1871.....	204,718	289,023
1872.....	146,073	191,869
1873.....	333,504	328,613

There is a daily line of steamers to New Orleans and another to Indianola and Corpus Christi; a weekly line to Havana, and another to New York; and a semi-monthly line to Liverpool. The Galveston, Houston & Henderson Railroad connects the city with Houston and the diverging railroads, crossing West Bay on a bridge nearly two miles long. The depot and warehouses cover twenty acres. The Galveston Wharf Railroad enables the company to load its cars directly from the vessels. A canal, ten miles long, opens an avenue for commerce to the Brazos River. The chief manufactories are two iron-founderies, six machine-shops, and the gas-works. The New York and Texas Beef-preserving Company kill and can 48 cattle per day. There are two national banks, with an aggregate capital of \$800,000; a savings-bank, with \$175,000 capital; two banking and insurance companies, and four insurance companies, including a life-insurance company. The whole number of joint-stock companies is twenty-three, having an aggregate capital of \$12,211,000. The assessed value of property for the year ending February 28, 1878, was \$16,500,000; bonded debt, \$380,700; estimated receipts for the year ending February 28, 1874, \$282,936; estimated expenditures, \$273,763.

The city is laid out with wide and straight streets, bordered by numerous flower gardens. Besides the churches, the public buildings include the custom-house, post-office, United States court-house, county court-house, city and county prison, city-hall, opera-house, two theatres, three concert-halls, four other public halls, thirteen hotels, and three market-houses. Oleander Park occupies eighty acres, and the City Park twenty-five acres. There are six public squares, an esplanade two miles long, and three public gardens. Magnolia Grove Cemetery comprises one hundred acres, and the city cemetery ten acres. There are nine miles of street railroad in operation.

THIERRY, AMÉDÉE SIMON DOMINIQUE, D. C. L., a distinguished historian, born at Blois, France, August 2, 1797; died in Paris, March 26, 1878. He received a very thorough collegiate education in his native city, his father intending to make him a teacher. Having, however, a strong taste for historical studies, he devoted himself to literature, and commenced his career as a journalist. He soon began to prepare historical works, in which he gave evidence of a talent scarcely inferior to his illustrious brother, the author of "The History of the Norman Conquest." One of these works, published in his thirty-first year, gained him the professorship of History in the College of Besançon; but, on a change of ministers (under the Restoration), his liberal opinions displeased the new minister, and he was removed from his professorship. During the reign of Louis Philippe he became Prefect of Haute-Saône, and afterward Master of Requests in the Council of State—an office which

he held until after the *coup d'état* of December, 1851, when he was appointed Councillor, and in 1860 was raised to the rank of Senator. He passed through the various grades of officer, commander, and grand officer, of the Legion of Honor, receiving the last in August, 1868. He was elected a member of the Institute of France in 1841. M. Thierry's published works were: "A Compendious History of Guienne," 1825; "The History of the Gauls," 3 vols., 8vo., 1828 (this was his ablest and most popular work); "History of Gaul under the Roman Administration," 3 vols., 1840-1842; a supplement and commentary to the preceding work; "Attila and his Successors," 2 vols., 8vo, 1843; "View of the Roman Empire," 8vo, 1862; "Passages and New Passages of Roman History," 2 vols., 1860 and 1864; "St. Jerome, the Christian Society at Rome, and the Roman Emigration to the Holy Land," 2 vols., 8vo, 1867.

TODD, Rev. JOHN, D. D., an American clergyman and author, born in Rutland, Vt., October 9, 1800; died in Pittsfield, Mass., August 24, 1878. In his youth he had severe struggles with poverty, and was much embarrassed in his efforts to obtain an education; but graduated from Yale College in 1822, after a year of teaching, he spent four years at Andover, in the Theological Seminary. He was ordained as pastor of the Congregational Church in Groton, Mass. in 1827. Six years later he was settled over the Edwards Church at Northampton. In 1836 he was called to take the pastorate of the First Congregational Church in Philadelphia; and in 1842 he became pastor of the First Congregational Church in Pittsfield. He remained in performance of the active duties of the pastorate in Pittsfield until May, 1872, when the infirmities of age compelled him to seek relief from them. He was one of the founders of the Holyoke Female Seminary, and had been through life a zealous friend of education. In 1845 Williams College conferred on him the degree of D. D. But his reputation and influence in the past and in the future will rest mainly on his writings. His books, about thirty in number, have all been republished in England, and several of them have been translated into French, German, Greek, Dutch, Danish, Italian, Arabic, Armenian, Turkish, and Tamil. His "Lectures to Children," were also printed in raised letters for the use of the blind. Of some of his books there have been several hundred thousand copies printed. He had also been a constant contributor to the *Congregationalist*, and other religious periodicals. The following is a nearly complete list of his books, except pamphlet sermons, addresses, orations, etc.: "Lectures to Children," 2 vols., about 1830-'32; "The Student's Manual," 1834; "Index Berni," 1835; "The Sabbath-School Teacher," 1836; "Truth made Simple," 1839; "The Lost Sister of Wyoming," 1841; "Bible Companion," 1841; "Great Cities: their Moral Influence,"

1841; "The Young Man," 1843; "Simple Sketches," 2 vols., 1843; "Stories on the Shorter Catechism," 2 vols., 1850; "Summer Gleanings," 1852; "The Daughter at School," 1854; "The Angels of the Iceberg," 1857; "Future Punishment," 1863; "Mountain Gems," 1864; "Sketches and Incidents," 1866; "Polished Diamonds," 1866; "Hints and Thoughts for Christians," 1867; "Serpents in the Dove's Nest," 1867; "Woman's Rights," 1867; "Mountain Flowers," 1869; "The Sunset Land," 1869; "Old-Fashioned Lives," 1870.

TURKEY, an empire in Eastern Europe, Western Asia, and Northern Africa. Reigning sovereign, Sultan Abdul-Aziz, born February 9, 1830; succeeded to the throne at the death of his elder brother, Sultan Abdul-Medjid, June 25, 1861. Sons of the Sultan: 1. Yussuf Izzeddin Effendi; born October 9, 1857; 2. Mahmoud Djemol Eddin Effendi, born November 20, 1862; 3. Mehemed Selim Effendi, born October 8, 1866; 4. Abdul-Medjid, born June 27, 1868. As the crown, according to the present law, is inherited, not by the oldest son of the Sultan, but according to seniority by the male descendants of Othman, sprung from the imperial harem, the heir apparent to the throne is at present not the eldest son of the Sultan, but Murad, the son of Abdul-Medjid. The harem is considered a permanent state institution, and all children born in it, whether offspring of free women or slaves, are legitimate and of equal lineage. The civil list of the Sultan was reported in the budget for 1872-'73 to be 261,773 purses (1 purse = \$21.95). Added to this amount in the budget for 1872-'73 was the sum of 114,580 purses for imperial pensions and charities. The actual expenditure of the imperial court is not officially reported; but it is calculated on good authority to have been about \$21,600,000 annually in recent years, with a tendency to considerably increase.

The area and population of Turkey are variously estimated. The *Austria*, of Vienna, in its number of June 7, 1873, published recent dates which were furnished by an *attaché* of the Austrian embassy, Major von Helle, to the Austrian Ministry of Foreign Affairs. The figures relating to the area are based on new planimetric calculations, made by Major von Helle, and those relating to the population are taken by him from official reports of 1871. According to Major von Helle, the possessions of Turkey, in Europe, Asia, and Africa have the following area and population:

COUNTRIES.	Area.	Population in 1871.
Europe (inclusive of Roumania and Servia).....	206,494	15,617,000
Asia (inclusive of the tributary principality of Samos).....	744,102	13,186,315
Africa.....	1,040,199	10,544,000
Total.....	1,990,795	39,347,315

The population of the principal Turkish

cities is, according to the recent estimates, not so large as was formerly assumed. Constantinople is believed to have no more than 300,000 to 400,000; Adrianople, 50,000; Salonica, 50,000; Gallipoli, 50,000; Philipopol, 50,000; Serayevo, 46,000; Sofia, 22,000. Of the towns in Asiatic Turkey, Smyrna has 150,000; Damascus, 120,000; Beyroot, 100,000; Broussa, 100,000; Erzeroom, 100,000; Aleppo, 100,000; Bagdad, 40,000; Jerusalem, 25,000.

For the year ending February 28, 1873, the revenues were estimated at 4,127,442 purses; the expenditures at 4,280,890. The debt was estimated at 3,668,100,000 francs, composed as follows: 1. Loans contracted from 1854 to 1871, 1,511,375,000; 2. Loan of 1872, 250,000,000; 3. Home debt, 1,681,710,557; 4. Floating debt, 225,000,000. In July, 1873, a new loan of £30,000,000 was contracted.

According to a law of June 22, 1869, and later decrees, the reorganization of the army is to be completed in 1878. It is to consist of 700,000 men, divided into the active army (about 150,000); the first reserve (70,000 men), the second reserve and the sedentary army (corresponding to the German *landsturm*). The irregular troops are calculated to consist of—1. *Kavas*, or gendarmes on foot; *seymens*, or mounted gendarmes and county militia as *soubeshis*, 30,000 men; 2. Tartars of Dobrodja and Asia Minor, 5,000; 3. Hungarian or Polish volunteers, 2,000; Moslem volunteers, 50,000; total of irregulars, 87,000. The war navy, in June, 1872, consisted of 18 iron-clads (5 frigates, 15 corvettes, and 55 dispatch and gunboats). Four new iron-clads were in course of construction in Great Britain. In addition to these there were four steam-transports, and a number of old sailing-vessels, not fit for service. The navy was manned by 30,000 sailors and 4,000 marine troops.

There are no official returns regarding the foreign commerce of the Turkish Empire. The average imports of European Turkey during the years 1868-'70 (exclusive of the dependencies) were estimated at £18,500,000; and the exports at £10,000,000. The reports of the Austrian consuls furnish the following data on the imports and exports of the principal ports, in florins (1 florin = \$0.48):

PORTS.	Imports.	Exports.
Constantinople (1869).....	82,700,000	30,000,000
Vilayet of the Danube; Tuitcha (1869).....	5,358,000	4,968,000
Vilayet of the Danube; Rustchuk and Slabow (1867). Width (18.9).....	8,099,000	2,221,000
Vilayet Edirne; Burgos, Rodosto, Gallipoli, Enos (1869).....	5,900,000	9,700,000
Vilayet Salonica; Salonica-Volo, Kavalla (1869).....	16,227,000	23,039,000
Vilayet Janina; Voiona, Prevesa, and smaller ports (1868).....	4,718,000	3,069,000
Middle Albania; Durazzo (1869).....	2,356,000	2,268,000
District of the Austrian consulate of Skutari (1869).....	3,499,000	1,623,000
Herzegovina (1868).....	2,289,000	1,990,000
Bosnia (1867; according to report of the German consul).....	6,538,000	8,677,000
Candia: principal ports (1869)....	6,723,000	6,095,000
Total.....	146,407,000	99,590,000

The commercial marine is estimated at about 200,000 tons. The aggregate shipping of the principal ports of European Turkey amounted, in 1869, to about 37,600 entrances; aggregate tonnage, about 7,800,000 tons. The chief port of Turkey is that of Constantinople. The movement of shipping in the Suleina mouth of the Danube, was from 1869-'70, as follows:

SHIPPING.	1869.	1870.	1871.
Vessels.....	2,881	2,541	2,254
Tons.....	676,960	600,970	549,720

The aggregate length of railroads at the beginning of 1873 was 487 miles; the aggregate length of telegraphs in 1870 was 5,556 miles. The telegraph between Asiatic Turkey and the Caucasus was completed in July.

The Turkish dependency of *Roumania* was in 1873 governed by Prince Charles I., son of the late Prince Charles of Hohenzollern-Sigmaringen. Prince Charles was born April 20, 1839; elected Prince of Roumania, May 10, 1866, married November 15, 1869, to Elizabeth, Princess of Newwied; issue, a daughter, Marie, born September 8, 1870. The Senate consists of 78 members, the Chamber of Deputies of 157 members, of whom 82 are for Wallachia, and 75 for Moldavia; area, 16,817 square miles; population in 1871 about 4,500,000. About 35.5 per cent. of the total population belong to the Roumania nationality, and about 92.4 per cent. to the Greek Oriental Church. According to the budget of the year 1872, the revenue was 73,105,402 francs, and the expenditures 73,065,842 francs; the public debt in 1872 amounted to about 144,000,000 francs. According to a military law passed in 1866, all the natives from eighteen to fifty-two are liable to military service, either in the standing army or the militia, and a ballot-box has to decide in which of these two branches of the national forces each individual shall be incorporated. The standing army is divided into eight regiments of infantry, numbering 16,000 men, one regiment of chasseurs, 2,400 men; three regiments of cavalry, 1,500 men; and two regiments of artillery of 1,600 men. The imports, in 1871, were valued at 89,700,000 francs, the exports at 172,500,000 francs. In 1872 the length of the railroads in operation was 531, and that of the telegraph-lines 2,162 miles.

The present ruler of *Servia*, the other dependency of Turkey in Europe, Milan Obrenovitch IV., was born 1855, and succeeded to the throne by the election of the Servian National Assembly, after the assassination of his uncle, Prince Michael Obrenovitch, June, 1868; was crowned at Belgrade, and assumed the government, August 22, 1872. The legislative authority is exercised by two bodies, the Senate and the Skuptchina, or House of Representatives. The Senate consists of 17 members, nominated by the people, and is permanently in session. The Skuptchina is composed of dele-

gates chosen by the people at the rate of one deputy to every 2,000 electors. Every male inhabitant who is above the age of twenty-one and pays direct taxes, is an elector and eligible. Domestic servants and gypsies have no political rights and hold no government offices, and the clergy are not eligible to become members of the Skuptchina. According to the budget for the years 1871-'72 the revenue was 85,440,000 "tax-piasters" (1 piaster=4 cents), and the expenditure at 85,196,806 piasters. There is no public debt. The area of *Servia* is 16,817 square miles; population in 1871, 1,325,487; of whom about 5,000 are Mohammedans, 1,500 Jews, 360 Protestants, 3,500 Roman Catholics, and the remainder members of the Orthodox Greek Church. The capital, Belgrade, had in 1871 a population of 27,589. The army, actually under arms consists of about 4,000 men, with the exception of 200 cavalry and a small artillery corps, all infantry. The strength of the militia is estimated at about 70,000 men. The imports were valued in 1870 at 139,000,000 piasters, the exports at 153,000,000. There were in 1873 no railroads in operation in *Servia*; but the construction of a road from Belgrade to Alexinatz was begun; the aggregate length of the telegraph-lines was, in 1871, 602 miles.

The ministerial changes in Turkey were, in 1873, as frequent as they had been in former years. Rushdi Pasha, who, on October 19, 1872, had been appointed Grand-Vizier and Minister of the Interior, was deposed on February 15, 1873, and Essad Pasha, the Minister of War, appointed in his place. Hussein Arni Pasha was appointed in place of Essad Pasha, Minister of War. On March 11th the former Grand-Vizier, Midhat Pasha, was appointed Minister of Justice. Safret Pasha, hitherto Minister of Justice, was appointed Minister of the Interior, and the former Governor of Syria, Rashid Pasha, Minister of Public Works. On April 15th, the Grand-Vizier, Essad Pasha, was again removed from his office. On April 17th, Hamdi Pasha, Governor of Rutchuk, was appointed Minister of Finance. On May 15th Rashid Pasha, Minister of Public Works, was appointed Minister of Foreign Affairs, in the place of Safret Pasha; and Muktar Pasha was appointed Minister of Public Works. In September Kurshid Pasha was appointed Minister of Justice in place of Midhat Pasha.

The relations of the Sultan to the Khedive of Egypt were of a friendly character. The latter paid a visit to the court of Constantinople, which lasted for several weeks, and obtained, on this occasion, a new *firman* from the Sultan, confirming all the privileges previously conceded to him, and authorizing him to increase the army and conclude treaties with foreign powers (*see EGYPT*). The visit of the Shah of Persia to the Sultan, during the month of August, gave likewise an occasion for the exchange of friendly sentiments (*see PERSIA*).

As it is still customary for all the Soonnite

Mohammedans to regard the Turkish Sultan as the head of the Mohammedan world, several foreign Mohammedan princes, as the Sultan of the Panthay rebels in Southwestern China, the Khan of East Toorkistan, and the Sultan of Acheen, sent, in the course of the years 1872 and 1873, ambassadors to Constantinople, to recognize the sovereignty of the Sultan, and to ask for his patronage and protection. The Turkish Government showed, however, a due consideration of the diplomatic difficulties in which an inconsiderate action in this matter might have involved it; and a Turkish paper of Constantinople which had boastfully announced that the Sultan of Turkey would send to the ruler of Acheen eight men-of-war to aid him against the Dutch, was promptly suppressed.

A circular to the diplomatic Turkish agents abroad, of September 24th, complained of the Government of Roumania for having encroached upon the right, belonging to the sovereign Sultan of Turkey, of concluding treaties with foreign powers. The circular declares that this, in future, will not be tolerated by Turkey, and that the Porte will not regard any such treaty as valid.

The Chambers of Roumania were opened by Prince Charles in person, on November 27th. In his speech from the throne, the prince states that the relations with all the foreign powers were friendly; that he had met, during the visit he had made in the summer months, to the court of Vienna, with a favorable reception; and that the products of Roumania at the exhibition of Vienna, had attracted a great deal of attention. The reform introduced into the army by a law of May 24, 1872, were represented as a success. The Chamber of Deputies reelected its former president, Demetri Ghika. To the note of the Turkish Government of September 24th, the Government of Roumania replied that the right to conclude treaties with foreign powers belonged to Roumania, not only *de facto* but also *de jure*. To this note, Turkey replied, that the right claimed by Roumania to make treaties of a political character was not disputed; that Turkey demanded the recognition, on the part of Roumania, of all treaties concluded by the Ottoman Porte. In December, Roumania appointed the former minister, Cretzulesco, as

ambassador to Berlin, although the Porte denied the right of the Government of Roumania to appoint foreign ambassadors.

The Skuptchina of Servia was also opened on November 27th. The young prince referred with satisfaction to the friendly reception he had met with in Vienna and Paris, during his visit to the Governments of Austria and France. One of the first resolutions of the Skuptchina was in favor of the coinage of national silver coins. Servia, thus far, has only had national copper coins, and used the silver coins of the neighboring states. Turkey does not recognize the right claimed by its dependencies, to have national coins, but Servia is determined to disregard the Turkish protest, as has previously been done by Roumania. For the present, the Servian silver coins will be made at the Hungarian mint of Kremnitz.

A decree of the Sultan which had long been expected, ordered the abolition of the *vakouf*, or property of the mosques. It is of two kinds, *Vakouf-el-Zaraf* and *Vakouf-el-Karamain*. The object of both is to provide for the religion of the state and the education of the people, by the erection of mosques and schools, besides eleemosynary institutions. The *Vakouf-el-Zaraf* is land or other immovable property, originally obtained by grants from the crown, and entailed in the same form as the law of succession to the throne; that is, not on the holder's natural heir, but on the eldest surviving member of the family. The grant is generally conceded in perpetuity. The *Vakouf-el-Karamain* is property bequeathed by private individuals, mostly to promote the convenience of pilgrims by the erection of caravanseries, fountains, wells, and other accommodations. It is inalienable, and descends from father to son; but it frequently passes into other hands by being let for such a length of time as to be tantamount to a sale. As the exemption of all kinds of *vakouf* from taxation causes a serious loss to the imperial treasury, Sultan Mahmoud II. meditated the reconversion of the *vakouf* property into crown-lands, intending to provide for the religious institutions out of the general revenue. From religious scruples or considerations of state, this plan was not brought into execution at that time. The present Sultan, however, has again taken hold of it, and intends to carry it through.

U

UNITARIANS. The *Year-Book of the Unitarian Congregational Churches* for 1874 gives lists of three hundred and fifty-eight Unitarian societies and three hundred and ninety-eight Unitarian ministers in the United States. The national organizations of the Unitarians are the *National Conference of Unitarian and other Christian Churches*, and the *American Unitarian Association*. The

object of the National Conference is defined in its constitution to be that of energizing and stimulating the denomination to the largest exertions in the cause of Christian faith and work. It is composed of delegates from individual churches, from the American Unitarian Association, from the Western Conference of Unitarians, and from such other theological, academic, or humane organizations in the

Unitarian body as it may see fit to invite. Its acts are advisory. It was formed in 1865, and meets every two years. The last meeting was held in Boston, in October, 1872.

The objects of the American Unitarian Association are: 1. To collect and diffuse information respecting the state of Unitarian Christianity in the country; 2. To produce union, sympathy, and coöperation among Liberal Christians; 3. To publish and distribute books and tracts, inculcating Unitarian views in such form, and at such price, as shall make them generally accessible; 4. To adopt whatever other measures may seem expedient; such as contributions in behalf of clergymen with insufficient salaries, or in aid of building churches. The anniversary of this Association was held May 27, 1873, in Boston. Its receipts for the year had been impaired by the occurrence of the great fire of November 9 and 10, 1872, in Boston, at the time which had been appointed for general collections in the churches. The Association had been able to control about \$42,000 during the year, against \$110,000 during the previous year. Appropriations had been made to several churches, missions, schools, and other enterprises, in the New England, Middle, and Western States; five hundred dollars in gold had been allotted for missionary services in Paris, France, conducted by the Rev. A. Coquerel, *filis*; five hundred dollars had been sent to the consistory of Hungarian churches for translating and publishing the works of Dr. Channing into the Hungarian language; and the Rev. Mr. Dall and Miss Chamberlain had been sustained at the mission in India. An effort had been determined upon by the National Conference of 1872 to raise \$50,000 for building a church in Washington City, and the Unitarian Association had given its coöperation to the movement. This was defeated for the present, on account of the crippling of the resources of the churches by the Boston fire. Only a few gifts had been received. But the enterprise had not been and would not be withdrawn.

The following are the local conferences and associations of Unitarians: Annual Conference of Western Unitarian Churches; New Hampshire Unitarian Association (organized 1868); Maine Conference of Unitarian Churches (organized 1864); Wisconsin Conference of Unitarian Societies (organized 1866); the Conference of Unitarian and other Christian Churches in the Middle and Southern States (organized at Wilmington, Del., 1866); Norfolk Conference of Unitarian and other Christian Churches (organized at Dedham, Mass., 1866); New York and Hudson River Local Conference (organized at New York, in 1860); Essex Conference of Liberal Christian Churches (organized at Salem, Mass., 1865); Lake Erie Conference of Unitarian and other Christian Churches (organized at Meadville, Pa., 1866); Worcester Conference of Congregational (Unitarian) and other Christian Societies (organ-

ized, 1866); Southern Middlesex Conference of Congregational (Unitarian) and other Christian Societies (organized at Cambridgeport, Mass., 1866); Suffolk Conference of Unitarian and other Christian Churches (organized at Boston, 1866); North Middlesex Congregational Conference of Unitarian and other Christian Churches (organized at Littleton, Mass., 1866); Connecticut Valley Conference of Congregational Unitarian and other Christian Churches (organized at Greenfield, Mass., 1867); Plymouth and Bay Conference (organized at Hingham, Mass., 1867); Ohio Valley Conference of Unitarian and other Christian Churches (organized at Louisville, Ky., 1867); Channing Conference (organized at Providence, R. I., 1867); Chicago Conference of Unitarian Churches (organized at Chicago, 1868); Western Illinois and Iowa Conference of Unitarian and other Christian Churches (organized at Sheffield, Ill., 1869); Cape Cod Conference of Unitarian and other Liberal Christian Churches (organized at Barnstable, Mass., 1870); Conference of Liberal Christians of the Missouri Valley (organized at Kansas City, Mo., 1871).

The *Unitarian Sunday-School Society* was instituted in 1827, and reorganized in 1854. According to its last report it circulated 14,258 copies of the periodical, *The Day Spring*; 7,760 of the *Sunday-School Lessons*; and 1,700 of the *Teacher's Guide*. The *Lessons and Guides* were going to one hundred and thirty-three schools. The *Unitarian Sunday-School Society of the West* was organized at Chicago, Ill., in 1873. The *Year-Book* names also four local Sunday-school associations in Massachusetts. The *Ministerial Conference* was organized in 1819, and holds an annual meeting for address and discussion in Boston on the last Wednesday in May. Thirteen local ministerial conventions are named in the *Year-Book*.

The Divinity School of Harvard University, Cambridge, Mass., reported twenty-two students, and the Meadville Theological school, Meadville, Pa., eighteen students. Fourteen "religious and charitable societies," and four organizations not denominational, in which Unitarians participate, are catalogued in the *Year-Book*.

The meeting of the *British and Foreign Unitarian Association* was held in London in June. The work of the society was represented by the secretary to have greatly increased during the year. A detailed account was given of its operations in India, Hungary, Germany, Italy, France, and the United States. Nineteen ministers were actively engaged in home missionary-work. Fresh efforts had been made in some of the principal meeting-places; and several new and handsome chapels had been opened in large manufacturing towns in the north of England. The sum of £1,098 had been voted for home mission-work and chapel-building. In Scotland attention seemed to have been called to the Unitarian movement through the action of the Dundee Pres-

bytery of the Free Church in the case of the Rev. Mr. Knight, who was tried for having preached in a Unitarian pulpit.

The sale of Unitarian literature had so extended as to amount to about £1,000 per annum. The Executive Committee had taken steps to raise £20,000 for a central Unitarian building in London, of which £12,000 had been already raised. A difference of opinion had arisen in regard to the trust-deed, and the subject was referred to the meeting. It was decided to suspend the building scheme.

The Rev. Edward Everett Hale, of the American Unitarian Association, and the Rev. John Fretwell, of the British and Foreign Unitarian Association, by invitation met on the 15th of June at Buda-Pesth a deputation of the *Unitarian Consistory of Hungary* (or *Transylvania*), to discuss the manner in which the British and American associations could best help the Hungarian Unitarians. There were present at this meeting, as representatives of the *Transylvania Consistory*, Profs. John Kovacs and Dominic Simen of Kolozsvár; Mr. John Hajos, representative of Kolozsvár in the Hungarian Parliament; Baron Blasius Orban, parliamentary representative for Maros Vasárhely; Aron Bugogany, of the Ministry of Public Instruction; Michael Urmösy, of the Foreign Office; Mr. Paul Liptay, Messrs. Julius Szinovics, Morella, and others, of Pesth.

Prof. Kovacs gave a brief sketch of the history and present condition of Unitarianism in Transylvania, and closed with a statement of the objects in which the consistory were most interested, and for which they desired help. They were, first, the translation of the works of Channing and other Unitarian authors, and provision for distributing them among the clergymen and others who were willing to read them, but were not able to buy them; second, the appointment of four additional superiors (making twelve in all), in the faculty of the Unitarian college at Clausenburg, where the Government has just founded a university. Third, the building of a unitarian church at Buda-Pesth. Mr. Hale, in making a report of this meeting to the Secretary of the American Unitarian Association, expressed the opinion that the wisdom of the appropriations made to Hungary by the association had been justified amply by immediate results. By the close of the year 1873, four volumes of Dr. Channing's works had been translated and published in the Hungarian language.

The Unitarians in Hungary and Transylvania number 106 congregations, with 50,000 worshippers. Their consistory is held at Clausenburg, where they have a college and theological seminary. The congregations are under the care of a bishop, J. Kriga, who resides at Clausenburg.

UNITED BRETHREN IN CHRIST. In the following table is given a summary of the statistics of the United Brethren Church for the year 1873:

CONFERENCES.	Organised Churches.	No. of Members.	No. of Ministers.
Alleghany.....	160	5,878	43
Angola.....	94	5,517	55

Total for 1872.....	3,968	125,464	1,701
Increase.....		2,097	121
Decrease.....	109		

The contributions in 1873 were: for ministerial aid, \$2,959.99; for missions, \$37,833.78; for the bishops, \$5,600.58; for church erection, \$612.35; Sunday-school collections, \$41,456.57; for the general Sunday-school fund, \$2,085.26; for church buildings and expenses, \$279,775.95; educational fund, \$14,025.51; for salaries of ministers, \$336,729.38: total contributions, \$720,751.07. Number of meeting-houses, 1,681; of parsonages, 321; number of Sunday-schools, 2,739; of children in the same, 157,197; estimated value of church property, \$2,054,000.

The denomination has a theological school, called the Biblical Seminary; five colleges, viz.: Otterbein University, Westerville, O.; Hartsville University, Hartsville, Ind.; Westfield College, Westfield, Ill.; Lebanon Valley College, Annville, Pa.; Lane University, Leocompton, Kansas; and Western College, Western, Iowa. They have also two seminaries, Roanoke Classical Seminary, Roanoke, Ind., and Philomath College, Philomath, Oregon.

The sixteenth quadrennial session of the General Conference of the United Brethren in Christ was held at Dayton, Ohio, beginning May 15, 1873. The bishops presided, each

* Statistics of 1872.

taking his day in turn. An address was read by the bishops, in which were reviewed the work and progress of the Church during the four years that had elapsed since the preceding General Conference. There had been during that time an increase of 17,847 in the number of members; of 756 Sunday-schools and 22,423 Sunday-school scholars. The mission-work of the Church had taken definite form twenty years before. Now the missions occupied 305 mission-fields: two in the foreign, 121 on the frontier, and 182 in the home-work. The African mission, which four years before had been in a precarious condition, had taken a new start, and now presented a hopeful aspect. The mission in Germany had not fulfilled the sanguine hopes of its friends, but something had been done in it. Two societies had been organized: the "Woman's Missionary Association" had been recently formed, and promised well; the "Union Biblical Seminary," a young theological institution, was spoken of as having shown "a good degree of life and vigor."

The Board of Missions reported that the total amount paid by them to frontier and foreign missions during the four years since the preceding General Conference, was \$49,700.48. The total amount of salaries paid by the mission conferences to missionaries, including the amounts paid them by branch treasurers, was \$108,514.25. The total amount paid to missionaries of home missions by branch treasurers was \$86,979.81; total paid missionaries by fields as salary, \$165,276.41; total for home missions, \$252,256.22. The following statement shows what were the expenditures of the board during the several terms of its existence: During the term ending in May, 1857, \$81,681.21; for the term ending in May, 1861, \$127,063.35; for the term ending in May, 1865, \$152,898.66; for the term ending in May, 1869, \$275,728.80; for the term ending in May, 1873, \$360,770.47; total amount expended since the organization of the board, \$998,137.49.

The total receipts of the printing-house for the preceding four years had been \$322,370.54; its expenditures had been \$318,628.89; its liabilities were \$27,783.68; the excess of assets over liabilities was \$96,525.30.

The receipts of the Sunday-School Association had increased from \$208.07 in 1869 to \$2,016.35 in 1872; the total receipts for the four years had been \$4,278.18, and the total expenditures had been during the same period, \$1,279.41. The principal object of this Association is to help mission-schools on the frontier.

By order of the previous General Conference, a Board of Education was organized during 1870, its first meeting being held on the 27th of July of that year. It then determined to solicit gifts to the amount of \$100,000 for the foundation of a Biblical Seminary; of which sum \$60,000 should be applied to the endowment of the institution, \$30,000 for ground and

buildings, and \$10,000 for the library. Nearly one-fourth of the amount sought had been pledged. The seminary was opened in 1871, with two professors and one assistant. It had been well attended. A Board of Trustees was appointed, and provision was made by the Conference for the support of the seminary.

The missionaries in Germany (Bavaria) had been obliged, in order to secure recognition and permission to worship, as provided by Bavarian laws, to submit to the authorities an abstract of the "Book of Discipline." In doing this, they had omitted some matters, for which they were charged before the Conference with making changes in the Discipline. It was explained in their defense that their purpose in drawing up the abstract which was submitted to the Bavarian officers, had been merely to inform the Government respecting the matters in which it would be concerned in its official action, and that they had had no thought of changing the Constitution of the Church. Their proceedings were approved. The bishops were instructed to take such action as exigencies might demand in the event of the failure of the pending application to the King of Bavaria for legal recognition of the missionaries.

A resolution was passed by the Conference in favor of establishing a mission in Japan "as soon as the men and means necessary to accomplish the work can be obtained."

Four bishops' districts were established, and the salaries of the bishops were fixed at \$1,000 each per annum, with allowances for house-rent and traveling-expenses. The bishops of the existing board were reelected, and stationed as follows: East District, Bishop David Edwards (residence, Baltimore, Md.); Ohio District, Bishop Jonathan Weaver (residence, Dayton, Ohio); East Mississippi District, Bishop John Dickson (residence Muscatine, Iowa); West Mississippi District, Bishop J. J. Gloesbrenner (residence, Churchville, Augusta County, Va.). The conferences on the Pacific coast were left to be visited alternately by the bishops, as they may arrange among themselves.

The ministers in the several Annual Conferences of this Church are assigned to their respective fields of labor by a stationing committee, which is composed of one local preacher elected by the Conference from each presiding elder's district, and the bishop and presiding elders of the past and present years.

An amendment to the constitution providing for the admission of lay delegates to the General Conference was adopted, to be submitted to the vote of the Church. It is as follows:

SECTION 1. All ecclesiastical power herein granted to enact or repeal any law or rule of discipline, is vested in a General Conference, which shall consist of elders and laymen elected in every annual Conference district throughout the Church; provided such laymen shall have held a membership for six years in the Church within the bounds of the Conference they represent, and such elders shall have sustained the relation of elders three years preceding the next

General Conference in the Conference by which they may be elected.

The first Tuesday in November, 1875, was the day on which the vote should be taken. Suitable rules were adopted to regulate the election, and provision was made for carrying the purposed amendment into effect should it be ratified.

In reply to the proposition of the Rev. Dr. S. S. Schmucker, on the subject of Christian union, and his suggestion that delegates be appointed to attend the World's Conference of the Evangelical Alliance in October, twenty-five such delegates were appointed, the bishops being included in the number.

The first independent Church of the United Brethren was formed in Baltimore in 1774, by the Rev. William Otterbein and the officers of his congregation. It appeared, therefore, that the year 1874 would be the one hundredth year of the existence of the Church. The Conference recommended that this fact be recognized by the holding of centenary meetings in every society of the Church during 1874, and by the taking of collections and subscriptions as thank-offerings. It was directed that the funds thus secured should be equally divided between the Missionary Society, the Church Erection Society, and the endowment fund of the Union Biblical Seminary, "except when otherwise directed by the donors."

UNITED STATES. The inauguration of President Grant for his second term as President of the United States, and Henry Wilson, of Massachusetts, as Vice-President, took place at Washington, on March 4th. The day was clear, but intensely cold, and many thousand persons on their way to witness the procession, found it impossible to keep themselves comfortable.

The address of the President on the occasion was as follows:

Fellow-Citizens: Under Providence I have been called a second time to act as Executive of this great nation. It has been my endeavor in the past to maintain all the laws, and, so far as lay in my power, to act for the best interests of the whole people. My best efforts will be given in the same direction in the future, aided, I trust, by my four years' experience in the office. When my first term of the office of Chief Executive began, the land had not recovered from the effects of an internal revolution, and three of the former States of the Union had not been restored to their Federal relations. It seemed to me wise that no new questions should be raised so long as that condition of affairs existed; therefore, the past four years, so far as I could control events, have been consumed in the effort to restore harmony, public credit, commerce, and all the arts of peace and progress.

It is my firm conviction that the civilized world is tending toward republicanism, or government by the people through their chosen representatives, and that our own great republic is destined to be the guiding star to all others. Under our republic we support an army less than that of any European power of any standing, and a navy less than that of at least five of them. There could be no extension of territory on this continent which would call for an increase of this force, but rather might such extension enable us to extinguish it.

The theory of government changes with general progress. Now that the telegraph is made available for communicating thought, together with rapid transit by steam, all parts of the continent are made contiguous for all purposes of the Government, and communication between the extreme limits of the country made easier than it was throughout the old thirteen States at the beginning of our national existence.

The effects of the late civil war have been to free the slave and make him a citizen. Yet he is not possessed of the civil rights which citizenship should carry with it.

This is wrong, and should be corrected. To this correction I stand committed, so far as Executive influence can avail. Social equality is not a subject to be legislated upon, nor shall I ask that any thing be done to advance the social status of the colored man, except to give him a fair chance to develop what there is good in him. Give him access to schools, and, when he travels, let him feel assured that his conduct will regulate the treatment and fare he will receive.

The States lately at war with the General Government are now happily rehabilitated, and no Executive control is exercised in any one of them that would not be exercised in any other State under like circumstances.

In the first year of the past Administration, the proposition came up for the admission of Santo Domingo as a Territory of the Union. It was not a question of my seeking, but was a proposition from the people of Santo Domingo, and which I entertained. I believe now, as I did then, that it was for the best interests of the country, for the people of Santo Domingo, and all concerned, that the proposition should be received favorably. It was, however, rejected constitutionally, and therefore the subject was never brought up again by me.

In the future, while I hold my present office, the subject of acquisition of territory must have the support of the people before I will recommend any proposition looking to such acquisition.

I say here, however, that I do not share in the apprehension held by many, as to the danger of governments becoming weakened and destroyed by reason of their extension of territory. Commerce, education, and rapid transit of thought and matter by telegraph and steam, have changed all this.

Rather do I believe that our great Maker is preparing the world, in his own good time, to become one nation, speaking one language, and when armies and navies will be no longer required.

My efforts in the future will be directed to the restoration of good feeling between the different sections of our common country, to the restoration of our currency to a fixed value as compared with the world's standard of values, gold, and if possible to a par with it; to the construction of cheap routes of transit throughout the land, to the end that the products of all sections may find a market, and leave a living remuneration to the producer, to the maintenance of relations with all our neighbors, and with distant nations; to the reestablishment of our commerce, and a share in the carrying-trade upon the ocean; to the management of such manufacturing industries as can be economically pursued in the country, to the end that the exports of home products and industries may pay for our imports, the only sure method of returning to and permanently maintaining a specie basis; to the elevation of labor; and by a humane course to bring the aborigines of the country under the benign influence of education and civilization. It is either this or a war of extermination. Wars of extermination engaged in by people pursuing commerce, and all the industrial pursuits, are expensive, even against the weakest people, and are demoralizing and wicked. Every superiority of strength, and advantages of civilization, should make us lenient toward the Indian.

The wrong already inflicted on him should be

taken into account, and the balance placed to his credit. The moral view of the question should be considered, and the question asked, "Can not the Indian be made a useful and productive member of society by proper teaching and treatment?" If the effort is made in good faith, we will stand better before the civilized nations of the earth, and in our own conscience, for having made it. All these things are not now to be accomplished by one individual, but they will receive my support, and such recommendations to Congress as will, in my judgment, best serve to carry them into effect. I beg your support and encouragement.

It has been and is my earnest desire to correct abuses that have grown up in the civil service of the country.

To secure this, rules regulating the methods of appointment and promotion were established, and have been tried. My efforts for such reformation shall be continued. To the best of my judgment the spirit of the rules adopted will be maintained.

I acknowledge before this assembly, representing as it does every section of our country, the obligation I am under to my countrymen for the great honor they have conferred on me, by returning me to the highest office within their gift, and the further obligation resting on me to render to them the best services within my power. This I promise, looking forward with the greatest anxiety to the day when I shall be released from responsibilities that at times are almost overwhelming, and from which I scarcely have had a respite since the eventual firing on Fort Sumter, in April, 1861, to the present day. My services were then tendered and accepted, under the first call for troops growing out of that event. I did not ask for place or position, and was entirely without influence, or the acquaintance of any persons of influence, but was resolved to perform any part in a struggle threatening the very existence of the nation. I performed a conscientious duty without asking promotion, and without revengeful feeling toward any section or individual.

Notwithstanding this, throughout the war, and from my candidacy for my present office, in 1868, to the close of the last presidential campaign, I have been the subject of abuse and slander, scarcely ever equalled in political history, which to-day I feel that I can afford to disregard, in view of your verdict, which I gratefully accept as my vindication.

An act had been passed during the session of the Congress that closed on the same day, by which the salaries of the Executive officers and the Judiciary had been increased as follows:

SALARIES UNDER THE OLD AND NEW LAW.	NEW.	OLD.
President of the United States.....	\$50,000	\$35,000
Vice-President.....	10,000	8,000
Chief Justice of Supreme Court.....	10,500	8,500
Justices of Supreme Court.....	10,000	8,000
Circuit Judges.....	6,000	5,000
Speaker of the House of Representatives.....	10,000	8,000
Members of the Cabinet.....	10,000	8,000

This act increased, likewise, the salaries of members of Congress, and several subordinate officers; but such portion of it was subsequently repealed. (See CONGRESS, U. S.)

The only change made in the cabinet of the President was, the appointment of William M. Richardson as Secretary of the Treasury, to fill the vacancy occasioned by the resignation of George S. Boutwell. Mr. Richardson was born at Tyngsborough, Mass., on November 2,

1821. He graduated at Harvard College in 1843. On the 8th of July, 1846, on motion of the late Governor Andrew, of Massachusetts, he was admitted to the Boston bar, and subsequently began the practice of law in Lowell. He was president of the Wamiset Bank, of Lowell, and also of the Mechanics' Association, for several years; and, in 1855, with Prof. Joel Parker and A. A. Richmond, was appointed to revise the General Statutes of Massachusetts. The result of his four years' labor in this direction was so satisfactory, that he was selected to edit the revision, and it was then published in a large eleven-hundred page volume, entitled the "General Statutes of Massachusetts," which were subsequently enacted into a code by the Legislature. The latter body, in 1872, appointed Mr. Richardson and Judge George F. Sawyer to re-revise the statutes and the supplement.

In 1856 he was appointed Judge of the Probate Court of Middlesex County; and in 1858, on the consolidation of the offices of judge of probate and judge of insolvency, he was appointed to the consolidated office, which he held until the spring of 1872, when he resigned to accept the office of Assistant Secretary of the Treasury, which he had previously filled. In 1869 he declined an appointment as Judge of the Supreme Court of Massachusetts; and in 1855 he published a volume entitled "The Banking Laws of Massachusetts." In 1873, while acting as Secretary of the Treasury, he prepared and published a work entitled "Practical Information concerning the Public Debt of the United States, and National Banking Laws." His visit to Europe at the request of Secretary Boutwell in 1871, to negotiate a loan, was quite successful.

The vacancy which took place in the Supreme Court, during the year, by the death of Chief-Justice Chase, was filled by the appointment and confirmation of Morrison R. Waite, of Ohio. Mr. Waite was born in Lyme, Conn., in 1816. He graduated at Yale College, in 1837. He soon removed to Maumee City, Ohio, and commenced the study and practice of law, and subsequently removed to Toledo, where he continued to reside. In 1849 he was a member of the Ohio Legislature. He was an unsuccessful candidate for Congress in 1862, and was one of the counsel of the Commissioners of the Geneva Arbitration Tribunal. In 1878 he was unanimously elected a delegate to the State Constitutional Convention, of which he was also elected to be the presiding officer. This position he held until appointed Chief-Justice.

Some changes were made in the postal system during the year. These consisted in the free delivery of letters and papers in all cities containing 20,000 inhabitants, and the adoption of a postal card. This consists of a stamped slip of pasteboard, on one side of which a brief message may be written and sent through the mails to any part of the country for one cent.

The history of the reduction of postage in this country may be briefly stated. In 1792 the first postage act was passed. It introduced a highly-complicated system. The lowest postage was six cents to places within thirty miles; eight cents to places within sixty miles; ten cents to places within one hundred miles; twelve and a half cents to places within one hundred and fifty miles; fifteen cents to places within two hundred miles; seventeen cents to places within two hundred and fifty miles; twenty cents to places within three hundred and fifty miles; twenty-two cents to places within four hundred and fifty miles, and twenty-five cents to places more than four hundred and fifty miles distant. In 1810 the rates were changed. The lowest rate was changed to eight cents, and the shortest distance to forty miles. Instead of nine rates there were but six; twenty cents carried letters five hundred miles, and twenty-five cents was charged for still greater distance. In 1816 the minimum rates were again reduced to six cents, and the distance to thirty miles; only five rates were established; eighteen and a half cents carried letters four hundred miles; and for longer distances twenty-five cents was charged still.

These rates, with a single exception, where the postage was increased, continued until 1845, when the first material reduction took place. Five cents became the postage for letters carried a distance less than three hundred miles; ten cents for all greater distances. At the same time the drop-letter system was introduced, such letters being charged two cents. Previous to this time the rule had been that the above rates were for "single" letters on one sheet of paper, large or small, and without reference to weight. In 1845 the half-ounce weight was made the standard, instead of the number of sheets. In 1851 the single rate was made three cents for all distances under three thousand miles and six cents for greater distances, if prepaid, this being the first inducement held out to prepay letters. Unpaid letters were charged five and ten cents, according to the distance. In 1855 prepayment was required, three cents being still the rate for distances under three thousand miles, and ten cents charged for greater distances. In 1868 the present rate of three cents prepaid by stamp, for all distances, was established. The history of these reductions shows also that no material loss of revenue has been their immediate result, and that no loss at all has been permanent. Since 1851, when substantially the present rate was fixed, the revenue of the post-office has increased from \$5,500,000 for that year to \$22,900,000 in 1872.

The disturbances in some of the Southern States, arising from the violent acts of members of secret organizations, entirely ceased during the year. This is chiefly ascribed to the lenient course pursued by the Government. On the request of certain citizens of South Carolina, a public expression of the policy of

the Government in relation to the prosecutions and prisoners under the enforcement acts, was made through Attorney-General Williams. Under date of July 31st, he wrote in reply as follows:

I have to say in answer, as indicated in his conversation with you, the President has communicated to me what I have heretofore understood to be his wish—that the persons accused and convicted of offenses under said acts should be treated with as much lenity as possible, without prejudice to the ends for which they were passed. It must, however, be distinctly understood that this action of the Government is not prompted by any doubt as to the necessity or validity of said acts, or of the necessity and justice of the convictions already had under them to prevent and punish high crimes, but by the belief that the Ku-klux klans have, through said convictions, been almost, if not altogether, broken up, and that those who were concerned in or sympathized with them, have come to see the folly, wickedness, and danger of such organizations.

You have been pleased to say to me, and similar assurances have been given by others seeking the same object, that Executive clemency at this time in the Ku-klux cases would tend to remove many causes of uneasiness and irritation now existing, and conduce generally to the public peace and tranquillity, and the proposed action is taken in reference to such cases with the full expectation that these assurances will be verified.

You are informed that the prosecutions now pending in the courts for violations of the enforcement acts will be suspended or discontinued, and instructions to that effect have already been given to several district attorneys; but there may be exceptional cases of great aggravation where the Government will insist upon conviction and punishment. There are, however, but few such cases now within my knowledge. Persons who have absented themselves on account of their complicity, or supposed complicity, in Ku-klux offenses, are at liberty to return; and, unless their crimes bring them within the above-named exceptional cases, they will not be prosecuted. Many of those sentenced to imprisonment for such offenses have been already pardoned, and the cases of the others are under consideration, and will probably be disposed of in like manner, keeping in view the proper relation between their punishment and the nature of their guilt.

To avoid any misconception of these proceedings, it is perhaps necessary for me to say that all conspiracies and outrages in violation of said acts hereafter committed will be prosecuted with all possible energy and vigor, and it is to be understood that the Government does not intend to abandon said acts, but to induce, if possible, a willing obedience to their reasonable requirements. Substantially they are intended to protect citizens of the United States in the possession and enjoyment of their political and civil rights guaranteed to them by the late amendments to the Constitution; and the President, whose duty it is to see that the laws are faithfully executed, would be recreant to that duty if he did not so administer the Government as to afford to all citizens the equal protection of its laws.

I have added these suggestions to the information for which you ask, with a sincere hope that by the exercise of a mutual recognition of each other's rights by all classes of people, no further necessity will arise for their protection and enforcement under said acts through the action of the General Government.

By a report of the same officer, it appears that the number of civil suits to which the United States was a party, in progress on July 1, 1873, was as follows: Customs' suits, 3,759; internal revenue suits, 1,482; post-office suits,

143; miscellaneous suits, 2,216—making in the aggregate, 7,599 suits. During the year ending on the same day, the aggregate amount of judgments in favor of the United States in suits was \$3,208,402, and the amount actually realized on the judgments was \$1,698,133. There were pending on July 1, 1873, in Circuit and District Courts of the United States, 6,274 criminal prosecutions.

A total of 15,141 suits of all classes were commenced in the year ending with June, 1873, in the Federal Courts. The total number terminated was 7,276. A summary of the business transacted by the Court of Claims for the same period shows that the miscellaneous cases disposed of amounted to 1,493; cotton cases, 107: total, 1,600. The amount claimed was \$7,015,223. The amount awarded was as follows: In the miscellaneous cases, \$753,402; in the cotton cases, \$3,130,398, making a total of \$3,883,800. The number of cases disposed of during the year was 1,600. Those still pending amount to 4,803. The amount expended by the Department of Justice was \$3,031,000.

Among the decisions of the above-mentioned Court of Claims, there was one in which the legality of certain corporations created by the Legislature of Georgia while the State was in secession was decided. The question was raised whether they were endowed with a legal existence by which they were capable of owning cotton captured, and capable of suing in this court for the proceeds. The Chief-Justice delivered the opinion of the court, answering this question affirmatively, under the decisions of the United States Supreme Court, holding that whatever act of the Legislature of a rebel State did not tend to further support the rebellion, or to defeat the just rights of citizens, but related merely to the domestic affairs of the people of the State, as a community, aside from the connection of that people with the rebellion, is a valid act by a *de facto* though unlawful government, which will be sustained in the courts of the United States. Applying these tests to the charters of these companies, it is, therefore, held that they have a valid existence, and are entitled to the judgment.

One of the most important decisions of the Supreme Court of the United States was rendered on April 14th. It related to the so-called "Slaughter House" cases arising under the laws of Louisiana (*see ANNUAL CYCLOPEDIA, 1869 and 1870, LOUISIANA*). This importance arises from the appeal made by one of the parties in the cases for protection from hostile legislation by Louisiana to the authority of the Federal Government under the thirteenth and fourteenth amendments of the Constitution.

These cases, it will be remembered, grew out of an act of the Legislature of Louisiana, entitled "An act to protect the health of the city of New Orleans, to locate the stock-landings and slaughter-houses, and to incorporate

"The Crescent City Live-Stock Landing and Slaughter-house Company," passed in 1869. The act created the corporation named in its title, which was composed of seventeen persons, and conferred upon it the sole and exclusive privilege of conducting and carrying on the live-stock landing and slaughter-house business in the city of New Orleans and the adjoining parishes, embracing a country of over 1,000 square miles; it also required all live-stock to be landed at the stock-landings and slaughtered at the slaughter-houses of the company and nowhere else. The company was required to erect and maintain landings and slaughter-houses at designated places, and to permit any person to land live-stock thereat, or to slaughter animals therein, on receipt of a stipulated fee.

The butchers of New Orleans organized themselves into an association for the purpose of contesting the validity of the act, and, after being beaten in the State courts, brought the case to the Supreme Court of the United States, where it has been three times argued. It was contended, in the first place, that the act was invalid, because it created a monopoly and conferred odious and exclusive privileges upon a small number of persons at the expense of the community, and deprived a large class of citizens of the right to exercise their trade. The majority of the Supreme Court held, on this point, that the act was within the police power of the Legislature—a power which the court admits is "incapable of any very exact definition or limitation." The dissentients—Chief-Justice Chase, and Justices Field, Bradley, and Swaine—were, however, of the opinion that there were only two provisions of the act which could properly be called police regulations, or which came within the police powers of the Legislature, viz., the one which required the landing and slaughtering of animals below the city of New Orleans, and the one which required the inspection of the animals before they were slaughtered. Mr. Justice Field insisted that, if the exclusive privileges conferred upon this corporation were sustained, there would be no reasons why "exclusive privileges for the construction and keeping of ovens, machines, grindstones, wine-presses, and for all the numerous trades and pursuits, for the prosecution of which buildings are required, may not be equally bestowed upon other corporations or private individuals, and for periods of indefinite duration."

But the most important objection urged by the Butchers' Association was, that the act was in violation of the Constitution of the United States in these several particulars: that it created an involuntary servitude forbidden by the thirteenth amendment; that it abridged the privileges and immunities of citizens of the United States; that it denied to the plaintiffs the equal protection of the laws; and that it deprives them of their property without due process of law, contrary to the provisions

of the first section of the fourteenth amendment. The court was therefore called upon to give construction to these amendments to the Constitution. Mr. Justice Miller, who delivered the opinion of the court, after a succinct history of the events which led to the adoption of the thirteenth and fourteenth amendments, and an exhaustive examination of the principles involved, reached conclusions which may be summarized as follows: that the term "servitude" in the thirteenth amendment, means a *personal* servitude. On this point Judge Miller says:

The word "servitude" is of larger meaning than slavery, as the latter is popularly understood in this country, and the obvious purpose was to forbid all shades and conditions of African slavery. It was very well understood that in the form of apprenticeship for long terms, as it had been practised in the West India Islands on the abolition of slavery by the English Government, or by reducing the slaves to the condition of *serfs* attached to the plantation, the purpose of the article might have been evaded if only the word "slavery" had been used. The case of the apprentice slave, held under a law of Maryland, liberated by Chief-Justice Chase on a writ of *habeas corpus* under this article, illustrates this course of observation. "Matter of Turner," 1 Abb. (U. S.) 84. And it is all that we deem necessary to say on the application of that article to the statute of Louisiana, now under consideration.

As to the fourteenth amendment, the court held that it clearly recognized and established a distinction between a citizen of the United States and a citizen of a State; that not only may a man be a citizen of the United States without being a citizen of a State, but that to convert the former into the latter the important element of residence within the State is essential, or, in other words, "that there is a citizenship of the United States and a citizenship of a State, which are distinct from each other, and which depend upon different characteristics, or circumstances, in the individual." It follows logically that the provision of the fourteenth amendment, that "no State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States," only places the privileges and immunities of citizens of the United States under the protection of the Federal Constitution, while the citizens of the State have no additional protection by this paragraph of the amendment.

Having reached this conclusion, the court proceeded to define the privileges and immunities of citizens of a State, which may be briefly summed up as follows: "Protection by the Government, with the right to acquire and possess property, and to pursue and obtain happiness and safety, subject to such restraints as the Government may prescribe for the general good of the whole." As to the privileges and immunities of the citizens of the United States, Mr. Justice Miller says:

Having shown that the privileges and immunities relied on in the argument are those which belong to citizens of the States as such, and that they are left to the State governments for security and protection,

and not by this article placed under the special care of the Federal Government, we may hold ourselves excused from defining the privileges and immunities of citizens of the United States which no State can abridge, until some case involving those privileges may make it necessary to do so. But lest it should be said that no such privileges and immunities are to be found, if those we have been considering are excluded, we venture to suggest some which owe their existence to the Federal Government, its national character, its Constitution, or its laws. One of these is well described in the case of *Crandall vs. Nevada*, 6 Wall. 86. It is said to be the right of the citizen of this great country, protected by implied guarantees of its Constitution, "to come to the seat of government to assert any claim he may have upon that Government, to transact any business he may have with it, to seek its protection, to share its offices, to engage in administering its functions. He has the right of free access to its seaports, through which all operations of foreign commerce are conducted, to the sub-treasuries, land-offices, and courts of justice in the several States." And quoting from the language of Chief-Justice Taney, in another case, it is said "that for all the great purposes for which the Federal Government was established, we are one people, with one common country, *we are all citizens of the United States*," and it is as such citizens that their rights are supported in this court in *Crandall vs. Nevada*.

Another privilege of a citizen of the United States is to demand the care and protection of the Federal Government over his life, liberty, and property, when on the high-seas, or within the jurisdiction of a foreign government. Of this there can be no doubt, nor that the right depends upon his character as a citizen of the United States. The right to peaceably assemble and petition for redress of grievances, the privilege of the writ of *habeas corpus*, are rights of the citizen guaranteed by the Federal Constitution. The right to use the navigable waters of the United States, however they may penetrate the territory of the several States, all rights secured to our citizens by treaties with foreign nations, are dependent upon citizenship of the United States, and not citizenship of a State. One of these privileges is conferred by the very article under consideration. It is, that a citizen of the United States can, of his own volition, become a citizen of any State of the Union by a *bona-fide* residence therein, with the same rights as other citizens of that State. To these may be added the rights secured by the thirteenth and fifteenth articles of amendment, and by the other clause of the fourteenth, next to be considered.

The "other clause" reads: "Nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of its laws." Without any elaborate discussion, the court held that the act of the Louisiana Legislature in question was not a deprivation of property, nor a denial of the equal protection of the laws, within the meaning of the language of the amendment.

As to the general scope and purpose of these amendments, the court said:

On the most casual examination of the language of these amendments, no one can fail to be impressed with the one pervading purpose found in them all, lying at the foundation of each, and without which none of them would have been even suggested; we mean the freedom of the slave race, the security and firm establishment of that freedom, and the protection of the newly-made freeman and citizen from the oppressions of those who had formerly exercised unlimited dominion over him. It is true that only the fifteenth amendment, in terms,

mentions the negro by speaking of his color and his slavery. But it is just as true that each of the other articles was addressed to the grievances of that race, and designed to remedy them as the fifteenth. We do not say that no one else but the negro can share in this protection. Both the language and spirit of these articles are to have their fair and just weight in any question of construction. Undoubtedly, while negro slavery alone was in the mind of the Congress which proposed the thirteenth article, it forbids any other kind of slavery, now or hereafter. If Mexican peonage, or the Chinese cooly labor system, shall develop slavery of the Mexican or Chinese race within our territory, this amendment may safely be trusted to make it void. And so if other rights are assailed by the States, which properly and necessarily fall within the protection of these articles, that protection will apply though the party interested may not be of African descent. But what we do say and what we wish to be understood is, that in any fair and just construction of any section or phrase of these amendments, it is necessary to look to the purpose which we have said was the pervading spirit of them all, the evil which they were designed to remedy, and the process of continued addition to the Constitution, until that purpose was supposed to be accomplished as far as constitutional law can accomplish it.

The minority of the court took the ground that this act was, of itself, beyond the police powers of the Legislature, and therefore void, and also that it was void under the fourteenth amendment. This amendment, they said, makes it essential to the validity of the legislation of every State that the equality of right among citizens in the pursuit of ordinary vocations of life should be respected, and that all grants of exclusive privileges like the one question, in contravention of this equality, are against common right, and void.

A decision was also rendered in the case of Myra Bradwell against the State of Illinois. The plaintiff in error was refused a license to practise law by the Supreme Court of Illinois on the sole ground that she was a woman, and appealed from the decision to the Supreme Court of the United States. This court refused to set aside the decision of the Illinois court upon the ground that the right to be admitted to practise law in the limits of a State is not among the class of rights belonging to citizens of the United States, which the States are forbidden, by the fourteenth amendment, to abridge. The court held that the right to practise law does not depend upon citizenship at all, citing the fact that many distinguished lawyers have been admitted to practise, both in State and Federal courts, who were not citizens of the United States, or of any State. But if the claim of citizenship had any thing to do with the matter, the United States had only jurisdiction in regard to its own courts, and the separate States have full jurisdiction over the right to admission to their courts. The court therefore held that it could not interfere with the decision of the Supreme Court of Illinois, but uttered no opinion as to the right of women to practise in United States courts.

A few conventions, claiming a national importance, were held during the year, such as

the Convention of Colored Citizens, at Washington; and the Convention to promote a Religious Amendment of the Constitution of the United States, at New York.

One of the most important subjects, however, which occupied the public attention, was that of cheap transportation, chiefly from the West to the East. The proceedings of conventions assembled to consider this subject in the several Western States will be found under the head of those States respectively; and also under the title "Patrons of Husbandry." The Convention of the Governors of the Southern States, which assembled at Atlanta, Georgia, is likewise noticed in the article on that State. The object of this convention was to consider a project for connecting, by an inland route, the waters of the Mississippi with the Atlantic Ocean. The Atlantic & Great Western Canal Company, in whose interest this convention was more particularly held, propose to connect by canal and slack-water navigation the Coosa, Etowah, Ocmulgee, and Tennessee Rivers with the Atlantic Ocean at Savannah, Ga. The canal will commence at Guntersville, the most southern point reached by the Tennessee River, thence to the Coosa, thirty miles distant, which it enters, and follows to Rome, Ga., up to which point the Coosa River is navigable for large steamboats at all seasons of the year. From Rome the canal follows the Etowah River to its nearest point of contact with the Ocmulgee, and thence down the latter stream to navigable water and the Atlantic Ocean. This route has been several times surveyed, and has been declared entirely feasible by members of the United States Engineer Corps. The project was also favorably reported upon during the session of Congress of 1872-'73. A report from the House Committee on Commerce says: "By this means the entire navigable waters of the States of Alabama, Eastern Mississippi, and West Florida, will be connected with the vast inland sea comprised in the term 'Mississippi River and its tributaries'; also the navigable waters of the States of South Carolina, Georgia, Florida, and a part of North Carolina, embracing about 5,000 miles of water easily navigated by vessels of light draft, and upon canals. These vessels would penetrate the streams and estuaries above referred to, into almost every portion of these six States—States that produce the major portion of the cotton raised upon this continent."

A National Cheap Transportation Association was organized in New York on May 6th. Delegates were present from many States and local associations. The views entertained by the convention are expressed in the following extracts from the platform adopted:

Whereas, The great material want of the nation to-day is relief from the present rates of transit upon American products: therefore—

Resolved, 1. That the duty of the hour, and the mission of this Association, is to obtain from Congress and the several State Legislatures such legislation as

may be necessary to control and limit by law within proper constitutional and legitimate limits the rates and charges of existing lines of transportation, to increase where practicable the capacity of our present water-ways, and to add such new avenues, both water and rail, as our immensely increased internal commerce demands, so that the producer may be fairly rewarded for his honest toil, the consumer have cheap products, and our almost limitless supplies find foreign markets at rates to compete with the world.

2. That the cheap transportation, both of persons and property, being more conducive to the free movement of the people, and the widest interchange and consumption of the products of the different parts of the Union, are essential to the welfare and prosperity of the country.

3. That the constant and frequent association of the inhabitants of remote parts of the United States is not only desirable, but necessary, for the maintenance of a homogeneous and harmonious population within the vast area of our territory.

4. That the best interests of the different parts of the country also demand the freest possible interchange of the industrial products of the varied climates and industries of the United States, so that breadstuffs, textile fibres, coal, lumber, iron, sugar, and various other products, local in their production but general in their consumption, may all reach the consumer at the least practicable cost of transportation: and that an arbitrary and unnecessary tax levied by the transporter, over and above a fair remuneration for the investment, is a burden upon the producer and the consumer, that it is the part of wise statesmanship to remove.

5. That certain leading railway corporations of the country, although chartered to subserve the public welfare, and endowed with the right of eminent domain solely for that reason, have proved themselves practically monopolies, and become the tools of avaricious and unscrupulous capitalists, to be used to plunder the public, enrich themselves, and impoverish the country through which they run.

6. That many of the railway corporations of the United States have not only disregarded the public convenience and prosperity, but have oppressed the citizen, bribed our Legislatures, and defied our executives and judges, and stand to-day the most menacing danger to American liberty and to republican government.

7. That the present system of railway management, having failed to meet the just expectations and demands of a long-suffering people, must be radically reformed and controlled by the strong hand of law, both State and national, and railway corporations compelled to perform their proper functions as the servants and not the masters of the people.

8. That to this end we invoke the aid of all fair-minded men in all States of the Union in expelling and excluding from the halls of legislation, from our executive offices, and from the bench, such railway-officials, railway-attorneys, or other hirelings, as prostitute public office to the base uses of private gain.

9. That leaving different sections and interests that desire cheap transportation to work out the problem in such manner as they may deem best, we earnestly invoke their careful consideration, their energetic action, and their resolute will, in regulating and controlling the rates of transportation, and giving remunerative wages to the producer, and cheap products to the consumer, untaxed by unearned charges for their carriage.

The transportation of persons and freight having passed almost entirely into the hands of railroad corporations throughout the country, these movements were in effect a protest against the charges of these corporations, and a combination to effect their reduction. The

usual considerations under which every branch of industry is said to regulate itself, do not seem to exist in this. There is an abundance of freight to tax the utmost capacities of the roads, and there is an absence of close competition interfering with them. These circumstances leave them practically "masters of the situation." Appeals were therefore made to State Legislatures, and to Congress, for the passage of laws regulating transportation by railroads. In answer to these applications, Illinois appears to be the only State in which there has been any legislation. (*See ILLINOIS in this and the preceding volume.*)

The application to Congress immediately brought up the question of the powers of that body over the railroad corporations which were authorized by the States. A report, embracing this important constitutional question, was made in the House of Representatives early in January, 1874, by the Committee on Railroads and Canals. A bill to regulate commerce by railroads among the several States having been previously referred to this committee, its chairman, George W. McCrary, of Iowa, presented the report. The following is so much of it as relates to the constitutional power of Congress over railroads:

Among the powers expressly conferred upon Congress by section 8, Article I. of the Constitution, is the power "to regulate commerce with foreign nations and among the several States and with the Indian tribes." In considering the question whether, under this provision, Congress has power to pass the bill reported, it will be unnecessary to inquire as to the nature and extent of the power conferred by this provision upon Congress. It will not be denied that this clause of the Constitution confers upon Congress by express words power to legislate upon the general subject of the regulation of commerce among the several States. It is not a negative provision; it does not declare what power Congress shall not have; it is not merely prohibitory. It is affirmative. It declares that Congress "shall have power," etc. In order to show that this provision of the Constitution authorizes Congress to pass the bill reported, it is necessary to establish the following propositions:

1. That the "commerce among the several States" which may be regulated by Congress includes commerce carried from State to State by railroads.

2. That to regulate the charges for carrying freight or passengers upon inter-State railroads, so as to limit them to what is fair and reasonable and prevent extortion, is a legitimate exercise of the power to regulate such commerce.

These propositions are abundantly supported both by reason and authority. The term "commerce," as employed in the Constitution, undoubtedly means intercourse and exchange both of persons and property between different States and communities. It refers to the commerce itself, and not to the particular manner in which it is carried on. If it could be held to apply to the latter, and if it could be shown that the constitutional provision in question was confined in its operation to commerce to be carried on by the same mode in existence when the Constitution was adopted, all commerce among the several States might escape regulation by abandoning entirely the vehicles in use in 1787. In this way the plain provision of the Constitution might be nullified if this construction of it could be sustained. Upon this subject Judge Redfield, in his able and exhaustive work on the law of railways, has this to say:

The natural import and construction of the terms of the Constitution would not seem to admit of much doubt, judging from the language merely. The meaning of the word "commerce" at the time the Constitution was adopted must have been definitely settled and well enough understood. The word, as is well understood, is derived from the Latin *commercium*, which is found almost in its original form in most of the languages of modern Europe. It means, in its most literal sense, intercourse and exchange both of persons and commodities. It is more nearly synonymous with traffic than with any other word in the language, probably. Its great natural divisions for ages have been foreign and inland. The regulation of all the former and that portion of the latter which extended beyond the limits of a single State was, as we have seen by the organic law of our national Government, secured to the nation, and the remainder was naturally left to the particular State where it exclusively existed. It is obvious that the purposes of the provisions was not to be confined to future commerce carried on in the same mode as it was then—i. e., by ship and boat navigation propelled exclusively by wind. If that had been so, the provision could not have been applied to that large portion of commerce now carried on by steam-power, which has already become very considerable and is constantly increasing in a rapidly-advancing ratio. * * The fact that the entire subject of regulating all commerce among the different States, including all the means and appliances by which it was carried on, was committed to Congress, and that, thereafter, the States were to have no concurrent action in the regulation of the same, would seem to reduce the question of regulating inter-State railway traffic to the single inquiry, whether it forms any portion of the commerce of the country which requires to be regulated at all? Those who assume to argue that Congress has no power to regulate the traffic upon these extended lines of railways reaching from one end of the Union to the other must, if they would meet the question fairly, either say the traffic on these extended lines of railway, amounting to many millions annually—probably ten times as much as the entire commerce of the country at the time of the adoption of the Constitution—is not commerce at all, or, if it be, is not subject to any regulation or control whatever; for it is certain the States have neither the power nor capacity to regulate, to any purpose or with any efficiency, this inter-State railway traffic. It must then, come under the control of Congress or be left to his own devices and impulses—an experiment never yet tried in any other country.—(Redfield on Railways, pp. 720, 722.)

In the great case of *Gibbons vs. Ogden*, 9 Wheat. 1, which arose and was decided in 1824, when steam navigation was in its infancy, it was held that commerce comprehended navigation as well as intercourse and traffic, and no doubt was expressed as to the right of Congress to regulate it when carried on by an agency not known when the Constitution was adopted—to wit, the power of steam. On the contrary, the power to regulate inter-State and foreign commerce, when carried on by means of steam-vessels, was distinctly asserted; and if extended to steam-vessels why not to steam-cars, since they were alike unknown when the Constitution was adopted?

The opinion in this case (*Gibbons vs. Ogden*) was delivered by Chief-Justice Marshall, and it discusses so ably the very question we are now considering, viz., the nature and extent of the power given to Congress to regulate commerce—that we feel constrained to quote from it as follows:

The subject to be regulated is commerce; and our Constitution being, as was aptly said at the bar (by Mr. Webster), one of remaneration and not of definition, to ascertain the extent of the power it becomes necessary to settle the meaning of the word.

The counsel of the appellee would limit it to traffic, to buying and selling, or the interchange of commodities, and do not admit that it comprehends navigation. This would restrict a general term, applicable to many objects, to one of its significations. Commerce, undoubtedly is traffic; but it is something more, it is intercourse. It describes the commercial intercourse between nations and parts of nations, in all its branches, and is regulated by prescribing rules for carrying on that intercourse.

And again:

To what commerce does this power extend? The Constitution informs us: to commerce with foreign nations and among the several States and with the Indian tribes. It has, we believe, been universally admitted that these

words comprehend every species of commercial intercourse between the United States and foreign nations. No sort of trade can be carried on between this country and any another to which this power does not extend. It has been truly said that commerce, as the word is used in the Constitution, is a unit, every part of which is indicated by the term. If this be the admitted meaning of the word in its application to foreign nations, it must carry the same meaning throughout the sentence and remain a unit, unless there be some plain, intelligible clause which alters it.

The object to which the power is next applied is to commerce "among the several States." The word "among" means "intermingled with." A thing which is among others is intermingled with them. Commerce among the States cannot stop at the external boundary-line of each State, but may be introduced into the interior.

It is not intended to say that these words comprehend that commerce which is completely internal, which is carried on between man and man in a State or between different parts of the same State, and which does not extend to or affect other States. Such a power would be inconvenient, and certainly is not necessary. Comprehensive as the word "among" is, it may very properly be restricted to that commerce which concerns more States than one. The phrase is not one which would probably have been selected to indicate the completely interior traffic of a State, because it is not an apt phrase for that purpose, and the enumeration of the particular classes of commerce to which the power was to be extended would not have been made had the intention been to extend the power to every description. The enumeration presupposes something not enumerated, and that something, if we regard the language or the subject of the sentence, must be the exclusively internal commerce of a State.

And here follows from the pen of this great jurist, and as the announcement of the Supreme Court, perhaps the best definition of the line which divides the State from the Federal jurisdiction which can anywhere be found. It is in the following words:

The genius and character of the whole Government seem to be that its action is to be applied to all the external concerns of the nation, and to those internal concerns which affect the States generally, but not to those which are completely within a particular State, which do not affect other States, and with which it is not necessary to interfere for the purpose of executing some of the general powers of the Government. The completely internal commerce of a State then, may be considered as reserved for the State itself.

After showing that in regulating commerce with foreign nations the power of Congress does not stop at the jurisdictional lines of the several States, but may be exercised wherever the subject exists, the court proceeds to say:

This principle is, if possible, still more clear, when applied to commerce among the several States. They join each other, in which case they are separated by a mathematical line; or, they are remote from each other, in which case other State lines lie between them. What is "commerce" among them, and how is it to be conducted? Can a trading expedition between two adjoining States commence and terminate outside of each? And if the trader's intercourse be between two States remote from each other, must it not commence in one, terminate in the other, and probably pass through a third? Commerce among the States must of necessity be commerce with the States.

Judge Cooley, in his work on "Constitutional Limitations," after referring to this and other cases on the subject, says:

It is not doubted that Congress has the power to go beyond the general regulations of commerce, which it is accustomed to establish, and to descend to the most minute directions, if it shall be deemed advisable, and that to whatever extent ground shall be covered by these directions, the exercise of State power is excluded. Congress may establish police regulations as well as the State, confining their operations to subjects over which it is given control by the Constitution.—(Cooley on "Constitutional Limitations," § 886.)

The very question now under consideration is discussed and decided by Mr. Justice Miller, of the Supreme Court of the United States, in the case of *Clay vs. the Clinton Bridge Company*, reported by the

American Law Register in January, 1868. From the very able and conclusive opinion in that case we quote as follows:

Navigation, however, is only one of the elements of commerce. It is an element of commerce because it affords the means of transporting passengers and merchandise, the interchange of which is commerce itself. Any other mode of effecting this would be as much an element of commerce as navigation. When this transportation or interchange of commodities is carried on by land, it is commerce as well as when carried on by water, and the power of Congress to regulate it is as ample in the one case as in the other. The commerce among the States spoken of in the Constitution must, at the time that instrument was adopted, have been mainly of this character, for the steamboat, which has created our great internal commerce on the rivers, was then unknown.

Another means of transportation, equal in importance to the steamboat, has also come into existence since the Constitution was adopted: a means by which merchandise is transported across States and kingdoms in the same vehicle in which it started. The railroad now shares with the steamboat the monopoly of the carrying trade. The one has, with great benefit, been subjected to the control of salutary Congressional legislation, because it is an instrument of commerce. Is there any reason why the other should not? However this question may be answered in regard to that commerce which is conducted wholly within the limits of a State, and is therefore neither foreign commerce nor commerce among the States, it seems to me that where these roads become parts of great highways of our Union, transporting a commerce which embraces many States, and destined, as some of these roads are, to become the channels through which the nations of Europe and Asia shall interchange their commodities, there can be no reason to doubt that to regulate them is to regulate commerce both with foreign nations and among the States; and that to refuse to do this is a refusal to discharge one of the most important duties of the Federal Government. As already intimated, the shackles with which the different States fettered commerce, in their selfish efforts to benefit themselves at the expense of their confederates, was one of the main causes which led to the formation of our present Constitution. The wonderful growth of that commerce, since it has been placed exclusively under the control of the Federal Government, has justified the wisdom of our fathers. But are we to renit the most valuable part of that commerce again to the control of the States, and to the consequent vexations and burdens which the States may impose through whose territories it must be carried on? And must all this be permitted because the carrying is done by a method not thought of when the Constitution was framed? For myself I must say I have no doubt of the right of Congress to prescribe all needful and proper regulations for the conduct of this immense traffic over any railroad which has voluntarily become part of one of those lines of inter-State communication, or to authorize the creation of such roads, when the purposes of inter-State transportation of persons and property justify or require it.

The recent decision of the Supreme Court in the case of the State freight tax (15 Wallace, 232) seems to the committee entirely conclusive of the question we are considering. In that case inter-State commerce by railway was held to be the subject exclusively of congressional control and regulation, and a statute of the State of Pennsylvania was held to be unconstitutional and void because it attempted to do that which the court held to be in the nature of a regulation of that commerce. The regulation attempted by the State was in the shape of a tax upon freight carried by any railroad or other transportation company "doing business within the State of Pennsylvania." The court held that this was a regulation of commerce, and being such, in so far as it applied to inter-State commerce, it was unconstitutional. The opinion in this case is itself an admirable and exhaustive treatise upon the very question we are considering. Its conclusion is that the State can make no law in the nature of a regulation of commerce which can apply to "freight taken up within the State and carried out, or taken up in other States and brought within her limits." In delivering the opinion of the court, Mr. Justice Strong said:

Beyond all question the transportation of freight or of the subjects of commerce for the purpose of exchange or sale is a constituent of commerce itself. This has never been doubted, and probably the transportation of articles of trade from one State to another was the prominent idea in the minds of the framers of the Constitution when to Congress was committed the power to regulate commerce among the several States. * * * Nor does it make any difference whether this interchange of commodities is by land or by water. In either case the bringing of the goods from the seller to the buyer is commerce.

It is by no means important, in order to establish the power of Congress to pass the bill reported, that it should be made to appear that the power of Congress over inter-State commerce is exclusive. The power is ample, whether it be exclusive or not. But it seems to the committee that the case first cited is conclusive of the question, and leaves no doubt that the power of Congress is exclusive. Upon this point the court say:

It is not necessary to the present case to go at large into the much-debated question whether the power given to Congress by the Constitution to regulate commerce among the States is exclusive. In the earlier decisions of this court it was said to have been so entirely vested in Congress that no part of it can be exercised by a State. It has indeed often been argued and sometimes intimated by the court that so far as Congress has not legislated on the subject the States may legislate respecting inter-State commerce. Yet, if they can, why may they not add regulations to commerce with foreign nations, beyond those made by Congress, if not inconsistent with them? for the power over both foreign and inter-State commerce is conferred upon the Federal Legislature by the same words; and certainly it has never yet been decided by this court that the power to regulate inter-State as well as foreign commerce is not exclusively in Congress. And again the court says: "The rule has been asserted with great clearness that whenever the subjects over which a power to regulate commerce is asserted are in their nature national, or admit of one uniform system or plan of regulation, they may justly be said to be of such a nature as to require exclusive legislation by Congress. Surely transportation of passengers or merchandise through a State, or from one State to another, is of this nature."

These authorities leave no room for doubt concerning the power of Congress to regulate that commerce among the several States which is now carried on by means of railroads. They establish conclusively that the power of Congress extends to all commerce which concerns more than one State, and that it necessarily includes the carrying of freight and passengers from a place in one State to a place in another State. It reaches and controls that commerce which is beyond the reach of any single State because not completely internal within any one State.

The consideration of the second proposition is here omitted as less important.

For the financial condition of the United States, see the article FINANCES. For the foreign relations of the country, see the President's message in PUBLIC DOCUMENTS, and the title DIPLOMATIC CORRESPONDENCE. For the military and naval affairs of the country, see ARMY AND NAVY respectively; and for the general condition of internal affairs, see CONGRESS and the several States.

The emigration to the United States in 1878 amounted to 487,004, and was of greater magnitude than that of any preceding year, except 1872, when the number of alien passengers that arrived was 449,488. This makes the total number of immigrants, who have come to the United States since 1820, 8,808,141, which, with the estimated number of arrivals prior to that date (250,000) makes 9,058,141 as the aggregate number of aliens who have come from foreign countries to our shores. It is calcu-

lated that one and two-third per cent. must be deducted from this number for those not intending to remain in the United States. This leaves 8,907,172 as the number of aliens permanently added to the population of the United States from the formation of the Government to the beginning of 1874. The countries represented in the emigration to the United States, with the number arriving from each in 1873, and during the period from 1820 to 1874, are shown in the following statement:

FROM	1873.	1820 to 1873 (inclusive).
Great Britain and Ireland.....	159,355	4,319,048

Deduct citizens of the United States.....	867,630
Aliens.....	8,808,141

The entire number of passengers from foreign ports who landed at the port of New York in 1873 was 816,956, of whom 266,818 were aliens, and 550,138 were citizens or persons who had before landed at this port. The number of those who landed at Castle Garden, and thus came under the immediate care of this Board, was 268,288. Of these, 252,982 were aliens; 1,839 were born in the United States; 11,247 had previously landed at other ports in the United States. Of the whole number of aliens who arrived, 104,214 were from Germany, 68,612 from Ireland, 33,189 from England, 8,892 from Scotland, 8,090 from Sweden, 6,847 from Italy, 6,417 from Norway, 6,859 from Austria, 6,102 from France, 4,287 from Holland, 3,759 from Denmark, 2,979 from Switzerland, 2,406 from Poland, 1,817 from Russia, 648 from Belgium, 621 from Wales, 517 from Luxemburg, 345 from West India, 221 from Spain, 119 from South America, 71 from Canada, 69 from China, 69 from East India, 58 from Mexico, 26 from Central America, 24 from Turkey, 15 from Portugal, 14 from Nova Scotia, 14 from Greece, 13 from Australia, and 10 from Africa.

The destination of 95,951 was the State of

New York, 43,982 the Middle States, 98,928 the Western and Northwestern States, 23,468 the Eastern States, 2,703 the Southern States, 3,201 Canada, and 33 South America.

UNIVERSALISTS. The following is a summary of the statistics of the Universalist Churches in the United States and the British Provinces, as they are given in the *Universalist Register and Almanac* for 1874:

STATES, ETC.	Parishes.	Families.	Churches.	Church Members.
Alabama.....	9		9	324
Arkansas.....	12		12	40
California.....	1		1	75
Canada.....	13	150	6	352

The number of associations reported is 74; number of ministers, 657; of Sunday-schools, 661; of members of Sunday-schools, 54,582; number of meeting-houses, 761; estimated value of the same, \$7,845,447.

The following is a list of the educational institutions of the Universalists, with the number of students in each: Tufts College and Tufts Divinity School, College Hill, Mass., 80 students; Lombard University, Galesburg, Ill., 100 students; St. Lawrence University and Canton Theological School, Canton, N. Y., 79 students; Smithsonian College, Logansport, Ind., 90 students; Buchtel College, Akron, Ohio, 200 students; Liberal Institute, Clinton, N. Y., 125 students; Westbrook Seminary, Deering, Me., 175 students; Green Mountain Perkins Academy, South Woodstock, Vt., 53 students; Goddard Seminary, Barre, Vt., 80 students; Liberal Institute, Jefferson, Wis., 60 students; Dean Academy, Franklin, Mass., 90 students; Mitchell Seminary, Mitchellville, Iowa, 63 students; total, twelve literary and two theological

cal schools, 1,195 students. Ninety-eight professors and teachers were employed in these institutions in 1873. The estimated value of their assets was, in round numbers, \$2,295,000.

Five weekly newspapers, one bi-weekly periodical, one monthly, one literary and religious monthly periodical, one quarterly review, and three Sunday-school papers, are published in the interest of the Universalist denomination. The Universalist Publishing-House at Boston was founded in 1862, and has net assets amounting to \$37,976.09. It owns the title and copyright of 119 volumes, and publishes six periodicals.

The General Convention, embracing the United States and British Provinces, meets annually on the third Wednesday of September. It was incorporated March 9, 1866. It is composed of the presidents (or in their absence, the vice-president) and secretaries of the State Conventions, together with delegates from State Conventions, in the following proportion, viz.: 1. Every State Convention regularly admitted to fellowship is entitled to one clerical and two lay delegates. 2. If it have in its fellowship an aggregate of fifty parishes and clergymen, it is entitled to two clerical and four lay delegates; and for every additional fifty parishes and clergymen, to one clerical and two lay delegates. 3. If there be one or more organized parishes in a State where there is no convention, said parish or parishes may choose one delegate, who shall be entitled to full membership in the General Convention; provided, however, that to be counted on this basis of representation every parish must maintain its legal existence and support public worship, and every clergyman must be actively engaged in the work of the ministry, unless disabled by years or sickness. The General Convention is the court of final appeal in all cases of dispute and difficulty between State Conventions, and in all cases of discipline and questions of government not provided for and settled by subordinate bodies. It has original jurisdiction in States and Territories where no conventions are organized.

The General Convention of Universalists in the United States met at Washington, D. C., September 16, 1873. The Rev. A. A. Miner, D. D., was elected president. The treasurer reported that the aggregate amount of the Murray Centenary Fund in his hands on the 10th of September was \$120,939.44; and that the Ballou Centenary Fund had remained in its original form, but was steadily accumulating interest, which will be added to the principal when received. The Murray Centenary Fund was originated by the General Convention of 1869, which proposed to raise under that name a permanent fund of \$200,000, the income of which should be expended in aid of theological students, the distribution of the denominational literature, and in church extension. The Ballou Centenary Fund consists of a gift of \$100 from Mr. R. A. Ballou, with

compound interest from September 30, 1870. The treasurer also reported that by the bequest of the late John G. Gunn, of Nyack, N. Y., the sum of \$8,000 had been placed in the charge of the Board of Trustees, the income from which is to be applied to the relief of clergymen or their families requiring aid. The principal of the fund was invested in full. The aggregate receipts of the treasurer for the year had been \$850 more than the receipts for the previous year. The indebtedness of the convention was now \$22,500, having been diminished \$6,000 during the year.

The income from the missionary boxes since the 4th of March had been \$2,469.40. This was not as large a return as the trustees had hoped for, but they declared that their faith in the boxes was unimpaired. The convention determined, in order to promote the efficiency of the boxes by making their aim as definite as possible, that the receipts obtained through them should be applied to the works in aid of theological scholarship, and that if the amount collected should exceed the necessary disbursements for those purposes, the surplus should be applied to the Murray Centenary Fund. A committee of five persons, three of whom were women, was appointed to take charge of the boxes.

One hundred and sixty-five parishes had taken the annual collection. Adding individual contributions, the amount raised by this means, was \$3,867.44. The trustees of the convention, in referring to this subject in their report, suggested that the minds of the people were perplexed by the pressing upon their attention of too many objects of benevolence at once. In this fact, they saw another argument for the completion of the Murray and other special funds.

Ten scholarships had been granted since the last session of the convention, and twelve students had been graduated. Thirty-nine scholarships had been in force during the year, at a cost to the convention of \$6,000.

The statistical returns of the denomination in the hands of the officers of the convention were pronounced so meagre that any statement which could be made on the subject would be of little value. It appeared that there were more parishes than ministers, and that for this reason the progress of the denomination was greatly retarded. A code of regulations was adopted for the licensing of lay preachers. Statistical returns of Sunday-schools were presented. Sunday-school institutes, described as "large and enthusiastic," had been held at Providence, R. I., Worcester, Mass., Waterville, Me., and at several places in the West. The committee appointed at the previous session of the General Convention to prepare a system of lessons for Sunday-schools, recommended the adoption of the "International Series."

Buchtel College, Akron, Ohio, was formally dedicated on the day succeeding the close of

the session of the General Convention of 1872. The theological schools were represented to have made an honorable record, notwithstanding they were young and scantily endowed.

The following resolutions were adopted, pertinent to the meeting of the Evangelical Alliance which was to be held in New York in October:

Whereas, The Evangelical Alliance is about to hold sessions in New York; and—

Whereas, So far as we can understand the terms of the call and the objects of the meeting, we should be represented in it; therefore—

Resolved, That a committee of three, of whom the president of this convention shall be one, be appointed to represent the Universalist Church in said meeting.

The Rev. Drs. Miner, of Boston, Chapin, of New York, and Ryder, of Chicago, were appointed to this committee.

In commenting on this action, the *Christian Leader*, of which Rev. Dr. Chapin was editor, said that it was taken, "not with any view to force on the Alliance the consideration of an unwelcome question, nor, on the other hand, with any desire to procure notoriety; but solely because it was the profound conviction of the delegates present, that there is no essential to a true evangelical faith, or character, in which the Universalist body is deficient; and that, in such a state of facts, self-respect, equally with regard for the honor and reputation of the Protestant branch of the Christian Church of the time, demands that we claim recognition."

A resolution was adopted declaring the traffic in intoxicating liquors as a beverage to be contrary to Christian morality, injurious to the Church of Christ, and hurtful to the best interests of humanity; and that it should, therefore, be prohibited by statute, not only by the several States of the Union, but also by the General Government in all the domains over which its control extends.

The annual meeting of the Women's Centenary Association was held at Washington, D. C., September 17th. The treasurer's report showed that nearly \$19,000 had been raised by the Association during the past year, the record of its existence. The Association resolved to prosecute its purposes with undiminished vigor, with full faith in its power to be a mighty instrumentality in promoting the best interests of the Universalist Church.

URUGUAY (REPÚBLICA DE LA BANDA ORIENTAL DEL URUGUAY), OF BANDA ORIENTAL, an independent state of South America, lying between latitude 30° and 30° 50' south, and longitude 52° 40' and 58° west.

The area of the republic is estimated at 84,170 square miles by Engineer José M. Reyes, but most other authorities set it down at 69,832 square miles. A statistical publication in Montevideo computes the population at 350,000, of whom 127,704 are in the department of Montevideo. The mortality in that department, in 1870, was 3,059; in 1871, 4,380; in

1872, 3,642; sixty-seven per cent. being Uruguayans, and the remaining thirty-three per cent. foreigners.

The city of Montevideo, the capital, has a population of about 60,000.

The Government is based upon the constitution proclaimed on July, 1881, by the terms of which the executive power is vested in a President, elected for a term of four years, and a Vice-President, whose term of office is of the same duration, and who is also Speaker of the Senate. The legislative power resides in a Congress, composed of a Senate and a House of Representatives, whose sessions are annual, and extend from February 15th to June 30th; the legislative power, as also the general control of the administrations being confided during the remainder of the year to a committee of two Senators and five Representatives.

The President of the Republic is Señor Don José Ellauri, who entered upon his official duties on March 1, 1873.

The Minister of Foreign Affairs is Dr. G. Perez Gomar; Minister of the Interior (including Justice, Public Worship and Instruction), Dr. S. Alvarez; Minister of Finance, J. Peñalosa; and Minister of War and the Navy, E. Fonda.

The chief articles of importation are machinery, and almost all kinds of manufactured articles, beer, ales, wines, etc.

The following table shows the imports from Great Britain for the five years therein expressed:

Years.	Value.
1868.....	\$4,652,110
1869.....	5,394,190
1870.....	4,092,025
1871.....	5,223,985
1872.....	9,068,915

The exports to Great Britain during the same period were as follows:

Years.	Value.
1868.....	\$5,691,275
1869.....	3,984,420
1870.....	4,999,625
1871.....	6,159,965
1872.....	7,064,665

V

VENEZUELA (ESTADOS UNIDOS DE VENEZUELA), an independent republic of South America, extending from latitude 1° 8' to 12° 10' north, and from longitude 58° 15' to 73° 17' west. It is bounded north by the Caribbean Sea, east by Guiana, south by Brazil, and west by the United States of Colombia.

The territory is divided into nineteen States and one Federal District: Apure, Aragua, Barcelona, Barquisimeto, Carabobo, Coro, Cumaná, Guárico, Guayana, Maturín, Mérida, Nueva Esparta, Portuguesa, Táchira, Trujillo, Yaracui, Zamora, Zulia, and the Federal District of Carácas.

The area is computed at 468,886 square

The single article hides stands in each of the foregoing years for about one-half the total value.

There are two railways in the republic: that from Montevideo to Florida, about forty miles, opened in 1869; and that from Montevideo to Tupando, about fifteen miles, opened in 1873.

The estimated budget for 1873 was: revenue, \$6,796,000; expenditures, \$6,623,758, to be devoted to the conversion of the public debt (the twelve per cent. and nine per cent. portions) into a new debt to be negotiated in Europe, and to be applied likewise upon the regulation of the floating debt, and the reestablishment of equilibrium in the national budget.

The total custom-house receipts in 1870 were \$4,538,854; in 1871, \$5,312,318; and in 1872, \$7,207,907.

From an official publication by the "*Junta de Crédito Público*," on January 1, 1873, the public debt would appear to have been at that time \$41,481,235.

Since the creation of the debt in 1859, the Government has paid \$10,805,406 upon the capital, and \$12,153,955 of interest, amounting to a total of \$22,459,361.

In the second half of the year the elections for Senators were held with the greatest tranquillity.

A number of military chiefs of the republic, who had served in the revolutionary army of Jordan (*see ARGENTINE REPUBLIC*), found on their return that they had been dismissed from the Uruguayan service; incensed at this measure, they threatened to recover by force their restoration to the army; and it was apprehended that a revolutionary outbreak would take place in their favor. Cholera appeared among the immigrants in December; some 500 cases were reported, most of which terminated fatally. The port of Montevideo was immediately closed to all shipping; and all measures possible were used to prevent the spread of the malady.

miles; and the population at 1,400,000, of whom about one per cent. are whites, the only pure race in the republic. The bulk of the population are mestizoes, from the union of whites and Indians; mulattoes, from whites and negroes; and zambos, from Indians and negroes.

Carácas, the capital, has about 50,000 inhabitants; some 4,000 of whom are foreigners. Other important towns are Maracaibo, 20,000; Ciudad-Bolívar, 15,000; Puerto Cabello, 12,000; and Lagnayra, 8,000.

The President of the Republic is General A. Guzman Blanco. He was elected on February 20, 1874.

The *Primer Designado*, or First Substitute, is General F. Linares Alcántara; *Segundo Designado*, General Z. Crespo, both appointed May 16, 1873; President of the High Federal Court, P. Casanova.

The cabinet consists of the following ministers: Interior and Justice, General J. G. Ochoa; Foreign Affairs, General J. Gutierrez; Finance, S. Goeticosa; Public Works, M. Urbaneja; Public Credit, Simental y Roth; and War and the Navy, General L. Gil. This cabinet was formed June 30, 1873.

The Governor of the Federal District is J. M. Paul.

Archbishop of Carácas (*vacant*).

Apostolic Vicar, A. Baralt.

The ranks of the army are virtually recruited by impressment, although volunteering is the system prescribed by law. The present Government promulgated, in February, 1873, an act rendering military service obligatory both in the regular army and the militia; each State is required to furnish its contingent, which shall be renewed annually to the extent of one-fourth of its number. The term of service is four years. The effective strength of the army for 1873-'74 is to be 8,000 men.

The navy is made up of six wooden steam-vessels, of an aggregate tonnage of 8,500, and 780 horse-power, and mounting 21 guns; besides a few armed small-craft.

The commerce of Venezuela is insignificant as compared to the vast extent and capabilities of the country; an effect due to three principal causes: frequent civil wars, indolence, and a too sparse population. The chief staples of export are coffee, cacao, dye-stuffs and dye-woods, cotton, etc., most of which last is taken by Great Britain.

The following shows the value of the exports to England in the five years, 1868-'72 inclusive:

Years.	Value.
1868.....	\$154,015
1869.....	356,625
1870.....	409,575
1871.....	297,575
1872.....	613,105

The imports from the same country for the same period, were as follows:

Years.	Value.
1868.....	\$1,325,490
1869.....	2,171,030
1870.....	721,935
1871.....	1,554,990
1872.....	2,454,000

Cotton fabrics comprise far more than one-half the value of the imports in the years just mentioned.

The largest trade is with Germany; next in order are England, France, and the United States. To the last country raw-sugar (*papelón*) has been exported for a few years past.

The ports open to foreign commerce are Laguayra, Puerto Cabello, Maracaibo, and Ciudad-Bolívar, the last two having likewise a transit-trade with the United States of Colombia.

The duty on imports is in many cases equal

to about 100 per cent. of the value of the merchandise. There is no export duty.

Venezuela is the most backward of all the Spanish-American republics in highways and means of communication between the producing centres and the seaports. The present Government has, however, inaugurated some praiseworthy improvements in this respect.

Four regular lines of European steamers visit the different ports, and there is monthly steam communication with New York.

In the budget for 1873-'74, the revenue was represented at \$3,549,000 (\$2,810,000 of which was expected from imports and duties); and the expenditure at \$3,642,844, constituting a deficit of \$93,844.

The public debt was stated at \$120,804,560 in 1871, exclusive of a large indebtedness consisting of indemnities for damage during the civil war since 1870, and other liabilities not yet determined; by all of which the total amount of the debt would probably be raised to little less than \$250,000,000 at the end of 1873. As no payments of either capital or interest have been made for several years, the republic is virtually bankrupt. A law was promulgated on November 30, 1872, appropriating 10 per cent. of the national revenue to the payment of interest on the foreign debt, amounting at that time to £2,000,000. The conversion of this debt into a single emission of the same amount was proposed to the London creditors in July, 1873. In case their sanction should be granted, the interest would commence from January 1st of the same year, and be paid semi-annually in Carácas as prescribed by the bondholders.

VERMONT. The financial condition of this State appears to be remarkably prosperous. At the end of the last fiscal year, August 1, 1873, the whole amount of her funded debt, including \$187,000 of registered loan and coupon bonds of various sums, maturing on December 1, 1874, 1876, 1878, and June 1, 1890, respectively, was \$438,000. The largest one of three loans, amounting to \$135,500, and maturing the last of all, is held by the State, and there is in the sinking fund \$101,851.02, to meet as much of the rest—the deduction of which two items from the above-mentioned sum reduces the actual amount of the State indebtedness to \$195,049.

The State receipts from all sources during the year 1873 amounted to \$869,084.24; and the aggregate expenditures to \$628,262.17; leaving in the Treasury an available surplus of \$240,772.07.

The current liabilities of the State, at the beginning of the new fiscal year, were \$30,881.38; and the current resources, including \$5,255.25 due on taxes of 1872, amounted to \$246,027.32; showing an excess of resources over liabilities of \$215,145.99.

The revenue from State taxes assessed for the year 1872, after deducting abatements and collection fees, was \$443,408.50. The net

amount collected on the same class of taxes for 1871 had been \$504,184.68.

At the close of the year 1873, there was enough on hand of the unexpended appropriation previously made to cover all the State bonds which mature in 1874; so that no moneys need be voted except for ordinary current expenses until 1876.

During the panic which broke out in September, 1873, the creditors of the State of Vermont manifested such a feeling of security in her promises to pay, that in the course of two months from the beginning of the panic, while securities of all sorts were thrown by their possessors on the market for the purpose of converting them into money, or of getting rid of them, the Treasurer of the State sought to buy her outstanding bonds, but was unable to find any of them for sale, except \$5,000 in Baltimore.

The four towns here-below named were considered to be comparatively the wealthiest of all in the State, as in the official returns for the grand list they figured highest in proportion to the number of their respective inhabitants: Charlotte—population 1,480, grand list \$9,119.92, for each person \$6.80; Addison—population 911, grand list \$5,600.24, for each person \$6.14; Shoreham—population 1,225, grand list \$7,507.47, for each person \$6.12; Orwell—population 1,192, grand list \$7,168.46, for each person \$6.01. Randolph, which used to be reported as the richest town in Vermont, is now returned as having a population of 2,229, and a grand list of \$10,606.64, or \$3.74 for each person.

The expenditures of the State for the education of her youth, and the condition of the public schools with regard to the manner in which they are conducted and provided for, appear not to stand on a settled basis. The schools are supported wholly by taxation, and this is not uniform, but exceedingly unequal; the highest rate of school taxation being three hundred per cent., the lowest one per cent. on the grand list; which inequality seems likely to render the schools in the State extremely unequal in respect to the efficiency of their educational results, and the number of pupils attending them. In 1872 the number of children of school age in Vermont was reckoned at 85,000, about 74,000 of them being considered to have attended the public schools. The expense of such schools in 1872 amounted to \$500,000; and \$1,500,000 are invested in school property. The expense of schools was defrayed by the United States deposit fund, and by town and district tax; the last-named tax having provided for two-thirds of the expense. One hundred and twenty-two school districts had no tax; 190 terms were taught with an average of only five pupils; and 1,009 terms averaged less than ten pupils.

The Vermont State Teachers' Association, whose organization is of twenty-three years' standing, held their annual meeting at Rut-

land on the 30th and 31st of January, 1873, 148 teachers being in attendance. A large number among them addressed the meeting, and many a subject was discussed concerning public instruction in general, and its several branches in particular. One of the addresses treated of the present system of taxation for the support of schools, pointing out some of the evil effects produced by its want of uniformity. As a remedy, the speaker proposed a plan whereby "a State tax of 26 mills on the dollar, and a poll-tax of \$2 should be levied for the support of schools."

Normal schools have been established at several places in the State, and are in successful operation, especially the one at Randolph. The regular teaching force in this school consisted of the principal and four assistants; and the students who attended it during the four quarters of 1873 numbered 460, a larger attendance than at any previous time. These schools are not under the direct and full control of the State, although she favors them, and promotes their interest by pecuniary contributions to pay for tuition; State aid being intended as a help to those who would devote themselves to teaching, but whose circumstances do not permit them to pursue their studies, and qualify themselves for that purpose. At the last session, the General Assembly gave each of the normal schools in the State an additional appropriation of \$500, to be expended under the direction of the Board of Education. The board directed this amount to be used in the payment of the teachers.

The Vermont Asylum for the Insane, at Brattleboro, also, is not under the direct control of the State, but is conducted under the management of trustees acting in the name and behalf of a private corporation, although the State has contributed much more largely than private persons to its establishment.

Upon complaints made about matters vitally affecting the interests and object of such an institution, the General Assembly, at its last session, appointed a special joint committee, composed of two Senators and two members of the House of Representatives, to examine into the affairs of the asylum, so as to ascertain its condition in all respects, and report. The committee, after having by personal inspection, the hearing of witnesses, and other means of information, acquired all the knowledge which they were able to collect in regard to the financial condition of the asylum, and its interior management, more especially in the treatment of its inmates, stated the result of their labors in a report, the substance of which is as follows:

In 1834 Mrs. Anna Marsh, of Hinsdale, N. H., by will bequeathed the sum of \$10,000, in trust for the purpose of founding a hospital for the insane in the county of Windham, near Connecticut River.

In November, 1834, the Legislature passed an act incorporating "The Vermont Asylum for the Insane," which act, in words, followed very nearly the language of Mrs. Marsh's will. This act is referred

to and made a part of the report. In 1835 the State, by the act of their Legislature, gave \$10,000, to be paid in five annual installments of \$2,000 each. In 1836, the State granted an additional \$2,000. In 1837, \$4,000. In 1840, two annual installments of \$2,000. In 1843, \$3,000; making, in all, \$23,000. We do not find, since the gift in 1843 by the State, of \$23,000, that any considerable donation has been made to the institution by the State, or by any corporation, or by private individuals; hence, the present property of the institution has grown from the fund of \$23,000, received previous to 1844. In 1865 the centre building and wings of the institution were burned. They were immediately rebuilt, and again occupied. The expense of rebuilding was about \$40,000. The whole cost of the institution, as reported by the Commissioner for the Insane, in his biennial report of 1873, was \$234,870.60, including 1,300 acres of land. The present value of the property, as estimated by one of the trustees, is \$500,000. The committee estimate it at a very considerable excess of that amount. The interest of the State in this vast property is simply that, by the acts of 1840 and 1843, if it ceases to be an insane asylum, the State have a lien upon it for the security of the \$23,000 heretofore invested. The property is owned by a private corporation.

The number of patients found by the committee at the asylum when they first visited it, was 485. They say that "there were accommodations really for only about 300. About 75 of the patients were, at the time of the visit, confined in underground apartments, which were damp, unwholesome, and entirely unfit for occupation by human beings." They add that "the whole of the asylum was inadequately warmed and ventilated."

At the time of their last visit, June 24, 1873, the whole number of patients there was 476, of whom 80 were State poor, 200 town poor, and the rest were patients from outside the State.

The committee found the punishment known as "bathing," to have been practised at the asylum, and condemn, with indignation, the infliction of such punishment upon the unfortunate and irresponsible insane.

The method in use at the asylum for the admission of patients the committee aver to be defective and unsafe, and that serious abuses have taken place in that respect. The admission is regulated by the statute of 1855, which provides "that a medical examiner should be appointed by the Court of Chancery of Windham County, whose certificate of the insanity of any person proposed for admission should be conclusive proof of the fact." Under this statute, the court appointed the physician then superintendent of the asylum, medical examiner, which appointment opened the door for fraudulent practices on the part of some among the officers of the institution. The committee express their belief that, as a consequence of these regulations and mode of admission, "persons have been admitted to the said asylum who were not insane."

The committee recommend the repeal of the statute of 1855, and suggest the enactment of a law, instead, providing "that no person resident in the State, except such as shall be

brought, by virtue of the certificate of a court of record, and under seal, shall be admitted as a patient without the certificate of two physicians, one of whom shall be the patient's family physician; and further, that said certificate shall not be received without the additional certificate of a justice of the peace; that the physicians signing such certificate are physicians of good and regular standing; and that medical examiners be selected by the Legislature, to examine all persons from other States for admission into the asylum."

At the time of their last visit, in June, 1873, the committee found that extensive changes and improvements were being made in the asylum under the management of the new superintendent.

The death-rate of the asylum during the last ten years the committee state to have been "less than that in any similar institution in New England, except the one at Concord."

Of much greater importance was the investigation intrusted to another joint committee by the Legislature at the last session. Rumors of bribery having been circulated, and specific charges of corruption published, implicating several members of the Legislature and the State courts, with reference to the management of certain railway lines and the interests of other corporations connected with them, the General Assembly deemed an official inquiry into the grounds of the alleged facts necessary; and, to that end, both Houses adopted the following resolutions:

Resolved by the Senate and House of Representatives: That a committee of three Senators and three members of the House be appointed respectively by the President of the Senate and Speaker of the House, to inquire whether or not it is true that in A. D. 1869, or at any time before or since, money was paid directly or indirectly by any trustee, receiver, manager, officer, or agent of any railroad or railroad company in this State, to any member of either House of the Legislature, for the purpose of influencing legislation; whether or not it is true that under any power derived from either branch of the government of this State, any person connected with the aforesaid railroads or companies, has practised frauds or peculations; and finally to investigate fully all and singular all the matters above referred to, and said committee to have power to send for persons and papers, and to employ counsel to prosecute the investigation to its fullest extent and to make report to the present session of the Legislature.

Also to inquire whether any members or officers of either House of this General Assembly have written or aided in procuring to be published, the articles in the *Boston Traveller* touching any measure now pending before this Legislature. Also whether any members or officers of either House of this General Assembly are in the pay and employment of any individuals opposed to the passage of any such pending measures; also "to pursue their investigation after the adjournment of the General Assembly, and make their report to the Governor on or before the first day of July next."

The joint committee presented to the Governor a detailed report on the several matters inquired into.

The charges made against the members of the Legislature are thus stated in the report:

One branch of our inquiry, and the one which more than all others occasioned this investigation, was in reference to the legislative corruption, to which the public attention had been called by the publication of the "Hatch voucher," so called, in the *Boston Traveller*, and other newspapers. This voucher purported to be a statement of a special account rendered by J. D. Hatch, December 6, 1869, against the trustees and managers of the Vermont Central and Vermont & Canada Railroads, and a receipt for the payment of the same. The sum charged by Hatch was \$1,000, and in his account rendered he stated that it was for "expenses at Montpelier, session of 1869, in resisting adverse legislation, and in preparation for and opposing application for parallel road from Burlington to Canada line, etc.;" and in his account accompanying this general statement, it appeared that at or near the close of the session he had paid several prominent members of the Legislature each the sum of \$50, and had also paid money to attorneys not members of the Legislature.

As to the truth of the corruption charged, "the committee find that the list of names was made by Hatch as a memorandum in 1869, and comprised the names of gentlemen who had been employed professionally in the interest of the Vermont Central Railroad, together with those who were thought to be friendly to its interests;" that "all those who received the money in 1869, as appears by this voucher, were attorneys, except one who was not a member;" and concluding:

In respect to those gentlemen, we do not find that any of them received the money believing it was paid for any services they had performed, or were to perform for this railroad in their official capacity, but on the contrary supposed that the reason assigned for their employment was as stated by Hatch, for the purpose of retaining them in a legitimate and proper manner, and placing them under obligation to render for the railroad such professional services as they might be called upon thereafter to perform. * * * We do not find that any particular measures before the Legislature were passed or defeated in consequence of these retainers; or that legislation has been improperly influenced thereby; but we believe it to be our duty to condemn the practice of employing more attorneys in different parts of the State than would be necessary to transact their legal business, as one calculated to impair the confidence of the public generally in the purity of our legislation.

The various material interests of the State appear to be increasing in real prosperity; prominent among them being the agricultural. Besides the Vermont State Agricultural Society, with which is connected the Wool-Growers' Association, there are also agricultural county societies. Among the branches of farming, the dairy receives particular attention in Vermont; those who are devoted to this industry having organized themselves into a distinct body—the Dairymen's Association. These societies hold regular meetings which are numerously attended and sometimes continued several days. Granges of Patrons of Husbandry are also being organized in different sections of the State.

A report was published in January, 1873, exhibiting the result of observations made at Montpelier on meteorological phenomena, and

recorded as they occurred during the years 1871-'72; from which it appears that the number of stormy days in 1871 was 97, distributed among the twelve months in unequal proportions, the least belonging to September, 4 days; the largest, to July 14 days. In 1872, their number was 180, of which 97 occurred within seven, and 83 within five of the twelve months, not counted in succession as they run in the year. December was the most stormy, 18 days; April, the least 4 days.

In 1872 there were eighty-two rain and forty-eight snow storms.

The warmest day in 1871 was June 8th, 106° above zero; the coldest days were January 8th and December 21st, 24° below zero. In 1872 the warmest day was June 29th, 105° above zero; the coldest, December 25th, mercury congealed.

On December 25, 1873, the mercury, at East Calais, sank to 38° below zero.

In the interest of the soldiers from Vermont who were engaged in the late civil war, the State Treasurer has compiled from official records and published early in April, 1873, a pamphlet of 140 pages, containing a complete statement of the amount due from the State to each of the said soldiers. The pamphlet is got up in tabular form, giving the regiment, company, and name, of each soldier having balances remaining in the State Treasury. It also designates whether that balance is on account of *extra* State pay, allotted United States pay, or for interest on allotted pay. The pamphlet contains the names of over three thousand soldiers and the sums due them, respectively; these sums varying from 46 cents up to \$262.93.

VERPLANCK, ISAAC A., a New York jurist, Chief Judge of the Superior Court of Buffalo, born in Coeyman's, Albany County, N. Y., October 16, 1812; died April 16, 1878. He graduated from Union College in 1831, studied law and practised in Batavia from 1834 to 1847, when he removed to Buffalo, where he resided until his death. In 1854 he was elected one of the Judges of the Superior Court of Buffalo, and was made chief thereof by his associates. He discharged his judicial duties with ability and unimpeachable integrity, and was twice reelected. Judge Verplanck was one of the ablest members of the Constitutional Convention of 1867-'68, and was widely known and esteemed by the people as well as by the members of the legal profession in Western New York.

VIRGINIA. The Legislature which assembled during the first week in January, adjourned after a session of about three months. In this time there was passed a large number of acts, which, however, were mostly of local importance.

An act was passed to provide for the payment of interest on the public debt, the most important provisions of which are contained in the following sections:

2. There shall be paid when demanded, after the passage of this act, and on the first day of July, 1873, two per centum interest upon the principal of the public debt, bearing an interest of six per centum per annum, as evidenced by bonds issued under the provisions of the act approved March 30, 1871; and upon that part of the public debt bearing an interest of five per cent. there shall be paid at the same time one and two-thirds per cent., and upon two-thirds of the debt, the securities representing which have not been changed since the thirtieth day of March, 1871, there shall be paid a like interest: *Provided*, That the interest herein directed to be paid, except as hereinafter provided, shall be limited to interest falling due in the year 1873.

3. Upon the payment into the Treasury of the interest falling due on the first of January, 1873, as hereinafter provided, it shall be the duty "of the Auditor of Public Accounts, the Second Auditor, and Treasurer," who are hereby constituted a board for that purpose, to ascertain and determine, having regard to the surplus in the Treasury, the accruing revenues as well as the demands against the Treasury for interest, payable on the first of July, 1873, and the amount necessary for the support of government; what amount may be paid upon the unpaid interest falling due first of January, 1872, and first of July, 1872. And after they have so ascertained and determined, it shall be the duty of the Auditor of Public Accounts to pay said amount into the Treasury, subject to the warrant of the Second Auditor, and the same shall be paid in accordance with the provisions of this act; the amounts hereinafter provided being all the Commonwealth is able to pay at this time.

By the same act it is made the duty of the Second Auditor, upon the payment of the interest provided for, to issue and deliver to creditors non-interest bearing certificates for that portion of the interest due and remaining unpaid; and where interest shall be paid and certificates given for interest due upon coupon bonds, to take in, cancel, and file away in his office the interest coupons so paid or redeemed.

He is also required, upon request of such creditors of the State as have received or may receive interest upon their debts under the provisions of this act and the act in force March 19, 1872, entitled an act to provide for the payment of interest on the public debt, to issue and deliver to them interest certificates, in accordance with the provisions of this act, for such portions of the interest due and withheld on the first days of January and July, 1872; and when such certificates shall be demanded for unpaid interest upon coupon bonds, to receive, cancel, and file away in his office the interest coupons so paid and redeemed.

The legal rate of interest, in the absence of an agreement, was fixed at six per cent. per annum; but a rate not exceeding eight per cent. may be agreed upon and collected.

A bill was passed providing for the establishment of a Board of Immigration, and appropriating \$5,000 as an "Immigration Fund" to be used partly in preparing "a geographical and political summary from such reliable authorities as may be had, setting forth an accurate description of the territory of this State and of its form of government; that the said summary shall especially describe the various character of its soil, its productions, its climate,

and its population; that it shall also set forth an account of its mineral resources, of its universities, its colleges, its public free-school system, its religious advantages, and an account of its various lines of travel and transportation by water and by railroad." This report is to be published and sold at cost.

The political campaign of the year was attended with unusual excitement, and, from the fact that the colored voters were all in the Republican ranks, the contest was regarded by some as one between the black and the white race for the control of the government; the former supporting the Republican party, which was stoutly opposed by the Democrats.

The Republican Convention assembled at Lynchburg, on the 30th of July. About one half of the delegates were colored. Colonel Hughes was nominated for Governor. The platform adopted was as follows:

The Republicans of Virginia, in State Convention assembled, do now formally announce their principles to the voters of the Commonwealth. They reaffirm and reiterate their platform of 1872. They indorse and approve the Administration of President Grant in the past, and pledge it their support for the future.

1. That we are in favor of the *ad-valorem* system of taxation, as adopted by the State Convention, as the only just and equitable system, and pledge ourselves to its support and enforcement.

Resolved, That the tide-water population of the State have paid without complaint the taxes necessary for the support of the State debt contracted for public improvement, from which they derive no local advantage, and are entitled to demand a repeal of any law levying a tax upon every interest or property not general in this Commonwealth.

Resolved, That the Republican party of Virginia, through its representatives in the State and national Government, recommend the total abolition of the tax on tobacco as soon as it can be done without detriment to the national finances.

2. The greatest good for the greatest number being one of the principles of Republicans, we are in favor of such a system of public improvement as shall best secure that result. The necessities of not only Virginia, but of the whole country demand increased facilities for cheap transportation; we are, therefore, in favor of the early completion of the James River & Kanawha Canal, and call upon the Congress of the United States to take this matter into consideration at the next session, and make an appropriation for the same. Believing it to be a national necessity, it should be a national highway. We pledge the Republicans of Virginia to use every endeavor to secure its early completion. We also favor such a liberal system of railroad improvement as shall tend to develop all sections of our State, and we call upon the voters of this Commonwealth to unite with us in securing these desirable results.

3. The Republican party of Virginia, in common with the national Republican party, is opposed to all forms of repudiation, and favors such a financial policy as shall tend to the payment of the public debt of the State without being oppressive upon her citizens. We regard the expenses of our State government as disproportioned to the available resources of the people, and demand that they shall be made more fully to conform thereto. We disapprove all extra compensation, and favor economy in Government, State and national; that we deem the act known as the "funding bill" as impolitic, unjust, and oppressive, and enacted solely in the interest of bondholders, regardless of the condition of the State resources; and that we are in favor of and demand the submis-

sion of the question of the financial obligation of West Virginia to Virginia to the Supreme Court of the United States for decision.

4. We are in favor of the development of the material resources of the State, which, under the rule of the Conservative party and its predecessors, have lain dormant. The mines of coal, iron, and other minerals, the vast water-power, and the many other material resources of the State, which exist in rich profusion on every hand, need but enterprise and capital to develop them, and thus make Virginia one of the greatest manufacturing States in the Union. To this end, we are in favor of such liberal legislation as shall tend to encourage the investment of capital in mining and manufacturing operations, and of general laws for incorporation, together with such a liberal spirit on the part of our people as shall invite men of enterprise to come and dwell among us.

5. We are in favor of reform in the administration of justice in this State, and an enforcement of the State constitution in this respect, which will secure impartial justice to all, irrespective of race, color, condition, or political sentiment; we favor the election of the President, Vice-President, and all other officers of the Government, as far as possible, by the direct vote of the people.

6. We approve and indorse the noble and humane policy inaugurated by General Grant's Administration, whereby all international disputes shall be made the subject of arbitration, thereby preventing the dread havoc of war.

7. That the Federal courts shall be accessible in all the States, to all citizens on appeal for redress of wrongs, or protection of rights, in cases where, upon a proper showing, equity demands it.

8. We demand reform in State laws in order to secure fair election, by the abolition of partisan supervisors, to enable every voter to exercise the right of suffrage according to the dictates of his own conscience.

The Democrats, under the title of the Conservative party, held their State Convention in Richmond on the 6th of August. It was one of the largest and most enthusiastic meetings of the party held in the State since the war. The following platform and resolutions were adopted:

1. We, the representatives of the Conservative people of Virginia, in convention assembled, do declare that a contrast of the condition of Virginia under Conservative government with the condition of those Southern States which have been under radical rule, illustrates the wisdom of the people of Virginia in the adoption of this plan of policy, and demonstrates the necessity of continuing the powers of the State government in the control of the Conservative people of this Commonwealth.

2. That the chief purpose of the Conservative party of Virginia is to secure to every citizen of the Commonwealth, whether native or adopted, of the white or of the colored race, exact and impartial justice, and to promote, by wise and beneficent legislation, the prosperity of our whole people.

3. That the Conservative party of Virginia, disclaiming all purpose of captious hostility to General Grant, will judge him impartially by his official action, and will cordially coöperate in every measure of his Administration which may be beneficent in its design and calculated to promote the welfare of the people, and to cultivate sentiments of good-will between the different sections of the Union.

4. We recognize as a fundamental political truth, that upon the intelligence and virtue of its people must rest the prosperity, honor, and permanence of the State; we point with pride to the successful establishment and progress of the free-school system of Virginia, inaugurated and conducted under circumstances of peculiar difficulty, for which we are in-

debted to the wisdom and zeal of the Conservative State government. Liberal provision ought to be continued for the support and extension of the free schools for the white and colored races respectively.

5. That the interests of a large section of this Union, no less than those of Virginia, demand the speedy enlargement and completion of the James River and Kanawha water-line that should connect the waters of the Ohio with those of the Chesapeake, affording to the teeming population of the West cheap transportation of their products to the points of shipment and wants of trade in the East. The completion by the government of this great design of George Washington would be an additional bond of union between the communities whose products and commodities would pass over the line of this great national work.

Resolved, That in the opinion of the Conservative party of Virginia the internal revenue tax on tobacco and ardent spirits is onerous and oppressive, and ought to be repealed.

Resolved, That, in the opinion of this convention, it is as much the duty of every Conservative to vote against all independent candidates, professing to be Conservatives while running against the regular nominees of the party, as it is their duty to vote against the regular radical nominees.

Resolved, That the Conservative party disclaims any intention to impose burdensome restraints on any section, and pledges itself to correct any erroneous or mistaken legislation disturbing the harmony and welfare of the tide-water section of the State, believing that all acts imposing a tax on any interest not general in the Commonwealth should be modified and adjusted on principles of equity, and justice to all sections, reducing the tax imposed within reasonable and proper bounds.

Resolutions were also adopted changing the plan of the city and county party organization, and providing for only three members of the State Executive Committee.

The nominee of the convention for the office of Governor was James L. Kemper. He was born in Madison County, Va., in 1824, served in the Mexican War as captain, and was for ten years a member of the Virginia Legislature, being Speaker of the House of Delegates for two years. In the civil war he entered the Confederate service as colonel and attained the rank of major-general. After the close of the war he resumed the practice of the law in Madison County.

The election resulted in the success of the Conservative party. In a total vote of 214,237, Mr. Kemper received 120,738, and Mr. Hughes 93,439: majority for the former, 27,239. Robert E. Withers, Conservative, was chosen Lieutenant-Governor, over C. P. Ramsdell, Republican; and Raleigh T. Daniel, Conservative, Attorney-General, over David Fultz, Republican. The rest of the State officers were to be appointed by the Legislature which assembled in January, 1874. The political complexion of this body was as follows:

LEGISLATURE.	Senats.	House.	Joint Ballot.
Conservative.....	33	99	132
Republican	9	33	43
Conservative majority...	24	66	90

The completion of the Chesapeake & Ohio Railroad, and its opening for traffic between Richmond and Huntington, the western ter-

minas on the Ohio River, were celebrated in Richmond in February with great enthusiasm, and caused much rejoicing throughout the State. This important enterprise must have a marked influence upon the future commercial prosperity of Richmond, as well as of the entire State, as it opens another leading-through channel for freight and passengers between the West and the Eastern seaboard, giving to

Richmond advantages similar to those derived by New York from the New York Central & Hudson River, and Erie Railroads; by Philadelphia from the Pennsylvania Central, and by Baltimore from the Baltimore & Ohio Railroad. The relative all-rail distances from the principal Western and Southwestern cities and the seaboard by these several routes are shown in the following statement:

MILES TO TIDE-WATER AT—	From Chesapeake.	From Louisville.	From St. Louis.	From Memphis.	From Nashville.	From Columbus, O.	From Indianapolis.	From Chicago.
New York via New York Central.....	883	940	1,141	1,354	1,176	761	800	990
New York via Erie Railway.....	861	997	1,201	1,354	1,183	755	805	983
Baltimore via Baltimore & Ohio.....	591	699	931	1,076	884	517	705	828
Philadelphia via Pennsylvania Railroad.....	668	775	992	1,052	960	548	726	823
Richmond via Chesapeake & Ohio.....	562	645	892	982	800	564	677	832

The Chesapeake & Ohio Railroad is a consolidation of the Virginia Central and the Covington & Ohio Railroads. The consolidation dates from August 31, 1868, and the first report for the company is for the year ending October 1, 1868. The consolidation also includes the Blue Ridge Tunnel and Railroad constructed by the State of Virginia and purchased by the Chesapeake & Ohio Railroad Company.

The line of the road from Richmond to Huntington, West Va., is 421 miles. At the latter point it connects with daily lines of steam-packets on the Ohio River to Cincinnati and other leading points; at Gordonsville it connects with the railroad lines for Washington, Baltimore, and Philadelphia; and at Richmond with lines leading south to Charleston, Savannah, Wilmington, Norfolk, and with lines of domestic and foreign steamships. A branch will extend from Richmond to tide-water, for which purpose a large tunnel under Church Hill, in the city of Richmond, has been constructed. At the seaboard terminus extensive wharves, and other commercial facilities, were in process of construction.

The completion of this important enterprise will have an almost incalculable influence upon the development of the great Kanawha coal-fields, which are said to embrace upward of 8,000 square miles. There are also extensive and valuable deposits of iron-ore in the region traversed by the road.

In his report to the stockholders of the Chesapeake & Ohio Railroad Company, in November, 1873, the President, C. P. Huntington, said:

You now have a road of 421 miles which will compare favorably, as regards its grades and curvatures, and the durable character of its construction, with any other in this country. The investigations made during the past year in relation to the quality and extent of coal, iron-ores, timber, etc., existing on the line of your road have been so satisfactory as to lead to the formation of numerous well-organized companies, with ample capital, who will engage in the business of sending forward large quantities of these products to the market of the East and West, and who will also establish furnaces, rolling-mills, saw-mills, and kindred industries, on the line of the road,

giving assurance of a large and profitable local traffic in addition to the through business which your road is sure to command as soon as the necessary extensions and connections are completed for its accommodation. One of the most important is the Elizabeth-town, Lexington & Big Sandy Railroad, which is already completed and in operation from the city of Lexington to Mount Sterling, and with the Louisville, Cincinnati & Lexington road, forms a continuous line from Louisville to the latter place, a distance of 127 miles. Eighty-eight miles between Mount Sterling and the Big Sandy remains to be built, and when that is done these roads, with the Chesapeake and Ohio, will be operated in one general interest, as they are controlled by substantially the same parties, and will form a continuous line from Richmond to Louisville, there to connect with the system of Western roads.

The earnings and expenses of the road for the year ending Sept. 30, 1873, were as follows:

EARNINGS.	
From passengers.....	\$449,488 21
From freight.....	710,384 97
From express.....	14,021 05
From mail.....	31,165 67
From miscellaneous.....	2,446 02
Total.....	\$1,210,508 92

EXPENSES.	
Train expenses.....	\$244,687 12
Depot expenses.....	87,907 26
General expenses.....	19,579 16
Losses and damages.....	21,881 73
Maintenance of way.....	290,125 03
Repairs of machinery.....	141,113 33
Salaries.....	52,892 98
Miscellaneous.....	21,603 40
	\$879,700 01
Net earnings.....	330,808 91

Another important enterprise brought to completion during the year was the Richmond & Atlanta air-line railroad, the opening of which affords to Virginia direct communication with the chief cities of the South.

The State debt at the close of the year, exclusive of interest, was \$30,478,741. This does not include the one-third, \$15,289,870, assigned to West Virginia for payment. Of the former, \$8,000,000 is held by citizens of Virginia, \$13,000,000 is held in other States, and \$9,500,000 in Europe. If the provisions of the act of March 13, 1873, for payment of two-thirds of the interest be continued, the amount required to pay interest January 1st and July

1, 1874, will be \$1,207,027. There is, moreover, a balance due and unpaid in money on interest, payable since 1871, of \$880,059, including interest to colleges, to literary fund, etc.; the whole amount, therefore, necessary to meet the interest obligations of the State during 1874 will be \$2,242,083. In 1873, \$931,203 was actually paid in money as interest upon the public debt, and \$301,104 of coupons were taken in part taxes.

The public debt of Virginia presents a serious question to its inhabitants. In the early part of the year Governor Walker publicly took the ground that the United States should assume not only the public debt of this Commonwealth, but also of all the other States in the Union.

The various taxes assessed for 1873 in the counties, cities, and towns of the Commonwealth, were as follows:

Tax on white males.....	\$154,457 00	
Tax on colored males.....	95,068 00	
Total capitation tax.....		\$249,525 00
Tax on property.....	\$392,428 78	
Tax on income.....	38,140 33	
Total tax on personal property.....	425,564 11	
Tax on real estate.....	1,272,424 45	
Tax on licenses.....	321,036 57	
Total tax.....		\$2,268,550 13

RICHMOND.—In many respects 1873 was an eventful year for the capital of Virginia. The year witnessed the completion of the Chesapeake & Ohio Railroad to the Ohio River; the finishing of the James River Free Bridge, which makes Richmond and Manchester practically one city; the opening of direct rail communication with Atlanta, Ga., by way of the Richmond & Atlanta Air-Line, the completion of the Church Hill Tunnel, great improvements made to the river and harbor, and to the streets of the city, and all the highways of trade and travel centring here. A very considerable number of private residences and business buildings were erected, and the workshops and manufactories of the city were in most prosperous and profitable condition until the great monetary panic unsettled the affairs of the whole country, and compelled them to curtail their operations.

The value of merchandise imported directly during the year, was \$118,872, besides which commodities valued at \$28,389 were received in bond from other districts. The following statement indicates in detail the commerce of the city for the year ending December 31, 1873, as compared with the preceding year:

VESSELS ENTERED FROM FOREIGN COUNTRIES.

VROOM, PETER D., LL. D., a political leader, Governor, and Congressman, of New Jersey, and minister to Prussia under President Pierce, born in Hillsborough, Somerset County, N. J., in 1791; died in Trenton, N. J., November 18, 1873. He graduated from Columbia College, N. Y., in 1808, at the early age of seventeen, studied law and was admitted to the bar in 1813. Mr. Vroom was a warm supporter of President Jackson, and in 1829, his party having carried the State, he was elected Governor of New Jersey by the Legislature in joint ballot, which was then the mode there of choosing that officer. He was reelected in 1830 and 1831, also in 1834 and 1835. He was a member of the State Constitutional Convention of 1844, and represented a New Jersey district in Congress from 1839 to 1841. In 1852 Mr. Vroom was one of the two electors at large on the Pierce presidential ticket, and in 1853 was appointed by President Pierce minister to Prussia, where he held that position until 1857, when he resigned. He was a delegate to the Peace Congress of 1861, and afterward took little or no part in politics.

W

WALDENSIANS (THE). An account of the present position and statistics of the Waldensian Church has been published at Florence, Italy, in the *Annuaire de l'Eglise Evangelique Vaudoise*. Sixteen of the ancient churches remain—five in the valley of San Martino, four in the valley of Perosa, six in the valley of Lucerne, and one at Turin. There is also a Waldensian colony at Rosario, in South America. There are, in connection with the Church, the two hospitals of La Tour and Pomaret, the orphanage, a large number of primary schools, a superior school for young men, a normal school, a grammar-school at Pomaret, a college, and a theological school at Florence. The number of theological students in the last year had been nineteen. The journals of this Church are, the *Revista Cristiana*, which is conducted by the professors of the theological school, the *Eco de la Verita*, the *Eco des Valles*, and the *Amico dei Fanciulli*. Thousands of Bibles, tracts, and other religious works, have been issued from the Claudian Press, at Florence, and distributed throughout Italy.

The Waldensian work has heretofore been divided into two branches, that of the old churches, and that of the new missions, which have been opened in Italy in later years. A revision of the constitution of the Church was made in 1855, when an article was introduced to the effect that "the Waldensian Church, in sending her evangelists forth into Italy, has no other object than simply to preach Christ and win souls to Him, and that she leaves the congregations thus formed to choose their own form of government." At a conference held in Florence for five days, beginning April 15th, at which sixty-six representatives of Italian churches were present, the confession of faith and form of government of the Waldensian Church were unanimously adopted, and it was voted that "the churches represented in this conference desire to be considered as one with the Evangelical Waldensian Church." It was also decided that the churches should be grouped into presbyteries. Three presbyteries will probably be formed; one for the north, another for the centre, and a third for the south of Italy. The Waldensian Synod, which met on the 2d of September, 1873, looked with great favor upon the wish expressed by the Florence Assembly, and "opened the way widely for the coming union of the ancient and modern churches into one body." At the time of the meeting of the synod, there were in the *Eglise Vaudoise* seven superannuated ministers, of whom one lived at the colony of Rosario, in South America; fifteen ministers in active work, one of whom was laboring at Rosario; twenty-one missionaries, of whom five were in the islands of Elba and Sicily;

three professors of theology at Florence, and four college professors at La Tour and Pomaret, making in all fifty ordained ministers. The number of members in the valley churches varied from 264 to 1,394 for each church; the number of communicants varied from 150 to 800 for each celebration. Each church had one, two, three, or five Sunday-schools. There were, in all the parishes, day-schools for ten months in the year, and the various schools had been attended in winter by one-fifth of the entire population. There were also two *Écoles de Methode*, one at La Tour and the other at Pomaret, which gave the ward teachers opportunities for coming together every year to perfect their theoretical and practical knowledge. At the college in the valleys, there were professors for the Italian, Latin, Greek, and French languages and literature, for philosophy, mathematics, and natural sciences. Eighty-eight students had attended in the last year. Connected with the church at Turin were a hospital, which had, in the course of the year, cared for 87 sick people, and a diaconate, which had distributed 1,184 francs. The annual collection for *frais d'église* had given 7,328 francs, and that for schools, 2,250 francs. This church had carried on, independently of its consistory, other works of benevolence, in which were expended, in 1871 and 1872, about 17,000 francs. At least three-fourths of this sum was collected from among the members of the Church. The ordinary contributions of this Church for church purposes during the past year had been 20,000 francs. There had been progress in the extensive missions. The day-schools connected with the missions were 58 in number, and had been attended by 1,700 children, and there were 38 Sunday-schools, with 1,142 scholars. The number of churches was 38; of communicants, 1,864; of hearers, 3,158. These missions had subscribed 26,000 francs for various purposes. The missions were established at 36 centres, with 6 new posts, and were served by 21 ministers, 9 Scripture-readers, 6 other workers, and 51 school-masters and school-mistresses. At the suggestion of the Waldensians, an inter-missionary committee was in process of formation, to which it was intended to refer the settlement of disputed or irritating matters, arising between any two of the different Protestant bodies. Two delegates appointed by the Waldensians, two by the Wesleyans, two by the *Obisso Libero*, and one by the Methodist Episcopal mission, suitably empowered, had met at Florence to arrange for such a committee, and prepare the rules by which its operations should be governed.

According to the report of the Committee of Evangelization, the income of the Church

for the year ending August 12, 1872, was £7,582, 10s. 10d.

The Waldensians have two chapels in Rome, and three day-schools, with 120 names of pupils on their rolls, and 90 pupils in regular attendance.

WEST VIRGINIA. The Legislature of this State met at Charleston on November 19, 1872, the chief object of the session being so to modify the laws that they may conform to the new constitution. After a session of four months, the unfinished business was so large that a joint committee of conference was appointed by both Houses with instructions to report whether it was necessary to take a recess before the first adjournment, and what legislation should in that case be first considered and perfected.

The committee reported at the end of March that, in their judgment, a speedy recess was indispensable, "unless the two Houses were to continue in session until about the first day of June;" "believing that, after the first weeks in April, it would be impossible to keep a quorum in each House, as so many of the members were farmers, or engaged in pursuits requiring attention at that season of the year," etc.

The report was laid on the table in the Senate. In the House of Representatives, in accordance with it, a resolution was introduced providing "that the Legislature should adjourn on the 7th of April until the 20th of October ensuing, and no *per diem* should accrue during the recess, nor should mileage be allowed for attendance at the adjourned session." It met with some opposition from some members who moved to strike off the prohibition of mileage, and to turn the recess proposed into an adjournment *sine die*. These motions were rejected, and the resolution, as originally offered, was passed. On its being sent up to the Senate, it was there adopted.

The Legislature accordingly reassembled in October, 1873, when they continued in session for two months, and adjourned *sine die* on the 22d of December.

Most of the laws enacted during these sessions relate to subjects of a public and general character. Acts of special legislation were comparatively few.

A very large proportion of the acts passed relate to the Judicial Department of the government, from the Supreme Court down to the lowest court, defining their jurisdiction and powers respectively.

Before taking its recess in April, 1873, the Legislature passed a general appropriation bill, fixing the amounts to be paid for the current expenditures of the three State departments during the two fiscal years ending September 30, 1873, and 1874, in detail; as also for the current expenses of the State University, charitable institutions, and the penitentiary; and for repairs or construction of their respective buildings.

The following are the amounts appropriated for the last-named institutions:

To pay the university at Morgantown.....	\$14,160 00
To improve and construction of buildings for 1873, \$9,000.; for 1874, \$12,000.....	21,000 00
The West Virginian Hospital for the Insane..	91,208 00
To the further construction of hospital building.....	80,000 00
Support of lunatics confined in the jails.....	20,000 00
Institution for the Deaf and Dumb and the Blind.....	50,000 00
The penitentiary at Watson.....	36,000 00
The Normal Schools at Fairmont, West Liberty, Glenville, Shepherdstown, and Marshall College.....	11,500 00

During the adjourned session held near the end of 1873, a supplementary appropriation bill was introduced, providing, among other things, for the payment of normal-school teachers in 1874. After a warm contest, the bill was defeated, it is said, on account of that proviso. Numerous members of the legislative body, especially in the House of Representatives, were decidedly opposed to appropriations for the said schools, and required the items relating to them to be struck off from the bill, contending that the money appropriated for the instruction and training of students, with a view to qualify them as teachers in the public schools of West Virginia, instead of being used for that purpose, had been applied to the maintaining of high-schools in different localities at the expense of the State.

The disagreement existing between the Governor and the Legislature in reference to the appointing power, which the Governor seems to consider as vested in him by the constitution with regard to officers of almost all sorts in the State, was intensified in 1873, and threatened to become the cause of public disturbances of a very serious character. In obedience to the provision of an act passed by the Legislature on April 1, 1873, the Board of Public Works appointed as the Superintendent of the State Penitentiary William L. Bridges, thus superseding Thomas P. Shallcross, the incumbent of that office formerly appointed by the Governor. Having been duly qualified, the new Superintendent, in company with the Board of Directors, presented himself at the penitentiary on the 1st of May, the day fixed by law, and formally demanded possession of the place. He and the directors were met at the gate by Mr. Shallcross, who refused to admit them; and, on being asked the reason of his refusal, he produced a written document signed by the Governor, "directing him to act as Superintendent until further orders." He added that "he had received verbal orders to exclude all persons." Upon the Board of Directors' offering to make their entrance notwithstanding his refusal, Mr. Shallcross warned them by declaring that, if they attempted to enter forcibly, he was prepared and resolved to use force on his part to prevent it, and keep them out. At this they retired.

A suit was soon after instituted before the Supreme Court of the State on complaint of Mr. Bridges against Mr. Shallcross, to compel

average number of students in attendance during the year was 150.

The normal schools also are in successful operation. In the school at Shepherdstown, which was organized during 1873, the highest number of pupils in attendance for the first portion of the year was 42, the average 38; for the latter part of the year, the highest number in attendance was 100, and the average 66; with a prospect of increase.

At Marshall College, the whole number of pupils in attendance was 161; the average number 75.

A law was enacted at this session, "to provide for free education in Bethany College." It makes a standing appropriation of three thousand dollars per annum, to be paid in half-yearly installments to the said college, on condition that it shall educate one student from each of the fifty-four counties in the State, free of all charges, and with all the privileges accorded to regular students. Each county in the State shall be entitled to send one student; and when any of them fail to do so, the regents of the college are empowered to make appointments to fill such vacancies.

In the Hospital for the Insane the average number of patients during the year is set down at 280; the cost of maintenance and medical attendance for each patient being \$137. The total expenditures made on account of the hospital during the year amounted to \$80,080.05; of which \$38,377.97, were for current expenses; \$38,812.88, for construction of buildings.

The inmates at the Institution for the Deaf, Dumb, and the Blind, numbered 60 in the average during the year; the cost of maintenance and instruction for each pupil having amounted to about \$260. The aggregate expenditures of the institution during the fiscal year ending September 30, 1873, were \$20,680.20.

The material interests of West Virginia appear to be in a flourishing condition. The State steadily advanced during the year in wealth; the progress made in the different branches of business, though not rapid, seems to be healthy; the towns increased in population and trade; new farms were opened up, and old ones better cultivated; new manufacturing establishments were started, and old ones extended their operations; and all made satisfactory returns for the investments of capital; the forest and mine contributed their full share to the general wealth, and the laborer received better compensation for his services than in the times past.

WISCONSIN. The Legislature of 1873 was in session from January 8th to March 20th, 72 days. During this time 186 general, and 145 private and local laws were passed. Among the most important acts passed were those providing for a geological survey of the State, to be begun in Ashland County, and completed within four years, by a chief geologist and four

assistants, to be appointed by the Governor, \$13,000 being appropriated annually; giving the Milwaukee & St. Paul Railroad Company the land grant, conditioned on building roads from Prescott to Superior and Bayfield, from Red Wing to Chippewa Falls, from Monroe to Shullsburg; to change the management of the State-prison from a commissioner elected by the people once in two years, to a warden appointed by the Governor with consent of the Senate, and a board of directors; to substitute the Secretary of State, State Treasurer, and Attorney-General for the State, as a State Board of Assessors; applying the temperance law of last winter to all cities and incorporated villages, regardless of any special provisions of their charter; increasing the salaries of Supreme Court judges to \$5,000, and of circuit judges to \$3,000; and providing for a State tax for 1873 of \$321,110.

Joint resolutions were passed ratifying the constitutional amendment restricting municipal debts to five per cent. of the valuation; for the appointment of an agent to prosecute the claims of the State against the General Government for five per cent. on United States lands; in favor of cheaper postage and no franking; and urging the improvement of St. Croix Lake and River.

The subject which attracted the largest share of the attention of the Legislature, and caused the most public discussion throughout the State, had reference to the St. Croix land grant. These lands were granted to Wisconsin by Congress in 1856 and in 1864, to aid in the construction of a railroad from Lake St. Croix to the head of Lake Superior. The State having assumed this trust, the question of disposing of the grant came up before the Legislature. The grant was eagerly sought by two parties, the North Wisconsin Railroad Company and the Milwaukee & St. Paul Railroad Company, which led to a spirited and protracted contest in the Legislature. This resulted in the passage of a bill conferring the grant upon the Milwaukee & St. Paul Railroad Company.

After the exciting contest for the possession of this aid, no little surprise was created by the announcement of the rejection of the grant by the Milwaukee & St. Paul Railroad Company. In the official communication, dated May 14, 1873, sent by the president of this corporation to the Governor, the reasons assigned for not accepting this grant were, that the act of Congress passed in 1856, granting lands for the construction of a railroad from the St. Croix River or Lake to Lake Superior, provided that "if said roads are not completed within ten years, no further sales shall be made, and the land unsold shall revert to the United States." By the act of 1863 the time fixed for the completion of the roads was extended five years. As these were the only acts of Congress on the subject, it was announced by the Milwaukee & St. Paul Railroad

Company that the railroad not having been completed within the specified time, the lands had reverted to the United States.

In his communication to the Governor, the president of the company adds:

It is true that the Circuit Court of the United States for the State of Minnesota, in June last, in the cases of *Harriman vs. Schulenberg*, and the same *vs. Schow*, held that the legal title to the lands (embraced in the land grant) was in the State of Wisconsin, until otherwise determined, either by a decree of the court, or by an act of Congress.

These judgments have been appealed from, and the appeals are now pending in the Supreme Court of the United States at Washington.

If the judgment of the Circuit Court should be affirmed, the title of the State would undoubtedly be perfect, but otherwise an act of Congress would be necessary, which might be difficult to obtain, with the feeling now prevailing against the making of further land grants by Congress. It is well known that two unsuccessful attempts have already been made to extend the time for the completing of this road, and it is fair to presume that any further efforts would meet with the same ill success.

Until a favorable judgment is rendered by the Supreme Court, or an act be passed by Congress further extending the time for the completion of the road, so great a doubt will rest upon the title, that the directors deem it impossible to obtain the necessary means to complete the road.

The political campaign was opened formally by the Union Republicans, who held a large and enthusiastic convention in Madison, August 27th, and nominated the following ticket: for Governor, C. C. Washburn, of La Crosse; Lieutenant-Governor, Robert H. Baker, of Racine; Secretary of State, Ephraim W. Young, of Sauk; State Treasurer, Ole O. Johnson, of Rock; Attorney-General, Leander F. Frisby, of Washington; Superintendent of Schools, Robert Graham, of Winnebago; Commissioner of Immigration, George P. Lindman, of Milwaukee. The platform adopted was as follows:

In view of the fact that the Republican party has so met the vital issues of the past twelve years as to secure the support of a vast preponderance of the patriotism and intelligence of the nation, it has fairly won for itself the title of being the true reform party of the country; and recognizing the importance of all the questions recently raised, and now for the first time attracting general public attention, relating to labor and capital, trade and commerce, production and supply, transportation and exchanges, corporate franchises and monopolies, and to all other subjects embraced in our political economy, we pledge ourselves as such, to adopt and carry into execution and effect all judicious measures of progress and relief relating to these and all other kindred subjects; and as a party, we can give assurance, from our political ascendancy both in the national and State Governments, of a more speedy and effectual remedy of existing evils than would be possible through any existing opposing party, or any party yet to be formed.

Resolved, That the Republican party is responsible only for such measures as it indorses and approves, and for an honest and faithful administration of the Government; and cannot be expected to vouch for the individual honesty, in all cases, of those they promote to office; yet, when such are found unfaithful or corrupt, they should be exposed, dismissed from the public service, and punished. We denounce all official frauds, and corrupt legislation, whether in land grants and subsidies to railroads, in Credit Mobiliers, or in the management of the revenues.

Resolved, That we disapprove and condemn the

recent measure by which Congress allowed additional compensation to itself, for past service, and demand that the provisions of that act by which congressional salaries were increased, shall be promptly and unconditionally repealed.

Resolved, That it is contrary to the theory of a representative government that any legislative body should make laws exclusively for their own benefit, and we therefore favor an amendment to our national Constitution which shall forever prohibit any Congress from increasing its own compensation.

Resolved, That the subject of cheap and reasonable rates of transportation has become of pressing importance to the great body of our people, both East and West, and to the producer and consumer, and that it is necessary that some proper legislative measures should be speedily adopted to secure relief and protection against the greed and oppression of grasping monopolies. We urgently recommend what has been already urged in two annual messages of the present Executive, the creation of a Board of Railroad Control, whose duty it shall be to examine the whole subject of transportation and freights, and report the facts in relation thereto, and prescribe and adjust such regulations as will be fair and equitable both to the people and the railway companies.

Resolved, That the vast importance of railroads to the general prosperity and business of the country is cheerfully acknowledged, and we would extend to them all proper facilities for their management so as to produce a fair return for capital invested in them; that we claim, nevertheless, the right, under our constitution, to regulate their conduct, or, if necessary, to repeal the charters under which they exist; that while we should deprecate the necessity for the exercise of this power, still, if such necessity should arise, will insist upon it to such an extent as will protect the people against extortion from monopolies of this kind.

Resolved, That we disapprove of the practice which has heretofore prevailed, of public officers accepting free passes upon railroads. It creates an embarrassing obligation upon the part of an officer which he can only properly cancel by the payment of an adequate sum in money. It has a tendency to influence, and often does influence, official actions. They are given as a tribute to the office, and not a mark of respect to the man to whom the pass is given. It imposes a large tax upon the stockholders of railroad companies, who indemnify themselves by increased and oppressive charges upon the legitimate paying business done upon their roads; and we believe that the use of such passes by public officers should be prohibited by law, with suitable penalties.

Resolved, That we regard, with eminent satisfaction and approval, the very able, wise, and judicious management of the Executive Department of this State, by his Excellency Governor Washburn, during the last two years. As our Governor, he has stood fearlessly and constantly the guardian of the people's rights, without regard to consequences to himself, and his administration will bear the closest scrutiny.

Resolved, That the discharge of their official duties by the various elective State officers has been marked by efficiency and integrity, and meets with our hearty commendation.

Resolved, That we sympathize with every movement to secure for agriculture and labor their due influence, interests, and rights, and the Republican party will be their ally in every just effort to attain that end.

Resolved, That we regard the settlement and development of the northwestern portion of our State—so rich and valuable in natural resources of soil, timber, and mineral, and upon the very highway of a direct communication with our harbor on Lake Superior and with the North Pacific Railway—of momentous interest and most urgent importance. Having completed, in good faith and proper season, railroads from Portage City to Tomah, and from Tomah to the St. Croix River, by the expenditure and judi-

cious application of two-thirds of the land grant of 1856, and having made an honest effort to construct a road from St. Croix River to Lake Superior, the last link in this chain of roads contemplated by that grant, and having already completed a portion of the same, and having taken care of the lands and prevented trespasses upon them, and continued to treat them as still the trust property of the State, and the people of that section having located and purchased Government lands at double the usual Government price, in view of the grant and the building of the roads, and having long and patiently waited for such a consummation, it would be unjust, illiberal, and unfair to the State, to now seek to divest her of the title to the remaining portion of this grant, even if Congress has the legal right (which we deny), and, if necessary, we insist that Congress ought to pass a law, at once and without hesitation, renewing this portion of the grant to the State, that the title may be beyond any question, and the road speedily completed.

Resolved, That our State is most favorably situated in respect to water communication by lake and river, and our facilities for commercial intercourse ought to be prudently guarded and improved to the fullest possible extent, in order to afford the readiest and cheapest means of transportation of products, in permanent competition with railroad-carriage. To this end we congratulate the State upon the generous assumption by the General Government of the Fox and Wisconsin River Improvement, that promises at an early day to connect the Mississippi River and the great lakes, and we most fully indorse the now well-established policy of the present Administration in keeping clear from unnecessary obstruction the navigation of the Mississippi River; and we especially commend that private enterprise, assisted by Government aid, which has resulted in the construction of the Sturgeon Bay Canal, that so materially lessens the distance and obviates the dangers of our lake navigation.

Resolved, That the Republican party will use all reasonable endeavors to so amend the laws of the State as to make a permanent, fixed salary for all State officers, and that all fees and perquisites be paid into the public Treasury.

The State Convention of "all Democrats, Liberal Republicans, and other electors of Wisconsin, friendly to genuine reform through equal and impartial legislation, honesty in office, and rigid economy in the administration of affairs," assembled in Milwaukee, September 24th. On the preceding day a Reform Convention, "not large in numbers, but representing a vast constituency of sentiment in the State," had met in the same city. The delegates of these two bodies united and agreed upon the following platform:

Resolved, That, in the opinion of this convention, all electors of Wisconsin who seek the election of capable and incorruptible men to office, and a complete and permanent reform in the administration of public affairs, should unite upon one platform and the same candidates, and vindicate the right of electing their own rulers, independent of corrupt party power, and of the dictation of professional politicians and political rings, allied therewith or apologizing therefor.

That, in the language of Thomas Jefferson, "to make us a happy and prosperous people, a wise and frugal government is necessary, which shall restrain men from injuring one another, but which shall leave them otherwise free to regulate their own pursuits of industry and improvement, and shall not take them from the month of labor the bread it has earned."

That the public credit should be scrupulously preserved, and the State and national debt be honestly

paid; and to this end we demand a decrease in the number and compensation of public officers, and rigid economy in every part of the State and Federal Government.

That we pledge our support to every reasonable project for increasing and cheapening the facilities of transportation within the State, and between Wisconsin and the Atlantic seaboard.

That the improvements of the Fox and Wisconsin Rivers, and other navigable waters in and about Wisconsin, are a rightful charge upon the Federal Government, and we demand that Congress shall complete these necessary channels of internal commerce before further squandering the resources of the national Treasury in mammoth subsidies to railroad corporations and the owners of ocean-steamers.

That we are opposed to protective tariff laws, because they diminish the sources of public revenue, increase Federal expenditure, tax labor for the exclusive benefit of aggregated capital, and unequally apportion the blessings and burdens of government. These laws have already cost Wisconsin millions, for which it has received no adequate return, and we shall hereafter insist upon equal protection and taxation for all classes of industry.

That owners of railroads are entitled to a fair compensation for the use of their actual capital, that the extension of existing roads and the construction of new and independent lines are necessary to the progress and development of the State, and we pledge our earnest encouragement and support to all wholesome enterprise in this direction; but we demand that the sovereignty of the State over corporations of its own creation shall be sacredly respected, to the full extent of protecting the people against every form of monopoly or extortion.

That the acceptance of free railroad passes by any officer of the State is a practice inconsistent with an honest and impartial discharge of official duty, and ought to be prohibited by law.

That we will support no man for office who has ever violated his faith to the people by receiving retroactive increase of salary for public service.

That the purchase of official station, the acceptance of bribes by public servants, and the abuse of official influence for private gain, are high crimes against the State, for the punishment of which the people have built prisons, and should use them.

That we will vote for no man who justifies or apologizes for the Credit Mobilier corruptions of Congress, or who voluntarily affiliates with any class of men guilty of corrupt practices in State or national legislation.

That the limitations of Federal power in the national Constitution are a necessary safeguard against the evils of corrupt and oppressive government; that we demand the renunciation by Congress of all unconstitutional powers arrogated to itself over the business interests of the country, and the consequent dispersion of the horde of money-changers and lobbyists now habitually congregated at the Federal capital and successfully demanding special favors at the expense of the honest industry of the country.

That all enactments which usurp to the State jurisdiction over private conscience, or punish one citizen for the offenses of another, are in conflict with the spirit of free government.

That honesty and fidelity in the administration of public affairs demand rotation in office, and an untrammelled exercise of personal judgment in the selection of public servants; and we pledge ourselves to vote for no candidate for office whose nomination is the fruit of his own importunity, or of a corrupt combination among partisan leaders.

That our hope of the future is based on the liberal education of our children and the general intelligence of the people; we therefore demand the careful preservation to the State of whatever remains of our once magnificent school fund, and such legislation as shall relieve the masses of the people from

unnecessary burdens in the number and cost of textbooks in our public schools.

The ticket nominated by this convention was as follows: For Governor, Wm. R. Taylor; Lieutenant-Governor, O. D. Parker; Treasurer, Ferdinand Kuhn; Secretary, Peter Doyle; Attorney-General, A. Scott Sloan; Superintendent of Schools, Edward Searing; Commissioner of Immigration, M. Argand.

Prior to the assembling in convention of the two regular political parties, the first State meeting of the "American Constitutional Union" was held in Milwaukee, August 7th, and was attended by six hundred and sixty-six delegates. This party had recently been organized in Milwaukee, and was composed of Germans. The convention was called independently of all political organizations, but its members were strongly opposed to the existing temperance law. No ticket was formed, but it was resolved "that the State Executive Committee be instructed to submit, or cause to be submitted, a copy of the preamble and platform of the Constitutional Union to the different political State conventions about to be assembled in the State, requesting that the principles therein enunciated be embodied in, and made a part of, their respective party platforms; also that the members of this Constitutional Union in no way or manner would support any political party or candidate for office that did not heartily indorse and advocate the principles of their platform. That the appointment of a State Executive Committee be deferred until after the 15th day of September, to be then selected from the members of the different local organizations, and that in the mean time a special committee of five be intrusted with the transaction of all necessary affairs."

Their platform thus mentioned was as follows:

ARTICLE I. The ballot-box is the essential agency placed in the hands of the people for the protection of their liberties. Organization is necessary to render that agency effective. But while we concede the existence of political parties to be eminently proper, yet we deem integrity of character and general fitness of candidates for office to be considerations higher than party dictates.

ART. II. Corrupt administration is the fruit of, and breeds, in turn, corrupt elections. Positions of public trust ought to be less sought than tendered. The payment of fees and perquisites should be abolished, and every public officer receive an adequate fixed salary, not to be increased during the term for which he is elected or appointed. The action of our late Congress, by which the representatives of the people—faithless to our confidence which placed them in office—voted the people's money to themselves, for services already past and remunerated, we deem the highest evidence of political corruption, and the attempt to defend and justify such conduct we look upon as the worst kind of effrontery and an insult to the intelligence of our people.

ART. III. Church and State ought to be kept separate. Fully endorsing the policy of the first amendment to the Federal Constitution, which provides that Congress should make no law respecting an establishment of religion, or prohibiting the free exercise thereof, we accordingly insist upon the ut-

most liberty of conscience. Man is not responsible to others for his religious belief or opinions on religion; and while it is the duty of the State to protect every individual in the exercise of his religion, it should especially prefer no religious establishment or mode of worship.

ART. IV. Freedom of industry and freedom of trade are essential elements of a republican form of government. Therefore, while we deeply deplore the evils of habitual and excessive drinking, as well as intemperate habits and excess in any other mode of life, and while we are ready and willing to use all reasonable means to eradicate them, we earnestly oppose all laws which, under the pretense of police regulations, or of remedying moral evils, interfere with the rights and fundamental privileges of American citizens as guaranteed by our Constitution.

ART. V. We consider the interests of our farming population and those of the people at large to be identical. The wealth of our State lies chiefly in its agricultural products. Consolidation of competing railroad-lines and arbitrary tariffs must under no circumstances be tolerated; and the development of new, easy, and cheap means of transportation ought to be made one of the prominent features of coming legislation.

ART. VI. The right of individual and local self-government ought to be jealously guarded. Every municipality should be left to regulate its domestic affairs at pleasure, as far as compatible with the public good. Special legislation ought to be discountenanced, and all attempts at centralization of power in national as well as State affairs ought to be promptly repudiated.

The election resulted in the success of the Democratic and Liberal Republican ticket. The total vote cast was 147,859, of which Mr. Taylor received 81,635, and Governor Washburn 66,224, making the majority of the former 15,411.

Of the 38 members of the Senate, 17 are regular Republicans, 14 Democrats, and 2 Liberal Republicans. The House comprises 60 members, of whom 41 are regular Republicans, 43 regular Democrats, 8 Liberal Republicans, and 8 Independent Democrats. There are 42 farmers and 14 lawyers in the House; and 7 farmers and 6 lawyers in the Senate. Of the 24 of foreign birth in the House, 16 are Germans; and of the 13 of foreign birth in the Senate, 5 were born in Germany.

At the judicial election held April 1st, Orsamus Cole, who has been upon the bench eighteen years, was reelected as an associate justice of the Supreme Court.

The improvement of the Wisconsin River by confining its waters at the low-water stage, by wing dams, to a single channel, and reducing its width, has been continued with satisfactory results. This improvement is being carried on by the United States, as a part of a route of water communication between the Mississippi River and Lake Michigan, by way of the Fox River and Green Bay.

An appropriation of \$300,000 was made by Congress in March, 1873, for the improvement of the Fox and Wisconsin Rivers. It was estimated by D. O. Houston, of the United States Engineers, that \$100,000 could be profitably expended in continuing the improvement of the Wisconsin River during 1873, leaving \$200,000 for the Fox River. The con-

dition of the funds for this important public improvement is shown in the following statement:

Amount available for Wisconsin River, July 1, 1873.....	\$51,121 03
Amount appropriated by act of March 3, 1873.....	300,000 00
Amount expended during fiscal year ending June 30, 1873.....	123,283 90
Amount available July 1, 1873.....	227,837 13
Amount required for fiscal year ending June 30, 1875.....	750,000 00

In view of the importance of this improvement to the country, as an outlet for the produce of the States west of the Mississippi River, as well as a cheap route for supplying those States with lumber and iron from Wisconsin and Michigan, Congress is urged to make liberal appropriations for completing the work.

In his report for the year ending June 30, 1873, Major Houston uses the following significant language in speaking of this important improvement:

The feasibility of the improvement of the Fox and Wisconsin Rivers is now demonstrated, and, in view of the great benefits to the country which this improvement will bring, it would seem that the Government having assumed the work, by act of Congress, and by subsequent legislation, should push the work vigorously, so that these benefits may be secured at as early a day as practicable. In addition to those considerations, a true economy demands that the appropriations be liberal, so that the requisite facilities, machinery, etc., for carrying on the work vigorously, may be procured. The size of the locks in the Erie Canal is 110 x 18, with a draft of seven feet. The existing locks on the Fox River, twenty-two in number, are 100 x 35—all good for five feet draft, and many of them for six feet. These can also be lengthened to any desired extent.

The maximum estimate for this improvement, including an independent canal on the Wisconsin, does not exceed \$5,000,000. Assuming the work to cost this sum, we will have for the whole cost of the work, adding what the Government has already expended in lands and moneys, about \$6,000,000. With this amount a line of water transportation, 370 miles in length, can be secured. It is believed that the cost of the improvement on the plan now being carried out on the Wisconsin River, will be much less than the above estimate; but when we consider the results to be obtained, as compared with the cost of railroads, and their high charges, the estimate is small.

The importance of this work has been fully set forth in former reports, and in various documents. There is no public work more national in its character than this. By it the products of the Northwest will find cheap transportation to the seaboard, and the lumber and iron of the North to the Mississippi Valley. One great problem of the day is to secure cheap transportation for these indispensable and bulky commodities, and while no one route will meet the demand of the country, there is no other route which will meet the necessities of so large a section of the United States at so small an expense as this. It is with these views that I submit the estimates herewith. If small appropriations are made, the work will not only be delayed, but a spirit of dissatisfaction will be aroused. It is not many years since the Government donated to the State of Wisconsin a grant of land for this improvement, and yet no results such as were anticipated have been realized. The dissatisfaction has been so great that the Government has been induced to resume control of the work, and by appropriating money indicate an intention of carrying it out. The people naturally ex-

pect that the Government means by this course to provide ample means for this purpose.

The total receipts into the State Treasury during the year, from all sources, were \$1,774,558, while the disbursements amounted to \$1,798,023. The total receipts of the general fund were \$1,095,872, of which \$781,875 were from direct State tax upon the assessed valuation of property; \$210,874 from taxes on the gross receipts of railroad companies; \$63,299 from taxes on fire and life insurance companies, and the balance from miscellaneous sources.

The total disbursements from the general fund during the fiscal year were \$1,191,966.01, an excess of \$96,093.72 above the receipts. Deducting from this excess of expenditure the balance in the general fund at the commencement of the fiscal year—September 30, 1872—and the deficiency in this fund for the year ending September 30, 1873, is found to be \$66,923.80.

The disbursements on account of the several public institutions of the State were:

State-prison.....	\$45,550 47
Hospital for the Insane, Madison.....	119,488 15
Northern Wisconsin Hospital for the Insane.....	198,677 21
Institute for the Blind.....	20,875 00
Institute for the Deaf and Dumb.....	23,737 25
Industrial School for Boys.....	65,715 10
Soldiers' Orphan Home.....	28,193 69

The total debt of the State amounts to \$2,252,557.

Treasurer Baetz says; "The credit of the State is good at home and abroad, and its entire debt only a trifle over two and a quarter million dollars, or \$2.13 *per capita* on the United States census of 1870."

The following is a comparative statement of the amounts of the several productive trust funds, September 30, 1872, and September 30, 1873, and shows an increase during the year of \$94,469:

TRUST FUNDS.	1872.	1873.
School Fund.....	\$2,482,771 28	\$2,510,181 12
University Fund.....	206,988 88	216,519 38
Normal School Fund.....	880,371 79	918,648 48
Agricultural College Fund..	206,058 90	225,393 73
Total.....	\$3,776,185 15	\$3,870,653 71

The unproductive trust funds are composed of unsold lands held in trust by the State for the funds, and are estimated as follows:

School Fund.....	\$290,000 00
University Fund.....	13,000 00
Normal School Fund.....	810,000 00
Agricultural College Fund.....	70,400 00
Drainage Fund (held in trust for counties) ..	1,088,000 00
Total.....	\$2,221,400 00

The State tax levied for 1871 was \$629,143; for 1872, \$765,291; and for 1873, \$871,582. The rate per cent. of this tax upon the assessed valuation was 1.38 mills in 1871; 1.96 in 1872; and 1.72 in 1873. The assessed valuation for 1873 was \$390,454,875.

A considerable portion of the annual revenue is derived from the tax on railways; the tax fixed by the Legislature being three per cent.

on the gross earnings of the companies. The aggregate amount of the gross earnings, reported by all of the companies operating lines within the State for the year ending December 31, 1872, was \$8,595,518, which yield in revenue to the State, at three per cent., \$257,865.

The question is, says the Secretary of State, whether this amount is the same percentage of the actual or full value of this class of property, that other taxes are of other classes of property upon which they are levied. If less, it is not enough; if more, it is too much. Three methods suggest themselves by which the correct valuation of railroad property for the purposes of taxation may be determined:

1. By taking the actual cost of the roads and equipments.

2. By adding to the total indebtedness of the roads the aggregate market or quoted value of their stocks.

3. By taking an amount, the interest of which, at seven per cent., or any other assumed rate, would produce a sum equal to the net earnings.

The cost of the roads and their equipments, lying wholly, and the proportionate cost of those lying partially within the State, reporting to this department is stated at \$61,359,374.81, or \$35,566.36 per mile, which is \$19,550 per mile less than the average cost of roads and equipments in the United States. It is admitted that this cost may be either more or less than the actual value, according to the peculiar circumstances of each road. If a road be economically built, prudently managed, and located so as to command sufficient business to make it a profitable investment, it would be worth its cost or even more; but, if the reverse be true, depreciation would be the result. Assuming that the roads in Wisconsin are worth what they cost, and by taking 2.23 per cent., which is the rate found levied upon other property, as the correct tax ratio, it will appear that railroad property, at the same rate, should pay \$1,370,544.03, which is over five times the amount now received by the State from this source. Or, if only one-half of the cost be taken as the correct valuation, the State would even then realize, at the rate named, the sum of \$685,272.03, which is \$457,406.48 more than what is now realized, and is equal to 7.97 per cent. of the gross earnings.

By adopting the second method there would be realized \$1,133,738, which is equal to over 13 per cent. of the gross earnings.

Governor Taylor suggests that the time has come for levying a tax on telegraph and express companies, which are now exempt from taxation.

The amount and value of property assessed in 1873 are shown in the following statement:

ARTICLES.	Number.	Value.	Average Value.
Horses.....	285,672	\$18,001,691	\$45 51

Ten railroad companies were incorporated

under the general laws of the State during the year ending September 30, 1873. In 1872, 325 miles of railroad were constructed, making the total length of railroads operated in the State, at the end of that year, 1,810 miles. The condition and operations of the railroad companies of the State are shown in the following statement:

Capital stock paid up.....	\$63,520,241 82
Cost of roads and equipments.....	104,373,614 86
Dividends paid.....	2,238,254 77

ROADS.	1871.	1872.
Receipts.....	\$16,998,073 30	\$18,758,869 70
Earnings in Wisconsin.....	\$7,623,904 00	\$8,252,518 36
Expenditures.....	\$20,149,170 44	\$18,317,972 45
Freight in tons.....	3,597,191	4,565,640

Sheboygan & Fond du Lac.....	4,231 53
Western Union.....	10,047 40
Wisconsin Central.....	3,506 70
West Wisconsin.....	5,389 29

The total number of persons in the State in 1873, between four and twenty years of age, was 436,001. Of these, 281,708 attended the public schools, besides 575 under four, and 1,439 over twenty years of age, making the total attendance 783,732.

The State contains 4,957 public school-houses which will accommodate 315,111 pupils. The valuation of school-houses was \$3,995,422; sites, \$425,788; apparatus, \$181,326. The amount expended for school purposes during the year was \$2,073,449, of which \$650,435 was for male, and \$766,959 for female teachers. Wisconsin has three normal schools; one at Platteville which had 498 students in 1873; one at Whitewater, with 224 pupils; and one at Oshkosh with the same number in attendance.

The Superintendent of Public Instruction, Samuel Fallows, thinks that the natural sciences should be taught in the public schools, that schools should be maintained for eight months or more instead of five, and that there should be a law requiring all children of the State to be instructed in the rudiments of the common English branches.

In declaring in favor of compulsory education, he says:

The conviction is becoming quite general among the most careful and conservative thinkers and educators in our country, from the alarming statistics of illiteracy given by the last census, that compulsory education, in some form or other, is an absolute necessity for the safety of our republican institutions. I have come to the conclusion from a careful

investigation of the whole question, and specially in view of the fact that 55,441 persons ten years old and over, in Wisconsin, are unable to write, and nearly 50,000 are not to be found in any school from year to year, that while the instructional agencies now employed should be developed to the highest degree of efficiency, the Legislature should enact a law that every child within the bounds of the State shall receive, in the public schools or elsewhere, at least the elements of a good common-school education.

The charitable and penal institutions of Wisconsin are organized on the most liberal basis, and are conducted with great credit to the State. In 1873 the sum disbursed for these purposes exceeded half a million dollars, or nearly one-half the total receipts into the general fund. A general supervision of the management of these institutions is mainly exercised by a State Board of Charities.

The Institute for the Blind receives blind persons, susceptible of intellectual culture, between the ages of eight and twenty-one years. The number of pupils instructed during the year was 77, of whom 38 were females; the actual average attendance was 56. The expenditures for the year were \$19,893.

The Institute for the Deaf and Dumb admits deaf persons from ten to twenty-five years of age, with no charge for board or tuition. The whole amount disbursed for current expenses in 1873 was \$35,355. There were 148 pupils at the date of the report, October 15th.

The insane of the State are cared for in the State Hospital, on the northern shore of Lake Mendota, about seven miles from Madison, and the Northern Insane Hospital, situated on the shore of Lake Winnebago, four miles north of Oshkosh. The State Hospital was opened in 1860, since which time 1,865 have been admitted, of whom 574 have been discharged recovered, 383 improved, and 870 unimproved. The Northern Hospital for the Insane was opened—before its completion—in April, 1873. Up to October 15th, 220 had been admitted, and 209 were inmates at that date.

The State-prison at Waupun had October 1, 1873, 180 convicts, of whom 36 were under sentence for life. The disbursements during the year for this institution were \$97,594. The convicts are occupied in various industrial pursuits, from which a considerable income accrues to the State. A "prison-church" and a "prison-school" are organized in the institution, which afford valuable religious and secular instruction to the convicts, who have greatly profited by the advantages thus offered.

The Wisconsin Industrial School for Boys is situated on Fox River, just west of the village of Waukesha. It was organized as a House of Refuge, and opened in 1860. There were

362 inmates during 1873, and 281 at the close of the year. The expenditures amounted to \$41,472.

Several important judicial decisions were rendered during the year, bearing upon questions of importance to the people of Wisconsin.

In September, the United States Circuit Court at La Crosse granted an injunction restraining the Milwaukee & St. Paul Railroad Company from building a bridge across the Mississippi River at La Crosse, at a point selected by the company, but disapproved by the Secretary of War. In delivering the opinion of the court, Judge Drummond said:

The principal question is, whether the Secretary of War had the authority to declare that the bridge should not be built at the point where the defendant proposed to build it, and this depends upon the construction of the act of Congress of the 1st of April, 1872, and of the 4th of June of the same year, authorizing and regulating the construction of bridges across the Mississippi River.

The Mississippi is a great national highway, the navigation of which is free to all citizens of the United States. If bridges are to be thrown across it, there can be no doubt of the authority of Congress to declare that they should be so constructed as to impede in the least possible degree the navigation of the river; or, to say how many shall be constructed; or, to prohibit their construction altogether. This authority grows out of the national character of the river, as a great navigable channel of travel and of commerce. It follows from this that Congress can prescribe the place and the manner of construction, so as not to interfere with the navigation, and, when Congress has legislated as to the construction of bridges on the Mississippi, within certain limits, and declared the mode of construction, they can only be built in the way pointed out by Congress. Therefore, if any individual or corporation attempts to construct them otherwise, or elsewhere, than Congress has directed, the United States must have the right to prevent it; and there is no doubt that this can be done through the civil process of the courts.

The question of the constitutionality of the "Graham Liquor Law," the provisions of which are given in the preceding volume of this work, came up before the Supreme Court of the State in the case of Wisconsin *vs.* the Mayor of Milwaukee. That official had been commanded by writ of *mandamus* to enforce the law, or show cause why he should not do so. The defense set up was that the act was unconstitutional. The court, however, declared the law constitutional.

In the case of Olcott, plaintiff in error, *vs.* The County Board of Supervisors of Fond du Lac County, which had been carried on appeal from the Circuit Court of the United States for the Eastern District of Wisconsin to the Supreme Court of the United States, the latter tribunal decided in the early part of the year that railways were public highways, and subject to the general control of the State.

Z

ZANZIBAR, a state in Eastern Africa. It attracted in 1873 the attention of the civilized world by the treaty concluded between its Sultan and England for the suppression of the slave-trade. The sultanate obtained its present extent by Arabic princes, who were called to these regions by native tribes to aid them against the Portuguese. They established their rule in 1698. In 1784 the Imam of Muscat conquered the island of Zanzibar, which was incorporated with the state of Muscat. When the Imam Said-Said, of Muscat, died in 1858, one of his sons succeeded him in Muscat, and another, Said-Medjid, in Zanzibar. Thus Zanzibar again became an independent state. Said-Medjid died October 7, 1870, and was succeeded by his younger brother Burgosh Ben-Said. In 1873 the United States of America, England, France, and Germany, were represented in Zanzibar by diplomatic agents.

The territory of the Sultan embraces the island of Zanzibar, with an area of 617 square miles, and a population of 200,000 to 250,000 inhabitants, and the possessions on the opposite coast, the most important of which are Mombas and Quiloa. The extent and the population of these possessions are unknown. The population of the island of Zanzibar consists chiefly of enslaved negroes; the ruling class are the Arabs. The principal cities are: Zanzibar, 80,000; Mombas, 18,000 to 15,000; Quiloa, 10,000 to 15,000. The chief source of the revenues of the Sultan are the duties which are farmed out by him for about \$450,000. The standing army generally consists of about 1,400 men. The fleet, which in 1871 consisted of one sailing-frigate of 24 guns, one corvette (21 guns), one steam-corvette (9 guns), one river-yacht (6 guns), and one aviso, was, on April 15, 1872, almost wholly destroyed by a hurricane.

According to the report of the German consul in Zanzibar, the commerce of the island, in 1871, was as follows (value expressed in Maria Theresa thalers; one thaler = \$1.02):

COUNTRIES.	Imports.	Exports.
India, Arabia, and Persia.....	462,000	375,000
North America.....	341,500	779,000
Germany.....	493,500	461,000
France.....	428,000	320,000
England.....	310,000	450,000
Total, 1871.....	2,038,000	2,385,000
Total, 1870.....	2,169,000	2,228,000

The movement of shipping in the port of Zanzibar was, in 1871, as follows:

FLAG.	Vessels.	Tons.
English.....	21	26,641
German.....	16	6,843
French.....	14	7,401
American.....	13	6,480
Arab.....	10	5,604
Others.....	10	2,649
Total.....	99	54,117

As Zanzibar is at present one of the principal slave-marts of Africa, the Government of England toward the close of 1872 concluded to force upon the Sultan a treaty providing for the abolition of the trade. To this end, the British vessels Glasgow and Daphal, under the command of Admiral Cumming and Commander Bateman, arrived on December 23d at Zanzibar. On January 13, 1873, the British representative, Sir Bartle Frere arrived, and, accompanied by the admiral and about forty officers, at once presented his credentials to the Sultan. The official negotiations began on January 15th. The Sultan professed a readiness to conclude the treaty, but expressed the fear that his life would be in danger. The native merchants insisted that the slave-trade could not be abolished without ruining the city. After acquainting the Sultan with the demands of England, Sir Bartle Frere visited several places on the east coast of Africa and Madagascar. On returning to Zanzibar, on March 12th, he found the Sultan entirely unwilling to accede to the English demands. He left a few days later in order to present letters of Queen Victoria to the Imam of Muscat. This mission was successful, as the Imam signed the demanded agreement for the suppression of the slave-trade. In the mean while, English vessels watched the coast of Zanzibar so efficiently that, during the month of May, the number of slaves imported on board of ocean-vessels, which generally amounted during the month to about 5,000, was reduced to 711. This was only the preparation for another more decisive measure of the English Government. On June 3d, the British consul, Dr. Kirk, personally presented to the Sultan an ultimatum of the English Government, which demanded from him the immediate conclusion of a treaty for suppressing the transfer of slaves on board of ocean-vessels, and at the same time informed him that unless he accepted the ultimatum the admiral of the East India squadron, who had been ordered to Zanzibar, had been instructed to adopt at once warlike measures. As the American and the German consuls, who were consulted by the Sultan, emphatically indorsed the demands of England, the Sultan deemed it best to yield, and on June 5th the ultimatum was accepted, and the treaty signed. The English reports maintained that the French had secret negotiations with the Sultan, and had advised him to resist the English demands, and that even the establishment of a French protectorate over Zanzibar had been under consideration; however, when England showed a determination to enforce its ultimatum, the Sultan lost all confidence in the promises of France. On June 13th the Sultan ordered the arrest of one of the most powerful chieftains, on the ground that he was implicated in the slave-trade.

Colombia.—Extent, 125; boundaries, 125; political divisions, 126; population, 126; officers of the Government, 126; army, 126; financial affairs, 126; schools, 127; commerce, 127; exports, 127; imports, 128; steamship lines, 128; railways, 128; mining interests, 129; telegraph-lines, 129; difficulties with Venezuela, 129; disturbances, 30; political troubles, 130; projects for an International Congress, 130; United States survey of Darien and Cauca for a canal, 130; the Cauca Railway, 130; modifications of the treaty with Peru, 131; honors to Paes, 131; immorality of Buenaventura, 131.

Commerce of the United States.—Imports, 131; exports, 131; number and tonnage of vessels engaged in the foreign trade, 131; commerce of the port of New York, 131; foreign imports of New York for 1870, 1871, 1872, and 1873, 133; exports from New York for 1870, 1871, 1872, and 1873, 133.

Confession.—Report of Anglican convocation at Canterbury concerning, 22; debate in the Synod of Ireland on, 26.

Congregationalists.—Twentieth anniversary meeting of the American Congregational Union, 133; Treasurer's report, 133; statistics of the American Home Missionary Society, 134; of the American Congregational Association, 134; of the American Board of Commissioners for Foreign Missions, 134; of the American Missionary Association, 134; meetings of the Congregational Union of England and Wales, 135; resolutions against the advance of ritualism in the national Church, 135; anniversary of the London Missionary Society, 135; statistical summary in the British Empire, 135; statistics of the Congregational churches in North America and the United States, 136; Congregational Union of Ontario and Quebec, 136; Australian colonies, 136.

Congress, United States.—Commencement of third session of Forty-second, 137; list of members, 137; in the Senate, bill introduced to regulate the Army Register and regimental colors, 137.

In the House, a question of privilege, 138; proposal for an investigation of Credit Mobilier charges, 138; accusations of bribery, 138; resolutions adopted, 138; committee appointed, 138; resolution relative to the death of Mr. Greeley, 139.

In the House, a supplement to civil rights act considered, 139; motion to lay on the table, 139; features of the bill, 139; motion lost, 139; bill reported to the Committee on Revision of Laws, 140.

A motion to suspend the rules in order to introduce and pass an amnesty bill, 140; motion lost, 140.

An amendment proposed to the bill to reimburse the College of William and Mary for property destroyed during the war, 140; amendment adopted, 141; bill rejected, 141.

In the Senate, a bill to allow a drawback on certain building-materials considered, 141; danger of the heart running away with the head, 141; previous session of Congress on relief to sufferers by fire, 141; motion to refer to Judiciary Committee, 143; what is this bill? 143; constitutional question as to the exemption of imports, 143; what the bill proposes, 143; how is it a destruction of uniform duties? 143; the term "drawback" and its signification, 143; the principle of the present bill, 143; no way of avoiding the constitutional objection which has been urged here, 144; bill referred, 144.

In the Senate, a resolution offered to refer to a special committee so much of the President's message as relates to the subject of transportation, 144;

the object is simply to ascertain what remedy there is for the evil, 144; the constitutional power of the Government is a question that lies at the root of the subject, 144; railroads are in their infancy, 145; the question of cheap transportation to tide-water is one of the leading ones of the day, 145; resolution adopted, 145.

In the Senate, a joint resolution relative to the removal from the Army Register and the colors the names of battles of the civil war, laid on the table, 145.

In the Senate, a bill to abolish the franking privilege considered, 146; outlines of the bill, 146; amendment forbidding compensation to members of Congress on account of postage, 146; an unnecessary amendment, 146; the bill does not attempt to correct abuses, but abolishes the privilege, 147; the bill itself is an utter delusion, 147; better determine the appropriation bill first, 148; object to reform abuses, 148; amendment agreed to, 148; other amendments, 148; bill simply to abolish the franking privilege, 148; passed, 149.

In the House the same bill considered, 149; abolishes the franking privilege pure and simple, 149; bill passed, 150.

Senate and House in joint meeting to correct the electoral votes for President and Vice-President, 150; appointment of tellers, 150; certificate of the Governor of Maine read, 150; objection to counting the votes for Mr. Greeley, deceased, 150; resolved, 150; objections to the vote of Mississippi, 151; separate action of the two Houses, 151, 153; joint action and decision of objections, 153; objections to the vote of Texas, 153; separate action, 153; joint action, 153; objection to the vote of Arkansas, 153; do. to the vote of Louisiana, 154; separate action, 154; joint action, 154; decision of objections, 154; result of the votes, 154, 155.

In the House, an amendment offered to the appropriation bill considered, 155; substitute to increase salaries of members offered, 155; it is new legislation, 155; decided to be in order, 155; only following the precedent, 156; not just to pass this amendment in the lump, 156; a substitute offered, 156; what plea can be urged in favor of an increase of salaries? 156; the amendment begins at the wrong end, and raises the compensation of those who have the highest salaries, 156; we throw off mileage and the franking privilege, and should increase the salaries, 157; the people will not approve of it, 157; by the increase you put members beyond temptation, 158; substitute to increase all salaries lost, 158; amendment to strike out members of Congress moved, 158; no reason to increase salaries of present members, 158; let those who think the increase not right sign a pledge not to take it, 158; amendment to strike out lost, 159; other amendments offered and lost, 159; original substitute agreed to, 159; amendments agreed to in committee, and disagreed to in the House, and conference committee appointed, 159.

In the Senate, the bill with the House amendments considered, 159; moved to strike out all after the provision for the President's salary, 159; a separate vote on the increase of the salaries of members desired, 159; opposed to the whole proposition, 160; shall poor men be allowed to participate in the administration of the Government? 160; the salary of the President ought to be increased, 160; expenses of living, 160; the party is committed to economy, 160; this amendment is inopportune, 161; motion to strike

out lost, 161; motion to strike out so much as refers to members of Congress, 161; amendment withdrawn, 161; motion to postpone the operation of the act, 161; lost, 161; motion to strike out renewed and lost, 161; motion to concur with the salary amendment of the House, 162; lost, 162; report of the committee of conference, 162; the Senate insist on its amendments, 162.

In the House, report of committee of conference, 163; main question ordered, 163; report of conference committee explained, 163; the annual increase of expenditure, 163; what the report involves, 163; the country should be awakened, 163; the compensation should remain as at present, 164; we have earned this increase of salary, 164; protest against the proposition, 164; most auspicious time to raise salaries, 164; report of the committee adopted, 165.

In the Senate, report of the conference committee made, 165; the committee have transcended their jurisdiction, 165; action of the Senate, 165; motion to recommit the report with instructions, 165; lost, 166; moved to recommit without instructions, 166; the bill proposes to pay an increase of back salary, 166; that is right, 166; precedents are all for it, 166; motion to recommit lost, 166; the Republicans will lose Connecticut or Rhode Island, 166; the report concurred in, 167.

In the Senate, the supplement to the bill to provide for a national currency considered, 167; the bill contemplates specie payments, 167; too radical a measure, 167; or to convert greenbacks into interest-bearing bonds, 167; how often can they be paid out again? 167; recent reissues, 168; which is the best, bank-notes or greenbacks? 168; is a bank-note circulation advisable? 168; can have inflation by means of the national banks, 169; we can secure an elastic currency by this bill, 169; shall the banks keep a reserve? 169; motion to strike out the original bill, and insert a substitute, 170; the substitute, 170; the chief object should be a resumption of specie payments, 171; a crying demand of the present hour, 171; is this a decisive step toward resumption? 171; the practical working of this law doubtful, 171; increase in the bulk of the currency, 173; this bill does not carry out the theory of the chairman of the committee, 172; not a bill to resume specie payments, but to give the Secretary the option to pay in coin, 173; its provisions examined, 173; do not believe in an elastic currency, 173; why is it that there has been such stability? 174; the amendment proposed, 174; rejected, 174; other amendments moved and lost, 175; difficulties which exist, 175; aim and object of the bill, 175; shall we undertake peremptorily to establish specie payments? 176; if the bill will bring about specie payments, let us have it at once, 176; what will be the increase of specie circulation? 177; bill ordered to lie on the table, 177.

In the House, resolution for information relative to the affairs of Louisiana offered, 178; denial that the President has interfered, 178; refusal to suspend the rules, 178.

In the Senate, a resolution to authorize an inquiry relative to Louisiana, 179; what the resolution requires, 179; what jurisdiction has the Senate over the election of President? 179; resolution adopted, 179.

In the House, a resolution to appoint a special committee to inquire into the election, etc., in Louisiana considered, 179; two Governors inaugurated in Louisiana, 179; inquire into the facts of the election to ascertain which of these organizations shall be recognized by Congress, 179; what has been done in

Louisiana? 180; what is our duty? 180; the matter in dispute, 180; the uprooting of the government of the State is no trifling matter, 180; what will be the effect of the appointment of this committee? 181; the remedy consists in the Federal Government keeping its hands off the people, 181; one of the most important questions that can engage the attention of the House, 181; substitute offered and adopted, 182; amended resolution adopted, 183.

In the Senate, a resolution offered to inquire whether there is a legal State government in Louisiana, and by whom constituted, 182; what do we know on this subject? 182; it is the duty of the President to foresee the possibility of collision between rival claimants, and to be ready to meet it, 183; this is denied, 183; has the President interfered? 184; previous acts of Congress, 184; a marshal may call in the aid of army, 184; that would break up military operations, 185; the army cannot be summoned without the authority of an act of Congress, 185; the instance of the fugitive slave law, 185; nature of the *posse comitatus*, 186; what is left of the Democratic party? 186; the civil rights bill, 186; a general power without the authority of law, 187; whence is the power derived? 187; what is meant, when the Constitution says the President shall take care that the laws be faithfully executed? 187; he cannot under this provision employ at his mere will the army and navy as a part of the *posse comitatus*, by putting them under a civil officer, 188; he shall take care that the laws are executed in the manner provided by law, 189; the act of 1861, 189; we are in the dark as to the facts, 189; a Federal court has no right to overturn one government and set up another, 189; what is the case when he may call forth the militia for the suppression of insurrection? 189; what are the prerequisites of the law? 190; who has the power to call forth the militia? 190; the enforcement act, 190; provisions of the act of 1795, 191; the act of 1807, 191; extracts from the act of 1795, 191; when is it that the President can call forth the militia? 192; what has been the practice of the Government? 192; what is a combination of insurgents? 192; the enforcement act of 1871, its powers and exceptions, 193; the provision of the Constitution and its meaning, 193; the proposal to rebel against the decision of courts, 193; the judicial is bound by the political department, on the question what is the lawful government in a State, 194; the case of Rhode Island, 194; what was the case before President Grant? 194; the laws authorize the contest of elections and provide the tribunal to try it, 194; now, what is the duty of the President? 195; it is for Congress to decide, and, in the absence of that decision, the President decides, 195.

Message from the President relative to affairs in Louisiana, 195.

In the Senate, a bill to establish a government in Louisiana considered, 196; the bill, 196, 197; substitute offered, 198; now, what is it necessary for Congress to do? 198; let us see what are either admitted or undeniable facts, 198; is there a lawful government in Louisiana? 199; what is said in answer to this? 199; we are bound to decide that question for ourselves irrespective of any decision of the Supreme Court of Louisiana, 199; look at the facts to find out which was the Legislature, and what do you find? 199; the true solution is to recognize McEnery as Governor, 200; no one recognizes the McEnery returns as legal, 200; both elections fraudulent, but more evidence of fraud on one side than on the other, 200; this

whole matter is a State question, 201; not a question in this case that does not arise under the constitution and laws of Louisiana, 201; the State tribunals have settled them, 201; if the Legislature decides fraudulently, we have a right to inquire into the organization of the State government, 202; we must determine upon the evidence, which is the government, or let the present one go on until the people determine it, 202; better to set both the contestants aside, 202; in the mean time, who shall perform the ordinary executive functions, 202; one of three things to be done, 203; the statement that the election was an organized fraud is without a basis to rest on, 202; evidence of the canvassers, 202; shall the present government continue or not? 204; bill rejected, 204; motion to reconsider and bill laid on the table, 204.

In the Senate, the bill to create a commission to award the indemnity fines paid by Great Britain considered, 204; grounds for the bill, 204; history of these claims, 204; her Majesty's Government committed no wrong in a personal sense against any citizen of the United States, 205; the failure of the British Government in the performance of its duty was a national failure, 205; the cause of our complaint was the assistance she rendered to the Confederates, 205; the treaty looks not to the payment of any citizen, 206; course of historic precedent in reclamations, 206; the High Commission considered this question as an international one, 206; what did they do? 206; the articles of the treaty, 207; we are under no obligation to do with the award any thing but what we think right, 208; the scope of the bill is that the money belongs to the nation, and not to the citizen, 208; the bill proposes to pay all claims but those of insurance companies, 209; these as valid as any others, 209; if you apply the doctrine of principal and accessory, Great Britain would have to be regarded as a belligerent, 209; it will not do to say she was at peace with us, and at the same time a belligerent, 209; that sophism is the sole foundation for taking five millions from the rightful owners and keeping it ourselves, 210; the history of these claims, 210; the Johnson-Clarendon treaty, 210; the present treaty, 210; defeat of the first for what purpose? 211; reason why the claims of citizens are not spoken of, 211; public claims rejected, 212; the treaty does recognize the claims of citizens of the United States, 212; what did the tribunal do? 212; bill passed in the Senate, 212; do. in the House, 213.

In the House, the report of the committee on the Credit Mobilier affairs considered, 213; substitute offered and not considered, 213; a word in explanation of the report, 214; the evidence to sustain the action of the committee—facts in relation to Mr. Ames, 214-216; facts in relation to Mr. Brooks, 217-221; reply of Mr. Ames, 222; history of the construction of the Union Pacific Railroad, 222; legislation of Congress, 222, 223; examination of the charges, 224-228; speech of Mr. Brooks in relation to the Credit Mobilier charges, 229-233; substitute for the report of the committee offered, 235; the substitute agreed to, 235; action of the House on the substituted resolutions, 235, 237.

Act in relation to the increase of the salaries of members of Congress and others, 237; adjournment of Congress, 237.

COWLING, ROSCOE.—Senator from New York, 137; on a State government in Louisiana, 193.

CONNECTICUT.—Republican State Convention, 226; nominations, 226; resolutions, 226; resolutions of Labor

Reformers presented, 228; substitute, 228, 229; the subjects of other resolutions, 229; Democratic and Liberal Republican Convention, 229; nominations, 229; resolutions, 229; resolutions of Labor Reformers adopted, 240; Temperance Association, 240; resolutions, 240; election, 240; State debt, 240; revenue, 240; expenditures, 240; taxable property, 241; school fund, 241; savings-banks, 241; trust companies, 241; operations of insurance companies, 241, 242; schools, 242; insane hospitals, 242; Deaf and Dumb Asylum, 242; Industrial and Reform Schools, 242; State-prison, 242; county jails, 242; proposition to amend the constitution, 242; amendments proposed, 244; rate of interest, 244; question of two capitals, 244; vote of the people, 245; other acts of the Legislature, 245; vital statistics of the State, 245; propagation of fish, 245; the railroad interest, 246; its details, 246.

Convention of Governors of Southern States, 754.

COOLEY, ex-Judge W. H.—Obituary of, 573.

CORDOBA.—Province of the Argentine Republic, 22; its position and prospects, 33.

COSTA RICA.—Extent, 246; boundaries, 246; area, 246; population, 246; territorial divisions, 246; President and Vice-President, 247; national revenue, 247; expenditures, 247; public debt, 247; exports, 247; imports, 247; increase in the production of coffee, 247; navigation, 247; railways, 247; telegraph-lines, 248; important improvements, 248; schools, 248; immigration of coolies, 248; President's message, 248; prospects of Costa Rica, 248; national credit, 248; increase of the revenue, 248; recent panics, 248; discovery of ancient ruins, 249; action of President Guardia, 249; decree in regard to political refugees, 249; question of limits, 51.

COSTE, JEAN JACQUES MARIE CYRIEN VICTOR, French scientist.—Birth, 249; death, 249; publications, 249; member of French Institute, 249; works on embryology, 249; works on pisciculture, 249; other works, 249.

COX, SAMUEL S.—Representative from New York, 137; Speaker *pro tem.*, 138; appoints investigating committee, 138.

CRACE-CALVERT, FREDERICK, M. D., English chemist.—Obituary of, 632.

CRAGIN, AARON H.—Senator from New Hampshire, 137; on the increase of salaries, 166.

CRANSTON, ROBERT B., philanthropist.—Obituary of, 560.

Credit Mobilier.—Proposal to investigate charges in relation thereto, 135; committee appointed, 135; action of Congress, 212; report of the committee of Congress, 671 (see *Congress, United States*).

CROSBY, DIXI.—American surgeon, 249; birth, 249; death, 249; education, 249; surgical appointments, 249; abilities, 249.

CUBA.—Insurrection in, 710; no new features, 719; the Spanish party, 719; affair of the Virginias, 719.

CUMMINS, ALFRED, politician.—Obituary of, 582.

CUMMINS, GEORGE D., assistant bishop.—Letter to his principal bishop, 686; biographical sketch of, 686; reply to Bishop Tozer's letter, 690.

CURTIS, NATHANIEL, merchant.—Obituary of, 585.

CUSHING, JAMES, Jr., school-commissioner.—Obituary of, 575.

CUSHING, SAMUEL B., civil engineer.—Obituary of, 574.

CZERMAK, JOSEF.—German physiologist, 249; death, 250; inventions, 250; pursuits, 250.

D

DALL' ONGARO, FRANCESCO, Italian poet.—Obituary of, 581.
